

## RESEARCH PERMISSION FORM

Part of the promise of SummerMath/SEARCH is that it provides an opportunity to observe and think carefully about the quality of instruction received by young women as well as to extend our findings into new settings. We also carefully assess the overall learning environment as we try to address the broader educational needs of young women. Our priority in designing research is that all materials used will have educational benefit for our students. In addition, all research proposals will be reviewed prior to implementation to insure that the rights and privacy of the individual are protected.

Please sign below so that we may include information as part of our ongoing analysis of the approaches and outcomes of SummerMath/SEARCH. **No student's responses will be used individually, and all information will be kept strictly confidential.** If you have any questions or concerns about this matter, Please contact us.

## MEDIA PERMISSION FORM

In order to share our approach with other educators and to promote SummerMath/SEARCH, we write articles for professional journals and advertise in a number of national publications, such as the Petersons Summer Opportunity Guide and the New York Times, as well as our own web site. We request your permission to use photos or quotes of the above-named student in our promotional material or articles written about the program. If time allows, we generally check with you about the specific photo or quote being used, but we may not always be able to do so.
