

## Installing McAfee Virus Scan – Windows XP

Open a browser and visit the following webpage : <http://www.mtholyoke.edu/lits/8968.shtml>

- Click the link for downloading the McAfee Anti-Virus Software
- You will be prompted to sign into “Webshell”  
Enter your MHC username and password
- Choose to save the file to disk when prompted  
Most browsers will save to the desktop by default
- Other antivirus products must **NOT** be installed:
  - Go to the Control Panel  
(Start menu, then Settings, and select the Control Panel)
  - Select the icon to Add or Remove Programs
  - In the list that appears look for and remove anything that contains the words: virus, anti-virus or that looks like it might be antivirus or computer-health related. This may include but is not limited to: McAfee Virus Scan, Norton Antivirus, Dr. Solomon's Antivirus, Antidote, PCcillin, or EZ-Antivirus.
  - A reboot may be required and is recommended
- Go to the location to which the file was saved and double-click the file icon to begin installation
- An initial window will appear.  
This progress bar may take several minutes to complete depending on the speed of your system
- On the welcoming screen that appears, click next
- Select **Perpetual** from the drop down menu, click the accept selection and then ok
- Choose typical and click next
- Be sure that “Standard Protection” is selected, click next
- In the next window, click the Install button
- UN-check both the “Run On-Demand Scan” checkbox, assure that “Update Now” IS selected, and click the finish button to complete the main program installation

## Installing the E-Policy Orchestrator

The antivirus software requires this component for connecting to the MHC on-campus repository of virus definitions. It also adds enhanced protection against locally discovered viruses.

- Return to <http://www.mtholyoke.edu/lits/8968.shtml> and click the link to download the McAfee E-Policy Orchestrator Software
- You will be prompted to sign into “Webshell”  
Enter your MHC username and password
- Choose to save the file to disk when prompted
- Go to the location to which the file was saved and double-click the file icon to begin installation
- A window will appear while the program progresses  
It is normal for the software to appear paused for a moment while it stops processes
- When finished, it will bring a window stating “Setup completed successfully”
- Click Ok to complete installation

Please restart your computer after completing both of the above installs. If you require assistance or experience problems please contact the [helpdesk@mtholyoke.edu](mailto:helpdesk@mtholyoke.edu)  
The diagnostic center on the 4<sup>th</sup> floor of the Library is also available for assistance with student machines
