

# Time-based Icons

## MHC Historical Atlas Project

Each icon is named according to the time it represents. The word "color" in the icon name represents the background color for the icon: either green or brown depending upon the background where it is used.

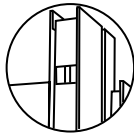

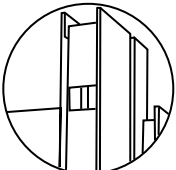

There are three sizes of time-based icons:

*Navigation* is the smallest, designed to fit along the side of the page, inobtrusive but visible

*Breadcrumbs* are larger. They are designed to be more visible along the top of the page.

*Page* are designed to be mini headers to set off the text below them from the rest of the page.
