In this cross-cultural examination of nineteenth-century American women writers, we will compare a number of works of fiction, prose, poetry, and autobiography. We will discuss how writers created sophisticated and insightful critiques of American culture and imagined or re-presented new American identities and histories. We will also consider tensions between "sentimental" idealism and political pragmatism, restrictive domesticity and dangerous autonomy, and passionless femininity and expressed sexuality. Authors may include Alcott, Child, Far, Fuller, Harper, Hopkins, Ruiz de Burton Wilson, and Winnemucca.

(Spring) Women Writers: Twentieth-Century American Women Writers
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(American Studies 290s (01) & Women's Studies 203s (01))
In this course we will examine the work of American women writers with an emphasis on the themes of protest and pleasure. Material will range from the overtly political to the intensely personal, will often merge the two, and will date from the late-nineteenth century to today. Despite our long-standing reputation for being "emotional," both outrage and ecstasy have oft been considered taboo for women. Yet women have been motivated by each to pick up the pen and have proved influential as writers on these themes. Authors will range from Emma Goldman, Ida B. Wells and Kate Chopin to Audre Lorde, Adrienne Rich and Dorothy Allison.

(Fall) British Literature of the Sixties
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
An examination of exemplary novels, drama, poetry, and theoretical writings of the sixties. The decade saw British theater exploding with an almost unparalleled excitement with new plays and new ways of directing old plays. Meanwhile, British novelists and poets wrestled with the problem of aesthetic value not only after modernism and its mediated relationship with fascism, but also in a world of increasing consumerism. Accordingly, we will concentrate on novels that are self-reflexive and on poetry that calls its own possibility into question. We will end by considering the importance of the image and the spectacle in a world of global, mass media.

If globalization transforms the nation-state, how must we re-imagine the *national* study of literature? This class will probe the hidden forces behind the spectacular global conflicts exploding around us and attempt to recover them between the lines of the text. In the process, it will consider a series of questions: What does globalization mean? How does it relate to European imperialisms and American neo-colonialism? How do anti-globalization movements—environmental, religious, literary, and cinematic—offer alternatives? Theory from the social sciences and the humanities (Wallerstein, Sassen, Jameson); fiction and film from Europe and its former colonies (Rushdie, Roy, Fellini).

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
In its attempt to gain monopolistic control of the spheres of economics, politics, and culture, capital turns people into its instruments. In response, postcolonial works continually ask, what must people recover if they are to regain a full sense of their humanity? This class will explore a series of increasingly anarchic responses: the means of production; the pleasure of destruction; forms of consciousness so primitive that they have left only traces on our memory; and the right to desire and produce without regard to any organizing principle. Marxism, psychoanalysis, fiction, and film from Europe, Africa, the Arab World, and South Asia.

FREN-311-01 - French - 2005-2006
(Spring) Period Courses: Topic: Time in the Twentieth Century
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): The usual periodization of French literature and culture is by century. Some period courses focus on the characteristics of specific centuries. Others focus on artistic or intellectual movements: gothic, Renaissance, romantic. All period courses, whatever their conceptual framework, integrate texts and historical contexts.
This course will examine the concept of time in twentieth-century French and Francophone novels and films. We will explore the ways in which writers and filmmakers have played with time and the traditional narrative structures, and have reflected on the idea of time itself, including the distinction between historical and individual time. Authors to be studied may include Proust, Duras, Perec, Hébert, as well as films by Cocteau, Varda, Arcand, and others.
Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor
Notes: one meeting (2 hours, 50 minutes)

(Spring) Seminar in Romance Languages and Literatures: From Bicycle Thieves to Guerrilleros: Italian, French, and Latin American New Cinemas
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Taught in English; SPAN-361, ITAL-361, FLMST-370, ROMLG-375)
Preamble (for topics courses): This interdisciplinary seminar will focus on a comparative study of Romance languages or literatures. Topics will vary from semester to semester. Seminar discussions will be conducted in English, but students are expected to read works and write papers in French.
In this seminar, we will study the cross-cultural influences between Italian neo-realism, the French nouvelle vague, and the New Latin American Cinemas. Both the Italian and the French movements represent models and counterpoints for those Latin American filmmakers of the 1950s and 60s who sought to redress the dominance of the realist American model in Latin America and the domination of the markets by the products of Hollywood. The New Latin American Cinemas, in turn, paved the way toward the emergence of Third Cinema. We will study films, as well as cinematic theory, from Italy, France, the Soviet Union, Japan, Cuba, Brazil, Argentina, and Mexico.
Prerequisites: Permission of instructor. Students who wish to receive 300-level credit in French must write their papers and do appropriate course readings in French.

(Fall) Courses on Social and Political Issues and Critical Approaches: Topic: Fictional Heroines in the Ancien Régime (pre-1800)
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Preamble (for topics courses): These courses examine a definable phenomenon—an idea, a movement, an event, a mentality, a cultural structure or system, an historical problem, a critical mode—relevant to the civilization of France or of French-speaking countries. Readings from a variety of disciplines shed light on the particular aspect of thought or culture being studied.
The purpose of this course is to create an electronic edition of an unpublished eighteenth-century manuscript "Les Mémoires de la comtesse de L..." Using fiction by female writers of the sixteenth, seventeenth, and eighteenth centuries, students will probe the realities of women's lives in the Ancien Régime: loveless marriages, convents, prostitution, and madness. In addition to examining fictional heroines of Diderot, l'abbé Prévost, Choderlos de Laclos, and le marquis de Sade, students will learn to encode structural, contextual, and analytical elements of the text using the latest Web technologies. (Technological support will be integrated into the course.)

Hugo's epic masterpiece, written in exile, has everything: ceaseless adventures, crimes and punishments, love, hate, obsession, heroes, villains, the battle of Waterloo, and civil war. The sympathetic everyman, Jean Valjean, condemned to hard labor for stealing bread and relentlessly pursued by the pitiless policeman Javert, encounters unforgettable characters. We will examine how Hugo situates Valjean's escapes within a framework of social injustice and good triumphing over evil, balancing his political and romantic ideas. Our existence is greatly affected by changing environmental conditions. Some of these changes are "natural" (floods, earthquakes), but many directly result from human mismanagement (groundwater contamination, acid rain, the greenhouse effect). Although some of these problems are of local concern, an increasing number are of global scale. In this course, students develop an appreciation for the way the Earth's environment affects our lives. In the laboratory, students learn techniques to recognize and interpret environmental hazards and develop strategies to address environmental problems.

Laboratory and field trips emphasize identification and analysis of sediments, rocks, and fossils.

(January) Snowball Earth
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

Geological evidence for the worst glaciation on record suggests to some researchers that the Earth's surface froze solid about 700 million years ago. The evidence for this Snowball Earth or White Earth event has generated considerable controversy because global climate change computer models
appear incapable of generating such an extreme climate. In this lab course, we will use petrographic and other tools to examine the evidence supporting the Snowball Earth scenario, and will assess the implications of this event for our understanding of the development of life on this planet.

(Fall) Surface Processes

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

The surface of the Earth is a history book of past environmental change. Every hill and valley, every erosional feature, every deposit is the result of processes acting at the Earth’s surface. In this course we study these processes (e.g., glaciers, rivers, slopes, coastlines, windblown sand, frozen ground, cave formation, soil development) to better understand how they work and to understand the resulting landforms and deposits. Armed with this knowledge we can then observe different landforms and deposits and infer past process (environments of deposition). Fieldwork and trips allow students to explore firsthand the processes that have created and modified the Earth’s surface.

(Fall) Evolution of North American Landscapes - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Geography 225f)

The landscapes of Earth are the result of complex processes and have evolved dramatically since the planet's formation over 4.5 billion years ago. In this course we examine the geologic evolution of the North American continent and its natural features. Using narrative descriptions, scientific articles, maps, photographs, and videos, in addition to the texts, we tour North America and explore the origin and anatomy of its landscapes, including national parks and monuments. We then consider how the geologic setting or physical environment influenced human exploration and settlement of the continent.

(Fall) Ocean Environments
Because more than 70 percent of our planet is covered by ocean water, the study of marine systems is crucial to our understanding of the Earth. In this course, we will examine chemical, physical, geological, and biological dimensions of the marine environment at a variety of scales in time and space. Along the way, we will explore how the Earth's oceans formed, how they provided the foundations for life, and how they continue to control weather and climate, stabilize global chemical cycles, interact with terrestrial systems, and give us access to valuable resources. Discussions and field trips may be planned to augment other course activities and materials.

Preamble (for topics courses): Seminars offer directed study and discussion of one or more selected topics in geology. Topics vary from year to year. Consult the department for information about future seminars.
An interdisciplinary examination of how climate change has affected human societies in the past and how it might in the future. Many civilizations have been impacted by climate change, and the influence of this factor on the development of human societies is considerable. We will examine the impacts of rapid climate change on the civilizations of ancient Egypt and Mesopotamia, the Classic Maya civilization and Europe. Evidence indicates that the increase of greenhouse gases in the atmosphere will cause significant future changes in global and regional climate. These climate changes will likely affect such dimensions of human existence as water availability, food, security, and health.

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement  
(Speaking- and writing-intensive; Film Studies course (component))  
Preamble (for topics courses): This seminar is designed to explore theoretically and practically the nature of our field of inquiry. We explore such questions as: What does German studies mean? What is interdisciplinary work? What role does literature play in culture studies? What is the relationship between language and the construction of culture? What meanings have been attributed to the terms of "culture" and "civilization?" Texts from a variety of disciplines. Students write term papers on topics related to their major field(s) of interest.  
The end of World War II and the fall of the Berlin Wall significantly changed the world and German history. The division and unification of Germany reshaped German politics, economics, culture, and literature. How did/do the Germans come to terms with the Nazi- and GDR-past and reflect on it in a literary forum in der "Nachkriegs- und Wendeliteratur"? We will examine the term "Vergangenheitsbewältigung" and its literary representation through remembrance and memory in different historical and social settings (West and East) respectively. Authors include Böll, Grass, Lenz, Andersch, Schneider, Wolf, Schütz, Maron, and Burmeister. Use of films and music.

Notes: 2 meetings (75 minutes) or 1 meeting (2 1/2 hours); This course fulfills an eighteenth-, nineteenth-, or twentieth-century 300-level requirement for the major, depending on the topic of a student's semester project.

(Fall) Foundation: The Rise of Europe 1300-1600: From Insignificance to Hegemony
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar (Writing-intensive)
In the year 1300, if an observer of Earth had been asked which civilization would become the dominant one in the next three centuries, that observer would not have said Europe. Indeed, at the time, Europe was a tiny backwater compared to both the Chinese Empire and the Islamic Empire. Yet by 1600, Europe had emerged as the fastest growing power on Earth, while both China and the Muslim world were in decline. What led to the rise of Europe, which would in turn lead to European hegemony? How did the Renaissance begin, and why did it catapult Europe onto the world stage? This course will attempt to answer these questions by exploring the links between Europe and the rest of the world.

This colloquium will allow its participants to explore the relationships between religion and 'modernity' in South Asia within the context of British colonial rule. Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
In this seminar, we will study the history of sexuality, desire, and bodies. We will study experts who set out terms and frameworks for understanding modern sexuality; how in different ways and in different times communities of sexual minorities strategically used selected elements of expert discourse to forge their own narratives of self and desire. Students will examine sexual classifications—be they mainstream and "normal" or subcultural and "deviant"—as mutually constructed.

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.

Does history repeat itself? We will investigate the theme of crisis in Europe during the seventeenth and the early twentieth centuries by exploring patterns of historical similarity and difference to be found, for example, in World War I, the New Woman and her critics, the rise of fascism, new paradigms in art (cubism), movements for social justice and state-protected welfare, and psychological models of human nature. Readings to include Hobbes’s Leviathan, Freud’s Civilization and Its Discontents, Ortega Y Gusset’s The Revolt of the Masses, Simone de Beauvoir’s Memoirs of a Dutiful Daughter, and Erich Marie Remarques, All Quiet on the Western Front.

(Spring) Modern Europe: The Twentieth Century: The Rise of European Feminisms - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of original historical writing.

By the early twentieth century, feminist movements had arisen across Western and Central Europe. While many of these movements were linked to attempts to gain suffrage rights for women, there were significantly different aims associated with the movements in different countries. What were the national and regional differences in these movements? How did political and ideological beliefs of the founders of these movements differ, and how did those differences shape the agendas of the various movements? Students will use a variety of primary and secondary sources to consider the roots of European feminisms and the gains made by these movements through the modern era.

Beginning with the phenomena - on both sides of the eye - that give rise to visual sensation, we examine cosmic structure on all levels: from the subatomic, molecules and cells, organisms and species, and up to planets, stars, and galaxies. This structure exists in time as well as space, so that we can "see" evolution from the earliest microseconds into the present-day complexity. We pay particular attention to the mechanisms whereby life operates within the cosmic hierarchy: how it obtains energy and material, stores information, and ultimately has the capacity to look into time and space to read this story.

This course will explore the birth and development of women writing in nineteenth and twentieth century Italy with an eye to the Renaissance. We will read and discuss works by, among others, Aleramo, Serao, Benedetta, Rosselli, Ginzburg, Morante, Banti. The New Latin American Cinemas, in turn, paved the way toward the emergence of Third Cinema. We will study films, as well as cinematic theory, from Italy, France, the Soviet Union, Japan, Cuba, Brasil, Argentina, and Mexico.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This course is devoted to the work of commanding figures of Latin American and Caribbean thought at various times and different places. Thinkers whose work may form its basis in various offerings include among others: Columbus, Bartolomé de Las Casas, José Martí, J. C. Mariátegui, C.L.R. James, etc. Their lives and work exemplify the diversities, varying regional settings, social contexts, and shifting historical coordinates of major epochs of transition. Their assessment of a myriad of key issues has made each a touchstone of continuing authority and influence extending beyond their particular locale, time, or region. Why this should be so is among the many questions we will address.

LATAM-386-01 - Latin American Studies - 2005-2006
(Fall) Central America: Reform, Reaction, Revolution
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

This seminar explores the diverse experiences of Central American nations in the twentieth century. From a common basis in an export-oriented agriculture, social and political alternatives ranging from social democracy to recurrent military rule, neofascist regimes, and revolutionary socialism have emerged in the isthmus. The course uses materials ranging from autobiography and literature to historical and anthropological studies to understand how this came to be. In addition to national cases, we consider the unique experiences of the area's indigenous and Atlantic-coast peoples within and outside the nation-state framework.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(History 388)
For many the "discovery" of America opened the modern era. Its closing may also have been foretold in Latin America's confounding of diverse theories of modernization and development in recent times. This seminar will introduce the student to a number of both classic and more recent works on Latin America (in English) that advance along postmodernist lines, ranging from cultural contact and conflict, language, meaning, and power in the sixteenth century, to the invention of national identities in the nineteenth century, to discourses of ethnicity, class, gender, and reason in the twentieth century.

Notes: 1 meeting (2 1/2 hours)
Instructors: L. Gudmundson

(Spring) Agrarian America: Sugar, Cotton, Coffee, Wheat
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course explores the structure and variety of societies generated in North, Central, and South America by four widely distributed export crops. Although not bound by rigid chronology, our focus will be primarily on the period 1750-1950. Principal concerns of the course are variations by time and place in each commodity's technologies, labor systems, farm sizes, and social structure; the political dynamics associated with each type of farming; and the problematic features of capitalism in agriculture, or, how and when do peasants become farmers and farming agribusiness? Readings in English on cases drawn from throughout the Americas.

Groups have beautiful properties and describe many phenomena: crystallography, graphic art, matrix algebra, counting, nuclear physics, codes, and more. The course studies the group laws and their consequences, as well as many examples of systems satisfying these laws.

(Fall) Medieval Culture and Society: Seminar in Reading, Writing, and Reasoning: Picturing the Middle Ages
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive)
Preamble (for topics courses): This course offers a foundation for inquiry into medieval culture. Using readings in literature, art, music, history, politics, philosophy, and sciences to interpret the Middle Ages, a student sharpens her awareness of language and imagery as means of communicating experience and improves her skills of attentive reading and persuasive writing. The 101f-102s seminar sequence is designed to be a yearlong course, but students may take one semester without the other.
How did medieval people see themselves? How do we imagine them? Seeking answers to these questions, this course will explore several aspects of medieval culture: social structures, gender issues, tensions between courtliness and eroticism, religion, politics, perceptions of the "other," as represented in literature, art, history, and modern films. Works will include the Song of Roland (epic), the Bayeux Tapestry (pictorial relation of the Battle of Hastings in 1066), tales of love and adventure, miracles of the Virgin Mary, illuminated manuscripts, and Gothic monuments such as the cathedral of Notre Dame in Paris. Resources will draw on CD-ROMs and the Web.

This course inquires into several dimensions of European society and culture during the transition from principalities and fiefs to early modern states, from feudalism to capitalism, from serfdom to both free and slave labor. Equally important, however, will be companions of western Europe with other Atlantic societies of these centuries and examination of consequences for Europeans, Africans, and Americans (north and south) of encounters among them. Using both voices from the period and recent scholarship about early modern Western and Atlantic societies, the course will look critically at the making and remaking of "Western" culture between the Middle Ages and the modern era.

Preamble (for topics courses): This seminar is designed to increase familiarity with and facility in the use of primary materials for musicological and/or theoretical research, as well as in the critical evaluation of published scholarship. Engagement with a shared topic at the outset of the semester provides the context from which each student fashions an independent project. Oral presentations are integral to the course, with a major paper as the final requirement.

This course examines the history of music in the context of the dramatic upheavals (artistic, religious, and cultural) of the fourteenth century. Questions about performance practice, musical style, and attitudes toward musicians will be approached using surviving manuscripts, literary sources, and images of musicians and instruments. Participants will be encouraged to perform medieval works and compose pieces in ars nova style. The seminar will culminate in an independent research project.

*(Fall) Introduction to Philosophy*
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

For thousands of years, humankind has grappled with questions concerning such fundamental topics as existence, knowledge, and morality. For example: Does the world exist as we perceive it? What distinguishes right from wrong? Do we possess souls existing independently of our corporeal bodies? What is the ideal form for society? Can anything be known with certainty? In this course, we explore these and other perplexing questions through an analysis of classic philosophic texts drawn from the Western intellectual tradition. Works by authors such as Plato, Aristotle, Descartes, Leibniz, Hume, Mill, Kant, Russell, and others will be considered.

It begins with the positivist view current at mid-century, covers the move to pragmatism of the 1960s and 1970s and looks at sociological and historical attitudes since then. It asks to what degree it is possible for science to investigate a value-independent reality in the light of these developments.

(Fall) Introduction to the Philosophy of Religion - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Religion 226fs)
This course begins its survey of the discipline of the philosophy of religion with the work of Augustine. We then proceed to an examination of the classical theistic arguments for knowledge of God's existence (those of Anselm, Aquinas, and Maimonides) that dominated Scholastic thought and consider the criticisms of these approaches by Enlightenment philosophers such as Kant. We trace the rise of experience as the central category of pietism and romanticism in the texts of Schleiermacher and Coleridge and in the poetry of Novalis. Finally, we focus on the pragmatic tradition in American philosophy of religion, especially in the work of William James, Josiah Royce, and Cornel West.

(Fall) Topics in Philosophy: American Pragmatism and Chinese Philosophy
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Chinese philosophy mainly refers to Confucianism and Daoism. While the former focuses on human relationships and ritual, the latter accentuates simplicity, nonaction, and nature. American Pragmatism maintains that the meaning and the truth of an idea is a function of its practical consequences. It was embraced by many Chinese thinkers early in the last century. Why? How is Chinese philosophy related to American philosophy? In this seminar we try to identify some important affinities between the two, and discuss some hot issues concerning China's future within pragmatic philosophical context.

This seminar covers recent developments in non-classical logic. It covers modal logic, conditional logics, intuitionist, paraconsistent and relevance logics. If there is time, we might also cover fuzzy logic. We concentrate mostly on the formal properties of these logics, but there is some treatment of their philosophical significance. We also cover some of the semantics for them, especially possible worlds.

PHIL-350-04 - Philosophy - 2005-2006
(Spring) Topics in Philosophy: American Pragmatism and Chinese Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Chinese philosophy mainly refers to Confucianism and Daoism. While the former focuses on human relationships and ritual, the latter accentuates simplicity, nonaction, and nature. American Pragmatism maintains that the meaning and the truth of an idea is a function of its practical consequences. It was embraced by many Chinese thinkers early in the last century. Why? How is Chinese philosophy related to American philosophy? In this seminar we try to identify some important affinities between the two, and discuss some hot issues concerning China's future within pragmatic philosophical context.

We will explore these anxieties by focusing on the everyday practices embodied in those roles (husband and wife, parent and child, subject of God) that are normally thought to be outside of political control. The readings will draw from classic texts of American political thought, American case law, and the emergent social movements of race, labor, and gender that have posed challenges to the American tradition.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Women's Studies 333f (03))

Mary Daly, Elisabeth Schussler Fiorenza, Phyllis Trible, and Naomi Goldenberg, among others, have argued that traditional Jewish and Christian theological systems have overlooked the needs, concerns, histories, and contributions of women. Their challenges range from the historical modification of a presumably unbiased religious system to the outright rejection of a so-called patriarchal establishment. Whatever their approach, feminist theologies offer diverse and incisive tools for understanding how a theological system operates, how transitory cultural assumptions become embedded in ongoing doctrines, and how apparently minor adjustments can have significant ripple effects.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Speaking- and writing-intensive)

Nineteenth-century theologians Schleiermacher, Hegel, and Kierkegaard believed that speculation, necessity, and mechanistic perfection were dangerous ideas that had conquered their world. The way to break free from these powers was to reconsider the meaning of religion. As we enter the twenty-first century, we have come full circle. Technology (The Matrix) threatens our humanity and genuine religious sensibility by "blinding" us from truth. We are slaves to a force larger than ourselves, a reality created by machines. This course seeks to show how The Matrix is a contemporary text for understanding the similar (and dissimilar) forces that shaped the nineteenth and twenty-first centuries.

Preamble (for topics courses): This course offers advanced students an opportunity to investigate with some sophistication a problem that requires careful attention to research methods, to critical literature, and to writing. Seminar topics include people, periods, or problems that have a particular bearing on religion in America.

A distinctive mark of Western thought in the nineteenth century was its fascination with "the origin of things." The origin of the species and the origin of the universe are two prime examples. These two concerns, in particular, had a decisive impact on how religion and science came to be understood and expressed in the twentieth century. As a consequence of the ensuing public debate, this question of "origins" presented a direct challenge to the received theory of creation, the meaning of miracles, as well as the nature of biblical inspiration.

(Spring) Seminar in Romance Languages and Literatures: From Bicycle Thieves to Guerrilleros: Italian, French, and Latin American New Cinemas
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Language requirement or Humanities I-A requirement
(SPAN-361, ITAL-361, FREN-321, FLMST-370)

Preamble (for topics courses): This interdisciplinary seminar will focus on a comparative study of Romance languages or literatures. Topics will vary from semester to semester. Seminar discussions will be conducted in English, but students are expected to read works in at least one original language. Papers will be written in the Romance language of the student’s choice.

In this seminar, we will study the cross-cultural influences between Italian neo-realism, the French *nouvelle vague*, and the New Latin American Cinemas. Both the Italian and the French movements represent models and counterpoints for those Latin American filmmakers of the 1950s and 60s who sought to redress the dominance of the realist American model in Latin America and the domination of the markets by the products of Hollywood. The New Latin American Cinemas, in turn, paved the way toward the emergence of Third Cinema. We will study films, as well as cinematic theory, from Italy, France, the Soviet Union, Japan, Cuba, Brasil, Argentina, and Mexico.

Prerequisites: Permission of instructor

Notes: 1 meeting (2 hours, 50 minutes). Papers will be written in English or the Romance language of the student's choice. Students wishing to obtain 300-level credit in Spanish, Italian, or French must read texts and write papers in the Romance language for which they wish to receive advanced credit.

The collapse of the Soviet Union has revealed a mosaic of nations, peoples, and cultures emerging from a hidden landscape formerly perceived as monolithic. We will explore the rediscovered histories, cultures, and arts of peoples who have dwell upon the vast Eurasian plain for more than 2,000 years and whose interaction with one another and the West has been and will continue to be crucial in shaping the history of two continents.

(Fall) First Year Seminar: What It Feels Like for a (Russian) Girl

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

First-year seminar (Writing-intensive; Taught in English)

To pose the question a bit differently than in Madonna's song, what challenges face contemporary Russian women - young, old, urban, provincial - and how do these women cope with the stresses of everyday personal and professional life? In an attempt to arrive at an answer, we will look at interviews, short women's fiction, Russian feminist essays, and two films, *Little Vera* (1988) and *Adam's Rib* (1992). Writers include Baranskaya, Voznesenskaya, Kozhevnikova, Katerli, Mamonova, Tolstaya, and Sadur.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

First-year seminar (Writing-intensive; Taught in English)

From Dostoevsky to Court TV, from Shakespeare to CSI, murder has been a persistent motif in literature. Tales of the "ultimate act of foul play" have been used as far back as the Bible to organize narratives of good and evil, heroism and corruption, of inexorable fate and irrational misfortune. This course considers murder as represented in literature, film, and television, in order to explore the hold it has had on the collective imagination, and the fascination it has held for the creative mind. Readings will include accounts of murderers such as Cain, Medea, Macbeth and Raskolnikov (from *Crime and Punishment*), as well as a rogues' gallery of malactors from film and television.

(Writing-intensive; Taught in English)

Leo Tolstoy's *Anna Karenina* is an action-packed drama about love and passion, personal freedom and societal expectations, and the costs of living. We will read the text slowly, with attention to the ambiguities that defeat a clear or simple interpretation of the novel's message. We will screen several films of *Anna Karenina* and assess interpretations of the novel.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
A History 205 Russia came into being and achieved maturity under a monarchical rule. The age of the Romanovs, 1613-1917, has been particularly important in shaping Russia's social fabric, culture, national myth, and mindset. We will concentrate on a number of outstanding reigns, from Peter the Great, who created the Russian Empire, to Nicholas II, under whom the old regime collapsed. What signal events and extraordinary individuals contributed to the spectacular successes and horrific blunders that make Russian history? How did Russian society and culture evolve during the age of the Romanovs?

(Speaking-intensive)
The case of Russia offers a compelling example of history's failure to account for women's contributions in shaping a nation's political, social, and cultural identity. We will study Russia's past from the perspective of the women whose courage and sacrifice helped to change the course of history. Topics include the "lady" terrorist revolutionaries of the 1870s, the aborted liberation of women in the new Soviet state, the fighter pilots of World War II, and post-Soviet cultural icons. Texts include fiction, memoirs, film, and contemporary documents. Emphasis on strategies of oral presentation.

(Fall) Great Books: The Literature of Nineteenth-Century Russia
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive)
In no other culture has literature occupied the central role it enjoyed in nineteenth-century Russia. Political, social, and historical constraints propelled Russian writers into the roles of witness, prophet, and sage. Yet, far from being limited to the vast, dark "Big Question" novels of legend, Russian literature offers much humor, lyricism, and fantasy. We will focus on the Russian novel as a reaction to western European forms of narrative and consider the recurring pattern of the strong heroine and the weak hero. Authors will include: Pushkin, Gogol, Turgenev, Tolstoy, Dostoevsky, and Chekhov.

(Fall) Manuscripts Don't Burn: The Literature of the Twentieth-Century Russia - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Despite the manifold disasters visited upon Russia during the twentieth century, its writers retained their artistic integrity, human voice, and moral authority. They produced a literature of extraordinary power, depth, and lyrical beauty that stands as witness both to an age and the sheer tenacity of artistic creativity. We will place this literature in the context of its time in order to ask a larger question: Can one retain one's humanity in the face of chaos, violence, terror, and dislocation? Works to be read include: Olyesha’s *Envy*, Bulgakov’s *Master and Margarita*, Zamyatin’s *We*, Platonov’s *Foundation Pit*, and Chukovskaya’s *Sofia Petrovna*.

(Fall) Tolstoy’s *War and Peace* - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
Focuses on Tolstoy’s *War and Peace*. To explain the fundamental conflict in Tolstoy’s art, Sir Isaiah Berlin advanced the now famous formula that Tolstoy was a fox (pluralist) struggling to be a hedgehog (monist). Indeed, throughout his life and in his art, Tolstoy sought to shape experience into a single and all-embracing philosophical principle, but he was never able to suppress his extravagant intuition that existence, being contradictory, fragmentary, and ultimately incoherent, defeated attempts at codification. We will read *War and Peace* in an attempt to understand how that irresolvable conflict fuels Tolstoy’s intellectual pursuits and informs his theories on art.

Perhaps no other novelist has delved as deeply into the psychological and metaphysical dimensions of evil as the Russian novelist Fyodor Dostoevsky. This course will be devoted to a close reading of Dostoevsky’s landmark novel of murderous passion and parricide, The Brothers Karamazov. Why should crime and transgression be a privileged avenue of access into the human interior? How is psychology tied to the metaphysical aspect of human existence? What are the sources of evil - and redemption?

(Taught in English; Politics 209f)
Russia was transformed by communist revolution into a global superpower that challenged the dominant ideologies of liberalism and nationalism. It became a powerful alternative to capitalism. In 1991, this imperial state collapsed and underwent an economic, political, and cultural revolution. What explains the Soviet Union’s success for 70 years and its demise in 1991? What sort of country is Russia as it enters the twenty-first century? Is it a democracy? How has Russia’s transformation affected ordinary people and Russia’s relationship to the West?

Since its creation at the beginning of the twentieth century, the Soviet Union dominated the minds of Western foreign policymakers. None of the West’s policies in the Middle East, the Third World, Europe, or China after World War II can be understood without the study of Soviet foreign policy. We will examine the development of Soviet foreign policy since 1917 and, following the collapse of the USSR in 1991, the role played by Russia and Russia and the former Soviet republics in the far more complex and multipolar “New World Order.” What should U.S. policy be toward the emerging new states of the Baltics, Central Asia, and Caucasus?

Throughout its modern history, Russia has been viewed as a Western power, the colonizer of Asian and East European peoples, and as an object of Western colonial expansion. In the eyes of the West, it functioned as the “other” for most of the twentieth century. Such ambiguities were reflected by the debate in Russia on its national identity. What was its relationship to the East and West? We will analyze Russian history from the seventeenth century to the post-Soviet period focusing on Russia and the USSR’s multifaceted relations with the West. We will compare social, cultural, economic, and political developments in Russia and the Soviet Union to those in Europe and the U.S.

(Taught in English; Politics 242f)
Following the collapse of the USSR and the Gulf War, Central Asia and the Caucasus became new centers of geopolitical rivalry. The new states are a source of energy (oil and gas) for Western powers and a vital transit corridor between Eastern Europe and China. While a new "Great Game" is being fought between Western, Far Eastern, and Middle Eastern powers for control over energy pipelines, the region is threatened by environmental catastrophe and water shortages. Is the new oil industry a source of prosperity or an instrument for further exploitation, corruption, and instability?

How important are the new states to the West's strategic energy interests?

With the collapse of the USSR we were told that history was dead and liberal democracy triumphant. There was a "third wave" of democratic change. How accurate have these optimistic characterizations turned out to be? After an introduction to theories of liberal democracy and to the new discipline of "transitology" we will look at how states and leaders have applied such liberal-democratic ideas in Eastern Europe and the former USSR (with comparative examples from Africa and South America), and with what success.

The twentieth century has been largely shaped by several nations' ambitions to build utopian societies. Russia and China have attempted to realize the vast promises of communism while Nazi Germany aimed to construct a perfect racist world. Beyond political struggle, wars, and revolutions, recent extraordinary achievements in technology have contributed to the utopian mindset. Are political utopias dead in the new millennium? Nationalism is one of the greatest challenges to multiethnic states. They have had to create new strategies to deal with the demands of ethnic minorities. (Taught in English; Politics 243s)
Russia was the first nation in the world to face political terrorism. In Russia, the era of terrorism lasted from the 1860s, when the People's Will group launched the hunt on the tsar Alexander II, until 1918, when the Socialist Revolutionary Party attempted to assassinate Lenin. A case study of terrorism in Russia will help us to answer a number of questions highly relevant today. What are the causes of terrorism? What are its goals and methods? What can governments do to cope with it? What is the impact of terrorism on society?

(Spring) Revolutions - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; Politics 350s)
Revolutions have a rich and bloody history on the European continent. In the twentieth century, there were frequent revolutionary upheavals, particularly in Russia and Eastern Europe. We will study two revolutionary periods: Russia in 1917 and the USSR in 1991. These revolutionary events present great contrasts, yet at the same time clarify the nature of revolutions and why they occur. Do they bring the expected fundamental and accelerated change people hope for? Our focus will be on the contrasts and parallels between Russia's early twentieth-century socialist revolution and late twentieth-century capitalist revolution. What was (and is) their impact on European history and thought?

(Spring) Spanish Literature: Medieval, Renaissance, and Golden Age: Spring 2006: Understanding Coexistence: The "Others" from Early Modern to Contemporary Spain
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This course will study pre-1800 Spanish texts (literary and non-literary) from an interdisciplinary perspective. Since the topic varies each time the course is offered, a student may receive credit more than once.

This course will study the way Spain defines itself as a nation by exploring the political, religious, and cultural relations between different ethnic groups which have been coexisting in Spain since the Early Modern period to our present. We will concentrate on three fundamental historical moments: the 13th century (the apogee of tolerance between Arabs, Christians, and Jews); the 16th century (the institutionalization of the Inquisition and its effects on converted Jews and Arabs); and the 20th century (tolerance toward new immigrants from Africa, Eastern Europe, and Latin America is questioned). Our approach will be interdisciplinary (e.g., literature, history, music, and films).

Evita, like Christ, said she would return. Activists affirm the same about the disappeared. How does an aggressive form of melancholia work as a political strategy? When does it turn into paranoia? Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(ITAL-361, FREN-321, FLMST-370, ROMLG-375)
Preamble (for topics courses): This course will concentrate on specific writers, movements, genres, themes, or cultural phenomena. Students will do close readings, prepare reports, research extensively, and write substantial papers. The seminar will challenge students to demonstrate an understanding of cultural analysis, critical skills, and theoretical approaches at an advanced level. Since the topic varies each time the course is offered, a student may receive credit more than once.

In this seminar, we will study the cross-cultural influences between Italian neo-realism, the French nouvelle vague, and the New Latin American Cinemas. Both the Italian and the French movements represent models and counterpoints for those Latin American filmmakers of the 1950s and 60s who sought to redress the dominance of the realist American model in Latin America and the domination of the markets by the products of Hollywood.
The New Latin American Cinemas, in turn, paved the way toward the emergence of Third Cinema. We will study films, as well as cinematic theory,
from Italy, France, the Soviet Union, Japan, Cuba, Brasil, Argentina, and Mexico.
Prerequisites: Permission of instructor required. Course will be taught in English, but Spanish majors write their papers in Spanish.
Notes: 2 meetings (75 minutes). For 300-level credit in Spanish, students must enroll in Spanish 361s (not Romance Languages and Literatures 375s)
and read and write papers in Spanish.

(Fall) Seminar in Spanish Studies: Fall 2005: From Carmen to Country Bumpkins: Faces of Backwardness
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): The specific content of this advanced-level seminar will depend on the instructor. Materials to be studied will vary in
terms of medium and genre, and the critical focus will tend to be interdisciplinary. Papers will be based on research and analysis. Since the topic varies
each time the course is offered, a student may receive credit more than once.
This course will explore backwardness as a key trope of Spanish modernity. In order to understand their place in the industrialized West, Spaniards
have looked not only to the pre-modern gypsies of Mérimée's famous opera Carmen, but also to Castilian farmers who see miniskirts for the first time
in films of the "swinging sixties." Most recently, Spaniards have laughed at the postmodern bumpkins and folkloric freaks that populate Oscar-winning
director Pedro Almodóvar's movies. In this course, these same characters will allow students not only to rethink Modern Spain but also to see in Spain
an ambivalent lag time that raises questions about the meaning of modernity itself.
Prerequisites: Spanish 212 and two of the following: Spanish 221, 235, 237, 244, 246 or permission of the instructor

each time the course is offered, a student may receive credit more than once.
We will discuss and analyze the development of the social issues that constitute modern and postmodern Spain in the 19th and 20th centuries, from
the perspective of unintended humor and heroic failures. From a theoretical framework that includes Foucault, and Deleuze and Guattari, we will
study cultural products that attempt to seriously propose and/or brutally satirize conceptions that define and circulate Spanish society over the past
200 years. Through literature, philosophy, film, and comics, we will examine the distorting mechanisms that transform the serious into the ridiculous,
and the humorous and/or kitsch into profound reflections on their times.

Wells and Kate Chopin to Audre Lorde, Adrienne Rich and Dorothy Allison.

By exploring the different cultural, political, and historical contexts in which these writers work, we will attempt to define the continuities and conflicts that exist within the vast field of black women's writing. Why, when, and how did a black feminist consciousness emerge? How did racial tensions within the predominantly white feminist movement lead to the development of a separate black "womanist"/Third World agenda? In US society, what does it mean to be a man? What does it take to defy "the Man"? How do exaggerations of particular masculine attributes enhance or diminish male power? Has a history of racial oppression impacted the ability of black men to perform "authentic" masculine roles? Why do some black male identities seem to replicate the oppression of the dominant society?

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement  
This course is a comparative study of the shared experiences of colonization, conquest, and displacement among Filipinos, Puerto Ricans, and Native Hawaiians. It operates from the assumption that a critical consideration of their collective experiences not only deepens our comprehension of their social and historical formations but also points to intriguing analytic possibilities that extend beyond the specificities of their histories. In particular, the course asks what an examination of these experiences reveals about America and what it means to be American.

Recent cultural histories of imperialism—European as well as U.S.—have illuminated the workings of race and gender at the heart of imperial encounters. This course will examine the United States’ relationship to imperialism through the lens of such cultural histories. How did encounters between Native Americans and European colonizers, as lived and as remembered, call into play racial and gender identities? How have the legacies of slavery been entwined with U.S. imperial ambitions? How did racialized constructions of gender and sexuality shape the "American Century"? And what can we learn from transnational approaches to "the intimacies of empire?"

(Spring) Exploring Asian Americas - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
The concept of "Asian America" developed in the 1960s in conjunction with the broader civil rights movement. Since the 1960s, new migration has dramatically changed the composition of Asian America, and new theoretical perspectives challenge us to reexamine the concept itself. While a clear division between Asia and the U.S. was inherent in the original concept of Asian America, more recent theories of hybridity, diaspora, and transnationalism blur such clear-cut boundaries around national, ethnic, and racial formations. In this course, we will examine these empirical changes in migration and ethnic identification as well as the shift in theoretical paradigms for understanding them.

(Fall) Anthropology of Modern Japan - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Since the mid-nineteenth century, Americans have viewed Japan as the Orient's most exotic and mysterious recess, alternately enticing and frightening in its difference. Intense economic relations and cultural exchange between Japan and the U.S. have not dispelled the image of Japanese society and culture as fundamentally different from our own. In this course, we will strive for greater understanding of shared experiences as well as historical particularities. Issues covered may vary from one semester to another, but frequently focus on work, women, minorities, and popular culture. Films and anthropological works provide ethnographic examples of some key concepts.

**(Fall) Shopping and Swapping: Cultures of Consumption and Exchange**

(Speaking- and writing-intensive)

We shop for our food, for our clothes, for our colleges. We purchase cars, manicures, and vacations. It seems that there is little that cannot be bought or sold. But we also give and receive gifts, exchange favors, "go dutch" in restaurants, and invite friends for potlucks. This course examines exchange systems cross-culturally, in order to understand their cultural significance and social consequences. It explores how our own commodity exchange system, which appears to be no more than an efficient means of distributing goods and services, in fact contains intriguing symbolic dimensions similar to the gift exchange systems of Native North America, Melanesia, and Africa.

This course examines the topics of food and agriculture by exploring food-related practices within households and communities and the interconnections between different parts of the food system—including markers, local cuisine, farming systems, international regulations, genetically modified foods, and global trade. Drawing from theoretical perspectives including feminist theory, political ecology, and science studies, we will examine food and agriculture as markers of ethnicity, nationality, and class. In addition, we will explore the gendered dimensions of food production and provisioning, examining in turn the place of women in systems of food marketing and consumption.

(Philst-222)

This course examines questions of social class within the Mount Holyoke community, at critical intersections with race, gender, and disability. Drawing upon readings in anthropology and film studies that critique the notion of a homogeneous "community" and offer alternative theoretical models,
students will focus reflexively on three projects. the co-production of an ethnographic film, the creation of an advertising campaign for the film, creation of a website, for extending the conversation about class. Among the questions we explore at all three sites are: What is your idea of work? Where and when do you notice class? Is class a topic of conversation and/or storytelling in your family?

Notes: 2 meetings (50 minutes) plus screenings and production time to be arranged. Classes will be held Tuesday and Wednesday, 2 - 2:50 PM.

(Speaking-intensive)

Preamble (for topics courses): This course covers significant problems in the field of anthropology, with group meetings and reports.

A shift in economic, political, and cultural processes is pushing anthropology to extend the scope of its research beyond the local community and situate it within the world system. In this course, we will consider both the empirical changes in the world system as well as the paradigm shift in anthropological theory. We will search for elements in early anthropological theory on diffusion, exchange, and culture areas that foreshadowed some of the recent theory on globalization and transnationalism, and in so doing, determine more precisely what is new about new theory. We will explore issues related to migration, culture contact, creolization, indigenization, and more.

You will design studies that play to the special features of the organisms you have found. The class counts exactly the same as Biology 150, but it is a small class rather than a large one, addressed to students intrigued by natural history.

Art and music are a part of all human cultures. Is there something about the human brain that drives us to paint and sing? We will examine how the brain simultaneously processes different aspects of a visual object, such as shape, color, and depth, and ask how this processing may affect the way we draw and paint. We will ask whether musical dissonance and consonance are biologically or culturally determined and whether or not different parts of the brain process different aspects of music such as pitch, melody, harmony, rhythm, and the emotional content of a musical piece.

(Fall) Socratic Questions
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive)
Socrates left behind no written works, but conversations with him made such a powerful impression on his contemporaries that he inspired several philosophical "schools" as well as a new genre ("the defense of Socrates"). By examining the contradictions among several ancient portraits of Socrates, and by placing Socrates within the historical context of fifth-century Athens, we will try to understand why the Athenians thought that they should put him to death. In doing so we will consider the limits of civil disobedience and freedom of speech, and the nature of the "good life.”
Readings will include works of Plato, Xenophon, Aristophanes, and others (all in English).
Prerequisites: Open to first-years and sophomores only
Notes: 2 meetings (75 minutes); all readings are in English; appropriate for anyone interested in ancient Greek literature, philosophy, and society.
Instructors: P. Debnar

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(History 226)
The Colosseum, a symbol of the grandeur of Rome, was also the arena for gladiatorial combat that was often bloody and violent. Gladiators and charioteers were at once celebrities and social outcasts. This course examines Roman sport - its inherent contradictions, its use as a form of social control and as a forum for the dissemination of propaganda and political symbols - against a backdrop of social institutions and practices (including the family, women, religion, and slavery).
Notes: 2 meetings (75 minutes); may satisfy either Humanities I-A or I-B requirement

Attention is also given to the different ways of thinking about the divine and human natures in these works, which are broadly reflective of Graeco-Roman and Judaeo-Christian value systems.

(Fall) Distributed Systems - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
In decentralized systems, users often solve large problems by spreading effort over groups of computers. Problems involving information, computation, and hardware distributed at various locations must be solved. A distributed system of computers may not share a common memory or a clock. Therefore, efforts to work together require explicit communication and synchronization mechanisms. We will look at issues of problem solving with multiple processors, distributing workload, and providing access to shared resources such as I/O and storage devices and file systems, centralized and distributed methods for control of parallel activities and for detection, and resolution of conflicts.

CST-249-01 - Critical Social Thought - 2006-2007
(Spring) Global Diversity/European Modernity
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement (English 232)
For two centuries, Western intellectual disciplines have been articulated around the premise that early modern Europe laid the foundation of "modernity"—scientific method, markets, mobility, democracy, and global exchange, or, in a word, "progress"—and then brought it to the rest of the world. But what was the world, both in Europe and outside, that modernity superseded? How did the eighteenth-century's own authors—Dryden, Locke, Defoe, Rousseau, Diderot, Smith, Kant, Bentham, Sade, Edgeworth—perceive those other worlds? Studying global differences at the origins of their erasure, this class aims to rethink what actually constitutes the peculiar modernity that came to shape our lives.

Enlightenment philosophers posed a question that has not ceased to preoccupy intellectuals since: how is today different from yesterday? How are we different from them? Their question nags because it holds promise—as we answer it, we begin to transcend our historical limits and exit the present—but also poignancy. They intuited what is now evident: ours is a time of mass extinction, our very form of life—is endless technological, economic, and military expansion-destroying what resists. This course will return through the Enlightenment to literary traditions, as old as antiquity, attuned to the tragedy of history, in an effort to appreciate what we are about to become—and to extinguish.

(Spring) Global Diversity/European Modernity
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Critical Social Thought 249s-01)
For two centuries, Western intellectual disciplines have been articulated around the premise that early modern Europe laid the foundation of "modernity"—scientific method, markets, mobility, democracy, and global exchange, or, in a word, "progress"—and then brought it to the rest of the world. But what was the world, both in Europe and outside, that modernity superseded? How did the eighteenth century's own authors—Dryden, Locke, Defoe, Rousseau, Diderot, Smith, Kant, Bentham, Sade, Edgeworth—perceive those other worlds? Studying global differences at the origins of their erasure, this class aims to rethink what actually constitutes the peculiar modernity that came to shape our lives.

An examination of exemplary novels, drama, poetry, and theoretical writings of the sixties. The decade saw British theater exploding with an almost unparalleled excitement with new plays and new ways of directing old plays. Meanwhile, British novelists and poets wrestled with the problem of aesthetic value not only after modernism and its mediated relationship with fascism, but also in a world of increasing consumerism. We will end by considering the importance of the image and the spectacle in a world of global, mass media.

**(Spring)** Postcolonial Studies: Alienation and Creativity after Global Capital - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

In its attempt to gain monopolistic control of the spheres of economics, politics, and culture, capital turns people into its instruments. In response, postcolonial works continually ask, what must people recover if they are to regain a full sense of their humanity? This class will explore a series of increasingly anarchic responses: the means of production; the pleasure of destruction; forms of consciousness so primitive that they have left only traces on our memory; and the right to desire and produce without regard to any organizing principle. Marxism, psychoanalysis, fiction, and film from Europe, Africa, the Arab World, and South Asia.

(Gender Studies 333s-07)
This course will examine Queer Theory as it intersects with literature, psychoanalysis, and film. Authors considered will include Foucault, Sedgwick, Butler, and Bersani. As much a critical practice as a critical vocabulary, Queer Theory articulates and complicates a person's relation to sexuality and gender; beyond this, however, Queer Theory challenges and extends how we might more rigorously think about persons, interpersonality, affect, knowledge, and aesthetics. The course will consider not only where Queer Theory has been, but where it might go: its ethical and theoretical importance to an ever-shifting critical, cultural, and political field.

First-year seminar (Writing-intensive)

How do films about historical figures and events differ from written versions? Why do Hollywood and the world's film industries continually re-imagine the events of the past (there have been over 40 films made about Joan of Arc alone), and what do audiences enjoy in these films? Through readings, discussion, and film screenings we will examine the relationship between cinema and history.

(ARTH-202)

Some of the best feature-length films of the past century have commanded our attention because of their compelling artistry and the imaginative ways they tell stories visually and verbally. This course closely studies narrative films from around the world, from the silent era to the present, and in the process it introduces students to the basic elements of film form, style, and narration. Some of the films to be considered are: *Broken Blossoms, Battleship Potemkin, Citizen Kane, Contempt, The Bicycle Thief, Ugetsu, Rear Window, Woman in the Dunes, The Marriage of Maria Braun, Days of Heaven*, and *Moulin Rouge*.

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Anthr-222)
This course examines questions of social class within the Mount Holyoke community, at critical intersections with race, gender, and disability. Drawing upon readings in anthropology and film studies that critique the notion of a homogeneous "community" and offer alternative theoretical models, students will focus reflexively on three projects: the co-production of an ethnographic film, the creation of an advertising campaign for the film, creation of a website, for extending the conversation about class. Among the questions we explore at all three sites are: What is your idea of work? Where and when do you notice class? Is class a topic of conversation and/or storytelling in your family?
Notes: 2 meetings (50 minutes) plus screenings and production time to be arranged. Classes will be held Tuesday and Wednesday, 2 - 2:50 PM.

A study of how medieval stories propose simultaneously the celebration of sexuality and its containment within the social fabric. Against what constraints do individuals pursue their desires? Are masculine and feminine desires equally represented? After initial review of the Tristan legend, readings will include courtly romances placed beside bawdy and humorous tales to engage the full spectrum of emotions and relationships and to ask if those relationships differ (and if so, how they differ) from relationships that pertain today.

Why, and how, do French writers use foreign characters and cultures in their texts? What are the sources that inform their creations? We will read excerpts of eighteenth-century travel accounts and philosophical essays, as well as works of fiction that incorporate images of "elsewhere", as a means of understanding the development of the novel at a turning point in its history.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Taught in English; SPAN-361, ITAL-361, FLMST-370, ROMLG-375)
Preamble (for topics courses): This interdisciplinary seminar will focus on a comparative study of Romance languages or literatures. Topics will vary from semester to semester. Seminar discussions will be conducted in English, but students are expected to read works and write papers in French.
In this seminar, we will study the cross-cultural influences between Italian neo-realism, the French *nouvelle vague*, and the New Latin American Cinemas. Both the Italian and the French movements represent models and counterpoints for those Latin American filmmakers of the 1950s and 60s who sought to redress the dominance of the realist American model in Latin America and the domination of the markets by the products of Hollywood. The New Latin American Cinemas, in turn, paved the way toward the emergence of Third Cinema. We will study films, as well as cinematic theory, from Italy, France, the Soviet Union, Japan, Cuba, Brasil, Argentina, and Mexico.
Prerequisites: Permission of instructor. Students who wish to receive 300-level credit in French must write their papers and do appropriate course readings in French.

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Preamble (for topics courses): These courses examine a definable phenomenon—an idea, a movement, an event, a mentality, a cultural structure or system, an historical problem, a critical mode—relevant to the civilization of France or of French-speaking countries. Readings from a variety of disciplines shed light on the particular aspect of thought or culture being studied.
A paradox of the eighteenth century lies in the disparity between those who selfishly seek individual happiness and others who generously die for social justice. We will read plays from the Rococo period by Marivaux and Beaumarchais, who portrayed the elegant but fragile aristocracy; then study the French revolution of 1789 and view twentieth-century films that offer diverse perspectives on the fall of the Old Regime and the triumph of the Bourgeoisie: Jean Renoir (La Marseillaise, 1937), Ettore Scola (La nuit de Varennes, 1982), Andrzej Wajda (Danton, 1987), and Eric Rohmer (The Lady and the Duke, 2003). This is a multimedia course. Digital Story Telling will replace a term paper.

The New Wave was a series of films made in the 1960s by a group of pioneers, known as rats de cinémathèque, who had seen almost every film ever made and particularly admired American and Russian cinema. Introduction to major themes in U.S. history through the lens of women's history. Located both near the centers of power in American society and at its margins, the history of women as a social group is one of conflict and diversity. While women do not make up a coherent group, all share the unique experience of being "women" in class, racial, and religiously specific ways. Themes include Native American and Hispanic women during European contact and settlement; the impact of the American Revolution; benevolent women and the "fallen" women they hoped to help; enslaved women and the plantation mistress; women in the multicultural west; women's involvement in the Civil War and Reconstruction.

(Fall) Feminist Theory: Feminist and Queer Theory
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Queer theory follows certain strands of feminist theory in rejecting the notion that gender and sexual orientation are essential, binary, or judged by eternal standards of morality and truth. Both argue that gender and sexuality are constructed by means of a complex array of social codes and forces, forms of individual activity and institutionalized power relations, which interact to shape the notions of what is "normal" or "natural." At the core of the debate is the question of sexual difference. Thus, in addition to readings concerning sex, gender, sexual orientation, and race, we read foundational philosophical texts that flesh out the ontology of the terms we employ.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement (History 301s)
In this seminar, we will study the history of sexuality, desire and bodies. The premise of this interdisciplinary seminar is that sexuality is both historically constructed (fluid and changing over time and culture) and embodied and lived (experienced for many as essential and unchanging). We will study experts who set out terms and frameworks for understanding modern sexuality; how in different ways and in different times communities of sexual minorities strategically used selected elements of expert discourse to forge their own narratives of self and desire. Students will examine sexual classifications—be they mainstream and "normal" or subcultural and "deviant"—as mutually constructed.

(Spring) Interdisciplinary Seminar: Feminist Theologies
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement (Religion 323s)
Mary Daly, Elisabeth Schussler Fiorenza, Phyllis Trible, and Judith Plaskow, among others, have argued that traditional Jewish and Christian theological systems have overlooked the needs, concerns, histories, and contributions of women. Their challenges range from the historical modification of a presumably unbiased religious system to the outright rejection of a so-called patriarchal establishment. Whatever their approach, feminist theologies offer diverse and incisive tools for understanding how a theological system operates, how transitory cultural assumptions become embedded in ongoing doctrines, and how apparently minor adjustments can have significant ripple effects.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Spanish 351)
In the 1990s Queer Liberation entered the public sphere as a major political force. Simultaneously, American academia produced and exported a new academic discipline: Queer Studies. As a consequence, the North American liberational model displaced cultural and theoretical models of sexuality of other countries. We will examine theories and (textual and cinematic) practices from Argentina, Brasil, Chile, Cuba, Mexico, and Peru in order to recuperate cultural models under erasure in the wake of the U.S. model's identity-focused and consumer-driven triumphalism. We will also consider some of the key U.S. texts that have consecrated Queer Studies as a discipline.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course will examine Queer Theory as it intersects with literature, psychoanalysis, and film. Authors considered will include Foucault, Sedgwick, Butler, and Bersani. As much a critical practice as a critical vocabulary, Queer Theory articulates and complicates a person's relation to sexuality and gender; beyond this, however, Queer Theory challenges and extends how we might more rigorously think about persons, interpersonality, affect, knowledge, and aesthetics. The course will consider not only where Queer Theory has been, but where it might go: its ethical and theoretical importance to an ever-shifting critical, cultural, and political field.

GEOL-101-01 - Geology - 2006-2007
(Fall) Environmental Geology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Our existence on the planet is greatly affected by changing environmental conditions. Some of these changes are "natural" (e.g., floods, earthquakes), but many directly result from human mismanagement (groundwater contamination, acid rain, the greenhouse effect). Although some of these
problems are of local concern, an increasing number are of global scale. In this course, students develop an appreciation for the way the Earth's environment affects our lives. In the laboratory, students learn techniques to recognize and interpret environmental hazards and develop strategies to address environmental problems.

(Fall) Surface Processes
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
The surface of the Earth is a history book of past environmental change. Every hill and valley, every erosional feature, every deposit is the result of processes acting at the Earth's surface. In this course we study these processes (e.g., glaciers, rivers, slopes, coastlines, windblown sand, frozen ground, cave formation, soil development) to better understand how they work and to understand the resulting landforms and deposits. Armed with this understanding we can then observe different landforms and deposits and infer past processes (environments of deposition). Fieldwork and trips allow students to explore firsthand the processes that have created and modified the Earth's surface.

Seminar: Climate through Earth History - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
From the geologic record we know that the Earth’s climate has changed markedly through time, throwing the planet into periods of prolonged warmth as well as in and out of Ice Ages. Long-term changes can be related to plate tectonic and oceanic changes, whereas, orbital changes, changes in atmospheric chemistry, and solar variability appear to drive high-frequency changes. This course reviews what we know about past climate change and the factors that caused it, and ends with a discussion of the science behind global warming.
Prerequisites: 1 200-level geology course or permission of instructor
Notes: 1 meeting (3 hours)

Lectures concentrate on field techniques, stress, strain, faulting, folding, rock strength, the relation between rock deformation and metamorphism, and deformation mechanisms. Five labs are field trips that involve data collection. Short problem sets emphasize quantitative skills. During the final weeks of the semester, two oral presentations emphasize fluency in the published literature of structural geology; the final assignment is a paper. GEOL-342-01 - Geology - 2006-2007
(Fall) Seminar: Human Dimensions of Climate Change--Past, Present, Future
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Seminars offer directed study and discussion of one or more selected topics in geology. Topics vary from year to year. Consult the department for information about future seminars.
An interdisciplinary examination of how climate change has affected human societies in the past and how it might in the future. Many societies have been impacted by climate change, and its influence on their development is considerable. We will examine the impacts of rapid climate change on the civilizations of Mesopotamia, the Classic Maya, and Europe during the "Little Ice Age." Evidence indicates that the increase of greenhouse gases in the atmosphere will cause significant future changes in global and regional climate. These climate changes will likely affect such dimensions of human existence as water availability, food, security, and health. The impacts will be discussed.

The Protestant Reformation (1517-1559) has long been recognized as a crucial point in the development of Western culture. We will explore how cross-regional productive systems benefited some participants at the expense of others. The history of India has been singled out for its complex intermingling of religion and politics. This course will explore the constitution of religious identities in two of India's largest religious communities: Hindu and Muslim. Focusing primarily on the colonial period, we will discuss religious reform movements, communal violence, mass politics, and the partition of the subcontinent into the independent states of India and Pakistan. Throughout we will be interested in the ways that the colonial experience affected the religious thought and practice of Indians. Finally, we will explore the meanings of this history for the postcolonial workings of democracy and secularism in modern India.

This class uses popular music, dance, fiction, film, street art, bus slogans, newspapers, and other sources to document African interpretations of the decades since "flag independence" in 1960. We will let African musicians, writers, filmmakers, and artists direct our investigation of the big questions of the class: Why is the gap between rich and poor in African societies increasing? What is happening to gender relations? What do African people think of their political leaders and how do they imagine political situations might improve? Notes: 1 meeting (3 hours) plus 4th hour

(Spring) Magicians, Witches, and Demons
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Both white and black magic were practiced throughout Europe for centuries before the high Middle Ages saw an important shift in the definition of witchcraft. Instead of magicians being seen as healers with herbal lore, in the late medieval period the Church defined them as witches whose power
came directly from the devil. We will explore how, from being a necessary if frightening aspect of life in a magical world, witchcraft became a heresy based on Satanic pacts and rituals, and how the persecution of witches culminated in a violent witchcraze at the same time that many Enlightenment philosophers were advocating rationality as the human ideal.

Themes include Native American and Hispanic women during European contact and settlement; the impact of the American Revolution; benevolent women and the "fallen" women they hoped to help; enslaved women and the plantation mistress; women in the multicultural west; women's involvement in the Civil War and Reconstruction.

China, Japan, and Korea were all well-organized states and societies in the nineteenth century, when the full impact of Euro-American imperial power arrived in East Asia. In this seminar, we will study the history of sexuality, desire, and bodies. The premise of this interdisciplinary seminar is that sexuality is both historically constructed (fluid and changing over time and culture) and embodied and lived (experienced for many as essential and unchanging). We will study experts who set out terms and frameworks for understanding modern sexuality; how in different ways and in different times communities of sexual minorities strategically used selected elements of expert discourse to forge their own narratives of self and desire. Students will examine sexual classifications--mainstream and "normal" or subcultural and "deviant"--as mutually constructed.

This course considers how gender was a central frame for regulating political and social relations in European empires and their colonies in the last 200 years. The readings bring interrelated historical themes into play: the multiple ways in which masculinity and its privileges structured the ways that European men negotiated with non-European men over questions of political authority; how women, both European and native, became a focus of social, cultural, and sexual regulation. A final theme addresses the relationship between European feminist discourses and feminist movements in colonies. Could Romans be funny? Perhaps surprisingly, in a culture where seriousness (gravitas) and sternness (serrius) were praiseworthy attributes, Romans enjoyed theatrical productions adapted from Greek comedies - from raucous and ribald farces to more subtle comedies of manners. They also believed that satire, poetry that poked fun at the vices and foibles of human nature, was a truly Roman genre. Moreover, both comic and satirical elements appear in a wide range of Roman literature. Authors may include Plautus, Terence, Horace, Ovid, Martial, Juvenal, and others.

The historical development of the Caribbean from the Conquest to the mid-twentieth century. Patterns of conquest, colonization, and settlement by European nations; the rise of plantation-dominated society; the process of insular and interregional differentiation; the emergence of American imperial designs; and the rise of anticolonial, nationalist movements. Comparative reviews of the experience of Haiti, Jamaica, and Puerto Rico highlight broader regional trends and the ways the Caribbean's major language zones have responded to the challenge of their shared history.

(Spring) Paradigms of New World Thought
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This course is devoted to the work of commanding figures of Latin American and Caribbean thought at various times and different places. Thinkers whose work may form its basis in various offerings include among others: Columbus, Bartolomé de Las Casas, José Martí, J. C. Mariátegui, C.L.R. James, etc. Their lives and work exemplify the diversities, varying regional settings, social contexts, and shifting historical coordinates of major epochs of transition. Their assessment of a myriad of key issues has made each a touchstone of continuing authority and influence extending beyond their particular locale, time, or region. Why this should be so is among the many questions we will address.

(History 288f)
An analysis of the modern Mexican nation-state organized around three major themes: the conflictive yet symbiotic relationship with the United States, from the war of the 1840s through the North American Free Trade initiative of today; the succession of reformist and revolutionary upheavals in 1810-1821, 1855-1867, 1910-1917, the 1930s, and again today, seeking to resolve both problems of the colonial past and new conflicts traceable to the
very reforms generated by earlier political and social struggles; and the meaning of Mexican nationality from different ethnic, gender, and class perspectives. Readings include autobiographical and literary works, historical studies, and films.

(History 386)
This seminar explores the diverse experiences of Central American nations in the twentieth century. From a common basis in an export-oriented agriculture, social and political alternatives ranging from social democracy to recurrent military rule, neofascist regimes, and revolutionary socialism have emerged in the isthmus. The course uses materials ranging from autobiography and literature to historical and anthropological studies to understand how this came to be. In addition to national cases, we consider the unique experiences of the area's indigenous and Atlantic-coast peoples within and outside the nation-state framework.

For many the "discovery" of America opened the modern era. Its closing may also have been foretold in Latin America's confounding of diverse theories of modernization and development in recent times. This seminar will introduce the student to a number of both classic and more recent works on Latin America (in English) that advance along postmodernist lines, ranging from cultural contact and conflict, language, meaning, and power in the sixteenth century, to the invention of national identities in the nineteenth century, to discourses of ethnicity, class, gender, and reason in the twentieth century.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

This course explores the structure and variety of societies generated in North, Central, and South America by four widely distributed export crops. Although not bound by rigid chronology, our focus will be primarily on the period 1750-1950. Principal concerns of the course are variations by time and place in each commodity's technologies, labor systems, farm sizes, and social structure; the political dynamics associated with each type of farming; and the problematic features of capitalism in agriculture, or, how and when do peasants become farmers and farming agribusiness? Readings in English on cases drawn from throughout the Americas.

Medieval Studies

(Fall) Medieval Culture and Society: Seminar in Reading, Writing, and Reasoning: Picturing the Middle Ages
- Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
- First-year seminar (Writing-intensive)
- Preamble (for topics courses): This course offers a foundation for inquiry into medieval culture. Using readings in literature, art, music, history, politics, philosophy, and sciences to interpret the Middle Ages, a student sharpens her awareness of language and imagery as means of communicating experience and improves her skills of attentive reading and persuasive writing. The 101f-102s seminar sequence is designed to be a yearlong course, but students may take one semester without the other.
- How did medieval people see themselves? How do we imagine them? Seeking answers to these questions, this course will explore several aspects of medieval culture: social structures, gender issues, tensions between courtliness and eroticism, religion, politics, perceptions of the "other," as represented in literature, art, history, and modern films. Works will include the *Song of Roland* (epic), the *Bayeux Tapestry* (pictorial relation of the Battle of Hastings in 1066), tales of love and adventure, miracles of the Virgin Mary, illuminated manuscripts, and Gothic monuments such as the cathedral of Notre Dame in Paris. Resources will draw on CD-ROMs and the Web.

(Fall) Medieval Culture and Society: Seminar in Reading, Writing, and Reasoning: Europe and the Atlantic World, 1300-1700
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
First-year seminar (Speaking- and writing-intensive; same as History 101f)
Preamble (for topics courses): This course offers a foundation for inquiry into medieval culture. Using readings in literature, art, music, history, politics, philosophy, and sciences to interpret the Middle Ages, a student sharpens her awareness of language and imagery as means of communicating experience and improves her skills of attentive reading and persuasive writing. The 101F-102s seminar sequence is designed to be a yearlong course, but students may take one semester without the other.

This course inquires into several dimensions of European society and culture during the transition from principalities and fiefs to early modern states, from feudalism to capitalism, from serfdom to both free and slave labor. Equally important, however, will be comparison of western Europe with other Atlantic societies of these centuries and examination of consequences for Europeans, Africans, and Americans (north and south) of encounters among them. Using both voices from the period and recent scholarship about early modern Western and Atlantic societies, the course will look critically at the making and remaking of "Western" culture between the Middle Ages and the modern era.

(Fall) Special Topics in Medieval Studies: Myth of the Dark Ages: Ireland and Britain AD 410-900
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(same as History 232f-02)
Preamble (for topics courses): This course is designed to address themes and historical periods in an interdisciplinary framework. Topics will bring together the study of art, literature, and history to heighten awareness of the complex interaction of cultural and political forces in medieval society. Issues will be explored through the methods of different disciplines in order to develop the student's analytical and critical skills.

This survey of the history, literature, and art of the British Isles in the early Middle Ages seeks to overturn the myth of centuries of darkness that shrouded western Europe after the "fall" of the Roman empire. In fact, the early Middle Ages were a time of intense political, intellectual, and religious activity in Ireland and Britain. In this course we will travel from the ring-forts of Ireland to the burial mounds of Sutton Hoo. We will meet some of the personalities who flourished in this era of great change and reform: from Saint Patrick to Bede, from the high kings of Tara to King Alfred the Great. The course spans from the withdrawal of Roman troops from Britain to the Viking age.

Issues will be explored through the methods of different disciplines in order to develop the student's analytical and critical skills.

This course surveys the history of medieval monasticism from its origins in the deserts of Egypt to the foundations of the mendicant orders in thirteenth-century Europe, with a heavy emphasis upon the devotional ideas and beliefs that drove these powerful movements. Topics include the various monastic rules and orders, and the models of monastic virtue and sanctity, from severe asceticism and anchoritism to obedience, poverty and stability. We will investigate how monasticism became entrenched in the power structures of church and monarchy; how monasteries became not only devotional retreats from a sinful world, but also important intellectual and economic centers in the medieval landscape.

The patriarchal society in which Christine lived was a difficult place to find work when her husband died and she became the sole support of her children. Hers was a troubled world: the late fourteenth and early fifteenth centuries saw political, social, and economic crises in France. The course will examine how Christine made a place for herself amidst personal and political turmoil. Most stage musical presentations are the work of one composer, or of one composing team. But there are some subgenres in which music by many composers is brought together into a coherent whole. (Some opera scenes productions and any musical revue fall into this subgenre.) What characteristics distinguish these subgenres from a typical concert program that also features compositions by a variety of composers? Course work will include listening to/viewing of representative works and analysis of those works from different perspectives, culminating in a final project in creating a work in this style.

We trace the rise of experience as the central category of
pietism and romanticism in the texts of Schleiermacher and Coleridge and in the poetry of Novalis. Finally, we focus on the pragmatic tradition in American philosophy of religion, especially in the work of William James, Josiah Royce, and Cornel West.

(Religion 226fs)
This course begins its survey of the discipline of the philosophy of religion with the work of Plato. We then proceed to an examination of the classical theistic arguments for knowledge of God's existence (those of Anselm, Aquinas, and Maimonides) that dominated Scholastic thought and consider the criticisms of these approaches by Enlightenment philosophers such as Kant. We trace the rise of experience as the central category of pietism and romanticism in the texts of Schleiermacher and Coleridge. Finally, we focus on the pragmatic tradition in American philosophy of religion, especially in the work of William James and Josiah Royce.

This seminar attempts to investigate carefully the broad relationship between language and the world by focusing on issues of realism and idealism: Does language merely attach labels to things (and kinds of things) that exist independently of our thought? Or do we contribute to the construction of the world by developing a conceptual scheme for describing or representing it? The seminar will focus on the work of two pivotal figures in the philosophy of language: Wittgenstein and Chomsky.

Preamble (for topics courses): This course studies issues of current concern in contemporary moral theory, moral psychology, and foundations of ethics.

Meta-ethics is the study of the concepts and methods used in ethical discourse and debate. It is not the study, for example, of which actions are right or wrong, but rather of what the terms "right" and "wrong" mean. Possible questions to be discussed in this seminar include: Can moral judgments be true or false? Are moral judgments expressions of feelings? Are they objective or subjective? Are we rationally required to be moral? Are there moral facts? How are moral and aesthetic judgments different? This course presupposes a strong background in philosophy. Prior coursework in ethics and logic is recommended.

What makes a body sexy? Is heterosexuality natural? What is "sex"? Feminist philosophy is in the midst of a revolutionary transformation. Rather than remaining content with the task of indicating the shortcomings of the philosophical canon, feminist philosophers are constructing their own distinctively feminist version of philosophy. In this course, we shall explore what contemporary feminist philosophers have written about the nature of sex and sexuality.

Prerequisites: 8 credits in department or permission of instructor

Notes: 1 meeting (2 hours)

(Fall) Topics in Philosophy: American Pragmatism and Chinese Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Chinese philosophy mainly refers to Confucianism and Daoism. While the former focuses on human relationships and ritual, the latter accentuates simplicity, nonaction, and nature. American Pragmatism maintains that the meaning and the truth of an idea is a function of its practical consequences. It was embraced by many Chinese thinkers early in the last century. Why? How is Chinese philosophy related to American philosophy? In this seminar we try to identify some important affinities between the two, and discuss some hot issues concerning China's future within pragmatic philosophical context.

Questions of power, agency, structure, materiality, bodies, subjectivities, and discursive practices have been central to both feminist and queer theories. In this course, we will focus on these issues, exploring in particular the tensions among poststructuralist, Marxist, and materialist approaches. In analyzing contemporary theories of gender and sexuality, we will pay particular attention to issues of race, class, ethnicity, nationality, and globalization.
