2 Day Workshop

21 May, 2016 - 22 May, 2016

Empowering Our Kids to Save the Planet

Source: <http://www.metering.com/reports/renewable-energy-integration-increases-as-coal-powered-generation-decreases-in-the-us/>

Our Future Depends On it!

With our climate change rapidly affecting our planet, we are faced with the challenges of saving our planet from the fossil fuel pollution and other man-made harm we have caused to the earth's atmosphere.

Middle & High school students have opportunity to broaden their knowledge on the socio-economic implications of climate change and alternative renewable energy resources. Students become advocates for their neighbourhoods and fight global warming.
