We will look at the personalities and choices of humanitarians through the lens of humanistic and existential theories of personality. The development and social psychology of altruism will also be included. This course will use a case-based approach. In the beginning of the semester, we will look together at the writing of some recent Nobel Peace Prize winners and then in the second half of the semester, students will choose a humanitarian and do an analysis of her/his life and contributions.

Notes: 2 meetings (75 minutes)
Instructors: S. Burggraf

**PSYCH-200-01 - Psychology - 2003-2004**

*(Fall)* Experimental Methods in Psychology

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course provides an introduction to the skills necessary for becoming good producers and consumers of experimental psychological research. Students learn to develop research questions, survey related literature, design rigorous and ethically sound experiments, and collect, analyze, and interpret data. Students are introduced to computer use in psychology and learn to read and critique original empirical journal articles. The course culminates in an original, collaborative research project and poster presentation.

Prerequisites: Psychology 100 or 110, AND Psychology 201

Notes: 2 meetings (75 minutes), 2 labs (2 hours); students MUST take statistics (Psychology 201) before enrolling in this course; students should sign up for the lecture course and one lab section
Instructors: K. Binder

Section Instructors: 01 LAB I. Blouin | 02 LAB I. Blouin | 03 LAB I. Blouin | 04 LAB I. Blouin |

**PSYCH-210-01 - Psychology - 2003-2004**
(Fall) Social Psychology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course surveys a range of topics within social psychology. How do other people influence us? How do people perceive one another? How do attitudes develop and change? Under what conditions do people conform to, or deviate from, social norms? We will survey concepts across several areas of social psychology with an emphasis on empirical research evidence. In addition, we will explore contemplative practices (looking inward, examining our own experience) to understand course materials from an introspective perspective. Juxtaposing objective and subjective methods allows us to evaluate what psychology is missing when it excludes subjective methods/introspection from its methodology.
Prerequisites: Psychology 100 or 110
Notes: 3 meetings (50 minutes)
Instructors: S. Burggraf

PSYCH-211-01 - Psychology - 2003-2004
(Spring) Psychology of Women
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)
An intensive analysis of key theoretical and conceptual works that have shaped the study of the psychology of women over the past 80 years. Each week, we will read and analyze a major text, situating its ideas within historical and cultural contexts of the field at that time. Works to be considered will include: Freud's, Hornby's, and Deutsch's classic psychoanalytic papers on women; Chodorow's Reproduction of Mothering; Gilligan's In a Different Voice; Miller's Toward a New Psychology of Women; Chesele's Women and Madness; Valian's Why So Slow?; and Fausto-Sterling's critiques of biological determinism. Heavy reading load; frequent oral presentations; group project required.
Prerequisites: Psychology 100. Preference will be given to those who have Psychology 200, 201, and 220.
Notes: 1 meeting (3 hours)
Instructors: G. Hornstein

PSYCH-212-01 - Psychology - 2003-2004
(Fall) Individuals and Organizations
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Complex Organizations 212f)

PSYCH-213-01 - Psychology - 2003-2004
(Fall) Psychology of Racism
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(African American and African Studies 213f)
Examines the psychological causes and emotional reality of racism as it appears in everyday life. Through lectures, readings, simulation exercises, group research projects, and extensive class discussion, students have the opportunity to explore the psychological impact of racism on both the oppressor and the oppressed.
Prerequisites: permission of instructor; students must submit a statement to Ms. Romney during advising week; preference given to sophomores
Notes: 1 meeting (3 hours)
Instructors: P. Romney
Expected enrollment: 25

PSYCH-220-01 - Psychology - 2003-2004
(Fall) Theories of Personality
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)
Why do people behave as they do? What makes us similar to one another in certain respects, yet unique in others? Do strange or destructive actions have different causes than more ordinary ones? The first half of the course concentrates in detail on classic approaches to such questions by Freud and Jung; the second half surveys briefer works by later theorists (e.g., Sullivan, Decuech, Klein, Winnicott). Heavy reading load; frequent oral assignments; group project required.
Prerequisites: Psychology 100 or 110
Notes: 2 meetings (75 minutes; students who take Psychology 329 concurrently will be given priority in admission
Instructors: G. Hornstein
PSYCH-230-01 - Psychology - 2003-2004
(Fall) Developmental Psychology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Examines changes in cognitive, social, and emotional functioning, including theory and research that illuminate some central issues in characterizing these changes: the relative contributions of nature and nurture, the influence of the context on development, continuity versus discontinuity in development, and the concept of stage. Includes observations at the Gorse Child Study Center.
Prerequisites: Psychology 100 or 110
Notes: 2 meetings (75 minutes) plus mandatory fourth hour
Instructors: R. Shilkret

PSYCH-230-01 - Psychology - 2003-2004
(Spring) Developmental Psychology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Instructors: K. Stansbury

PSYCH-233-01 - Psychology - 2003-2004
(Fall) Educational Psychology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Community-based learning course; Education 233fs)
What do we learn? How do we learn? Why do we learn? In this course, we will study issues of learning, teaching, and motivation that are central to educational psychology. We will explore the shifting paradigms within educational psychology, multiple subject matter areas, (dis)continuities between classroom and home cultures, students' prior experiences, teachers as learners, ethnic and gender identity in the classroom, and learning in out-of-school settings. Requires a prepracticum in a community-based setting.
Prerequisites: Psychology 100 or 110
Notes: 2 meetings (75 minutes), 4th hour, and prepracticum (2-hour block per week)
Instructors: B. Packard

PSYCH-233-01 - Psychology - 2003-2004

PSYCH-234-01 - Psychology - 2003-2004
(Spring) Differences in Learning
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Education 234s)

PSYCH-236-01 - Psychology - 2003-2004
(Spring) Adolescent Development
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course offers a comprehensive introduction to human development during adolescence. It considers historical and cultural forces that contribute to adolescence as a distinct segment of the life span. Contemporary problems confronting adolescents—such as crime, violence, gender, race, eating disorders, substance abuse, and depression—are also examined.

Prerequisites: Psychology 100 or 110
Notes: 2 meetings (75 minutes)
Instructors: S. Burggraf

**PSYCH-237-01 - Psychology - 2003-2004**
( Fall ) Social Developmental Psychology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Community-based learning course)
This course will focus on the social domains of development from early infancy through pre-adolescence. Some of the content areas that will be covered include early relationships with parents; the development of gender, friendships, parenting styles, self-esteem and morality; and social cognition. The content will be addressed from theoretical and empirical frameworks. Students will be placed in a community-based learning (CBL) site with preschoolers, elementary school children, or adolescents. The goal of the CBL component is to give an experience base that allows us to translate the research and theory we have learned into a format that might be useful to the populations being served.
Prerequisites: Psychology 100 or 110
Notes: 2 meetings (75 minutes). A community-based learning component is required (2-3 hours per week)
Instructors: K. Stansbury

**PSYCH-240-01 - Psychology - 2003-2004**
( Fall ) Visual and Auditory Perception
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Why does the moon on the horizon appear so much bigger than when it is overhead, even though its distance from Earth is always the same? Why can't some people distinguish red socks from green ones? How do Magic Eye pictures work? This course examines physiological and psychological approaches to the study of visual illusions, color vision, depth perception, and many other perceptual phenomena. Although the emphasis is on vision, hearing and touch will also be covered.
Prerequisites: Psychology 100 or 110
Notes: 2 meetings (75 minutes)
Instructors: J. Cohen

**PSYCH-241-01 - Psychology - 2003-2004**
( Spring ) Cognitive Psychology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Cognition encompasses a range of phenomena that define our mental lives. This course considers empirical investigations and theoretical accounts of cognitive issues, including learning and memory, creativity and problem solving, decision making, attention, consciousness, and language.
Prerequisites: Psychology 100 or 110 or permission of instructor
Notes: 3 meetings (50 minutes)
Instructors: K. Binder

**PSYCH-250-01 - Psychology - 2003-2004**
( Fall ) Introduction to the Biological Bases of Behavior
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Neuroscience and Behavior 250f)
This course is an introduction to and survey of the biological bases of behavior, including physiological, biochemical, and neurophysiological determinants of sensation, motor control, sleep, eating and drinking, learning and memory, language, and mental disorders.
Prerequisites: Psychology 100 and 4 credits in biological sciences
Notes: 3 meetings (50 minutes)
Instructors: W. Millard

**PSYCH-295-01 - Psychology - 2003-2004**
( Fall ) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Independent study programs are arranged with individual faculty members in the department.
Prerequisites: permission of instructor
Instructors: The department
PSYCH-295-01 - Psychology - 2003-2004
(Spring) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Independent research projects are arranged with individual faculty members in the department.
Prerequisites: permission of instructor
Instructors: The department

PSYCH-300-01 - Psychology - 2003-2004
(Fall) Seminar in History and Systems of Psychology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Prerequisites: permission of instructor
Notes: 1 meeting (3 hours)
Instructors: The department
Expected enrollment: 15

PSYCH-300-01 - Psychology - 2003-2004
(Spring) Seminar in History and Systems of Psychology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking- and writing-intensive)
Spring 2004: Controversies in Psychology
A seminar designed to give advanced psychology and neuroscience students a broad conceptual and historical overview of their discipline through an analysis of its enduring disputes. Each week we will read and analyze primary source materials (both historical and contemporary) on several sides of a major controversy, such as: Are there racial differences in intelligence? Is madness rooted in faulty biology? Do women's brains differ from men's? Is violence innate or learned? Each student will write a major research paper on an additional controversy not discussed in class. Heavy reading load; frequent written and oral assignments.
Prerequisites: Psychology 100, 200, 201, plus 8 additional credits in the department. Preference given to senior psychology and neuroscience majors
Notes: 1 meeting (3 hours)
Instructors: G. Hornstein
Expected enrollment: 20

PSYCH-310-01 - Psychology - 2003-2004
(Fall) Laboratory: Research Methods in Social Psychology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course is an introduction to laboratory and field methods in social psychology: methodology, data analysis, ethical problems, statistical inference, and research design. All students are expected to design and conduct a research project.
Prerequisites: Psychology 200 and permission of instructor. Written statement to Professor Burggraf during advising week required.
Notes: 2 meetings (75 minutes) plus fourth hour
Instructors: F. Deutsch
Expected enrollment: 12

PSYCH-310-01 - Psychology - 2003-2004
(Spring) Laboratory: Research Methods in Social Psychology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course is an introduction to laboratory and field methods in social psychology: methodology, data analysis, ethical problems, statistical inference, and research design. All students are expected to design and conduct a research project.
Prerequisites: Psychology 200 and permission of instructor. Written statement to Professor Burggraf during advising week required.
Notes: 2 meetings (75 minutes) This course is repeatable Spring 2004 semester only.
Instructors: S. Burggraf
Expected enrollment: 12

PSYCH-319-01 - Psychology - 2003-2004
(Spring) Seminar in Social Psychology: Gender and Domestic Labor
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Women's Studies 333x/03)
This course examines social psychology and sociological theories and research addressing why women do more housework and child care than men. It pays special attention to the situation of dual-earner families and considers class and ethnic differences on the nature of this inequality and the barriers to full equality at home.
Prerequisites: permission of instructor. Students must meet with instructor during advising week to get permission to enter the course.
Notes: 1 meeting (2 hours)
Instructors: F. Deutsch
Expected enrollment: 15

**PSYCH-320-01** - Psychology - 2003-2004
(Spring) Concepts of Abnormality
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog. etc. requirement
This course is a study of how maladaptive patterns of thought and action are understood from a psychological viewpoint. Behaviors ranging from neurotic to psychotic are studied in terms of underlying character structure and origins in childhood experience. Competing psychoanalytic theories are brought to bear on these phenomena.
Prerequisites: jr, sr (permission required for exceptions), two prior psychology courses, Psychology 230 recommended
Notes: 2 meetings (75 minutes)
Instructors: R. Shilkret

**PSYCH-322-01** - Psychology - 2003-2004
(Fall) Psychoanalytic Psychology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog. etc. requirement
This extensive examination of Freud's systematic psychology focuses on such phenomena as the effects of early experience, continuity and change in development, and similarities among and differences between individuals. Readings include selections from Sigmund Freud's earlier work and from the sweeping revisions of the 1920s. Criticisms and revisions of Freud are discussed. Throughout, ideas from contemporary psychoanalysis are compared and contrasted with those of Freud.
Prerequisites: Psychology 230, 220 recommended
Notes: 2 meetings (75 minutes)
Instructors: R. Shilkret

**PSYCH-323-01** - Psychology - 2003-2004
(Spring) Laboratory in Personality Research: Qualitative Methods
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog. etc. requirement
This laboratory course focuses on the study of individual lives and explores interviewing as a qualitative research strategy for the understanding of human experience. The course aims to provide a forum to discuss the study of individual lives within the social sciences, to consider interviewing techniques and qualitative methods of data analysis, and to provide students the opportunity to conduct a study of their own using this methodology.
Prerequisites: Psychology 200, 201, 220, and permission of instructor. Students must meet with the instructor during advising week to get permission to enter the course.
Notes: 1 meeting (3 hours)
Instructors: S. Lawrence
Expected enrollment: 15

**PSYCH-324-01** - Psychology - 2003-2004
(Spring) Laboratory in Personality Research: Quantitative Methods - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog. etc. requirement
Personality-relevant constructs, such as attachment, adjustment, achievement motivation, communality, dominance, sociality, and others, are usually studied among adults using questionnaires and inventories. A single large class research project will be conducted, with all students participating in all phases of the research.
Prerequisites: Psychology 200 and 201, and either Psychology 210 or 230 and permission of instructor; an essay explaining why you want to take the course is required
Notes: 2 meetings (75 minutes)
Instructors: R. Shilkret
Expected enrollment: 15

**PSYCH-329-01** - Psychology - 2003-2004
(Fall) Seminar in Personality and Abnormal Psychology: Hearing Voices: Patient Narratives of Mental Illness
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog. etc. requirement
Psychologists have typically conceptualized “mental illness” in terms of the symptoms and diagnoses proposed by psychiatrists in DSM. These categories, while perhaps useful for prescribing medication, do little to help us understand the subjective experience of mental distress. In this seminar, we analyze patient narratives across a range of genres (autobiography, theory, fiction, oral testimony, poetry, art) to gain insight into patients' own conceptions of the causes, nature, and
appropriate response to mental suffering of many kinds.
Prerequisites: Psychology 100, 8 credits in the department. Students with a background in literature particularly welcome
Notes: 1 meeting (3 hours)
Instructors: G. Hornstein
Expected enrollment: 20

PSYCH-329-02 - Psychology - 2003-2004
(Fall) Seminar in Personality and Abnormal Psychology: Youth, Risk, and Resilience
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
What individual, contextual, and cultural factors are protective and contribute to positive development among adolescents? What factors contribute to socioemotional and psychological vulnerabilities in young people? How is it that some adolescents overcome adversity and others do not? This seminar examines the conceptual and empirical literature as related to risk and resilience during adolescence.
Prerequisites: Psychology 236
Notes: 1 meeting (3 hours)
Instructors: H. Vazquez-Garcia
Expected enrollment: 15

PSYCH-330-01 - Psychology - 2003-2004
(Fall) Lab in Developmental Psychology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course is a study of research methods in developmental psychology, focusing on observational, survey, and interview techniques for studying young children, adolescents, and adults. It encourages the student to think about the basic issues of developmental psychology research: the conceptualization of problems, design of research, choice of methods to be used, and ethical questions that might arise. Students complete a major research project.
Prerequisites: Psychology 200, 201, 230
Notes: 1 meeting (3 hours); prerequisites will be strictly enforced, and seniors have first priority
Instructors: K. Stansbury
Expected enrollment: 12

PSYCH-330-01 - Psychology - 2003-2004

PSYCH-331-01 - Psychology - 2003-2004
(Fall) Lab in Early Social and Personality Development
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
In the role of a participant-observer, each student studies intensively the social and personality development of the children in one classroom at the Gorse Child Study Center. Students learn how to articulate developmental changes and individual differences by analyzing detailed observations. Topics include social cognition, peer relationships, social skills, concepts of friendship, emotional development, identity formation, self-esteem, and the social and cultural context of development.
Prerequisites: Psychology 200, 201, and 230 or permission of instructor
Notes: 1 meeting (2 hours), 2 labs (3 hours each) at Gorse Child Study Center
Instructors: P. Ramsey
Expected enrollment: 15

PSYCH-331-01 - Psychology - 2003-2004

(Fall) **Laboratory in Psychological Assessment**
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Historical development, theoretical bases, and critical evaluation of tests used to describe adult cognitive and personality functioning. Supervised practicum in test administration, scoring, and interpretation.
Prerequisites: Psychology 200 and 201, either Psychology 230 or 320, and permission of instructor
Notes: 1 meeting (3 hours); students must submit a statement and schedule an interview with the instructor during the advising week
Instructors: R. Shilkret
Expected enrollment: 12

**PSYCH-337-01 - Psychology - 2003-2004**
(Fall) **Seminar in Educational Psychology: Motivation**
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Community-based learning course; Speaking-intensive)
What influences our desire to learn, to participate in certain activities, or to become particular kinds of people? We will examine the topic of "motivation" using several perspectives, across age levels and in various settings. Drawing from a variety of resources, including autobiographies, research studies, and videos, we will target our own motivation through reflection and action and the motivation of others through active coaching and mentoring in a community-based setting.
Prerequisites: Psychology 233 or permission of instructor. Students need to submit an application form during advising week. Forms are available in the department office.
Notes: 1 meeting (3 hours) and a 4th hour; requires a field component in a community-based site (at least a 2-hour block per week)
Instructors: B. Packard
Expected enrollment: 18

**PSYCH-339-01 - Psychology - 2003-2004**
(Spring) **Seminar in Developmental Psychology: First Love: Attachment Theory and Research**
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
The relationship with the infant's primary caretaker, usually the mother, develops in a complex way during the first year after birth. We will study what is now known about this relationship, how we know about its importance to the infant, and the variation in types of such relationships early in life. The importance of this first love for later development, in childhood, adolescence, and adult life will be considered. Methods of research will be emphasized and students will be expected to give class presentations.
Prerequisites: jr, sr, Psychology 200, 230 and permission of instructor; written statement to Professor Shilkret during advising week required
Notes: 1 meeting (3 hours)
Instructors: R. Shilkret
Expected enrollment: 12

**PSYCH-339-02 - Psychology - 2003-2004**
(Spring) **Seminar in Developmental Psychology: The Neurobiology of the Mother-Child Relationship**
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Could smiling at your baby affect her immune system? Can an infant protect her mother from depression? Do infants with secure attachments develop stress-resistant brains? We will attempt to answer these and other questions by reading the latest research. We will review basic neuroendocrinology and then work from the following hypothesis: the extreme neurophysiological immaturity of human newborns allows early maternal care to play a role in shaping the development of the human brain.
Prerequisites: Psychology 230, 250, and permission of instructor. Students must meet with the instructor during advising week to get permission to enter the course
Notes: 1 meeting (3 hours)
Instructors: K. Stansbury
Expected enrollment: 15

**PSYCH-340-01 - Psychology - 2003-2004**
(Fall) **Laboratory in Perception and Cognition: Cognition and Literacy - *Not offered this year/term**
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Community-based learning course)
Adult illiteracy in the U.S. presents an ever-growing challenge. To understand this problem, we will learn various theories of reading. However, since many models of reading are based on data gathered from children, we will also examine how the cognitive abilities of adults are different from those of children. A large component of this class concerns learning the lab techniques associated with assessing reading abilities. In addition, since this is a community-based learning course, each student will become a tutor for an adult enrolled in an area literacy program.
Prerequisites: Psychology 100, 201, 200 and permission of instructor
Notes: 1 meeting (3 hours) plus 3 hours per week as a literacy tutor in Springfield
Instructors: K. Binder
Expected enrollment: 20

PSYCH-349-01 - Psychology - 2003-2004
(Fall) Seminar in Perception and Cognition
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)
In this seminar we will explore various genetic syndromes, developmental disabilities, and brain damage cases that produce asymmetric cognitive profiles. We will examine the cognitive strengths and weaknesses associated with various syndromes and disabilities in order to gain a greater understanding of the syndrome itself, but we will also explore how these cases inform us about learning, memory, and development in "normal" individuals.
Prerequisites: Psychology 100 or 110, Psychology 200 and 201, and permission of instructor
Notes: 1 meeting (2 hours 15 minutes)
Instructors: K. Binder
Expected enrollment: 12

PSYCH-350-01 - Psychology - 2003-2004
(Spring) Laboratory in Behavioral Neuroscience
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This laboratory provides intensive study and discussion of specific topics in behavioral neuroscience, including psychopharmacology, neuroanatomy, electronics, and surgery. Examination of methods and experimentation in the laboratory.
Prerequisites: Psychology 200, 250, and permission of instructor; pre-enrolled seniors and majors have priority. Students must meet with the instructor during advising week to get permission to enter the course.
Notes: 2 meetings (2 hours)
Instructors: W. Millard
Expected enrollment: 12

PSYCH-351-01 - Psychology - 2003-2004
(Spring) Laboratory in Animal Learning and Animal Behavior
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Several projects within such areas as feeding, aggression, reproduction, and learning are researched by students working in small groups. The course stresses the acquisition of research skills required for naturalistic and laboratory observation in the study of animal learning and behavior.
Prerequisites: Psychology 200. Preference given to senior Psychology and Neuroscience majors.
Notes: 1 meeting (3 hours)
Instructors: K. Hollis
Expected enrollment: 12

PSYCH-352-01 - Psychology - 2003-2004
(Spring) Laboratory in Sensory Psychology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This laboratory course offers a detailed examination of selected topics in vision research, emphasizing the interrelations of anatomical, physiological, and behavioral data. Laboratory demonstrations and experiments introduce behavioral methods of study of sensory systems. Principles of function generally applicable to all sensory systems are discussed.
Prerequisites: Psychology 200, 240 or 250 and permission of instructor. Students must meet with the instructor during advising week to get permission to enter the course.
Notes: 2 meetings (50 minutes) and 1 lab (3 hours)
Instructors: J. Cohen
Expected enrollment: 10

PSYCH-359-01 - Psychology - 2003-2004
(Fall) Seminar: Biological Bases of Behavior: Cognition, Evolution, and Behavior
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Can parrots really talk? Can rats be taught to count? Do chimpanzees possess self-awareness? Some researchers say yes while others respond with an emphatic no. Indeed, some researchers even question whether the concept of self-awareness as well as the concepts of deception, altruism, insight, imitation, and consciousness have a legitimate place in the study of animal behavior. This course examines these and other questions central to the field of animal cognition, the study of mechanisms by which animals acquire, process, store, and act on information from the environment.
Prerequisites: Psychology 200; 250 or 251 or 350 or 351 or 4 credits in biological sciences
Notes: 1 meeting (3 hours)
Instructors: K. Hollis
PSYCH-359-01  -  Psychology  -  2003-2004
(Spring) Seminar in the Biological Bases of Behavior: Spring 2004: Of Madness and Molecules: Seminar in Neuropsychopharmacology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Charpentier, a French scientist of the 1940s, unwittingly discovered a chemical that was to alter dramatically our understanding of madness. The chemical, chlorpromazine, has been widely used for the treatment of psychosis. Of interest is neuropsychopharmacology—the science and the technology. The principles of pharmacology are discussed and precede the examination of applications of the technology to psychopathology (for example, schizophrenia, depression, anxiety, and violent behavior).
Prerequisites: Psychology 250 or Biological Sciences 333. Pre-enrolled seniors and majors have priority.
Notes: 1 meeting (3 hours)
Instructors: W. Millard
Expected enrollment: 12

EDUC-102-01  -  Psychology and Education  -  2003-2004
(January) The Four Agreements and the Way of the Council
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This offering is designed to teach how the ancient Toltec tradition can apply to life in the 21st century. Don Miguel Ruiz’s book, "The Four Agreements," will be used to show a unique, authentic philosophy for how to take control of life’s challenges and be free of the stress and strain of
every day living. Additionally, participants will explore Jack Zimmerman's book, "The Way of the Council," and through role-playing, and journaling, learn how to communicate more effectively. Discussions are designed to raise awareness and to assist participants in following Zimmerman's examples of how to speak from the heart; listen from the heart; be lean of expression; and to speak with spontaneity.

Notes: 2 meetings per week (2.5 hours each)
Instructors: R. Green

(Fall) Whiteness and the Construction of Identity
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
First-year seminar (Writing-intensive)
In this course, we will conduct a group inquiry of whiteness in contemporary U.S. culture and how it influences our individual identities. We will explore the social and historical contexts that constructed whiteness and examine how whiteness is enacted in daily life. Frameworks of racial identity development, privilege, dominance, and antiracism will reveal the power of whiteness while enabling us to imagine a whiteness that could enhance social justice.
Notes: 2 meetings (75 minutes)
Instructors: S. Lawrence, S. Pliner
Expected enrollment: 16

(Spring) Learning and Reflecting on Mathematics
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The course will focus on mathematics that serves as preparation for calculus and examines the transition from high school to college mathematics from personal, psychological, and social perspectives. Students will study the concepts of functions, with the objective of gaining skills needed for taking calculus. For students who are more advanced mathematically, the objective is to take a deeper look at these ideas. There will be significant time devoted to reflecting on the process of learning mathematics at this level through autobiographical material, and through reading and discussion about mathematical pedagogy, gender and race issues, and cultural issues related to mathematics.
Prerequisites: 100-level social science class or permission of instructor

Notes: 2 meetings (75 minutes) plus 4th hour. This course may be of special interest to students who are thinking of teaching mathematics, either at the elementary or secondary level, and students who would like to deepen their understanding of some of the mathematics leading up to calculus.

(Fall) Topics in New Testament: Early Jewish and Christian Literature: What Didn’t Make It into the Bible
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Preamble (for topics courses): This seminar explores theological patterns in early Christianity as reflected in the literature of the New Testament. In any given semester, it is organized around a particular theme (e.g., eschatology, christology, ethics, soteriology) or it may be organized around a particular person or literature (such as Pauline thought, Johannine thought). Topics are announced in advance of the semester in which the course is to be given.
Fall 2003: There are hundreds of ancient Jewish and Christian writings that were not chosen to be included in the Hebrew Scripture of the New Testament. This course examines some of these excluded writings. In particular, we will focus on works found among the Dead Sea Scrolls, the Jewish Pseudepigrapha, the Gnostic gospels, and the Apocryphal Acts. In critically examining these texts, we will broaden our appreciation for the diversity within early Judaism and Christianity and explore the politics behind what did and did not make it into the canonical Bible.

(Spring) Topics in Contemporary Theology: Theology Meets the Matrix
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Speaking- and writing-intensive)
19th Century theologians, Schleiermacher, Hegel, and Kierkegaard, believed that speculation, necessity, and mechanistic perfection were dangerous ideas that had conquered their world. The way to break free from these powers was to reconsider the meaning of religion.
As we enter the 21st Century, we have come full circle. Technology (The Matrix) threatens our humanity and genuine religious sensibility by "blinding" us from truth. We have become slaves to a force much larger than ourselves, a reality created by machines.
This course seeks to show how The Matrix is a contemporary text for understanding the similar (and dissimilar) forces that shaped the 19th and 21st Centuries.

(Fall) Topics in Contemporary Theology: Feminist Theologies - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Women's Studies 333f (03))
Mary Daly, Elisabeth Schussler Fiorenza, Phyllis Trible, and Naomi Goldenberg, among others, have argued that traditional Jewish and Christian theological systems have overlooked the needs, concerns, histories, and contributions of women. Their challenges range from the historical modification of a presumably unbiased religious system to the outright rejection of a so-called patriarchal establishment. Whatever their approach, feminist theologies offer diverse and incisive tools for understanding how a theological system operates, how transitory cultural assumptions become embedded in ongoing doctrines, and how apparently minor adjustments can have significant ripple effects.

Preamble (for topics courses): This course offers advanced students an opportunity to investigate with some sophistication a problem that requires careful attention to research methods, to critical literature, and to writing. Seminar topics include people, periods, or problems that have a particular bearing on religion in America.
A distinctive mark of Western thought in the nineteenth century was its fascination with "the origin of things." The origin of the species and the origin of the universe are two prime examples. These two concerns, in particular, had a decisive impact on how religion and science came to be understood and expressed in the twentieth century. As a consequence of the ensuing public debate, this question of "origins" presented a direct challenge to the received theory of creation, the meaning of miracles, as well as the nature of biblical inspiration.

(Fall) Written on the Body: Body Images and Practices in Religious Traditions
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course examines body images and practices in diverse religious traditions around the world. Working with different methodological and theoretical perspectives, we will ask the following questions: What are bodies? How do body images perpetuate or challenge religious and social norms? What roles do bodies play in religious experience? We will generate answers to these questions by investigating a wide range of religious phenomena including healing rituals, relics, saints, fasting, asceticism, and modest dress.

**(Fall) What It Feels Like For a (Russian) Girl - *Not offered this year/term**
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive; Taught in English)
To pose the question a bit differently than in Madonna's song, what challenges face contemporary Russian women - young, old, urban, provincial - and how do these women cope with the stresses of everyday personal and professional life? In an attempt to arrive at an answer, we will look at interviews, short women's fiction, Russian feminist essays, and two films, *Little Vera* (1988) and *Adam's Rib* (1992). Writers include Baranskaya, Voznesenskaya, Kozhevnikova, Katerli, Mamonova, Tobstaya, and Sadjur.

(Fall) Crown Jewels of Russian Culture - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Speaking-intensive)
We will study masterworks of Russian civilization from a broad range of periods and types. These works of art, architecture, and literature define the exceptional essential moments in the formation of the idea of Russian culture. Topics will include: medieval churches and icons; the Venice of the North, Saint Petersburg; Tolstoy, Dostoyevsky, Chekhov, and Nabokov; the Romanov court jeweller Faberge; a film by Eisenstein; Tchaikovsky's ballet; Shostakovich's symphony; and last, but not least, modern Russian dancers such as Nureyev and Baryshnikov.

(Fall) Anna Karenina: Loving To Death - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive; Taught in English)
Leo Tolstoy's Anna Karenina is an action-packed drama about love and passion, personal freedom and societal expectations, and the costs of living. We will read the text slowly, with attention to the ambiguities that defeat a clear or simple interpretation of the novel's message. We will screen several films of Anna Karenina and assess interpretations of the novel.

RES-205-01 - Russian and Eurasian Studies - 2003-2004
(Fall) Russia under the Tsars
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(History 205)
Russia came into being and achieved maturity under a monarchical rule. The age of the Romanovs, 1613-1917, has been particularly important in shaping Russia's social fabric, culture, national myth, and mindset. We will concentrate on a number of outstanding reigns, from Peter the Great, who created the Russian Empire, to Nicholas II, under whom the old regime collapsed. What signal events and extraordinary individuals contributed to the spectacular successes and horrific blunders that make Russian history? How did Russian society and culture evolve during the age of the Romanovs?

(Fall) Great Books: The Literature of Nineteenth-Century Russia
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
In no other culture has literature occupied the central role it enjoyed in nineteenth-century Russia. Political, social, and historical constraints propelled Russian writers into the roles of witness, prophet, and sage. Yet, far from being limited to the vast, dark "Big Question" novels of legend, Russian literature offers much humor, lyricism, and fantasy. We will focus on the Russian novel as a reaction to western European forms of narrative and consider the recurring pattern of the strong heroine and the weak hero. Authors will include: Pushkin, Gogol, Turgenev, Tolstoy, Dostoevsky, and Chekhov.

(Spring) Manuscripts Don't Burn: The Literature of Twentieth-Century Russia - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
Despite the manifold disasters visited upon Russia during the twentieth century, its writers retained their artistic integrity, human voice, and moral authority. They produced a literature of extraordinary power, depth, and lyrical beauty that stands as witness both to an age and the sheer tenacity of artistic creativity. We will place this literature in the context of its time in order to ask a larger question: Can one retain one's humanity in the face of chaos, violence, terror, and dislocation? Works to be read include: Olyesha's Envy, Bulgakov's Master and Margarita, Zamyatin's Wt, Platonov's Foundation Pit, and Chukovsky's Sofia Petrovna.

(Fall) Tolstoy's War and Peace - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
Focuses on Tolstoy's War and Peace. To explain the fundamental conflict in Tolstoy's art, Sir Isaiah Berlin advanced the now famous formula that Tolstoy was a fox (pluralist) struggling to be a hedgehog (monist). Indeed, throughout his life and in his art, Tolstoy sought to shape experience into a single and all-embracing philosophical principle, but he was never able to suppress his extravagant intuition that existence, being contradictory, fragmentary, and ultimately incoherent, defeated attempts at codification. We will read War and Peace in an attempt to understand how that irresolvable conflict fuels Tolstoy's intellectual pursuits and informs his theories on art.

The novels of Ivan Turgenev (1818-1883) powerfully depict what Shakespeare called "the body and pressure of time." With Rudin (1856), Turgenev achieved immediate fame as a writer. This, his first novel, examines the "man of the forties," given to passionate but romantic abstraction that could find no outlet in the political atmosphere of the period. We will read Rudin with special attention to the precise and refined use of language that has earned Turgenev the title of "a writer's writer."

(Spring) Evenings on a Funny Farm near Dikanka: The Creation of Nikolai Gogol
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Gogol was a strange creature, but genius is always strange. -- Vladimir Nabokov. Nikolai Gogol is one of Russia's greatest and most enigmatic writers. Revered by Dostoevsky, he created an idiosyncratic literary universe that has lost none of its original power with the passage of time. This course will trace the development of Gogol's genius from his early Ukrainian stories, through his tales of Saint Petersburg, to his comic masterpiece, Dead Souls. Special attention to Gogol's deployment of the comic, the fantastic, and the grotesque to confront the reality of tsarist Russia.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; Politics 209f)
Russia was transformed by communist revolution into a global superpower that challenged the dominant ideologies of liberalism and nationalism. It became a powerful alternative to capitalism. In 1991, this imperial state collapsed and underwent an economic, political, and cultural revolution. What explains the Soviet Union's success for 70 years and its demise in 1991? What sort of country is Russia as it enters the twenty-first century? Is it a democracy? How has Russia's transformation affected ordinary people and Russia's relationship to the West?

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; Politics 264f)
Since its creation at the beginning of the twentieth century, the Soviet Union dominated the minds of Western foreign policymakers. None of the West's policies in the Middle East, the Third World, Europe, or China after World War II can be understood without the study of Soviet foreign policy. We will examine the development of Soviet foreign policy since 1917 and, following the collapse of the USSR in 1991, the role played by Russia and Russia and the former Soviet republics in the far more complex and multipolar "New World Order." What should U.S. policy be toward the emerging new states of the Baltics, Central Asia, and Caucasus?

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; Politics 242s)
Following the collapse of the USSR and the Gulf War, Central Asia and the Caucasus became new centers of geopolitical rivalry. The new states are a source of energy (oil and gas) for Western powers and a vital transit corridor between Eastern Europe and China. While a new "Great Game" is being fought between Western, Far Eastern, and Middle Eastern powers for control over energy pipelines, the region is threatened by environmental catastrophe and water shortages. Is the new oil industry a source of prosperity or an instrument for further exploitation, corruption, and instability? How important are the new states to the West's strategic energy interests?

(Spring) Terrorism: Russia as Its Cradle - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; Politics 243s)
Russia was the first nation in the world to face political terrorism. In Russia, the era of terrorism lasted from the 1860s, when the People's Will group launched the hunt on the tsar Alexander II, until 1918, when the Socialist Revolutionary Party attempted to assassinate Lenin. A case study of terrorism in Russia will help us to answer a number of questions highly relevant today. What are the causes of terrorism? What are its goals and methods? What can governments do to cope with it? What is the impact of terrorism on society?

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(History 260s)
The Bolshevik Revolution of 1917 marked the coming of totalitarianism to Russia. Led first by Lenin and then by Stalin, the country went through the most brutal civil war, purges, World War II, and the first stages of cold war. This period also saw immense social change and sweeping economic transformation. What were the causes of totalitarianism in Russia? How did the regime function? (Taught in English; Politics 300s)
With the collapse of the USSR we were told that history was dead and liberal democracy triumphant. There was a "third wave" of democratic change. How accurate have these optimistic characterizations turned out to be? After an introduction to theories of liberal democracy and to the new discipline of "transitology" we will look at how states and leaders have applied such liberal-democratic ideas in Eastern Europe and the former USSR (with comparative examples from Africa and South America), and with what success.

The twentieth century has been largely shaped by several nations' ambitions to build utopian societies. Russia and China have attempted to realize the vast promises of communism while Nazi Germany aimed to construct a perfect racist world. Beyond political struggle, wars, and revolutions, recent extraordinary achievements in technology have contributed to the utopian mindset. Are political utopias dead in the new millennium? Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; Politics 308s)
Preamble (for topics courses): Courses in this section satisfy the distribution requirement in social sciences.
Nationalism is one of the greatest challenges to multiethnic states. They have had to create new strategies to deal with the demands of ethnic minorities. Taking the four states of Spain, Canada, Russia, and the former Yugoslavia as examples, we will focus on nationalist movements within these states and the central governments' responses. What has been the effect of the Communist legacy? Are there alternatives to federalism as a way of managing national claims?
What socioeconomic policies have governments used to control ethnic tensions? What role can international organizations play in finding solutions to ethnic conflict?

(Fall) Impacts of War
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(International Relations)
Russian history traditionally has been war plagued. Sometimes the object of aggression, sometimes itself the aggressor, Russia has been party to all the major military conflicts of the last two centuries - Napoleonic Wars, Crimean War, World War I, and World War II. Russia's army has also fought in several regional wars, notably in Afghanistan in 1979-1989 and currently in Chechnya. We will study the impacts of war on society. What generates support for a government's decision to go to war? When does war make a nation stronger, when weaker? How does the notion of "acceptable losses" change over time? How do "victory" and "defeat" affect a nation?

(Spring) Revolutions - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; Politics 350s)
Revolutions have a rich and bloody history on the European continent. In the twentieth century, there were frequent revolutionary upheavals, particularly in Russia and Eastern Europe. We will study two revolutionary periods: Russia in 1917 and the USSR in 1991. These revolutionary events present great contrasts, yet at the same time clarify the nature of revolutions and why they occur. Do they bring the expected fundamental and accelerated change people hope for? Our focus will be on the contrasts and parallels between Russia's early twentieth-century socialist revolution and late twentieth-century capitalist revolution. What was (and is) their impact on European history and thought?

(Fall) Issues in Sociology: Sociology of Immigration
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Preamble (for topics courses): This course will focus on significant issues in the field of sociology not covered in other courses in the sociology curriculum. Topics will vary.
This course covers the social, economic, and political aspects of current immigration to the United States. The course begins with an overview of the history of immigration over the past 200 years, and how immigration over the past 40 years differs from earlier eras. The course then explores the major issues of current immigration research in sociology, including demographic change, economic inequality, and assimilation.

SOCI-223-01 - Sociology - 2003-2004
(Fall) Development of Social Thought
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course examines the origins and development of sociological theory in the nineteenth century. Focusing on the three most important representatives of the classical tradition in sociology - Karl Marx, Max Weber, and Emile Durkheim - we consider in detail the ideas of each, compare their perspectives on emerging industrial society, and assess their contemporary significance.
Prerequisites: Sociology 123 or Anthropology 105, soph, jr, sr
Notes: 2 meetings (75 minutes)
Instructors: E. Townsley

SOCI-224-01 - Sociology - 2003-2004
(Spring) Practicing Sociology
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Community-based learning course)
This course in archival and field research methods uses a sociological lens to magnify issues in research design for nonquantitative data. In this community-based learning experience, students will use resources from their own "community" to describe and contextualize some central theoretical issues in sociology, such as: What is a community? How is a community different from a statistical population, an organization, or an institution? How are communities represented, measured, and studied? There will be hands-on experience with primary documents from the Mount Holyoke College Archives, as well as interview material that students will collect, transcribe, and analyze themselves.
Prerequisites: 8 credits in sociology

(Spring) Social Inequality - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course is a critical survey of theoretical and empirical research on social inequality, stratification, and mobility. The central focus is class, race, and gender inequalities as they have changed during the post-World War II period in the United States (although we will look briefly at stratification regimes in other cultures and time periods). The concepts and methods of social stratification have wide application in sociology, economics, public policy, and administration contexts. As the course progresses, we will explore some of these applications as we wrestle with several policy issues currently confronting U.S. society.

(Fall) Special Topics in Sociology: Mass Media Studies
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Preamble (for topics courses): This course focuses on significant problems in the field of sociology with group meetings and reports.
This seminar explores contemporary issues and perspectives in mass media studies. It is designed to provide students with a provocative look at mass media in order to begin to develop a critical perspective on mass media and contemporary society. The first part of the course looks at the effects of entertainment culture in contemporary mass media and society. The second and third parts of the course address issues in the representation of gender and race in mass media. The fourth part of the course takes a unique look at the impact of advertising and marketing on American culture. The final part of the course addresses the future of mass media and globalization.

**(Fall) Colonial and Nineteenth-Century Latin American Literature: Fall 2003: Americanization in Colonial Latin American Literature**  
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

Preamble (for topics courses): This course will concentrate on the colonial period and/or the nineteenth century. The study of the colonial era will focus on different aspects of the encounter between European and indigenous civilizations and the formation of a literary discourse (i.e., chronicles and the novel). The nineteenth-century component will explore the process of nation building through literature, the development of literary genres, and the emergence of women's voices. Since the topic varies each time the course is offered, a student may receive credit more than once.
This course will examine the process of "creolization" or "Americanization" in selected texts from the colonial period. The relationship with nature, indigenous culture, and the importation of African labor led to the development of a hybrid culture formed from the initial contact of the conquest and continued to articulate itself in the pre-Independence rumblings. A central feature of the course will be the exploration of narrative techniques, the construction of colonial subjects, gender, the body, and violence.

Prerequisites: Spanish 235, 237, 244 or 246 or permission of instructor

(Fall) Spanish Literature: Medieval, Renaissance, and Golden Age: Fall 2003: Staging Desire: Politics, Gender, and Sexuality in Early Modern Spanish Comedias

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): In this course, students will study a topic drawn from Spanish literature of the twelfth through the seventeenth centuries. The period includes such prose masterpieces as El Conde Lucanor, Libro de buen amor, La Celestina, Amadís de Gaula, Lazarillo de Tormes, El besoín, and Don Quijote de la Mancha; the poetry of Berceo, Garcilaso de la Vega, and Góngora; the Spanish mystics Santa Teresa and San Juan de la Cruz; the theatre of Lope de Vega and Calderón de la Barca. Since the topic varies each time the course is offered, a student may receive credit more than once.

Taking desire on the Spanish stage as a point of departure, this course will address issues of politics, gender, and sexuality. We will examine the innovation of formal conceptions of art in seventeenth-century Spain and its connection with the revolutionary new themes introduced in this period. By examining a variety of plays in their sociohistorical context from an interdisciplinary approach, we will explore how some playwrights open up new and distinctive perspectives in the cultural debates of both Early Modern Spain and contemporary criticism. Authors to be studied will include Lope de Rueda, Lope de Vega, Tirso de Molina, Calderón de la Barca, and Lanini y Sagredo.

Prerequisites: Spanish 244 or 246, or permission of instructor

Notes: 1 meeting (2 hours, 50 minutes)

Instructors: J. Gonzalez-Ruiz

(Spring) Contemporary Latin American Literature: Spring 2004: In the Name of Justice: Making and Breaking the Law in Latin America

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

Preamble (for topics courses): This course will concentrate on the various literary genres and cultural movements that have shaped Latin America from modernismo to the present. Topics will focus on different genres and the expression of diverse ideologies through literature. Since the topic varies each time the course is offered, a student may receive credit more than once.

This course will examine how discourses of justice have been used in the processes of nation building, modernization, and identity formation in twentieth-century Latin America. Through an examination of literature, film, and historical texts, we will explore the ways in which those discourses have been advanced in the defense of and resistance to the state violence and the oppression of social groups based on race, class, gender and sexuality that often went hand in hand with nation building. Topics may include revolution, indigenous struggles, dictatorship, student movements, and globalization, and genres to be considered include indigenismo, la policíaca, and testimonio.

Prerequisites: Spanish 235, 237, 244 or 246 or permission of instructor

(Spring) Seminar on Latin American Literature: Spring 2004: Latin American Cinema (1950s - Present)

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

Preamble (for topics courses): This course will concentrate on a specific writer, movement, genre, theme, or literary phenomenon. Students will do close textual readings, prepare reports, do extensive research, and write substantial papers. The seminar will challenge students to demonstrate an understanding of literary analysis, critical skills, and theoretical approaches at an advanced level. Since the topic varies each time the course is offered, a student may receive credit more than once.

This course examines the development of Latin American cinema over the past 50 years in relation to the rising, defeat, and rebirth of Latin American resistance against U.S. and European economic and cultural imperialism. Of particular interest will be an engagement with film and cultural theories as they help us situate the cinematic medium, especially its speed, in relation to the particular form of cultural domination exercised by Hollywood. We will view and analyze films from Argentina, Brazil, Colombia, Cuba, Mexico, and Uruguay.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This course will concentrate on a specific writer, movement, genre, theme, or literary phenomenon. Students will do close textual readings, prepare reports, research extensively, and write substantial papers. The seminar will challenge students to demonstrate an understanding of literary analysis, critical skills, and theoretical approaches at an advanced level. Since the topic varies each time the course is offered, a student may receive credit more than once.

An introduction to the life, thought, and writings of Cervantes, with emphasis on a critical reading of *Don Quixote* and of some of his *Novelas Ejemplares* and plays, especially the *Entremeses*. Through film, video, and drama we will come to appreciate the talent and the genius of one of the most important literary figures of all times.

Prerequisites: Spanish 244 and/or a 300-level Spanish course or permission of instructor

Notes: 1 meetings (2 hours, 50 minutes)

Instructors: A. Castilla

SPAN-362-01 - Spanish - 2003-2004

This course will study the role of women in Spain's ambiguous and uneven modernization. We will examine an array of media and genres—from political essay to performance art—against a historical background of landmark developments (female suffrage, woman as consumer, etc.). Writers, filmmakers, and performers include: Pedro Almodóvar, Carmen de Burgos, Gregorio Marañón, Carmen Martín Gaite, Margarita Nelken, Sara Montiel, and Corín Tellado.

Prerequisites: Spanish 235, 237, 244 or 246, or permission of instructor

Notes: 1 meeting (2 hours, 50 minutes)

Instructors: J. Crumbaugh

Statistics

STAT-140-01 - Statistics - 2003-2004
(Spring) Introduction to the Ideas and Applications of Statistics

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

This course provides an overview of statistical methods, their conceptual underpinnings, and their use in various settings taken from current news, as well as from the physical, biological, and social sciences. Topics will include exploring distributions and relationships, planning for data production, sampling distributions, basic ideas of inference (confidence intervals and hypothesis tests), inference for distributions, and inference for relationships, including chi-square methods for two-way tables, analysis of variance, and regression.

Prerequisites: 2 years of high school algebra

Notes: 4 meetings (50 minutes)

Instructors: The department

STAT-240-01 - Statistics - 2003-2004
(Fall) Elementary Data Analysis and Experimental Design

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

A fundamental fact of science is that repeated measurements exhibit variability. The course presents ways to design experiments that will reveal systematic patterns while “controlling” the effects of variability and methods for the statistical analysis of data from well-designed experiments. Topics include completely randomized, randomized complete block, Latin Square and factorial designs, and their analysis of variance. The course emphasizes applications, with examples drawn principally from biology, psychology, and medicine.
Prerequisites: Interdepartmental 100 or any 100-level course in mathematics or statistics  
Notes: 3 meetings (75 minutes)  
Instructors: J. Gifford

(Fall) Independent Study  
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.  
Prerequisites: soph, permission of department  
Instructors: The department

(Spring) Independent Study

Prerequisites: soph, permission of department  
Instructors: The department

(Fall) Applied Regression Methods  
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement  
This course includes methods for choosing, fitting, evaluating, and comparing statistical models; introduces statistical inference; and analyzes data sets taken from research projects in the natural, physical, and social sciences.  
Prerequisites: Mathematics 211 or any statistics course  
Notes: 3 meetings (50 minutes)  
Instructors: J. Gifford

STAT-341-01 - Statistics - 2003-2004  
(Spring) Linear Statistical Models  
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement  
Mathematical concepts from linear algebra and n-dimensional Euclidean geometry, together with statistical concepts of estimation and hypothesis testing, are developed and used to construct a unifying theory for two classes of applied methods: analysis of variance and regression analysis. The theory is developed in three stages: least squares and orthogonal projections; moment assumptions and the Gauss-Markov theorem; and the normal distribution and F-tests.  
Prerequisites: Mathematics 211, Statistics 240 and 340  
Notes: 4 meetings (50 minutes); offered alternate years  
Instructors: The department

STAT-342-01 - Statistics - 2003-2004  
(Fall) Probability  
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement  
(Mathematics 342f)  
This course develops the ideas of probability simultaneously from experimental and theoretical perspectives. The laboratory provides a range of experiences that enhance and sharpen the theoretical approach and, moreover, allows us to observe regularities in complex phenomena and to conjecture theorems. Topics include: introductory experiments; axiomatic probability; random variables, expectation, and variance; discrete distributions; continuous distributions; stochastic processes; functions of random variables; estimation and hypothesis testing.  
Prerequisites: multivariable calculus  
Notes: 2 meetings (75 minutes), 1 lab (50 minutes); offered alternate years at Mount Holyoke and Smith Colleges; offered at Mount Holyoke College in fall 2003  
Instructors: L. Senechal

STAT-343-01 - Statistics - 2003-2004  
(Spring) Mathematical Statistics  
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement  
This course is an introduction to the mathematical theory of statistics and to the application of that theory to the real world. Topics include probability, random variables, special distributions, introduction to estimation of parameters, and hypothesis testing.
Prerequisites: Mathematics 202, 203, and 342 recommended

Notes: 2 meetings (90 minutes); offered every spring semester alternately at Mount Holyoke and Smith Colleges; offered at Mount Holyoke College in spring 2004

Instructors: The department

STAT-344-01 - Statistics - 2003-2004
(Spring) Seminar in Statistics and Scientific Research - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics to be announced.
Prerequisites: Math 211 or permission of instructor
Notes: 2 meetings (90 minutes); next offered spring 2005
Instructors: The department

STAT-344-01 - Statistics - 2003-2004
(Spring) Seminar in Statistics and Scientific Research: Discrete Markov Chain Monte Carlo Methods
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
The topic for spring 2003 will be discrete Markov chain Monte Carlo methods, including random walks on graphs, finite Markov chains, and their convergence properties. Applications will include community ecology and elementary Bayesian inference.
Prerequisites: Math 211 or permission of instructor
Notes: 2 meetings (90 minutes); offered alternate years
Instructors: G. Cobb

Theatre Arts

THEAT-100-01 - Theatre Arts - 2003-2004
(Fall) Introduction to Theatre
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)
A study of how theatre represents and interprets social reality. Topics include key examples of performance art throughout history and across cultures. Students will learn firsthand the work of directors, actors, and designers by studying about and taking part in current productions in the department. Close analytical readings of play texts and critical/theoretical essays will be supplemented by workshops in the various stagecrafts, by attending live and recorded performances, and by staging students' own theatrical work.
Notes: 2 meetings (2 hours) and lab
Instructors: P. Alekson

THEAT-115-01 - Theatre Arts - 2003-2004
(December) The Professional Audition: Getting Cast
Credits/PE Units: 2; Requirements met: Meets Humanities I-A requirement
With a working professional, you will choose, prepare and present two contrasting theatre audition monologues that are right for you. Rehearsed in class, these monologues become the final project and will be presented and critiqued before professional casting directors. Additional topics to be covered include photos, resumes, interviews, cold readings, and callbacks.

THEAT-120-01 - Theatre Arts - 2003-2004
(Fall) Topics in Design - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): Various topics in theatrical design, or in related design fields, including theory, practice, and history. Subjects may include performance and design, costume crafts, and materials and techniques. The course combines historical study with studio work.
Prerequisites: Theatre Arts 100, an art (studio) course, or permission of instructor
Notes: 2 meetings (2 hours) and lab; purchase of design supplies and materials is the responsibility of the student
Instructors: The department

THEAT-122-01 - Theatre Arts - 2003-2004
(Fall) Introduction to Set and Costume Design
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
An introduction to the art and work of the set and costume designer in the performing arts. Students will learn how a designer approaches a script, how their work impacts a production, and what means are used in the execution of this process. They will learn how to develop their own visual imaginations and how to create visual concepts through discussions, renderings, and models. No previous experience in theatre, performance, or the visual arts is required.
Notes: 2 meetings (2 hours) and lab; purchase of design supplies and materials is the responsibility of the student
Instructors: V. James

THEAT-180-01 - Theatre Arts - 2003-2004
(Fall) Introduction to Technical Theatre
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course offers a study of the construction and operation of stage scenery and evolving theories and current practices of theatre technology. Students will work interpreting designs for department productions.
Notes: 2 meetings (75 minutes) and lab; purchase of design supplies, materials, and theatre tickets is the responsibility of the student
Instructors: S. Hayden
THEAT-205-01 - Theatre Arts - 2003-2004
(Fall) Performance II - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A continuation of the techniques developed in Performance I, with additional work in scene study, mask characterization, and physical theatre. The student will rehearse and present two performance projects. Readings will be selected from works by Peter Brook, Tadashi Suzuki, Uta Hagen, and others.
Prerequisites: Theatre Arts 100, 105, 115 or permission of instructor
Notes: 2 meetings (2 hours) and lab; $5 lab fee; previously offered as Theatre Arts 210

THEAT-215-02 - Theatre Arts - 2003-2004
(Fall) Topics in Performance: Contemporary North American and European Drama/Staged Readings

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): This course offers a specific approach to performing. Topics include mask characterization, physical theatre techniques, acting Shakespeare, and vocal training, among others.

This course will focus on the new generation of playwrights both in North American and in Europe, from the already established (like Sara Kane, Dea Loher, Neil LaBute, Jon Fosse) to the newly discovered and translated authors (like Abby Mann, Jessica Goldberg, Katharina Gericke, Theresia Walser, Oliver Bukowski, and Shelagh Stephenson). We will read and analyze these works, discuss possible set, costume, sound, and light design and choose three plays for scenic readings on the stage, performed by students in the course.

Prerequisites: Theatre Arts 100, 105, 205 or permission of instructor

Notes: 2 meetings (2 hours)

Instructors: The department

Expected enrollment: 18

THEAT-220-01 - Theatre Arts - 2003-2004
(Fall) Topics in Design: Costume Construction: The Use of Unusual Materials - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): Various topics in theatrical design, or in related design fields, including theory, practice, and history. Subjects may include opera performance and design, costume crafts, and materials and techniques. The course combines historical study with studio work.

Students will learn how to construct nineteenth-century costumes in paper and plastics for a department production. In the second half of the semester they will design and build their own costumes. Students will also research the work of artists and designers who use unusual alternative materials.

Prerequisites: Theatre Arts 100, 120, an art (studio) course or permission of instructor

Notes: 2 meetings (2 hours) and lab; previously offered as Theatre Arts 228; purchase of design supplies and materials is the responsibility of the student

Instructors: V. James

(Spring) Topics in Design: Rendering Techniques for Set Designers - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): Various topics in theatrical design, or in related design fields, including theory, practice, and history. Subjects may include opera performance and design, costume crafts, and materials and techniques. The course combines historical study with studio work.

The representation of visual concepts for the stage using dramatic texts and theatrical imagination. Students will learn to develop their ideas on canvas, paper, etc. They will learn how to portray light, color, atmosphere, proportion, and the illusion of depth. Students will research works of art and techniques drawn from different artistic visions.

Prerequisites: Theatre Arts 100 or one art (studio) course and a portfolio review by instructor

Notes: 1 meeting (3 hours) and lab; previously offered as Theatre Arts 228; purchase of art supplies and materials is the responsibility of the student

Instructors: The department

Expected enrollment: 12

THEAT-220-02 - Theatre Arts - 2003-2004
(Spring) Topics in Design: Rendering and Model Building for Set Design - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): Various topics in theatrical design, or in related design fields, including theory, practice, and history. Subjects may include opera performance and design, costume crafts, and materials and techniques. The course combines historical study with studio work.

This course is designed to teach the skills that help a student to develop a conceptual and artistic imagination. Students will learn how to render their designs in watercolor and gouache, using play scripts as their starting point. They will learn the basic rules of technical and perspective drawing and will translate this work into accurate three-dimensional models for a production.

Prerequisites: Theatre Arts 100, 120, an art (studio) course or permission of instructor

Notes: 1 meeting (3 hours) and lab; previously offered as Theatre Arts 228; purchase of design supplies and materials is the responsibility of the student

Instructors: V. James

Expected enrollment: 12
THEAT-220-03 - Theatre Arts - 2003-2004
(Spring) Topics in Design: Makeup
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): Various topics in theatrical design, or in related design fields, including theory, practice, and history. Subjects may include opera performance and design, costume crafts, and materials and techniques. The course combines historical study with studio work. Using basic painting and three-dimensional techniques, students will learn the fundamentals of stage makeup design and application. Included in the course are units on corrective makeup, aging techniques, realistic and fantasy character makeup, facial prosthetics, hair and facial hair.
Note: Students will be responsible for some of the cost of course materials and for the purchase of a student makeup kit.
Prerequisites: Theatre Arts 100, 120, an art (studio) course or permission of instructor
Notes: 1 meeting (3 hours) and lab
Instructors: S. Conly
Expected enrollment: 12

THEAT-222-01 - Theatre Arts - 2003-2004
(Spring) Scene Design II - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
The art, practice, and history of designing stage settings for the theatre. Students develop their own theatrical vision through design projects and learn the communication tools of rendering, drafting, and model building.
Prerequisites: Theatre Arts 100, 122, 180 or permission of instructor
Notes: 2 meetings (2 hours) and lab; previously offered as Theatre Arts 220; purchase of design supplies is the responsibility of the student
Instructors: The department
Expected enrollment: 12

THEAT-224-01 - Theatre Arts - 2003-2004
(Spring) Costume Design II
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
The art and practice of designing costumes for theatre and opera. Students investigate the creative process and technical skills of design, read plays and librettos, and conceive their own designs. The course surveys the history of world clothing and of costume design for the performing arts. Students provide their own materials.
Prerequisites: Theatre Arts 100, 120, an art (studio) course or permission of instructor
Notes: 2 meetings (2 hours) and lab
Instructors: S. Conly
Expected enrollment: 12

THEAT-226-01 - Theatre Arts - 2003-2004
(Spring) Lighting Design - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Study of light as a design medium using color, intensity, distribution, and movement. Formulation of lighting designs with plots, sections, and control charts. Practical application in theatre productions.
Prerequisites: Theatre Arts 100, 120 or permission of instructor
Notes: 2 meetings (2 hours) and lab; purchase of design supplies, materials, and theatre tickets is the responsibility of the student
Instructors: J. Howard
Expected enrollment: 12

THEAT-228-01 - Theatre Arts - 2003-2004
(Spring) Sound Design
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course examines the theory, practice, and history of theatrical sound design. The course will make use of classroom projects and the current Rooke Theatre productions to develop the students’ sound designs. We will use computers extensively for editing and playback.
Prerequisites: Theatre Arts 100 with working knowledge of Microsoft Windows and the Internet, or permission of instructor
Notes: 2 meetings (2 hours) and lab
Instructors: J. Howard
Expected enrollment: 10

THEAT-243-01 - Theatre Arts - 2003-2004
(Spring) Topics in Dramatic Writing: Screenwriting
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)
Preamble (for topics courses): This course offers a variety of approaches to creative writing in the dramatic form. Topics include screenwriting, radio drama, and specific issues in play construction.
Screenwriting is visual storytelling. This course provides the student with the necessary tools for script construction and storytelling in pictures. An emphasis on structure and character will prepare the student for the step outline of a feature-length film. Writing exercises and script analysis are included.

Prerequisites: permission of instructor
Notes: 1 meeting (3 hours)
Instructors: R. Down
Expected enrollment: 14

THEAT-251-01 - Theatre Arts - 2003-2004
(Fall) History of World Theatre I: Antiquity to Early Modern Times - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A cross-cultural survey of theatre in society, from ancient rituals and classical Greece to Japanese noh and kabuki, to the European Renaissance, to the beginnings of realistic drama about 1800. A study of theatre arts and dramatic texts in various moments and movements as they reflect and transform particular societies.
Notes: 2 meetings (75 minutes)
Instructors: The department

THEAT-252-01 - Theatre Arts - 2003-2004
(Spring) History of World Theatre II: 1800 to the 1920s - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A cross-cultural survey of theatre in society. Topics include melodrama, the rise of realism (Ibsen to Chekhov), surrealist and expressionist reactions (Strindberg, Reinhardt, Craig, Appia, Piscator, Pirandello), Irish developments (Wilde, Shaw, Yeats, Synge, O’Casey), Dada, early Brecht and O’Neill, Asian theatre (India, Peking Opera; masks, puppetry, dance forms). A study of theatre arts and dramatic texts in various moments and movements as they reflect and transform particular societies.
Notes: 2 meetings (75 minutes)
Instructors: The department

THEAT-253-01 - Theatre Arts - 2003-2004
(Fall) History of World Theatre III: 1920s to the Present
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A cross-cultural survey of theatre in society. Topics may include Brecht’s epic theatre, American and African American, and European playwrights (Lorca, Giraudoux, Sartre, Mueller, Stoppard, Williams, Miller, Hansberry, Wilson, Shephard, Wasserstein), Theatre of the Absurd and the avant-garde, postcolonial practices worldwide (African masquerade, Latin carnival, guerrilla/development theatre), and contemporary performance art. A study of theatre arts and dramatic texts in various moments and movements, as they reflect and transform particular societies.
Notes: 2 meetings (75 minutes)
Instructors: H. Teschke

THEAT-271-01 - Theatre Arts - 2003-2004
(Fall) Shakespeare
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking-intensive; English 211H)
A study of some of Shakespeare’s plays, emphasizing both the poetic and the dramatic aspects of his art, with attention to the historical context and varieties of critical interpretations, including those of the twentieth century. Nine or ten plays.
Prerequisites: soph or permission of instructor
Notes: 2 meetings (75 minutes); satisfies English department pre-1700 requirement; previously offered as Theatre Arts 281
Instructors: P. Berek
THEAT-271-01 - Theatre Arts - 2003-2004

**(Fall) Goddesses and Slaves, Mary and Eve: Women in the Ancient, classical and Medieval West**

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement  
(History 296)

How did religious images of goddesses, saints, and women affect the lives of real women in the Greco-Roman world and medieval Europe? We explore how the ideas about what women are and which traits are "feminine" that developed in ancient Greece and classical Rome came to define women's roles in those cultures, and consider how Christianity introduced new perceptions of women. Did the Eve/Mary dichotomy of Christianity take away other possible definitions of what women could be? Did those changes benefit women or not? We will trace how religious beliefs and social organization shaped images of idealized women and affected the lives of real ones.

**(Spring) Women in History: The Querelle des Femmes and Feminism: Women and Politics in Early Modern and Modern Europe:**

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement  
(History 296s)

The Querelle des Femmes was a centuries-long debate over the nature of women that began by questioning whether women were inherently good or evil before shifting the focus to whether women were capable of rational thought. As education became more important for the ruling aristocracy, the issue of educating women came to the fore. Heavily influenced by both the Querelle and the Enlightenment, early feminist movements in Europe shifted the argument away from rationality to women's ability to contribute to society. How did this intellectual dispute redefine women's political roles? We will use a variety of primary and secondary sources to answer this question.

(Spring) Feminist Approaches to Literature: Modern Irish Literature
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(English 246)
This survey course will introduce students to literature of modern Ireland beginning with Swift and ending with writers of the Irish literary revival and Irish modernists. The syllabus will also focus on Irish women writers and their literary interventions concerning colonial history, nationalism, and Unionism. We will pay particular attention to representations of ideas of Irishness through the categories of religion, race, gender, and culture. This course encourages students to think about how the genres, styles, and forms of Irish writing are determined by the experience of colonial trauma and the imperative to imagine national identity.

(Fall) Gender, Race, and Science - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course examines different approaches to understanding the nature of scientific practices. Of central interest will be the diverse accounts offered by feminist studies of science. We will pay particular attention to notions of evidence, methods, cultural and material constraints and the heterogeneous nature of laboratory and theoretical practices. We will consider the ways in which gender, race, and sexuality are constructed by science and how these factors influence both scientific practices and our conceptions of science. We will also examine the feminist commitment to taking account of the multifaceted dynamics between science and society without forfeiting the notion of objectivity.

(Spring) Interdisciplinary Seminar: Gender and Colonialism in Victorian Culture

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking- and writing-intensive; English 321)

This course will examine the ways in which British colonialism is represented in and shaped by Victorian literature and popular culture. We will investigate the politics of gender and colonialism in nineteenth-century cultural production, suggesting that British imperialist discourse cannot be understood unless we use gender as a primary category of analysis. Alongside writings by Carlyle, C. Bronte, Haggard, Elliot, Forster, political cartoons, scientific writing, and advertisements, we will read feminist postcolonial theory by Spivak, Sharpe, McClintock, and others.

Prerequisites: 8 credits in department beyond English 101, including two of the following: English 200, 210, 220, or permission of instructor

Notes: 1 meeting (3 hours)

(Fall) Interdisciplinary Seminar: Globalization and Fundamentalism - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Psychology 319)

The worsening problems of global environmental and social destruction, including the oppression of women, are frequently attributed either to economic and cultural globalization or ethnoreligious fundamentalism. However, in what ways do globalization and fundamentalism reinforce each other? What theories and social movements provide more balanced alternatives to the extreme models of psychological and social development represented by both these forces? This course will seek answers to these questions in relation to case studies of ethnoreligious as well as gender, race, and class struggles from both the Northern industrialized and impoverished Southern countries.

**Fall** Female Power in Early Modern Europe

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(History 355)

This course will examine the sudden rise of women rulers in sixteenth-century Europe and the male reaction to it. What happened that led to both France and England being ruled by women during the upheaval of the sixteenth century, and why was the idea of female rule so threatening to men? What steps did men take to limit women's political power, and how did women evade those restrictions? We will explore how women who were excluded from official power could nevertheless play an important political role while Europe coped with the turmoil of the Reformation, the evolution into modern nation states, and the challenges of Enlightenment.

**WOMST-333-12** - Women's Studies - 2003-2004

**Fall** Interdisciplinary Seminar: Emily Dickinson in Her Times - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Community-based learning course)

This course will examine the writing of Emily Dickinson, both her poetry and her letters. We will consider the cultural, historical, and familial environment in which she wrote, with special attention paid to Dickinson's place as a woman artist in the nineteenth century. Students will be asked to complete a community-based learning project in which some aspect of Dickinson's life and work is interpreted for the general public and incorporated into an ongoing display at the Dickinson Homestead. The class will meet at the Dickinson Homestead in Amherst.

**WOMST-390-01** - Women's Studies - 2003-2004

**Fall** Internship or Field Project

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Community-based learning course; Speaking-intensive)

This course, required for the major, presents an opportunity for students to apply feminist theory and to synthesize their work in women's studies. The connections between the academy and the community, and between scholarship and social action, are emphasized. Students either design their own field project or arrange for a placement at an agency, institution, or place of work that deals with the concerns of women. A weekly seminar with other students engaged in 390 work provides a structured setting in which to analyze these experiences and share works-in-progress. Frequent writing assignments are required.

**Prerequisites:** Women's Studies 101, 250, 251, and permission of instructor

(Fall) Introduction to African American and African Studies: Identity, Community, and Progress
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
In this introduction to the African American experience in twentieth-century America, historical, cultural, economic, political, and aesthetic elements of the urban African American experience are examined. Because of the interdisciplinary nature of African American studies, we consider methodological issues as they bear on the constitution of the African American subject, the descriptive edifices of the contemporary African American community, and programs for liberation.

(Spring) Chocolate Cities and Vanilla Suburbs
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course critically explores assumptions about cities and suburbs, examining how racial and class segregation affect metropolitan development.
Using African Americans as a case study we examine the impact that race, class, and gender have on their lives in the city and suburbs. We will consider how "chocolate cities and vanilla suburbs" represent blacks' and whites' different social and political statuses. Other issues examined are gentrification, leisure and public space, gated communities, and public-private partnerships in regional development.

A theoretical examination of the cultural economy of race. Investigations center on the ways African Americans practically develop and contest "meaning" through their own readings of and uses for cultural products. Three problematics will be emphasized: representation, subjectivity, social inequality. What is at stake in various representations of blackness? What are the material effects of those representations? What are the social inequalities produced by race, gender, class, etc. processes? How are inequalities regulated/resisted in and through culture? What are the changing historical conditions under which agents produce (are produced by) race knowledges and black cultural politics?

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Examines the causes of and proposed solutions to "the Negro problem" in post-Civil War American social policy. Focuses on the life, work, and legacies of DuBois. Drawing on domestic and diasporic fictional and nonfictional depictions of black life in the "DuBoisian century" the course considers different responses to his 1903 question, "How does it feel to be a problem?" Review of theories and policies targeting blacks and their environment allows us to critique black modernity (as "exceptional" and/or "damaged"), assess the changing role of black intellectuals in society, evaluate "race theory" and consider dominant and marginal attempts to analyze and overcome the "color line" in America.

AMST-102-01 - American Studies - 2004-2005
(Fall) Introduction to the Study of American Culture: Asian/Pacific/American History, 1850 to the Present
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This course situates Asian/Pacific/American experiences within the context of American history, as well as that of their countries of origin. First we will look at the pre-World War II era, exploring relationships between the U.S. quest for empire in the Pacific, political-economic dislocations in Asian countries, and anti-Asian prejudice against migrants in the U.S. Next we will examine the period after World War II, especially Japanese American internment; post-1965 immigration; war in Southeast Asia; the rise of postcolonial and new nations in Asia; and contemporary issues facing the A/P/A community in the U.S. Major themes include migration, racism, gender, and colonialism.

AMST-201-01 - American Studies - 2004-2005
(Spring) Introduction to the Study of American Culture: America: Nation, Representation, and Struggle
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive)
One particular story of America is about struggle and representation. Quests for power and conquest have created resistance and demands for equality on the part of the oppressed and marginalized. This course explores the history of struggles over representation that have shaped our sense of national identity and conditioned our claims to America. Using literature and films, we will examine how social groups have resisted and accommodated their own exploitation and/or exclusion in America. Particular case studies focus on women's work and class oppression, Filipino and Mexican laborers, westward movement of farmers during the Great Depression, and African American life in urban America.

AMST-290-01 - American Studies - 2004-2005
(Spring) Topics in American Studies: Outlaw Genres: Latina, Native American, and "Third World" Women's Autobiography
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
This course will examine nontraditional autobiographies such as testimonios, ethnographies, oral histories, and life stories. We will view documentaries and read literature by Latinas and Native American women who challenge the notion of a monolithic national identity. We will also examine how women of color utilize "image-texts" to counter the confining categories of race, ethnicity, and class within their autobiographical works. We will explore further the relationship of testimonial writing to sociopolitical movements and activism by reading identity-based, feminist, multigenre anthologies. Authors may include Norma Cantú, Delfino Cuero, Cherrie Moraga, and Aurora Levins Morales.

(Fall) Senior Seminar: The Political Imagination: The United States and South Africa
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(English 337f)
This course examines how artists engage political ideas and social realities in their work. By setting various U.S. authors from the 1930s to the present in dialogue with contemporary South African writers responding to apartheid and post-apartheid South African society, the course explores how the creative imagination transforms—and is transformed by—the pressure of history itself. Authors to be studied include Wright, Didion, Morrison, Doctorow, Silko, Gordimer, Coetzee, Fugard, Mda. Among the key topics will be the relation between artistic freedom and political ideology and the continuing response by South African artists to the Truth and Reconciliation Commission.
Prerequisites: jr, sr, 8 credits at the 300 level in English, history, politics, or related fields
Notes: 1 meeting (3 hours)

AMST-301-01 - American Studies - 2004-2005
(Spring) Senior Seminar: The Caribbean in American Culture
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(English 370s)
This seminar uses the interdisciplinary methods of American studies to explore the role migrants from the English-speaking Caribbean have played in the United States. We will examine Caribbeans' images of themselves in literature and popular culture to understand the various ways they have (re)defined what it means to be "American" and "African American" in the twentieth century. A major theme will be the intersections of race, ethnicity, gender, and sexuality in Caribbean American identity. North American perceptions and constructions of the Caribbean will also be central. Readings include Lorde, Hughes, Hurston, Marshall, and Cliff.
Prerequisites: jr, sr, 8 credits in department beyond English 101 or permission of instructor
Notes: 1 meeting (2 hours, 50 minutes), plus screenings

(Fall) Senior Seminar: Seeking Social Justice: Latina/o and Native American Cultural Work in the United States
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This seminar explores issues of social justice for Latinas/os and Native Americans. Beginning with the civil rights period, we will examine the Chicano and American Indian Movements whose leaders critiqued their communities' second-class citizenship within a democratic America. How does deterritorialization, linguistic alienation, and forced assimilation contribute to formation of identities and ideologies within "American" culture? We will read historical essays and creative writing and view documentaries that examine the geopolitical and conceptual borderlands in relation to American identities. Authors may include Leslie Marmon Silko, Gloria Anzaldúa, Winona LaDuke, Helena Viramontes.

(Spring) Senior Seminar: Globalization and Transnationalism in Asian American Literature and Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course examines globalization and transnationalism in Asian American literary and cultural studies, especially those Asian American writers who feature the experience of crossing national borders and living in the global economy of North America. Some key themes are: multiple displacements of postcolonial Asian women in North America, the journey of Asian Americans to Asia, and interconnections between Americans and Asians in the global cities of the U.S. We will critique current conceptions of transnational mobility and identity in an age of globalization. Authors include Rachna Mara, Jhumpa Lahiri, Lydia Minatoya, Peter Bacho, Jessica Hagedorn, Ruth Ozeki, and Chang-rae Lee.

(Spring) Senior Seminar: Race, Gender, and Empire: Cultural Histories of the United States and the World
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(History 301s and Women's Studies 333s)
Recent cultural histories of imperialism - European as well as U.S. - have illuminated the workings of race and gender at the heart of imperial encounters. This course will examine the United States’ relationship to imperialism through the lens of such cultural histories. How did encounters between Native Americans and European colonizers, as lived and as remembered, call into play racial and gender identities? How have the legacies of slavery been entwined with U.S. imperial ambitions? How did racialized constructions of gender and sexuality shape the “American century?” And what can we learn from transnational approaches to “the intimacies of empire?”

(Spring) Exploring Asian Americas - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III A: Anthro, econ, geog, etc. requirement
The concept of "Asian America" developed in the 1960s in conjunction with the broader civil rights movement. Since the 1960s, new migration has dramatically changed the composition of Asian America, and new theoretical perspectives challenge us to reexamine the concept itself. While a clear division between Asia and the U.S. was inherent in the original concept of Asian America, more recent theories of hybridity, diaspora, and transnationalism blur such clear-cut boundaries around national, ethnic, and racial formations. In this course, we will examine these empirical changes in migration and ethnic identification as well as the shift in theoretical paradigms for understanding them.

(Spring) Anthropology of Modern Japan - *Not offered this year/term
Since the mid-nineteenth century, Americans have viewed Japan as the Orient's most exotic and mysterious recess, alternately enticing and frightening in its difference. Intense economic relations and cultural exchange between Japan and the U.S. have not dispelled the image of Japanese society and culture as fundamentally different from our own. In this course, we will strive for greater understanding of shared experiences as well as historical particularities. Issues covered may vary from one semester to another, but frequently focus on work, women, minorities, and popular culture. Films and ethnological works provide ethnographic examples of some key concepts.

(Fall) Economic Anthropology
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking- and writing-intensive)
We shop for our food, for our clothes, for our colleges. We purchase cars, manicures, and vacations. It seems that there is little that cannot be bought or sold. But we also give and receive gifts, exchange favors, "go Dutch" in restaurants, and invite friends for "potlucks." This course examines exchange systems cross-culturally, in order to understand their cultural significance and social consequences. It explores how our own commodity exchange system, which appears to be no more than an efficient means of distributing goods and services, in fact contains intriguing symbolic dimensions similar to the gift exchange systems of Native North America, Melanesia, and Africa.

Every society is held together by systems of interpersonal and institutional communication. This course examines the nature of communication codes, including those based on language (speaking and writing) and those based on visual images (art, advertising, television). To understand communication in its social and historical dimensions, we study the psychological and cultural impact of media revolutions and then look at ways communication systems manipulate individual consciousness. Illustrative examples are drawn from Western and non-Western societies.

ANTHR-310-01 - Anthropology - 2004-2005
(Fall) Visualizing Culture
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
In this course we go behind the scenes and behind the screens of anthropological films, television, museum exhibitions, and publications such as National Geographic Magazine, to explore the social contexts of their production, distribution, and interpretation. We consider how popular images of cultural "others" reveal the lives and times that produce them, and how, as sites of cultural exchange and political debate, such images shape and are shaped by relations of power. Further, we consider the diversity of local responses to images of cultural identity and begin to explore the complexities of "picturing cultures" from different subject positions across the global mediascape.

ANTHR-316-01 - Anthropology - 2004-2005
(Fall) Special Topics in Anthropology: Anthropology of Nature
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Preamble (for topics courses): This course covers significant problems in the field of anthropology, with group meetings and reports.
This seminar explores the place and meaning of "nature" in the postindustrial world. Drawing from recent contributions from fields such as political ecology, geography, poststructuralism, feminist theory, and queer and gender studies, this seminar reflects upon the different forms in which societies are reshaping both the idea and practices of nature in an age of hyper-mobile social and economic transformations. By exploring issues surrounding sex-change surgery, bioprospecting, ecotourism, and agricultural biotechnology, we will gain insight into the ways the nature concept is being stretched and redefined as it drives heated epistemological and global political debates.

ANTHR-316-01 - Anthropology - 2004-2005
(Spring) Special Topics in Anthropology: Globalization and Anti-Globalization
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Preamble (for topics courses): This course covers significant problems in the field of anthropology, with group meetings and reports.
This course draws from both the anthropology of globalization and of social movements to examine 'globalization' as a cultural artifact. We will explore the discursive, historical, and material contexts in which globalization is produced and contested, as well as the emergence of new sites, problems, and forms of resistance emerging from anti-globalization movements in Chiapas (Mexico), Europe (France and Prague), southern India, and Seattle. By examining terms such as 'direct democracy', 'commodification of life' and 'global justice,' we will see how actors are transforming what counts for 'justice' in an age of globalization.

(Spring) Manufacturing Knowledge - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking- and writing-intensive)
From the invention of the printing press to the Internet, the production and reproduction of knowledge has been mediated by information technology. But while a good deal of social change is arguably technology driven, the truths of science are also culturally relative and embedded in social practice. This seminar will explore the recent scholarly debates taking place in the social studies of science and technology. We will focus on the role played by print literacy and transportation technology in the history of science, in the formation of identity, and in the development of the postmodern imagination.
Prerequisites: jr or sr majors or per I

(Spring) Anthropology and Sexualities
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Women's Studies 333s (06))
This seminar focuses on contemporary anthropological scholarship concerned with the varieties of sexual expression in diverse cultural settings. We will read ethnographic accounts of sexual ideologies and the politics and practices of sexuality in Brazil, Japan, Native North America, India, and elsewhere. We will examine anthropological theories of sexuality with an emphasis on contemporary issues, including performance theory, "third gender" theories, sexual identity formulation, and techniques used by various societies to discipline the body.
Prerequisites: sr or jr major in department or women's studies, plus 8 credits in department

(Spring) Anthropology of History
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking- and writing-intensive)
In this seminar we question the distinction between myth and history and consider the relationship of historical consciousness to memory, forgetting, and other types of temporal awareness. We then examine the relationships among literacy, art, nationalism, and the invention of tradition and test the limits of ethnohistory. Finally, we look at the ways in which relics, museums, and tourism have all helped make history - as fact, experience, or commodity - possible.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Anthropologists are increasingly recognizing the epistemological and political difficulties of regarding non-Western peoples as "others" - as objects for social scientific consumption. Some have responded by focusing attention on their own sociocultural circumstances. This course examines both the theoretical basis of the anthropological turn from "exotic" fieldwork and the results of the new research about the United States. Topics include youth subcultures, class, race, and suburban and inner-city lives.

Architectural Studies

(January) Introduction to Architectural Design
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This course enables students to explore both the conceptual and practical realms of architecture in a series of lectures and studio projects. Students learn to establish criteria for architectural design by integrating the principles of three-dimensional form with site response, programmatic needs, structural and material requirements. Initially, students examine the urban context and as the course progresses complete measured drawings and scaled models of a site-specific design project. Discussions focus on how experience, daily use, culture and aesthetics influence the field of architectural design, while studio projects highlight research, drawing and modelmaking.
Prerequisites: Individuals with or without design experience are welcome, as projects are tailored to each student's background

(Spring) Introductory Seminar in Art History: Art and Cultural Politics
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Speaking-intensive)
The seminar explores the roles that art has played in politics from antiquity to the present, paying special attention to war booty and the ongoing struggles over cultural property. We will consider the current debate about public and private ownership of ancient and foreign art, and the ways it assumes status as a bearer of cultural values. The purposeful destruction and effacement of monuments will be a focus.
Prerequisites: fy or permission of instructor

ARTH-202-01 - Art History - 2004-2005
(Spring) Talking Pictures: An Introduction to Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Film Studies 202s)
Some of the best feature-length films of the past century have commanded our attention and imagination because of their compelling artistry and the imaginative ways they tell stories visually and verbally. This course closely studies narrative films from around the world, from the silent era to the present, and in the process it introduces students to the basic elements of film form, style, and narration. Some of the films to be considered are: Broken Blossoms, Battleship Potemkin, Citizen Kane, Contempt, The Bicycle Thief, Ugetsu, Rear Window, Woman in the Dunes, The Marriage of Maria Braun, Days of Heaven, and Moulin Rouge.

(Spring) Gods and Mortals: Myth in Ancient Art and Literature - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Classics 211)
Many ancient images tell completely different versions of myth from those portrayed in Greek and Roman literary sources. By juxtaposing distinctive modes of communication in the ancient world, students will analyze the rhetorical uses of myth, both then and now. Students will also examine the range of possibilities for translating and interpreting text and image, which will alert them to the vitality of myth as a language of its own, transcending historical parameters.

(Fall) The Hellenistic World: From Alexander to Cleopatra - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Hellenistic art has often been regarded as a chaotic, decadent phase between the golden ages of classical Athens and imperial Rome. In fact, the period in the Mediterranean from the death of Alexander the Great in 323 B.C.E. to the Roman conquest of Egypt in 31 B.C.E. saw the creation of some of the greatest masterpieces of ancient art. The course addresses the new themes and purposes of art in a cosmopolitan culture with its competing centers (Pergamon, Rhodes, Antioch, Alexandria, and Rome); its private patrons, public museums, art historians, and critics; and its innovations in science and politics.
Prerequisites: soph, jr, sr, or permission of the instructor

Instructors: B. Bergmann

ARTH-216-01 - Art History - 2004-2005
(Fall) Art and Spectacle in Ancient Rome
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Much of Roman art and architecture was created to enhance and commemorate religious, political, and social rituals. The course explores themes of triumph, marriage, death, and sport by discussing buildings and objects within their public and private contexts of action. Beginning with Rome's legendary origins in the eighth century B.C.E. and ending with its demise as a capital in the fourth century C.E., the course focuses on an especially creative period, the formation of the empire under Augustus.
Prerequisites: soph, jr, sr, or permission of instructor

ARTH-234-01 - Art History - 2004-2005
(Spring) Baroque and Rococo Art in Southern Europe - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This survey of seventeenth- and eighteenth-century art in Italy and Spain treats the major stylistic and thematic developments in painting, sculpture, and, to a lesser extent, architecture. Special emphasis is given to the vivid naturalism of Caravaggio and Velazquez, the refined classicism of the Carracci, and the impassioned manner of Bernini. Attention is also given to the different cultural contexts in which the works of art were first created and are now interpreted.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)

**(Fall) Nineteenth-Century European Art: Neoclassicism to Impressionism - *Not offered this year/term**

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course traces major developments in European art during the periods traditionally designated by the terms neoclassicism, romanticism, realism, and impressionism. Focusing primarily on French art, but branching out to consider the art of England and Spain, it explores the key artistic themes of the century: the engagement with history, the rise of nationhood, the experience of the urban, the Marxist proposal, the grappling with modernity, the dealing in individual temperaments. Among the major figures to be studied are Constable, Courbet, David, Delacroix, Goya, Ingres, Manet, Monet, and Renoir.

**(Fall) History of Photography**

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This survey course traces the rise and development of photography in the United States and, to a lesser extent, Mexico and the countries in Western Europe. It charts the wide range of work with the camera, including commercial, so-called "vernacular," and fine art projects, and considers pictures from photography's very beginnings in the mid-nineteenth century to today's practices. Among the major figures to be discussed are the early landscape photographers O'Sullivan and Watkins, the avant-garde photographers Stieglitz and Genthe, the Depression-era photographers Evans and Lange, and the so-called New Documentarians Arbus and Frank.

**(Fall) Building the Modern Environment: Architecture 1890-1990**

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

An exploration of major movements and personalities in architecture from the late nineteenth century to the present. Emphasizing the United States against the background of European developments, the course considers the search by architects, including Frank Lloyd Wright, Le Corbusier, and Frank Gehry, for a language of form and space that captures the contemporary spirit as it elevates society to a higher plane of existence. Discussion focuses on issues of technology and utopia, the skyscraper, and the collision of tradition, modernity, and postmodernism in architecture since 1945.

**(Spring) Modern Art: 1885-1945**

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course examines the great ruptures in European art that today we call modernist. It relates aspects of that art to the equally great transformations in European society: revolutionary ferment, the rise and consolidation of industrial capitalism, colonization and its discontents, and world war. Among the major figures to be studied are Duchamp, Matisse, Malevich, Picasso, Seurat, and van Gogh.

Prerequisites: soph, jr, sr, or permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: A. Lee

Expected enrollment: 50

**ARTH-245-01** - Art History - 2004-2005

**(Spring) Contemporary Art - *Not offered this year/term**

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course traces the different paths of painting, sculpture, and photography in the United States and, less so, Western Europe since World War II. Initially, most of these paths traced a relationship with the "crisis of modernism," but increasingly, they have taken on a different vitality, drawing energy from a wide variety of postmodern and postcolonial subjects and debates: identity politics, transnationalism, diaspora. Can something that can
be identified as an avant-garde practice exist in such a context? What kinds of questions are appropriate to ask about works that stridently attempt to suspend the very category of art?

ARTH-290-01 - Art History - 2004-2005
(Fall) Issues in Art History: Pictures at an Exhibition: Landscape
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Focusing on the fall show at the Mount Holyoke College Art Museum, "Views and Visions: French Landscape Painting from Classicism to Naturalism," the course considers these paintings within the larger history of landscape art from antiquity to the present. We will address shifting cultural attitudes toward the environment, politicized issues of location and identity, and the impact of technology and tourism on ways we see the physical world. The course emphasizes looking and describing, as we move between the classroom, museum events, and the exhibition.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 1 meetings (3 hours)
Instructors: B. Bergmann
Expected enrollment: 20

ARTH-290-02 - Art History - 2004-2005
(Fall) Issues in Art History: Egyptian Art and Egyptomania
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Egypt holds a unique fascination, as a continuous parade of blockbuster exhibitions attests. This course examines ancient Egyptian art and architecture, and its revivals in the West, where recurring waves of artists have imitated monuments of a distant and seemingly exotic past. In the ancient Nile valley, works of art carried potent meanings and expressed a distinctive worldview. Artists of other times and places have taken up Egyptian motifs and treated them in ways suiting their own purposes and sensibilities. This course emphasizes the visual and contextual analysis of works of art and architecture.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: D. Larkin
Expected enrollment: 20

(Spring) Issues in Art History: Architecture and the Built Environment - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Meets Humanities I-A requirement
Just as architecture reflects the confluence of cultural, environmental, political, social, and economic forces, the critical study and practice of architecture must become a multidisciplinary arena of learning. This experimental seminar will explore current issues in the art, history, and science of architecture and the built environment through reading, writing, and design. Discussions will include visiting scholars and critics as we consider the dynamic possibilities for architectural studies in a liberal arts context.

ARTH-300-01 - Art History - 2004-2005
(Fall) Seminar: Theory and Interpretation - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
The seminar explores the intellectual discipline of art history and
closely examines the methods used for analyzing the visual arts across
cultures and periods. The course is intended for upper-level students
with a strong interest in art history and visual culture. Class
discussions and research papers will challenge students to explore
various scholarly approaches to art as well as analyze the relationship of the arts to social and cultural theories, gender discourses, and postmodern
critiques of visual culture.

ARTH-302-01 - Art History - 2004-2005
(Fall) Great Cities: Paris-Paradise: The Medieval City and Its Transformation
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
In 1323, Jean of Jandun wrote that Paris, "seems to have received from the Most-High the role of the earthly paradise." Using medieval eyewitness
accounts and descriptions, surviving monuments, and graphic records, this seminar will explore the transformation of Paris from a small twelfth-
century town into Europe's most important metropolis by 1300. We will then consider the abrupt metamorphosis of medieval Paris into a modern
capital in the nineteenth century, paying particular attention to representations of the city by painters, writers, and, most recently, filmmakers.
Prerequisites: jr, sr, 8 credits in department, or permission of instructor

ARTH-342-01 - Art History - 2004-2005
(Spring) Seminar in Twentieth-Century Art: Kool Art in the Beat and Pop Eras
"I am for Kool-art, 7-UP art, Pepsi-art, Sunshine art, 39 cents art, 15 cents art.... Fire sale art, Last Chance art, Only art, Diamond art, Tomorrow art.... Meat-o-rama art." So it was claimed in 1961. Studying a wide range of visual culture of the 1950s and 1960s, we will try to decide what such a statement might have meant, given the era's dramatic social and cultural developments, and how it was related to the actual art being produced. Among the major figures to be studied are Hockney, Johns, Rauschenberg, and Warhol.
Prerequisites: 1 Art History course, or permission of instructor
Notes: 1 meeting (3 hours);
Instructors: A. Lee
Expected enrollment: 18

ARTH-350-01 - Art History - 2004-2005

ARTH-360-01 - Art History - 2004-2005
(Spring) Seminar in Asian Art: Visual Cultures of South Asia
The seminar is designed as a series of case studies for understanding the social life of visual images in South Asia. Our central problem will be to develop an analytical vocabulary to describe making, seeing, disfiguring, and reproducing visual and material things as modes of history. Student-led discussions and research papers will explore topics ranging from the making and breaking of stone monuments in ancient (and modern) periods to the magical realism of such modern media as photography, mass-produced calendar prints, and commercial cinema.
Prerequisites: jr, sr, or permission of instructor; 8 credits in art history, or Asian studies, or film studies, or permission of instructor
Notes: 1 meeting (3 hours), occasional screenings
Instructors: A. Sinha
Expected enrollment: 15

ARTH-360-01 - Art History - 2004-2005
(Fall) Seminar in Asian Art: Indian Films - *Not offered this year/term
The seminar will examine a selection of films in relation to India's urban culture in the twentieth century. We will screen old and new films, those belonging to the commercial industry - the Bollywood - and those made by directors who remain outside that industry. Our challenge will be to
develop possible ways to understand the many facets of film culture in India. Using critical essays, class discussions, and research, we will explore the relationship of film to national politics, examine the global circulation of Indian films, analyze how films reflect the desires and fantasies of their audiences, and evaluate India's place in the history of world cinema.

Prerequisites: jr, sr, 8 credits in art history or film studies, including Film Studies 201, or permission of instructor

Notes: 1 meeting (3 hours), 1 screening (2 1/2 hours)

(Dance 142)
This course is an introduction to the basic patterns of formal Indian classical dance movement that include gestures and facial expression in expressive and mimetic interpretations through poetry, music compositions and rhythmic structures. A study of Mudras (hand gestures) will include practice and memorizing an established vocabulary of gestures from a 9th century classical dance text. Using these gestures we will explore their application within a traditional/contemporary framework of movement, poetry and spoken ideas. Readings and videos will be assigned to augment class work for historical, religious and cultural understanding of dance in India.

Introduction to Sanskrit, the classical language of India. Related to other Indo-European languages (including English) and the ancestor of most of the 16 major Indian languages (e.g., Hindi), Sanskrit is the medium of the literary classics, as well as of the texts of the Hindu, Buddhist, and Jain religions. The first-semester course covers Sanskrit grammar. The emphasis is on sentence construction, recognition and production of grammatical forms, and translation. Attention is also given to script, chanting, and pronunciation. The goal is proficiency in reading sentences and sustained passages in Sanskrit, in preparation for reading authentic texts in the second semester.

(January) Five Elements Theory: An East Asian Approach to Life and Health
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
An introduction to East Asian medical energetics and its application in daily life. Beginning in ancient China, doctors and philosophers in East Asia have developed a system of correspondences within human bodies and between human beings and the natural world. Its foundation lies in the Five Elements (or Five Phases) which create and control each other in continuous motion, animated by vital energy (qi/ki) and the dynamic interaction of yin and yang. After an introduction to Five Elements theory, the course will explore each element/phase individually in its relevance and application to the body's physical functioning and a person's emotional and psychological life.

(Spring) The Great Epics of India: Representations and Interpretations
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Taught in English)
The epics Ramayana and Mahabharata are sacred texts of Hinduism and are rendered in oral, written, and dramatic forms in all the languages of India and Southeast Asia. Focusing primarily on the Ramayana, students have the opportunity to explore the epic narrative's aesthetic, religious, and cultural historical dimensions in its many manifestations, including the Sanskrit text (fifth century BCE), women's ritual songs, Tulsidas's medieval Hindi version, the Ramlila play, Kathakali dance, the television serial, and the political version of the Hindu communists in the 1990s. All readings are in English.

(Fall) Hinduism - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Religion 261f)
A major religious tradition of India, Hinduism is in practice a multiplicity of expressions. This course explores Hinduism's diverse traditions through its history, unifying themes, texts and popular observances. We will read from the great texts (Ramayana, Mahabharata), learn about gods and goddesses (Krishna, the Great Goddess) and discuss art and ritual. Topics include: body techniques and the material universe (yoga, Tantra); philosophical traditions, concepts (karma, dharma); religious figures (Mirabai), movements (Bhakti). Hinduism's contemporary expressions in India and the West will be considered in social and historical context. Frequent illustration is provided through videos.

(Fall) Introduction to Chinese Philosophy - *Not offered this year/term
This course provides a survey of Chinese thought, focusing on Confucianism and Daoism. Beginning with reading and reflection on the foundational Chinese philosophical texts, students will continue to compare the diverse ideas of China's major philosophical schools in order to ponder ways of thinking and living markedly different from those that have defined the Western tradition. Selections from recently excavated texts will be introduced to provide students with the latest materials, offering revised understandings and new insights into traditional Chinese philosophy.

(Fall) Gandhi’s Critique of Modernity in Contemporary Perspective
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.

Modernity, it has been argued, exemplifies the Enlightenment truths of alienated production, bureaucratic rationality, secular progress, and the associated practices of science, technology, humanism, development, and management. In the twentieth century, a major critic of modernity adopted strategies opposed to violent confrontation, revolution, and civil war: M.K. Gandhi. We will examine Gandhi's views on nonviolence, the political strategy of civil disobedience, and his critique of modernity. Texts, films, and the personal narratives of Henry David Thoreau, Leo Tolstoy, and Martin Luther King will be analyzed in conjunction with Gandhi's writings.

ASIAN-331-01 - Asian History: The Meiji Revolution
(Spring)  Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(History 331)

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.
A research seminar on the late nineteenth-century transformation of Japan from a feudal state ruled by hereditary warriors into a modern nation-state ruled by a cabinet, a legislature, and a professionalized bureaucracy under the symbolic sovereignty of a sacred monarch. A turning point in East Asia’s modern history, this revolution shaped the following century throughout the region and remains a subject of intense scholarly and popular interest. We will begin with secondary readings—social and political history, biography, and cultural history—then each student will identify a research question, discover her own sources to answer it in a 20-page final essay.

Preamble (for topics courses): This course offers advanced students an opportunity to investigate with some sophistication a problem that requires careful attention to research methods, to critical literature, and to writing. Topics will include issues that have a particular bearing on Islamic religious traditions.
This course will examine the spread and development of Islamic religious traditions in South Asia, i.e., India, Pakistan, and Bangladesh. Particular attention will be paid to different modes of interaction with the indigenous, largely Hindu, traditions, including conversion, accommodation, and conflict. The relationship between political and religious identities, the Partition of South Asia on religious lines, and the recent growth of fundamentalism and religious violence, will also be covered.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Politics 380)
This seminar explores the dimensions of ethnic conflict in severely divided societies. We examine the nature of ethnic identity, the sources of group conflict, and the forms and patterns of group conflict. Case studies are selected for their contemporary importance and the different lessons that can be learned from them. A variety of approaches to address ethnic conflict is assessed. Students have the opportunity to concentrate independently on problems or cases in which they may have a special interest.

(Spring) Topics in Astronomy: Astronomy and Public Policy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Astronomical issues that impact our society will be explored in a seminar format. The approach for each issue will be to pose a question based on a body of scientific evidence with potential consequences for human society. The answers to these questions will be investigated both on scientific and societal grounds. Scientific issues include the potential threat of collisions between the earth and other solar system bodies and the potential existence of extraterrestrial life.

Instructors: M. Dyar, C. Hamilton

Expected enrollment: 18

ASTR-335-01 - Astronomy - 2004-2005

(Fall) Modern Astrophysics

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

How do astronomers determine the nature and extent of the universe? Following the theme of the "Cosmic Distance Ladder," we explore how our understanding of astrophysics allows us to evaluate the size of the observable universe. We begin with direct distance determinations in the solar system and nearby stars. We then move on to spectroscopic distances of stars; star counts and the structure of our galaxy; Cepheid variables and the distances of galaxies; the Hubble Law and large-scale structure in the universe; quasars and the Lyman-alpha forest.

Prerequisites: Physics 115 and one prior physics or astronomy course at the 200 level or above

Notes: 2 meetings (90 minutes); fall 2004 classes to be held at UMass

Instructors: G. Wilson

Expected enrollment: 25

ASTR-335-01 - Astronomy - 2004-2005

(Spring) Modern Astrophysics - *Not offered this year/term

ASTR-337-01 - Astronomy - 2004-2005

(Spring) Observational Techniques in Infrared and Optical Astronomy

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

An introduction to the techniques of gathering and analyzing astronomical data, particularly in the optical and infrared. Telescope design and optics; instrumentation for imaging, photometry, and spectroscopy; astronomical detectors; computer graphics and image processing; error analysis and curve fitting; data analysis and astrophysical interpretation, emphasizing globular clusters.

Prerequisites: Astronomy 224, 225, Physics 216

Notes: 2 meetings (75 minutes), 1 evening lab (3 hours) Spring 2005 classes will be held at UMass.

Instructors: R. Finn

ASTR-338-01 - Astronomy - 2004-2005

(Spring) Techniques of Radio Astronomy - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

An introduction to radio astronomy equipment, techniques, and the nature of cosmic radio sources. Radio receiver and antenna theory; radio flux, brightness temperature, and the transfer of radio radiation in cosmic sources; effect of noise, sensitivity, bandwidth, and antenna efficiency; techniques of beam switching, interferometry, and aperture synthesis; basic types of radio astronomical sources: ionized plasmas, masers, recombination and hyperfine transitions; nonthermal sources; applications to the sun, interstellar clouds, and extragalactic objects.

Prerequisites: two semesters of physics and two semesters of calculus

Notes: 2 meetings (75 minutes) and observation sessions

Instructors: The department

ASTR-351-01 - Astronomy - 2004-2005

(Fall) Astrophysics I: Stars and Stellar Evolution - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

This course looks at physical principles governing the properties of stars, their formation and evolution: radiation laws and the determination of stellar temperatures and luminosities; Newton's laws and the determination of stellar masses; hydrostatic equilibrium and the thermodynamics of gas and radiation; nuclear fusion and stellar energy generation; physics of degenerate matter and the evolution of stars to white dwarfs, neutron stars, or black holes; nucleosynthesis in supernova explosions; dynamics of mass transfer in binary systems; viscous accretion disks in star formation and X-ray binaries.
Prerequisites: two 300-level physics courses
Notes: 3 meetings (80 minutes)
Instructors: The department

**ASTR-352-01** - Astronomy - 2004-2005
(Spring) Astrophysics II: Galaxies
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course applies physics to the understanding of astronomical phenomena. Physical processes in the gaseous interstellar medium; photoionization in HII regions and planetary nebulae; shocks in supernova remnants and stellar jets; energy balance in molecular clouds. Dynamics of stellar systems; star clusters and the virial theorem; galaxy rotation and the presence of dark matter in the universe; spiral density waves. Quasars and active galactic nuclei: synchrotron radiation; accretion disks, supermassive black holes.
Prerequisites: two 300-level physics courses
Notes: 2 meetings (75 minutes; Spring 2005 classes to be held at Smith College.
Instructors: J. Lowenthal

**ASTR-395-01** - Astronomy - 2004-2005
(Fall) Independent Study

**BIOCH-311-01** - Biochemistry - 2004-2005
(Fall) Protein Biochemistry and Cellular Metabolism
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Biological Sciences 311f; Chemistry 311f)
This course is a rigorous introduction to the study of protein molecules and their role as catalysts in the cell. Topics include general principles of protein folding, protein structure-function correlation, enzyme kinetics and mechanism, carbohydrate and lipid biochemistry, and metabolic pathways.
(catabolic and anabolic) and their interaction and cross-regulation. Biological transformation of energy is considered in light of the principles of thermodynamics.

Prerequisites: Biological Sciences 210 (can be taken concurrently), Chemistry 302
Notes: 3 meetings (75 minutes), 1 lab (4 hours)
Instructors: L. Hsu
Section Instructors: 01 LAB L Hsu | 02 LAB L Hsu |

BIOCH-314-01 - Biochemistry - 2004-2005
(Spring) Nucleic Acids Biochemistry and Molecular Biology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Biological Sciences 314s; Chemistry 314s)
This course is an in-depth examination of DNA and RNA structures and how these structures support their respective functions during replication, transcription, and translation of the genetic material. Emphasis is on the detailed mechanisms associated with each step of gene expression. Discussions incorporate many recent advances brought about by recombinant DNA technology.
Prerequisites: Biological Sciences 210, Chemistry 302, Biochemistry 311, or permission of instructor
Notes: 3 meetings (75 minutes), 1 lab (4 hours)
Instructors: L. Hsu
Section Instructors: 01 LAB L Hsu | 02 LAB L Hsu |

BIOCH-330-01 - Biochemistry - 2004-2005
(Spring) Topics in Biochemistry and Molecular Biology
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course each year examines a number of important and exciting topics in biochemistry, molecular biology, and other related fields of biology. The intellectual and research development that formulated these fundamental concepts is traced through extensive readings of the primary literature. Discussions emphasize the critical evaluation of experimental techniques, data analysis, and interpretation. Substantial student participation in the form of oral presentation is expected.
Prerequisites: Biochemistry 311, 314, or permission of instructor
Notes: 1 meeting (2 hours, 30 minutes)
Instructors: L. Hsu

Biological Sciences

BIOL-124-01 - Biological Sciences - 2004-2005
(Spring) Age of the Genome: The Rise of Gene Identification and Manipulation
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
First-year seminar
Preamble (for topics courses): This is an introductory biology course that does not satisfy distribution and it does NOT substitute for Biology 150.
Changes in biotechnology surround us and impact all of our lives. Advances in our ability to sequence and identify genes have led to manipulations of this genetic information that far exceed our comprehension of the implications. The creation and dissemination of genetically modified organisms (GMOs), gene patenting debates, genetic testing and counseling, mammalian cloning, and gene therapy strategies are but a few of the topics we will discuss. Collaborative work, as well as moderate amounts of writing and speaking, will be expected in this course.

Notes: Three meetings (50 minutes)
Instructors: S. Stranford
Expected enrollment: 16

**BIOL-145-01 - Biological Sciences - 2004-2005**

*(Fall) Introductory Biology: A Green World*

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course examines the themes of plant life that we see in the woods and fields around us, in the exotic plants in our greenhouses, and in the plants we depend on for food. We will study plants living in surprising circumstances, going into winter, escaping from gardens, reclaiming farmland, cooperating with fungi and insects, and fighting for their lives. We will find that plants challenge some conventional, animal-based assumptions about what matters to living things. In labs, students will seek to answer their questions about how plants grow in nature with studies of plant structure and function, ecology, and evolution.

Notes: 3 meetings (50 minutes); 1 lab (3 hours)
Instructors: A. Frary
Section Instructors: 01 LAB A Frary | 02 LAB A Frary |

*(Spring) Introductory Biology: Animal Bodies, Animal Functions - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

How are animal bodies built to deal with living on earth? In this course we will study the function of cells, organs, and organ systems that have evolved to help animals make their way through the physical and chemical environment. In lecture and in lab, we'll consider the common needs of animals--such as feeding, breathing, and reproducing--and the diverse solutions they have devised. A range of life, from unicellular organisms to animals with backbones (including mammals) will be considered.

Instructors: S. Bacon
Expected enrollment: 12

**BIOL-150-01 - Biological Sciences - 2004-2005**

*(Fall) Introductory Biology: Diversity of Life*

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

Most organisms are notably unlike ourselves--a tapestry of bacteria, protozoans, algae, and, off by themselves, the plants, fungi and animals. We will survey the whole range of organisms, especially those in the ponds and forests of our campus. Labs will start in the field (many opportunities to get wet or muddy). You will design studies that play to the special features of the organisms you have found. The class counts exactly the same as Biology 150; but it is a small class rather than a large one, addressed to students intrigued by natural history.

Notes: 4 meetings (50 minutes); 1 lab (3 hours)

*(Fall) Introductory Biology: Form and Function*

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

By exploring some of the basic structural and functional systems found in plants and animals, this course will examine assorted strategies that organisms have evolved to solve life's "major problems." Topics will include energy acquisition, reproduction, water balance, control systems, and movement. Labs will introduce students to data collection, manipulation, and analysis.

Notes: A liberal arts introduction to biology, open to any student; required for potential majors in biology, biochemistry, and neuroscience and behavior
Instructors: G. Gillis, P. Gruber
Section Instructors: 01 LAB Staff | 02 LAB Staff | 03 LAB Staff | 04 LAB Staff | 05 LAB Staff |
Expected enrollment: 90

*(Fall) Introductory Biology: Form and Function*

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

We will survey the great diversity of life on earth from thearchaeabacteria that live in hot sulfur springs to giant sequoia trees to singing birds. In our survey, we will discover a variety of life cycle patterns, different ways of extracting energy from the environment, and multiple life history strategies. Labs will explore biological diversity via collecting trips around campus as well as laboratory experiments and will introduce students to data collection, manipulation, and analysis.
Notes: A liberal arts introduction to biology, open to any student; required for potential majors in biology, biochemistry, and neuroscience and behavior.

Instructors: S. Barry, S. Smith

**(January) Ethnobotany**

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

The aim of this course is to raise the interest of the students in the study of medicinal plants, and in the process of discovering new natural products from plants using an ethnobotanical approach. Students will be given extended information about world ethnobotanical traditions. They will learn about plant taxonomy, plant geography, chemistry of medicinal plants, and methods for the isolations of active constituents. In addition, problems of conservation ecology of the rainforests and endangered plant species will be discussed.

Notes: Two meetings (75 minutes)

Instructors: N. Mamedov

Expected enrollment: 25

**(Spring) Introductory Biology II: How Organisms Develop**

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

An overview of cells to tissues to organisms. Cellular components, the role of the nucleus, cell reproduction, and meiosis will be examined as part of our study of gamete production, fertilization, embryology, and development in an invertebrate (sea urchin), a vertebrate (chick), a fern, and a flowering plant. The basic molecular biology of DNA, RNA, and protein synthesis will be presented and examined in the context of building a fly embryo and a flower.

Prerequisites: Biological Sciences 145 or 150

**(Spring) Local Flora**

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

Offers plant identification and natural history, emphasizing trees, native and introduced, and wildflowers. On- and off-campus field trips.

Prerequisites: 4 credits in department or per I

Notes: 1 meeting (3 hours), with field trips

Instructors: A. Frary

Expected enrollment: 12

**BIOL-208-01** - Biological Sciences - 2004-2005

**(Spring) Ornithology**

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

Introduces the study of birds, especially the local avian fauna, emphasizing fieldwork.

**(Spring) Cell Biology**  
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement  
Undertakes an integrated study of the processes and structures that define life at the cellular level. Considers the molecular and supramolecular organization of membranes, cytoskeleton, and organelles in the context of the physical and chemical principles governing their assembly, and their participation in phenomena such as the capture and transformation of energy, catalysis, transport, motility, signal transduction, and maintenance of cytoplasmic organization. The laboratory illustrates and analyzes these phenomena through selected optical and biochemical approaches.  
Prerequisites: Biological Sciences 150 and 200, Chemistry 201 or 202  
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes), 1 lab (3 hours)  
Instructors: F. DeToma, P. Gruber

**BIOL-225-01** - Biological Sciences - 2004-2005  
**(January) The Structure of Memory**  
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.  
Advances in neuroscience have provided a great deal of information about how the brain works. It is now beginning to be possible to explain the biological mechanisms of some of the "higher functions" such as emotions, consciousness, and memory. This course explores how memory is organized in the human brain, shows the similarities and differences between different memory functions, and aims to provide a better understanding of how we learn, remember, and sometimes forget.  
Notes: Class will meet for 75 minutes every day, and there will be daily assignments or exercises to illustrate and reinforce the lecture.  
Instructors: C. Smith

(Spring) Darwin

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Write-up-intensive; History 361s (02))

This course looks at the scientific content and intellectual context of Darwin's theory of evolution - his facts, metaphors, hypotheses, and philosophical assumptions. Readings from Darwin and his sources, and examination of the organisms he studied. A background in eighteenth- and nineteenth-century history or whole organism biology is recommended. This course does not satisfy a distribution requirement in biological sciences.

Prerequisites: Biological Sciences 213, 4 credits in history, or permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: S. Rachootin

Expected enrollment: 20

(Spring) Vertebrate Biology - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

A study of vertebrates with emphasis on structural adaptations for functions such as feeding and locomotion, and on natural history. Some morphology and field identification involved in laboratory work.

Prerequisites: two of Biological Sciences 200, 210, 213

Notes: 3 meetings (50 minutes), 1 lab (3 hours)

Instructors: S. Smith

Section Instructors: 01 LAB S Smith |

(Fall) Invertebrate Zoology - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course looks at the evolutionary relations of the profoundly different groups of animals in light of their structure, development, and fossil history. Emphasizes exceptional organisms that prove - and disprove - biological rules. Themes include coloniality, asexual reproduction, metamorphosis, and making skeletons.

Prerequisites: Biological Sciences 213

Notes: 3 meetings (50 minutes), 1 lab (3 hours)

Instructors: S. Rachootin

BIOL-315-01 Biological Sciences - 2004-2005
(Spring) Ethology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course studies the biology of animal behavior, including both invertebrates and vertebrates. Topics include sense organs and communication, circadian and other rhythms, orientation and navigation, and the evolution and ecology of social systems. Laboratories involve an individual project.
Prerequisites: 8 credits of biology at the 200 level with 213 strongly recommended
Notes: 3 meetings (50 minutes), 1 lab (3 hours)

BIOL-316-01 Biological Sciences - 2004-2005
(Fall) Scanning Electron Microscopy
Credits/PE Units: 2-4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Geology 316f)
Includes theory and operation of the scanning electron microscope and preparation of biological and geological materials for observation. The versatile use of the microscope will be emphasized and will include low magnification, high resolution, and back scattered (reflected) electron modes of operation as well as operation at different pressures. Energy dispersive X-ray microanalysis will be introduced. Students may elect the course for 4 credits for further experience in energy dispersive microanalysis, including quantitative analysis and element mapping.
Prerequisites: 4 credits of biological sciences or geology course at the 200 level, and Geology 220 if electing 4-credit option
Notes: 1 meeting (2 hours), 1 lab (3 hours), 1 additional meeting (50 minutes) for 4-credit option; satisfies distribution requirement only if taken for 4 credits
Instructors: S. Gruber, M. Rice
Expected enrollment: 10

BIOL-319-01 Biological Sciences - 2004-2005
(Fall) Immunology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course will cover the cells, organs, and biochemical signals that constitute the immune system, as well as immune mechanisms for removal of foreign pathogens. Additional topics will include: autoimmunity, allergy, vaccination, transplantation, immune deficiency, and pathogen evasion strategies. Special emphasis will be placed on the human immune response, with the addition of clinical case studies and laboratory exercises to reinforce these ideas.
Prerequisites: Biological Sciences 210 and 220
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: S. Stranford
Section Instructors: 01 LAB S Stranford | 02 LAB S Stranford |

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking-intensive)
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.
How is information about physiological states coded in chemical information passed between animals? How is this information passed between organs in the body? In this course we'll read and discuss the primary literature in biology to look in depth at the nature of chemical communication in vertebrates. We will study hormones, pheromones and neurotransmitters, the neuroendocrine mechanisms that mediate their functions in the body, and the social and physical contexts in which these signalling mechanisms operate.
Prerequisites: Biological Sciences 220 or per Instructor
Instructors: S. Bacon
Expected enrollment: 14

BIOL-321-01 - Biological Sciences - 2004-2005
(Spring) Conference Course: Emerging Infectious Diseases
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking-intensive)
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.
Primary and secondary scientific literature will be used as a foundation for discussing global emerging infectious diseases. Then, using such texts as The Coming Plague and Betrayal of Trust, we will discuss both the science behind these diseases as well as some of the social implications of the present day spread of infectious disease. Students will be expected to work in collaborative groups to present background material and research studies illuminating our current understanding of pathways of disease transmission.
Prerequisites: Biological Sciences 319, or permission of the instructor
Instructors: S. Stanford
Expected enrollment: 14

BIOL-321-02 - Biological Sciences - 2004-2005
(Fall) Conference Course: The Molecular Bases of Cancer
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.
Recent discoveries of "cancer genes" have greatly improved our understanding of the causes of cancer. We will first review the discoveries of cancer genes and their functions, then explore the recent literature about them and other molecules important in the control of cell behavior, and end with an exploration of ongoing attempts to develop molecular diagnoses and molecular cures for cancers.
Prerequisites: Biological Sciences 210 and 220
Instructors: F. DeToma
Expected enrollment: 12

BIOL-321-02 - Biological Sciences - 2004-2005
(Spring) Conference Course: The Neurobiology of Art and Music
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.
Art and music are a part of all human cultures. Is there something about the human brain that drives us to paint and sing? We will examine how the brain simultaneously processes different aspects of a visual object, such as shape, color, and depth, and ask how this processing may affect the way we draw and paint. We will ask whether musical dissonance and consonance are biologically or culturally determined and whether or not different parts of the brain process different aspects of music such as pitch, melody, harmony, rhythm, and the emotional content of a musical piece.
Prerequisites: Must be junior or senior with at least 8 credits at the 200-level in one of the following majors: biology, neuroscience & behavior, studio art, art history or music
Notes: Will not count towards the major.
Instructors: S. Barry
Expected enrollment: 10

BIOL-321-03 - Biological Sciences - 2004-2005
(Fall) Conference Course: Extreme Life
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.
This course will focus on biological systems that push the limits of structural and physiological possibility. For example, midges flap their wings at up to 1000 Hz; bar-headed geese migrate over Mount Everest; deep-sea fish withstand pressures near 300 atmospheres; certain frogs can allow their body temperatures to drop below 0 degrees C. We will explore the diverse mechanisms that underlie how organisms reach extreme levels of performance and survive in extreme environments through readings and discussions.
Prerequisites: Biological Sciences 213 or 220 or permission of instructor
Notes: One meeting (3 hours)
Instructors: G. Gillis
Expected enrollment: 14

BIOL-321-03 - Biological Sciences - 2004-2005
(Spring) Conference Course: Animal Cloning: Past, Present, and Future - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Speaking-intensive)
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

When Dolly the lamb was born, the world changed. Developmental biologists have been cloning organisms for decades—why the intense emotion over a sheep? This course will focus on the history of animal cloning, exploring both conceptual and technical advances over time. We will look at the current state of mammalian cloning, including the national debate about human stem cell research, reading from primary literature. While the emphasis will be on the biological phenomena involved, we will also discuss the legal, ethical, and moral implications of human cloning.

Prerequisites: Biological Sciences 220
Instructors: R. Fink
Expected enrollment: 14

BIOL-322-01 - Biological Sciences - 2004-2005
(Spring) Comparative Biomechanics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

The main objective of this course is to explore organismal structure and function via an examination of the basic physical principles that guide how living things are constructed and how organisms interact with their environment. We will use the combined approaches of the biologist and engineer to study the impact of size on biological systems, address the implications of solid and fluid mechanics for animal design, survey different modes of animal locomotion, and learn how biologists working in diverse areas (e.g., ecology, development, evolution, and physiology) gain insight through biomechanical analyses.

Prerequisites: Two of 210, 213, or 220; or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: G. Gillis
Section Instructors: 01 LAB G Gillis | 02 LAB G Gillis |
Expected enrollment: 18

BIOL-323-01 - Biological Sciences - 2004-2005
(Fall) Physiology and Anatomy of Plants: Growth Regulation
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course is a study of the higher plant, its structure, organization, and development. Examines both endogenous and environmental factors influencing plant growth and reproduction. Topics include anatomy, hormones and their mode of action, tropisms, photomorphogenesis, and flowering.

Prerequisites: Biol. 150, 200, 210 or per I
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: A. Frary
Section Instructors: 01 LAB A Frary |
Expected enrollment: 24

BIOL-325-01 - Biological Sciences - 2004-2005
(Fall) Evolutionary Survey of the Plant Kingdom - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course explores the tremendous diversity of the plant kingdom, emphasizing the local flora. Evolutionary relationships are discussed on the basis of comparisons of reproductive biology, morphology, anatomy, cell structure, and molecular biology.
Prerequisites: two of Biological Sciences 210, 213, or 213, or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours); offered alternate years
Instructors: A. Frary

BIOL-327-01 - Biological Sciences - 2004-2005
(Fall) Microbiology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is a general study of microorganisms and their activities, including form and structure; biochemical processes of growth, metabolism, and energy storage; distribution in nature and relationships to other organisms; cycles of matter; beneficial and detrimental effects on humans; and physical and chemical effects microorganisms make in their environment.
Prerequisites: Biological Sciences 220 and either 210 or 213
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: J. Knight
Section Instructors: 01 LAB J Knight | 02 LAB J Knight |
Expected enrollment: 28

BIOL-328-01 - Biological Sciences - 2004-2005
(Fall) Regulatory and Integrative Human Physiology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
A consideration of the physiological processes involved in the control of human body functions. We will study the mechanisms for regulating individual organ systems and how these mechanisms respond to changing needs of the individual. Our examination of the physiological controls will include an analysis of the underlying cellular and molecular processes that drive the mechanisms and integrate the activities of the different systems.
Prerequisites: Biological Sciences 220 or Biochemistry 311
Instructors: S. Bacon
Section Instructors: 01 LAB S Bacon | 02 LAB S Bacon |
Expected enrollment: 24

BIOL-331-01 - Biological Sciences - 2004-2005
(Fall) Advanced Ecology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course focuses on patterns of distribution and abundance of organisms, particularly as related to community, conservation, and invasion dynamics. We will discuss readings and data from the primary scientific literature and combine data from student-run experiments and observations with mathematical models and computer simulations to explore basic and applied ecological models.
Prerequisites: Biological Sciences 213 and Statistics 240 or one course in calculus, and permission of instructor
Notes: 4 credits; 3 meetings (50 minutes); 1 lab (3 hours)
Instructors: M. Hoopes
Section Instructors: 01 LAB M Hoopes |
Expected enrollment: 24

BIOL-332-01 - Biological Sciences - 2004-2005
(Fall) Macroevolution
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course presents the science of biological form and its relation to adaptation, development, and the modes of evolutionary change. Whole organisms are emphasized in the first part of the course; the evolution of developmental pathways from a molecular perspective is emphasized in the second part.
Prerequisites: Biological Sciences 213 and 210
Notes: 2 meetings (75 minutes); 1 lab (3 hours)
Instructors: S. Rachootin
Section Instructors: 01 LAB S Rachootin |
Expected enrollment: 15

BIOL-333-01 - Biological Sciences - 2004-2005
(Spring) Neurobiology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
We will study the electrical and chemical signals underlying the generation of the nerve impulse and synaptic transmission. We will then explore neuronal circuits underlying learning and memory, movement, and sensory perception.

Prerequisites: Biological Sciences 200, 220 and 4 credits in chemistry or physics

Notes: 3 meetings (50 minutes), 1 discussion (50 minutes), 1 lab (3 hours)

Instructors: S. Barry

BIOL-334-01 - Biological Sciences - 2004-2005

(Spring) Biostatistics - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

(Statistics 354s)

Introduction to statistical techniques used most commonly in biological and medical sciences. Emphasis will be on hypothesis testing, regression, analysis of variance, statistical power, comparisons of confidence intervals, time-series analysis, spatial analysis, and Bayesian inference. Examples and datasets will be drawn from student independent projects.

Prerequisites: one of the following: Biological Sciences 210, 213, 331, calculus, Statistics 240, and permission of instructor

Notes: 1 meeting (3 hours); offered alternate years

BIOL-335-01 - Biological Sciences - 2004-2005

(Spring) Mammalian Anatomy - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course will examine the fundamental structural organization of the mammalian body. The lecture portion of the class will focus largely on humans, and students will gain practical insight into other mammalian systems in the laboratory.

Prerequisites: Biological Sciences 213

Notes: 3 meetings (50 minutes), 1 lab (3 hours)

Instructors: G. Gillis

BIOL-340-01 - Biological Sciences - 2004-2005

(Spring) Eukaryotic Molecular Genetics

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course will examine the role of molecular genetic analysis in the study of phenomena such as human disease (particularly breast cancer), animal development, and programmed cell death. We will also take a detailed look at the science behind the Human Genome Project. There will be group discussions of original research articles and review articles, and we will often use a case-method approach.

Prerequisites: Biological Sciences 200 and 210

Notes: 3 meetings (50 minutes), 1 lab (3 hours)

Instructors: C. Woodard

BIOL-344-01 - Biological Sciences - 2004-2005

(Spring) Biogeochemistry of Northern Ecosystems

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Speaking- and writing-intensive; Environmental Studies 344s)

Global climate models and recent evidence show that ecosystems in the northern latitudes are extremely sensitive to climate change. This interdisciplinary science course examines boreal, subarctic and arctic ecosystems through the study of nutrient cycling, plant ecology, hydrology, soil processes, and biosphere-atmosphere interactions. Topics include fundamentals of biogeochemical elements such as carbon and nitrogen at scales from the microscopic to global, sensitivity, feedbacks to climate change, and disturbance processes such as fire and permafrost degradation.

Prerequisites: At least 2 semesters of biology, chemistry, or environmental science, and permission of the instructor

Notes: 1 meeting (3 hours). Please sign up for this course as ES344

Instructors: J. Bubier

BIOL-397-01  -  Biological Sciences - 2004-2005
(Spring) Teaching Biology: Middle and Secondary School
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Teacher Licensure: Students interested in pursuing licensure in middle and secondary schools can combine the major with a minor in education. For specific requirements, refer to "Teacher Licensure" in this catalogue and consult Ms. Lawrence in the psychology and education department. Licensure also requires a passing score on the literacy and specific subject area sections of the Massachusetts Educators Certification Test. In the case of biology, this includes cells and cell theory, characteristics or organisms, human biology, principles of heredity and the evolution of life, matter and energy in ecosystems.

Chemistry

CHEM-100-01  -  Chemistry - 2004-2005
(Fall) Problem Solving in General Chemistry
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is designed to introduce chemistry to students who have had difficulty with quantitative problem solving. The syllabus will follow closely that of Chemistry 101, and students will participate in the 101 laboratory. Chemistry 100 differs from 101 not in content, but in format: through a small enrollment and five weekly course meetings rather than three, the course emphasizes intensive, faculty-supervised group work and the development of quantitative problem-solving skills. Chemistry 100 serves equally with 101 as an introduction to the department's core sequence. Students should also enroll in a lab section of Chemistry 101.
Notes: 5 meetings (50 minutes), 1 lab (3 hours)
Instructors: The department

CHEM-101-01  -  Chemistry - 2004-2005
(Fall) General Chemistry I
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course provides introduction and development of fundamental concepts including stoichiometry, reactions in aqueous solutions, thermochemistry, atomic structure, chemical bonding, and acid-base reactions. The laboratory emphasizes basic skills, quantitative chemical measurements, and principles discussed in lectures.
Notes: 3 meetings (75 minutes), 1 lab (3 hours)

CHEM-201-01 - Chemistry - 2004-2005
(Spring) General Chemistry II
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course provides background in basic principles of physical, analytical, and inorganic chemistry essential to the study of all chemical phenomena. Topics include elementary principles of molecular electronic structure, quantitative treatment of chemical equilibrium with applications to solubility, acid-base, and electron transfer reactions, introduction to chemical kinetics and thermodynamics, and the chemistry of coordination compounds. Laboratory experiments will include classical analytical and kinetic techniques, preparation of inorganic compounds, and an introduction to ab initio electronic structure calculations.
Prerequisites: Chemistry 100 or 101 or permission of instructor
Notes: 3 meetings (75 minutes), 1 lab (3 hours)
Instructors: D. Cotter, M. Nunez

CHEM-202-01 - Chemistry - 2004-2005
(Fall) Organic Chemistry I
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Introduces organic chemistry, emphasizing the principles governing broad classes of reactions. Topics include stereochemistry, nucleophilic substitution and elimination reactions, the chemistry of alkanes, alkenes, alkynes, alcohols, and ethers, and an introduction to infrared and nuclear magnetic resonance spectroscopy. Laboratory work includes synthesis, practice in the techniques of distillation, crystallization, chromatography, molecular modeling, and identifying unknown organic compounds by chemical and spectroscopic means.
Prerequisites: Chemistry 201 or permission of instructor
Notes: 3 meetings (75 minutes), 1 lab (3 hours)
Instructors: D. Hamilton

 CHEM-210-01 - Chemistry - 2004-2005  
(Spring) Biotechnology: Science, Culture, and Ethics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
The development of a molecular understanding of the basis of life, and the application of this knowledge to alter and engineer living organisms, is an ongoing scientific revolution with far-reaching social and ethical considerations. This course introduces the science of the biotechnology revolution within its historical and social context; a description of the fundamental chemistry and molecular biology underlying these technologies is integrated with exploration of their social and ethical impacts. Topics to be covered include the structure of DNA, the human genome project, genetic engineering in agriculture, and cloning.
Prerequisites: Chemistry 101, Biological Sciences 151, or Interdepartmental Courses 121-122, or permission of instructor
Notes: offered every other year
Instructors: S. Decatur

CHEM-212-01 - Chemistry - 2004-2005  
(Spring) Chemistry of Biomolecules - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
An examination of the major ideas of biochemistry from the point of view of the chemical sciences rather than the life sciences. Structures of important biomolecules. The role of energetics and reaction dynamics in biochemical processes. Major metabolic pathways are considered, including those of proteins, carbohydrates, lipids, and nucleic acids.
Prerequisites: Chemistry 202
Notes: 2 meetings (75 minutes), one fourth hour
Instructors: The department

CHEM-220-01 - Chemistry - 2004-2005  
(Fall) Simulating Chemistry, Biochemistry, and Materials Science: An Introduction to Scientific Computing - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
From the very early days of computers, they have been used in atomic simulations. Today, there are many algorithms for simulating chemical events. Simulations allow us to gain insight into possible causes of physical phenomena. This course introduces some of the methods used to simulate chemistry, biochemistry, and materials science. Potential energy surfaces, Monte Carlo methods, and molecular dynamics are introduced and applied to projects in chemistry, biochemistry, and materials science.
Prerequisites: Mathematics 202 (or equivalent), or permission of the instructor
Instructors: M. Gomez
Expected enrollment: 15

CHEM-250-01 - Chemistry - 2004-2005  
(Fall) Introduction to the History of Chemistry
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement  
(Writing-intensive)
Traces the growth of chemistry in several ways: as a body of knowledge and beliefs, as a practical means of intervention, and as a community of practitioners linked (or divided) by sociopolitical bonds and common interests, intellectual and otherwise. After an overview of chemical history and an introduction to various scholarly traditions in the field, the balance of the course will be devoted to case studies of narrower topics or episodes, such as the alchemical tradition and Robert Boyle, the eighteenth-century Chemical Revolution, nineteenth-century organic chemistry, Ionism, atomism and elementalism, chemistry and war, the quantum revolution, educational traditions, the role of women.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: D. Cotter
Expected enrollment: 25

CHEM-295-01 - Chemistry - 2004-2005  
(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Independent work in chemistry can be conducted with any member of the department.
Prerequisites: soph, permission of department required every semester
Notes: Note: Students conducting an independent laboratory research project for course credit in a department, program, or laboratory covered by the College's chemical hygiene plan must participate in a safety training session before beginning research. Course credit will not be granted to students who do not receive safety training.

Instructors: The department.

CHEM-295-01 - Chemistry - 2004-2005
(Spring) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Independent work in chemistry can be conducted with any member of the department.
Prerequisites: soph, permission of department required every semester
Notes: Note: Students conducting an independent laboratory research project for course credit in a department, program, or laboratory covered by the College's chemical hygiene plan must participate in a safety training session before beginning research. CHEM-302-01 - Chemistry - 2004-2005
(Spring) Organic Chemistry II
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
A continuation of Chemistry 202 that addresses the chemistry of aromatic compounds, the carbonyl group, and a number of other functional groups. Examples drawn from compounds of biological interest. The laboratory includes organic synthesis and the identification of unknown compounds by chemical and spectroscopic means.
Prerequisites: Chemistry 202
Notes: 3 lectures (75 minutes), 1 lab (4 hours)
Instructors: S. Browne
Section Instructors: 01 LAB S Browne | 02 LAB S Browne | 03 LAB S Browne | 04 LAB S Browne | 05 LAB S Browne | 06 LAB S Browne |

CHEM-308-01 - Chemistry - 2004-2005
(Fall) Chemical Thermodynamics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
A consideration of the contribution of thermodynamics to the understanding of the "driving forces" for physical chemical changes and the nature of the equilibrium state.
Prerequisites: Chemistry 201, Chemistry 202, Mathematics 101, Physics 103 and 204, or 115
Notes: 3 meetings (75 minutes), 1 lab (4 hours)
Instructors: The department
Section Instructors: 01 LAB Staff | 02 LAB Staff |
Expected enrollment: 36

CHEM-311-01 - Chemistry - 2004-2005
(Fall) Protein Biochemistry and Cellular Metabolism
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Biochemistry 311f; Biological Sciences 311f)
Section Instructors: 01 LAB L Hsu | 02 LAB L Hsu |

CHEM-314-01 - Chemistry - 2004-2005
(Spring) Nucleic Acids Biochemistry and Molecular Biology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Biochemistry 314s; Biological Sciences 314s)
Instructors: L. Hsu
Section Instructors: 01 LAB L Hsu | 02 LAB L Hsu |

CHEM-315-01 - Chemistry - 2004-2005
(Spring) Experimental Methods
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Uses extended research-style projects to introduce advanced techniques in physical measurement (e.g., high-resolution spectroscopy, calorimetry, electrochemistry), separation and analysis (e.g., gas- and liquid-phase chromatography, mass spectrometry), and chemical synthesis (e.g., catalytic and
enantioselective methods, biomolecules, polymers). Students will increase their repertoire of laboratory skills while learning to integrate concepts from different subdisciplines of chemistry into a unified experimental approach to problem solving.

Prerequisites: Chemistry 302, 2 lectures (75 minutes), 1 discussion (50 minutes), 1 lab (4 hours)
Instructors: W. Chen

Section Instructors: 01 LAB W Chen | 02 LAB W Chen |
Expected enrollment: 20

CHEM-317-01 - Chemistry - 2004-2005
(Spring) Principles of Polymer Chemistry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
An introduction to the study of molecules of high molecular weights with emphasis on synthetic rather than naturally occurring polymers. Topics include polymerization, structures, molecular weight determination, molecular weight distribution, chain configurations, rubber elasticity, and thermodynamics and statistical mechanics of polymer solutions.
Prerequisites: Chemistry 302
Notes: 2 meetings (75 minutes); 1 discussion (50 minutes); offered once every three years
Instructors: W. Chen

CHEM-325-01 - Chemistry - 2004-2005
(Spring) Atomic and Molecular Structure
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is an introduction to experimental and theoretical approaches to the determination of the structure of atoms, molecules, and chemical bonds. Classroom work provides background in the theory of atomic and molecular structure and an introduction to quantum mechanics and spectroscopy.
Prerequisites: Chemistry 201, 202, Mathematics 202, Physics 216
Notes: 2 meetings (75 minutes), 1 discussion (50 minutes), 1 lab (4 hours)
Instructors: J. Van Wijngaarden
Section Instructors: 01 LAB J Van Wijngaarden | 02 LAB J Van Wijngaarden |
Expected enrollment: 36

CHEM-333-01 - Chemistry - 2004-2005
(Fall) Protein Structure and Function - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course introduces the subject of how the three-dimensional molecular structures of proteins determine and modulate their function. Topics will include fundamentals of protein chemistry and structure, comparisons of various structural motifs, and a survey of a wide range of protein functions. Examples will be drawn from the current literature on enzyme mechanisms, photosynthetic systems, motor proteins, ion channels, and topics of student interest.
Prerequisites: Chemistry 302
Notes: 2 meetings (75 minutes), 1 discussion (50 minutes); offered every other year
Instructors: M. Nunez

CHEM-334-01 - Chemistry - 2004-2005
(Spring) Advanced Inorganic Chemistry
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The implications of molecular symmetry as expressed in the language of group theory are explored in some depth. Group theory provides the context for a discussion of the structural and spectroscopic properties of inorganic compounds, particularly those of the transition metals.
Prerequisites: Chemistry 302, 325
Notes: 2 meetings (75 minutes), 1 discussion (50 minutes); offered every other year
Instructors: D. Cotter
Expected enrollment: 20

CHEM-336-01 - Chemistry - 2004-2005
(Spring) Organic Synthesis
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course emphasizes recent developments in synthetic organic chemistry and deals with general synthetic methods and specific examples of natural product synthesis. It covers such topics as new methods of oxidation and reduction, stereospecific olefin formation, ring-forming reactions, and methods of carbon-carbon bond formation. The application of these reactions to the synthesis of naturally occurring compounds is examined. A general strategy for the synthesis of complex molecules is also presented.
Prerequisites: Chemistry 302
Notes: 3 meetings (50 minutes); offered every other year
Instructors: D. Hamilton
Expected enrollment: 35

CHEM-337-01 - Chemistry - 2004-2005
(Fall) Physical Organic Chemistry
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
An introduction to the concepts and methods of physical organic chemistry. Examination of reaction mechanisms and the experimental results that support these mechanisms. Topics include structure and reactivity, reaction kinetics, mechanism determinations, and Woodward-Hoffman Rules.
Prerequisites: Chemistry 302, 308
Notes: 2 meetings (75 minutes); offered every other year
Instructors: S. Browne
Expected enrollment: 35

CHEM-344-01 - Chemistry - 2004-2005
(Fall) Advanced Physical Chemistry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
An introduction to topics in molecular spectroscopy and group theory.
Prerequisites: Chemistry 325
Notes: 2 meetings (75 minutes); offered once every three years
Instructors: The department

CHEM-345-01 - Chemistry - 2004-2005
(Fall) Physical Biochemistry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course emphasizes the wealth of information that can be gained by physical measurements on substances of biological importance, such as proteins, nucleic acids, and model compounds for these substances. Applications of X-ray diffraction, measurement of thermodynamic parameters, spectroscopic methods, and hydrodynamic measurements to biological systems. Specific topics are chosen according to the interests of each class, with special emphasis on readings from the recent literature.
Prerequisites: Chemistry 302, 325
Notes: 2 meetings (75 minutes); offered every other year
Instructors: M. Campbell

CHEM-395-01 - Chemistry - 2004-2005
(Fall) Independent Study
Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement.
Independent work in chemistry can be conducted with any member of the department.
Prerequisites: jr, sr, permission of department
Notes: Note: See safety training restrictions in description of Chemistry 295
Instructors: The department

CHEM-395-01 - Chemistry - 2004-2005
(Spring) Independent Study
Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement.
Independent work in chemistry can be conducted with any member of the department.
Prerequisites: jr, sr, permission of department
Notes: Note: See safety training restrictions in description of Chemistry 295
Instructors: The department

CHEM-399-01 - Chemistry - 2004-2005
(Fall) Comprehensive Seminar
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
A seminar series consisting of meetings on alternate weeks to discuss articles from the current chemical literature. The readings will prepare students for attendance at lectures on the chosen topics in the remaining weeks. The lectures are given primarily by visiting speakers, but they may include department faculty. Students will serve as discussion leaders, and each student will write a paper on a presentation of her choice.
Prerequisites: sr
Notes: 1 meeting (90 minutes)

Mount Holyoke College Course Information Archive 2000-2016
Instructors: The department
Expected enrollment: 20

Classics

CLASS-106-01 - Classics - 2004-2005
(Fall) Suffering into Truth: Ancient and Modern Tragedy
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive)
Introduces students to the important philosophical ideas and dramatic practices arising from ancient Greek tragedy that have influenced the modern theater. We will examine the important problems that tragedy poses by reading closely and comparing the works of two of the finest tragedians, Sophocles and Eugene O'Neill. Key texts will include Sophocles' 'Antigone', 'Oedipus the King', 'Philoctetes', 'Electra'; and O'Neill's 'The Hairy Ape', 'Desire Under the Elms', 'Mourning Becomes Electra', 'The Iceman Cometh', 'Long Day's Journey into Night'. We will also view films that offer cinematic adaptations of the tragedies or make significant allusion to the texts we have read.
Notes: 2 meetings (75 minutes); Tuesday evenings (viewing) 7-9 pm
Instructors: B. Arnold
Expected enrollment: 17

CLASS-231-01 - Classics - 2004-2005
(Spring) The City of Athens from Theseus to Alaric
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English; Arth-290)
A detailed survey of the archaeology of Athens from its origin in the Bronze Age to the fourth century CE. The principal monuments and architectural development of the ancient city will be discussed against a broader cultural and historical background, with an emphasis on the persons and events responsible for the shaping of the urban landscape, and the specific social and political circumstances that gave the monuments meaning.
Notes: 2 meetings (75 minutes)
Instructors: M. Landon

CLASS-295-01 - Classics - 2004-2005

Complex Organizations

COMOR-201-01 - Complex Organizations - 2004-2005
(Spring) Poverty in the United States - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Politics 201s)
Why do so many people live in poverty in the most affluent of nations? This course will attempt to sort myths from realities in debates over the morality and feasibility of measures that might narrow the gap between rich and poor and expand opportunities, especially for the 20 million children living in poverty. Students will explore how poverty is related to class, race, sex, family structure, and economics, and how it is affected, for better and worse, by governmental programs involving housing, education, crime, welfare, and taxation.
Notes: preference will be given to up to five students who have taken Complex Organizations 220 (Politics 225) 2 meetings (75 minutes)
Instructors: J. Fox
Expected enrollment: 15

COMOR-205-01 - Complex Organizations - 2004-2005
(Spring) Labor Economics: Women and the United States Economy
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Economics 205s)

COMOR-206-01 - Complex Organizations - 2004-2005
(Spring) Economics of Health Care and Health Service Organizations
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Economics 206f)

COMOR-212-01 - Complex Organizations - 2004-2005
(Fall) Individuals and Organizations
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Psychology 212f)
This course focuses on individual and small group behavior in the organizational setting. The basic objective is to increase knowledge and understanding of human behavior in organizations - especially each individual's own behavior. Three types of knowledge are stressed: (1) intellectual information regarding human behavior in an organizational context; (2) understanding of oneself as a person and as a manager; and (3) behavioral skills in dealing with people.
Prerequisites: soph, jr, sr
Notes: 2 meetings (75 minutes)
Instructors: D. Butterfield

COMOR-215-01 - Complex Organizations - 2004-2005
(Fall) Economics of Corporate Finance
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Economics 215s)

COMOR-220-01 - Complex Organizations - 2004-2005
(Fall) Winners and Losers: Taxation, Social Justice, and Economic Choices
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive; Politics 225s)
The maze of laws that make up the U.S. tax system shape and define what our nation is and will be; they also create winners and losers. Who benefits from special relief provisions such as for housing, health care, education, retirement savings, charitable giving, and child care? What are the economic consequences? How are families taxed? Women? The poor? Capital gains? Should we have an estate tax, reform the income tax, or adopt a consumption tax? How can we save Social Security? All these issues and more are addressed, including a review of federal tax history from the Constitution to the present.

Prerequisites: History 171, Politics 104, Economics 103 or 104, or permission of instructor

Notes: 2 meetings (75 minutes)
Instructors: J. Fox
Expected enrollment: 20

COMOR-232-01 - Complex Organizations - 2004-2005
(Spring) Ethical Issues in Complex Organizations - Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Philosophy 232s)
This course examines ethical issues that arise in organizational contexts and helps students develop techniques for resolving ethical problems. Issues treated include whistle-blowing, conflicts of interest, employee privacy, affirmative action, and corporate social responsibility. There is considerable use of case studies.
Prerequisites: soph, jr, sr
Notes: 2 meetings (75 minutes)
Instructors: The program

COMOR-266-01 - Complex Organizations - 2004-2005
(Fall) Environmental Politics in America - Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Politics 266f)

COMOR-270-01 - Complex Organizations - 2004-2005
(Spring) American Foreign Policy
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph, jr, sr, and permission of program
Instructors: The department.

COMOR-299-01 - Complex Organizations - 2004-2005
(Spring) Leadership and the Liberal Arts
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)
An interdisciplinary approach to the nature, operations, and directions of complex organizations. Investigates the position of women and men in organizations, with a consideration of the nature and styles of leadership and of the value of a liberal arts degree in organizational interaction, and with an exploration of issues affecting organizations (ethics, competition, legal rights, authority, socialization). Required for the minor in complex organizations.
Notes: 2 meetings (75 minutes)
Instructors: F. McGinness

Computer Science

COMSC-100-01 - Computer Science - 2004-2005
(Fall) An Introduction to Computer Science
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
An introduction to basic computer science concepts and issues. Topics will be chosen from: origins of computers, data representation and storage, computer architecture, assemblers and compilers, operating systems, networks and the Internet, distributed systems, information retrieval, data organization, graphics, artificial intelligence, robotics, the theory of computation, and trends in Internet commerce and use. Laboratory assignments will offer some experience with programming and the use of application software.
Notes: 2 meetings (75 minutes), 1 lab (2 hours); students should NOT take this course after Computer Science 101
Instructors: P. Dobosh
Section Instructors: 01 LAB P Dobosh | 02 LAB P Dobosh | 03 LAB P Dobosh |

COMSC-101-01 - Computer Science - 2004-2005
(Fall) Problem Solving and Structured Programming
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Introduces the C language and the use of structured programming techniques. Emphasizes the solution of complex computational problems by their analysis into smaller subproblems that can be solved independently and then combined to form a complete solution. Introduces other topics relevant to computer science. Assumes no previous study or use of computers. This course is programming intensive.
Notes: 2 lectures (75 minutes), 1 lab (2 hours)
Instructors: S. Rollins
Section Instructors: 01 LAB S Rollins | 02 LAB S Rollins |
Expected enrollment: 50

COMSC-125-01 - Computer Science - 2004-2005
(Fall) Introduction to Robotics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
(Physics 125)
This course will provide the student with a hands-on introduction to robotics. Via an intensive lab component, the course will introduce and apply concepts in programming, electronics, and mechanical design. Much of the course will focus on a final design project wherein students will be challenged to design, prototype, and build a functional robot whose application is directed at assisting a disabled person. Lectures will introduce lab material, as well as topics in applied robotics, biomechanics, and issues of machine-human interaction.
Notes: 2 lectures (50 minutes), 1 lab (4 hours)
Instructors: P. Dobosh, O. Hoffman

COMSC-211-01 - Computer Science - 2004-2005
(Fall) Data Structures
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Using C++. solving problems with computers is accomplished by writing programs that operate on data to produce a desired result. The way data is organized and presented to the program can significantly affect its efficiency and simplicity and can sometimes determine whether or not a program can be written to solve the problem at all. This course presents ways of organizing data into "data structures" and analyzes how structuring the data can improve program performance.
This course is programming intensive.
Prerequisites: Computer Science 101
Notes: 2 meetings (75 minutes)
Instructors: S. Rollins
Expected enrollment: 20

COMSC-311-01 - Computer Science - 2004-2005
(Fall) Theory of Computation
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Are there any limits to what computers can do? Does the answer to this question depend on whether you use a PC or a Mac? Is C more powerful than PASCAL? This seminar explores these questions by investigating several models of computation, illustrating the power and limitations of each of these models, and relating them to computational problems and applications. Topics include finite state automata, pushdown automata, grammars, Turing machines, the Universal Turing Machine, and computability.
Prerequisites: Computer Science 101 and Mathematics 232
Notes: 2 meetings (75 minutes)
Instructors: P. Dobosh

COMSC-312-01 - Computer Science - 2004-2005
(Spring) Algorithms
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course is an introduction to the theory of algorithms. The goal of this course is to enable the student to design efficient algorithms as well as to select appropriate existing algorithms for solving complex problems. Topics may include sorting, searching, advanced data structures, and graph algorithms. In addition to discussing the behavior of the algorithms, we will study algorithm performance using a formal mathematical model.
Prerequisites: Computers Science 211 and Mathematics 232
Instructors: S. Rollins
Expected enrollment: 20

COMSC-321-01 - Computer Science - 2004-2005
(Spring) Operating Systems
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
An introduction to the issues involved in orchestrating the use of computer resources. Topics include operating system evolution, file-handling systems, memory management, virtual memory, resource scheduling, multiprogramming, deadlocks, concurrent processes, protection, and design principles. Course emphasis: understanding the effects of operating system design on computer system performance. This course is programming intensive.
Prerequisites: Computer Science 211 and 221
Notes: 2 meetings (75 minutes)
Instructors: D. Strahman
Expected enrollment: 20

COMSC-322-01 - Computer Science - 2004-2005
(Spring) Computer Architecture
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
The goal of this class is to provide the student with a working knowledge of how computers operate and the general principles that affect their performance. New developments in hardware render current technologies obsolete within one to three years. Rather than focusing on specific technology, we cover the fundamentals that allow your understanding of technology to grow with future developments. You will also gain a better appreciation of the cost/performance trade-offs encountered in designing a computer system.
Prerequisites: Computer Science 211 and 221

Mount Holyoke College Course Information Archive 2000-2016
In decentralized systems, users often solve large problems by spreading effort over groups of computers. Problems involving information, computation, and hardware distributed at various locations must be solved. A distributed system of computers may not share a common memory or a clock. Therefore, efforts to work together require explicit communication and synchronization mechanisms. We will look at issues of problem solving with multiple processors, distributing workload, and providing access to shared resources such as I/O and storage devices and file systems, centralized and distributed methods for control of parallel activities and for detection, and resolution of conflicts.

**(Spring) Introduction to Computer Vision and Robotics**

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

An introduction to theories that suggest how to provide a computer with the ability to "see" and how to use that ability to control the actions of a robot. The potential role that robot actions can play in making computer vision possible is also discussed. Specific topics include: the physics of vision, image processing, pattern recognition, image understanding, representations, planning, robot control, architectures, and applications. *This course is programming intensive.*

**Prerequisites:** Computer Science 334 and Mathematics 202

**Notes:** 2 meetings (75 minutes)

**Instructors:** C. Fennema

**(Spring) Intelligent Information Retrieval - *Not offered this year/term**

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Introduces the basic concepts, methodologies, and research findings in information retrieval. Special topics include Web searching, cross-language retrieval (query in one language, retrieve documents written in many languages), data mining (automatically identifying hidden relationships from large amounts of information), and data extraction (identifying prespecified types of information).

**Prerequisites:** Computer Science 211 and 221 or permission of instructor; 2 meetings (75 minutes)

**Instructors:** L. Ballesteros

**Expected enrollment:** 20

**COMSC-341-01 - Computer Science - 2004-2005**

**(Fall) Topics: Databases**

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course is an introduction to the design and use of database systems - systems that can manage very large amounts of data. The objective is to present concepts for modeling, designing, querying and managing databases. There are two important approaches to organizing and querying (asking questions about) data. The "relational model", which uses a two-dimensional table (relation) as its primary structure and underlies most major commercial database systems and the "semistructured model," which uses trees as its fundamental structure and is popular for web usage. We will cover both these models, SQL for relational databases and XML for structuring data as trees.

Prerequisites: jr, sr, Computer Science 311, 324, and 322, permission of instructor; a 300-level course in your area of interest is recommended

Notes: 2 meetings (75 minutes)

Instructors: D. Strahman

Expected enrollment: 20

COMSC-341-02 - Computer Science - 2004-2005
(Fall) Topics: Natural Languages
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Natural Languages
An introduction to the research issues and approaches to enabling computers to "understand" Natural Languages, namely the languages we speak and write. Topics include: lexical structure, syntax, semantics, ambiguity, parsing, conceptual representations, scripts and plans, neural network approaches, dialog, and the relationship between language and perception.
Prerequisites: CS-311 and either CS-334, CS-336, or Per I
Notes: 2 meetings (75 minutes)
Instructors: C. Fennema

Expected enrollment: 20

COMSC-341-02 - Computer Science - 2004-2005
(Spring) Topics: Networked Systems and Applications
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Networked Systems and Applications
The goal of this course is to investigate the challenges and tradeoffs associated with building network-based applications. We will investigate the design and implementation of applications which employ a variety of architectural models including the Web, peer-to-peer, and pervasive computing. Specific applications may include search engines, file sharing, and environmental sensing. Students will be expected to use some of the latest technology to implement many of the principles discussed. This course is programming intensive.
Prerequisites: Computer Science 211 and 221 or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: S. Rollins

Expected enrollment: 20

COMSC-341-03 - Computer Science - 2004-2005
(Spring) Topics: Research Philosophy and Methodology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Research Philosophy and Methodology
Intended for students planning honors projects, this course will address the issues involved in the research enterprise including problem selection, experimentation, presentation, and writing. Students will read technical papers, present and critique ideas in class, write programs that help explore ideas, write a 25- to 30-page paper, and complete a defendable honors proposal.
Prerequisites: jr, sr, Computer Science 311, 324, and 322, permission of instructor; a 300-level course in your area of interest is recommended
Notes: 2 meetings (75 minutes)
Instructors: C. Fennema, D. Strahman

(Spring) Topics: To Be Determined
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
To Be Determined
To keep students informed about current developments and topics not covered by the regularly scheduled courses, the department frequently offers special "topics" seminars.
Prerequisites: jr, sr, Computer Science 311, 324, and 322, permission of instructor; a 300-level course in your area of interest is recommended
Notes: 2 meetings (75 minutes)
Instructors: The department
COMSC-390-01 - Computer Science - 2004-2005
(Spring) Research Methods
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Intended for students planning honors projects, this course will address the issues involved in conducting research including problem selection, exploration, forming a hypothesis, experimentation, presentation, and writing. Students will read technical papers, present and critique ideas in class, write a 25- to 30-page paper, and complete a defendable honors proposal. There may be programming exercises to illustrate techniques under discussion but this is not programming intensive.
Prerequisites: jr, Computer Science 311, Computer Science 324, and Computer Science 322 or per I; a 300-level course of your own interest is recommended
Notes: 2 meetings (75 minutes)
Instructors: C. Fennema, D. Strahman
Expected enrollment: 20

Instructors: S. Ahmed

CST-250-01 - Critical Social Thought - 2004-2005
(Fall) Introduction to Nineteenth-Century Critical Social Thought
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
An introduction to some of the great critical voices of the nineteenth century. We will explore the ideas of such mutinous thinkers as Karl Marx, Friedrich Nietzsche, Sigmund Freud, and Fyodor Dostoyevsky, focusing on the style as well as the substance of their works and the circumstances that provoked them to write and/or that their writings helped provoke. The course will highlight the tension between appearance and reality, the dialectic of domination and subordination, and the place of reason and irrationality in social life.
Prerequisites: sophomores, juniors, First-years and seniors, need permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: J. Cocks
Expected enrollment: 25

CST-251-01 - Critical Social Thought - 2004-2005
(Spring) Introduction to Twentieth-Century Critical Social Theory - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking-intensive; German Studies 231s (02))
An introduction to thinkers who broke with prevailing social theories to critically address the crises and upheavals of the twentieth century. We will examine the ideas of, for example, Frantz Fanon, Walter Benjamin, Hannah Arendt, Michel Foucault, and Edward Said. We also will probe the connections between theory and practice by relating those ideas to case studies of contemporary issues. Students of German studies may focus primarily on German thinkers. This course will be conducted in English.
Prerequisites: Critical Social Thought 250 strongly encouraged
Notes: 1 meeting (2 1/2 hours)

Instructors: K. Remmler
Expected enrollment: 25

CST-252-01 - Critical Social Thought - 2004-2005
(Spring) Introduction to Twentieth-Century Literature and Politics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
What did it mean to think critically in the twentieth century and to express that criticism through fiction? What were the specific challenges of that turbulent and brutal century, which saw so many revolutions and wars but also immense progress in human rights and social fairness? What did rebellious novelists such as Franz Kafka, Albert Camus, Gabriel Garcia Marquez, Richard Wright, Iris Murdoch, and Umberto Eco perceive as their cause? Did they have a cause? What were their solutions to the ills of humankind?
Prerequisites: Critical Social Thought 250 strongly encouraged
Notes: 2 meetings (75 minutes)
Instructors: C. Pleshakov
Expected enrollment: 25

CST-253-01 - Critical Social Thought - 2004-2005
(Spring) Introduction to Twentieth-Century Critical Race Theory
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(AFAM 208)
This course examines the discursive relationship between race and law in contemporary U.S. society. Readings examine the ways in which racial bodies are constituted in the cultural and political economy of American society. The main objective is to explore the rules and social practices that govern the relationship of race to gender, nationality, sexuality, and class in U.S. courts and other cultural institutions. Thinkers covered include W.E.B. DuBois, Kimberle Crenshaw, Derrick Bell, Richard Delgado, among others.
Notes: 2 meetings (75 minutes)

CST-350-01 - Critical Social Thought - 2004-2005
(Fall) Seminar in Critical Social Thought
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
A seminar for seniors in which both participating faculty and students present their independent research, respond critically to one another's work, and lead discussions on relevant secondary readings. Every student will be expected to produce a substantial essay on a question in the broad field of social thought by the end of the semester. Students will be encouraged to cultivate agility in speaking, arguing, and writing.
Prerequisites: CST seniors
Notes: 1 meeting (3 hours); seniors who intend to write a thesis must take 4 credits of Critical Social Thought 395 in the fall, in addition to this course
Instructors: G. Goodyear
Expected enrollment: 10

DANCE-011-01 - Dance - 2004-2005
(Fall) *AC TH/DA Language of Movement - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
An introduction to movement as a language. In studio sessions students will explore and expand their individual movement vocabularies by working improvisationally with weight, posture, gesture, patterns, rhythm, space, and relationship of body parts. We will ask what these vocabularies might communicate about emotion, thought, physical structures, cultural/social traditions, and aesthetic preferences. In addition we will observe movement practices in everyday situations and in formal performance events and use these observations as inspiration for individual and group compositions. Selected readings and viewing of video and live performance.
Notes: 1 class/studio meetings (2 hours) and a production workshop (2 hours); offered at Amherst College
Instructors: W. Woodson
Expected enrollment: 20

DANCE-054-01 - Dance - 2004-2005
(Spring) *AC TH/DA Performance and Video - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
We will explore the connections between choreography/performance and video/film. The emphasis will be experimental—to learn by doing. We will work with cinematographic and choreographic terms and languages to discover similarities and differences. Encouraging reciprocity and dialogue between choreography and video/film will be the principle spirit that animates the course. Studio practice with choreography and the camera (primarily video hi 8), class discussions, viewing of videos and films, basic editing techniques, and assigned readings.
Prerequisites: permission of instructor; previous experience in choreography, directing, or video/film useful but not required

DANCE-104-01 - Dance - 2004-2005
(Spring) Ballet Conditioning
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Ballet conditioning is a course that studies useful exercises to strengthen the muscles and improves the bodily alignment of the beginning to advanced ballet student. It will focus on creating a conditioning routine that is suited for students interested in improving their ballet technique. The goal of the course is to help students become kinesthetically aware of how to improve their dancing within their own bodies. Assignments will include readings and a final paper.
Notes: 2 meetings, 90 minutes.
Instructors: FLACHS
Expected enrollment: 20

(January) Pilates - *Not offered this year/term
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
Pilates provides a safe and energetic workout for all ages and physical conditions. It is a full-body exercise that encourages muscular strength, balance, skeletal alignment, coordination, and flexibility. Groups are tailored to individual needs. Evaluation will depend on attendance, commitment and retention of the material.
Notes: MTW 9-11:00 am January 5 - January 21st.
Instructors: K. Martin
Expected enrollment: 40

DANCE-113-01 - Dance - 2004-2005
(Fall) Modern I
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
An introduction to the basic principles of dance movement: body alignment, coordination, strength and flexibility, basic forms of locomotion. No previous dance experience required.
Notes: 2 meetings (90 minutes)
Expected enrollment: 30

DANCE-114-01 - Dance - 2004-2005
(Fall) Modern II - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Advanced beginning modern technique. The course will concentrate on aspects of strength, flexibility, and anatomical integration in order to improve technical skills. Improvisation as well as various body therapies will be included in the class format.

Notes: 2 meetings (90 minutes)

(Spring) Cultural Dance Forms: Classical Indian Dance
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Asian Studies 142J (06))
This course is an introduction to the basic patterns of formal Indian classical dance movement that include gestures and facial expression in expressive and mimetic interpretations through poetry, music compositions and rhythmic structures. A study of Mudras (hand gestures) will include practice and memorizing an established vocabulary of gestures from a 9th century classical dance text. Using these gestures we will explore their application within a traditional/contemporary framework of movement, poetry and spoken ideas. Readings and videos will be assigned to augment class work for historical, religious and cultural understanding of dance in India.

DANCE-377-01 - Dance - 2004-2005
(Fall) Advanced Studies: Balanchine 100
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Commemorating the centennial of his birth, this seminar pays tribute to the aesthetic vitality of George Balanchine, the foremost classical choreographer of the twentieth century. In our time, Balanchine (1904-1983) transformed the classic dance from its nineteenth-century codification into a steadily evolving language capable of expressing the most subtle yet profound of human emotions. We will identify the major themes in Balanchine's works, some of which include Diaghilev, Waltzes, Tchelichew and Surreality, Tchaikovsky, Americana, Narratives, Abstraction, Stravinsky and Apotheosis. Each week we will view, discuss, and analyze at least one major work within the theme.

Prerequisites: dance history class.

Notes: Highly recommended for students interested in music, dance, and choreography. 1 meeting (3 hours)

ECON-105-01 - Economics - 2004-2005
(Spring) Financial Accounting
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): The Department of Economics does not offer a business major. However, we do offer an accounting course that will be of interest to students interested in business. The accounting course does not serve as an introduction to economics or as a part of the major. The course, while using traditional accounting techniques and methodology, will focus on the needs of external users of financial information. The emphasis is on learning how to read, interpret, and analyze financial information as a tool to guide investment decisions. Concepts rather than procedures are stressed and class time will be largely devoted to problem solutions and case discussions. A basic knowledge of arithmetic (+, -, *, /) and a familiarity with a spreadsheet program is suggested. See <a href="http://www.mtholyoke.edu/courses/eljohnso">http://www.mtholyoke.edu/courses/eljohnso</a>.
Prerequisites: Not open to first-year students
Notes: 2 meetings (75 minutes)
Instructors: C. Johnson

ECON-201-01 - Economics - 2004-2005
(Spring) Game Theory
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Complex Organizations 201f)
Preamble (for topics courses): This 200-level course investigates a particular topic in economics at some depth without presupposing prior knowledge of economics. Many students may find this course a useful complement to a major or minor other than economics. The course will illustrate and analyze the strategies used in making interrelated decisions. Concepts from game theory will be developed using examples and cases drawn from economics, business, politics, and even sports. Applications will include the Prisoner's Dilemma and related games, signaling, bargaining, voting and power, brinkmanship, and nuclear deterrence.
Prerequisites: Not open to first-year students as their first course in economics
Notes: 2 meetings (75 minutes)
Instructors: M. Robinson

(Spring) Comparative Economic Performance of the G-7
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking- and writing-intensive)
This course will look at employment, income equality, productivity, and real wages as measures to judge economic performance in the G-7 (Canada, France, Germany, Italy, Japan, U.K., U.S.). In our attempts to explain differences among these countries, we will focus primarily (but not exclusively) on labor relations and their institutional structure. The course will emphasize policy analysis: What can be done to improve economic performance?
Prerequisites: jr, sr, Economics 211, 212, 220; 320 recommended; permission of instructor required
Notes: 1 meeting (3 hours)
Instructors: J. Christiansen

ECON-349-01 - Economics - 2004-2005
(Fall) Advanced Topics in Economics: Economics of Taxation and Federal Budget Deficits
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
What are the economic fundamentals of taxes and budget deficits? We first explore the reasons for and the consequences of taxes. Are they inevitable? Are they fair? How may they affect efficiency, employment, and economic growth? What are the issues in current debates over U.S. income, payroll, and estate taxes? Next, we turn to an analysis of the size and sources of current and projected federal budget deficits. Do these matter? What difference would it make if they were reduced by cutting federal spending or, alternatively, by raising taxes? Finally, is there a crisis in the social security system? If so, what is its nature? How is it linked to the size and shape of the federal budget?
Prerequisites: Economics 211, 212
Notes: 1 meeting (2 1/2 hours)
Instructors: S. Montgomery

ECON-349-01 - Economics - 2004-2005

ENGL-101-01 - English - 2004-2005
Preamble (for topics courses): (Writing-intensive courses) Though sections of English 101 differ in specific content, all develop the skills of careful reading and effective writing essential to the liberal arts and sciences. Students will write frequently and have an opportunity to revise their work. By active participation in class discussion, students will develop their speaking skills and learn to ask critical questions, formulate answers, and frame persuasive arguments. English 101 is offered in both semesters. Students who do not take the course in the fall should consider enrolling in the spring. Like other first-year seminars, English 101 is intended primarily for students at the start of their college career. Only first-year students may preregister for the course. If space is available, some more advanced students may also register.

An introduction to some topics in African studies, reading and writing about some contemporary authors as Ama Ata Aidoo, Tsitsi Dangarembga, Bessie Head, Ayi Kwei Armah, Nuruddin Farah. Studying both fiction and essays, the course focuses on recent political situations (Ghana, Congo, South Africa), on images of women, and on representations of Africa in news media and in cinema, both from Africa and the West. This seminar will be taught in coordination with History 140, Identity and Community in Early Africa.

Notes: 2 meetings (75 minutes); Only first-year students may preregister for this course. Sophomore, juniors and seniors may inquire if there is space available during the first two weeks of class.

Instructors: J. Lemly

Expected enrollment: 16

Preamble (for topics courses): (Writing-intensive courses) Though sections of English 101 differ in specific content, all develop the skills of careful reading and effective writing essential to the liberal arts and sciences. Students will write frequently and have an opportunity to revise their work. By active participation in class discussion, students will develop their speaking skills and learn to ask critical questions, formulate answers, and frame persuasive arguments. English 101 is offered in both semesters. Students who do not take the course in the fall should consider enrolling in the spring. Like other first-year seminars, English 101 is intended primarily for students at the start of their college career. Only first-year students may preregister for the course. If space is available, some more advanced students may register.

Some coming-of-age tales are about separation from a group, and thus about becoming a distinct individual; the "group" can be a family, peers, a gang, a religion, etc. By contrast, many other coming-of-age stories and traditions are at heart about taking one's place in a group—becoming a member of a tribe or clan, joining the army or the fight for a cause one believes in, starting a new family, etc. Why both? How do we reconcile these two? How do the form and process of storytelling portray part of the rite of coming-of-age? Readings will include drama, poetry, fiction, and memoirs. Authors will include James Joyce, Delfina Cuero, Tomas Rivera, Dorothy Allison, and Michael Dorris.

This seminar will cover women's writing from two perspectives, autobiography and memoir. The former is a personal record of the writer's life, the latter an attempt to categorize events and clarify the meaning of life. Women's lives, particularly those of color, have been and continue to be the subject of much redefinition and reordering, both in the personal and public worlds. The readings for this seminar will be selected from such women's works as those of Anna Letitia Barbauld, Stephen Vincent Benet, Muriel Spark, and Jamaica Kincaid, as well as some important women's autobiographical and memoir works.

Does autobiography describe, create, or deconstruct an identity? If any story we choose to tell must in some way be a story—details omitted, memory unreliable, our own eyes used, our perspective imposed—what makes one text a "real" life story while another is fiction? We will study theories of what makes a text an autobiography. We will question traditions of coherent representation. You will learn to read some tough theory critically. Our primary works will be 20th-Century literary autobiographies by American women, complemented by some art and film. Along with analytical writing, you will do your own creative autobiographical work to understand the risks and choices involved.

We begin with a reading of Woolf's *A Room of One's Own* and a consideration of Mount Holyoke as such a "room" as an introduction to thinking about some of the ways in which women have been traditionally represented (or not represented) in Western culture. After working with a variety of short fictions by men as well as women, we will focus on one particularly notable literary representation of women, Edith Wharton's *House of Mirth* (both the novel and the recent film). Through John Berger's *Ways of Seeing* we will extend our discussion to the tradition of oil painting, contemporary advertising, and the media. Writing intensive; brief weekly exercises; research paper.

Love and sex appear to be private matters, but who marries whom now prompts public debates. How love, sexuality, and marriage are construed and represented offers insights into how cultures understand themselves and circulate power. This seminar juxtaposes work from around 1600, Shakespeare's comedies of love and marriage, and the 1930s, classic Hollywood movies with similar themes. Plays such as *A Midsummer Night's Dream*, *Much Ado about Nothing*, and *As You Like It*; movies such as *It Happened One Night*, *Bringing Up Baby*, and *His Girl Friday*, plus contemporary criticism and a field trip to the mall for a current movie.

ENGL-220-01 - English - 2004-2005
(Spring) Enlightenment and Modernity
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Critical Social Thought 249)
The eighteenth century laid the foundations of modernity: e.g., the market, the nation-state, global trade, and empire. The Enlightenment's authors--Rousseau, Diderot, Kant, Goethe, Adam Smith, and Wollstonecraft--not only documented the rise of modernity, but also criticized it fundamentally for re-creating in more sophisticated forms the inequality and dehumanization it was supposed to overcome. Twentieth-century intellectuals have been in a constant dialogue with the Enlightenment, not only to criticize it but also to understand how it criticizes us. Following those intellectuals, this course will attempt to recover the Enlightenment's revolutionary energy.
Prerequisites: soph or permission of instructor
Notes: 2 meetings (75 minutes); satisfies English department 1700-1900 requirement

(Spring) Modern Irish Literature - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Women's Studies 203s (01))
This survey course will introduce students to literature of modern Ireland beginning with Swift and ending with writers of the Irish literary revival and Irish modernists. The syllabus will also focus on Irish women writers and their literary interventions concerning colonial history, nationalism, and Unionism. We will pay particular attention to representations of ideas of Irishness through the categories of religion, race, gender, and culture. The course encourages students to think about how the genres, styles, and forms of Irish writing are determined by the experience of colonial trauma and the imperative to imagine national identity.

(Fall) African American Diasporas: Literature and Culture
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Speaking- and writing-intensive)
This course introduces students to the concept and the writings of the "African diaspora," a multi-aceted community created by the Atlantic slave trade between Africa, the Americas and Europe. We trace the development of a diasporic sensibility in African American literature and the creation of new "African American" identities and forms of expression by Caribbean, Latin American, and European writers of African descent. Using both literary and historical modes of interpretation, this course asks, how have black writers chosen to tell a global story of the race?
Prerequisites: soph, second-semester fy
Notes: 2 meetings (75 minutes) This semester, the course will be offered jointly with Hampshire College and cotaught by Professors M. Stephens and A. Jordan.
Instructors: M. Stephens

ENGL-270-01 - English - 2004-2005
(Spring) Women Writers: Nineteenth-Century American Women Writers - *Not offered this year/term
In this cross-cultural examination of nineteenth-century American women writers, we will compare a number of works of fiction, prose, poetry, and autobiography. We will discuss how writers created sophisticated and insightful critiques of American culture and imagined or re-presented new American identities and histories. We will also consider tensions between "sentimental" idealism and political pragmatism, restrictive domesticity and dangerous autonomy, and passionless femininity and expressed sexuality. Authors may include Alcott, Child, Far, Fuller, Harper, Hopkins, Ruiz de Burton Wilson, and Winnemucca.

Prerequisites: soph or permission of the instructor
Notes: 2 meetings (75 minutes); satisfies English department 1700-1900 requirement
Instructors: L. Brown

(Fall) Introduction to Asian American Literature: A History of Asian America in Novels and Prose
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

What are the historical experiences of Asian Americans and how have these experiences shaped their identities? How might we understand Asian Americans as a "race" through their literature and prose? This course is a survey of literary texts from the past to the present by various Asian Americans (Chinese, Japanese, Filipino, and Korean). We will examine novels and prose narratives in the context of important moments in Asian American history: the emergence of Chinatowns, Japanese American internment, U.S. colonialism of the Philippines, and Korean immigration to America. Authors may include Sui Sin Far, Louis Chu, John Okada, Carlos Bulosan, Jessica Hagedorn, and Nora Okja-Keller.

ENGL-280-01 - English - 2004-2005
(Spring) Literary Criticism and Theory
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course is designed to offer students a broad historical overview of literary theory as well as exposure to contemporary debates about "theory" and literary representation. The course is both an exercise in practical criticism and a survey of the Western critical tradition from Plato to Derrida. Beginning with the question of why Plato wished to ban poets from his ideal Republic, the course will go on to consider such topics as the Classic vs. Romantic theories of the imagination, the "invention" of psychology and the necessary difficulty of much modern literature, the relation of gender and ethnicity to literary expression, and the uncertainties of literary interpretation.

Prerequisites: soph, jr, sr or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: W. Quillian

ENGL-282-01 - English - 2004-2005
(Spring) Reading and Writing About Poetry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

An introduction to reading poetry, focusing on its formal varieties and on developing a vocabulary for discussing them. What distinguishes rhythm from meter, or tone from voice? And how does the poet - or the student - write prose about poetry? All periods of poetry, but an emphasis on such twentieth-century poet-critics as Eliot, Auden, Jarrell, and Wilbur. Recommended as a background for other courses in the department that feature poetry.

Prerequisites: 8 credits in department

ENGL-306-01 - English - 2004-2005
(Fall) Introduction to Old English
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Old English is the language spoken in England between the years 600 and 1200. In this course, you will learn it. As we delight in the mysteries of class VII verbs and weak inflections, we will also translate poems (including Dream of the Rood and The Battle of Maldon). Our chief interest will be poetry in its immediate material and social context: manuscripts, monasteries, courts, landscapes, and reading communities. We will consider epics, elegies, riddles, saints' lives, sermons, chronicles, textbooks, laws, and charters. There will be a midterm and a final paper.
Prerequisites: jr, sr, English 200, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: S. Harris

ENGL-308-01 - English - 2004-2005
(Spring) Methods of Discovery: Nonfiction and Fiction
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)
This course will look at the nonfiction and fiction of several celebrated writers. Specific attention will be paid to how writers deal with the same material in these different forms. Authors under consideration include James Baldwin, J.M. Coetzee, Maxine Hong Kingston. Through these readings and through frequent exercises, we will explore nonfiction and fiction as different methods of discovery. Students will produce both nonfiction and fiction. Extensive reading and writing required.

Prerequisites: 8 credits in department or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: S. Grant
Expected enrollment: 12

(Fall) The English Novel in the Nineteenth Century: Gender and Class in the Victorian Novel - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course will investigate how representations of gender and class serve as a structuring principle in the development of the genre of the Victorian novel in Britain. We will devote significant attention to the construction of Victorian femininity and masculinity in relation to class identity, marriage as a sexual contract, and the gendering of labor. The texts chosen for this course also reveal how gender and class are constructed in relation to other axes of identity in the period, such as race, sexuality, and national character. Novelists will include Dickens, Eliot, Gaskell, C. Bronte, and Hardy.
Supplementary readings in literary criticism and theory.
Prerequisites: jr, sr, 8 credits in department including English 220, 230, or permission of instructor
Notes: 2 meetings (75 minutes); satisfies English department 1700-1900 requirement

ENGL-337-01 - English - 2004-2005
(Fall) The Political Imagination: The United States and South Africa
(American Studies 301(01))

This course examines how artists engage political ideas and social realities in their work. By setting various U.S. authors from the 1930s to the present in dialogue with contemporary South African writers responding to apartheid and post-apartheid South African society, the course explores how the creative imagination transforms—and is transformed by—the pressure of history itself. Authors to be studied include Wright, Didion, Morrison, Doctorow, Silko, Gordimer, Coetzee, Fugard, Mda. Among the key topics will be the relation between artistic freedom and political ideology and the continuing response by South African artists to the Truth and Reconciliation Commission.

Prerequisites: jr, sr, 8 credits at the 300 level in English, history, politics, or related fields

Notes: 1 meeting (3 hours)

Instructors: D. Weber

ENGL-339-01 - English - 2004-2005
(Spring) Race, Romance, and Reform: Nineteenth-Century African American Women's Literature - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

This course will consider the literary efforts and accomplishments of nineteenth-century African American women writers. We will consider the representations of ante- and postbellum communities; conceptions of womanhood, masculinity, femininity, and sexuality; and discussions of social, political, and racial reform. Works will include novels, poems, slave narratives, autobiographies, travel narratives, essays, speeches, and additional readings in literary criticism. Writers may include Harriet Jacobs, Sojourner Truth, Nancy Prince, Ida B. Wells, Emma Dunham Kelley, Pauline Hopkins, and Frances Harper.

Prerequisites: jr, sr, 8 credits in department beyond English 101 including English 240, 241, or 250, or permission of instructor

Notes: 1 meeting (3 hours)

Instructors: L. Brown

Expected enrollment: 17

ENGL-341-01 - English - 2004-2005
(Fall) American Literature III

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course explores the range and variety of American literary expression from the 1920s through the early 1940s. We will locate the works in social history and in literary history, as modernity and modernism co-created new language and projects for American writers. We will ask, what historical moment was the author participating in and is the text some kind of intervention or comment upon that moment? Authors include Anzia Yezierska, John Dos Passos, Zelda and F. Scott Fitzgerald, William Faulkner, Nella Larsen, Zora Neale Hurston, D'Arey McNickle, Clifford Odets, Robert Frost, Langston Hughes, Marianne Moore.

Prerequisites: 8 credits in English beyond 101 or per instructor

Notes: 2 meetings (75 minutes)

Instructors: S. Davis
ENGL-342-01 - English - 2004-2005
(Spring) The American Novel - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course explores the way narrative forms both deploy and challenge social discourses of race and gender to create contested visions of American national identity. Readings may include nineteenth- and twentieth-century novels by Chopin, Faulkner, Harper, Hurston, James, Melville, Morrison, Stowe, and Twain and works of theory and criticism.
Prerequisites: jr, sr, 8 credits in department beyond English 101, including English 240, 241, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: E. Young

ENGL-345-01 - English - 2004-2005
(Fall) Studies in American Literature: Henry James into Film - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(American Studies 301f)
This seminar will examine the various screen adaptations of assorted novels by Henry James. We will read the novels against the films, exploring how James's texts translate--or do not translate--into film. Novels and films to be studied include Washington Square, The Europeans, Portrait of a Lady, The Turn of the Screw, and Wings of the Dove.
Prerequisites: jr, sr, 8 credits in department beyond English 101, 4 credits in film studies, or permission of the instructor
Notes: 1 meeting (3 hours); satisfies English department 1700-1900 requirement
Instructors: D. Weber
Expected enrollment: 15

ENGL-345-01 - English - 2004-2005
(Spring) Studies in American Literature: Faulkner and Modern Southern Writing
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive)
Studies of works, principally novels and short stories, by Southern writers from the 1930s on. Main emphasis is on Faulkner; others to be read may include Porter, Tate, Welty, O'Connor, Percy. We will end by reading Frazier's recently filmed novel Cold Mountain.
Prerequisites: jr, sr, 8 credits in department beyond 101, including one of 240, 241, 243
Notes: 1 meeting (3 hours)
Instructors: R. Shaw
Expected enrollment: 12

ENGL-348-01 - English - 2004-2005
(Spring) Prison Writing
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)
In this course we will look at media and legal representations of prisoners and especially at the writing of prisoners themselves. Authors include Barbara Harlow, Jennifer Gonnerman, Mumia Abu-Jamal, George Jackson, and Salwa Bakr. Movies may include Dead Man Walking and Aileen Wuornos: The Selling of a Serial Killer. Some are castigated as rule breakers; structures are built for them, and in these realms men and women are cordoned off, envisioned and held separately in their transgressions—what stories emerge from the prisoners' mouths? Do those stories challenge the deep architecture of the prisons themselves?
Prerequisites: jr, sr, 8 credits in department
Notes: 2 meetings (75 minutes)
Instructors: S. Davis

ENGL-349-01 - English - 2004-2005
(Fall) Globalization and Culture
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
If globalization transforms the nation-state, how must we re-imagine the national study of literature? This class will probe the hidden forces behind the spectacular global conflicts exploding around us and attempt to recover them between the lines of the text. In the process, it will consider a series of questions: What does globalization mean? How does it relate to European imperialisms and American neo-colonialism? How do anti-globalization movements--environmental, religious, literary, and cinematic--offer alternatives? Theory from the social sciences and the humanities (Wallerstein, Sassen, Jameson); fiction and film from Europe and its former colonies (Rushdie, Roy, Fellini).
Prerequisites: jr, sr or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: S. Ahmed
Expected enrollment: 15
ENGL-350-01 - English - 2004-2005
(Spring) Studies in African American Literature: Slavery and the Literary Imagination - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Speaking- and writing-intensive; American Studies 301s)
In this course we will study American works that focus on American slavery. How do authors contend with historical fact and literary conventions as they re-present the experiences of slaves, owners, fugitives, abolitionists, and free people of color? Does a writer’s race or historical context influence his or her portrayal of slavery? How do conventions of the slave narrative and sentimental novel affect the representation of slavery and freedom? Authors may include Charles Chesnutt, Frederick Douglass, Jeffrey Lent, Lorenz Cary, Harriet Becher Stowe, and Sherley Anne Williams.
Prerequisites: jr, sr, 8 credits in department beyond English 101, including at least one of the following: English 240, 241, 250, or permission of instructor
Notes: 1 meeting (3 hours); satisfies English department 1700-1900 requirement; satisfies English department seminar requirement
Instructors: L. Brown
Expected enrollment: 15

ENGL-356-01 - English - 2004-2005
(Spring) Contemporary Black Poetry
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
In this course, we will read texts by selected contemporary black poets. The course will be driven by a close examination of how formal experimentation in black poetry has evolved over the last two decades, and of how some writers are redefining the boundaries of African American poetry by asserting the significance of neglected literary predecessors. Readings will include poetry and critical essays by Harryette Mullen, Renee Gladman, Kevin Young, Mark McMorris, and others.
Prerequisites: jr, sr, or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: N. Nurhussein

ENGL-359-01 - English - 2004-2005
(Spring) The Victorian Novel: "Because It's There"
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Study of some central novels of the period, with emphasis on their various ways of engaging the massive social, political, religious, aesthetic, early feminist, imperial conflicts and questions of the time, and of transforming these issues into art still worth reading. Emily Bronte, Wuthering Heights; Elizabeth Gaskell, Mary Barton; Charles Dickens, Hard Times and Bleak House; George Eliot, Middlemarsh; Thomas Hardy, Tess of the D'Urbervilles; Joseph Conrad, Heart of Darkness. Supplementary readings in critical theory, and novels by Charlotte Bronte, Thackeray, Wilde, Stoker.
Prerequisites: jr, sr, 8 credits in department beyond 200, including 220 and/or 230, or permission of instructor
Notes: 2 meetings (75 minutes); satisfies English department 1700-1900 requirement
Instructors: V. Ellis

ENGL-360-01 - English - 2004-2005
(Spring) Readings in Contemporary Fiction: The Neo-Victorian Novel
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A study of post-World War II fiction focusing on the neo-Victorian novel. Beginning with John Fowles’ The French Lieutenant’s Woman, the course will examine ways in which late twentieth-century novelists explore the conventions and subjects of Victorian fiction. In addition to Fowles, the course will explore works by such writers as Graham Swift, A.S. Byatt, Peter Carey, Sarah Waters, and Jasper Fforde. Students electing this course should have done previous work in Victorian literature in such courses as English 230, 321, or 323. Students should also have read Great Expectations and Jane Eyre, two archetypal works of Victorian fiction.
Prerequisites: jr, sr, 8 credits in department beyond English 200 or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: W. Quillian
Expected enrollment: 20

(Spring) Post-World War II Poetry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)
A study of poetry written in English from World War II to the present. Poets representing a variety of countries and cultural traditions will be read. A typical list may include: American poets such as Bishop, Berryman, Brooks, Clappart, Dove, Merrill, Plath, and Wilbur; poets from England, Ireland, Northern Ireland, Canada, the Caribbean, and Australia, such as Fenton, Harrison, Heaney, Hope, Ted Hughes, Muldoon, Murray, and Walcott.
Prerequisites: jr, sr, 8 credits in department beyond English 101 or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: M. Salter
ENGL-363-01 - English - 2004-2005
(Spring) Postcolonial Studies: Alienation and Creativity after Global Capital
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
In its attempt to gain monopolistic control of the spheres of economics, politics, and culture, capital turns people into its instruments. In response, postcolonial works continually ask, what must people recover if they are to regain a full sense of their humanity? This class will explore a series of increasingly anarchic responses: the means of production; the pleasure of destruction; forms of consciousness so primitive that they have left only traces on our memory; and the right to desire and produce without regard to any organizing principle. Marxism, psychoanalysis, fiction, and film from Europe, Africa, the Arab World, and South Asia.
Prerequisites: jr, sr, 8 credits in department beyond 200 or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: S. Ahmed
Expected enrollment: 15

ENGL-365-01 - English - 2004-2005
(Spring) In and Around Tom Stoppard
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
An intensive study of the playwright considered by many to be the greatest living dramatist in English. As Stoppard's plays often incorporate responses to other writers, we will include readings in Shakespeare, Oscar Wilde, A.E. Housman, etc. Plays by Stoppard will include, among others, "Rosencrantz and Guildenstern Are Dead," "Travesties," "The Real Thing," "Arcadia," "The Invention of Love," and his recent trilogy, "The Coast of Utopia."
Prerequisites: jr, sr, 8 credits in department beyond 101
Notes: 1 meeting (3 hours)
Instructors: M. Salter
Expected enrollment: 15

ENGL-369-01 - English - 2004-2005
(Spring) Women Writing Diaspora: A Cross-Cultural Comparison
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Speaking- and writing-intensive)
A very broad cross-section of authors today use the term "diaspora" to describe their sense of community. This seminar will explore how women are situated, and situate themselves, within this discourse. How has the "woman of color" become the very figure for diaspora? To explore this question we will focus on the literature and poetry of Afro-Caribbean, African American, South Asian, and Asian American writers.
Prerequisites: jr, sr, 8 credits in department beyond English 101 or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: M. Stephens
Expected enrollment: 18

ENGL-370-01 - English - 2004-2005
(Spring) The Caribbean in American Culture
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(American Studies 301 (01) )
This seminar uses the interdisciplinary methods of American studies to explore the role migrants from the English-speaking Caribbean have played in the United States. We will examine Caribbeans' images of themselves in literature and popular culture to understand the various ways they have (re)defined what it means to be "American" and "African American" in the twentieth century. A major theme will be the intersections of race, ethnicity, gender, and sexuality in Caribbean American identity. North American perceptions and constructions of the Caribbean will also be central. Readings include Lorde, Hughes, Hurston, Marshall, and Cliff.
Prerequisites: jr, sr, 8 credits in department beyond English 101 or permission of instructor
Notes: 1 meeting (3 hours), plus screenings
Instructors: M. Stephens

ENGL-372-01 - English - 2004-2005
(Fall) The Literature of Exile - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Speaking-intensive)
This seminar explores shifting means of exile over the course of the twentieth century. Are exile from home and alienation from society ideal conditions, or states of dread? How has the history of European exploration and colonialism shaped the discourse of exile? What does exile look like today in a transnational age of porous national borders? Some of the themes we will consider are: questions of belonging, the relationship between internal and external exile, exile as geographic, psychological, aesthetic, and political, and identity formation and exile.
Prerequisites: jr, sr, 8 credits in department beyond English 101 and/or permission of instructor
Notes: 1 meeting (3 hours)
ENGL-373-01 - English - 2004-2005
(Fall) Gender and War
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This seminar will focus on depictions of war in the context of gender. When asked how we might prevent war, Virginia Woolf suggested that we must invent new language and methods rather than follow the path of the traditional "procession of educated men." What language emerges in works about the effects of war? Texts will include essays and films as well as selected works by writers such as Alcott, Whitman, Crane, Twain, Hemingway, Woolf, Silko, Morrison, and O'Brien.
Prerequisites: jr or sr; 8 credits beyond the 100 level in English or women's studies or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: L. Glasser
Expected enrollment: 18

ENGL-374-01 - English - 2004-2005
(Spring) Hitchcock and After
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Film Studies 320s)
This course will examine the films of Alfred Hitchcock and the afterlife of Hitchcock in contemporary U.S. culture. We will interpret Hitchcock films in a variety of theoretical frames, including feminist and queer theories, and in historical contexts including the Cold War. We will also devote substantial attention to the legacy of Hitchcock in remakes, imitations, and parodies. Hitchcock films may include Spellbound, Strangers on a Train, Rear Window, Vertigo, North by Northwest, Psycho, The Man Who Knew Too Much, Marnie, and The Birds; additional works by Brooks, Craven, De Palma, and Sherman. Readings in film and cultural theory; screenings at least weekly.
Prerequisites: jr, sr, at least 4 credits in film studies, and at least 4 credits in English beyond 101, or permission of instructor. Enrollment may be limited.
Notes: 1 meeting (3 hours)
Instructors: E. Young

ENGL-378-01 - English - 2004-2005
(Spring) Studies in American Literature: Movements in Twentieth-Century American Poetry
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This seminar will examine the leading ideas and poetic practice of four literary movements: the Agrarian writers of the American South; the Harlem Renaissance; the Black Mountain poets; the Beat writers. Among the poets we will read are John Crowe Ransom, Sterling Brown, Langston Hughes, Denise Levertov, Charles Olson, and Gary Snyder. We will also give attention to related developments in the visual arts, dance, and music.
Prerequisites: jr, sr, 8 credits in department beyond English 101, or permission of the instructor
Notes: 1 meeting (3 hours); satisfies English department seminar requirement
Instructors: C. Bentey
Expected enrollment: 15

ENGL-381-01 - English - 2004-2005
(Spring) Film, Melodrama, and Horror - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course will analyze two important film genres, melodrama and horror, through the lenses of contemporary theories of gender, race, and sexuality. Topics of particular interest: feminist analyses of gender and genre, racial difference and "whiteness," normative and alternative sexualities, masculinity, identification and spectatorship, and recent revisions of these genres. Directors may include Cronenberg, Dash, DePalma, Hitchcock, O'neurah, Ray, Romero, Sink, Vidor, and Whale.
Prerequisites: course work in film studies or permission of the instructor
Notes: 1 meeting (3 hours) and screenings; enrollment may be limited
Instructors: E. Young

ENGL-383-01 - English - 2004-2005
(Fall) Seminar in Narrative and Critical Theory: James Joyce, D. H. Lawrence, and Virginia Woolf - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Beginning with Joyce's A Portrait of the Artist as a Young Man and Lawrence's Sons and Lovers, we will read these "autobiographical" narratives against the background of their time and each author's own critical pronouncements. We will go on to consider how Lawrence's vision changes in his subsequent novels, The Rainbow and Women in Love. The next four weeks will focus on Joyce's monumental Ulysses and the seminar will conclude with Woolf's Mrs. Dalloway and To the Lighthouse. In addition to working with the critical writings of the authors themselves, students will be asked to do secondary reading in some recent critical theory.
Prerequisites: jr, sr, 8 credits in the department including English 200 or permission of instructor; English 280 highly recommended
ENGL-384-01 - English - 2004-2005

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive; Women's Studies 333s)
This seminar investigates contemporary feminist theory - including but not limited to feminist film theory - in relation to film. We will examine the influential formulations of the cinematic "male gaze" and woman's film, recent theorizations of race and sexuality in cinema, gender complexities in classic and contemporary Hollywood film, and new trends in filmmaking by women. Requirements include extensive readings, weekly essays, and film screenings.
Prerequisites: jr, sr, 8 credits in English and/or women's studies beyond 101, and permission of instructor; Film Studies 201 and/or other background in film strongly recommended
Notes: 1 meeting (3 hours) plus evening screening; satisfies English department seminar requirement; previously offered as English 372
Instructors: E. Young
Expected enrollment: 20

Environmental Studies

ENVST-100-01 - Environmental Studies - 2004-2005
(Fall) Introduction to Environmental Studies
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Community-based learning course)
This course introduces students to the complexity of selected environmental problems, attempts to foster an understanding of their origins, and discusses potential solutions. In addition, it introduces basic ecological principles, economic, political, and cultural concepts, and their importance to understanding and solving environmental problems.
Instructors: T. Millette

(Fall) Fire, Forests, and Fire Management: A First-Year Seminar  *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
First-year seminar (Speaking- and writing-intensive)
Fire, other disturbances, physical setting, weather, and climate shape the structure and function of forests throughout the western U.S. Research has shown that setting, fuels, and weather combine to determine wildfire intensity and severity. As a result of fire exclusion, timber harvesting, and livestock grazing, millions of acres of forest contain a high accumulation of fuels compared to conditions prior to the twentieth century. Class will explore a broad spectrum of fire management issues from readings, films, and computer data. Classes are designed to allow student interaction via discussions based on readings, films, computer explorations, and student presentations.
ENVST-200-01 - Environmental Studies - 2004-2005
(Fall) Environmental Science
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Community-based learning course)
Most of our society's environmental problems are complex and interdisciplinary in nature. Environmental science is a course designed to teach integrative thinking, the "scientific method," and problem solving. Lectures will be drawn from a variety of scientific fields including ecology, hydrology, chemistry, geology, and biology with an emphasis on ecosystems and biogeochemical cycles. The course will use case studies of regional environmental problems, practical hands-on problem solving, and landscape analysis. Training in field and laboratory techniques is an integral part of the course. Priority given to environmental studies majors.
Prerequisites: Environmental Studies 100 or Environmental Geology 101; one course in statistics is recommended
Instructors: J. Bubier
Section Instructors: 01 LAB J Bubier | 02 LAB J Bubier |
Expected enrollment: 24

(Spring) The Biosphere
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Speaking- and writing-intensive; Geol-250)
The biosphere has a pronounced geochemical influence on the Earth; indeed, life has been called the greatest geological force. In this course, we will study the chemistry of life through geologic time and examine its influence on the formation and weathering of rocks, on the composition and temperature of the atmosphere, on the accumulation of gas hydrates and other hydrocarbon resources, and its role in the initiation of naturally occurring, water-mediated nuclear reactors. We will also take a close look at the Biosphere concept of Vladimir Vernadsky, the Gaia hypothesis, and Hypersea theory, and the ways in which these concepts inform our understanding of life's geological impact.

European Studies

EURST-106-01 - European Studies - 2004-2005
(Fall) The World According to Basques
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Speaking- and writing-intensive)
To what extent can "terrorism" be regarded as a myth? What is the difference between "nationalism" and "patriotism"? Should minority languages be accorded "human rights"? This course will study the Basque Country, a "nation without a state" straddling the border of Spain and France on the Atlantic Coast, as a unique laboratory in which several pressing international issues can be reconsidered in surprising new ways. Looking out onto the world from the peaks of the Pyrenees mountains, students will practice critical thinking based on analysis of a diverse array of materials, including films, historical studies, literature, newspaper articles, paintings, and theoretical writings.

EURST-316-01 - European Studies - 2004-2005
(Spring) European Studies Seminar: Europe and the Euro
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
During the past few years, the European Union has adopted the euro as their new currency, welcomed ten new members into its fold, and agreed on a constitution. These historic events will be our starting point for exploring broader questions concerning the future of European diversity and integration. Will the new Europe develop its own identity while sustaining and fostering national and regional identities? What will become of European diversity in political and legal traditions, culture, technology, and other institutions? We will examine and evaluate these issues in their historical, cultural, economic, and political context, both from an internal and an external perspective.
Prerequisites: at least one course at the 200 or 300 level relevant to European studies or permission of the instructor

Film Studies

FLMST-201-01 - Film Studies - 2004-2005
(Fall) Introduction to Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course teaches the basic concepts and critical skills involved in interpreting film. Through lecture, reading, discussion, and screening of films both in and outside of class, the student will become a more informed and sophisticated observer of the cinema. During the first half of the semester, the class will study form and style in narrative film as well as in nonnarrative practices such as avant-garde and documentary filmmaking. For the remainder of the course, the class will examine some of the major critical approaches in the field.

Notes: 2 meetings (75 minutes), 1 screening (2 1/2 hours)

(Spring) Talking Pictures: An Introduction to Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Art History 202)

Preamble (for topics courses): Film Studies 202s Talking Pictures: An Introduction to Film

Some of the best feature-length films of the past century have commanded our attention because of their compelling artistry and the imaginative ways they tell stories visually and verbally. This course closely studies narrative films from around the world, from the silent era to the present, and in the process it introduces students to the basic elements of film form, style, and narration. Some of the films to be considered are: Broken Blossoms, Battleship Potemkin, Citizen Kane, Contempt, The Bicycle Thief, Ugetsu, Rear Window, Woman in the Dunes, The Marriage of Maria Braun, Days of Heaven, and Moulin Rouge.

FLMST-250-01 - Film Studies - 2004-2005
(Spring) History of World Cinema
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course offers an historical survey of the cinema as a developing art form and a means of communication. We will consider the national, economic, and social conditions of an international medium that has existed for over a century. The national and thematic focus of the course shifts through the semester. For example, we will focus on U.S. film in studying the earliest developments in film technology and narrative, Soviet and French films to study the formal and social experimentation of the 1920s, and films made in Cuba and Brazil to elucidate political filmmaking in the 1960s. The course provides a background for understanding film history and pursuing further studies in the field.
Prerequisites: Film Studies 201 or permission of instructor
Notes: 2 meetings (75 minutes), 1 screening (2 1/2 hours)
Instructors: R. Blaetz
Expected enrollment: 40

FLMST-260-01 - Film Studies - 2004-2005
(Spring) Film Genre: The Science Fiction Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to a specific film genre. Some examples of genres that might be studied are: the science fiction, horror, melodrama, musical, Western, detective, or gangster film.
This course explores various manifestations of the science fiction film as it has appeared from the beginning of film history. Examples include the early "magic" films of Melies and Clair, as well as the numerous examples of the genre from the 1950s, and more contemporary films such as 2001 and Videodrome. The course traces the formal and thematic history of the genre, with attention paid to the figuration of modern science, the evolution of social roles, the logical body, and postmodern representations of time and space.
Prerequisites: Film Studies 201 or permission of instructor
Notes: 2 meetings (75 minutes) and 1 screening (2 hours, 30 minutes)

**(Spring)** Production Seminar on the Moving Image: Structure, Sound, and Vision
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): An advanced course in the theory and practice of film/video production as an art form. Topics for the seminar will vary from year to year.
This course continues to explore the moving image as an art form, focusing on three specific components: structure, sound, vision. The first segment of the course will explore films whose structure makes them most memorable. The second segment will examine innovative ways in which sound is used in film. The final segment of the course will focus on films in which the visual element predominates. Emphasis will be placed on the technical/aesthetic aspects of media art production. Students will be expected to create their own video/audio work. Weekly screenings will be supplemented with readings offering a theoretical/historical context in which to think about independent cinema and video art.
Prerequisites: Film Studies 210, equivalent, or permission of instructor
Notes: 1 meeting (3 hours), 1 screening (2 1/2 hours); a lab fee may be charged

(Fall) Intermediate Courses in Culture and Literature: Introduction to the Civilization of France

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): In order to explain the complexity of present-day France, this course will explore its most conflictual historical moments -- feudalism, absolute monarchy, political and social revolutions. Students will learn the social and historical context of French art and architecture.

In this course we will explore the important moments of France’s past in an attempt to grasp the complex reality of contemporary French society. Students will work on the development of art and architecture, from the Middle Ages to the twentieth century, and familiarize themselves with the mentality and sociohistorical context of each period (emphasis on medieval cathedrals and Renaissance castles, Baroque and Rococo works of art, and nineteenth-century paintings). In addition to its intellectual content, this course will help students identify artistic styles when visiting France. Course content can be found at: http://www.mtholyoke.edu/courses/nvaget/230/index.html

(Fall) Courses on Social and Political Issues and Critical Approaches: Family Romances: Childhood in French and Francophone Fiction and Film
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Preamble (for topics courses): These courses examine a definable phenomenon--an idea, a movement, an event, a mentality, a cultural structure or system, an historical problem, a critical mode--relevant to the civilization of France or of French-speaking countries. Readings from a variety of disciplines shed light on the particular aspect of thought or culture being studied.

Study of twentieth-century narratives of childhood from French and Francophone cultures. Central questions: How has the conception of childhood varied across time and French-speaking cultures? What forms and techniques have writers and artists used to render early life experiences? With what social, psychological, and aesthetic issues have their stories engaged? What ideologies underlie and limit the Western "family romance" model of development? Authors may include: Colette; Pagnol; Beauvoir; Père; Sarraste; Ernaux; Chamoiseau; Pineau; Roy; Blais; Laye; Diallo; Mokeddem; Sebbar; Yaou; Nothomb; films: Diabolo Menthe; La Rue Cases-Nègres; L'enfant noir; Chocolat; painting.

Preamble (for topics courses): These courses examine a definable phenomenon--an idea, a movement, an event, a mentality, a cultural structure or system, a historical problem, a critical mode--relevant to the civilization of France or of French-speaking countries. Readings from a variety of disciplines shed light on the particular aspect of thought or culture being studied.

Were rules meant to be broken? Do laws themselves create transgression? Taking examples from the literature of Ancien-Régime France, we will examine ways culture created and crossed important emotional, gender, and conceptual boundaries, such as by adultery, or by the cross-dressing that would allow women to attain their goals by passing as men. Works and authors to be studied may include: Tristan et Iseut; Chrétien de Troyes; Christine de Pizan; Madame de Lafayette, La Princesse de Clèves; and Laclos, Les Liaisons dangereuses, with selected fabliaux and lyric poems. Some reference may be made to Joan of Arc.

Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor

French imperialisms of the nineteenth and twentieth centuries have affected millions of people, both in Europe and in its colonies. In Africa alone, France carved out an empire of more than 14 colonies containing a large variety of languages and cultures. In this seminar we will examine literary and justifications for the French empire, and 2) appreciate how the images conveyed in these texts still dominate the representation of Africa in the works, contemporary print media, and radio programs in order to: 1) understand how France's cultural production has contributed to the legitimization of the French empire.

**Course on Women and Gender: Disease, Destruction, and Death: The Figure of the Femme Fatale in French Narrative Fiction**

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): These courses explore cultural, literary, and social issues relating to women and gender identities in France and French-speaking countries. Topics may include women's writing, writing about women and men, the status of women, feminist criticism, and theories of sexuality and sexual difference.

We will examine various literary incarnations of the femme fatale, female characters who are eerily and inextricably linked to untimely, unseemly, or tragic death. Texts will fall roughly into two categories: a woman directly or indirectly brings about someone else's death; and a woman serves as a scapegoat, her symbolically sacrificial death being necessary in order to allow the other characters to continue their own lives. We will discuss these works as expressions of misogyny and fear of female sexuality while also attempting to reach a broader range of conclusions about implications of both the individual texts and the larger literary tradition of the femme fatale.

Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor

Notes: 1 meeting (2 hours, 50 minutes). To obtain 300-level credit in French, students must enroll in French 331F-02 and read texts and write papers in French.

**Course on Women and Gender: The French Paradox: Social Movements around Gender and Sexuality**

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): These courses explore cultural, literary, and social issues relating to women and gender identities in France and French-speaking countries. Topics may include women's writing, writing about women and men, the status of women, feminist criticism, and theories of sexuality and sexual difference.

In browsing feminist, lesbian, and gay, and queer sections of an American bookstore, one witnesses the remarkable contribution of French intellectuals in shaping debates over gender and sexuality in the U.S. These works have, however, played relatively little or no role in French social and political movements around gender and sexuality. We will interrogate this seeming paradox, examining the history of gender and sexuality over the 20th century in France, in an attempt to uncover reasons behind the relative weakness of French social movements around gender and sexuality. Authors include: de Beauvoir, Delphy, Fassin, Foucault, Fraise, Scott.

Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor

Notes: 1 meeting (2 hours, 50 minutes)

Instructors: W. Poulin-Deltour

**Advanced Level Seminar: Images and Empire**

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): The seminar is intended to challenge students at the highest level. A regular rotation of topics ensures a variety of perspectives across genre and period, encompassing linguistic, literary, theoretical, and cultural issues of French and Francophone studies. Development of critical skills is stressed through classroom discussion and critique of writing projects, drawing on individual student interests and experiences as they relate to the topic of the course.

(Spring) Advanced Level Seminar: Political Passion and National Predicament: 1789 and 1940 in French Film

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): The seminar is intended to challenge students at the highest level. A regular rotation of topics ensures a variety of perspectives across genre and period, encompassing linguistic, literary, theoretical, and cultural issues of French and Francophone studies. Development of critical skills is stressed through classroom discussion and critique of writing projects, drawing on individual student interests and experiences as they relate to the topic of the course.

Students will study two passionate moments in French history: the spectacular revolution of 1789, and the startling collaboration of France and Germany during the Second World War. Contemporary cinema gives us a chance to peer into the past while pondering major questions of the present. We will examine works of film directors such as Andrzej Wajda and Ettore Scola who reinvented the French revolution. We will also study films that probe moments of great civil distress when, from 1940 to 1944, the French population was torn between conflicting forces of resistance and collaboration. Students will examine viewpoints and intentions of film directors inspired by these dramatic events.

Prerequisites: two courses at the advanced level, or permission of department chair and course instructor

GEOG-102-01 - Geography - 2004-2005
(January) A Short Course in Geographic Information Systems - *Not offered this year/term

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

This course is an intensive one-week introduction to the theory and practice of geographic information systems (GIS). The course begins each session with an introduction to the principles of map science as they apply to GIS. The remainder of the session is used to acquire basic software skills and application experience using the ESRI ArcGIS software. The course culminates with each student conducting a small independent project using GIS data and tools.

Notes: 10 sessions (3 hours) scheduled over 5 days.

Instructors: T. Millette

Expected enrollment: 10

GEOG-105-01 - Geography - 2004-2005
(Fall) World Regional Geography

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Surveys physical and human geographic patterns, providing a comprehensive background discussion of individual regions. Analyzes each region in terms of its environmental base and resource distribution, agricultural systems and rural development, population growth and characteristics, and patterns of urbanization and industrial growth.

Notes: 2 meetings (75-minutes)

Instructors: G. Kebbede

GEOG-202-01 - Geography - 2004-2005
(January) Human/Nature: Perception of the Environment

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
How do people relate to and define their sense of space and place? This course will be an introduction to modern and contemporary writings regarding perception of the environment. Our focus on the topics of place identity and place attachment, public and private space and place, and the natural and built environments, will enable us to examine the social and cultural geographies in which these themes intersect. The course will conclude with a final paper on the application of theory from the assigned readings to an existing space or place.

Instructors: J. Gieseking
Expected enrollment: 15

GEOG-204-01 - Geography - 2004-2005
(Spring) Human Dimensions of Environmental Change
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Geology 204s)
Using case studies from Africa, Asia, North and South America, and Europe, this course examines the interactions between human institutions (such as political and economic structures, science and technology, class and gender systems, and cultures) and the environmental/earth systems that provide their contexts and have been impacted by them. The course will provide a forum to analyze the environmental consequences of a variety of land-use systems, resource use, and development projects and explore possible alternative strategies of human-environment relations that could create a balance between human needs and environmental constraints.
Notes: 1 meeting (3 hours)
Instructors: L. Savoy

GEOG-205-01 - Geography - 2004-2005
(Spring) Mapping and Spatial Analysis
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Provides a comprehensive introduction to maps, including their design, compilation, and computer production. Introduces students to the principles of abstracting the Earth’s surface into a map and using maps and cartographic databases as spatial analytical tools.
Notes: 2 meetings (75-min)
Instructors: T. Millette
Expected enrollment: 16

GEOG-206-01 - Geography - 2004-2005
(Spring) Political Geography
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Systematically studies political phenomena and their geographic expression, at a variety of spatial scales - national, regional, and international. Major themes include nation-state formation, boundary, territory, and ethnic issues, regional blocs and spheres of influence, and conflicts over access to and use of resources.
Notes: 2 meeting (75-min)
Instructors: G. Kebbede

GEOG-209-01 - Geography - 2004-2005
(Spring) Women and the Environment - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Women's Studies 270)
People's interactions with their environments are socially constructed. In this seminar, some of the ways in which women and girls interact differently with the environment are examined. Topics include: women and nature, women in agricultural systems, women and environment/health/disease, women in earth and environmental movements, and fieldwork and researcher-informant relations.
Notes: 2 meetings (75 minutes)
Expected enrollment: 20

GEOG-211-01 - Geography - 2004-2005
(Fall) Geographic Information Systems - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
In this comprehensive introduction to the theory and technology of geographic information systems (GIS), students are introduced to basic raster and vector data structures, spatial database design, attribute database processing, and the role they play in a GIS. Computer exercises are used to acquaint students with state-of-the-art GIS software and highlight fundamental GIS principles.
Prerequisites: Geography 205 or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: T. Millette
Expected enrollment: 16
GEOG-213-01 - Geography - 2004-2005
(Fall) Geography of Europe - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The human geography of western Europe has changed substantially since the 1960s. Enlargement of the European Union (EU) symbolizes a greater sense of European identity, but at the same time important regional differences have reemerged and strengthened. Evaluating the viability of the EU first requires understanding the physical, economic, and political geography of the member states. This course offers the opportunity to focus on the common characteristics and shared problems of the member countries to better assess the future prospects and problems of the community.

GEOG-214-01 - Geography - 2004-2005
(Fall) Geography of South Asia: India, Pakistan, Bangladesh, and Sri Lanka - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The region is studied in terms of its physical, cultural, and political geography. Emphasis is given to the numerous ways in which the peoples of South Asia have adapted to and utilized their local environments, the reasons for varying patterns of population growth throughout the region, and the environmental impact of economic development programs.

(Spring) Geography of the Middle East and North Africa - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
In this course, the Middle East and North Africa are studied in terms of their physical, cultural, economic, and political geography. Emphasis is placed on the environmental conditions and ecological evolution, population and demographic characteristics, the resource base and development strategies and dilemmas, the origins and implications of boundary disputes and territorial claims, and national, subregional, and regional integration processes and problems.
Instructors: G. Kebbede

GEOG-217-01 - Geography - 2004-2005
(Spring) The African Environments
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
The course provides an integrated analysis of biogeography, environmental change, and hydrology within each of the biomes found in the African continent: forest, savanna, desert, coast, wetland, mountain, and Mediterranean environments. It also discusses the impact and significance of human activity on African environments by exploring debates about soil erosion, desertification, biodiversity and depletion, and conservation and development.

GEOG-224-01 - Geography - 2004-2005
(Spring) Atmosphere and Weather - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is a detailed examination of the structure of the earth's atmosphere, radiation budget, global pressure cells, and synoptic weather characteristics. The class places heavy emphasis on basic weather forecasting techniques, which are conveyed via problem-based learning exercises created with local meteorological data sets.
Prerequisites: high school earth science or any 100-level geography course
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: T. Millette
Expected enrollment: 12

GEOG-225-01 - Geography - 2004-2005
(Fall) Evolution of North American Landscapes - *Not offered this year/term
(Geology 225f)
The landscapes of Earth are the result of complex processes and have evolved dramatically since the planet's formation over 4.5 billion years ago. In this course we examine the geologic evolution of the North American continent and its natural features. Using narrative descriptions, scientific articles, maps, photographs, and videos, in addition to the texts, we tour North America and explore the origin and anatomy of its landscapes, including national parks and monuments. We then consider how the geologic setting or physical environment influenced human exploration and settlement of the continent.
Prerequisites: high school earth science or any 100-level geology course or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
GEOG-290-01 - Geography - 2004-2005  
(Fall) Ethnoarchaeology and Geology of the Ancient Southwest - *Not offered this year/term  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
(Geology 290f)  
The American Southwest is a geologically and culturally striking landscape that has been continuously inhabited by indigenous peoples for thousands of years. Cotaught by an earth scientist and bioarchaeologist, this interdisciplinary course examines the complex interrelationships between geological and ecological processes, and human culture and biology of the ancestral Pueblo people in the Southwest. A key feature is a group field trip (fall break) to the Southwest where we consider questions on the nature of changing landscapes, environmental constraints, and biocultural processes for both ancient and modern Pueblo people.

(Fall) Selected Problems in Regional Geography: Planning and the Environment - *Not offered this year/term  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
As development continues to put pressure on the environment, increased interest in planning at the local and regional levels of government is seen as a grassroots approach to environmental management. This seminar course examines successful and innovative approaches used by planning agencies to monitor and protect the environment. Topics include town and regional master plan development, zoning, land evaluation and site assessment studies, and solid waste and growth management issues.  
Prerequisites: Geography 204  
Notes: 1 meeting (3 hours)  
Instructors: T. Millette  
Expected enrollment: 15

GEOG-307-01 - Geography - 2004-2005  
(Fall) Remote Sensing - *Not offered this year/term  
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement  
(Geology 307f)  
This course presents the fundamentals of digital analysis of aerial satellite imagery. Students are introduced to the characteristics of Earth images and learn to make qualitative and quantitative assessments of multispectrum and satellite data. Basic photo interpretation exercises are complemented with computer analysis of satellite data for land use and land cover analysis, vegetation stress analysis, and urban hydrology.  
Prerequisites: Geography 205  
Notes: 2 meetings (75 minutes), 1 lab (3 hours)  
Expected enrollment: 12

GEOG-311-01 - Geography - 2004-2005  
(Fall) Seminars--Third World Development: Third World Development  
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement  
(afram 311)  
Preamble (for topics courses): These seminars present selected topics in geography that reflect contemporary problems, current geographical ideas, philosophical and methodological trends in geography, and/or the history and development of geographical thought.  
Offers an interdisciplinary perspective on social, economic, and political features of contemporary development in Africa, Asia, and Latin America, regions referred to as the Third World or the South and provides an introduction to theoretical origins and definitions of economic
growth, development, and underdevelopment. It then addresses more specific aspects of development such as trends in population growth, migration, and urbanization; agrarian change; livelihood strategies and aspects of social welfare such as health, education, and shelter; poverty and the environment; and external economic relationships. The latter part of the course draws extensively on selected case studies.

Prerequisites: jr., sr., 4 credits in department and 4 credits in related social sciences at 200 level or permission of instructor

Notes: 1 meeting (3 hours)

Instructors: G. Kebbede

Expected enrollment: 20

GEOG-317-01 - Geography - 2004-2005
(Fall) Perspectives on American Environmental History
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking- and writing-intensive; Geology 317f)
Explores the history of human-environment interactions in North America from precolonial times to the present from different cultural perspectives. How have such human activities as migration, colonization, and resource use depended on or modified the natural world? How have different cultural perceptions of and attitudes toward environment shifted through time and helped to reshape American landscapes? Case studies include ecological histories of Native America and Euro-America, slavery and land use, wilderness and conservation, and environmental racism and social justice. Our approach entails historical review of scientific studies, literature, visual records, and oral tradition.

Prerequisites: permission of instructor

Notes: 1 meeting (3 hours) and optional fourth hour

Instructors: L. Savoy

Expected enrollment: 15

GEOG-319-01 - Geography - 2004-2005
(Fall) Africa: Problems and Prospects - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking- and writing-intensive)
The course studies major spatial patterns and socioeconomic changes in contemporary Africa. Important themes include: population growth and resource accessibility, agricultural systems, urbanization, migration, internal and external trade, inter-country economic cooperation and integration, and environmental quality.

Prerequisites: jr, sr, soph with permission of instructor; 4 credits in department and 4 credits at the 200 level in geography or related social science.

Notes: 1 meeting (3 hours)

Geology

GEOL-100-01 - Geology - 2004-2005
(Spring) Physical Geology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
From earthquakes to landscapes, this course introduces the surficial and internal processes of the Earth. Class lectures address plate tectonics, minerals, rocks, volcanoes, rivers, glaciers, oceans, geologic time, and landscape evolution. Labs focus on rock identification and the rich geologic history of both the Grand Canyon and the Connecticut Valley. Grades depend on three in-class exams, one oral presentation, weekly lab exercises, and some short writing assignments.

GEOL-101-01 - Geology - 2004-2005
(Fall) Environmental Geology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Our existence is greatly affected by changing environmental conditions. Some of these changes are “natural” (floods, earthquakes), but many directly result from human mismanagement (groundwater contamination, acid rain, the greenhouse effect). Although some of these problems are of local concern, an increasing number are of global scale. In this course, students develop an appreciation for the way the Earth’s environment affects our lives. In the laboratory, students learn techniques to recognize and interpret environmental hazards and develop strategies to address environmental problems.

(Fall) History of Life - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course focuses on the interrelations between life processes and Earth’s crust and atmosphere. Using both body fossils and trace fossils, we will study the origin and evolution of life, the history of continents and oceans, and the diversification of complex life forms. Laboratory and field trips emphasize identification and analysis of sediments, rocks, and fossils.
Notes: 3 meetings (50 minutes), 1 lab (3 hours)
Instructors: M. McMenamin

GEOL-103-01 - Geology - 2004-2005
(Fall) Exploring the Dynamic Earth - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Earth is a dynamic and ancient planet. The study of Earth is concerned with understanding how the natural world operates as well as realizing its impact on society. In this field- and project-oriented course, we evaluate the history and composition of the planet, and earth-shaping processes such as earthquakes, volcanic eruptions, mountain building, glaciation, and erosion. Lectures and weekly field and lab projects introduce the major concepts and techniques of geology. No previous knowledge of geology is required.
Prerequisites: fy, sop, and permission of instructor
Notes: 2 meetings (75 minutes); 1 lab (3 hours)
Instructors: L. Savoy
Expected enrollment: 15

GEOL-104-01 - Geology - 2004-2005
(Fall) Planet Earth
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
Our rocky planet Earth has much in common with other terrestrial bodies in our solar system. This introductory lecture course examines the origin, evolution, and geologic processes of Earth and relates them to parallel phenomena on the moon, Venus, Mars, and other rocky satellites. Topics include geologic time, minerals and rocks, volcanoes, sediments, rivers, glaciers, earthquakes, plate tectonics, and atmospheres. Weekly problem sets and two in-class exams.
Notes: 2 meetings (75 minutes)
Instructors: M. Dyar

GEOL-104-02 - Geology - 2004-2005

GEOL-115-01 - Geology - 2004-2005
(Fall) Convergence in Geologic Time - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
First-year seminar
This course will introduce students to recent advances in, and current debates on, the study of convergent evolution in the history of life. It is for students interested in the earth sciences and the history of life and how these subjects relate to all other areas of knowledge. The class will focus on helping students to read, write, discuss, and think clearly. Students will receive a broad survey of a wide variety of disciplines. This course is particularly well suited for first-year students.

GEOL-170-01 - Geology - 2004-2005
(January) Snowball Earth
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Geological evidence for the worst glaciation on record suggests to some researchers that the Earth’s surface froze solid about 700 million years ago. The evidence for this Snowball Earth or White Earth event has generated considerable controversy because global climate change computer models appear incapable of generating such an extreme climate. In this lab course, we will use petrographic and other tools to examine the evidence supporting the Snowball Earth scenario, and will assess the implications of this event for our understanding of the development of life on this planet.
Instructors: M. McMenamin

GEOL-201-01 - Geology - 2004-2005
(Spring) Rocks and Minerals
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is designed to help students recognize common minerals and their properties and occurrences, and the principal rock types and their origins, associations, and tectonic significance. Mineral characteristics and identification are covered mainly in the context of the common rocks in which they occur. Observational skills and hand sample identification will be emphasized in lab and on several field trips.

(Spring) History of Earth
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Speaking- and writing-intensive)
This course explores major events in Earth history, the interaction of Earth systems (lithosphere, biosphere, hydrosphere, and atmosphere), and the design and testing of Earth science theories. Four course units are: Causes of Ice Ages (the Quaternary Period), Continental Drift and the Sedimentary Rock Record (the Tertiary Period), Causes of Extinctions and Radiations (the Mesozoic and Paleozoic Eras), and Evolution of Earth (the Proterozoic and Archean Eons). Final grades depend on class participation, debates, weekly labs, and two final projects (essays and a poster).
Prerequisites: high school earth science or any 100-level geology course or permission of instructor
Notes: 2 meetings (75 minutes); 1 lab (3 hours)

GEOL-203-01 - Geology - 2004-2005
(Fall) Surface Processes
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
The surface of the Earth is a history book of past environmental change. Every hill and valley, every erosional feature, every deposit is the result of processes acting at the Earth’s surface. In this course we study these processes (e.g., glaciers, rivers, slopes, coastlines, windblown sand, frozen ground, cave formation, soil development) to better understand how they work and to understand the resulting landforms and deposits. Armed with this knowledge we can then observe different landforms and deposits and infer past process (environments of deposition). Fieldwork and trips allow students to explore firsthand the processes that have created and modified the Earth’s surface.
Prerequisites: high school earth science, Environmental Studies 100 or any 100-level geology course
Notes: 2 meetings (75 minutes), 1 lab (3 hours)

(Spring) Plate Tectonics - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

(speaking- and writing-intensive)

How fast is London moving away from New York? Plate tectonic theory gained widespread acceptance in the earth science community only 30 years ago. The theory explains the origins of volcanoes and earthquakes and the locations of mountain belts and oceans. Topics such as continental drift, earthquake analysis and prediction, the creation and destruction of the ocean floor, Pacific "Rim of Fire," and movement on the San Andreas Fault are explored. Short in-class presentations, one ten-page research paper with opportunities for revision and peer review, and quantitative homework sets required.

Prerequisites: fy, soph with experience with trigonometry, elementary calculus, vectors, and high school earth science
Instructors: M. Markley
Expected enrollment: 15

GEOL-215-01 - Geology - 2004-2005
(Fall) Earth System Science

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

This course is an interdisciplinary introduction to the processes, interactions, and evolution of the Earth's biosphere, atmosphere, geosphere, and hydrosphere. Together these components are known as the Earth system. We will investigate how the Earth system has changed over geologic time, as well as how humans have affected and are affecting it. Some topics include global warming, biodiversity, the origin of life, and the Gaia hypothesis.

(Fall) Planetary Science

Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Astronomy 223fs)

A first-year introductory course for physical science minors and majors. Topics include origin and evolution of the planets; planetary orbits, rotation, and precession; gravitational and tidal interactions; asteroids, comets, and planetary rings; meteorites; interiors and atmospheres of the Jovian and terrestrial planets; geology, tectonics, and mineralogy of the terrestrial planets and satellites; new data from Mars Pathfinder, Lunar Surveyor, and current NASA missions.

Prerequisites: any physical science course

Notes: 2 meetings (75 minutes); offered at Amherst College in fall 2004

(Fall) Ocean Environments - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Because more than 70 percent of our planet is covered by ocean water, the study of marine systems is crucial to our understanding of the Earth. In this course, we will examine chemical, physical, geological, and biological dimensions of the marine environment at a variety of scales in time and space. Along the way, we will explore how the Earth's oceans formed, how they provided the foundations for life, and how they continue to control weather and climate, stabilize global chemical cycles, interact with terrestrial systems, and give us access to valuable resources. Discussions and field trips may be planned to augment other course activities and materials.
Notes: 2 meetings (75 minutes); does not normally satisfy Science and Math II-B requirement, but may be arranged with permission of instructor
Instructors: K. Moody

GEOL-227-01 - Geology - 2004-2005
(Spring) Groundwater
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
The demand for and the contamination of groundwater resources are major societal concerns. To better understand the dynamics of the groundwater system, we cover topics including the hydrologic cycle, surface and subsurface hydrology, groundwater resource evaluation, and groundwater geotechnical problems. Students prepare weekly problem sets, a term paper, and an oral presentation. Many of the homework problems involve computer applications.
Prerequisites: high school earth science or any 100-level geology course

GEOL-250-01 - Geology - 2004-2005
(Spring) The Biosphere
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Speaking- and writing-intensive; Envst-250)
The biosphere has a pronounced geochemical influence on the Earth; indeed, life has been called the greatest geological force. In this course, we will study the chemistry of life through geologic time and examine its influence on the formation and weathering of rocks, on the composition and temperature of the atmosphere, on the accumulation of gas hydrates and other hydrocarbon resources, and its role in the initiation of naturally occurring, water-mediated nuclear reactors. We will also take a close look at the Biosphere concept of Vladimir Vernadsky, the Gaia hypothesis, and Hypersea theory, and the ways in which these concepts inform our understanding of life's geological impact.

GEOL-290-01 - Geology - 2004-2005
(Fall) Ethnoarchaeology and Geology of the Ancient Southwest - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Geography 290f)
The American Southwest is a geologically and culturally striking landscape that has been continuously inhabited by indigenous peoples for thousands of years. Cotaught by an earth scientist and bioarchaeologist, this interdisciplinary course examines the complex interrelationships between geological and ecological processes, and human culture and biology of the ancestral Pueblo people in the Southwest. A key feature is a group field trip (over fall break) to the Southwest, where we consider questions on the nature of changing landscapes, environmental constraints, and biocultural processes for both ancient and modern Pueblo people.
Prerequisites: permission of instructor
Instructors: L. Savoy, D. Martin

(Fall) Remote Sensing - *Not offered this year/term  
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement  
(Geography 307f)  
This course presents the fundamentals of digital analysis of aerial satellite imagery. Students are introduced to the characteristics of Earth images and learn to make qualitative and quantitative assessments of multispectrum and satellite data. Basic photo interpretation exercises are complemented with computer analysis of satellite data for land use and land cover analysis, vegetation stress analysis, and urban hydrology.  
Prerequisites: Geography 205  
Notes: 2 meetings (75 minutes), 1 lab (3 hours)  
Expected enrollment: 12

GEOL-323-01 - Geology - 2004-2005
(Spring) Stratigraphy-Sedimentology Without Lab - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Speaking- and writing-intensive)
This course is an interpretive study of sediments, sedimentary rocks, and processes of sedimentation. Principles of stratigraphic analysis and correlation of sedimentary sequences are presented, as are interpretations of modern and ancient environments, paleogeography, and paleoclimate. A variety of techniques are employed in this course to permit analysis of stratigraphic sequences and their depositional continuity.
Prerequisites: Geol 230 or permission of instructor
Notes: 3 meetings (50 mins.) Same as Geol 324 (Strat-Sed) but without the lab.
Instructors: M. McMenamin

GEOL-324-01 - Geology - 2004-2005
(Spring) Stratigraphy-Sedimentology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is an interpretive study of sediments, sedimentary rocks, and processes of sedimentation. Principles of stratigraphic analysis and correlation of sedimentary sequences are presented, as are interpretations of modern and ancient environments, paleogeography, and paleoclimate. GEOL-326-01 - Geology - 2004-2005
(Spring) Seminar: Global Change - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The Earth's climate system is dynamic. Relatively small changes have been associated with profound environmental change; therefore, understanding historic and geologic climate change is paramount to predicting future change. This course reviews the evidence of past climatic change, the prospects of greenhouse warming, and the environmental impact of a warmer world.
Prerequisites: high school earth science or any 100-level geology course or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: A. Werner

GEOL-333-01 - Geology - 2004-2005
(Fall) Structural Geology and Orogenesis
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course covers the basic techniques of field geology, structural analysis, and multidisciplinary approaches to mountain building (orogenesis). Lectures concentrate on field techniques, stress, strain, faulting, folding, rock rheology, the relation between rock deformation and metamorphism, isotopic systems and thermal histories of rocks, and geological activity at plate boundaries. Of nine labs, five are field trips that involve collection of original data. Short problem sets emphasize quantitative skills. During the final weeks of the semester, students research the Moine thrust fault in Scotland.
Prerequisites: any 200-level geology course or permission of the instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: M. Markley

GEOL-342-01 - Geology - 2004-2005
(Spring) Seminar: Great Ideas in Geology
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Seminars offer directed study and discussion of one or more selected topics in geology. Topics vary from year to year. Consult the department for information about future seminars. The history of revolutionary ideas in earth sciences, from uniformitarianism to global plate tectonics, will be traced from their inception to their current articulation by earth scientists. Reading from the classic works of Hutton, Lyell, Vernadsky, and others will be followed up with evaluations by contemporary writers. One seminar and one research paper required.
Prerequisites: Geology 100 or 101 and 4 credits at 200 level in the department
Notes: 1 meeting (3 hours)
Instructors: M. McMenamin
Expected enrollment: 18

GEOL-342-02 - Geology - 2004-2005
(Spring) Seminar: Human Dimensions of Climate Change--Past, Present, Future
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Seminars offer directed study and discussion of one or more selected topics in geology. Topics vary from year to year. Consult the department for information about future seminars.
An interdisciplinary examination of how climate change has affected human societies in the past and how it might in the future. Many civilizations have been impacted by climate change, and the influence of this factor on the development of human societies is considerable. We will examine the impacts of rapid climate change on the civilizations of ancient Egypt and Mesopotamia, the Classic Maya civilization and Europe. Evidence indicates that the increase of greenhouse gases in the atmosphere will cause significant future changes in global and regional climate. These climate changes will likely affect such dimensions of human existence as water availability, food, security and health.
Prerequisites: 4 credits at 200 level in the department

GRMST-100-01 - German Studies - 2004-2005
(Fall) The New Face/s of Germany
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
First-year seminar (Writing-intensive; Taught in English)
In Germany today you will find: cities where much of the population was not born in Germany; 160,000 Turks and fourth-generation Germans of African descent living in Berlin; public schools offering Islamic religious instruction; more Russian Jews emigrating to Germany than to Israel; immigrants of German citizenship who do not know German; East Germans longing for the return of the Wall. Recent German film has represented these diverse faces of Germany, often through comedy. Focus on close analyses of several films, their sociohistorical, economic, and cultural contexts. Films to include: Goodbye Lenin, Im Juli, Yasemin, Journey of Hope, Ali--Fear Eats the Soul.

(Fall) Memories of War and Exile: The Second World War in Photographs, Memoirs, and Fiction - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive; Taught in English)
We will explore the documentation of war through images and text with emphasis on the Second World War. How do civilians, soldiers, resisters, survivors, victims, and émigrés directly affected by war remember the experience of war? What is the impact of war on emigrants forced into exile? How is war remembered by nations, institutions, and social groups in Western culture through myth, imagination, and fiction? This course focuses on the memory of the war experience in Germany and France with special emphasis on the impact upon European refugees at Mount Holyoke College. Readings include essays on the role of memory in shaping culture, archival material, and literary accounts of war.

(Spring) Crossing the Line: Subversions of Sex, Gender, and Nation in GermanLiterature and Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive)
Preamble (for topics courses): This course explores the complexity of German-speaking culture, thought, and history by focusing on a specific topic
through an interdisciplinary lens. Topics may include the study of culture broadly defined (language, art, architecture, music, politics, economics, or
history) of a particular period or the study of gender, race, sexuality, ethnicity, or class based on a recurring social problem, cultural form, or idea.
This course will apply the insights of gender studies and queer theory to the treatment of historical developments such as urbanization, women^os
emancipation, the gay rights movement, fascism and the World Wars, the Cold War and the division of Germany, the student movement of 1968,
reunification, and immigration. We will examine the way particular aesthetic movements such as literary modernism, postwar realism, New German
Cinema, and recent popular comedy films engage with broader debates about sex, gender, and nation carried out in politics, medicine, the natural
sciences, and philosophy.

(Spring) Senior Seminar: The Hi/Story of Kaspar Hauser: Terror/ism in Reality and Representation

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive)

Preamble (for topics courses): This seminar is designed to explore the complex nature of our field of inquiry. We explore such questions as: What does German studies mean? What is interdisciplinary work? What role does literature play in culture studies? What is the relationship between language and the construction of culture? What meanings have been attributed to the terms "culture" and "civilization"? Texts from a variety of disciplines.

Students compose term papers or Web projects on topics related to their major field(s) of interest. This course is required of all senior majors and fulfills a 300-level major requirement for the nineteenth or twentieth century, dependent on work pursued for the semester project.

A case study of the mysterious Kaspar Hauser, a foundling of unknown origins, rumored to have been the prince of Baden, who appeared at the age of 16 in Nuremberg in 1828. He lived under the constant threat of unknown terror and was murdered in 1833. His true identity remains a topic of debate. Primary sources on politics, law, history, medicine, psychology, education, music, theater, art, literature and film available on a multimedia CD-ROM.

Focus on experiences of terror/ism and its impact on identity formation, its relation to language acquisition and the socialization processes of the historical Kaspar Hauser, and extend to international representations of this topos since the 1800s.

Prerequisites: sr, 12 credits including one 300-level course, nonseniors by permission of the department

Notes: 2 meetings (75 minutes) or 1 meeting (2 1/2 hours); This course fulfills an eighteenth-, nineteenth-, or twentieth-century 300-level requirement for the major, depending on the topic of a student’s semester project.

History

HIST-101-01 - History - 2004-2005
(Fall) Foundation: Justice: Ideals and Practices in History
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar (Writing-intensive)
A full-year course using historical case studies (e.g., peasants' revolt of 1381, a slaves' revolt in 1831, and a labor strike in 1912) as well as off-campus fieldwork to ask what justice has meant to women and men in Western cultures, when they resort to open struggle to achieve it, and how goals and practices have changed over time. Both analysis of documentary evidence in the fall and community-based learning in the spring should encourage critical reflection on historical explanation, social commitment, and political action. (See History 102s for the second semester's course description.)
Prerequisites: fy and permission of instructor
Notes: students who are admitted to History 101f (01) are expected to continue in History 102s
Instructors: H. Garrett-Goodyear
Expected enrollment: 20

HIST-101-02 - History - 2004-2005
(Fall) Foundation: The Letters and Literature of the American Revolution
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar (Writing-intensive)
This seminar will focus on the public documents and private correspondence generated by the political crisis that became the American Revolution. In addition to the pamphlets of the 1760s and 1770s, the Declaration of Independence and the Federalist Papers, we will read in the personal correspondence of John and Abigail Adams, Thomas Jefferson, and Benjamin Franklin, all superb prose stylists as well as prominent revolutionaries. Four short essays, one book review, and a final paper will be required.
Notes: 2 meetings (75 minutes)
Instructors: J. Ellis
Expected enrollment: 15

HIST-101-03 - History - 2004-2005
(Fall) Foundation: Talking about a Revolution: Intellectuals in Modern China
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
First-year seminar (Writing-intensive; Asian Studies 106)
A study of the visions, plans, and frustrations of intellectuals taking part in the revolutionary changes of twentieth-century China. Beginning with the radical youth of the May Fourth Movement, the course will also include Confucian reactions to modernism, moderate constitutionalist solutions, and the anarchist and Communist movements. Topics for discussion will include the ideology and cultural biases of the historian/observer, the role of intellectuals in society, and the impact of European ideas - Marxism, Ibsenism, Darwinism, among others - on traditional Chinese culture.
Notes: 2 meetings (75 minutes)
Instructors: J. Lipman
Expected enrollment: 15

HIST-101-04 - History - 2004-2005
(Fall) Foundation: The Culture of U.S. Imperialism
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar (Speaking-intensive)
This course explores the significance of imperialism in the history of the United States. How have different forms and phases of empire shaped the development of the nation and its relation to the world at large? How have they shaped and been shaped by racialized and gendered power relations within the United States? Topics may include: continental expansion; the United States' rise to world power; military, economic, cultural, and political tools of empire; U.S. anti-imperialist activism; and the local politics of imperialism in lands targeted for control or acquisition by the United States. Special emphasis on relations between the United States and Haiti.
Notes: 2 meetings (75 minutes); This is a first-year seminar
Instructors: M. Renda
Expected enrollment: 16

HIST-102-01 - History - 2004-2005
(Spring) Foundation: Justice: Ideals and Practices in History
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar (Community-based learning course; Speaking-intensive)
In the spring semester of this yearlong course, community-based projects will challenge students to use both library research and participation in contemporary institutions and social action projects to develop arguments proposed during the fall semester and to refine analyses of changes in ideologies and institutions since the late European Middle Ages. Off-campus fieldwork may vary, but past projects include work with the Massachusetts Commission against Discrimination, the Coalition for Authentic Reform of Education, Jobs with Justice, and a local DA's office. (See History 101f for first semester's course description.)
Prerequisites: History 101f
Notes: 1 meeting (2 hours) and off-campus projects

(Fall) Ancient Greece and Rome
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
A survey of the political, social, and cultural history of Greece from the Bronze Age to Alexander, and Rome from the Tarquins to Constantine. We shall strive to recreate the entire experience of these peoples; their art, philosophy, and religion; their democratic and imperialist policies; the social dynamics of their clans and families; technology and trade. Special emphasis on the city-state and its meaning in Western history. Sources include Homer, Thucydides, Plato, Livy, Tacitus, various plays, trials, and laws.
Notes: 2 meetings (75 minutes)
Instructors: F. McGinness

HIST-121-01 - History - 2004-2005
(Spring) The Middle Ages: 312 to 1300
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course offers a survey of the politics, society, and daily life of medieval people, defining the medieval vision and analyzing its components: the legacies of Rome, the barbarians, and the Church as they affected political, social, economic, and cultural spheres. Topics include the growth of kinship, technology and feudalism, monasticism, popular culture, courtly love, and the image of women.
Notes: 2 meetings (75 minutes)
Instructors: F. McGinness

HIST-124-01 - History - 2004-2005
(Spring) History of Modern South Asia, 1700 to the Present - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course seeks to give a broad overview of the history of the South Asian subcontinent from the end of the Mughal empire to the present. As one of the largest and longest occupied postcolonial regions, the Indian subcontinent has been witness to more than two centuries of colonialism. Prominent themes: the emergence of religious and regional identities, ethnic violence, social reform and the "woman question," deindustrialization, and nationalism. We will consider how the history of this region has been written, by whom, and why. Using primary and secondary sources, this course addresses these questions and raises more about whether there is such a thing as one history of South Asia.
Notes: 2 meetings (75 minutes)
Instructors: D. Ghosh

HIST-133-01 - History - 2004-2005
(Fall) Japan Since 1600
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Asian Studies 133f)
This course examines Japan's emergence in the nineteenth century from more than 200 years of self-imposed isolation, the process of political and economic modernization, and the attempt to find a secure and significant place in the Western-dominated world of the twentieth century. It focuses on the formation of a modern state, industrialization, Western imperialism and the rise of pan-Asianism, the Great Depression and the rise of military government in the 1930s, postwar Japan under U.S. military occupation, and problems of rapid economic growth in recent years.
HIST-135-01 - History - 2004-2005
(Spring) Modern Korea - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Assian Studies 135s)
An introduction to Korean history since the fourteenth century. After a brief introduction to geography and premodern cultural forms, the course will survey the evolution of the Yi dynasty (1392-1910) in the religious, intellectual, and socioeconomic realms. The second half will focus on Korea's interaction with the Euro-American powers and the rising Japanese empire (nineteenth and twentieth centuries). We will examine the devastating effects of imperialism, colonial occupation, civil war, and long-term division, which have also enabled rapid economic development since the 1960s.

Notes: 2 meetings (75 minutes)

HIST-140-01 - History - 2004-2005
(Fall) Identity and Community in Early Africa - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
First-year seminar (Speaking- and writing-intensive)
What made communities cohere and how did people understand their place in society in the African past? This class introduces African patterns and principles of social organization from limited associations such as clans or drums of affliction to the encompassing community of medieval Islam. Activities designed to give participants confidence in oral presentations begin with retelling oral narratives and culminate with a debate concerning the causes and consequences of the slave trade. This seminar will be taught in coordination with English 101, Into Africa.

Notes: 2 meetings (75 minutes); this is a first-year seminar
Instructors: H. Hanson

HIST-141-01 - History - 2004-2005
(Spring) Violence and Social Change in Modern Africa
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This course examines processes of change that have shaped modern Africa. It seeks to provide both the information and the conceptual tools necessary for an informed interpretation of African affairs presented (and not presented) by popular media. Using fiction, historical narratives, and a wide range of interdisciplinary sources, the class examines nineteenth-century interactions of Africans and Europeans and the nature of colonial conquest, economic and social change during the colonial period, and the emergence of postcolonial African societies.

Notes: 2 meetings (75 minutes)
Instructors: H. Hanson

HIST-150-01 - History - 2004-2005
(Spring) Europe and the Atlantic World, 1300-1700
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Speaking- and writing-intensive; same as Medieval Studies 102s(01))
This course inquires into several dimensions of European society and culture during the transition from principalities and fiefs to early modern states, from feudalism to capitalism, from serfdom to both free and slave labor. Equally important, however, will be comparison of western Europe with other Atlantic societies of these centuries and examination of consequences for Europeans, Africans, and Americans (north and south) of encounters among them. Using both voices from the period and recent scholarship about early modern Western and Atlantic societies, the course will look critically at the making and remaking of "Western" culture between the Middle Ages and the modern era.

Notes: 2 meetings (75 minutes)
Instructors: H. Garrett-Goodyear

HIST-151-01 - History - 2004-2005
(Fall) Modern and Contemporary European Civilization
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Surveys the major movements and developments in Europe during the era of European expansion and dominance - from the devastations of the Thirty Years War to the Second World War - and up to the current era of European Union. Topics include: the French Revolution and the birth of nationalism; the scientific and industrial revolutions; the modern history of international relations; imperialism, fascism, the Holocaust, the two World Wars, and the present and potential roles of Europe at the dawn of the twenty-first century.

HIST-161-01 - History - 2004-2005
(Spring) History of Britain and the British Empire, 1707 to the Present
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This course charts the making of modern Britain both as a nation and as an empire. The course brings British metropolitan interests into the same field as British colonialism and examines how political and social change in Great Britain shaped imperial activities and vice versa. How did the Industrial Revolution affect the expansion of the British empire? How did objectionable activities in the colonies, such as slavery and famine, give rise to humanitarian and feminist discourses? How did a small nation manage to rule over a quarter of the world's population? We will examine the history of Britain as it struggled with what it meant to be "colonial" and "modern" at the same time.
Notes: 2 meetings (75 minutes)

(Fall) History of Global Inequality
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Community-based learning course)
Why are some nations so much richer and more powerful than others? This course demonstrates that global inequality is not natural; it has a history. Exploring patterns of exchange that developed among regions of the world over the past 600 years, we will ask about the role of power in the establishment of practices of production and exchange. We will explore how cross-regional productive systems benefited some participants at the expense of others. Having traced the consequences of unequal exchange over several centuries, we will ask how global trade and production would have to change for all participants to benefit equally. The course includes a community-based learning component.

(Spring) The Crusades - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Medieval Studies 217s)
Long before Operations "Desert Storm" and "Iraqi Freedom," Westerners were drawn to the Middle East. This course will examine the "Holy War" of Christians against Moslems and Jews in the Middle Ages and seek to determine underlying causes: the need to defend Constantinople and the Holy Land from the infidel, the greed for markets and the spoils of war, the domestic frustrations that were displaced to an external enemy, the ideology of divine mission and martyrdom. Sources: laws, chronicles, memoirs, sermons and treatises from Latin, Greek, and Moslem perspectives.

(Spring) Special Topics in Medieval History: Early Ireland
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Same as Medieval Studies 208s)
Who were the Celts? Are any social and political institutions distinctively "Irish"? This class will trace Ireland from prehistoric times through the Norman conquest and colonization of Ireland in later Middle Ages, focusing on continuities of settlement patterns, family structures, religious practices (both pagan and Christian), and cultural festivals. Sources include epics and myths such as The Taine and The Voyage of Brendan, various Annals recording historical events; law codes, letters, saint's lives, and penitentials.

HIST-241-01  -  History - 2004-2005
(Spring) African Popular Culture - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This class uses popular music, dance, fiction, film, street art, bus slogans, newspapers, and other sources to document African interpretations of the decades since "flag independence" in 1960. We will let African musicians, writers, filmmakers, and artists direct our investigation of the big questions of the class: Why is the gap between rich and poor in African societies increasing? What is happening to gender relations? What do African people think of their political leaders and how do they imagine political situations might improve?

HIST-255-01  -  History - 2004-2005
(Fall) Ideas and Society in Modern Europe: The Age of Enlightenment
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
The Enlightenment has been cited as the intellectual birthplace of almost every modern movement from Marxism to democracy to imperialism. It has also been hailed as the birthplace of modern notions of freedom, individuality, and progress, and vilified as the basis of elitism, sexism, and racism in Western culture. This course will evaluate the Enlightenment and its impact on philosophy, politics, religion, and society in Western Europe, asking whether the priority placed on reason and progress has been beneficial or detrimental to our society.

(Spring) Ideas and Society in Modern Europe: Revolutionary France
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
For most of the eighteenth century, France had what appeared to be the strongest monarchy in Europe, so why did France explode into revolution in 1789? And why did France swing between revolution and dictatorship for a century after the French Revolution? How did the Enlightenment affect the politics of the revolutionaries? We will explore the cultural, social, and economic developments leading to the French Revolution, and why the tensions that led to revolution took so long to resolve. This will include an examination of the rise and fall of Napoleon and the French commune that followed. We will also consider the impact of the revolution and the Napoleonic wars on the rest of Europe.

(Fall) Topics in the Recent History of Europe: From Habsburg to Hitler: Bohemian Politics, 1848-1945 - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course explores the complex, often comic, and ultimately tragic history of Bohemia, a territory located today in the Czech Republic, but previously a part of the Habsburg Monarchy, then of Czechoslovakia, and then of Hitler's Third Reich. Students will complement historical studies with autobiographical material and contemporary fiction, beginning with the Revolution of 1848, progressing through the achievements and worrisome trends of Emperor Francis Joseph's 68-year reign, and concluding with the world wars. Emphasis on the interplay among Czechs, Germans, Jews, and other pivotal players: the House of Habsburg and its supporters, and the political elites of neighboring countries.

(Fall) German History in the Modern World - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course pushes beyond cliches and simplistic images about Germans, into the world-shaping and humanity-stretching German past. Beginning with the Napoleonic Wars and the emergence of German nationalism, students will follow developments up to the present—using primary sources that range from sublime to depraved and that concern politics, literature, music, and more. Themes include the roots of Nazism and of German democracy and the responsibility of individuals for social outcomes.

(Fall) U.S. Women's History since 1890
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Women's Studies 200)
This course examines the history of women and the cultural construction of gender in the United States since the end of the nineteenth century. How have class, race, and ethnicity shaped the history of women's work, debates over female sexuality, women's work for social change, and representations of women in cultural and political contexts? In what ways has gender contributed to racial consciousness and class formation in the United States? Using primary and secondary material, we will examine "women's experience" in the realms of work, politics, sexuality, and reproduction.

(Spring) Women in History: Women in South Asia
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Asian Studies 296, Women's Studies 200)
This course is about the histories of women in South Asia. The readings consider broad themes that have historically affected the status of South Asian women: discourses about backwardness, nationalism, family and property rights, the law, violence, labor, religion, and social activism. Working
chronologically through the colonial and postcolonial periods, we will consider the relationship between the status of South Asian women within their families and communities and ask what types of feminist strategies can enable South Asian women.

(Fall) Colloquium: Reading the New York Times: Journalism, Power, History
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course will examine the political and cultural power of the New York Times in the American past and present. Students will analyze the Times today through careful, daily readings. They will also study its evolution as an institution, as well as its coverage of and involvement in several of the critical historical events of this century. By focusing on the Times as the most influential "agenda setter" in American journalism, we will also address the larger issues of objectivity, bias, and influence in the mass media.

HIST-301-02 - History - 2004-2005
(Fall) Colloquium: Martyrdom as Social Protest: Resistance and Honor in Antiquity and the Middle Ages
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Not all victims of tyranny and persecution become martyrs, nor are all martyrs victims of tyranny. What social and political conditions foster the choice of martyrdom? What cultural values drive this form of self-immolation? What's worth dying for? In antiquity, the word "martyr" meant an active "witness." Today, it can mean a passive "victim." Our approach uses cross-cultural comparisons and psychoanalytic theory to help understand how martyrdom shaped the history and culture of antique Europe and Japan. Subjects: Imperial suicides, child sacrifice, political martyrs, gladiators, Samuri and kamikaze, women martyrs, soldiers, and virgins.

(Fall) Colloquium: The Long Nineteenth Century
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Speaking- and writing-intensive)
This course will examine the four major revolutions that occurred in Europe between 1789 and 1917, which reshaped the principalities and territories of Early Modern Europe into the nation-states of Modern Europe. A major focus will be the role of nationalism, both in fostering revolutionary movements and in inspiring resistance to them. The course will also consider how the political/theoretical positions of historians who study the period have shaped their interpretations of the events, as students analyze how historical arguments are constructed and supported.

(Spring) Colloquium: Race, Gender, and Empire: Cultural Histories of the United States and the World
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(American Studies 301, Women's Studies 333)
Recent cultural histories of imperialism--European as well as U.S.--have illuminated the workings of race and gender at the heart of imperial encounters. This course will examine the United States' relationship to imperialism through the lens of such cultural histories. How has the encounter between Europe and America been remembered in the United States? How has the cultural construction of "America" and its "others" called into play racial and gender identities? How have the legacies of slavery been entwined with U.S. imperial ambitions at different times? And what can we learn from transnational approaches to "the intimacies of empire?"

HIST-312-01 - History - 2004-2005
(Fall) Gandhi's Critique of Modernity in Contemporary Perspective
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing. Modernity, it has been argued, exemplifies the Enlightenment truths of alienated production, bureaucratic rationality, secular progress, and the associated practices of science, technology, humanism, development, and management. In the twentieth century, a major critic of modernity adopted strategies opposed to violent confrontation, revolution, and civil war: M.K. Gandhi. We will examine Gandhi's views on nonviolence, the political strategy of civil disobedience, and his critique of modernity. Texts, films, and the personal narratives of Henry David Thoreau, Leo Tolstoy, and Martin Luther King will be analyzed in conjunction with Gandhi's writings.

(Assian Studies 331)
Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.
A research seminar on the late-nineteenth-century transformation of Japan from a feudal state ruled by hereditary warriors into a modern nation-state ruled by a cabinet, a legislature, and a professionalized bureaucracy under the symbolic sovereignty of a sacred monarch. A turning point in East Asia's modern history, this revolution shaped the following century throughout the region and remains a subject of intense scholarly and popular interest. We will begin with secondary readings--social and political history, biography, and cultural history--then each student will identify a research question and discover her own sources to answer it in a 20-page final essay.

(Spring) Gender and Colonialism: Masculinities, Feminisms, and the European Imperial State - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.
This course considers how gender was a central frame for regulating political and social relations in European empires and their colonies in the last 200 years. The readings bring interrelated historical themes into play: the multiple ways in which masculinity and its privileges structured the ways that European men negotiated with non-European men over questions of political authority; how women, both European and native, became a focus of social, cultural, and sexual regulation. A final theme addresses the relationship between European feminist discourses and feminist movements in colonies. Students will be asked to analyze a memoir, travel narrative, or another primary source.

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary research in the history of particular times and places, resulting in a substantial piece of historical writing.
What causes the transformation of patterns of production and exchange? This seminar uses richly detailed African social histories to explore the complex interactions of culture, power, and material resources in economic and social processes. We will examine recolonal forms of exchange, the social and political conflicts engendered by nineteenth century integration into a global economy, the shaping of modern African cities and the changing meanings of commodities such as soap, alcohol, and cloth. Evaluation will be based on active engagement in discussions, short reflections on each week’s reading, and a substantial research paper.

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.
This survey of Western monasticism from its origins in the Egyptian desert to the mendicant orders of fourteenth-century Europe seeks to understand what motivates men and women to define perfection as abnegation of food, sex, wealth, success, and even laughter - all that we now consider valuable in life. Topics: fasting, virginity, voluntary poverty; monastic rules and reform movements (e.g., Celtic, Benedictine, Cistercian, Franciscan, etc.). Also various saints' lives, mysticism, and women's spirituality. Course includes a stay at the Abbey of Regia Laudis.

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.

Does history repeat itself? We will investigate the theme of crisis in Europe during the seventeenth and the early twentieth centuries by exploring patterns of historical similarity and difference to be found, for example, in World War I, the New Woman and her critics, the rise of fascism, new paradigms in art (cubism), movements for social justice and state-protected welfare, and psychological models of human nature. Readings to include Hobbes's *Leviathan*, Freud's *Civilization and its Discontents*, Ortega Y Gussel's *The Revolt of the Masses*, Simone de Beauvoir's *Memoirs of a Dutiful Daughter*, and Erich Maria Remarque's *All Quiet on the Western Front.*

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of original historical writing.

By the early twentieth century, feminist movements had arisen across Western and Central Europe. While many of these movements were linked to attempts to gain suffrage rights for women, there were significantly different aims associated with the movements in different countries. What were the national and regional differences in these movements? How did the political and ideological beliefs of the founders of these movements differ, and how did those differences shape the agendas of the various movements? Students will use a variety of primary and secondary sources to consider the roots of European feminisms and the gains made by these movements through the modern era.

Interdepartmental Courses

I-102-01 - Interdepartmental Courses - 2004-2005
(Spring) Engineering Concepts
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Key ideas of engineering: feedback and control, mathematical analysis, components and systems, and complexity, will be examined with a focus on sensors, from simple individual sensors to collaborative, adaptive sensor networks. The course will serve as an introductory course for several University of Massachusetts engineering programs and is recommended for students considering any of the 3/2 engineering programs.
Prerequisites: Mathematics 101, Physics 115, or Per I
Notes: 2 lectures (75 minutes); 1 discussion (1 hour); 1 lab (3 hours)
Instructors: P. Dobosh
Section Instructors: 01 LAB P Dobosh | 02 LAB P Dobosh |
Expected enrollment: 20

I-108-01 - Interdepartmental Courses - 2004-2005
(January) Extending Rights in the Public Policy Arena
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This course provides students with a hands-on analysis of the legislative process of extending rights through State and Federal laws. Senator Linda J. Melconian, author of Massachusetts genetic privacy law and advocate for the rights of scientific research, leads the class as it studies the implementation of theory into practice. The students will consider the examples in Senator Melconian's own career as a Massachusetts lawmaker, compare legislation in other jurisdictions, and review federal attempts to articulate the rights of Americans. Topics will include: fundamental rights, genetic testing and privacy rights, and stem cell research.
Notes: Tu, Th, 1-4
Instructors: L. Melconian

I-110-01 - Interdepartmental Courses - 2004-2005
(January) Reflections on War
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
After an election in which war was the dominant topic of discussion, it is a good time to reflect on the nature of war itself. The Napoleonic wars offer an interesting perspective. What did people at the time think of the nature of war and what lessons can we draw from their reflections? Reading will include a short biography of Napoleon to set the scene and then four of the Great Books of Western Civilization: von Clausewitz's On War, Stendhal's The Red and the Black, Hegel's The Philosophy of History, and Austen's Pride and Prejudice. Throughout, the emphasis will be on what these books can teach us about the nature of war.
Instructors: J. Hartley

(January) Gods and Monsters: Science and the Horror Movie - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Speaking- and writing-intensive; Astronomy 142f)
Since the invention of the form, horror movies have made frequent use of science to induce wonder, awe, and terror. Science and scientists may become metaphors for extra-scientific social anxieties, or be seen as portrayed as directly threatening. Alternatively, science may figure as a heroic or protective force, while some genres display an unresolved ambivalence toward science, e.g. the B-features of the Cold War era. This course explores popular responses to science through extensive viewings of horror movies that specifically address science as a locus of fear; combined with widely ranging readings. Warning: This course is rated R.
Notes: TTh 9-4 and TWTh 7-9pm
Instructors: D. Cotter
Expected enrollment: 20

I-142-01 - Interdepartmental Courses - 2004-2005
(Fall) Light, the Universe, and Everything - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Speaking- and writing-intensive; Astronomy 142f)
Beginning with the phenomena - on both sides of the eye - that give rise to visual sensation, we examine cosmic structure on all levels: from the subatomic, molecules and cells, organisms and species, and up to planets, stars, and galaxies. This structure exists in time as well as space, so that we can "see" evolution from the earliest microseconds into the present-day complexity. We pay particular attention to the mechanisms whereby life operates within the cosmic hierarchy: how it obtains energy and material, stores information, and ultimately has the capacity to look into time and space to read this story.
Notes: 1 lecture (75 minutes), 1 discussion (75 minutes) plus labs, including evenings at the observatory; students passing Interdepartmental Courses 142 and 242 will fulfill both a II-A and a II-B requirement; students passing only one semester will receive credit for only one lab science

This course examines theoretical and practical applications of leadership and peer mentoring in educational contexts. Focus will be on the development of knowledge, skills, and attributes required of effective Speaking, Arguing, and Writing Program (SAW) mentors and assistants.
Prerequisites: permission of instructor
Notes: This course may NOT be taken with the ungraded option; it must be taken for a letter grade. 1 meeting (2 hours)
The focus of the class will be improving public-speaking skills, especially under circumstances when one's position is being actively challenged. To accomplish this, students will learn three of the most popular styles of competition debate: Policy Debate, Lincoln-Douglas Debate, and Parliamentary Debate. Each student will participate in two debates in each style of debate during the course of the semester, as well as evaluate other students' debating. These debates will be scheduled outside of regular class time at the convenience of the participants. Topics for the debates will likely concern domestic and international policy, morality, politics, and the law.

ITAL-106-01 - Italian - 2004-2005
(Fall) Liars, Pranksters, and Jesters on the Italian Stage
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive; Taught in English)
Can serious artists play cruel jokes? Who laughs at Dante? This course explores the role of lies and practical jokes in Italian literature and the way the concept of humor has changed over time. We will investigate the intimate connection among power, religion, and laughter by reading some of the funniest (and politically charged) works of Italian theatre. Our authors will take us through the streets of Renaissance Florence, eighteenth-century Venetian canals, as well as the improvised "factory theaters" of the seventies. Readings will be paired with stage performances and will include Dante, Machiavelli, Goldoni, Puccini, Fo, De Filippo, and Umberto Eco.
Notes: 2 meetings (75 minutes)

ITAL-210-01 - Italian - 2004-2005
(Spring) Dante and the Middle Ages
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
A close reading of Dante's Inferno, Vita Nuova, and On World Government in the context of their historical and cultural backgrounds. By relating literature to philosophical, theological, and political concerns, we will examine Dante's work within the intellectual and social realities of the Middle Ages, and we will consider the impact of the Classical tradition on Dante's thought. Some audiovisual resources will be used to complement the texts with an iconography of Dante's world, as it appears from sources belonging to Dante and his original public's cultural patrimony.
ITAL-212-01 - Italian - 2004-2005
(Fall) Mirrors for Reality: Renaissance Italian Theatre
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
Overcoming the ecclesiastical censorship on theatre of the Middle Ages, the Italian Renaissance brings dramatic performances back to the reality of civil life. And theatre is ready to present its set of takes on the realities that produce and surround it. With consideration to the interaction of texts and ideas, and to the Classical roots of Italian Renaissance drama, we will examine pastorals, comedies and tragedies by Poliziano, Ariosto, Machiavelli, Aretino, Ruzante, Trissino, and others.

JWST-104-01 - Jewish Studies - 2004-2005
(Fall) Introduction to Judaism
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Religion 104f)
Judaism is a 3,500 year-old tradition that has developed over time as Jewish communities all over the world creatively interacted with the different cultural and historical milieus in which they lived. This course explores the ways in which Judaism has sought to transform ordinary life into sacred life. What are the ways in which Judaism conceives of God, and what is the meaning of life? What roles do study, prayer, ethics, sex, marriage, family, rituals of the life cycle, and community play in Judaism? These and other questions will be taken up through study of diverse types of religious literature and historical evidence.

**(Spring)** Jewish Spiritual Autobiographies - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Religion 215s)
Along with such genres as letters, ethical wills, travel accounts, and other personal communications, spiritual autobiographies and diaries often reveal what people actually thought and felt about matters important to them. These sources provide insight into religion as lived experience. This course studies autobiographical accounts of Jewish religious figures from the medieval period to the contemporary. We include narratives by both women and men, philosophers, mystics, messianic pretenders, travelers, authors of Holocaust memoirs, and other contemporary Jews. Taken together, such accounts bring to life the diversity of spiritual quests in which Jews have engaged.

**(Fall)** Engendering Judaism: Women and Jewish Tradition - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Speaking-intensive; Religion 222f)
This course examines the representations and roles of women in Jewish culture, from the literature of the Hebrew Bible to the contemporary period. What were the distinctive ways in which women's religious life expressed itself by way of prayer and ritual practice? Were there women mystics and visionaries? How did women exert their influence as mothers and wives? There will be significant focus on the dramatic developments taking place among contemporary Jewish women: innovative rituals and experimental liturgies; opportunities to become rabbis; new approaches to God, theology, and social issues; the Jewish lesbian movement; women's writing and documentary filmmaking.

**(Fall)** Introduction to Jewish Mysticism
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Religion 235f)
Mysticism refers to a type of religious life in which individuals seek intimate and personal, direct and intense experience of the Divine. There exists a rich and fascinating Jewish mystical tradition with hundreds of books of diverse kinds. This course examines the Kabbalah of thirteenth-century Spain, focusing upon the seminal work of this period, the Zohar; the synthesis of mysticism and messianism that occurred in the city of Safed (in the Land of Israel) in the sixteenth century; and the popular pietistic movement of Eastern Europe from the eighteenth century forward, Hasidism; and various expressions of mystical spirituality in our own time.

**(Fall)** The Quest for Meaning after the Holocaust - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Religion 245f)
The destruction of European Jewry by the Nazis during the Second World War was the most devastating tragedy in all of modern Jewish history and perhaps of the twentieth century as a whole. The Holocaust poses fundamental questions for all people about what it means to be human, the nature of social community, and about religious faith and tradition. This course explores significant attempts to come to grips with these moral and philosophical questions through literature, religious thought, and film, including the work of Paul Celan, Primo Levi, Elie Wiesel, Aharon Appelfeld, Arthur Cohen, Richard Rubenstein, Jean Amery, Claude Lanzmann, Eva Fogelman, and Pierre Sauvage.

Instructors: B. Arnold

LATIN-318-01 - Latin - 2004-2005
(Fall) Views on Augustus
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Augustus came to power after a long period of civil unrest; he restored order and stability and established a peace that would endure for more than two centuries. As Rome's savior and its first emperor, his accomplishments were the subject of biography, history, and even poetry. He is a complex historical figure who eludes simple interpretation. Yet we will try in this course to understand Augustus' character and accomplishments through a variety of sources, including Suetonius, Horace, and Augustus himself.

(History 180)
Examines the confrontation, assimilation, and transformation of Amerindian, African, and European cultures in Latin America from the sixteenth century to the present. Focuses on the processes in which distinctive self-images emerged in the region and how these images have been challenged and changed over time. Uses films, literature, and folk traditions to complement scholarly analyses of the emergence of a New World mentality.

LATAM-276-01 - Latin American Studies - 2004-2005
(Spring) Contemporary Caribbean Societies: Cuba and the Dominican Republic: Revolution and Reaction - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
Third in the ongoing cycle of self-contained examinations of a distinctively regional and cultural subdivision of the Antillean archipelago, which includes The Haitian Condition: Dessalines to Duvalier and Beyond, and Revolution in the West Indies: Trinidad, Jamaica, Guyana, Grenada. This course's special concern will be an exploration of the unfolding patterns of historical, social, and cultural development of society in Cuba and the Dominican Republic into the immediately contemporary period.
Prerequisites: soph, jr, sr, 4 credits in Latin American studies, or permission of instructor
LATAM-277-01 - Latin American Studies - 2004-2005
(Spring) Caribbean Women Writers - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
Comparative examination of contemporary women's writing in the Caribbean. Emphasis will be on their engagement with issues of history, cultural articulation, race, class, gender, and nationality, including exploration of their formal procedures, individual moods, regional particularity, and general impact as writers. Rosario Ferré, Ana Lydia Vega, Julia Alvarez, Edna Broolher, Marryse Conde', Simone Schwartz-Bart, Jean Rhys, Beryl Gilroy, and Rosa Guy are among those whose works we will review.
Prerequisites: soph, jr, sr or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: R. Márquez

LATAM-278-01 - Latin American Studies - 2004-2005
(Fall) The Fiction of History: Historical Truth and Imaginative Invention in the Latin American Novel
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
Examination of the scope, reach, and limits of the Latin American variant of the historical novel as a narrative form. The variety of ways in which it fictionally strives to re-create "certain crisis in the personal destinies of a number of human beings [which] coincide and interweave with the determining context of an historical crisis," the historical vision each writer brings to the work, will be given particular attention.
Prerequisites: soph, jr, sr or permission of the instructor
Instructors: R. Márquez

LATAM-287-01 - Latin American Studies - 2004-2005
(Fall) Topics in Latin American Studies - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Preamble (for topics courses): Designed for students who have had an introduction to Latin America through Latin American Studies 180 or 181 or a course on Latin America in some other discipline (anthropology, history, literature, or politics, for example), this course studies significant problems relating to Latin America in greater depth from the perspectives of appropriate disciplines. Some topics may be cross-listed with other departments.
Prerequisites: jr, sr, 4 credits in Latin American studies
Notes: 2 meetings (75 minutes)

LATAM-288-01 - Latin American Studies - 2004-2005
(Spring) Modern Mexico
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
An analysis of the modern Mexican nation-state organized around three major themes: the conflictive yet symbiotic relationship with the United States, from the war of the 1840s through the North American Free Trade initiative of today; the succession of reformist and revolutionary upheavals in 1810-1821, 1856-1867, 1910-1917, the 1930s, and again today, seeking to resolve both problems of the colonial past and new conflicts traceable to the very reforms generated by earlier political and social struggles; and the meaning of Mexican nationality from different ethnic, gender, and class perspectives. Readings include autobiographical and literary works, historical studies, and films.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: L. Gudmundson
LATAM-289-01 - Latin American Studies - 2004-2005
(Spring) Slavery in the Americas
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(History 289)
A course, organized topically rather than geographically or nationally, that offers a comparative analysis of African American slavery as a dominant social system in Brazil, the Caribbean, and the U.S. South. Topics include: why slavery?; sugar and slavery; historical demography; culture and the law; kinship and family; long-run economic development; patterns of race relations; master class and racist ideologies; resistance to slavery; and abolition and its aftermath. Readings include historical and anthropological studies, as well as a major documentary collection on slavery in Brazil.
Prerequisites: soph, jr, sr, 4 credits in Latin American studies, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: L. Gudmundson

LATAM-373-01 - Latin American Studies - 2004-2005
(Spring) Studies in Comparative Caribbean Culture: Contemporary Caribbean Writers - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
A sustained, comparative study of the developing canon of at least three major contemporary writers from the Caribbean, representing the region's Spanish-, English-, and French-speaking cultural zones. Articulates the evolution, contours, and scope of each author's unique perception of the New World and, especially, the broadly defining features of what Welsh cultural historian Raymond Williams would have called their peculiarly Antillean "structure of feeling."
Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: R. Márquez

LATAM-375-01 - Latin American Studies - 2004-2005
(Spring) Paradigms of New World Thought: Martí, Mariátegui, C.L.R. James
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
This course will be devoted to the evolving work of three commanding figures: José Martí (Cuba, 1853-95), José Carlos Mariátegui (Peru, 1895-1930), and C.L.R. James (Trinidad, 1904-89). Spanning a decisive period in the history of the Americas, they exemplify the diversities, varying regional settings and social contexts, shifting historical and ideological coordinates of a major epoch of transition. Their assessment of a myriad of key issues has made each a touchstone of continuing authority whose influence extends well beyond their particular locale, time, or region. Why this should be so is among the many questions we will address.
Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor
Notes: 2 meetings (75 minutes)

LATAM-386-01 - Latin American Studies - 2004-2005
(Fall) Central America: Reform, Reaction, Revolution - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(History 386f)
This seminar explores the diverse experiences of Central American nations in the twenty-first century. From a common basis in an export-oriented agriculture, social and political alternatives ranging from social democracy to recurrent military rule, neofascist regimes, and revolutionary socialism have emerged in the isthmus. The course uses materials ranging from autobiography and literature to historical and anthropological studies to understand how this came to be. In addition to national cases, we consider the unique experiences of the area's indigenous and Atlantic-coast peoples within and outside the nation-state framework.
Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor
LATAM-387-01 - Latin American Studies - 2004-2005  
(Spring) Special Topics in Latin American Studies - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement  
(History 387fs)
Preamble (for topics courses): This course offers advanced students an opportunity for intensive study of a problem with careful attention to research methods and to presenting their work in oral and written form.  
Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor  
Notes: 1 meeting (2 1/2 hours)
Instructors: L. Gudmundson

LATAM-388-01 - Latin American Studies - 2004-2005  
(Fall) Postmodernism and Latin America
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement  
(History 388)
For many the "discovery" of America opened the modern era. Its closing may also have been foretold in Latin America's confounding of diverse theories of modernization and development in recent times. This seminar will introduce the student to a number of both classic and more recent works on Latin America (in English) that advance along postmodernist lines, ranging from cultural contact and conflict, language, meaning, and power in the sixteenth century, to the invention of national identities in the nineteenth century, to discourses of ethnicity, class, gender, and reason in the twentieth century.  
Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor  
Notes: 1 meeting (2 1/2 hours)
Instructors: L. Gudmundson

LATAM-389-01 - Latin American Studies - 2004-2005  
(Spring) Agrarian America: Sugar, Cotton, Coffee, Wheat - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement  
This course explores the structure and variety of societies generated in North, Central, and South America by four widely distributed export crops. Although not bound by rigid chronology, our focus will be primarily on the period 1750-1950. Principal concerns of the course are variations by time and place in each commodity's technologies, labor systems, farm sizes, and social structure; the political dynamics associated with each type of farming and the problematic features of capitalism in agriculture, or, how and when do peasants become farmers and farming agribusiness? Readings in English on cases drawn from throughout the Americas.  
Notes: Prereq. jr, sr, 8 credits in Latin American studies or related field, or permission of instructor; 1 meeting (2 1/2 hours)

MATH-100-A - Mathematics - 2004-2005  
(Fall) Enriched Calculus IA: Enriched Calculus IA
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
Preamble (for topics courses): This year-long course includes the topics in Math 101, Calculus I. It is intended for students who, based on the results of their precalculus assessment and the agreement of the instructor, need to strengthen their quantitative and algebraic precalculus skills in order to learn calculus.
Features modeling of phenomena in the natural and social sciences. Math 100A: representation and interpretation of data, functions and their graphs, the derivative. Math 100B: integrals and the varied processes that they can represent, accumulation and antidifferentiation, the several forms of the fundamental theorem, additional topics in differential equations with applications.

Prerequisites: permission of instructor. Student may send assessment score and background information to hpollats@mtholyoke.edu. 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: H. Pollatsek
Expected enrollment: 30

MATH-101-01 - Mathematics - 2004-2005
(Fall) Calculus I
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Preamble (for topics courses): Students who have not studied calculus and who have the necessary precalculus background belong in Calculus I. Because some sections of Calculus I differ significantly from traditional high school calculus, it has been our experience that students who "start over," in order to ease the transition into college, initially may have more difficulty in Calculus I than beginners. However, students who take Calculus I expecting and welcoming new ideas have found it rich and rewarding. Please read the "Beginning the Study of Mathematics" section.
This course presents rates of change and their applications, integrals, the fundamental theorem, and modeling of phenomena in the natural and social sciences.
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: R. Nelson

MATH-101-02 - Mathematics - 2004-2005

MATH-103-01 - Mathematics - 2004-2005
(Fall) Accelerated Calculus
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Preamble (for topics courses): Students who have taken calculus in high school but wish to review and strengthen what they have learned before moving on to more advanced topics should consider Accelerated Calculus. This fast-moving course covers material from both Calculus I and Calculus II. Please read the "Beginning the Study of Mathematics" section.

Topics include a review of the techniques and applications of the derivative, introductory methods of integration, the Fundamental Theorem of Calculus, more advanced integration techniques, differential equations, and applications of the integral to various areas, including economics and physics.

Notes: 2 meetings (1 hour, 50 minutes)

MATH-110-01 - Mathematics - 2004-2005
(Fall) Explorations in Algebra
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

High school algebra is essentially the study of the laws that govern the system of numbers we use for ordinary arithmetic. This course focuses on certain of these laws and studies the systems, called "groups," governed by them. Groups have beautiful properties and describe many phenomena: crystallography, graphic art, matrix algebra, counting, nuclear physics, codes, and more. The course studies the group laws and their consequences, as well as many examples of systems satisfying these laws.

MATH-114-01 - Mathematics - 2004-2005
(Spring) Explorations in Number Theory
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Studies basic mathematical structures using as models symmetries of plane figures, the ordinary integers, and other number systems. Using examples to uncover patterns that help reveal and explain relationships. Solving simple equations in these new settings quickly brings students into contact with some intriguing problems being studied by contemporary mathematicians.

(Fall) Explorations in Geometry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Mount Holyoke College Course Information Archive 2000-2016
The system of geometry devised by the ancient Greeks was immutable until the nineteenth century, when it was put in a broader framework better able to accommodate the varied interests of physical science and mathematics. In this course, we study geometry as it developed historically, from the time of Pythagoras to the recent past.

MATH-202-01 - Mathematics - 2004-2005
(Fall) Calculus II
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Preamble (for topics courses): Most students who have taken calculus in high school begin with Calculus II. In particular, if you have studied the derivative and its applications and have been introduced to the definite integral, you will be prepared for Calculus II. Please read the "Beginning the Study of Mathematics" section.
Topics include techniques of integration, applications of integration, differential equations, sequences, series, and Taylor series.
Prerequisites: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: M. Robinson

MATH-202-02 - Mathematics - 2004-2005

MATH-239-01  -  Mathematics - 2004-2005
(Fall) Making Sense of Biological Signals - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Biological Sciences 239f)
How do you analyze sound waves, brain waves, and patterns of nerve impulses? We will record many of these signals ourselves. To interpret the
recordings, we will introduce methods of signal analysis such as Fourier analysis and autocorrelation.
Prerequisites: Calculus M101; enrollment limited to 10
Notes: 1 meeting (2 hours)
Instructors: S. Barry, M. Robinson

MATH-251-01  -  Mathematics - 2004-2005
(Fall) Laboratory in Mathematical Experimentation
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
(Writing-intensive)
Offers mathematics as a laboratory science. After a short introduction to the computer, uses hand and computer computation to explore mathematical
ideas. Directs laboratory projects toward discovery of properties and patterns in mathematical structures. The choice of projects varies from year to
year and is drawn from algebra, analysis, discrete mathematics, geometry, and statistics.
Prerequisites: Any 200-level mathematics course, or permission of instructor
Notes: 2 meetings (2 hours)
Instructors: M. Robinson

MATH-302-01  -  Mathematics - 2004-2005
(Fall) Complex Analysis
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics include differentiation and integration of functions of a complex variable, the Cauchy integral formula, residues, conformal mapping, and applications to physical science and number theory.
Prerequisites: Mathematics 203 or Physics 303
Notes: 2 meetings (90 minutes); offered alternate years at Mount Holyoke and Smith Colleges; offered at Mount Holyoke fall 2004
Instructors: G. Davidoff

MATH-309-01 - Mathematics - 2004-2005
(Spring) Topics in Analysis: Topology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Point-set topology is the study of continuous functions on a space. The course will introduce metric spaces and topological spaces. Basic point-set topological notions are ones like open and closed sets, continuity, compactness, and connectedness. The separation axioms, countability, and completeness will also be covered.
Prerequisites: Mathematics 203, 211
Notes: 2 meetings (90 minutes)
Instructors: J. McLeod

MATH-311-01 - Mathematics - 2004-2005
(Fall) Abstract Algebra
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics include algebraic structures: groups, rings (including some elementary number theory), fields, and vector spaces.
Prerequisites: Mathematics 211 and another 200-level mathematics course
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: H. Pollatsek

MATH-319-01 - Mathematics - 2004-2005
(Fall) Topics in Algebra - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
The study of Lie groups (named for the Norwegian mathematician Sophus Lie) provides rich connections to many parts of mathematics and important applications to physics and chemistry. Topics include symmetry groups, linearization, one parameter subgroups and the exponential map, Lie algebras and adjoint maps, and classical matrix groups.
Prerequisites: Mathematics 211; Mathematics 311 helpful but not necessary
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: H. Pollatsek

MATH-319-01 - Mathematics - 2004-2005
(Spring) Topics: Coding Theory
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course will survey the progress in error-correcting codes to date. Specifically, we will study linear, cyclic, Golay, Reed-Muller, and convolutional codes as well as decoding algorithms for each. We will also consider more recent developments as they pertain to LDPC and turbo codes, situating these in the context of their applications to wireless communication technology. The course will include readings of some of the original works in the theory of error-correcting codes. Founding works by Shannon, Hamming, MacWilliams, and Sloane will be read.
Prerequisites: Mathematics 211; Mathematics 251 (or Mathematics 232)
Notes: 3 meetings (50 minutes), 4th hours (50 minutes)
Instructors: J. McLeod
Expected enrollment: 30

MATH-322-01 - Mathematics - 2004-2005
(Fall) Differential Geometry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics selected from the following: spherical geometry, Euclid's theory of parallels, the development of non-Euclidean geometry; plane curves, curvature, some famous plane curves (cycloids, lemniscates, cardioids, the cissoid of Diocles, the tractrix, etc.); curves in space and their curvature, knots and tubes; surfaces, various types of curvature for surfaces, the theorema egregium and the Gauss-Bonnet theorem; map projections (stereographic, central, Mercator, Lambert's cylindrical projection, azimuthal, etc.).

Medieval Studies

MEDST-101-01 - Medieval Studies - 2004-2005
(Fall) Medieval Culture and Society: Seminar in Reading, Writing, and Reasoning: Picturing the Middle Ages
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar
Preamble (for topics courses): This course offers a foundation for inquiry into medieval culture. Using readings in literature, art, music, history, politics, philosophy, and sciences to interpret the Middle Ages, a student sharpens her awareness of language and imagery as means of communicating experience and improves her skills of attentive reading and persuasive writing. The 101f-102s seminar sequence is designed to be a yearlong course, but students may take one semester without the other.
How did medieval people see themselves? How do we imagine them? Seeking answers to these questions, this course will explore several aspects of medieval culture: social structures, gender issues, tensions between courtliness and erositism, religion, politics, perceptions of the "other," as represented in literature, art, history, and modern films. Works will include the Song of Roland (epic), the Bayeux Tapestry (pictorial relation of the Battle of Hastings in 1066), tales of love and adventure, miracles of the Virgin Mary, illuminated manuscripts, and Gothic monuments such as the cathedral of Notre Dame in Paris. Resources will draw on CD-ROMs and the Web.
Notes: 2 meetings (75 minutes)
Instructors: M. Switten
Expected enrollment: 17

(Fall) Medieval Culture and Society: Seminar in Reading, Writing, and Reasoning: Crossing Medieval Boundaries
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (English 101f(03))
Preamble (for topics courses): This course offers a foundation for inquiry into medieval culture. Using readings in literature, art, music, history, politics, philosophy, and sciences to interpret the Middle Ages, a student sharpens her awareness of language and imagery as means of communicating experience and improves her skills of attentive reading and persuasive writing. The 101f-102s seminar sequence is designed to be a yearlong course, but students may take one semester without the other.
How did medieval people think about themselves and how did they imagine, move in, and represent the physical world? This course explores the various ways medieval culture created and crossed significant boundaries in the areas of art, literature, religion, mathematics, and science. Texts will include medieval maps, travel literature such as Mandeville's Travels, letters of Heloise and Abelard, works of Christine de Pizan, Malory's Morte D'Arthur, manuscript illuminations, and selected material from late medieval theories of love, medicine, astrology, and mathematics.
Notes: 2 meetings (75 minutes)

(Spring) Medieval Culture and Society: Seminar in Reading, Writing, and Reasoning: Europe and the Atlantic World, 1300-1700
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Speaking- and writing-intensive; History 150s)
Preamble (for topics courses): This course offers a foundation for inquiry into medieval culture. Using readings in literature, art, music, history, politics, philosophy, and sciences to interpret the Middle Ages, a student sharpens her awareness of language and imagery as means of communicating experience and improves her skills of attentive reading and persuasive writing. The 101f-102s seminar sequence is designed to be a yearlong course, but students may take one semester without the other.

This course inquires into several dimensions of European society and culture during the transition from principalities and fiefs to early modern states, from feudalism to capitalism, from serfdom to both free and slave labor. Equally important, however, will be comparisons of western Europe with other Atlantic societies of these centuries and examination of consequences for Europeans, Africans, and Americans (north and south) of encounters among them. Using both voices from the period and recent scholarship about early modern Western and Atlantic societies, the course will look critically at the making and remaking of "Western" culture between the Middle Ages and the modern era.

MUSIC-102-01 - Music - 2004-2005
(Spring) Music and Technology
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
It is now possible to record, manipulate, notate, and compose music with a variety of powerful and flexible tools using the personal computer. This course will focus on hands-on experience with various sorts of music software, including recording and editing, mixing, synthesis and midi interfaces, notation, and various instructional programs. In the process of experimenting with these tools and operating on their favorite musical styles, students will learn a good bit of notation, ear training, and rudimentary principles of arrangement and composition. Basic computer literacy (such as comfort with basic editing commands and the concept of keyboard shortcuts) is required.

(Fall) Topics in Music: Music of Heroism, Protest, and Lament during the Second World War
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)
Preamble (for topics courses): This seminar is designed to increase familiarity with and facility in the use of primary materials for musicological and/or theoretical research, as well as in the critical evaluation of published scholarship. Engagement with a shared topic at the outset of the semester provides the context from which each student fashions an independent project. Oral presentations are integral to the course, with a major paper as the final requirement.
This seminar will deal with the context and analysis of musical works written in the period of World War II by composers such as Stravinsky, Bartok, Shostakovich, Copland, Dallapiccola, Messiaen, Strauss, Schoenberg, and Kodaly. The music will cover a range of styles and compositional methods representative of much of the twentieth century, as well as a broad range of responses to the world conflict. In selecting topics for discussion in class and a final project, students may choose between more theoretical or more historical approaches.
Prerequisites: Music 282 and 232 or permission of instructor
Notes: 1 meeting (3 hours)

Philosophy

**PHIL-101-01** - Philosophy - 2004-2005
**(Fall)** Introduction to Philosophy
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

For thousands of years, humankind has grappled with questions concerning such fundamental topics as existence, knowledge, and morality. For example: Does the world exist as we perceive it? What distinguishes right from wrong? Can anything be known with certainty? In this course, we explore these and other perplexing questions through an analysis of classic philosophic texts drawn from the Western intellectual tradition. Works by authors such as Plato, Aristotle, Descartes, Leibniz, Hume, Mill, Kant, Russell, and others will be considered.
Instructors: W. Schonbein

**PHIL-101-01** - Philosophy - 2004-2005
(Spring) Introduction to Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
In this course we will examine such questions as: What makes one's actions right or wrong? What is the "self?" Are our wills free? What can we know with certainty? Through contemporary and historical texts, we trace philosophical approaches to these questions.

PHIL-102-01 - Philosophy - 2004-2005
(Fall) First-Year Seminar
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar
In this course we will examine questions such as: How is the mind related to the body? What is freedom? What should I do for others? Through contemporary and historical texts, we trace philosophical approaches to these questions.
Notes: 2 meetings (75 minutes)
Instructors: S. Mitchell
Expected enrollment: 20

PHIL-102-01 - Philosophy - 2004-2005
(Spring) 1st-Year Seminar - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar (Speaking-intensive)
Alienation - Are you alienated or not? What is the relation between power and alienation? Are you truly free? In this course, we shall explore these questions by examining not only philosophic texts, but also films and novels. Some of the philosophers we shall read include Nietzsche, Foucault, Marx, and DeBeauvoir.
Notes: 2 meetings (75 minutes)
Expected enrollment: 20

PHIL-103-01 - Philosophy - 2004-2005
(Spring) Comparative Introduction to Philosophy
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
A comparative introduction to philosophy, surveying issues in metaphysics, epistemology, ethics, philosophy of religion, and philosophy of mind. We address the following fundamental and universal philosophical questions: Who are we? Where do we come from? Where are we going? What and how do we know? How should we live? Different philosophical traditions have been grappling with these questions since the dawn of civilization. Approximately 50 percent of the readings are philosophical texts taken from outside the Western traditions. Examples include Latina writer Gloria Anzaldua's *Borderlands*, ancient Chinese philosopher Chuang Tzu, and James Baldwin's *The Fire Next Time*.
Notes: 2 meetings (75 minutes)
Instructors: S. Luo
Expected enrollment: 50

PHIL-201-01 - Philosophy - 2004-2005
(Fall) Philosophical Foundations of Western Thought: The Greek Period
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Writing-intensive)
An introduction to ancient Greek philosophy from the pre-Socratic period through to the Hellenistic period. Topics to be discussed include: What is the nature of reality? What kind of life should we live? What is truth, and how can we know it? We will work to understand each philosopher's responses to these questions, but we will also learn to develop our own answers. We will read not only some of the major works of ancient Greek philosophy, but also some literary and historical works of the period.
Notes: 2 meetings (75 minutes)
Instructors: J. Harold

PHIL-202-01 - Philosophy - 2004-2005
(Spring) Philosophical Foundations of Western Thought: The Modern Period
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Investigates the development of Western philosophy in the seventeenth and eighteenth centuries through the writings of Descartes, Locke, Spinoza, Leibniz, Berkeley, Hume, and Kant. Focuses on the impact of modern scientific thought on the philosophical tradition's understanding of the place of the human being in the world. Topics include the nature and extent of human knowledge, the nature of the mind, and the possibility of human freedom.
Notes: 2 meetings (75 minutes)
Instructors: S. Mitchell
Expected enrollment: 50
PHIL-205-01 - Philosophy - 2004-2005
(Fall) Ethics
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Is morality relative to individual preferences? Would you rather be free or happy? Are friends necessary for a good life? Would you rather be a satisfied pig or a dissatisfied student? These questions illustrate some of the issues that will be raised by the ancient and modern ethical philosophers we shall explore in this course, looking at sources as varied as novels, canonical philosophic texts, and even children's stories.
Notes: 2 meetings (75 minutes)
Instructors: J. Inness

PHIL-206-01 - Philosophy - 2004-2005
(Fall) Introduction to the Philosophy of Science - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course provides students with an introduction to philosophy based upon the philosophy of science. Questions to be discussed include: What is the nature of scientific reasoning? What are scientific theories, and how are they tested? How are scientific concepts and explanations used? The social aspects of scientific inquiry will be addressed, as will some feminist criticisms of science. The idea of scientific progress will also be given extended treatment.

PHIL-210-01 - Philosophy - 2004-2005
(Fall) Logical Thought
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course cultivates sound reasoning. Students will learn to see the structure of claims and arguments and to use those structures in developing strong arguments and exposing shoddily ones. We will learn to evaluate arguments on the strength of the reasoning rather than on the force of their associations and buzzwords.
Notes: 3 meetings (50 minutes)
Instructors: W. Schonbein

PHIL-212-01 - Philosophy - 2004-2005
(Fall) Philosophical Foundations of Chinese Thought: The Ancient Period
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Asian Studies 214)
An introduction to Chinese thought in the classical period roughly between 500 and 221 BCE, a time of social and political furor. We will survey different philosophical responses to this upheaval, with an eye to the contemporary relevance of ancient Chinese wisdom. The course format consists of lecture and discussion preceded by extensive reading of primary texts (in translation). No familiarity with Chinese history, philosophy, or language is assumed.
Notes: 2 meetings (75 minutes)
Instructors: S. Luo

PHIL-213-01 - Philosophy - 2004-2005
(Spring) Philosophical Foundations of Chinese Thought: The Post-Classical Period

(Asian Studies 214)
An introduction to Chinese thought in the post-classical period, from the beginning of the Qin dynasty (221 BCE) onward. The focus will be on Neo-Confucianism and Neo-Daoism. Some versions of Buddhism also will be covered, for Neo-Confucianism draws substantially on Buddhist metaphysical conceptions. Asian Studies 214/Philosophy 212 provides helpful background to this course but is not a prerequisite.

PHIL-214-01 - Philosophy - 2004-2005
(January) Philosophical Psychopathology
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): This course is a study of philosophical problems and questions concerning various psychopathologies. The course combines ideas and problems from traditional metaphysics and philosophy of mind with cases and questions from medical ethics.
Questions to be considered include: is there an objective way to decide what is and is not a psychiatric disease? How does alcoholism affect moral responsibility? Are a schizophrenic’s delusions part of her “true self”? What does autism show us about folk psychology and the attribution of belief? How should we compare pharmacological and talk-therapy approaches to treating mental illness? What do depression and anti-social personality disorder tell us about the nature and importance of the emotions? We will primarily read the work of philosophers, but we will also draw on relevant work by psychiatrists, psychologists, and neuroscientists.
Prerequisites: Philosophy 235: Medical Ethics, or permission of instructor
Instructors: J. Harold
Expected enrollment: 50

**PHIL-225-01** - Philosophy - 2004-2005
*(Spring)* Symbolic Logic
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course develops a symbolic system that can be used as the basis for inference in all fields. It will provide syntax and semantics for the language of this system and investigate its adequacy. It provides the basis for all further work in logic or in the philosophical foundations of mathematics. Much of the course has a mathematical flavor, but no knowledge of mathematics is necessary.

*(Fall)* Introduction to the Philosophy of Religion - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
*(Religion 226fs)*
This course begins its survey of the discipline of the philosophy of religion with the work of Augustine. We then proceed to an examination of the classical theistic arguments for knowledge of God's existence (those of Anselm, Aquinas, and Maimonides) that dominated Scholastic thought and consider the criticisms of these approaches by Enlightenment philosophers such as Kant. We trace the rise of experience as the central category of pietism and romanticism in the texts of Schleiermacher and Coleridge and in the poetry of Novalis. Finally, we focus on the pragmatic tradition in American philosophy of religion, especially in the work of William James, Josiah Royce, and Cornel West.

*(Complex Organizations 232s)*

**PHIL-235-01** - Philosophy - 2004-2005
*(Spring)* Medical Ethics
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Modern medicine has raised new and difficult moral and philosophical problems. Topics discussed include: What is the distinction between health and illness? How should limited health care resources be distributed? How are medical problems related to larger social problems (e.g., sex inequality)? What are the responsibilities of medical researchers toward their research subjects? What moral reasons do we have to be concerned about the growth of technology in medicine? Are the basic institutions of medicine and medical education just?

**PHIL-240-01** - Philosophy - 2004-2005
*(Spring)* Environmental Ethics: Nature/Culture/Values - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
A fundamental problem we face as humans is how we should relate to the natural world. Why not turn Yosemite into a parking lot? Is nature to be controlled through applying technological expertise? Or is Thoreau correct in his suggestion that we must immerse ourselves in nature to discover who
we truly are? Might the value of nature extend beyond its utility for humans? Students have the opportunity to explore these questions, challenging widespread assumptions about nature, culture, and values.

PHIL-241-01 - Philosophy - 2004-2005
(Fall) Issues in Contemporary Moral Theory - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Do we need to develop virtues to lead a good life? Is morality founded on freedom or happiness? What does it involve for an individual to be just? What is the relationship between morality and power? This course explores questions and texts relevant to contemporary ethical philosophy. We will examine a number of contemporary texts written by philosophers interested in concepts such as virtue, freedom, justice, and power.
Prerequisites: Philosophy 205 or permission of instructor

PHIL-242-01 - Philosophy - 2004-2005
(Spring) Social and Political Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course is a survey of influential works in the history of political thought, along with some contemporary works. Classical readings will include Plato, Machiavelli, Hobbes, Locke, Rousseau, Hume, Mill, and Marx. Modern authors will likely include Susan Okin, John Rawls, Marilyn Feyer, Jean Hampton, and Allison Jagger. Our central question will be "What gives a government legitimate authority over its citizens?"
Notes: 2 meetings (75 minutes)

Instructors: J. Harold

PHIL-244-01 - Philosophy - 2004-2005
(Spring) Philosophy and Literature - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
An examination of a variety of topics in social and political philosophy, drawing from the historical as well as contemporary sources. Questions to be explored include: What is the nature and scope of political authority? Do citizens have a duty to obey the laws of their state? What duties do we have to oppressed and marginalized groups? How do race, class, gender, and sexual orientation matter to political freedom and authority? How should we balance political liberties against the public good? Attention will also be given to the application of these questions to particular contemporary social and political issues.
Notes: 2 meetings (75 minutes)

Instructors: J. Harold

PHIL-248-01 - Philosophy - 2004-2005
(Spring) Philosophical Issues in Race and Racism
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
An introduction to discussions of "race" within philosophy and related discussions in science, the law, and the arts. Topics to be discussed include: Is "race" real, subjective, or produced by society? How is race relevant to our identities? How does the popular media represent "race?" Does science
construct "race?" What is the connection between "race," gender, and class? Class readings from philosophy and a variety of interdisciplinary texts, including film and literature.

(Fall) Women and Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Do we all dress in drag? Should women strive to be less emotional? Is sexuality socially constructed? Is popular culture harmful to women? This course focuses on philosophy that explores women's understanding of reality. By studying the work of various twentieth-century feminist philosophers as well as films and stories, we shall explore a number of crucial philosophic concerns including truth, the self, and morality. Our aim is to become philosophers ourselves, thinking deeply about issues of fundamental importance to our lives.

(Spring) Philosophical Foundations of Western Thought: The Nineteenth Century - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course explores the ways the nature, possibility, and extent of human freedom were conceptualized by German philosophers in the nineteenth century. Readings are drawn from the work of Hegel, Feuerbach, Marx, and Nietzsche. Specific topics include Hegel's metaphysics of spirit, Feuerbach's critique of religious and philosophical mystification, Marx's analysis of alienation, and Nietzsche's ideal of the "Over-Man."

PHIL-253-01 - Philosophy - 2004-2005
(Fall) Introduction to Asian Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course introduces students to the traditional systems of thought in Asia, concentrating on Hinduism in India; Taoism in China; and Buddhism in China, India, and Japan, with occasional reference to other systems. Secondary and primary texts are read, along with some literature inspired by these philosophies. Cross-cultural explorations - and considerations of gender, caste, and elitism - are encouraged.

PHIL-255-01 - Philosophy - 2004-2005
(Fall) Existentialism
Is life absurd? Do human beings really want to be free? Or do we prefer to sacrifice our freedom for comfort and amusement? Is God dead? Is it possible to live without religious belief? These are among the central questions about human life raised by existential thinkers. We will discuss these issues, and many others, through careful reading of philosophic and literary texts by such important existentialists as Franz Kafka, Martin Heidegger, Jean-Paul Sartre, Albert Camus, Simone de Beauvoir, Franz Fanon, and Samuel Beckett.

PHIL-261-01 - Philosophy - 2004-2005
(Fall) Philosophy of Physics
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Twentieth-century physics is a philosophical goldmine, rich with profound multifaceted challenges to common conceptions of space, time, matter, identity, and causality. Our primary focus will be quantum physics, with some attention given to the special and general theories of relativity, chaos theory, complexity theory, and quantum field theory. We will explore the nature of being and the nature of human understanding through an investigation of theoretical and experimental developments, including recent and surprising laboratory actualizations of canonical thought experiments. This course does not require prior knowledge or skills in physics or mathematics.

PHIL-263-01 - Philosophy - 2004-2005
(Fall) Philosophy of Biology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Biology gives rise to many interesting philosophical questions. For example: How could there be evidence for evolution when we can't predict new species? How could adaptations be intended for some purpose? Are individuals selected by natural selection or could groups be selected too? How does evolution add light on human behavior, if at all? In this course we will consider these issues. Designed to be accessible to those with backgrounds in either philosophy or biology.

PHIL-264-01 - Philosophy - 2004-2005
(Fall) Philosophy of Mind - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
An introduction to the mind/body problem and the way that it shapes our view of ourselves, this course emphasizes work in cognitive science, an interdisciplinary approach that draws together artificial intelligence, neurobiology, linguistics, philosophy, and cognitive psychology. Readings are from these areas and from classical philosophical sources.

PHIL-270-01 - Philosophy - 2004-2005
(Fall) Epistemology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Issues in epistemology (the theory of knowledge) are fundamental to nearly all fields of study. This course uses both historical and contemporary texts to consider traditional questions in the theory of knowledge. Included are the following questions: Can I have knowledge of anything outside of my mind, for example, physical objects or other minds? Can we answer the skeptic's challenge that we are not justified in any of our beliefs? What is knowledge, and how does it differ from belief? Does our knowledge have a foundation or is it unavoidably circular? Is all knowledge derived from experience or is some innate?
In the twentieth century, problems in the philosophy of language have become central to nearly all philosophical concerns. This course addresses key questions: What is truth? What is it for a sentence to have a meaning? Does language determine the way we think? Readings are drawn from Frege, Russell, Wittgenstein, Whorf, Quine, Chomsky, Frye, and others.

Prerequisites: 4 credits in department or permission of instructor
Notes: 2 meetings (75 minutes)

(Spring) Metaphysics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Metaphysics has as its topic a cluster of interconnected issues arising out of the nature of existence, truth, reality, and freedom. Questions such as the following are addressed: What makes an individual the person she or he is? Is human freedom possible in a world in which all actions are caused? How should we decide what exists? Is there a difference between essential and contingent properties of certain things? What is the nature of truth?

Prerequisites: 4 credits in department or permission of instructor

PHIL-275-01 - Philosophy - 2004-2005
(Fall) Philosophy and Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

An exploration of philosophical issues encountered in the study of film. Why do we need a theory of film? What is a film anyway? Do films have "authors"? How do films engage our emotions? Can films be socially critical? What can we learn from films? These are examples of the topics to be discussed in this course as we investigate the nature of film and its relation to philosophy. There will be weekly required film screenings

Prerequisites: 4 credits in department or in film studies, or permission of instructor

(Fall) Philosophy for Children - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Community-based learning course; Speaking-intensive)
When you act bravely, can you be scared? How do you know that you are not dreaming now? If everyone kept telling you that you weren't a person, would you believe them? These are examples of questions raised by children's books, such as *Frog and Toad Together* and *The Bear that Wasn't*. This seminar will discuss whether young children can be taught to philosophize and what the importance of doing so would be. Participants will be required to take part in a community-based learning project of teaching philosophy to elementary school children at the Jackson Street Elementary School in Northampton.

(Spring) Philosophy in Dialogue - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Speaking- and writing-intensive)
Does life have meaning? Is time real? Must art be beautiful? Philosophers have had radically different solutions to these fundamental questions. The aim of this course is for students to develop their own answers to each of these questions through discussion and dialogue. Emphasis on developing oral and written skills. This course is recommended for all sophomores thinking of majoring or minoring in philosophy and is required for the major.

PHIL-306-01 - Philosophy - 2004-2005
(Fall) Feminist Science Studies and Philosophy of Science
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course examines different approaches to understanding the nature of scientific practices. Of central interest will be the diverse accounts offered by feminist and other interdisciplinary approaches to the study of science. We will pay particular attention to notions of evidence, methods, cultural and material constraints, and the heterogeneous nature of laboratory practices. We will consider the ways in which gender, race, and sexuality are constructed by science and how they influence both scientific practices and conceptions of science. We will also examine the feminist commitment to taking social factors into account without forfeiting the notion of objectivity.

Prerequisites: jr, sr, 8 credits in women's studies, or 8 credits in philosophy, or 8 credits in science courses, or permission of instructor

PHIL-310-01 - Philosophy - 2004-2005
(Fall) Twentieth-Century Analytic Philosophy
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
An introduction to the history, themes, and methods of analytic philosophy, the dominant movement in twentieth-century English-speaking philosophy. Analytic philosophy uses logic and a careful analysis of language to solve philosophical problems. We will study most of the major figures of this movement, including Frege, Russell, Carnap, Quine, and Kripke. Topics addressed will include the logic of numerical identity, reference and existence, Quine's criticisms of logical positivism, and the meaning of necessity.

PHIL-315-01 - Philosophy - 2004-2005
(Spring) Topics in Ancient Greek Philosophy: Hellenistic Philosophy: Happiness
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
In this course we will examine the ethical theories of the three main schools of Hellenistic philosophy--Stoicism, Epicureanism, and Skepticism. The central theme of the course is eudaimonia, or happiness--a concept which serves as the starting-point for ancient Greek ethics. We will discuss a number of related issues, such as: What is the relation between virtue and happiness? What is the place of pleasure in the good life? Is knowledge required for happiness--and if so, what kind? And how should one relate to others and to society? We will also consider how the philosophers' views on knowledge, human nature, and god contribute to their ethical theories.

(Fall) Seminar in Philosophy of Language - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This seminar attempts to investigate carefully the broad relationship between language and the world by focusing on issues of realism and idealism: Does language merely attach labels to things (and kinds of things) that exist independently of our thought? Or do we contribute to the construction of the world by developing a conceptual scheme for describing or representing it? The seminar will focus on the work of two pivotal figures in the philosophy of language: Wittgenstein and Chomsky.

*(Fall) Developments in Feminist Philosophy: Rethinking the World: Philosophy of Sex*

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

What makes a body sexy? Is heterosexuality natural? What is "sex?" Feminist philosophy is in the midst of a revolutionary transformation. Rather than remaining content with the task of indicating the shortcomings of the philosophical canon, feminist philosophers are constructing their own distinctively feminist version of philosophy. In this course, we shall explore what contemporary feminist philosophers have written about the nature of sex and sexuality.

*(Spring) Advanced Topics in Feminist Queer Theories and Continental Philosophy*

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Edited) Mount Holyoke College Course Information Archive 2000-2016

Questions of agency, causality, materiality, bodies, subjectivities, and technoscientific and discursive practices have been central to cutting edge thinking in continental philosophy and feminist and queer theories. We will spend much of our time doing close readings from the works of key contemporary theorists, including Michel Foucault, Judith Butler, Giles Deleuze, and Donna Haraway.

(Women's Studies 333s (05))
Questions of power, agency, structure, materiality, bodies, subjectivities, and discursive practices have been central to both feminist and queer theories. In this course, we will focus on these issues, exploring in particular the tensions among poststructuralist, Marxist, and materialist approaches. In analyzing contemporary theories of gender and sexuality, we will pay particular attention to issues of race, class, ethnicity, nationality, and globalization. Key problematics include: the nature and operation of power, the relationship between materiality and discourse, and the relationship between theory and practice.

(Spring) Nineteenth-Century Continental Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
During the nineteenth century, a distinctive mode of philosophizing arose, now known as Continental Philosophy, that placed the issue of human alienation squarely on the philosophic agenda. We will investigate how this topic achieved such importance through careful reading, analysis, and comparison of works by Hegel, Kierkegaard, Feuerbach, Marx, and Nietzsche. We will explore how these philosophers understood the potentials of human life as well as how they saw society limiting them.

PHIL-373-01 - Philosophy - 2004-2005
(Fall) Philosophy of Art - *Not offered this year/term
Preamble (for topics courses): This class examines philosophical issues arising concerning the interpretation, creation, and experience of art. Topics vary from year to year.
The topic of this course will be emotional responses to narrative works of art. Some of the questions we will consider include: Are the emotional responses we experience when reading or viewing fiction genuine emotions, or are they better thought of as quasi-emotions? Do we appreciate fiction through mental simulation? What is the aesthetic and moral significance of emotional responses of fiction? What effect do differences of race and gender have on one's ability or propensity to engage emotionally with fiction?
Prerequisites: 8 credits in department
Expected enrollment: 20

PHIL-373-01 - Philosophy - 2004-2005
(Spring) Philosophy of Art - *Not offered this year/term
Preamble (for topics courses): This class examines philosophical issues arising concerning the interpretation, creation, and experience of art. Topics vary from year to year.
Spring 2005: An examination of what philosophers find significant in specific art forms, such as film, contemporary painting, and classical music. We will focus in depth on the writings of such philosophers as Stanley Cavell, Arthur Danto, and Kendall Walton. Interest in a particular artform as well as some philosophical background would be useful.

PE-453-01 - Physical Education and Athletics - 2004-2005
(Fall) Advanced Boarder Flat and Jumping
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Develops the art of communicating with the horse for improved harmony through effective use of legs, seat, and hands in dressage and when jumping. Must have use of your own horse.
Prerequisites: must be at Physical Education 451 level and able to jump 3'-3'6" course of fences
Notes: 2 meetings (50 minutes); fee course
Instructors: C. Law
Expected enrollment: 20

**PHYED-262-01** - Physical Education and Athletics (Academic Credit) - 2004-2005
(February) Issues and Trends in Sport Management

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

The purpose of this course is to expose the student to some critical areas of the sport industry. This begins with defining the multidimensional field of sport management and a discussion related to sport sociology. The topics covered include the industry including professional, collegiate and recreational sports; application of sport law; sport finance and economics; principles of sport marketing and concepts related to and the application of event management. The focus will be on applying these various concepts and the associated theories to contexts within Sport and Exercise Management.

Notes: Meeting January 10-14, 12-2:30 pm. No PE credit. No text required but we will have course handouts, videos and require detailed course notes.

**PHYS-102-01** - Physics - 2004-2005
(Spring) Galileo - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

First-year seminar

The life and work of Galileo will be explored both historically and scientifically, including much from his own writings. Classical background, contemporary controversies, and repercussions down to the present time will be included as time permits. Laboratory exercises will follow Galileo's own investigations, including such topics as vibrating strings, buoyancy, optics, astronomy, clocks, scaling laws in biology, motion, and the principle of relativity.

Notes: 2 meetings (75 minutes), 1 lab (3 hours); This is a first-year seminar

PHYS-125-01 - Physics - 2004-2005
(Fall) Introduction to Robotics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

This course will provide the student with a hands-on introduction to robotics. Via an intensive lab component, the course will introduce and apply concepts in programming, electronics, and mechanical design. Much of the course will focus on a final design project wherein students will be challenged to design, prototype, and build a functional robot whose application is directed at assisting a disabled person. Lectures will introduce lab material, as well as topics in applied robotics, biomechanics, and issues of machine-human interaction.

Notes: 2 lectures (50 minutes), 1 lab (4 hours)
Instructors: P. Dobosh

PHYS-202-01 - Physics - 2004-2005
(January) Programming in LabVIEW: An Introduction
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

LabVIEW has become a de-facto standard software package. It allows rapid development of complex measurement applications and has been applied in a variety of different fields, including engineering, physics, and biology. This course introduces key concepts of LabVIEW programming such as virtual instruments (VIs) and sub-VIs, program flow, and controls. We will design several VIs with a focus on the applications of interest for the students in this course. Particular emphasis will be put on good programming techniques. After completing this course, students will be able to read and understand existing code, design and implement their own measurement environment, and avoid ‘spaghetti code’

Prerequisites: A formal knowledge of traditional programming languages is not necessary because the source code is a graphic representation of the experiment.

Notes: Meetings will be held January 10 - 21, 2005. Daily meetings will include one hour of lecture and four hours of lab work
Instructors: D. Lueerssen

PHYS-204-01 - Physics - 2004-2005
(Spring) Phenomena of Physics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

Applies fundamental principles to selected topics chosen for their close relationship to other fields of study. Topics chosen from thermodynamics, electromagnetism, fluid mechanics, properties of materials, wave phenomena and optics, nuclear structure, and radioactivity.

Prerequisites: Physics 103 or 115
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes), 1 lab (3 hours)
Instructors: C. Sutton

PHYS-216-01 - Physics - 2004-2005
(Fall) Waves and Electromagnetism
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

Topics include: electromagnetism, emphasizing fields and energy; electrostatics; electric circuits; magnetism; induction; and electromagnetic radiation. Introduces both mechanical and electromagnetic wave phenomena. Additional topics chosen according to the interests of the class and instructor.

Prerequisites: Physics 115, Mathematics 202 or concurrent enrollment
Notes: 4 meetings (50 minutes), 1 lab (3 hours)
Instructors: J. Hudgings

PHYS-300-01 - Physics - 2004-2005
(Fall) Five College Advanced Laboratory - *Not offered this year/term
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Advanced experimental modules in one or more of the areas of optics, atomic physics, nuclear physics, particle physics, statistical physics, and condensed-matter physics. Students may choose experiments from among those available. Credit is based on the number of modules completed, up to a maximum of 4 credits per semester and 8 credits total. The number of meetings depends on the module; modules are completed within one month.
Prerequisites: Physics 301 or 308 and permission of instructor
Instructors: C. Sutton

PHYS-301-01 - Physics - 2004-2005
(Fall) Waves and Particles
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
A comprehensive treatment of wave phenomena, particularly light, leading to an introductory study of quantum mechanics. Topics include wave propagation, polarization, interference and interferometry, diffraction, X-ray and electron diffraction, the wave nature of particles, the uncertainty principle, and Schroedinger's equation in one dimension.
Prerequisites: Physics 216, 303, or concurrent enrollment
Notes: 3 meetings (50 minutes), 1 lab (3 hours)
Instructors: C. Sutton
Section Instructors: 01 LAB C Sutton | 02 LAB C Sutton |
Expected enrollment: 25

PHYS-302-01 - Physics - 2004-2005
(Spring) Quantum Mechanical Phenomena
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
The application of quantum mechanics to selected systems. The hydrogen atom and multi-electron atoms are studied in depth, with emphasis on angular momentum, electron spin, and the Pauli exclusion principle. Principles developed are then applied to other systems, such as molecules, Bose and Fermi gases, condensed matter, nuclei and elementary particles, chosen according to the interests of the class and the instructor.

Prerequisites: Physics 301
Notes: 3 meetings (50 minutes), 1 lab (3 hours)
Instructors: J. Hudjing
Section Instructors: 01 LAB |
Expected enrollment: 25

PHYS-303-01 - Physics - 2004-2005
(Fall) Introduction to Mathematical Methods for Scientists
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Topics include infinite series, complex numbers, partial differentiation, multiple integration, selected topics in linear algebra and vector analysis, ordinary differential equations, and Fourier series.
Prerequisites: Physics 216 or concurrent enrollment
Notes: 4 meetings (50 minutes)
Instructors: J. Hudgings
Expected enrollment: 25

PHYS-308-01 - Physics - 2004-2005
(Fall) Electronics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is a study of electrical circuits and components with emphasis on the underlying physical principles; solid-state active devices with applications to simple systems such as linear amplifiers; feedback-controlled instrumentation; and analog and digital computing devices.
Prerequisites: Physics 216
Notes: 3 meetings (50 minutes), 1 lab (3 hours)
Instructors: H. Nicholson
Section Instructors: 01 LAB H Nicholson | 02 LAB H Nicholson |
Expected enrollment: 12

PHYS-315-01 - Physics - 2004-2005
(Spring) Analytical Mechanics
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Newton's great innovation was the description of the world by differential equations, the beginning of physics as we know it. This course studies Newtonian mechanics for a point particle in 1, 2, and 3 dimensions, systems of particles, rigid bodies, and the Lagrangian and Hamiltonian formulations.
Prerequisites: Physics 303
Notes: 4 meetings (50 minutes)
Instructors: H. Nicholson
Expected enrollment: 25

PHYS-324-01 - Physics - 2004-2005
(Spring) Methods of Applied Mathematics
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Mathematics 324s)
This course is an introduction to theories and techniques important to applied mathematics, such as special functions, calculus of variations, theory of functions of a complex variable, the algebra of vector spaces, solution of partial differential equations, Green's functions, integral transform methods, and probability and statistics. Topics selected according to class interests.
Prerequisites: Physics 216, 303
Notes: 3 meetings (50 minutes)
Instructors: S. Tewari
Expected enrollment: 25

PHYS-325-01 - Physics - 2004-2005
(Fall) Electromagnetic Theory
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course presents the development of mathematical descriptions of electric and magnetic fields; study of interactions of fields with matter in static and dynamic situations; mathematical description of waves; and development of Maxwell's equations with a few applications to the reflection and refraction of light and microwave cavities.
Prerequisites: Physics 301, 315, or 324
Notes: 4 meetings (50 minutes)
Instructors: C. Sutton
Expected enrollment: 25

**PHYS-326-01** - Physics - 2004-2005
(Fall) **Statistical Physics and Condensed Matter**

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

Topics include: the development of the general problem of many-particle systems and the laws of thermodynamics from fundamental quantum and probability concepts; applications to ideal gases, paramagnetism, and black-body radiation; and an introduction to the physics of the solid state, including crystal structure, free electron and band theory of metals, lattice vibrations, and specific heats of solids.

Prerequisites: Physics 301

Notes: 3 meetings (50 minutes); one or both of Physics 326 and 336 will normally be offered each year, depending on the needs and interests of the students.

Instructors: S. Tewari

Expected enrollment: 25

POLIT-101-01 - Politics - 2004-2005
(Fall) Fundamentals of Politics: Concepts and Controversies - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Writing-intensive)
This course examines three contrasting conceptions of freedom and of what threatens or denies or enhances freedom, in light of selective controversies in American politics and society. We explore concepts related to "freedom," such as "community," "equality," and "the common good"; and we acquaint ourselves with competing political perspectives on contemporary America. We also consider some pressing issues, such as the role of government and the future of public goods; the social limits to economic growth; the character and ramifications of economic inequality; racial, ethnic, and gender discrimination; and affirmative action.
Notes: 2 meetings (75 minutes); conducted in small sections, with students submitting short essays throughout the semester
Instructors: S. Ellenburg

POLIT-104-01 - Politics - 2004-2005
(Fall) American Politics
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Offers an overview of the American political system and the theories of those who celebrate it and criticize it. Focuses on the institutions of American politics, including the Constitution, the presidency, Congress, the courts, parties and elections, interest groups, and movements seeking political change. Also includes a theoretical focus: a critical examination of the notions of liberalism, pluralism, and democracy that inform the practice of American politics.

(Fall) Confessions, Novels, and Notebooks: The Self and Political Thought - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
First-year seminar (Writing-intensive)
What is the relationship between personal experience and political theory? How do political thinkers grasp and articulate the connections between self and political order? Our first-year seminar will probe the links between heart and mind in political philosophy by exploring the lives and writings of three illustrative figures who together span the history of political thought. This coming year those figures will be Saint Augustine, Jean-Jacques Rousseau, and Simone de Beauvoir.
Notes: 2 meetings; This is a first-year seminar
Instructors: J. Cocks

(Fall) Speaking and Arguing: The Rhetoric of Peace and War - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)
The art and mechanics of persuading a polity to support either war or peace through oral argument. How speeches frame issues, mobilize public opinion, and persuade individuals to support or resist decisions to go to war. Students will be expected to deliver speeches, lead discussions, and critique their own and others' presentations.

*(Fall) Democracy and Democratization*  
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement  
Over the last three decades, elected governments have replaced authoritarian regimes in dozens of countries around the world. These new regimes, however, have not always closely matched widely held expectations of democracies. In the first half of the course, we will study what leads to democratic transitions. In the second half, we will turn to the circumstances that are thought to shape the quality of democracies. Throughout the course, we will consider and evaluate the various methods that political scientists use to study these topics.

**POLIT-335-01 - Politics - 2004-2005**
**(Spring) Contemporary Political Engagement**
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Citizen participation in politics is fundamental to democracy. Interest and engagement in politics, however, is quite low in the United States: national elections typically draw at most half of voting-age citizens to the polls. Although higher in other established democracies, political engagement has
been falling nearly everywhere in recent decades. In this seminar, we will examine the theories and evidence offered to explain the differences in political engagement across countries and over time. We will also explore the consequences of variation in participation for democratic government and ask whether participation is different under authoritarianism and in new democracies.

(Spring) Memories of Overdevelopment - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

On unsettling features of modern and late modern society. These include the preeminence of the city over the country, the pursuit of infinite economic growth, the restless transformation of the landscape, the anonymity of power, the unmooring of the individual, the triumph of a culture of commodity fetishism, and the erosion of public space. We assess critical theories of the modern age as well as practical efforts to change its course.

(Fall) The American Regime
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Examines the profound political, economic, and religious changes that took place in the nineteenth century. Specifically, this course explores anxieties about freedom, equality, and reason by focusing on everyday roles and practices that exist (at least partially) outside of political authority. In the American tradition, an individual is not only a citizen. At different times and in different circumstances, an individual will be a child, parent, spouse, worker, and subject of God. In examining these roles, we will draw upon both American political thought and those questions of race, gender, and class that expand upon or challenge these fundamental ideals.

POLIT-367-01 - Politics - 2004-2005
(Spring) Decision Making
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
On decision making, and the pathologies of decision making, in American politics. When, and to what extent, can we say that a particular policy decision is the result of rational choice, institutional processes, pluralistic pressures, or other forces? When are individual or collective decisions likely to be marred by "groupthink," selective attention, or self-deception? To what extent, if at all, may collective decisions be considered rational or moral? When are challenges to authority, or to dominant opinion, likely to make a difference?
Prerequisites: Politics 104, 245, 246, or permission of instructor, 2 meetings (75 minutes)
Instructors: C. Pyle

(Fall) Developmental Psychology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Examines changes in cognitive, social, and emotional functioning, including theory and research that illuminate some central issues in characterizing these changes: the relative contributions of nature and nurture, the influence of the context on development, continuity versus discontinuity in development, and the concept of stage. Includes observations at the Gorse Child Study Center.
Prerequisites: Psychology 100 or 110
Notes: 2 meetings (75 minutes) plus mandatory fourth hour
Instructors: R. Shilkret

PSYCH-230-01 - Psychology - 2004-2005
(Spring) Developmental Psychology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Examines changes in cognitive, social, and emotional functioning, including theory and research that illuminate some central issues in characterizing these changes: the relative contributions of nature and nurture, the influence of the context on development, continuity versus discontinuity in development, and the concept of stage. PSYCH-233-01 - Psychology - 2004-2005
(Fall) Educational Psychology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Community-based learning course; Education 233f)
What do we learn? How do we learn? Why do we learn? In this course, we will study issues of learning, teaching, and motivation that are central to educational psychology. We will explore the shifting paradigms within educational psychology, multiple subject matter areas, (dis)continuities between classroom and home cultures, students' prior experiences, teachers as learners, ethnic and gender identity in the classroom, and learning in out-of-school settings. Requires a prepracticum in a community-based setting.
Prerequisites: Psychology 100 or 110
Notes: 2 meetings (75 minutes), 4th hour, and prepracticum (2-hour block per week)
Instructors: B. Packard

PSYCH-233-01 - Psychology - 2004-2005

PSYCH-234-01 - Psychology - 2004-2005
(Spring) Differences in Learning
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Education 234f)
Instructors: L. Carlisle

PSYCH-236-01 - Psychology - 2004-2005
(Fall) Adolescent Development
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course offers a comprehensive introduction to human development during adolescence. It considers historical and cultural forces that contribute to adolescence as a distinct segment of the life span. Contemporary problems confronting adolescents—such as crime, violence, gender, race, eating disorders, substance abuse, and depression—are also examined.

Prerequisites: Psychology 100 or 110

Notes: 2 meetings (75 minutes)

Instructors: S. Wendt

**PSYCH-240-01** - Psychology - 2004-2005

*(Spring) Visual and Auditory Perception*

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Why does the moon on the horizon appear so much bigger than when it is overhead, even though its distance from Earth is always the same? Why can't some people distinguish red socks from green ones? How do Magic Eye pictures work? This course examines physiological and psychological approaches to the study of visual illusions, color vision, depth perception, and many other perceptual phenomena. Although the emphasis is on vision, hearing and touch will also be covered.

Prerequisites: Psychology 100 or 110

Notes: 2 meetings (75 minutes)

Instructors: J. Cohen

**PSYCH-241-01** - Psychology - 2004-2005

*(Spring) Cognitive Psychology - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Cognition encompasses a range of phenomena that define our mental lives. This course considers empirical investigations and theoretical accounts of cognitive issues, including learning and memory, creativity and problem solving, decision making, attention, consciousness, and language.

Prerequisites: Psychology 100 or 110 or permission of instructor

Notes: 3 meetings (50 minutes)

Instructors: K. Binder

**PSYCH-242-01** - Psychology - 2004-2005

*(Spring) Introduction to Artificial Intelligence*

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Artificial Intelligence (AI) is a research discipline that strives to understand and emulate intelligence by attempting to devise computational models that exhibit intelligent behaviors. In this course we will present typical AI issues, explore them in class discussions, and examine computational models that attempt to address them. Specific topics include: a brief history of AI, AI approaches to modeling and research, and computer models of knowledge, reason, perception, natural language understanding, and learning. (There will be no programming required in this course.)

Prerequisites: Psych 100 or 110 or Per I.

Notes: 2 meetings (75 minutes)

Instructors: C. Fennema Jr.

**PSYCH-250-01** - Psychology - 2004-2005

*(Fall) Introduction to the Biological Bases of Behavior*

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Neuroscience and Behavior 250f)

This course is an introduction to and survey of the biological bases of behavior, including physiological, biochemical, and neurophysiological determinants of sensation, motor control, sleep, eating and drinking, learning and memory, language, and mental disorders.

Prerequisites: Psychology 100 and 4 credits in biological sciences

Notes: 3 meetings (50 minutes)

Instructors: W. Millard

**PSYCH-251-01** - Psychology - 2004-2005

*(Fall) Comparative Psychology*

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Speaking- and writing-intensive)

Examines the development, causal mechanisms, evolutionary history, and function of the behavior of animals. Topics include sensory capacities, predator evasion, reproduction, parental care, social behavior, and learning.

Prerequisites: Prereq. Psychology 100 or 110

Notes: 1 meeting (3 hours)
Instructors: K. Hollis

**PSYCH-295-01** - Psychology - 2004-2005

*(Fall)* Independent Study

Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.

Independent study programs are arranged with individual faculty members in the department.

Prerequisites: permission of instructor

Instructors: The department.

**PSYCH-295-01** - Psychology - 2004-2005

*(January)* Independent Study

Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.

Independent research projects are arranged with individual faculty members in the department.

Prerequisites: permission of instructor

Instructors: The department.

**PSYCH-295-01** - Psychology - 2004-2005

Prerequisites: permission of instructor

Instructors: The department.

**PSYCH-300-01** - Psychology - 2004-2005

*(Spring)* Seminar in History and Systems of Psychology: Controversies in Psychology

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

*(Speaking- and writing-intensive)*

A seminar designed to give advanced psychology and neuroscience students a broad conceptual and historical overview of their discipline through an analysis of its enduring disputes. Each week we will read and analyze primary source materials (both historical and contemporary) on several sides of a major controversy, such as: Are there racial differences in intelligence? Is madness rooted in faulty biology? Do women's brains differ from men's? Is violence innate or learned? Each student will write a major research paper on an additional controversy not discussed in class. Heavy reading load; frequent written and oral assignments.

Prerequisites: Psychology 100, 200, 201, plus 8 additional credits in the department. Preference given to senior psychology and neuroscience majors

Notes: 1 meeting (3 hours). During advising week students must submit a written list of psychology, philosophy, and sociology courses taken at MHC or elsewhere.

Instructors: G. Hornstein

Expected enrollment: 20

**PSYCH-310-01** - Psychology - 2004-2005

*(Fall)* Laboratory: Research Methods in Social Psychology

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

*(Speaking-intensive)*

This course is an introduction to laboratory and field methods in social psychology: methodology, data analysis, ethical problems, statistical inference, and research design. All students are expected to design and conduct a research project.

Prerequisites: Psychology 200 and permission of instructor. Students must schedule an interview with the instructor during advising week

Notes: 1 meeting (2 hours) plus fourth hour

Instructors: F. Deutsch

Expected enrollment: 12

**PSYCH-319-01** - Psychology - 2004-2005

*(Fall)* Seminar in Social Psychology: Death and Bereavement

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

*(Speaking-intensive)*

This course explores the significance of death and bereavement in the context of family. Special consideration will be given to the major tasks of grieving for children and adults. Objectives of the course will be met through readings, lectures, video, music, introspection and discussion.

Prerequisites: jr., sr.

Notes: 2 meetings (75 minutes)
Instructors: J. Hare
Expected enrollment: 15

**PSYCH-319-01** - Psychology - 2004-2005
*(Spring) Seminar in Social Psychology: Gender and Domestic Labor*
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Women's Studies 333s(05))
This course examines social psychology and sociological theories and research addressing why women do more housework and child care than men. It pays special attention to the situation of dual-earner families and considers class and ethnic differences on the nature of this inequality and the barriers to full equality at home.
Prerequisites: permission of instructor. Students must meet with instructor during advising week to get permission to enter the course.
Notes: 1 meeting (2 hours)
Instructors: F. Deutsch
Expected enrollment: 15

**PSYCH-319-02** - Psychology - 2004-2005
*(Fall) Seminar in Social Psychology: Interpersonal Relationships and Health*
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Interpersonal relationships have a profound impact on our psychological and physical health. This seminar is designed to take a close look at a variety of interpersonal relationships and their health effects. Relationships to be considered include caretaker/child, friendships, romantic partnerships, and patient/healthcare provider. We will explore how relational skills develop, what constitutes healthful and unhealthful relationships, and how relationships impact our psychological and physical wellbeing. A combination of learning activities will be utilized including discussions, case study exercises, and writing assignments.
Prerequisites: permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: S. Wendt
Expected enrollment: 15

**PSYCH-320-01** - Psychology - 2004-2005
*(Spring) Concepts of Abnormality*
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course is a study of how maladaptive patterns of thought and action are understood from a psychological viewpoint. Behaviors ranging from neurotic to psychotic are studied in terms of underlying character structure and origins in childhood experience. Competing psychoanalytic theories are brought to bear on these phenomena.
Prerequisites: jr, sr (permission required for exceptions), two prior psychology courses, Psychology 230 recommended
Notes: 2 meetings (75 minutes)
Instructors: R. Shilkret

**PSYCH-322-01** - Psychology - 2004-2005
*(Fall) Psychoanalytic Psychology - *Not offered this year/term*
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This extensive examination of Freud's systematic psychology focuses on such phenomena as the effects of early experience, continuity and change in development, and similarities among and differences between individuals. Readings include selections from Sigmund Freud's earlier work and from the sweeping revisions of the 1920s. Criticisms and revisions of Freud are discussed. Throughout, ideas from contemporary psychoanalysis are compared and contrasted with those of Freud.
Prerequisites: Psychology 230, 220 recommended
Notes: 2 meetings (75 minutes)
Instructors: R. Shilkret

**PSYCH-323-01** - Psychology - 2004-2005
*(Spring) Laboratory in Personality Research: Qualitative Methods - *Not offered this year/term*
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This laboratory course focuses on the study of individual lives and explores interviewing as a qualitative research strategy for the understanding of human experience. The course aims to provide a forum to discuss the study of individual lives within the social sciences, to consider interviewing techniques and qualitative methods of data analysis, and to provide students the opportunity to conduct a study of their own using this methodology.
Prerequisites: Psychology 200, 201, 220, and permission of instructor.
Notes: 1 meeting (3 hours)
Instructors: The department
Expected enrollment: 15
PSYCH-324-01 - Psychology - 2004-2005
(Spring) Laboratory in Personality Research: Quantitative Methods - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Personality-relevant constructs, such as attachment, adjustment, achievement motivation, communality, dominance, sociality, and others, are usually studied among adults using questionnaires and inventories. A single large class research project will be conducted, with all students participating in all phases of the research.
Prerequisites: Psychology 200 and 201, and either Psychology 210 or 230 and permission of instructor; an essay (due during advising week) explaining why you want to take the course is required
Notes: 2 meetings (75 minutes)
Instructors: R. Shilkret
Expected enrollment: 15

PSYCH-325-01 - Psychology - 2004-2005
(Spring) Laboratory in Psychological Assessment
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Historical development, theoretical bases, and critical evaluation of tests used to describe adult cognitive and personality functioning. Supervised practicum in test administration, scoring, and interpretation.
Prerequisites: Psychology 200 and 201, either Psychology 230 or 320, and permission of instructor
Notes: 1 meeting (3 hours); students MUST submit a statement and schedule an interview with the instructor during the advising week. There will be a schedule posted on the professor's door, and students should submit the statement a day before they schedule the appointment.
Instructors: R. Shilkret
Expected enrollment: 12

PSYCH-329-01 - Psychology - 2004-2005
(Fall) Seminar in Personality and Abnormal Psychology: First-Person Narratives of Madness
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)
Psychologists have typically conceptualized "mental illness" in terms of the symptoms and diagnoses proposed by psychiatrists in DSM. These categories, while perhaps useful for prescribing medication, do little to help us understand the subjective experience of mental distress. In this seminar, we analyze patient narratives across a range of genres (autobiography, theory, fiction, oral testimony, poetry, art) to gain insight into patients' own conceptions of the causes, nature, and appropriate response to mental suffering of many kinds.
Prerequisites: Psychology 100, 8 credits in the department. Students with a background in literature particularly welcome
Notes: 1 meeting (3 hours)
Instructors: G. Hornstein
Expected enrollment: 20

PSYCH-330-01 - Psychology - 2004-2005
(Fall) Lab in Developmental Psychology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course is a study of research methods in developmental psychology, focusing on observational, survey, and interview techniques for studying young children, adolescents, and adults. It encourages the student to think about the basic issues of developmental psychology research: the conceptualization of problems, design of research, choice of methods to be used, and ethical questions that might arise. Students complete a major research project.
Prerequisites: Psychology 200, 201, 230
Notes: 2 meetings (75 minutes)
Instructors: S. Burggraf
Expected enrollment: 12

PSYCH-330-01 - Psychology - 2004-2005
(Spring) Lab in Developmental Psychology: Adolescent Development in Community Settings
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

PSYCH-331-01 - Psychology - 2004-2005
(Fall) Lab in Early Social and Personality Development
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
In the role of a participant-observer, each student studies intensively the social and personality development of the children in one classroom at the Gorse Child Study Center. Students learn how to articulate developmental changes and individual differences by analyzing detailed observations. Topics include social cognition, peer relationships, social skills, concepts of friendship, emotional development, identity formation, self-esteem, and the social and cultural context of development.
Prerequisites: Psychology 200, 201, and 230 or permission of instructor
Notes: 1 meeting (2 hours), 2 labs (3 hours each) at Gorse Child Study Center
Instructors: P. Ramsey
Expected enrollment: 18

PSYCH-331-01 - Psychology - 2004-2005

PSYCH-337-01 - Psychology - 2004-2005
(Fall) Seminar in Educational Psychology: Motivation
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Community-based learning course; Speaking-intensive)
What influences our desire to learn, to participate in certain activities, or to become particular kinds of people? We will examine the topic of "motivation" using several perspectives, across age levels and in various settings. Drawing from a variety of resources, including autobiographies, research studies, and videos, we will target our own motivation through reflection and action and the motivation of others through active coaching and mentoring in a community-based setting.
Prerequisites: Psychology 233 or permission of instructor. Students need to submit an application form during advising week. Forms are available in the department office.
Notes: 1 meeting (3 hours); requires a field component in a community-based site (at least a 2-hour block per week)
Instructors: B. Packard
Expected enrollment: 15

PSYCH-339-01 - Psychology - 2004-2005
(Spring) Seminar in Developmental Psychology: First Love: Attachment Theory and Research - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
The relationship with the infant's primary caretaker, usually the mother, develops in a complex way during the first year after birth. We will study what is now known about this relationship, how we know about its importance to the infant, and the variation in types of such relationships early in life. The importance of this first love for later development, in childhood, adolescence, and adult life will be considered. Methods of research will be emphasized and students will be expected to give class presentations.
Prerequisites: jr, sr, Psychology 200, 230 and permission of instructor; written statement to Professor Shilkret during advising week required
Notes: 1 meeting (3 hours)
Instructors: R. Shilkret
Expected enrollment: 12

PSYCH-339-02 - Psychology - 2004-2005
(Spring) Seminar in Developmental Psychology: Topic to be announced - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Prerequisites: Psychology 230, 250, and permission of instructor
Notes: 1 meeting (3 hours)
Instructors: The department
Expected enrollment: 15

PSYCH-340-01 - Psychology - 2004-2005
(Fall) Laboratory in Perception and Cognition: Cognition and Literacy
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Adult illiteracy in the U.S. presents an ever-growing challenge. To understand this problem, we will learn various theories of reading. However, since many models of reading are based on data gathered from children, we will also examine how the cognitive abilities of adults are different from those of children. A large component of this class concerns learning the lab techniques associated with assessing reading abilities. In addition, since this is a community-based learning course, each student will become a tutor for an adult enrolled in an area literacy program.

**Prerequisites:** Psychology 100, 201, 200 and permission of instructor

**Notes:** 1 meeting (3 hours) plus 3 hours per week as a literacy tutor in Springfield

**Instructors:** K. Binder

**Expected enrollment:** 15

**PSYCH-340-01** - Psychology - 2004-2005

*(Spring) Laboratory in Perception and Cognition: Cognition and Literacy*

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

*Community-based learning course; Writing-intensive*

In this seminar we will explore various genetic syndromes, developmental disabilities, and brain damage cases that produce asymmetric cognitive profiles. We will examine the cognitive strengths and weaknesses associated with various syndromes and disabilities in order to gain a greater understanding of the syndrome itself, but we will also explore how these cases inform us about learning, memory, and development in "normal" individuals.

**Prerequisites:** Psychology 100 or 110, Psychology 200 and 201, and permission of instructor

**Notes:** 1 meeting (2 hours 15 minutes)

**Instructors:** K. Binder

**Expected enrollment:** 12

**PSYCH-349-01** - Psychology - 2004-2005

*(Fall) Seminar in Perception and Cognition - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

*(Speaking-intensive)*

This laboratory provides intensive study and discussion of specific topics in behavioral neuroscience, including psychopharmacology, neuroanatomy, electronics, and surgery. Examination of methods and experimentation in the laboratory.

**Prerequisites:** Psychology 200, 250, and permission of instructor; pre-enrolled seniors and majors have priority. Students must meet with the instructor during advising week to get permission to enter the course.

**Notes:** 2 meetings (2 hours)

**Instructors:** W. Millard

**Expected enrollment:** 12

**PSYCH-350-01** - Psychology - 2004-2005

*(Spring) Laboratory in Behavioral Neuroscience*

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Several projects within such areas as feeding, aggression, reproduction, and learning are researched by students working in small groups. The course stresses the acquisition of research skills required for naturalistic and laboratory observation in the study of animal learning and behavior.

**Prerequisites:** Psychology 200. Preference given to senior Psychology and Neuroscience majors.

**Notes:** 1 meeting (2 hours 15 minutes) plus 4th hour. During advising week students must submit a written list of psychology and biology courses taken at MHC or elsewhere, along with their name and year of graduation.

**Instructors:** K. Hollis

**Expected enrollment:** 15

**PSYCH-351-01** - Psychology - 2004-2005

*(Spring) Laboratory in Sensory Psychology - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This laboratory course offers a detailed examination of selected topics in vision research, emphasizing the interrelations of anatomical, physiological, and behavioral data. Laboratory demonstrations and experiments introduce behavioral methods of study of sensory systems. Principles of function generally applicable to all sensory systems are discussed.

Prerequisites: Psychology 200, 240 or 250 and permission of instructor. Students must meet with the instructor during advising week to get permission to enter the course.

Notes: 2 meetings (50 minutes) and 1 lab (3 hours)

Instructors: J. Cohen

Expected enrollment: 10

**(Fall) Seminar: Biological Bases of Behavior: How Experience and Brain Plasticity Shape Cognitive and Social Development**

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

What is the function of the brain's visual areas in people who are born blind? How does the brain change when we learn a new skill? How does early auditory deprivation affect the development of language? What changes occur in the brains of people who have a limb amputated and experience a phantom limb? Can knowledge of brain plasticity lead to treatments for cognitive disorders such as dyslexia or ameliorate the effects of traumatic stress during early childhood? Are there critical periods for normal cognitive and social-emotional development? This seminar will consider these and other questions as we explore studies of behavioral and brain plasticity and their potential applications.

Prerequisites: Psychology 240 or 250 or Biological Sciences 333 or permission of instructor

Notes: 2 meetings (50 minutes) and 1 lab (3 hours)

Instructors: J. Cohen

Expected enrollment: 12

**(Spring) Seminar: Biological Bases of Behavior: Of Madness and Molecules: Seminar in Neuropsychopharmacology**

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Charpentier, a French scientist of the 1940s, unwittingly discovered a chemical that was to alter dramatically our understanding of madness. The chemical, chlorpromazine, has been widely used for the treatment of psychosis. Of interest is neuropsychopharmacology—the science and the technology. The principles of pharmacology are discussed and precede the examination of applications of the technology to psychopathology (for example, schizophrenia, depression, anxiety, and violent behavior).

Prerequisites: Psychology 250 or Biological Sciences 333. Pre-entrusted seniors and majors have priority.

Notes: 1 meeting (3 hours) plus fourth hour

**(Fall) Whiteness and the Construction of Identity**

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

First-year seminar (Writing-intensive)

In this course, we will conduct a group inquiry of whiteness in contemporary U.S. culture and how it influences our individual identities. We will explore the social and historical contexts that constructed whiteness and examine how whiteness is enacted in daily life. Frameworks of racial identity development, privilege, dominance, and antiracism will reveal the power of whiteness while enabling us to imagine a whiteness that could enhance social justice.

Notes: 2 meetings (75 minutes)

**(Fall) Whiteness, Racism, and Inequality in Schools and Society**

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Community-based learning course; Writing-intensive)

What is race? Who decides? What does it mean to be white? How is the ideology of whiteness maintained? We will explore these and related questions as we examine the ways in which whiteness and racism are enacted in schools, have historically interfered with the educational attainment of children of color, and have led to the mis-education of white children. Readings and assignments will examine dynamics of dominance and how the construction of racial identities influences the lives of teachers and students in classrooms. We will also consider theories of multicultural education and antiracist pedagogies as strategies for addressing racial and other inequities in schools.

Prerequisites: Psychology 100 or 110 or permission of instructor

(Spring) Jewish Spiritual Autobiographies - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Jewish Studies 215s)
Along with such genres as letters, ethical wills, travel accounts, and other personal communications, spiritual autobiographies and diaries often reveal what people actually thought and felt about matters important to them. These sources provide insight into religion as lived experience. This course studies autobiographical accounts of Jewish religious figures from the medieval period to the contemporary. We include narratives by both women and men, philosophers, mystics, messianic pretenders, travelers, authors of Holocaust memoirs, and other contemporary Jews. Taken together, such accounts bring to life the diversity of spiritual quests in which Jews have engaged.

(Fall) Introduction to the Philosophy of Religion - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Speaking- and writing-intensive; Philosophy 226fs)
This course begins its survey of the discipline of the philosophy of religion with the work of Augustine. We then proceed to an examination of the classical theistic arguments for knowledge of God's existence (those of Anselm, Aquinas, and Maimonides) that dominated Scholastic thought and consider the criticisms of these approaches by Enlightenment philosophers such as Kant. We trace the rise of experience as the central category of
pietism and romanticism in the texts of Schleiermacher and Coleridge and in the poetry of Novalis. Finally, we focus on the pragmatic tradition in American philosophy of religion, especially in the work of William James, Josiah Royce, and Cornel West.

(Fall) Spirituals and the Blues
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Speaking- and writing-intensive)
This course examines and analyzes African American music as a primary textual source for understanding philosophical and religious language within that community. It addresses various questions: What are the central philosophical and religious themes expressed within the text? How are these themes reflected in the music? What is the intrinsic character of the spirituals and the blues? Is there such a thing as a “music of oppression”? In what way(s) does the black experience contribute to philosophical and religious understanding, as well as the use of language? What does this material suggest about the connections among art, literature, and experience?

RELIG-235-01 - Religion - 2004-2005
(Fall) Introduction to Jewish Mysticism
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Jewish Studies 235)
Mysticism refers to a type of religious life in which individuals seek intimate and personal, direct and intense experience of the Divine. There exists a rich and fascinating Jewish mystical tradition with hundreds of books of diverse kinds. This course examines the Kabbalah of thirteenth-century Spain, focusing upon the seminal work of this period, the Sopher; the synthesis of mysticism and messianism that occurred in the city of Safed (in the Land of Israel) in the sixteenth century; and the popular pietistic movement of eastern Europe from the eighteenth century forward, Hasidism; and various expressions of mystical spirituality in our own time.

(Fall) The Quest for Meaning after the Holocaust - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Jewish Studies 245fs)
The destruction of European Jewry by the Nazis during the Second World War was the most devastating tragedy in all of modern Jewish history, and perhaps of the twentieth century as a whole. The Holocaust poses fundamental questions for all people about what it means to be human, the nature of social community, and about religious faith and tradition. This course explores significant attempts to come to grips with these moral and philosophical questions through literature, religious thought, and film, including the work of Paul Celan, Primo Levi, Elie Wiesel, Aharon Appelfeld, Arthur Cohen, Richard Rubenstein, Jean Amery, Claude Lanzmann, Eva Fogelman, and Pierre Sauvage.

(Fall) Topics in Biblical Studies - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Preamble (for topics courses): This seminar explores the history of Judaism and Christianity as reflected in ancient religious writings, particularly those that eventually became part of the Hebrew Bible and the New Testament. In any given semester the seminar may be organized around a particular theme (e.g. those writings that did not make it into the Bible) or a particular person or literature (e.g. the apostle Paul and his writings). Topics are announced in advance of the semester in which the course is to be given.
Prerequisites: Previous course in Hebrew Scripture or New Testament

RELIG-306-01 - Religion - 2004-2005
(Spring) Sex and the Early Church - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course examines the various ways first- through fifth-century Christians addressed questions regarding human sexuality. We will concentrate on the rise of sexual asceticism and pay particular attention to the relationship between sexuality and issues of gender, culture, power, and resistance. Primary readings will include letters, narrative accounts of female and male ascetics, monastic rules, and "heretical" scriptures. These will be supplemented by modern scholarship in early Christian studies and history of sexuality.
Prerequisites: Previous course in New Testament or early Christianity
Expected enrollment: 15

RELIG-315-01 - Religion - 2004-2005
(Fall) Forging Early Christian Identities
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This seminar explores how first- through third-century Christians struggled to forge a coherent self-identity. We look at early Christian letters to the Roman emperor, anti-Jewish tractates, New Testament writings, accounts of Christian martyrs, depictions of Satan and his minions, descriptions of early heresies, and an ancient exorcism manual. Our investigations will employ several critical models from anthropology, sociology, and cultural studies to explore the dynamics of how the ancient church defined who was and was not Christian.
Prerequisites: Previous course in religion
Notes: 2 meetings (75 minutes)
Instructors: M. Penn
Expected enrollment: 15

RELIG-319-01 - Religion - 2004-2005
(Spring) Women and Early Christianity
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This seminar investigates the role of women in the New Testament and in early Christian communities. We will explore controversies concerning women's leadership in the early church as well as the role of gender and gender imagery in the development of early Christian thought and practice. Our seminar will look at ancient marriage guides, misogynistic satires, New Testament gospels, Pauline letters, accounts of female martyrs, early church manuals, Christian art, theological tractates, and accounts of female saints. We also will examine how recent work in women's studies and queer theory can help us better understand the power dynamics of early Christianity.

(Spring) Topics in Contemporary Theology: Feminist Theologies - *Not offered this year/term
(Women's Studies 333f (03))
Mary Daly, Elisabeth Schussler Fiorenza, Phyllis Trible, and Naomi Goldenberg, among others, have argued that traditional Jewish and Christian theological systems have overlooked the needs, concerns, histories, and contributions of women. Their challenges range from the historical modification of a presumably unbiased religious system to the outright rejection of a so-called patriarchal establishment. Whatever their approach, feminist theologies offer diverse and incisive tools for understanding how a theological system operates, how transitory cultural assumptions become embedded in ongoing doctrines, and how apparently minor adjustments can have significant ripple effects.

(Spring) Topics in Contemporary Theology: Theology Meets the Matrix - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Speaking- and writing-intensive)
Nineteenth-century theologians Schleiermacher, Hegel, and Kierkegaard believed that speculation, necessity, and mechanistic perfection were dangerous ideas that had conquered their world. The way to break free from these powers was to reconsider the meaning of religion. As we enter the twenty-first century, we have come full circle. Technology (The Matrix) threatens our humanity and genuine religious sensibility by "blinding" us from truth. We are slaves to a force larger than ourselves, a reality created by machines. This course seeks to show how The Matrix is a contemporary text for understanding the similar (and dissimilar) forces that shaped the nineteenth and twenty-first centuries.

(Spring) Seminar in American Religious History: Creation vs. Evolution
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

A distinctive mark of Western thought in the nineteenth century was its fascination with "the origin of things." The origin of the species and the origin of the universe are two prime examples. These two concerns, in particular, had a decisive impact on how religion and science came to be understood and expressed in the twentieth century. As a consequence of the ensuing public debate, this question of "origins" presented a direct challenge to the received theory of creation, the meaning of miracles, as well as the nature of biblical inspiration.

ROMLG-375-01 - Romance Languages and Literatures - 2004-2005
(Fall) Seminar in Romance Languages and Literatures: Sex and the City: Gender-Power Relations in Early Modern Europe
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
(Spanish 332f, Italian 360f, French 331f-02)
Preamble (for topics courses): This interdisciplinary seminar will focus on a comparative study of Romance languages or literatures. Topics will vary from semester to semester. Seminar discussions will be conducted in English, but students are expected to read works in at least one original language. Papers will be written in the Romance language of the student’s choice. We will explore short stories from early modern France, Italy, and Spain and examine the ways in which, by problematizing sexual and gender issues, they discuss the political and socioeconomic changes of the period. These changes are marked by the growing of the city and the new culture that emerges. Stories will be read in their historical context and from an interdisciplinary approach (i.e., film). Writers include: Boccaccio, Cervantes, María de Zayas, and Madame de Lafayette. English discussions with readings in French, Italian, Spanish, and English.
Prerequisites: Advanced-level students in Romance Languages and Literatures, French, Italian, or Spanish and permission of instructor
Notes: 1 meeting (2 hours, 50 minutes). Papers will be written in English or the Romance language of the student’s choice. Students wishing to obtain 300-level credit in Spanish, Italian, or French must read texts and write papers in the Romance language for which they wish to receive advanced credit.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Taught in English; Politics 109)

The collapse of the Soviet Union has revealed a mosaic of nations, peoples, and cultures emerging from a hidden landscape formerly perceived as monolithic. We will explore the rediscovered histories, cultures, and arts of peoples who have dwelled upon the vast Eurasian plain for more than 2,000 years and whose interaction with one another and the West has been and will continue to be crucial in shaping the history of two continents.

(Fall) What It Feels Like For a (Russian) Girl
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive; Taught in English)
To pose the question a bit differently than in Madonna's song, what challenges face contemporary Russian women - young, old, urban, provincial - and how do these women cope with the stresses of everyday personal and professional life? In an attempt to arrive at an answer, we will look at interviews, short women's fiction, Russian feminist essays, and two films, Little Vera (1988) and Adam's Rib (1992). Writers include Baranskaya, Voznesenskaya, Kozhevkina, Katerli, Mamonova, Tolstaya, and Sadyr.

(Fall) Anna Karenina: Loving To Death
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Write-intensive; Taught in English)
Leo Tolstoy's Anna Karenina is an action-packed drama about love and passion, personal freedom and societal expectations, and the costs of living. We will read the novel slowly, with attention to the ambiguities that defeat a clear or simple interpretation of the novel's message. We will screen several films of Anna Karenina and assess interpretations of the novel.

(Spring) Women, Life, and Politics in Modern Russia (1860-2000)
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)
The case of Russia offers a compelling example of history's failure to account for women's contributions in shaping a nation's political, social, and cultural identity. We will study Russia's past from the perspective of the women whose courage and sacrifice helped to change the course of history. Topics include the "lady" terrorist revolutionaries of the 1870s, the aborted liberation of women in the new Soviet state, the fighter pilots of World War II, and post-Soviet cultural icons. Texts include fiction, memoirs, film, and contemporary documents. Emphasis on strategies of oral presentation.

(Fall) Great Books: The Literature of Nineteenth-Century Russia - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
In no other culture has literature occupied the central role it enjoyed in nineteenth-century Russia. Political, social, and historical constraints propelled Russian writers into the roles of witness, prophet, and sage. Yet, far from being limited to the vast, dark "Big Question" novels of legend, Russian
literature offers much humor, lyricism, and fantasy. We will focus on the Russian novel as a reaction to western European forms of narrative and consider the recurring pattern of the strong heroine and the weak hero. Authors will include: Pushkin, Gogol, Turgenev, Tolstoy, Dostoevsky, and Chekhov.

(Fall) Manuscripts Don’t Burn: The Literature of the Twentieth-Century Russia - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
Despite the manifold disasters visited upon Russia during the twentieth century, its writers retained their artistic integrity, human voice, and moral authority. They produced a literature of extraordinary power, depth, and lyrical beauty that stands as witness both to an age and the sheer tenacity of artistic creativity. We will place this literature in the context of its time in order to ask a larger question: Can one retain one’s humanity in the face of chaos, violence, terror, and dislocation? Works to be read include: Olyesha’s Envy, Bulgakov’s Master and Margarita, Zamyatin’s We, Platonov’s Foundation Pit, and Chukovskaya’s Sofia Petrovna.

(Fall) Tolstoy’s War and Peace - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
Focuses on Tolstoy’s War and Peace. To explain the fundamental conflict in Tolstoy’s art, Sir Isaiah Berlin advanced the now famous formula that Tolstoy was a fox (pluralist) struggling to be a hedgehog (monist). Indeed, throughout his life and in his art, Tolstoy sought to shape experience into a single and all-embracing philosophical principle, but he was never able to suppress his extravagant intuition that existence, being contradictory, fragmentary, and ultimately incoherent, defeated attempts at codification. We will read War and Peace in an attempt to understand how that irresolvable conflict fuels Tolstoy’s intellectual pursuits and informs his theories on art.

(Spring) French Studies in English Translation: Dostoevsky and France: The Influence of Anxiety
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English; French 220s)
Preamble (for topics courses): These courses satisfy the distribution requirement for English literature or foreign literature in translation.
Dostoevsky as a transformative moment in European literature. French literature exerted a profound influence on Dostoevsky and was in turn inspired by him in the twentieth century. We will read Dostoevsky, his French sources, and his French followers. Themes examined will include: the human propensity for violence, cruelty, and rebellion; the possibility or impossibility of redemption; the renewal of French realism by Dostoevsky, the reappropriation of Dostoevsky by the French existentialists, and Dostoevsky's contribution to the French roman policier.

Notes: Students may receive 300-level credit for extra reading and written work in French or Russian.

The novels of Ivan Turgenev (1818-1883) powerfully depict what Shakespeare called "the body and pressure of time." With Rudin (1856), Turgenev achieved immediate fame as a writer. This, his first novel, examines the "man of the forties," given to passionate but romantic abstraction that could find no outlet in the political atmosphere of the period. We will read Rudin with special attention to the precise and refined use of language that has earned Turgenev the title of "a writer's writer."

(Fall) Literature and Film on Trial: Russian Culture in the Twentieth Century
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
In a sense a work of art is always on trial, judged by those who come into contact with it. Art and artists in twentieth-century Russian society were especially challenged by cataclysmic violence--revolutions, wars and totalitarian oppression. We will study major works of literature and film and place them in the esthetic and political contexts that influenced their creation and their reception in Russia. Artists to be studied include Chekhov, Babel, Eisenstein, Bulgakov (The White Guard), Kupreyanova, Zamiatin (We), Solzhenitsyn, Brodsky, and others.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; Politics 209f)
Russia was transformed by communist revolution into a global superpower that challenged the dominant ideologies of liberalism and nationalism. It became a powerful alternative to capitalism. In 1991, this imperial state collapsed and underwent an economic, political, and cultural revolution. What explains the Soviet Union's success for 70 years and its demise in 1991? What sort of country is Russia as it enters the twenty-first century? Is it a democracy? How has Russia's transformation affected ordinary people and Russia's relationship to the West?

We will examine the development of Soviet foreign policy since 1917 and, following the collapse of the USSR in 1991, the role played by Russia and Russia and the former Soviet republics in the far more complex and multipolar "New World Order." (Taught in English; Politics 204f)
Throughout its modern history, Russia has been viewed as a Western power, the colonizer of Asian and East European peoples, and as an object of Western colonial expansion. In the eyes of the West, it functioned as the "other" for most of the 20th century. Such ambiguities were reflected by the debate in Russia on its national identity. What was its relationship to the East and West? We will analyze Russian history from the 17th century to the post-Soviet period focusing on Russia and the USSR's multifaceted relations with the West. We will compare social, cultural, economic and political developments in Russia and the Soviet Union to those in Europe and the US.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; Politics 242f)
Following the collapse of the USSR and the Gulf War, Central Asia and the Caucasus became new centers of geopolitical rivalry. The new states are a source of energy (oil and gas) for Western powers and a vital transit corridor between Eastern Europe and China. While a new "Great Game" is being fought between Western, Far Eastern, and Middle Eastern powers for control over energy pipelines, the region is threatened by environmental catastrophe and water shortages. Is the new oil industry a source of prosperity or an instrument for further exploitation, corruption, and instability? How important are the new states to the West's strategic energy interests?

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; Politics 243f)
Russia was the first nation in the world to face political terrorism. In Russia, the era of terrorism lasted from the 1860s, when the People's Will group launched the hunt on the tsar Alexander II, until 1918, when the Socialist Revolutionary Party attempted to assassinate Lenin. A case study of terrorism in Russia will help us to answer a number of questions highly relevant today. What are the causes of terrorism? What are its goals and methods? What can governments do to cope with it? What is the impact of terrorism on society?

The twentieth century has been largely shaped by several nations' ambitions to build utopian societies. Russia and China have attempted to realize the vast promises of communism while Nazi Germany aimed to construct a perfect racist world. Beyond political struggle, wars, and revolutions, recent extraordinary achievements in technology have contributed to the utopian mindset. Are political utopias dead in the new millennium? Preamble (for topics courses): Courses in this section satisfy the distribution requirement in social sciences.

Nationalism is one of the greatest challenges to multiethnic states. They have had to create new strategies to deal with the demands of ethnic minorities. Taking the four states of Spain, Canada, Russia, and the former Yugoslavia as examples, we will focus on nationalist movements within these states and the central governments' responses. Revolutions have a rich and bloody history on the European continent. In the twentieth century, there were frequent revolutionary upheavals, particularly in Russia and Eastern Europe. We will study two revolutionary periods: Russia in 1917 and the USSR in 1991. These revolutionary events present great contrasts, yet at the same time clarify the nature of revolutions and why they occur. Do they bring the expected fundamental and accelerated change people hope for? Our focus will be on the contrasts and parallels between Russia's early twentieth-century socialist revolution and late twentieth-century capitalist revolution. Preamble (for topics courses): This course will focus on significant issues in the field of sociology not covered in other courses in the sociology curriculum. Topics will vary.

This course covers the social, economic, and political aspects of current immigration to the United States. The course begins with an overview of the history of immigration over the past 200 years, and how immigration over the past 40 years differs from earlier eras. The course then explores the major issues of current immigration research in sociology, including demographic change, economic inequality, and assimilation.

(Fall) Development of Social Thought

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course examines the origins and development of sociological theory in the nineteenth century. Focusing on the three most important representatives of the classical tradition in sociology - Karl Marx, Max Weber, and Émile Durkheim - we consider in detail the ideas of each, compare their perspectives on emerging industrial society, and assess their contemporary significance.

Prerequisites: Sociology 123 or Anthropology 105, soph, jr, sr

Notes: 2 meetings (75 minutes)

Instructors: K. Tucker

Expected enrollment: 30

(Spring) Practicing Sociology - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Community-based learning course)

This course in archival and field research methods uses a sociological lens to magnify issues in research design for nonquantitative data. In this community-based learning experience, students will use resources from their own "community" to describe and contextualize the idea of a community. There will be hands-on experience with primary documents from the Mount Holyoke College Archives, as well as interview material that students will collect, transcribe, and analyze themselves.

Prerequisites: 8 credits in sociology

(Spring) Social Inequality - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course is a critical survey of theoretical and empirical research on social inequality, stratification, and mobility. The central focus is class, race, and gender inequalities as they have changed during the post-World War II period in the United States (although we will look briefly at stratification regimes in other cultures and time periods). The concepts and methods of social stratification have wide application in sociology, economics, public policy, and administration contexts. As the course progresses, we will explore some of these applications as we wrestle with several policy issues currently confronting U.S. society.

(Fall) Special Topics in Sociology: Mass Media Studies
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Preamble (for topics courses): This course focuses on significant problems in the field of sociology with group meetings and reports. This seminar explores contemporary issues and perspectives in mass media studies. It is designed to provide students with a provocative look at mass media in order to begin to develop a critical perspective on mass media and contemporary society. The first part of the course looks at the effects of entertainment culture in contemporary mass media and society. The second and third parts of the course address issues in the representation of gender and race in mass media. The fourth part of the course takes a unique look at the impact of advertising and marketing on American culture. The final part of the course addresses the future of mass media and globalization.

(Fall) U.S. Latino/a Literature
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
After centuries of invisibility and marginalization, Latino culture and literature exploded on the American scene in the 60s. Chicanos, Cubans, Nuyoricans, and lately Dominicans and Central Americans have all contributed to create a diversified body of literature characterized by its bilingualism, biculturalism, and hybridity. This course will center on how U.S. Latino/a literature bears witness to identity formation, self-representation, and celebration of Latino culture and its people. It will explore a series of critical issues that define "latinidad" in the U.S.

(Spring) Seminar on Spanish/Latin American Cinema: Spring 2005: Violence, Ritual, Fantasy: Spanish Cinema since the Civil War
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive)
Preamble (for topics courses): This course examines the history, politics and aesthetics of Latin American and/or Spanish cinema in the context of world cinema, and especially in contrast to mainstream Hollywood cinema. The course will also familiarize students with the specific methodologies of film analysis and with recent debates within film studies.
This course will examine a selection of some of the most critically acclaimed and widely studied Spanish movies, and familiarize students with the critical vocabulary and fundamental concepts of Spanish film studies. Focusing on the recurrent tropes of violence, ritual, and fantasy, students will pay particular attention to the role film has played in Spanish culture since the end of the country's traumatic and bitterly divisive Civil War in 1939.
Directors will include Pedro Almodóvar, Juan Antonio Bardem, Juan José Bigas Luna, Luis Buñuel, Julio Medem, Carlos Saura, and Imanol Uribe, among others.
Prerequisites: Spanish 235, 237, 244, or 246, or permission of instructor

SPAN-331-01 - Spanish - 2004-2005
(Fall) Colonial and Nineteenth-Century Latin American Literature: Fall 2004: Cannibals, Witches, and Utopia: the Body of Otherness in Colonial Literature
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
Preamble (for topics courses): This course will concentrate on the colonial period and/or the nineteenth century. The study of the colonial era will focus on different aspects of the encounter between European and indigenous civilizations and the formation of a literary discourse (i.e., chronicles and the novel). The nineteenth-century component will explore the process of nation building through literature, the development of literary genres, and the emergence of women's voices. Since the topic varies each time the course is offered, a student may receive credit more than once.
This course will examine contrasting images of the New World ranging from the embodiment of Utopia to the land of the dangerous savages. Using maps, films, and colonial iconography, in addition to chronicles, we will analyze the construction of these images and discuss theories of "otherness.” Special attention will be paid to the ways in which bodily differences are transformed into frightening markers that define the "other" and the roles religions played in the portrayal of the New World throughout the colonial period.
Prerequisites: Spanish 235, 237, 244 or 246 or permission of instructor

SPAN-332-01 - Spanish - 2004-2005
(Fall) Spanish Literature: Medieval, Renaissance, and Golden Age: Fall 2004: Sex and the City: Gender-Power Relations in Early Modern Europe
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Same as Romance Languages and Literatures 375f)

Preamble (for topics courses): In this course, students will study a topic drawn from Spanish literature of the twelfth through the seventeenth centuries. The period includes such prose masterpieces as El romance de la Locura, Libro de buen amor, La Celestina, Amadís de Gaúla, Lazarillo de Tormes, El buenos, and Don Quijote de la Mancha; the poetry of Berceo, García de la Vega, and Góngora; the Spanish mystics Santa Teresa and San Juan de la Cruz; the theatre of Lope de Vega and Calderón de la Barca. Since the topic varies each time the course is offered, a student may receive credit more than once.

We will explore short stories from early modern France, Italy, and Spain and examine the ways in which, by problematizing sexual and gender issues, they discuss the political and socioeconomic changes of the period. These changes are marked by the growing of the city and the new culture that emerges. Stories will be read in their historical context and from an interdisciplinary approach (i.e., film). Writers include: Boccaccio, Cervantes, María de Zayas, and Madame de Lafayette. English discussions with readings in French, Italian, Spanish, and English.

Prerequisites: Spanish 235, 237, 244, or 246 and permission of instructor

Notes: 1 meeting (2 hours, 50 minutes). For 300-level credit in Spanish, students must enroll in Spanish 332f (not Romance Languages and Literatures 375f) and read and write papers in Spanish.

(Spring) Latin American Thought: Spring 2005: Four Key Moments in Latin American Theory Formation

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

Preamble (for topics courses): How does Latin America think about itself? The purpose of this course is to introduce students to different ways in which Latin Americans have approached the problems of self-definition and cultural identity. Readings will explore how various authors have addressed such complex issues as colonialism, mestizaje, literacy, regionalism, and feminism, among others. Since the topic varies each time the course is offered, a student may receive credit more than once.

This course examines four instances where Latin American thinkers, filmmakers, and poets reflected on and transformed previous cultural models, thus contributing to original Latin American theory formation: 1) the poetry of Vicente Huidobro and César Vallejo in relation to the surrealism debate; 2) Nuevo Cine Latinoamericano and Tercer Cine as a transformation of the European cinematic avant-garde of the 1950s; 3) Neobaroque poetry (poesía neobarroca y neobaroica) as a reconfiguration of the post-all debate; 4) Latin American responses to the hegemony of U.S.-inflected queer studies. Readings will be of a poetic, philosophical, political, and visual nature.

Prerequisites: Spanish 235, 237, 244, or 246 or permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: C. Gundermann

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

Preamble (for topics courses): This course will concentrate on a specific writer, movement, genre, theme, or literary phenomenon. Students will do close textual readings, prepare reports, research extensively, and write substantial papers. The seminar will challenge students to demonstrate an understanding of literary analysis, critical skills, and theoretical approaches at an advanced level. Since the topic varies each time the course is offered, a student may receive credit more than once.

Students enrolling in this course (Spanish 361) attend the class meetings of Spanish 261 and in addition must enroll in a one-hour tutorial, which is a lecture/discussion in Spanish. All work and readings are in Spanish.

Prerequisites: Junior or Senior or permission of instructor

This course will explore the possibilities granted by the concept of secret history when applied to dissent in the Spanish context from the Civil War until 3/11 and the fall of the Aznar government. Theory will allow students to articulate a genealogy of counter-hegemony based on the analysis and critical discussion of different cultural products and spaces. Marginal literature, cult films, punk-rock culture and comics will be related to opposition to official discourse(s), and the limits of this counterhistory will also be explored. The goal of this course is to produce a vibrant new look at Spanish culture and history, challenging previously-acquired knowledge and posing new problems.

STAT-140-01 - Statistics - 2004-2005
(Fall) Introduction to the Ideas and Applications of Statistics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course provides an overview of statistical methods, their conceptual underpinnings, and their use in various settings taken from current news, as well as from the physical, biological, and social sciences. Topics will include exploring distributions and relationships, planning for data production, sampling distributions, basic ideas of inference (confidence intervals and hypothesis tests), inference for distributions, and inference for relationships, including chi-square methods for two-way tables, analysis of variance, and regression.
Prerequisites: 2 years of high school algebra
Notes: 4 meetings (50 minutes)

A fundamental fact of science is that repeated measurements exhibit variability. The course presents ways to design experiments that will reveal systematic patterns while "controlling" the effects of variability and methods for the statistical analysis of data from well-designed experiments. Topics include completely randomized, randomized complete block, Latin Square and factorial designs, and their analysis of variance. The course emphasizes applications, with examples drawn principally from biology, psychology, and medicine.

This course develops the ideas of probability simultaneously from experimental and theoretical perspectives. The laboratory provides a range of experiences that enhance and sharpen the theoretical approach and, moreover, allows us to observe regularities in complex phenomena and to conjecture theorems. Topics include: introductory experiments; axiomatic probability; random variables, expectation, and variance; discrete distributions; continuous distributions; stochastic processes; functions of random variables; estimation and hypothesis testing.

Prerequisites: multivariable calculus
**STAT-343-01 - Statistics - 2004-2005**
(Spring) Mathematical Statistics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course is an introduction to the mathematical theory of statistics and to the application of that theory to the real world. Topics include probability, random variables, special distributions, introduction to estimation of parameters, and hypothesis testing.
Prerequisites: Mathematics 202, 203, and 342 recommended

**Theatre Arts**

**THEAT-100-01 - Theatre Arts - 2004-2005**
(Fall) Introduction to Theatre
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Theatre is the ultimate art, which incorporates and celebrates all other artistic disciplines. Theatre reflects and interprets social reality, it is both ancient and immediate, practical and theoretical. Beyond studying the nature and function of theatre in modern society, across cultures, and in the historical past, students will learn "how theatre works" through hands-on involvement in current departmental productions and via regular attendance at live theatrical performances both on and off campus. The class will culminate in the staging of students' own theatrical projects. This is an "experience-intensive" course.
Notes: 2 meetings (2 hours) and lab. NOTE: Cost of theatre tickets is the responsibility of the student

(Spring) Seminar: Twentieth-Century Fashion - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This class explores the changing visual look of the last century, through the work of the great couturiers and designers. We will study their visions and how they influenced, and were influenced by, the art, films, and social fabric of their lifetimes. Students will research and present papers illustrated with slides, videos, and other visual materials.
Prerequisites: 8 credits in department or in related subjects or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: V. James

THEAT-350-03 - Theatre Arts - 2004-2005
(Spring) Seminar: History of the Domestic Interior - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A visual history of domestic life and social intercourse directly related to dramatic literature. Students will learn how to identify the place of origin and period of dwellings and their interiors by style, form, and pattern. They will study the impact of social, economic, and family structures, employment, recreation, and the environment upon living spaces and their inhabitants. Topics will include: the classical style and its revivals; the China trade; the Industrial Revolution; the European country house; the American colonial farm; and contemporary American living. Plays will be read and their milieu researched. There will be on-site research visits to houses and museums.
Prerequisites: jr, sr, Theatre Arts 100 and 251, 252, or 253, a basic writing course and permission of instructor
Notes: 1 meeting (3 hours)
Instructors: V. James

WOMST-101-01 - Women's Studies - 2004-2005
(Fall) Introduction to Women's Studies
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course offers an overview of women's position in society and culture by examining women's lives from a variety of experiential and theoretical perspectives. The first section examines works by women that illuminate both the shared and the diverse social, psychological, political, and economic realities of their experience; the second section introduces analyses of sexism and oppression, with a focus on different frameworks for making and evaluating feminist arguments. The course concludes with visionary feminist views of women recreating their lives.
Prerequisites: fy, soph
Notes: 2 meetings (75 minutes)
Instructors: M. Ackmann

WOMST-200-01 - Women's Studies - 2004-2005
(Fall) Women in History: U.S. Women's History since 1890
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course examines the history of women and the cultural construction of gender in the United States since the end of the nineteenth century. How have class, race, and ethnicity shaped the history of women's work, debates over female sexuality, women's attempts at social change, and representations of women in cultural and political contexts? In what ways has gender contributed to racial consciousness and class formation in the United States? Using primary and secondary material, we will examine "women's experience" in the realms of work, politics, sexuality, and reproduction.

(Spring) Women in History: Women in South Asia
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(History 296s and Asian Studies 296s)
This course is about the histories of women in South Asia. The readings consider broad themes that have historically affected the status of South Asian women: discourses about backwardness, nationalism, family and property rights, the law, violence, labor, religion, and social activism. Working chronologically through the colonial and postcolonial periods, we will consider the relationship between the status of South Asian women within their families and communities and ask what types of feminist strategies can enable South Asian women.

WOMST-203-01 - Women's Studies - 2004-2005
(Fall) Feminist Approaches to Literature: Sexuality and Women's Writing
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(English 286f)
An examination of how U.S. women writers in the twentieth century represented lesbian, queer, and homoerotic possibilities in prose. Topics to include: literary strategies for encoding sexuality; thematic interdependencies between sexuality and race; historical contexts such as the "inversion" model of homosexuality and the Stonewall rebellion; theoretical issues such as the "heterosexual matrix," the "epistemology of the closet," and tensions between lesbian and queer models of sexuality. Authors studied may include Allison, Brown, Cather, Gomez, Larsen, McCallers, Moraga, Nestle, Pratt, Stein, and Woolson; theorists may include Butler, Lorde, Rich, and Sedgwick.

(Fall) Gender, Race, and Science - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course examines different approaches to understanding the nature of scientific practices. Of central interest will be the diverse accounts offered by feminist studies of science. We will pay particular attention to notions of evidence, methods, cultural and material constraints, and the heterogeneous nature of laboratory and theoretical practices. We will consider ways in which gender, race, and sexuality are constructed by science and how these factors influence both scientific practices and our conceptions of science. We will also examine the feminist commitment to taking account of the multifaceted dynamics between science and society without forfeiting the notion of objectivity.
Prerequisites: soph, jr, sr

(Spring) Buddhism, Feminism, and Ecology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Buddhism, feminism, and ecology are seemingly disparate philosophies of life, yet they share fundamental similarities in how they conceptualize the interconnectedness of human and nonhuman nature. We examine these similarities, as well as differences, in relation to such categories as self and other, unity in diversity, and nonviolence. Particular attention is given to the works of theorists working within ecofeminism and "engaged Buddhism."

(Spring) Interdisciplinary Seminar: Race, Gender, and Empire: Cultural Histories of the United States and the World
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Recent cultural histories of imperialism - European as well as U.S. - have illuminated the workings of race and gender at the heart of imperial encounters. This course will examine the United States' relationship to imperialism through the lens of such cultural histories. How did encounters between Native Americans and European colonizers, as lived and as remembered, call into play racial and gender identities? How have the legacies of slavery been entwined with U.S. imperial ambitions? How did racialized constructions of gender and sexuality shape the "American century?" And what can we learn from transnational approaches to "the intimacies of empire?"
Prerequisites: 8 credits in history, permission of instructor, written application prior to Academic Advising period (http://www.mtholyoke.edu/acad/hist/application.shtml) is required
WOMST-333-02 - Women's Studies - 2004-2005
(Fall) Interdisciplinary Seminar: Emily Dickinson in Her Times
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Community-based learning course)
This course will examine the writing of Emily Dickinson, both her poetry and her letters. We will consider the cultural, historical, and familial environment in which she wrote, with special attention paid to Dickinson's place as a woman artist in the nineteenth century. Students will be asked to complete a community-based learning project in which some aspect of Dickinson's life and work is interpreted for the general public and incorporated into an ongoing display at the Dickinson Homestead. The class will meet at the Dickinson Homestead in Amherst.
Prerequisites: jr, sr, 8 credits in women's studies beyond 101, or permission of instructor

(Fall) Interdisciplinary Seminar: Globalization and Fundamentalism - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
The worsening problems of global environmental and social destruction, including the oppression of women, are frequently attributed either to economic and cultural globalization or ethnoreligious fundamentalism. However, in what ways do globalization and fundamentalism reinforce each other? What theories and social movements provide more balanced alternatives to the extreme models of psychological and social development represented by both these forces? This course will seek answers to these questions in relation to case studies of ethnoreligious as well as gender, race, and class struggles from both the Northern industrialized and impoverished Southern countries.

(Spring) Interdisciplinary Seminar: Advanced Topics in Feminist and Queer Theories and Continental Philosophy
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Philosophy 348s)
Questions of power, agency, structure, materiality, bodies, subjectivities, and discursive practices have been central to both feminist and queer theories. We will focus on these issues, exploring the tension between poststructuralist, Marxist, and materialist approaches. In analyzing contemporary theories of gender and sexuality, we will pay particular attention to issues of race, class, ethnicity, nationality, and globalization. Key problematics include the nature and operation of power, the relationship between materiality and discourse, and the relationship between theory and practice.

(Spring) Internship or Field Project
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Community-based learning course; Speaking-intensive)
This course, required for the major, presents an opportunity for students to apply feminist theory and to synthesize their work in women's studies. The connections between the academy and the community, and between scholarship and social action, are emphasized. Students either design their own field project or arrange for a placement at an agency, institution, or place of work that deals with the concerns of women. A weekly seminar with other students engaged in 390 work provides a structured setting in which to analyze these experiences and share works-in-progress. Frequent writing assignments are required.

African American and African Studies

(Fall) Introduction to African American and African Studies: Identity, Community, and Progress
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
In this introduction to the African American experience in twentieth-century America, historical, cultural, economic, political, and aesthetic elements of the urban African American experience are examined. Because of the interdisciplinary nature of African American studies, we consider methodological issues as they bear on the constitution of the African American subject, the descriptive edifices of the contemporary African American community, and programs for liberation.

(Spring) The Cultural and Literary History of HipHop
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This course will trace the cultural and literary history of HipHop and the impact it has had on Black popular culture and American society. We will begin by examining the African American and Afro-diasporic cultural traditions, as well as the socio-economic environments, which were integral to HipHop’s formation and evolution. We will investigate the many elements of the culture: from turntablism, emcees, writing, and the human beatbox to the fashion, language, and knowledge that its participants generate. From this in-depth examination, we will discover the richness and diversity of HipHop, thereby challenging the narrow manner in which it is portrayed on commercial radio and television.

AMST-201-01 - American Studies - 2005-2006
(Spring) Introduction to the Study of American Culture: Comparative American Studies Through The Lens Of Empire
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course is a comparative study of the shared experiences of colonization among Filipinos, Puerto Ricans, and Native Hawaiians. It operates from the assumption that a consideration of their experiences points to analytic possibilities that extend beyond the specificities of their histories. The course asks what an examination of these experiences reveals about the formation of the U.S. The aim of the course is to introduce students to the kinds of inquiries that have marked shifts in the direction of American studies scholarship. Investigating a wide range of sources and materials, it aims to familiarize students with emerging themes, debates, and developments in the field.
Notes: 2 meetings (75 minutes)<br>Note: This course introduces students to a variety of approaches and perspectives by including classes by professors from different fields in the interdisciplinary American studies program.

AMST-201-02 - American Studies - 2005-2006
(Spring) Introduction to the Study of American Culture: America: Nation, Representation, and Struggle - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive)
One particular story of America is about struggle and representation. Quests for power and conquest have created resistance and demands for equality on the part of the oppressed and marginalized. This course explores the history of struggles over representation that have shaped our sense of national identity and conditioned our claims to America. Using literature and films, we will examine how social groups have resisted and accommodated their own exploitation and/or exclusion in America. Particular case studies focus on women's work and class oppression, Filipino and Mexican laborers, westward movement of farmers during the Great Depression, and African American life in urban America.

AMST-290-01 - American Studies - 2005-2006
(Spring) Topics in American Studies: Women Writers: Twentieth-Century American Women Writers
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(English 271s and Women's Studies 203s)
In this course we will examine the work of American women writers with an emphasis on the themes of protest and pleasure. Material will range from the overtly personal to the intensely personal, will often merge the two, and will date from the late-nineteenth century to today. Despite our long-standing reputation for being "emotional," both outrage and ecstasy have oft been considered taboo for women. Yet women have been motivated by each to pick up the pen and have proved influential as writers on these themes. Authors will range from Emma Goldman, Ida B. Wells and Kate Chopin to Audre Lorde, Adrienne Rich and Dorothy Allison.
Prerequisites: soph, jr, sr; English 240, 241, or 270 recommended

AMST-290-02 - American Studies - 2005-2006
(Fall) Topics in American Studies: Imperial Legacies and Colonized Subjectivities
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course interrogates shared experiences of colonization, conquest, and displacement among colonized groups such as Filipinos, Puerto Ricans, Mexicans, Pacific Islanders and Native Hawaiians, groups that are rarely thought of as related. It asks what it means to consider the histories of these groups in relation to one another focusing on the links, differences, and mutual implications among them. The aim of the course is to underscore how these connections help us better understand the particular histories of each group without losing sight of the different relations of each group to imperial projects.

(Fall) Senior Seminar: Psychology, Self, and American Culture
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog. etc. requirement
This seminar examines the social, historical, and cultural construction of mental health and individual identity in modern America. By exploring literary and film representations of mental illness, in combination with cultural criticism, the course uncovers the ways in which cultural definitions of mental...
health, illness, and the experience of self are relevant beyond the realm of psychology. Pertinent criticism will expose American culture's obfuscation and devaluation of activities and perceptions that might contribute to a more authentic experience of individual fulfillment. Theorists and writers to be studied include Lasch, Schumaker, Greenberg, and Sexton.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(English 364)

In this course we will read some of the central texts emerging from the field of cultural studies. In their research projects, students will have the opportunity to put into practice both ethnographic and semiotic approaches to cultural phenomena. Assigned readings will include work by Raymond Williams, Constance Penley on Star Trek fanzines, Kathy Acker on bodybuilding, Anna Deavere Smith, Roland Barthes and Stuart Hall. Can we "read" the world like a text? Why should we? What changes when we open up our field of inquiry in this way?

(English 362s and Women's Studies 333s)

The majority of this course will be conducted in the Women's Unit at the Hampden County Correctional Center in Ludlow, eight miles from the Mount Holyoke campus. (Transportation will be provided.) Half the students will be from Mount Holyoke; half will be women currently incarcerated at HCCC. This collaborative course will combine literary analysis of prison literature and creative writing in the memoir form. The class will be co-facilitated by Kim Keough and Lysette Navarro of Voices from Inside, who regularly lead creative writing workshops at HCCC. Enrollment requires instructor's approval, based on a Fall 2005 interview.

Prerequisites: jr, sr, and instructor's permission following interview
Notes: 1 meeting 2 1/2 hours plus travel time
Instructors: S. Davis

**AMST-301-04** - American Studies - 2005-2006

*(Spring)* Senior Seminar: The Caribbean in American Culture - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(English 370s)

This seminar uses the interdisciplinary methods of American studies to explore the role migrants from the English-speaking Caribbean have played in the United States. We will examine Caribbean images of themselves in literature and popular culture to understand the various ways they have (re)defined what it means to be "American" and "African American" in the twentieth century. A major theme will be the intersections of race, ethnicity, gender, and sexuality in Caribbean American identity. North American perceptions and constructions of the Caribbean will also be central. Readings include Lorde, Hughes, Hurston, Marshall, and Cliff.

(Spring) Exploring Asian Americas - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
The concept of "Asian America" developed in the 1960s in conjunction with the broader civil rights movement. Since the 1960s, new migration has dramatically changed the composition of Asian America, and new theoretical perspectives challenge us to reexamine the concept itself. While a clear division between Asia and the U.S. was inherent in the original concept of Asian America, more recent theories of hybridity, diaspora, and transnationalism blur such clear-cut boundaries around national, ethnic, and racial formations. In this course, we will examine these empirical changes in migration and ethnic identification as well as the shift in theoretical paradigms for understanding them.

(Fall) Anthropology of Modern Japan
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Since the mid-nineteenth century, Americans have viewed Japan as the Orient's most exotic and mysterious recess, alternately enticing and frightening in its difference. Intense economic relations and cultural exchange between Japan and the U.S. have not dispelled the image of Japanese society and culture as fundamentally different from our own. In this course, we will strive for greater understanding of shared experiences as well as historical particularities. Issues covered may vary from one semester to another, but frequently focus on work, women, minorities, and popular culture. Films and anthropological works provide ethnographic examples of some key concepts.

(Fall) Shopping and Swapping: Cultures of Consumption and Exchange - *Not offered this year/term  
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement  
(Speaking- and writing-intensive)  
We shop for our food, for our clothes, for our colleges. We purchase cars, manicures, and vacations. It seems that there is little that cannot be bought or sold. But we also give and receive gifts, exchange favors, "go Dutch" in restaurants, and invite friends for potlucks. This course examines exchange systems cross-culturally, in order to understand their cultural significance and social consequences. It explores how our own commodity exchange system, which appears to be no more than an efficient means of distributing goods and services, in fact contains intriguing symbolic dimensions similar to the gift exchange systems of Native North America, Melanesia, and Africa.

(Spring) Issues in Anthropology: Cultures of the Goddess in South Asia  
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement  
This course explores the culture of devotion to the divine feminine in the northern regions of South Asia. Using a variety of ethnographic sources, we look at human relations with the Goddess in her diverse guises including fierce and peaceful aspects, the HIV and Smallpox Goddesses, wisdom Goddesses, and incarnate living Goddesses. Currently, Goddesses are found in a variety of places: from the Himalayas to the ocean, from temples to texts, from snake cults to sacrifices, and from villages to cities. We examine how South Asians relate to the Goddess and how worship provides a framework for making meaning, organizing the cosmos, and both reinforcing and undermining the social order.

(Spring) Special Topics in Anthropology: Anthropology of Nature
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This seminar explores the place and meaning of "nature" in the postindustrial world. Drawing from recent contributions from fields such as political ecology, geography, poststructuralism, feminist theory, and queer and gender studies, this seminar reflects upon the different forms in which societies are reshaping both the idea and practices of nature in an age of hyper-mobile social and economic transformations. By exploring issues surrounding sex-change surgery, bioprospecting, ecotourism, and agricultural biotechnology, we will gain insight into the ways the nature concept is being stretched and redefined as it drives heated epistemological and global political debates.

(Spring) Language in Culture and Society - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Every society is held together by systems of interpersonal and institutional communication. This course examines the nature of communication codes, including those based on language (speaking and writing) and those based on visual images (art, advertising, television). To understand communication in its social and historical dimensions, we study the psychological and cultural impact of media revolutions and then look at ways communication systems manipulate individual consciousness. Illustrative examples are drawn from Western and non-Western societies.

(Spring) Spirituality: Anthropological Perspectives - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
An anthropological inquiry into spiritual values and practices in selected societies, this course examines the ways in which worldviews influence social behavior and are themselves influenced by historical circumstances. Topics include the analysis of moral and ethical beliefs expressed in symbolic forms such as art, architecture, and ritual, as well as relations of power expressed in witchcraft and sorcery beliefs, and in sacred narratives and pilgrimages.

ANTHR-310-01 - Anthropology - 2005-2006
(Fall) Visualizing Culture - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
In this course we go behind the scenes and behind the screens of anthropological films, television, museum exhibitions, and publications such as National Geographic Magazine, to explore the social contexts of their production, distribution, and interpretation. We consider how popular images of cultural "others" reveal the lives and times that produce them, and how, as sites of cultural exchange and political debate, such images shape and are
shaped by relations of power. Further, we consider the diversity of local responses to images of cultural identity and begin to explore the complexities of "picturing cultures" from different subject positions across the global mediascape.

**Credits/PE Units:** 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

**Preamble (for topics courses):** This course covers significant problems in the field of anthropology, with group meetings and reports.

Mass media are an integral part of contemporary global culture. This course considers mainstream media as well as cybertechnology by looking at contexts of media production, transmission, and consumption. From the CNN broadcast in the library atrium to the books on the library shelves, from our local WMHC to BBC World Service, from the Daily Jolt to iPod downloads, media saturates our culture as extensions of ourselves and as indicators of who we are.

**Credits/PE Units:** 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

**Preamble (for topics courses):** This course covers significant problems in the field of anthropology, with group meetings and reports.

People in all societies have had to deal with uncertainty. Yet in our own society, risk calculations have been taken to a new level, as dangers appear to confront us at every turn-in the form of toxins in our food, accidents at work, and market fluctuations. Terrorist attacks in New York and Tokyo, and crime in Sao Paulo, have led to the increased control of public spaces in these cities. This course will focus on the intersection of theories of risk and public space. Public spaces have been the source of both excitement and anxiety, but a culture of risk has emphasized their dangers. What is the future of public spaces in a culture of risk?

**Credits/PE Units:** 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

**Preamble (for topics courses):** This course covers significant problems in the field of anthropology, with group meetings and reports.

Political ecology explores the relations among ecologies, economies, and politics as they play out in diverse communities. By examining such movements as the European-based anti-GMO movement, the U.S. movement against environmental racism, and women's environmental movements in the global South, this course seeks to investigate understandings of nature, society, and environmental justice that surface in particular ecological struggles. Locating these struggles within the context of power, this course will investigate the role of global capital in shaping new understandings, practices, and struggles over nature that are increasingly at the center of international environmental controversy.

**(Speaking- and writing-intensive)**

From the invention of the printing press to the Internet, the production and reproduction of knowledge has been mediated by information technology. But while a good deal of social change is arguably technology driven, the truths of science are also culturally relative and embedded in social practice. This seminar will explore the recent scholarly debates taking place in the social studies of science and technology. We will focus on the role played by print literacy and transportation technology in the history of science, in the formation of identity, and in the development of the postmodern imagination.

Architectural Studies

(January) Introduction to Architectural Design
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This course enables students to explore both the conceptual and practical realms of architecture in a series of lectures and studio projects. Students learn to establish criteria for architectural design by integrating the principles of three-dimensional form with site response, programmatic needs, structural and material requirements. Initially, students examine the urban context and as the course progresses complete measured drawings and scaled models of a site-specific design project. Discussions focus on how experience, daily use, culture and aesthetics influence the field of architectural design, while studio projects highlight research, drawing and modelmaking.
Prerequisites: Individuals with or without design experience are welcome, as projects are tailored to each student's background
Notes: 6 meetings (3 hours - WF 9-12)
Instructors: A. Marshall
Expected enrollment: 12

(January) Water, Land, and Living Landscapes
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Cultural and ecological considerations in the design of landscapes adjacent to waterways. This course will probe an essential issue in landscape architecture: the reconciliation of ecological function and cultural expectations. The case study will be the ponds and streams of Mount Holyoke's campus.

(Fall) Introductory Seminar in Art History: The Classical Ideal  
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement  
(Speaking-intensive)  
The classical style has been the most enduring idiom in the history of Western art. The seminar will examine the ancient origins of classicism as well as its later manifestations during the medieval, Renaissance, and modern periods. Architecture, sculpture, painting, and popular media will be included. Special attention will be paid to the cultural motives that contributed to the vitality of the classical ideal throughout the ages.

(Spring) Talking Pictures: An Introduction to Film - *Not offered this year/term*  
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement  
(Film Studies 202s)  
Some of the best feature-length films of the past century have commanded our attention and imagination because of their compelling artistry and the imaginative ways they tell stories visually and verbally. This course closely studies narrative films from around the world, from the silent era to the present, and in the process it introduces students to the basic elements of film form, style, and narration. Some of the films to be considered are: Broken Blossoms, Battleship Potemkin, Citizen Kane, Contempt, The Bicycle Thief, Ugetsu, Rear Window, Woman in the Dunes, The Marriage of Maria Braun, Days of Heaven, and Moulin Rouge.

**(Spring) Gods and Mortals: Myth in Ancient Art and Literature**  
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement  
(Classics 211)  
Many ancient images tell completely different versions of myth from those portrayed in Greek and Roman literary sources. By juxtaposing distinctive modes of communication in the ancient world, students will analyze the rhetorical uses of myth, both then and now. Students will also examine the range of possibilities for translating and interpreting text and image, which will alert them to the vitality of myth as a language of its own, transcending historical parameters.

**(Fall) The Hellenistic World: From Alexander to Cleopatra**  
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement  
Hellenistic art has often been regarded as a chaotic, decadent phase between the golden ages of classical Athens and imperial Rome. In fact, the period in the Mediterranean from the death of Alexander the Great in 323 B.C.E. to the Roman conquest of Egypt in 31 B.C.E. saw the creation of some of the greatest masterpieces of ancient art. The course addresses the new themes and purposes of art in a cosmopolitan culture with its competing centers (Pergamon, Rhodes, Antioch, Alexandria, and Rome); its private patrons, public museums, art historians, and critics; and its innovations in science and politics.  
Prerequisites: soph, jr, sr, or permission of the instructor

(Fall) Nineteenth-Century European Art: Neoclassicism to Impressionism - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course traces major developments in European art during the periods traditionally designated by the terms neoclassicism, romanticism, realism, and impressionism. Focusing primarily on French art, but branching out to consider the art of England and Spain, it explores the key artistic themes of the century: the engagement with history, the rise of nationhood, the experience of the urban, the Marxist proposal, the grappling with modernity, the dealing in individual temperaments. Among the major figures to be studied are Constable, Courbet, David, Delacroix, Goya, Ingres, Manet, Monet, and Renoir.

(Fall) History of Photography - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This survey course traces the rise and development of photography in the United States and, to a lesser extent, Mexico and the countries in Western Europe. It charts the wide range of work with the camera, including commercial, so-called "vernacular," and fine art projects, and considers pictures from photography's very beginnings in the mid-nineteenth century to today's practices. Among the major figures to be discussed are the early landscape photographers O'Sullivan and Watkins, the avant-garde photographers Stieglitz and Genthe, the Depression-era photographers Evans and Lange, and the so-called New Documentarians Arbus and Frank.

(Fall) Building the Modern Environment: Architecture 1890-1990

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

An exploration of major movements and personalities in architecture from the late nineteenth century to the present. Emphasizing the United States against the background of European developments, the course considers the search by architects, including Frank Lloyd Wright, Le Corbusier, and Frank Gehry, for a language of form and space that captures the contemporary spirit as it elevates society to a higher plane of existence. Discussion focuses on issues of technology and utopia, the skyscraper, and the collision of tradition, modernity, and postmodernism in architecture since 1945.

(Spring) Modern Art: 1885-1945 - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course examines the great ruptures in European art that today we call modernist. It relates aspects of that art to the equally great transformations in European society: revolutionary ferment, the rise and consolidation of industrial capitalism, colonization and its discontents, and world war. Among the major figures to be studied are Duchamp, Matisse, Malevich, Picasso, Seurat, and van Gogh.

*(Spring)* Contemporary Art - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course traces the different paths of painting, sculpture, and photography in the United States and, less so, Western Europe since World War II. Initially, most of these paths traced a relationship with the "crisis of modernism," but increasingly, they have taken on a different vitality, drawing energy from a wide variety of postmodern and postcolonial subjects and debates: identity politics, transnationalism, diaspora. Can something that can be identified as an avant-garde practice exist in such a context? What kinds of questions are appropriate to ask about works that stridently attempt to suspend the very category of art?

(Fall) Issues in Art History: Twentieth-Century Art in the Global Context

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): This course is designed to broaden the traditional boundaries of a survey of a single period by concentrating on an important theme or issue that does not necessarily fit into the chronological subdivisions of art history. All aspects of the topic are studied, and the literature and methods of other disciplines are invoked wherever relevant. Attention is paid to art history as a present-day construction and to the students' critical self-awareness.

This course examines the visual arts in Africa, the Middle East, Latin America, and Asia from the early twentieth century to the present. Topics, drawn from each of the regions, will include painting, sculpture, performance, film, and architecture. Together, these case studies will explore the role of local cultures in the formation of global modernism, the phenomenon of diaspora, and the relationship between modernity in the Euro-Atlantic region and its international manifestations. Readings in Orientalist and postcolonial criticism will provide a theoretical framework for the topics considered.

Prerequisites: soph, jr, sr, or permission of instructor

(Spring) Issues in Art History: Art and Cultural Politics

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): This course is designed to broaden the traditional boundaries of a survey of a single period by concentrating on an important theme or issue that does not necessarily fit into the chronological subdivisions of art history. All aspects of the topic are studied, and the literature and methods of other disciplines are invoked wherever relevant. Attention is paid to art history as a present-day construction and to the students' critical self-awareness.

The course explores the roles that art has played in politics from antiquity to the present, paying special attention to war booty and the ongoing struggles over cultural property. We will consider the current debate about public and private ownership of ancient and foreign art, and the ways it assumes status as a bearer of cultural values. The purposeful destruction and effacement of monuments will be a focus.

Prerequisites: Soph, jr, sr, or permission of the instructor

(Fall) Seminar in Twentieth-Century Art: Art of the 1960s
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

The seminar will explore the artistic directions and trends defining the 1960s in America, spanning the rise of minimalism, pop art, color field painting, video, and performance art to the emergence of conceptual art around 1968. While at aesthetic odds and thematic cross purposes, these movements are visually unified by a certain cool, impersonal, and detached stylistic character. By examining the work of artists as well as key critical texts, works, and films, the 1960s will be probed for its cultural and social complexity, a decade that many now view as marking the end of modernism with a radical consciousness that inspired innovative artist forms.

(Spring) Seminar in Twentieth-Century Art: Reconstructing Modernity
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This seminar will examine art, architecture, and design in Europe after World II and the Holocaust. Attempts at rewriting the history of modernism, redefining a new urban consciousness, and literally rebuilding the world will be among the themes explored in the work of artists' groups such as COBRA and the situationists; architectural organizations such as Archizoom, Archigram, and CIAM; design movements associated with the Ulm school, journals such as Domus; and the theoretical writings of Débord, Sartre, and Tafuri. Students will be responsible for weekly readings, a substantial research project, and in-class presentations.

ARTH-360-01 - Art History - 2005-2006
(Fall) Seminar in Asian Art: Indian Photography
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Explores the way photography seized hold of the imagination in India. Nineteenth-century documentary photographs of Indian ruins memorialized the reach of the British Empire when used for dioramas, panoramas, and magic lantern shows on the streets of London. By the twentieth century, manipulated photographs and mechanically reproduced "photos" of Indian gods complicated photography's claim to truth. Students will debate scholarly views and develop research projects to examine photography's imaginative uses in India.

(Spring) Third Year Chinese
Credits/PE Units: 4; Requirements met: Meets Language requirement; does not meet a distribution requirement
This course helps students to build both linguistic and communicative competence in Mandarin Chinese through reading, discussing, and writing about authentic texts. Newspapers, essays, and short stories will be the teaching materials for the course. An interactive approach will be incorporated into the curriculum to improve students' conversational skills. The class will be conducted mostly in Chinese, and class hours will be supplemented by individual work in the Language Resource Center.
Prerequisites: Asian Studies 213 or equivalent
Notes: 2 meetings (75 minutes)
Instructors: A. Kao

ASIAN-312-01 - Asian Studies - 2005-2006
(Fall) Fourth-Year Chinese I
Credits/PE Units: 4; Requirements met: Meets Language requirement; does not meet a distribution requirement
(Speaking- and writing-intensive)
A continuation of Asian Studies 310-311, this course will advance students' abilities in Chinese language reading, listening, speaking, and writing through close study of contemporary Chinese short stories and nonfiction works. Focusing on material by writers such as Yu Hua, Su Tong, and Wang Meng, the course will also introduce supplementary materials such as films, television dramas, and newspaper articles. The class will be conducted entirely in Chinese.
Prerequisites: Asian Studies 311 or equivalent
Notes: 3 meetings (50 minutes)

(Fall) Women's Issues in Arab Women Novelists' Works - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Language requirement or Humanities I-A requirement
(Speaking- and writing-intensive; Taught in English; Women's Studies, Literature)
We will analyze the translated works of five Arab women novelists, concentrating on their views of family, arranged marriage, child rearing, divorce, work, national and religious identity and traditional and modern social dynamics in Arab societies. Course work will also include films and documentaries by Arab women, addressing similar issues.
Notes: 1 meeting (3 hours)
Instructors: M. Jiyad

(Spring) Women's Issues in Arab Women Novels
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Speaking- and writing-intensive)
Arab women novelists' works that address issues such as arranged marriage, divorce, child rearing and custody, rights and opportunities to work, national and religious identity, political and social freedom will be surveyed and discussed. The aim is to offer an alternative view presented in a balanced and fair approach.
Notes: 1 meeting (3 hours)
Instructors: M. Jiyad
Expected enrollment: 10

(Spring) Comparative Politics of the Middle East - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(International Relations 323s; Politics 323s)

ASIAN-324-01 - Asian Studies - 2005-2006
(Fall) Advanced Japanese I
Credits/PE Units: 4; Requirements met: Meets Language requirement; does not meet a distribution requirement
This course helps students attain higher level of proficiency in modern Japanese through the extended use of the language in practical contexts. The class will be conducted mostly in Japanese.
Prerequisites: Asian 223s or equivalent
Notes: 3 meetings (50 minutes)
Instructors: Y. Kawahara
Expected enrollment: 15

**(Fall) Asian Religions: Fall 2004: Hindu Sacred Narratives** - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

Preamble (for topics courses): This course provides the opportunity for intensive study in Asian religious traditions. One of the traditions listed here is considered each time the course is offered. The student may therefore receive credit more than once. I. The Islamic Tradition II. History of Chinese Thought III. Japanese Religious Traditions IV. Hinduism

Prerequisites: 200-level religion course or permission of instructor

Instructors: I. Peterson

Expected enrollment: 15

**Spring** Third-Year Japanese

Credits/PE Units: 4; Requirements met: Meets Language requirement; does not meet a distribution requirement

This course helps students attain higher level of proficiency in modern Japanese through the extended use of the language in practical contexts. The class will be conducted mostly in Japanese.

Prerequisites: Asian 324f or equivalent

**Spring** Colonialism and Culture in British India - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

This course examines the relationship between British representations of and responses to Indian culture and the consolidation of British colonial hegemony in India (eighteenth through twentieth centuries). Exploration of cultural dimensions of colonial discourse through selected case studies of an interdisciplinary nature, focusing on British attitudes toward Indian women and religion, Indian literature and art, and social institutions such as caste and s sweater. Visual and verbal texts from British fiction, scholarly essays, textbooks, and official documents. Critical readings, including James Mill's *History of India*, Orientalist translations, and Rudyard Kipling's short stories.

Notes: 2 meetings (75 minutes)

Instructors: I. Peterson

ASTR-104-01 - Astronomy - 2005-2006
(Spring) Planet Earth
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Geology 104)
This course traces the origins of the universe, our solar system, and Earth, then follows the Earth's evolution through geologic processes. Topics include planetary origins, atmospheres, interiors, and magnetic fields; plate tectonics; volcanism, weathering, earthquakes, faults and folding on terrestrial planets; distribution and limitations of Earth's resources; and the search for the origins of life. Alternate weekly problem sets and in-class quizzes.
Notes: 2 meetings (75 minutes)
Instructors: D. Dyar
Expected enrollment: 80

ASTR-104-02 - Astronomy - 2005-2006

**ASTR-137-01 - Astronomy - 2005-2006**
*(Fall) The Sky - *Not offered this year/term*
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
A lab/tutorial introduction to observing and understanding the extraterrestrial sky. Daily and annual motions of the sun, moon, planets, and stars; celestial coordinate systems; apparent brightnesses and colors of the stars; time; calendars. Observations at the Williston Observatory with the unaided eye, visually with the eight-inch telescope, and by electronic camera with computer-controlled telescopes.
Notes: 1 meeting (90 minutes); additional lab by arrangement. Primary work of the course will be done in observing sessions arranged on an ad hoc basis
Instructors: T. Dennis
Expected enrollment: 25

**ASTR-142-01 - Astronomy - 2005-2006**
*(Fall) Light, the Universe, and Everything - *Not offered this year/term*
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Writing-intensive; Interdepartmental 142f)
Beginning with the phenomena - on both sides of the eye - that give rise to visual sensation, we examine cosmic structure on all levels: from the subatomic, molecules and cells, organisms and species, and up to planets, stars, and galaxies. This structure exists in time as well as space, so that we can "see" evolution from the earliest microseconds into the present-day complexity. We pay particular attention to the mechanisms whereby life operates within the cosmic hierarchy: how it obtains energy and material, stores information, and ultimately has the capacity to look into time and space to read this story.
Notes: 2 combined lecture-lab-discussion periods (135 minutes each, including evenings at the observatory)
Instructors: T. Dennis
Expected enrollment: 12

**ASTR-215-01 - Astronomy - 2005-2006**
*(Fall) History of Astronomy - *Not offered this year/term*
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course looks at astronomy and cosmology from earliest times - Egyptian, Babylonian, Greek, Islamic; the medieval universe; Newtonian universe; mechanistic universe of the eighteenth and nineteenth centuries; gravitational theory; origin, structure, and evolution of stars and galaxies; developments in modern astronomy. Nontechnical, with emphasis on history and cosmology.
Notes: 2 meetings (75 minutes);
Expected enrollment: 25

**ASTR-220-02 - Astronomy - 2005-2006**
*(Spring) Topics in Astronomy: Astronomy and Public Policy*
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Astronomical issues that impact our society will be explored in a seminar format. The approach for each issue will be to pose a question based on a body of scientific evidence with potential consequences for human society. The answers to these questions will be investigated both on scientific and societal grounds. Scientific issues include the potential threat of collisions between the earth and other solar system bodies and the potential existence of extraterrestrial life.
Prerequisites: one course in a physical science or permission of instructor
Notes: Hampshire College, Cole 333, Mondays 6:30-9:30pm
Instructors: S. Hameed

**ASTR-223-01 - Astronomy - 2005-2006**
*(Fall) Planetary Science*
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Geology 223f)
An introductory course for physical science minors and majors. Topics include origin and evolution of the planets; planetary orbits, rotation, and precession; gravitational and tidal interactions; asteroids, comets, and planetary rings; meteorites; interiors and atmospheres of the Jovian and terrestrial planets; geology, tectonics, and mineralogy of the terrestrial planets and satellites; new data from Mars Pathfinder, Lunar Surveyor, and current NASA missions.
Prerequisites: any physical science course
Notes: 2 meetings (75 minutes); fall 2005 classes to be held at UMass
Instructors: W. Irvine
Expected enrollment: 50
ASTR-224-01 - Astronomy - 2005-2006
(Fall) Stellar Astronomy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The basic observational properties of stars will be explored in an experimental format relying on both telescopic observations and computer programming exercises. No previous computer programming experience is required.
Prerequisites: Physics 115, Mathematics 101 or equivalent
Notes: 2 meetings (2 hours, 45 minutes)
Instructors: The department

ASTR-224-01 - Astronomy - 2005-2006
(Spring) Stellar Astronomy
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The basic observational properties of stars will be explored in an experimental format relying on both telescopic observations and computer programming exercises. No previous computer programming experience is required.
Prerequisites: Physics 115, Mathematics 101 or equivalent
Notes: 2 meetings (2 hours, 45 minutes); Spring 2006 classes to be held at Smith
Instructors: S. Edwards
Expected enrollment: 25

ASTR-225-01 - Astronomy - 2005-2006
(Spring) Galactic and Extragalactic Astronomy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The basic observational properties of galaxies are explored in an experimental format relying on both telescopic observations and computer programming exercises. No previous computer experience is required.
Prerequisites: Physics 115, Mathematics 101 or equivalent
Notes: 1 meeting (3 hours);
Instructors: The department
Expected enrollment: 25

(Fall) Cosmology
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course looks at cosmological models and the relationship between models and observable parameters. Topics in current astronomy that bear upon cosmological problems, including backgound electromagnetic radiation, nucleosynthesis, dating methods, determinations of the mean density of the universe and the Hubble constant, and tests of gravitational theories. Discussion of some questions concerning the foundations of cosmology and its future as a science.
Prerequisites: Mathematics 101 and a physical science course
Notes: 2 meetings (75 minutes); fall 2005 classes to be held at Hampshire
Instructors: G. Greenstein
Expected enrollment: 25

(Spring) Cosmology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Galaxies, clusters of galaxies, redshift and Hubble constant. Quasars and X-ray bursters. Models of an expanding universe. The geometry of space-time, and how light travels through it; how gravity slows the expansion and "dark energy" might accelerate it. The big bang, cosmic microwave background radiation, and synthesis of deuterium and helium; the cosmological distance scale, age and future prospects of the universe.
Prerequisites: Astronomy 142 or a strong physical science background either in high school or at MHC
Notes: 2 meetings (75 minutes) plus 2 hour lab to be arranged.
Instructors: The department

ASTR-243-01 - Astronomy - 2005-2006
(Spring) Stars: Time and Transformation in the Universe - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Writing-intensive)
Gravity, falling, and orbits; gravitational and kinetic energy; orbital mechanics in star clusters and space craft; gravitational collapse and the Kelvin timescale; black holes; nuclear and atomic binding energy; chemical abundances in the universe; nuclear burning in stars and its timescale; history of the chemical elements; life histories of stars; stars as distance indicators; cosmological distance scale; expansion of the universe; cosmological timescale; narrative history of the universe.
Prerequisites: 4 admission units in math and permission of instructor
Notes: 2 meetings (75 minutes), 1 evening lab (2 hours)
Instructors: The department

**ASTR-295-01** - Astronomy - 2005-2006

**ASTR-330-01** - Astronomy - 2005-2006
(Fall) Seminar: Topics in Astrophysics: Asteroids
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Geology 330f (03))
This course will cover the relationship of asteroids and meteorites. Topics that will be discussed include how asteroids and meteorites are classified, spectroscopic measurements of asteroids, and how meteorites are transferred from asteroids to the Earth. No prior knowledge of asteroids or meteorites will be assumed.
Prerequisites: any 200 level astronomy or geology course
Notes: 1 meeting (3 hours)
Instructors: T. Burbine

**ASTR-330-01** - Astronomy - 2005-2006
(Spring) Seminar: Topics in Astrophysics: Spectroscopy of the Planets
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Geology 330s (01))
Hands-on experience with spectroscopic data acquired from planetary atmospheres and surfaces. Four course modules include: 1) theory of spectroscopy and its application to the planets and stars; 2) broadband imaging of planetary surfaces; 3) in situ spectroscopy of planetary surfaces; 4) spectroscopic techniques used to search for exo-solar planets, and 5) analysis of an unidentified spectrum. The goal will be to identify important absorption/emission features based on knowledge acquired throughout the semester.
Prerequisites: 2 semesters of astronomy, geology, or physics
Notes: 1 meeting (3 hours)
Instructors: C. Hamilton
Expected enrollment: 18

**ASTR-335-01** - Astronomy - 2005-2006
(Fall) Modern Astrophysics
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
How do astronomers determine the nature and extent of the universe? Following the theme of the "Cosmic Distance Ladder," we explore how our understanding of astrophysics allows us to evaluate the size of the observable universe. We begin with direct distance determinations in the solar system and nearby stars. We then move on to spectroscopic distances of stars; star counts and the structure of our galaxy; Cepheid variables and the distances of galaxies; the Hubble Law and large-scale structure in the universe; quasars and the Lyman-alpha forest.
Prerequisites: Physics 115 and one prior physics or astronomy course at the 200 level or above
Notes: 2 meetings (90 minutes); fall 2004 classes to be held at UMass
Instructors: G. Wilson
Expected enrollment: 25

**ASTR-337-01** - Astronomy - 2005-2006
(Spring) Observational Techniques in Infrared and Optical Astronomy - *Not offered this year/term*
An introduction to the techniques of gathering and analyzing astronomical data, particularly in the optical and infrared. Telescope design and optics; instrumentation for imaging, photometry, and spectroscopy; astronomical detectors; computer graphics and image processing; error analysis and curve fitting; data analysis and astrophysical interpretation, emphasizing globular clusters.

Prerequisites: Astronomy 224, 225, Physics 216

Notes: 2 meetings (75 minutes), 1 evening lab (3 hours)

Instructors: The department

**ASTR-338-01 - Astronomy - 2005-2006**

(Spring) Techniques of Radio Astronomy

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

An introduction to radio astronomy equipment, techniques, and the nature of cosmic radio sources. Radio receiver and antenna theory; radio flux, brightness temperature, and the transfer of radio radiation in cosmic sources; effect of noise, sensitivity, bandwidth, and antenna efficiency; techniques of beam switching, interferometry, and aperture synthesis; basic types of radio astronomical sources: ionized plasmas, masers, recombination and hyperfine transitions; nonthermal sources; applications to the sun, interstellar clouds, and extragalactic objects.

Prerequisites: two semesters of physics and two semesters of calculus

Notes: 2 meetings (75 minutes) and observation sessions; Spring 2006 classes to be held at UMass

Instructors: R. Snell

Expected enrollment: 25

**ASTR-351-01 - Astronomy - 2005-2006**

(Spring) Astrophysics I: Stars and Stellar Evolution

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

This course looks at physical principles governing the properties of stars, their formation and evolution: radiation laws and the determination of stellar temperatures and luminosities; Newton's laws and the determination of stellar masses; hydrostatic equilibrium and the thermodynamics of gas and radiation; nuclear fusion and stellar energy generation; physics of degenerate matter and the evolution of stars to white dwarfs, neutron stars, or black holes; nucleosynthesis in supernova explosions; dynamics of mass transfer in binary systems; viscous accretion disks in star formation and X-ray binaries.

Prerequisites: two 300-level physics courses

Notes: 2 meetings (75 minutes); offered at Amherst College s '06

Instructors: J. Kwan

**ASTR-352-01 - Astronomy - 2005-2006**

(Spring) Astrophysics II: Galaxies - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

This course applies physics to the understanding of astronomical phenomena. Physical processes in the gaseous interstellar medium; photoionization in HII regions and planetary nebulae; shocks in supernova remnants and stellar jets; energy balance in molecular clouds. Dynamics of stellar systems; star clusters and the virial theorem; galaxy rotation and the presence of dark matter in the universe; spiral density waves. Quasars and active galactic nuclei: synchrotron radiation; accretion disks, supermassive black holes.

Prerequisites: two 300-level physics courses

Notes: 2 meetings (75 minutes)

Instructors: The department

**BIOCH-311-01** - Biochemistry - 2005-2006

*(Fall) Protein Biochemistry and Cellular Metabolism*

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement (Biological Sciences 311f; Chemistry 311f)

This course is a rigorous introduction to the study of protein molecules and their role as catalysts in the cell. Topics include general principles of protein folding, protein structure-function correlation, enzyme kinetics and mechanism, carbohydrate and lipid biochemistry, and metabolic pathways (catabolic and anabolic) and their interaction and cross-regulation. Biological transformation of energy is considered in light of the principles of thermodynamics.

Prerequisites: Biological Sciences 210 (can be taken concurrently), Chemistry 302

Notes: 3 meetings (75 minutes), 1 lab (4 hours)

Instructors: L. Hsu

Section Instructors: 01 LAB L Hsu | 02 LAB L Hsu

*(Spring) Nucleic Acids Biochemistry and Molecular Biology*

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement (Biological Sciences 314s; Chemistry 314s)

This course is an in-depth examination of DNA and RNA structures and how these structures support their respective functions during replication, transcription, and translation of the genetic material. Emphasis is on the detailed mechanisms associated with each step of gene expression. Discussions incorporate many recent advances brought about by recombinant DNA technology.

Prerequisites: Biological Sciences 210, Chemistry 302, Biochemistry 311, or permission of instructor

Notes: 3 meetings (75 minutes), 1 lab (4 hours)

Instructors: M. Chander

Section Instructors: 01 LAB M Chander | 02 LAB M Chander

*(Spring) Topics in Biochemistry and Molecular Biology - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

This course each year examines a number of important and exciting topics in biochemistry, molecular biology, and other related fields of biology. The intellectual and research development that formulated these fundamental concepts is traced through extensive readings of the primary literature. Discussions emphasize the critical evaluation of experimental techniques, data analysis, and interpretation. Substantial student participation in the form of oral presentation is expected.

Prerequisites: Biochemistry 311, 314, or permission of instructor

Notes: 1 meeting (2 hours, 30 minutes)
Instructors: L. Hsu

**BIOL-145-01** - Biological Sciences - 2005-2006  
**(Fall) Introductory Biology: A Green World**  
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement  
First-year seminar (Writing-intensive)  
Preamble (for topics courses): Biological Sciences 145 is a topical first-year seminar, serving as a general introductory biology course for entry-level majors and nonmajors. It includes a laboratory component, is considered an alternative to Biological Sciences 150, and can count as a prerequisite for Biological Sciences 200.  
This course examines the themes of plant life that we see in the woods and fields around us, in the exotic plants in our greenhouses, and in the plants we depend on for food. We will study plants living in surprising circumstances, going into winter, escaping from gardens, reclaiming farmland, cooperating with fungi and insects, and fighting for their lives. We will find that plants challenge some conventional, animal-based assumptions about what matters to living things. In labs, students will seek to answer their questions about how plants grow in nature with studies of plant structure and function, ecology, and evolution.

Preamble (for topics courses): Biological Sciences 145 is a topical first-year seminar, serving as a general introductory biology course for entry-level majors and nonmajors. It includes a laboratory component, is considered an alternative to Biological Sciences 150, and can count as a prerequisite for Biological Sciences 200.  
How are animal bodies built to deal with living on earth? In this course we will study the function of cells, organs, and organ systems that have evolved to help animals make their way through the physical and chemical environment. We'll consider the common needs of animals--needs such as feeding, breathing, and reproducing--and the diverse solutions they have devised. A range of life, from unicellular organisms to animals with backbones (including mammals) will be considered.

Preamble (for topics courses): Biological Sciences 145 is a topical first-year seminar, serving as a general introductory biology course for entry-level majors and nonmajors. It includes a laboratory component, is considered an alternative to Biological Sciences 150, and can count as a prerequisite for Biological Sciences 200.

Most organisms are notably unlike ourselves—a tapestry of bacteria, protozoans, algae, and, off by themselves, the plants, fungi, and animals. We will survey the whole range of organisms, especially those in the ponds and forests of our campus. Labs will start in the field (many opportunities to get wet or muddy). You will design studies that play to the special features of the organisms you have found. The class counts exactly the same as Biology 150, but it is a small class rather than a large one, addressed to students intrigued by natural history.

First-year seminar (Writing-intensive)

Preamble (for topics courses): Biological Sciences 145 is a topical first-year seminar, serving as a general introductory biology course for entry-level majors and nonmajors. It includes a laboratory component, is considered an alternative to Biological Sciences 150, and can count as a prerequisite for Biological Sciences 200.

This course offers an introduction to the central concepts and patterns underlying much of modern biology, including the basic principles of cell biology, genetics, evolution, and energetics. We will examine several "model organisms," such as E. coli, baker's yeast, Arabidopsis, maize, the roundworm, and the mouse to see how and why experimental results in these systems can have such general importance and broad applicability.

(Fall) Introductory Biology: Form and Function

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

By exploring some of the basic structural and functional systems found in plants and animals, this course will examine assorted strategies that organisms have evolved to solve life's "major problems." Topics will include energy acquisition, water balance, control systems, and movement. Labs will introduce students to selected plant and animal systems, data collection and analysis, library resources, and scientific writing.

(Fall) Introductory Biology: Diversity of Life

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

We will survey the great diversity of life on earth from the archaebacteria that live in hot sulfur springs to giant sequoia trees to singing birds. In our survey, we will discover a variety of life cycle patterns, different ways of extracting energy from the environment, and multiple life history strategies. Labs will explore biological diversity via collecting trips around campus as well as laboratory experiments and will introduce students to data collection, manipulation, and analysis.

(January) Ethnobotany

Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.

The aim of this course is to raise the interest of the students in the study of medicinal plants, and in the process of discovering new natural products from plants using an ethno botanical approach. Students will be given extended information about world ethnobotanical traditions. They will learn about plant taxonomy, plant geography, chemistry of medicinal plants, and methods for the isolations of active constituents. In addition, problems of conservation ecology of the rainforests and endangered plant species will be discussed.

(January) The Structure of Memory
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Neuroscientists and psychologists have made great strides in the understanding of human memory in the past few years. It is now possible to get a fairly good basic understanding of how different kinds of memory systems work. In eleven days of class, including daily assignments, games, and exercises, this course will provide information about the several different memory systems that reside in your brain. You may not end up with a better memory, but you will at least understand why you forget.
Notes: Class will meet for 75 minutes every day, and there will be daily assignments or exercises to illustrate and reinforce the lecture.

BIOL-321-01 - Biological Sciences - 2005-2006
(Fall) Conference Course: Chemical Communication in Vertebrates
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Speaking-intensive)
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.
How is information about physiological states coded in chemical information passed between animals? How is this information passed between organs in the body? In this course we'll read and discuss the primary literature in biology to look in depth at the nature of chemical communication in vertebrates. We will study hormones, pheromones and neurotransmitters, the neuroendocrine mechanisms that mediate their functions in the body, and the social and physical contexts in which these signalling mechanisms operate.
Prerequisites: Biological Sciences 220 or permission of instructor
Instructors: S. Bacon
Expected enrollment: 14

BIOL-321-01 - Biological Sciences - 2005-2006
(Spring) Conference Course: Animal Cloning and Stem Cells
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Speaking-intensive)
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.
When Dolly the lamb was born, the world changed. Developmental biologists have been cloning organisms for decades--why the intense emotion over a sheep? This course will focus on the history of animal cloning, exploring both conceptual and technical advances over time. We will look at the current state of mammalian cloning and the debate about human stem cell research, reading from primary literature. While the emphasis will be on the biological phenomena involved, we will also discuss the legal, ethical, and moral implications of human cloning and stem cell research.
Prerequisites: Per instructor ONLY. e-mail rfink.
Notes: Thanks to an Innovation Grant, students in this course MAY have the opportunity for a two-day field trip to Washington, D.C. to attend a meeting of the President's Council on Bioethics.

BIOL-321-02 - Biological Sciences - 2005-2006
(Spring) Conference Course: The Neurobiology of Art and Music
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.
Art and music are a part of all human cultures. Is there something about the human brain that drives us to paint and sing? We will examine how the brain simultaneously processes different aspects of a visual object, such as shape, color, and depth, and ask how this processing may affect the way we draw and paint. We will ask whether musical dissonance and consonance are biologically or culturally determined and whether or not different parts of the brain process different aspects of music such as pitch, melody, harmony, rhythm, and the emotional content of a musical piece.
Prerequisites: jr or sr with at least 8 credits at the 200 level in biology, neuroscience and behavior, studio art, art history, or music
Instructors: S. Barry
Expected enrollment: 10

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.
This course will focus on biological systems that push the limits of structural and physiological possibility. For example, midges flap their wings at up to 1000 Hz; bar-headed geese migrate over Mount Everest; deep-sea fish withstand pressures near 300 atmospheres; certain frogs can allow their body temperatures to drop below 0 degrees C. We will explore the diverse mechanisms that underlie how organisms reach extreme levels of performance and survive in extreme environments through readings and discussions.
Prerequisites: Biological Sciences 213 or 220 or permission of instructor

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.
In this course, primary literature will be used as a foundation for discussing global emerging and reemerging infectious diseases. As a group, we will discuss both the science behind these diseases as well as some of the social aspects relevant to the present day spread of infectious disease. Students will be expected to work in collaborative groups to present background material and original research studies on various aspects of specific pathogenic microorganisms (e.g., vaccine targets, therapeutic modalities, pathogenic mechanisms, immune evasion strategies, transmission pathways, etc.).

**BIOL-334-01** - Biological Sciences - 2005-2006
*(Spring) Biostatistics -* *Not offered this year/term*
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Statistics 354s)
Introduction to statistical techniques used most commonly in biological and medical sciences. Emphasis will be on hypothesis testing, regression, analysis of variance, statistical power, comparisons of confidence intervals, time-series analysis, spatial analysis, and Bayesian inference. Examples and datasets will be drawn from student independent projects.
Prerequisites: one of the following: Biological Sciences 210, 213, 331, calculus, Statistics 240, and permission of instructor
Notes: 1 meeting (3 hours); offered alternate years

**BIOL-335-01** - Biological Sciences - 2005-2006
*(Spring) Mammalian Anatomy*
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course will examine the fundamental structural organization of the mammalian body. The lecture portion of the class will focus largely on humans, and students will gain practical insight into other mammalian systems in the laboratory.
Prerequisites: Biological Sciences 213
Notes: 3 meetings (50 minutes); 1 lab (3 hours)
Instructors: K. Samonds
Section Instructors: 01 LAB K Samonds | 02 LAB K Samonds |
Expected enrollment: 24

**BIOL-340-01** - Biological Sciences - 2005-2006
*(Spring) Eukaryotic Molecular Genetics*
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course will examine the role of molecular genetic analysis in the study of phenomena such as human disease, gene regulation or pathogen biology. There will be group discussions of original research articles and reviews.
Prerequisites: Biological Sciences 200 and 210
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: A. Springer
Section Instructors: 01 LAB A Springer | 02 LAB A Springer |
Expected enrollment: 14

**BIOL-344-01** - Biological Sciences - 2005-2006
*(Spring) Biogeochemistry of Northern Ecosystems*
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking- and writing-intensive; Environmental Studies 344s)
Global climate models and recent evidence show that ecosystems in the northern latitudes are extremely sensitive to climate change. This interdisciplinary science course examines boreal, subarctic, and arctic ecosystems through the study of nutrient cycling, plant ecology, hydrology, soil processes, and biosphere-atmosphere interactions. Topics include fundamentals of biogeochemical elements such as carbon and nitrogen at scales from the microscopic to global, sensitivity, feedbacks to climate change, and disturbance processes such as fire and permafrost degradation.
Prerequisites: At least two semesters of biology, chemistry, or environmental science, and permission of the instructor
Notes: 1 meeting (3 hours). Please sign up for this course as Environmental Studies 344
Instructors: B. Hooker
Expected enrollment: 15

**BIOL-395-01** - Biological Sciences - 2005-2006
*(Fall) Independent Study*
Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement.
Prerequisites: jr, sr, and permission of department; submit application in biological sciences office or via the department's Web site
Notes: NOTE: See safety training restrictions in description of Biological Sciences 295
Instructors: The department.

CHEM-100-01 - Chemistry - 2005-2006
(Fall) Problem Solving in General Chemistry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is designed to introduce chemistry to students who have had difficulty with quantitative problem solving. The syllabus will follow closely that of Chemistry 101, and students will participate in the 101 laboratory. Chemistry 100 differs from 101 not in content, but in format: through a small enrollment and five weekly course meetings rather than three, the course emphasizes intensive, faculty-supervised group work and the development of quantitative problem-solving skills. Chemistry 100 serves equally with 101 as an introduction to the department's core sequence. Students should also enroll in a lab section of Chemistry 101.
Notes: 5 meetings (50 minutes), 1 lab (3 hours)
Instructors: The department
Expected enrollment: 20

(Fall) General Chemistry I
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course provides introduction and development of fundamental concepts including stoichiometry, reactions in aqueous solutions, thermochmistry, atomic structure, chemical bonding, and acid-base reactions. The laboratory emphasizes basic skills, quantitative chemical measurements, and principles discussed in lectures.
Notes: 3 meetings (75 minutes), 1 lab (3 hours)

CHEM-201-01 - Chemistry - 2005-2006
(Spring) General Chemistry II
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course provides background in basic principles of physical, analytical, and inorganic chemistry essential to the study of all chemical phenomena. Topics include elementary principles of molecular electronic structure, quantitative treatment of chemical equilibrium with applications to solubility, acid-base, and electron transfer reactions, introduction to chemical kinetics and thermodynamics, and the chemistry of coordination compounds. Laboratory experiments will include classical analytical and kinetic techniques, preparation of inorganic compounds, and an introduction to ab initio electronic structure calculations.
Prerequisites: Chemistry 100 or 101 or permission of instructor
Notes: 3 meetings (75 minutes), 1 lab (3 hours)
Instructors: D. Cotter
Section Instructors: 01 LAB D Cotter | 02 LAB D Cotter | 03 LAB D Cotter | 04 LAB D Cotter | 05 LAB D Cotter | 06 LAB D Cotter | 07 LAB D Cotter | 08 LAB D Cotter | 09 LAB D Cotter |

CHEM-201-02 - Chemistry - 2005-2006

CHEM-202-01 - Chemistry - 2005-2006
(Fall) Organic Chemistry I
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Introduces organic chemistry, emphasizing the principles governing broad classes of reactions. Topics include stereochemistry, nucleophilic substitution and elimination reactions, the chemistry of alkanes, alkenes, alkynes, alcohols, and ethers, and an introduction to infrared and nuclear magnetic resonance spectroscopy. Laboratory work includes synthesis, practice in the techniques of distillation, crystallization, chromatography, molecular modeling, and identifying unknown organic compounds by chemical and spectroscopic means.
Prerequisites: Chemistry 100 or 101, 200 or 201 or permission of instructor
Notes: 3 meetings (75 minutes), 1 lab (3 hours)
Instructors: S. Browne

CHEM-202-02 - Chemistry - 2005-2006
(Fall) Organic Chemistry I
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Introduces organic chemistry, emphasizing the principles governing broad classes of reactions. CHEM-210-01 - Chemistry - 2005-2006
(Spring) Biotechnology: Science, Culture, and Ethics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
The development of a molecular understanding of the basis of life, and the application of this knowledge to alter and engineer living organisms, is an ongoing scientific revolution with far-reaching social and ethical considerations. This course introduces the science of the biotechnology revolution within its historical and social context; a description of the fundamental chemistry and molecular biology underlying these technologies is integrated with exploration of their social and ethical impacts. Topics to be covered include the structure of DNA, the human genome project, genetic engineering in agriculture, and cloning.
Prerequisites: Chemistry 100 or 101, Biological Sciences 151, or Interdepartmental Courses 121-122, or permission of instructor
Notes: offered every other year
Instructors: S. Decatur

CHEM-212-01 - Chemistry - 2005-2006
(Spring) Chemistry of Biomolecules
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
An examination of the major ideas of biochemistry from the point of view of the chemical sciences rather than the life sciences. Structures of important biomolecules. The role of energetics and reaction dynamics in biochemical processes. Major metabolic pathways are considered, including those of proteins, carbohydrates, lipids, and nucleic acids. This course is not intended for Biochemistry majors, who must complete Biochemistry 311f and 314s. First priority will be given to sophomores and juniors.
Prerequisites: Chemistry 202
Notes: 4 meetings (50 minutes)
Instructors: M. Nunez
Expected enrollment: 25

CHEM-220-01 - Chemistry - 2005-2006
(Fall) Simulating Chemistry, Biochemistry, and Materials Science: An Introduction to Scientific Computing - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
From the very early days of computers, they have been used in atomic simulations. Today, there are many algorithms for simulating chemical events. Simulations allow us to gain insight into possible causes of physical phenomena. This course introduces some of the methods used to simulate...
chemistry, biochemistry, and materials science. Potential energy surfaces, Monte Carlo methods, and molecular dynamics are introduced and applied to projects in chemistry, biochemistry, and materials science.

Prerequisites: Mathematics 202 (or equivalent), or permission of the instructor

Instructors: M. Gomez

Expected enrollment: 15

CHEM-250-01 - Chemistry - 2005-2006
(Fall) Introduction to the History of Chemistry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Writing-intensive)
Traces the growth of chemistry in several ways: as a body of knowledge and beliefs, as a practical means of intervention, and as a community of practitioners linked (or divided) by sociopolitical bonds and common interests, intellectual and otherwise. After an overview of chemical history and an introduction to various scholarly traditions in the field, the balance of the course will be devoted to case studies of narrower topics or episodes, such as the alchemical tradition and Robert Boyle, the eighteenth-century Chemical Revolution, nineteenth-century organic chemistry, Ionism, atomism and elementalism, chemistry and war, the quantum revolution, educational traditions, the role of women.

Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)

Instructors: D. Cotter

Expected enrollment: 25

CHEM-295-01 - Chemistry - 2005-2006
(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Independent work in chemistry can be conducted with any member of the department.
Prerequisites: soph, permission of department required every semester
Notes: Note: Students conducting an independent laboratory research project for course credit in a department, program, or laboratory covered by the College's chemical hygiene plan must participate in a safety training session before beginning research. Course credit will not be granted to students who do not receive safety training

CHEM-302-01 - Chemistry - 2005-2006
(Spring) Organic Chemistry II
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
A continuation of Chemistry 202 that addresses the chemistry of aromatic compounds, the carbonyl group, and a number of other functional groups. Examples drawn from compounds of biological interest. The laboratory includes organic synthesis and the identification of unknown compounds by chemical and spectroscopic means.

Prerequisites: Chemistry 202
Notes: 3 lectures (75 minutes), 1 lab (4 hours)
Instructors: D. Hamilton

CHEM-308-01 - Chemistry - 2005-2006
(Fall) Chemical Thermodynamics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
A consideration of the contribution of thermodynamics to the understanding of the "driving forces" for physical chemical changes and the nature of the equilibrium state.
Prerequisites: Chemistry 200 or 201, Chemistry 202, Mathematics 101, Physics 103 and 204, or 115
Notes: 3 meetings (75 minutes), 1 lab (4 hours)
Instructors: J. Van Wijngaarden

CHEM-315-01 - Chemistry - 2005-2006
(Spring) Experimental Methods
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Uses extended research-style projects to introduce advanced techniques in physical measurement (e.g., high-resolution spectroscopy, calorimetry, electrochemistry), separation and analysis (e.g., gas- and liquid-phase chromatography, mass spectrometry), and chemical synthesis (e.g., catalytic and enantioselective methods, biomolecules, polymers). Students will increase their repertoire of laboratory skills while learning to integrate concepts from different subdisciplines of chemistry into a unified experimental approach to problem solving.
Prerequisites: Chemistry 302, 2 lectures (75 minutes), 1 discussion (50 minutes), 1 lab (4 hours)
Instructors: S. Decatur
Section Instructors: 01 LAB S Decatur | 02 LAB S Decatur |
CHEM-317-01 - Chemistry - 2005-2006
(Spring) Principles of Polymer Chemistry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
An introduction to the study of molecules of high molecular weights with emphasis on synthetic rather than naturally occurring polymers. Topics include polymerization, structures, molecular weight determination, molecular weight distribution, chain configurations, rubber elasticity, and thermodynamics and statistical mechanics of polymer solutions.
Prerequisites: Chemistry 302
Notes: 2 meetings (75 minutes); 1 discussion (50 minutes); offered once every three years
Instructors: W. Chen

CHEM-319-01 - Chemistry - 2005-2006
(Spring) Nanoscience and Nanotechnology
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Nanoscience and nanotechnology is a recently defined field in science, drawing scientists from many disciplines into the study of the special properties of objects in the length scale between the visible and the atomic level. This course looks at nanotechnology from the disciplinary viewpoint of chemistry. Strategies for making, detecting and understanding molecular and atomic assemblies will be examined in the context of technologies and problems under current development. Ethical questions of the nano-craze will be addressed as well as the impact on society.
Prerequisites: Chemistry 202 required; Physics 204 or 115 recommended
Notes: two lectures per week; one fourth hour
Instructors: T. Adalsteinsson

CHEM-325-01 - Chemistry - 2005-2006
(Spring) Atomic and Molecular Structure
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is an introduction to experimental and theoretical approaches to the determination of the structure of atoms, molecules, and chemical bonds. Classroom work provides background in the theory of atomic and molecular structure and an introduction to quantum mechanics and spectroscopy.
Prerequisites: Chemistry 200 or 201, 202, Mathematics 202, Physics 216
Notes: 2 meetings (75 minutes), 1 discussion (50 minutes), 1 lab (4 hours)
Instructors: J. Van Wijngaarden
Section Instructors: 01 LAB J Van Wijngaarden | 02 LAB J Van Wijngaarden |
Expected enrollment: 20

CHEM-333-01 - Chemistry - 2005-2006
(Fall) Protein Structure and Function - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course introduces the subject of how the three-dimensional molecular structures of proteins determine and modulate their function. Topics will include fundamentals of protein chemistry and structure, comparisons of various structural motifs, and a survey of a wide range of protein functions. Examples will be drawn from the current literature on enzyme mechanisms, photosynthetic systems, motor proteins, ion channels, and topics of student interest.
Prerequisites: Chemistry 302
Notes: 2 meetings (75 minutes), 1 discussion (50 minutes); offered every other year
Instructors: M. Nunez

CHEM-334-01 - Chemistry - 2005-2006
(Spring) Advanced Inorganic Chemistry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The implications of molecular symmetry as expressed in the language of group theory are explored in some depth. Group theory provides the context for a discussion of the structural and spectroscopic properties of inorganic compounds, particularly those of the transition metals.
Prerequisites: Chemistry 302, 325
Notes: 2 meetings (75 minutes), 1 discussion (50 minutes); offered every other year
Instructors: D. Cotter
Expected enrollment: 20

CHEM-336-01 - Chemistry - 2005-2006
(Spring) Organic Synthesis - *Not offered this year/term
This course emphasizes recent developments in synthetic organic chemistry and deals with general synthetic methods and specific examples of natural product synthesis. It covers such topics as new methods of oxidation and reduction, stereospecific olefin formation, ring-forming reactions, and methods of carbon-carbon bond formation. The application of these reactions to the synthesis of naturally occurring compounds is examined. A general strategy for the synthesis of complex molecules is also presented.

Prerequisites: Chemistry 302

Notes: 3 meetings (50 minutes); offered every other year

Instructors: D. Hamilton

Expected enrollment: 35

CHEM-337-01 - Chemistry - 2005-2006

(Fall) Physical Organic Chemistry - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

An introduction to the concepts and methods of physical organic chemistry. Examination of reaction mechanisms and the experimental results that support these mechanisms. Topics include structure and reactivity, reaction kinetics, mechanism determinations, and Woodward-Hoffman Rules.

Prerequisites: Chemistry 302, 308

Notes: 2 meetings (75 minutes); offered every other year

Instructors: S. Browne

Expected enrollment: 35

CHEM-338-01 - Chemistry - 2005-2006

(Fall) Organic Chemistry III

An elective sequel to Organic Chemistry II, this course will build directly upon the standard organic chemistry sequence to add both depth of understanding and breadth of application. The course will draw heavily from the reaction classes covered in the earlier courses and add conceptual frameworks to support discussion of rearrangements of carbon skeletons, migrations to electron-deficient centers, the formation and reactions of carbenes, and symmetry control of electrocyclic processes. Recognizing that a key goal of contemporary organic chemistry is the preparation of new carbon frameworks, a brief introduction to the use of retrosynthetic analysis will also be included.

Prerequisites: Chemistry 302, Organic Chemistry II

Notes: 2 meetings (75 minutes)

Instructors: D. Hamilton

Expected enrollment: 30

CHEM-344-01 - Chemistry - 2005-2006

(Fall) Advanced Physical Chemistry - *Not offered this year/term

An introduction to topics in molecular spectroscopy and group theory.

Prerequisites: Chemistry 325

Notes: 2 meetings (75 minutes) and discussion section (75 minutes) per week

Instructors: The department

CHEM-345-01 - Chemistry - 2005-2006

(Fall) Physical Biochemistry

This course introduces the fields of biophysical chemistry and molecular biophysics, where biological systems are probed and described by physical techniques and models. Topics will include the physical properties of biological molecules (proteins, nucleic acids, carbohydrates, and lipid membranes); applications of spectroscopy to biological systems, both in vitro and in vivo; the mechanisms of light harvesting and energy conversion; and technological developments inspired by biological systems. Lecture sessions (two per week) will be complemented by a weekly discussion of papers from the contemporary literature.

Prerequisites: Chemistry 302 required; Chemistry 212, Biochemistry 311 or Biology 220 recommended, or permission of instructor

Notes: 2 lectures (75 minutes) and discussion section (75 minutes) per week

Instructors: S. Decatur

CHEM-395-01 - Chemistry - 2005-2006

(Fall) Independent Study

Independent work in chemistry can be conducted with any member of the department.

Prerequisites: jr, sr, permission of department

Notes: Note: See safety training restrictions in description of Chemistry 295

CHEM-399-01 - Chemistry - 2005-2006
(Fall) Comprehensive Seminar
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
A seminar series consisting of meetings on alternate weeks to discuss articles from the current chemical literature. The readings will prepare students for attendance at lectures on the chosen topics in the remaining weeks. The lectures are given primarily by visiting speakers, but they may include department faculty. Students will serve as discussion leaders, and each student will write a paper on a presentation of her choice.
Prerequisites: sr
Notes: 1 meeting (90 minutes)
Instructors: S. Decatur
Expected enrollment: 20

Classics

CLASS-211-01 - Classics - 2005-2006
(Spring) Gods and Mortals: Myth in Ancient Art and Literature
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Art History 211)
Many ancient images tell completely different versions of myth from those portrayed in Greek and Roman literary sources. By juxtaposing distinctive modes of communication in the ancient world, students will analyze the rhetorical uses of myth, both then and now. Students will also examine the range of possibilities for translating and interpreting text and image, which will alert them to the vitality of myth as a language of its own, transcending historical parameters.
Notes: 2 meetings (75 minutes);
Instructors: B. Bergmann, P. Debnar

Complex Organizations

COMOR-201-01 - Complex Organizations - 2005-2006
(Spring) Poverty in the United States - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Why do so many people live in poverty in the most affluent of nations? This course will attempt to sort myths from realities in debates over the morality and feasibility of measures that might narrow the gap between rich and poor and expand opportunities, especially for the 20 million children living in poverty. Students will explore how poverty is related to class, race, sex, family structure, and economics, and how it is affected, for better and worse, by governmental programs involving housing, education, crime, welfare, and taxation.
Notes: preference will be given to up to five students who have taken Complex Organizations 220 (Politics 225) 2 meetings (75 minutes)
Instructors: J. Fox
Expected enrollment: 15

COMOR-206-01 - Complex Organizations - 2005-2006
(Spring) Economics of Health Care and Health Service Organizations
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Economics 206f)
Instructors: J. Rapoport

COMOR-212-01 - Complex Organizations - 2005-2006
(Fall) Individuals and Organizations
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Psychology 212f)
This course focuses on individual and small-group behavior in the organizational setting. The basic objective is to increase knowledge and understanding of human behavior in organizations - especially each individual's own behavior. Three types of knowledge are stressed: (1) intellectual information regarding human behavior in an organizational context; (2) understanding of oneself as a person and as a manager; and (3) behavioral skills in dealing with people.
Prerequisites: soph, jr, sr
Notes: 2 meetings (75 minutes)
Instructors: D. Butterfield

(Fall) Economics of Corporate Finance
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Economics 215s)
Instructors: S. Gabriel
COMOR-220-01 - Complex Organizations - 2005-2006
(Fall) Winners and Losers: Taxation, Social Justice, and Economic Choices
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)
The maze of laws that make up the U.S. tax system shape and define what our nation is and will be; they also create winners and losers. Who benefits from special relief provisions such as for housing, health care, education, retirement savings, charitable giving, and child care? What are the economic consequences? How are families taxed? Women? The poor? Capital gains? Should we have an estate tax, reform the income tax, or adopt a consumption tax? How can we save Social Security? All these issues and more are addressed, including a review of federal tax history from the Constitution to the present.
Prerequisites: History 171, Politics 104, Economics 103 or 104, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: J. Fox
Expected enrollment: 20

COMOR-232-01 - Complex Organizations - 2005-2006
(Fall) Ethical Issues in Complex Organizations
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Philosophy 232s)
There is much talk recently of the need for increased attention to "ethics" in organizational life. This course examines the basis for this concern and the underlying beliefs and structures that give rise to ethical issues, with the goal of helping students to clarify their own positions. Topics addressed will include profit, governance, consumption, distribution and the social contract. Readings will draw on philosophy, religion, economics, history, literature, management theory and current events
Prerequisites: soph, jr, sr
Notes: 2 meetings (75 minutes)
Instructors: Stookey

COMOR-270-01 - Complex Organizations - 2005-2006
(Spring) American Foreign Policy
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(IR-270, POLIT-270, HIST-283-02)
In this examination of American foreign policy since 1898, topics include the emergence of the United States as a global power, its role in World War I and II, its conduct and interests in the cold war, and its possible objectives in a post-cold war world. Particular attention is paid to the relationship between domestic interests and foreign policy, the role of nuclear weapons in determining policy, and the special difficulties in implementing a democratic foreign policy. See <a href="http://www.mtholyoke.edu/acad/intrel/afps98.htm">http://www.mtholyoke.edu/acad/intrel/afps98.htm</a> for a more detailed description.

COMOR-299-01 - Complex Organizations - 2005-2006
(Spring) Leadership and the Liberal Arts
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)
An interdisciplinary approach to the nature, operations, and directions of complex organizations. Investigates the position of women and men in organizations, with a consideration of the nature and styles of leadership and of the value of a liberal arts degree in organizational interaction, and with an exploration of issues affecting organizations (ethics, competition, legal rights, authority, socialization). Required for the minor in complex organizations.

**COMSC-100-01** - Computer Science - 2005-2006
*(Fall)* An Introduction to Computer Science
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

An introduction to basic computer science concepts and issues. Topics will be chosen from: origins of computers, data representation and storage, computer architecture, assemblers and compilers, operating systems, networks and the Internet, distributed systems, information retrieval, data organization, graphics, artificial intelligence, robotics, the theory of computation, and trends in Internet commerce and use. Laboratory assignments will offer some experience with programming and the use of application software.

(Fall) Problem Solving and Structured Programming
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Introduces the C language and the use of structured programming techniques. Emphasizes the solution of complex computational problems by their analysis into smaller subproblems that can be solved independently and then combined to form a complete solution. Introduces other topics relevant to computer science. Assumes no previous study or use of computers. This course is programming intensive.

COMSC-102-01 - Computer Science - 2005-2006
(Spring) Object-Oriented Intermediate Programming
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This second course in the programming sequence focuses on object-oriented program design and intermediate programming concepts. This course also introduces fundamental data structures and complexity analysis. Topics include inheritance, polymorphism, recursion, linked lists, stacks and queues. In addition, students will focus on the design and implementation of large programs in C++.

(Poli-125, Intrel-125, Econ-125)
Preamble (for topics courses): A common weekly lecture will take place on Monday evenings. This course has 8 discussion sections. Discussion sections are limited to 20 students. Note: This course will end with the conclusion of the campus-wide international conference in early March.For a more detailed description go to <a href= "http://www.mtholyoke.edu/acad/programs/global/conferences/confcourse.html" /></a>
http://www.mtholyoke.edu/acad/programs/global/conferences</a>
Increased job flight in manufacturing and skilled services raises profound questions about the future well-being of people and countries around the world. Are declining living standards in developed countries inevitable or can technological change alter such a trend? How does offshoring affect technological change itself? Are China and India the only beneficiaries among developing countries? Does skilled labor gain and unskilled labor lose, everywhere? What at the policy solutions? Team-taught by computer science, economics, politics, and IR faculty. Weekly common lectures on Monday evening and separate discussion sections.

COMSC-211-01 - Computer Science - 2005-2006
(Fall) Data Structures
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Using C++. Solving problems with computers is accomplished by writing programs that operate on data to produce a desired result. The way data is organized and presented to the program can significantly affect its efficiency and simplicity and can sometimes determine whether or not a program can be written to solve the problem at all. This course presents ways of organizing data into "data structures" and analyzes how structuring the data can improve program performance.
This course is programming intensive.

COMSC-221-01 - Computer Science - 2005-2006
(Fall) Computer Systems and Assembly Language
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course looks at the inner workings of a computer and computer systems. It is an introduction to computer architecture, software engineering, and the fundamentals of operating systems. Specific topics include assembly language programming, memory and I/O issues, and the techniques of software design, implementation, and testing as a group. This course is programming intensive.
Prerequisites: Computer Science 101; Computer Science 211 recommended
Notes: 2 meetings (75 minutes)
Instructors: D. Strahman

COMSC-311-01 - Computer Science - 2005-2006
(Fall) Theory of Computation
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Are there any limits to what computers can do? Does the answer to this question depend on whether you use a PC or a Mac? Is C more powerful than PASCAL? This seminar explores these questions by investigating several models of computation, illustrating the power and limitations of each of these models, and relating them to computational problems and applications. Topics include finite state automata, pushdown automata, grammars, Turing machines, the Universal Turing Machine, and computability.
Prerequisites: Computer Science 101 and Mathematics 232
Notes: 2 meetings (75 minutes)
Instructors: P. Dobosh
Expected enrollment: 20

COMSC-312-01 - Computer Science - 2005-2006
(Spring) Algorithms
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course is an introduction to the theory of algorithms. The goal of this course is to enable the student to design efficient algorithms as well as to select appropriate existing algorithms for solving complex problems. Topics may include sorting, searching, advanced data structures, and graph algorithms. In addition to discussing the behavior of the algorithms, we will study algorithm performance using a formal mathematical model.
Prerequisites: Computer Science 211 and Mathematics 232
Instructors: S. Rollins
Expected enrollment: 20

COMSC-322-01 - Computer Science - 2005-2006
(Spring) Operating Systems
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
An introduction to the issues involved in orchestrating the use of computer resources. Topics include operating system evolution, file-handling systems, memory management, virtual memory, resource scheduling, multiprogramming, deadlocks, concurrent processes, protection, and design principles. Course emphasis: understanding the effects of operating system design on computer system performance. This course is programming intensive.
Prerequisites: Computer Science 211 and 221
Notes: 2 meetings (75 minutes)
Instructors: D. Strahman
Expected enrollment: 20

COMSC-324-01 - Computer Science - 2005-2006
(Fall) Computer Architecture
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
The goal of this class is to provide the student with a working knowledge of how computers operate and the general principles that affect their performance. New developments in hardware render current technologies obsolete within one to three years. Rather than focusing on specific technology, we cover the fundamentals that allow your understanding of technology to grow with future developments. You will also gain a better appreciation of the cost/performance trade-offs encountered in designing a computer system.
Prerequisites: Computer Science 211 and 221
Notes: 2 meetings (75 minutes)
Instructors: L. Ballesteros
Expected enrollment: 20

COMSC-325-01 - Computer Science - 2005-2006
(Fall) Computer Networks
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course is an introduction to computer networks, the mechanisms used in their construction, and the factors that affect their performance. Topics include network architecture, data transmissions, network protocols, error and connection management, internetworking, the Internet, client-server programming, examples, and applications. This course is programming intensive.
Prerequisites: Computer Science 211, 211, and 322
Notes: 2 meetings (75 minutes)
Instructors: S. Rollins
Expected enrollment: 20

COMSC-327-01 - Computer Science - 2005-2006
(Fall) Distributed Systems - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
In decentralized systems, users often solve large problems by spreading effort over groups of computers. Problems involving information, computation, and hardware distributed at various locations must be solved. A distributed system of computers may not share a common memory or a clock. Therefore, efforts to work together require explicit communication and synchronization mechanisms. We will look at issues of problem solving with multiple processors, distributing workload, and providing access to shared resources such as I/O and storage devices and file systems, centralized and distributed methods for control of parallel activities and for detection, and resolution of conflicts.
Prerequisites: Computer Science 211, 221, and 322 or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: D. Strahman
Expected enrollment: 15

COMSC-331-01 - Computer Science - 2005-2006
(Spring) Computer Graphics
COMSC-334-01 - Computer Science - 2005-2006
(Fall) Artificial Intelligence
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
An introduction to AI research issues and models of intelligence. Topics include AI history, philosophical and research questions, LISP, state space representation, search, heuristics, connectionism, learning, and an introduction to advanced AI fields such as Natural Language Processing and Computer Vision. Course emphasis: understanding AI model development and how it relates to the theoretical issues. This course is programming intensive.
Prerequisites: Computer Science 211, 221 and Mathematics 232
Notes: 2 meetings (75 minutes)
Instructors: C. Fennema
Expected enrollment: 20

COMSC-335-01 - Computer Science - 2005-2006
(Spring) Introduction to Computer Vision and Robotics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
An introduction to theories that suggest how to provide a computer with the ability to "see" and how to use that ability to control the actions of a robot. The potential role that robot actions can play in making computer vision possible is also discussed. Specific topics include: the physics of vision, image processing, pattern recognition, image understanding, representations, planning, robot control, architectures, and applications. This course is programming intensive.
Prerequisites: Computer Science 334 and Mathematics 202
Notes: 2 meetings (75 minutes)
Instructors: C. Fennema
Expected enrollment: 20

(Spring) Intelligent Information Retrieval
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Introduces the basic concepts, methodologies, and research findings in information retrieval. Special topics include Web searching, cross-language retrieval (query in one language, retrieve documents written in many languages), data mining (automatically identifying hidden relationships from large amounts of information), and data extraction (identifying prespecified types of information).
Prerequisites: Computer Science 211 and 221 or permission of instructor; 2 meetings (75 minutes)
Instructors: L. Ballesteros
Expected enrollment: 20

COMSC-341-01 - Computer Science - 2005-2006
(Fall) Topics: Natural Languages
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
An introduction to the research issues and approaches to enabling computers to "understand" Natural Languages, namely the languages we speak and write. Topics include: lexical structure, syntax, semantics, ambiguity, parsing, conceptual representations, scripts and plans, neural network approaches, dialog, and the relationship between language and perception.
Prerequisites: Computer Science 311 and either 334, 336, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: C. Fennema
Expected enrollment: 20

COMSC-341-02 - Computer Science - 2005-2006
(Fall) Topics: Databases - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course is an introduction to the design and use of database systems - systems that can manage very large amounts of data. The objective is to present concepts for modeling, designing, querying and managing databases. There are two important approaches to organizing and querying (asking questions about) data. The "relational model," which uses a two-dimensional table (relation) as its primary structure and underlies most major systems.
commercial database systems and the "semistructured model," which uses trees as its fundamental structure and is popular for Web usage. We will cover both these models, SQL for relational databases and XML for structuring data as trees.

Prerequisites: jr, sr, Computer Science 311, 324, and 322, permission of instructor; a 300-level course in your area of interest is recommended
Notes: 2 meetings (75 minutes)
Instructors: D. Strahman
Expected enrollment: 20

COMSC-341-03 - Computer Science - 2005-2006
(Spring) Topics: To Be Determined - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
To keep students informed about current developments and topics not covered by the regularly scheduled courses, the department frequently offers special "topics" seminars.
Prerequisites: jr, sr, Computer Science 311, 324, and 322, permission of instructor; a 300-level course in your area of interest is recommended
Notes: 2 meetings (75 minutes)
Instructors: The department

COMSC-390-01 - Computer Science - 2005-2006
(Spring) Research Methods
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Intended for students planning honors projects, this course will address the issues involved in conducting research including problem selection, exploration, forming a hypothesis, experimentation, presentation, and writing. Students will read technical papers, present and critique ideas in class, write a 25- to 30-page paper, and complete a defendable honors proposal. There may be programming exercises to illustrate techniques under discussion but this is not programming intensive.
Prerequisites: jr, Computer Science 311, 324, and 322 or permission of instructor; a 300-level course in your area of interest is recommended
Notes: 2 meetings (75 minutes)
Instructors: C. Fennema, D. Strahman
Expected enrollment: 20

Critical Social Thought

CST-100-01 - Critical Social Thought - 2005-2006
(Fall) An Introduction to Critical Social Thought
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course will examine the relationship between the lives of thinkers who broke with their own worlds, the new visions of reality they created, and the historical context that provoked and in turn was provoked by their ideas. Readings will include short theoretical and fictional works, memoirs and biographies, historical narratives, and secondary critical commentaries.
Prerequisites: fy, soph, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: C. Pleshakov
Expected enrollment: 18

CST-250-01 - Critical Social Thought - 2005-2006
(Fall) Classics in Nineteenth Century Critical Social Thought  
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A; Anthro, econ, geog, etc. requirement  
An introduction to some of the great critical voices of the nineteenth century. We will explore the ideas of such mutinous thinkers as Karl Marx, Friedrich Nietzsche, Sigmund Freud, and Fyodor Dostoyevsky, focusing on the style as well as the substance of their works and the circumstances that provoked them to write and/or that their writings helped provoke. The course will highlight the tension between appearance and reality, the dialectic of domination and subordination, and the place of reason and irrationality in social life.  
Prerequisites: soph, jr, or permission of instructor  
Notes: 2 meetings (75 minutes)  
Instructors: K. Tucker  
Expected enrollment: 25

CST-251-01 - Critical Social Thought - 2005-2006  
(Spring) Twentieth-Century Theory and Its Discontents - *Not offered this year/term  
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement  
(Speaking-intensive; German Studies 231s (02))  
An introduction to thinkers who broke with prevailing social theories to address the crises and upheavals of the twentieth century. We will examine the ideas of, for example, Frantz Fanon, Walter Benjamin, Hannah Arendt, Michel Foucault, and Edward Said. We also will probe the connections between theory and practice by relating those ideas to case studies of contemporary issues. Students of German studies may focus primarily on German thinkers. This course will be conducted in English.  
Prerequisites: Critical Social Thought 249 or 250 or permission of instructor  
Notes: 2 meetings (75 minutes)  
Instructors: K. Remmler  
Expected enrollment: 25

CST-252-01 - Critical Social Thought - 2005-2006  
(Spring) Literature and Politics - *Not offered this year/term  
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement  
What did it mean to think critically in the twentieth century and to express that criticism through fiction? What were the specific challenges of that turbulent and brutal century, which saw so many revolutions and wars but also immense progress in human rights and social fairness? What did rebellious novelists such as Franz Kafka, Albert Camus, Gabriel Garcia Marquez, V. S. Naipaul, Iris Murdoch, and Umberto Eco perceive as their cause? Did they have a cause? What were their solutions to the ills of humankind?  
Prerequisites: Critical Social Thought 249 or 250 or permission of instructor  
Notes: 2 meetings (75 minutes)  
Instructors: C. Pleshakov  
Expected enrollment: 25

CST-253-01 - Critical Social Thought - 2005-2006  
(Spring) Critical Race Theory - *Not offered this year/term  
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement  
(AFAM 208)  
This course examines the discursive relationship between race and law in contemporary U.S. society. Readings examine the ways in which racial bodies are constituted in the cultural and political economy of American society. The main objective is to explore the rules and social practices that govern the relationship of race to gender, nationality, sexuality, and class in U.S. courts and other cultural institutions. Thinkers covered include W.E.B. DuBois, Kimberle Crenshaw, Derrick Bell, Richard Delgado, among others.  
Prerequisites: Critical Social Thought 249 or 250 or permission of instructor  
Notes: 2 meetings (75 minutes)  
Instructors: L. Wilson  
Expected enrollment: 25

CST-254-01 - Critical Social Thought - 2005-2006  
(Spring) Postcolonial Theory  
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement  
(English 254)  
Postcolonial theory probes the centrality of colonialism and imperialism to modernity, and examines vital forms of anticolonial insurgency as models for critiques of domination and hegemony. This course will explore these imperatives from Marxist, feminist, and psychoanalytic perspectives, paying particular attention to nationalism, the state, globalization, and identity formation in the context of empire. Readings will include the work of Fanon, Said, Spivak, Chakrabarty, and Lloyd.  
Prerequisites: Critical Social Thought 249 or 250 or permission of instructor  
Notes: 2 meetings (75 minutes)  
Instructors: A. Martin  
Expected enrollment: 25
CST-255-01 - Critical Social Thought - 2005-2006
(Fall) Human Agency and Historical Transformation: Pivotal Moments in the Development of Capitalism
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Economics 204 and History 301)
This seminar examines evidence and theories on the origins, development, and dynamics of capitalism and the modern state. We shall focus on the transition to (agrarian) capitalism in early modern England, the industrialization of production in nineteenth-century Europe and the United States, and the political and economic crisis of the 1930s depression. As we ask how fundamental changes in human communities come about, we shall consider the relative contributions of individual agency and social determination to the creation of a world so many now regard as either natural or inevitable.
Prerequisites: Critical Social Thought 249 or 250 or permission of instructor (prerequisites for students taking the course for economics or history credit will differ)
Notes: 1 meeting (3 hours)
Instructors: H. Garrett-Goodyear, J. Christiansen
Expected enrollment: 25

CST-295-01 - Critical Social Thought - 2005-2006

Section Instructors: 01 IS C Pleshakov

CST-350-01 - Critical Social Thought - 2005-2006
(Fall) Seminar in Critical Social Thought
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking- and writing-intensive)
A seminar for CST juniors and seniors in which both participating faculty and students present their independent research, respond critically to one another’s work, and lead discussions on relevant secondary readings. Every student will be expected to produce a substantial essay on a question in the broad field of social thought by the end of the semester. Students will be encouraged to cultivate agility in speaking, arguing, and writing.
Prerequisites: Critical Social Thought jr, sr, or permission of instructor
Notes: 1 meeting (3 hours); seniors who intend to write a thesis must take 4 credits of Critical Social Thought 395 in the fall, in addition to this course

DANCE-011-01 - Dance - 2005-2006
(Fall) *AC TH/DA Language of Movement - *Not offered this year/term  
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
An introduction to movement as a language. In studio sessions students will explore and expand their individual movement vocabularies by working improvisationally with weight, posture, gesture, patterns, rhythm, space, and relationship of body parts. We will ask what these vocabularies might communicate about emotion, thought, physical structures, cultural/social traditions, and aesthetic preferences. In addition we will observe movement practices in everyday situations and in formal performance events and use these observations as inspiration for individual and group compositions. Selected readings and viewing of video and live performance.
Notes: 1 class/studio meetings (2 hours) and a production workshop (2 hours); offered at Amherst College
Instructors: W. Woodson
Expected enrollment: 20

DANCE-285-01 - Dance - 2005-2006
(Spring) Laban Movement Analysis I - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Laban Movement Analysis is a system used to describe and record quantitative and qualitative aspects of human movement. Through study and physical exploration of concepts and principles involved in body articulation, spatial organization, dynamic exertion of energy, and modes of shape change, students will examine their own movement patterns and preferences. This creates the potential for expanding personal repertoire and developing skills in observation and analysis of the movement of others.

DANCE-377-01 - Dance - 2005-2006
(Fall) Advanced Studies: Balanchine 100 - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Commemorating the centennial of his birth, this seminar pays tribute to the aesthetic vitality of George Balanchine, the foremost classical choreographer of the twentieth century. In our time, Balanchine (1904-1983) transformed the classic dance from its nineteenth-century codification into a steadily evolving language capable of expressing the most subtle yet profound of human emotions. We will identify the major themes in
Balanchine's works, some of which include Diaghilev, waltzes, Tchelichew and surrealism, Tchaikovsky, Americana, narratives, abstraction, Stravinsky and apotheosis. Each week we will view, discuss, and analyze at least one major work within the theme.

Prerequisites: dance history class.
Notes: Highly recommended for students interested in music, dance, and choreography. 1 meeting (3 hours)
Instructors: C. Valis Hill

ECON-105-01 - Economics - 2005-2006
(Spring) Financial Accounting
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): The Department of Economics does not offer a business major. However, we do offer an accounting course that will be of interest to students interested in business. The accounting course does not serve as an introduction to economics or as a part of the major.
The course, while using traditional accounting techniques and methodology, will focus on the needs of external users of financial information. The emphasis is on learning how to read, interpret, and analyze financial information as a tool to guide investment decisions. Concepts rather than procedures are stressed and class time will be largely devoted to problem solutions and case discussions. A basic knowledge of arithmetic (+, -, *, /) and a familiarity with a spreadsheet program is suggested. See <a href="http://www.mtholyoke.edu/courses/cljohnso">http://www.mtholyoke.edu/courses/cljohnso</a>.
Prerequisites: Not open to first-year students
Notes: 2 meetings (75 minutes)
Instructors: C. Johnson

ECON-115-01 - Economics - 2005-2006
(January) Politico-Cultural Economic Analysis of Star Trek
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Film Studies ??)
This course introduces students to political economy, post-structuralist methodology, and the application of economic theory to an important body of cultural artifacts. These cultural artifacts are the Star Trek films and television series. The course analyses both the internal political economic content of these series of cultural artifacts and the possible impacts of this content on the larger social formation. It also explores the way the larger social formation and the history of change within the politico-cultural and economic global environment may have shaped the creative process that brought these artifacts into being.
Instructors: The department
Expected enrollment: 50

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Comsc-125, Intrel-125, Polit-125)
Preamble (for topics courses): A common weekly lecture will take place on Monday evenings. This course has 8 discussion sections. Each section will meet at a different time. Discussion sections are limited to 20 students. Note: This course will end with the conclusion of the campus-wide international conference in early March.
Increased job flight in manufacturing and skilled services raises profound questions about the future well-being of people and countries around the world. Are declining living standards in developed countries inevitable or can technological change alter such a trend? How does offshoring affect technological change itself? Are China and India the only beneficiaries among developing countries? Does skilled labor gain and unskilled labor lose, everywhere? What are the policy solutions?

(Fall) Human Agency and Historical Transformation: Pivotal Moments in the Development of Capitalism
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(CST 255 and History 301)
Preamble (for topics courses): This 200-level course investigates a particular topic in economics at some depth without presupposing prior knowledge of economics. Many students may find this course a useful complement to a major or minor other than economics.
This seminar examines evidence and theories on the origins, development, and dynamics of capitalism and the modern state. We shall focus on the transition to (agrarian) capitalism in early modern England, the industrialization of production in nineteenth-century Europe and the United States, and the political and economic crisis of the 1930s depression. As we ask how fundamental changes in human communities come about, we shall consider the relative contributions of individual agency and social determination to the creation of a world so many now regard as either natural or inevitable.

(Spring) United States Economic History
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Preamble (for topics courses): This 200-level course investigates a particular topic in economics at some depth without presupposing prior knowledge of economics. Many students may find this course a useful complement to a major or minor other than economics.

Examines the historical development of the U.S. economy from the colonial period to the present from a variety of theoretical perspectives. The main questions addressed are: What are the reasons for the successes of the U.S. economy (growth, increased productivity, increased living standards, etc.)? What are the causes of the problems or failures in the U.S. economy (unemployment, inflation, inequality, poverty, etc.)? How have different groups in society (classes, races, and genders) been affected differently by these successes and failures? What has been the role of the government in the U.S. economy? To what extent have wars in U.S. history been caused by economic conflicts?

Prerequisites: Not open to first-year students as their first course in economics

Educational Studies

EDUST-240-01 - Educational Studies - 2005-2006
(Spring) Researching the Enterprise of Education: Spring 06 Researching race and racism in education
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Preamble (for topics courses): Provides an overview on the nature and practice of educational research. Students critique published research, explore ethical considerations, and examine the uses of educational research. Students also propose and conduct a small-scale research project of their own. Particular methodological approaches are stressed in different iterations of this course. Qualitative approaches such participant-observation, grounded theory, ethnography, teacher research, case study and interview studies are central in some courses; in others the quantitative analysis of data on education will be emphasized.
Spring 06: Researching race and racism in education. The central elements of this course include reading qualitative research, writing qualitative research, and conducting qualitative research. These three acts of inquiry explore how race matters in education and provide a deeper understanding of the racial realities of everyday life in schools. Readings and discussions highlight the paradigms, methodological approaches, and uses of qualitative research. Class demonstrations and activities focus on developing research skills. The independently designed research study provides further exploration of the complexities involved in researching racial matters.
Prerequisites: Prior coursework involving race or Education 205, or 220, or 109 or Psych 233 or Per I.
Notes: 2 meetings, 75 minutes
Instructors: S. Lawrence

(Spring) Special Topics in Educational Studies: Education as a Global Phenomenon
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This seminar provides a forum for the critical examination of the role that education has played in shaping modern societies. Persistent global inequality raises questions about the role that education continues to play in social, political and economic development. Students will explore the relationship between education and international development and the range of educational issues and dilemmas that have emerged in the 20th century, through country/case study research.
Prerequisites: soph, jr, sr or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: B. Bell

(Fall) Capstone in Educational Studies
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This two-credit independent study course is the culminating experience of the educational studies minor which requires analysis and synthesis of key ideas that emerged during focused study in the minor. Students will work with a faculty advisor of the Educational Studies Program Committee as they plan, write and present a capstone paper.
Prerequisites: Educ 205, 215 or 220 and permission of instructor
The course will also provide you with an introduction to some topics in African studies, reading and writing about such contemporary authors as Ama Ata Aidoo, Tsitsi Dangarembga, Bessie Head, Ayi Kwei Armah, Nuruddin Farah. Studying both fiction and essays, the course focuses on recent political situations (Ghana, Congo, South Africa), on images of women, and on representations of Africa in news media and in cinema, both from Africa and the West.

Notes: 2 meetings (75 minutes) Only first-year students may preregister for this course. Sophomores, juniors, and seniors may inquire if there is space available during the first two weeks of class.

This seminar will explore how we read and think about diverse cultural objects from works of fiction and poetry to cultural spaces. It will allow you to hone your critical thinking skills and make a graceful transition to college writing and speaking. The course will also provide you with an introduction to research resources at Mount Holyoke as well as some important basics of college work such as proper citation, collaborative projects, and
(Fall) Seminar in Reading, Writing, and Reasoning: Representing History
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive)
Preamble (for topics courses): (Writing-intensive courses) Though sections of English 101 differ in specific content, all develop the skills of careful reading and effective writing essential to the liberal arts and sciences. Students will write frequently and have an opportunity to revise their work. By active participation in class discussion, students will develop their speaking skills and learn to ask critical questions, formulate answers, and frame persuasive arguments. English 101 is offered in both semesters. Students who do not take the course in the fall should consider enrolling in the spring.
Like other first-year seminars, English 101 is intended primarily for students at the start of their college career.
How did medieval people think about themselves and how did they imagine, move in, and represent the physical world? This course explores the Travels, Manuscript illuminations, and selected material from late medieval theories of love, medicine, astrology, and mathematics.
Notes: 2 meetings (75 minutes) Only first-year students may preregister for this course. Sophomores, juniors, and seniors may inquire if there is space available during the first two weeks of class.

What does it mean to be a person? What does it mean to be or have a personality? Conversely, what does it mean not to be treated like a person, or to want not to be a person at all? This course will investigate such questions, as they relate to conceptions of independence, conformity, race, sexuality, and boundaries between life and death (such as the ghostly or posthumous). Our primary texts will include short stories, poetry, and novels from the 19th and 20th centuries, including texts by Walt Whitman, Emily Dickinson, Frank O'Hara, Toni Morrison, and Elizabeth Bishop.
Notes: 2 meetings (75 minutes) Only first-year students may preregister for this course. Sophomores, juniors, and seniors may inquire if there is space available during the first two weeks of class.

(Spring) Seminar in Reading, Writing, and Reasoning: Getting Personal: Representations of Persons and Personality in American Literature
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive; Medieval Studies 101f (02))
Preamble (for topics courses): (Writing-intensive courses) Though sections of English 101 differ in specific content, all develop the skills of careful reading and effective writing essential to the liberal arts and sciences. Students will write frequently and have an opportunity to revise their work. By active participation in class discussion, students will develop their speaking skills and learn to ask critical questions, formulate answers, and frame persuasive arguments. English 101 is offered in both semesters. Students who do not take the course in the fall should consider enrolling in the spring.
How did medieval people think about themselves and how did they imagine, move in, and represent the physical world? This course explores the various ways medieval culture created and crossed significant geographical, emotional, and conceptual boundaries in the areas of art, literature, religion, mathematics, and science. Texts will include medieval maps, travel literature such as Mandeville's Travels, letters of Heloise and Abelard, works of Christine de Pizan, Malory's Morte D'Arthur, manuscript illuminations, and selected material from late medieval theories of love, medicine, astrology, and mathematics.

The relationships between parents and children, between individual conscience and state law, between private desires and public morals, between performing roles and authentic selfhood, have always preoccupied dramatists. In this seminar we will examine how modern playwrights have revised earlier ones in order to modernize such themes. We will begin with some Greek and Shakespearian plays, before going on to read some contemporary works by Beckett, Stoppard, and others.

What is the legacy of American writing of the recent past? How do the best American writers of the twentieth century help us shape and refine our own sense of diction, tone, and personal voice in the twenty-first? Who is our likely audience, and how do we (or don't we) address it? To begin to answer such questions, we'll read work in a range of genres—short fiction, personal essays, plays, and poetry—by such American authors as Flannery O'Connor, James Baldwin, Tennessee Williams, Elizabeth Bishop, and Cynthia Ozick. An emphasis on writing clear essays.

Love and sex appear to be private matters, but who marries whom now prompts public debates. How love, sexuality, and marriage are construed and represented offers insights into how cultures understand themselves and circulate power. This seminar juxtaposes work from around 1600, Shakespeare's comedies of love and marriage, and the 1930s, classic Hollywood movies with similar themes. Plays such as A Midsummer Night's Dream, Much Ado about Nothing, and As You Like It; movies such as It Happened One Night, Bringing Up Baby, and His Girl Friday, plus contemporary criticism and television programs.

(Spring) Modern Irish Literature - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Women's Studies 203s (01))
This survey course will introduce students to literature of modern Ireland beginning with Swift and ending with writers of the Irish literary revival and Irish modernists. The syllabus will also focus on Irish women writers and their literary interventions concerning colonial history, nationalism, and Unionism. We will pay particular attention to representations of ideas of Irisness through the categories of religion, race, gender, and culture. The course encourages students to think about how the genres, styles, and forms of Irish writing are determined by the experience of colonial trauma and the imperative to imagine national identity.

(Fall) African American Diasporas: Literature and Culture - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Speaking- and writing-intensive)
This course introduces students to the concept and the writings of the "African diaspora," a multifaceted community created by the Atlantic slave trade between Africa, the Americas, and Europe. We trace the development of a diasporic sensibility in African American literature and the creation of new "African American" identities and forms of expression by Caribbean, Latin American, and European writers of African descent. Using both literary and historical modes of interpretation, this course asks, how have black writers chosen to tell a global story of the race?
Prerequisites: soph, second-semester fy
Notes: 2 meetings (75 minutes)
Instructors: M. Stephens
