

# MARKET RESEARCH INTERN

***PAID INTERNSHIP  
FLEXIBLE WORK SCHEDULE  
POSITIONS AVAILABLE YEAR-ROUND***

JOB CODE: INTERN

## JOB DESCRIPTION

The Market Research Intern (MRI) is a professional staff member of a leading medical products consulting firm who supports multiple consulting projects through information preparation, data collection/analysis, and existing database management. An internship at BBC provides hands-on exposure to research and management consulting projects in a hard-working, collaborative environment with a focus on making the experience positive for all parties. The successful completion of the internship frequently results in the offer of a full-time Market Research Analyst position.

### MRIs possess the following qualifications:

- In the third or fourth year of a B.S. or B.A.
- Excellent analytical and conceptual skills
- Verbal and written communication abilities
- Computer literacy
- Science background or familiarity with In Vitro Diagnostic (IVD) industry is a plus
- Access to a car (required)
- Ability to commit to a minimum of 20 working hours/week.

### General Responsibilities Include:

- Maintaining spreadsheets and databases
- Conducting telephone and in-person interviews with IVD products users
- Conducting company and product research (primary and secondary)
- Developing company and product profiles and competitive assessments
- Performing computational checking and editing of spreadsheets
- Writing research sections of reports.

## ABOUT BBC
