This is a non-contact sport played by two seven-player teams. The object of the game is to score goals. The Frisbee may only be moved by passing; the thrower is not allowed to take any steps. When a pass is incomplete, intercepted, etc., a turnover occurs, resulting in a change of possession of the disc. A goal is scored when a player successfully passes the disc to a teammate in the end zone which that team is attacking.
Notes: Beginning skill level. Offered first half of semester. 2 meetings( 50 minutes). No repeats.
Instructors: A. Whitcomb
Expected enrollment: 21

Semi-private instruction available at any level with permission and arrangement of the instructor only during the first week of classes.
Prerequisites: Permission of instructor. Enrollment limited to 3.
Notes: 10 lessons (50 minutes); fee course
Instructors: The department
Expected enrollment: 3
Physical Education and Athletics (Academic Credit)

PHYED-261-01 - Physical Education and Athletics (Academic Credit) - 2006-2007
(Spring) Women in Sport - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Community-based learning course)
This course is designed to introduce students to the history of women in sport, the status of women in sport since the passage of Title IX in 1972, and current issues impacting women in sport such as race, gender, and sexual orientation. Students will explore the various topics related to coaching education and will complete a Title IX review for class.
Notes: 1 meeting (2 1/2 hours)  No P.E. credit. Academic credit only.
Instructors: L. Priest
Expected enrollment: 20

Physics

PHYS-103-01 - Physics - 2006-2007
(Fall) Foundations of Physics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course studies a variety of topics in physics unified by the physical notions of force, energy, and equilibrium, and the mathematical notions of geometry, proportion, and dimensional analysis. Topics include geometrical optics, time, oscillation, statics, elasticity, conservation of energy, and fluids.
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes), 1 lab (3 hours)
Instructors: M. Peterson
Section Instructors: 01 LAB The department | 02 LAB The department | 03 LAB The department |
Expected enrollment: 28

PHYS-115-01 - Physics - 2006-2007
(Fall) Force, Motion, and Energy
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Studies the mechanics of material objects. Topics include Newton's laws, projectile motion, circular motion, momentum, kinetic and potential energy, angular momentum, gravitation, and oscillations. Calculus is used at the level of Calculus I.
Notes: 4 meetings (50 minutes), 1 lab (3 hours)
Instructors: S. Tewari

PHYS-204-01 - Physics - 2006-2007
(Spring) Phenomena of Physics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course studies a variety of topics in physics, including thermodynamics, acoustics, wave optics, electricity, magnetism, and nuclear phenomena. As in Physics 103, the applicable mathematics is geometry, proportion, and dimensional analysis.
Prerequisites: Physics 103 or 115
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes), 1 lab (3 hours)
Instructors: M. Peterson
Section Instructors: 01 LAB C Thomas | 02 LAB | 03 LAB |

PHYS-216-01 - Physics - 2006-2007
(Fall) Waves and Electromagnetism
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Topics include: electromagnetism, emphasizing fields and energy; electrostatics; electric circuits; magnetism; induction; and electromagnetic radiation. Introduces both mechanical and electromagnetic wave phenomena. Additional topics chosen according to the interests of the class and instructor.
Prerequisites: Physics 115; Mathematics 202 or concurrent enrollment
Notes: 4 meetings (50 minutes), 1 lab (3 hours)
Instructors: K. Aidala
Section Instructors: 01 LAB The department | 02 LAB The department |

PHYS-231-01 - Physics - 2006-2007
(Fall) Techniques of Experimental Physics
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
Provides training in the techniques employed in the construction of scientific equipment.
Prerequisites: soph, jr, major
Notes: 1 meeting (2 hours) for 4 weeks
Instructors: The department

(Spring) Techniques of Experimental Physics
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
Provides training in the techniques employed in the construction of scientific equipment.
Prerequisites: soph, jr, major in department
Notes: 1 meeting (2 hours) for 3 weeks
Instructors: L. McEachern
Expected enrollment: 4

PHYS-251-01 - Physics - 2006-2007
(January) Techniques in Scanning Probe Microscopy
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
We will learn about the many capabilities of the scanning probe microscope (SPM), with significant hands-on experience included. The SPM is a versatile tool in nanoscience, initially used to take topographic images in air, vacuum, or liquid. It can be used to image electric charges and magnetic fields, and to measure material properties. There are many applications in biology from topographic imaging of living samples to measuring the binding forces of molecules. We will cover the basic theory of operation and current research in the field, in addition to learning to take topographic images. This class is ideal for students interested in pursuing research in nanoscience.
Prerequisites: soph, jr, per I
Notes: 3 meetings (3 hours)
Instructors: K. Aidala
Expected enrollment: 6

PHYS-301-01 - Physics - 2006-2007
(Fall) Waves and Particles
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
A comprehensive treatment of wave phenomena, particularly light, leading to an introductory study of quantum mechanics. Topics include wave propagation, polarization, interference and interferometry, diffraction, X-ray and electron diffraction, the wave nature of particles, the uncertainty principle, and Schroedinger's equation in one dimension.
Prerequisites: Physics 216, 303 or concurrent enrollment
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes), 1 lab (3 hours)
Instructors: J. Hudgings
Section Instructors: 01 LAB J Hudgings | 02 LAB J Hudgings |
Expected enrollment: 12

PHYS-302-01 - Physics - 2006-2007
(Spring) Quantum Mechanical Phenomena
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course provides an introduction to quantum mechanics. The Uncertainty Principle, Schroedinger's Equation, and the hydrogen atom are studied in depth, with emphasis on angular momentum, electron spin, and the Pauli Exclusion Principle.
Prerequisites: Physics 301
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes), 1 lab (3 hours)
Instructors: J. Hudgings
Section Instructors: 01 LAB |
Expected enrollment: 14

PHYS-303-01 - Physics - 2006-2007
(Fall) Introduction to Mathematical Methods for Scientists
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Topics include infinite series, complex numbers, partial differentiation, multiple integration, selected topics in linear algebra and vector analysis, ordinary differential equations, and Fourier series.
Prerequisites: Physics 216 or concurrent enrollment
Notes: 4 meetings (50 minutes)
Instructors: S. Tewari
Expected enrollment: 25

PHYS-306-01 - Physics - 2006-2007
(Fall) Introduction to Nanotechnology
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This course will provide an introduction to ideas and physical concepts for understanding changes in physics properties when sizes are allowed to shrink to nanoscale. An overview of self-assembled nanostructures in nature and industry, methods of nanofabrication and characterization of nanostructures and applications of nanotechnology in other disciplines will be given. Lectures will be complemented by weekly "journal club" style meetings in which, on a rotating bases, students will be required to read and present papers on a topic related to nanoscience and technology from primary sources.
Prerequisites: Physics 303 or perl
Instructors: M. Farzaneh

PHYS-308-01 - Physics - 2006-2007
(Fall) Electronics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is a study of electrical circuits and components with emphasis on the underlying physical principles; solid-state active devices with applications to simple systems such as linear amplifiers; feedback-controlled instrumentation; and analog and digital computing devices.
Prerequisites: Physics 216
Notes: 3 meetings (50 minutes), 1 lab (3 hours)
Instructors: C. Sutton
Section Instructors: 01 LAB C Sutton | 02 LAB C Sutton |
Expected enrollment: 12

PHYS-315-01 - Physics - 2006-2007
(Spring) Analytical Mechanics
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Newton's great innovation was the description of the world by differential equations, the beginning of physics as we know it. This course studies Newtonian mechanics for a point particle in 1, 2, and 3 dimensions, systems of particles, rigid bodies, and the Lagrangian and Hamiltonian formulations.
Prerequisites: Physics 303
Notes: 4 meetings (50 minutes)
Instructors: C. Sutton
Expected enrollment: 25

PHYS-324-01 - Physics - 2006-2007
(Spring) Methods of Applied Mathematics
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Mathematics 324s)
This course is an introduction to theories and techniques important to applied mathematics. Topics include special functions, calculus of variations, theory of functions of a complex variable, solution of partial differential equations, integral transform methods, and Green's functions. While the focus of the course is on analytical techniques, we will develop numerical approaches to problem-solving.
Prerequisites: Physics 216, 303
Notes: 4 meetings (50 minutes)
Instructors: S. Tewari
Expected enrollment: 25

PHYS-325-01 - Physics - 2006-2007
(Fall) Electromagnetic Theory
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course presents the development of mathematical descriptions of electric and magnetic fields; study of interactions of fields with matter in static and dynamic situations; mathematical description of waves; and development of Maxwell's equations with a few applications to the reflection and refraction of light and microwave cavities.
Prerequisites: Physics 301, 315, or 324
Notes: 3 meetings (50 minutes)
Instructors: C. Sutton
Expected enrollment: 25

PHYS-326-01 - Physics - 2006-2007
(Spring) Statistical Mechanics and Thermodynamics
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course presents thermodynamic and statistical descriptions of many-particle systems. Topics include classical and quantum ideal gases with applications to paramagnetism; black-body radiation; Bose-Einstein condensation; and the Einstein and Debye solid; the specific heat of solids.
Prerequisites: Physics 301
Notes: 3 meetings (50 minutes); Physics 326 or 336 will normally be offered in alternating years
Instructors: S. Tewari
Expected enrollment: 25

PHYS-329-01 - Physics - 2006-2007
(Fall) Topics in Advanced Physics: Solid-State Physics
PHYS-329-01  -  Physics - 2006-2007
(Spring) Topics in Advanced Physics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Topics chosen according to the interests of the students and the instructor.
This course will be an introduction to the physics of the solid state. Topics covered include: electrical conductivity, crystal structure and reciprocal lattices, energy bands, semiconductors, and metals. Advanced material (e.g., defects, superconductivity, or magnetism) will be introduced based on student interest.
Prerequisites: Physics 302, 325
Notes: 2 meetings (75 minutes)
Instructors: W. Lopes
Expected enrollment: 25

PHYS-336-01  -  Physics - 2006-2007
(Spring) Quantum Mechanics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course is an introduction to formal quantum theory: the wave function and its interpretation, observables and linear operators, matrix mechanics and the uncertainty principle; solutions of one-dimensional problems; solutions of three-dimensional problems and angular momentum; physics and perturbative methods.
Prerequisites: Physics 302, 324 or 325
Notes: 3 meetings (50 minutes); Physics 326 or 336 will normally be offered in alternating years
Instructors: The department
Expected enrollment: 25

Politics

POLIT-101-01  -  Politics - 2006-2007
(Fall) Fundamentals of Politics: Concepts and Controversies - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Writing-intensive)
This course examines three contrasting conceptions of freedom and of what threatens or denies or enhances freedom, in light of selective controversies in American politics and society. We explore concepts related to "freedom," such as "community," "equality," and "the common good"; and we acquaint ourselves with competing political perspectives on contemporary America. We also consider some pressing issues, such as the role of government and the future of public goods; the social limits to economic growth; the character and ramifications of economic inequality; racial, ethnic, and gender discrimination; and affirmative action.
Notes: 2 meetings (75 minutes); conducted in small sections, with students submitting short essays throughout the semester
Instructors: S. Ellenburg

POLIT-104-01 - Politics - 2006-2007
(Fall) American Politics
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Offers an overview of the American political system and the theories of those who celebrate it and criticize it. Focuses on the institutions of American politics, including the Constitution, the presidency, Congress, the courts, parties and elections, interest groups, and movements seeking political change. Also includes a theoretical focus: a critical examination of the notions of liberalism, pluralism, and democracy that inform the practice of American politics.
Notes: 2 meetings (75 minutes)
Instructors: The department
Expected enrollment: 40

(Fall) Comparative Politics
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Writing-intensive)
Introduces the study of comparative politics, with particular focus on democratization, economic development, globalization, states, and civil society. Comparison of political institutions, parties, gender systems, and national and ethnic conflicts. Relevant case studies.

Notes: 2 meetings (75 minutes)
Instructors: S. Philbrick Yadav

**POLIT-111-01** - Politics - 2006-2007
(Fall) Confessions, Novels, and Notebooks: The Self and Political Thought - *Not offered this year/term
First-year seminar (Writing-intensive)
What is the relationship between personal experience and political theory? How do political thinkers grasp and articulate the connections between self and political order? Our first-year seminar will probe the links between heart and mind in political philosophy by exploring the lives and writings of three illustrative figures who together span the history of political thought. This coming year those figures will be Saint Augustine, Jean Jacques Rousseau, and Simone de Beauvoir.
Notes: 2 meetings; This is a first-year seminar
Instructors: J. Cocks
Expected enrollment: 20

**POLIT-112-01** - Politics - 2006-2007
(Fall) Speaking and Arguing: The Rhetoric of Peace and War - *Not offered this year/term
(Speaking-intensive)
The art and mechanics of persuading a polity to support either war or peace through oral argument. How speeches frame issues, mobilize public opinion, and persuade individuals to support or resist decisions to go to war. Students will be expected to deliver speeches, lead discussions, and critique their own and others' presentations.
Prerequisites: limited to first-year students
Notes: 2 meetings (75 minutes)
Instructors: V. Ferraro
Expected enrollment: 15

**POLIT-116-01** - Politics - 2006-2007
(Fall) World Politics
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course is a survey of contending approaches to the study of conflict and cooperation in world politics. Examines key concepts— including balance of power, imperialism, collective security, deterrence, and interdependence— with historical examples ranging from the Peloponnesian War to the post-cold war world. Analyzes the emerging world order.

(Fall) Globalization and Its Discontents - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
First-year seminar (Writing-intensive)
What is the world coming to? Is globalization expanding global trade, new information technology, an emerging global culture, and spreading democratization, as its supporters claim? Or is it a new form of first-world imperialism deepening inequality, undermining genuine democratic politics, and escalating the environmental crisis? Intensive writing and discussion.

POLIT-208-01 - Politics - 2006-2007
(Spring) Chinese Politics
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course examines the politics of contemporary China. Beginning with an assessment of the origins of the Chinese Revolution, the course then examines core institutions and events in the People's Republic, including the Great Leap Forward, Cultural Revolution, post-Mao reforms, and the Tiananmen Incident. In addition, the course analyzes the changing nature of state-society relations, the emergence of new social and political identities, and China's role in the international arena.
Prerequisites: Politics 106 or permission of instructor

*(Spring) Minorities and the Law - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Focuses on the interrelationship of law and the distribution of political power as they impinge on members of disadvantaged ethnic and racial minorities. Examines the legal status of Native Americans, African Americans, Chinese, Japanese, and Latino/Hispanic groups in historical perspective, together with the impact of ethnic and racial stratification on the contemporary exercise of politics and the operation of juries as social institutions. Assesses the contemporary status of minority groups under the U.S. Constitution in the areas of "equal protection" and "due process," and legislation purporting to eliminate racial discrimination in housing, banking, and employment.

Prerequisites: soph, jr, sr, or fy with permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: W. Stewart

*(Fall) Ancient and Medieval Political Thought*

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement (Writing-intensive)

Sophocles (<I>Antigone</I>), Plato (<I>Apology</I>, <I>Crito</I>, and <I>Republic</I>), Aristotle (<I>Nicomachean Ethics</I> and <I>Politics</I>), Augustine, Aquinas, Beza, and Mornay. Recurring issues include the obligation to obey and disobey, tyrannicide, the role that different kinds of knowledge or reason ought to play in politics, distributive justice, who ought to rule and who ought not to rule, alternative classifications of political societies, and the uses of arguments by analogy in politics.

Prerequisites: soph, jr, sr

Notes: 2 meetings (75 minutes)

Instructors: S. Ellenburg

**POLIT-212-01 - Politics - 2006-2007**

*(Spring) Modern Political Thought*

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement (Writing-intensive)

The political writings of Hobbes, Locke, Mill, Rousseau, Burke, Hegel, and Marx in the context of a sustained critique of liberal individualism (natural rights and utilitarianism) and an examination of radical egalitarian, conservative, and revolutionary alternatives. Recurring issues include law and liberty, the fragility of the good life, "human nature" arguments in politics, contrasting understandings or justifications of "private" property, and the claims by Hobbes, Rousseau, Hegel, and Marx, after having dismissed all predecessors as mistaken or superficial or both, to have refounded and then completed the enterprise of political theory.

Prerequisites: soph, jr, sr, or fy with permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: S. Ellenburg

*(Fall) African Political Systems*

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Offers a comparative study of selected political systems, emphasizing political conflict in southern Africa. Examines African participation in regional and universal international organizations.

Prerequisites: soph, jr, sr, or fy with permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: W. Stewart

*(Fall) Global Poverty and Property*

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course examines contending historical and contemporary explanations for the phenomenon of entrenched global poverty and critically assesses proposed policy solutions to ending absolute poverty in our time. The courses contrasts approaches which seek to build an "inclusive capitalism" through the extension of property rights at the grass-roots, and approaches that seek to restructure the larger global economy on issues such as debt relief and international development organizations.

(Spring) Seminar on Social Justice
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
May the discoverer of the cure for a fatal disease charge whatever she wants? May a professional golfer with a circulatory ailment use a golf cart? Is progressive taxation unjust or confiscatory? Must a prosperous and just society provide "free" public education and alleviate ill health, unemployment, and poverty? More generally, for diverse scarce goods and necessary burdens, does justice demand allocations on the basis of merit, need, lottery, seniority, equality, birth, desert, market competition, rotation, etc? The contrasting views of four contemporary theorists: John Rawls, Robert Nozick, Michael Walzer, and Iris Marion Young.
Prerequisites: jr, sr, 8 credits in department or permission of instructor

(Fall) The American Regime: Philosophical Foundations of the American Political Experience
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
The American Regime is organized around a number of questions that haunt the American political tradition. We will examine the American experience as a response to the profound political, social, economic and religious changes that took place between the 17th and 19th centuries. We will explore these anxieties by focusing on the everyday practices embodied in those roles (husband and wife, parent and child, subject of God) that are normally thought to be outside of political control. The readings will draw from classic texts of American political thought, American case law, and the emergent social movements of race, labor, and gender that have posed challenges to the American tradition.
Prerequisites: jr, sr and 8 credits in department or permission of instructor
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: J. Mink

(Spring) Decision Making - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
On decision making, and the pathologies of decision making, in American politics. When, and to what extent, can we say that a particular policy decision is the result of rational choice, institutional processes, pluralistic pressures, or other forces? When are individual or collective decisions likely to be marred by "groupthink," selective attention, or self-deception? To what extent, if at all, may collective decisions be considered rational or moral? When are challenges to authority, or to dominant opinion, likely to make a difference?
Prerequisites: Politics 104, 245, 246, or permission of instructor, 2 meetings (75 minutes)
Instructors: C. Pyle

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Writing-intensive)
A research seminar. Europeans of both west and east are intensifying their efforts to broaden and deepen European integration at the same time that there has been a startling revival of ethnic conflict and nationalist agendas. Voters in Scotland and Wales elect their own parliaments while civil wars rage in the Balkans; Central Europeans struggle to solidify democratic nation-states in a global environment where some claim the nation-state may soon be obsolete. How are these centrifugal and centripetal forces interrelated?
Prerequisites: 8 credits in politics, including Politics 106, 237, or permission of instructor

PSYCH-101-01: Introduction to Psychology: A Biological Perspective (Fall)  
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement  
How do we remember and why do we forget? Can we inherit schizophrenia? How does stress affect health? In what ways does learning affect our emotions? Why are we fearful of some situations and not others? This course addresses such questions from an interdisciplinary, biological perspective to understand what scientists have discovered about mind, brain, and behavior.  
Notes: 2 meetings (75 minutes)  
Instructors: K. Hollis

PSYCH-110-01: Introductory Seminars in Psychology: Brain/Mind (Fall)  
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement  
First-year seminar (Writing-intensive)  
What is the relationship between brain activity and how we think, feel, perceive, remember, and communicate? How does the brain contribute to our development as unique individuals? How does subjective experience shape the structure and activity of our brains? In approaching these questions we will bridge the perspectives of psychoanalysis and neuroscience. We will explore how the brain works; the role of conscious and unconscious processes in determining our behavior; and the effects of traumatic injury to the brain.  
Prerequisites: fy  
Notes: 2 meetings (75 minutes) plus fourth hour; 4 sophomores allowed
PSYCH-110-01 - Psychology - 2006-2007
(Spring) Introductory Seminars in Psychology: Language and the Mind
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
First-year seminar (Writing-intensive)
The use of symbolic language is one of the most complex achievements of the human mind, and yet is built on the most basic cognitive structures of perception and memory. Why do we always tend to hear what we want to hear? Do we need language to relate and connect to other people? Do the words we use really structure how we think? This course will explore the basics principles of language and cognitive function, and giving an introduction to cognitive and psycholinguistic research. We will also see how empirical evidence can be used to support or disprove scientific theories about what goes on in the unobservable confines of our minds.
Notes: 2 meetings (75 minutes)
Instructors: J. Trudeau
Expected enrollment: 16

PSYCH-110-02 - Psychology - 2006-2007

PSYCH-110-03 - Psychology - 2006-2007
(Spring) Introductory Seminars in Psychology: Families, Groups and Organizations: What Makes Them Tick
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
First-year seminar (Writing-intensive)
If psychology is the study of the mind, how do we understand what happens when individuals get together? Do we then simply have a collection of human minds and a laundry list of human behaviors and feelings? Or does something more complex happen when individuals gather together in groups? This course will introduce students to the fundamentals of group dynamics, family systems and organizational psychology. We will discuss, read and write about the psychology of larger systems and the class will serve also as a laboratory for understanding group dynamics.
Prerequisites: fy
Notes: 2 meetings (75 minutes)
Instructors: P. Romney
Expected enrollment: 16

PSYCH-200-01 - Psychology - 2006-2007
(Fall) Research Methods in Psychology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course provides an introduction to the skills necessary for becoming good producers and consumers of psychological research. Students learn to develop research questions, survey related literature, design rigorous and ethically sound studies, and collect, analyze, and interpret quantitative and qualitative data. Students build on their computer skills relevant for psychological research and learn to read and critique original empirical journal articles. The course culminates in an original, collaborative research project, a final paper, and oral presentation.
Prerequisites: a 100-level course in psychology AND Psychology 201
Notes: 2 meetings (75 minutes), 1 lab section (meets 2 times a week, 2 hours each); students must take statistics (Psychology 201) before enrolling in this course; students should sign up for the lecture course and one lab section

PSYCH-300-01 - Psychology - 2006-2007  
(Spring) Seminar in History and Systems of Psychology: Controversies in Psychology - *Not offered this year/term  
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement  
(Speaking- and writing-intensive)  
A seminar designed to give advanced psychology and neuroscience students a broad conceptual and historical overview of their discipline through an analysis of its enduring disputes. Each week we will read and analyze primary source materials (both historical and contemporary) on several sides of a major controversy, such as: Are there racial differences in intelligence? Is madness rooted in faulty biology? Do women's brains differ from men's? Is violence innate or learned? Each student will write a major research paper on an additional controversy not discussed in class. Heavy reading load; frequent written and oral assignments.  
Prerequisites: a 100-level course in Psychology, 200, 201, plus 8 additional credits in the department. Preference given to senior psychology and neuroscience majors  
Notes: 1 meeting (3 hours). During advising week students must submit a written list of psychology, philosophy, and sociology courses taken at MHC or elsewhere.  
Instructors: G. Hornstein

(Spring) Concepts of Abnormality  
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement  
This course is a study of how maladaptive patterns of thought and action are understood from a psychological viewpoint. Behaviors ranging from neurotic to psychotic are studied in terms of underlying character structure and origins in childhood experience. Competing psychoanalytic theories are brought to bear on these phenomena.  
Prerequisites: jr, sr (permission required for exceptions), two prior psychology courses, Psychology 230 recommended  
Notes: 2 meetings (75 minutes)  
Instructors: R. Shilkret

PSYCH-322-01 - Psychology - 2006-2007
(Fall) Psychoanalytic Psychology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This extensive examination of Freud's systematic psychology focuses on such phenomena as the effects of early experience, continuity and change in development, and similarities among and differences between individuals. Readings include selections from Sigmund Freud's earlier work and from the sweeping revisions of the 1920s. Criticisms and revisions of Freud are discussed. Throughout, ideas from contemporary psychoanalysis are compared and contrasted with those of Freud.
Prerequisites: Psychology 230, 220 recommended and permission of instructor
Notes: 2 meetings (75 minutes). Students must submit a letter of interest during advising week. Include a list of courses taken in psychology and other disciplines that have prepared you for this course.
Instructors: R. Shilkret
Expected enrollment: 12

(Spring) Laboratory in Personality Research: Qualitative Methods - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This laboratory course focuses on the study of individual lives and explores interviewing as a qualitative research strategy for the understanding of human experience. The course aims to provide a forum to discuss the study of individual lives within the social sciences, to consider interviewing techniques and qualitative methods of data analysis, and to provide students the opportunity to conduct a study of their own using this methodology.
Prerequisites: Psychology 200, 201, 220, and permission of instructor.
Notes: 1 meeting (3 hours)
Instructors: The department
Expected enrollment: 15

PSYCH-324-01 - Psychology - 2006-2007
(Spring) Laboratory in Personality Research: Quantitative Methods - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Personality-relevant constructs, such as attachment, adjustment, achievement motivation, communality, dominance, sociality, and others, are usually studied among adults using questionnaires and inventories. A single large class research project will be conducted, with all students participating in all phases of the research.
Prerequisites: Psychology 200 and 201, and either Psychology 210 or 230 and permission of instructor; an essay (due during advising week) explaining why you want to take the course is required
Notes: 2 meetings (75 minutes)
Instructors: R. Shilkret
Expected enrollment: 15

PSYCH-325-01 - Psychology - 2006-2007
(Spring) Laboratory in Psychological Assessment - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Historical development, theoretical bases, and critical evaluation of tests used to describe adult cognitive and personality functioning. Supervised practicum in test administration, scoring, and interpretation.
Prerequisites: Psychology 200 and 201, either Psychology 230 or 320, and permission of instructor
Notes: 1 meeting (3 hours); students MUST submit a statement and schedule an interview with the instructor during the advising week. There will be a schedule posted on the professor's door, and students should submit the statement a day before they schedule the appointment.
Instructors: R. Shilkret
Expected enrollment: 12

PSYCH-326-01 - Psychology - 2006-2007
(Spring) Laboratory in Personality and Abnormal Psychology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course is an introduction to research methods in abnormal and personality psychology. Students will work as a class to collect data using quantitative and qualitative methodologies. Students will be expected to collect survey and questionnaire based data as well as engage in some interviewing projects. We will consider the various stages of research including, literature review, design, ethical considerations, data collection, analysis (qualitative and quantitative), and consider the statistical inference or implications of our findings. The course focuses on the impact of stress and coping on the lives of individuals, identity, their relationships, and psychological adjustment.
Prerequisites: Psychology 200, 201; 220 or 210 or permission of instructor
Notes: Meets once a week for 2 hours plus a 4th hour
Instructors: A. Douglas
Expected enrollment: 12

PSYCH-328-01 - Psychology - 2006-2007
(Spring) Depression and Anxiety
This course will examine two of the common problems of mental health—depression and anxiety. Our approach will cover historical, social and psychological questions and controversies that have surrounded these problems. We will look at the way depression and anxiety have been defined, theorized about and treated over time and the issues that have arisen in treating them effectively—with or without medication. We will examine why some people are more vulnerable than others in becoming depressed or anxious. We will explore how depression and anxiety affect the larger social order and whether there are any cross cultural clues to the development and treatment of these illnesses.

Prerequisites: jr, sr, Psych-220
Notes: 1 meeting (2 hrs, 15 min)
Instructors: M. Fingrud
Expected enrollment: 20

PSYCH-329-01 - Psychology - 2006-2007
(Fall) Seminar in Personality and Abnormal Psychology: First-Person Narratives of Madness
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Writing-intensive)
Psychologists have typically conceptualized "mental illness" in terms of the symptoms and diagnoses proposed by psychiatrists in the Diagnostic and Statistical Manual of Mental Disorders (DSM). These categories, while perhaps useful for prescribing medication, do little to help us understand the subjective experiences that are considered "mad." In this seminar, we analyze accounts (historical and contemporary) written by people who have experienced extreme states, intense emotions, or unusual perceptions or beliefs, to understand how these "counter-narratives" offer new insights into psychological life.
Prerequisites: Psychology 100, jr and sr; Students with a background in literature particularly welcome. Preference given to senior psychology and neuroscience majors
Notes: 1 meeting (3 hours)
Instructors: G. Hornstein
Expected enrollment: 18

PSYCH-329-02 - Psychology - 2006-2007
(Fall) Seminar in Personality and Abnormal Psychology: Psychology of Trauma
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
What happens after a traumatic event? Why do some people develop psychological disorders and others do not? This course will explore the psychological theories and research on trauma and stress. Topics covered will include childhood abuse, domestic violence, combat violence, community violence, and interpersonal violence. The seminar will explore psychological dysfunction, disorders, as well as adaptation and coping following exposure to traumatic stress. In addition, the course will explore the concept of "cultural trauma."
Prerequisites: Psychology 100, jr or sr; Psychology 230 preferred or a course in abnormal psychology
Notes: 1 meeting (3 hours).
Instructors: A. Douglas
Expected enrollment: 13

PSYCH-330-01 - Psychology - 2006-2007
(Fall) Lab in Developmental Psychology: Science, Epistemology, and Parent-Child Conversations
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Preamble (for topics courses): This course is a study of research methods in developmental psychology, focusing on observational, survey, and interview techniques for studying young children, adolescents, and adults. It encourages the student to think about the basic issues of developmental psychology research: the conceptualization of problems, design of research, choice of methods to be used, and ethical questions that might arise. Students complete a major research project.

How do ideas about knowledge (folk epistemology) develop, and how do these ideas relate to the types of reasoning strategies people emphasize? Using existing transcript data, students will define and explore specific questions about how conversations with parents may help guide elementary school children's emerging ideas about knowledge and about the nature of science. Students will also help develop a questionnaire and collect data to explore variation in these ideas and possible relation to reasoning biases among college students.
Prerequisite: Psychology 200 and 201, and 230 or 241 and permission of instructor (students must meet with the instructor during advising week to get permission to enroll)
Notes: 2 meetings (2 hours)
Instructors: A. Valle
Expected enrollment: 12

PSYCH-330-01 - Psychology - 2006-2007
(Spring) Lab in Developmental Psychology: Adolescent Development in Community Settings

Prerequisites: Psychology 200, 201, 230 and permission of instructor.

Notes: 1 meeting (2 hours) plus a 4th hour; During advising week students must submit a statement and meet with the professor.

Instructors: B. Packard

Expected enrollment: 12

PSYCH-331-01 - Psychology - 2006-2007
(Fall) Lab in Early Social and Personality Development
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

In the role of a participant-observer, each student studies intensively the social and personality development of the children in one classroom at the Gorse Child Study Center. Students learn how to articulate developmental changes and individual differences by analyzing detailed observations.

Topics include social cognition, peer relationships, social skills, concepts of friendship, emotional development, identity formation, self-esteem, and the social and cultural context of development.

Prerequisites: Psychology 200, 201, and 230 or permission of instructor

Notes: 1 meeting (2 hours), 2 labs (3 hours each) at Gorse Child Study Center

Instructors: P. Ramsey

Expected enrollment: 18

PSYCH-337-01 - Psychology - 2006-2007
(Fall) Seminar in Educational Psychology: Motivation - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Community-based learning course; Speaking-intensive)

What influences our desire to learn, to participate in certain activities, or to become particular kinds of people? We will examine the topic of "motivation" using several perspectives, across age levels and in various settings. Drawing from a variety of resources, including autobiographies, research studies, and videos, we will target our own motivation through reflection and action and the motivation of others through active coaching and mentoring in a community-based setting.

Prerequisites: Psychology 233 and permission of instructor

Notes: 1 meeting (3 hours); requires a field component in a community-based site (at least a 2-hour block per week); A statement of interest must be submitted during the week of advising - please pick up an information sheet in the department office.

Instructors: B. Packard

Expected enrollment: 15

PSYCH-339-01 - Psychology - 2006-2007
(Fall) Seminar in Developmental Psychology: Culture and Human Development
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This seminar examines theory and research on the cultural basis of human development and on cultural variations and similarities in development in different historical and current world communities. The approach is interdisciplinary, drawing on psychology, anthropology, linguistics, sociology, and history, to examine varying and universal goals of development and participation of children and their families in cultural practices.

Prerequisites: jr, sr, Psychology 230 or permission of instructor

Notes: 1 meeting (3 hours)

Instructors: A. Valle

Expected enrollment: 12

PSYCH-339-01 - Psychology - 2006-2007
(Spring) Seminar in Developmental Psychology: First Love: Attachment Theory and Research - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
The relationship with the infant's primary caretaker, usually the mother, develops in a complex way during the first year after birth. We will study what is now known about this relationship, how we know about its importance to the infant, and the variation in types of such relationships early in life. The importance of this first love for later development, in childhood, adolescence, and adult life will be considered. Methods of research will be emphasized and students will be expected to give class presentations.

Prerequisites: jr, sr, Psychology 200, 230 and permission of instructor; written statement to Professor Shilkret during advising week required

Notes: 1 meeting (3 hours)
Instructors: R. Shilkret
Expected enrollment: 12

PSYCH-340-01 - Psychology - 2006-2007
(Fall) Laboratory in Perception and Cognition
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
How we perceive and understand the written word is a critical aspect of communication and a major issue in modern psycholinguistics. In this lab we will apply the principles of psychological research to the question of how people read. Two of the dominant approaches to reading will be explored in depth: the dual-route model and the triangle model. The class will form small groups to design and implement original psycholinguistic experiments with the aim of testing the hypotheses of these models. We will be particularly interested in how the meaning of a word affects how it is read.
Prerequisites: a 100-level course in psychology and 201, 200
Notes: 1 meeting (3 hours)
Instructors: The department
Expected enrollment: 12

PSYCH-349-01 - Psychology - 2006-2007
(Spring) Seminar in Perception and Cognition: Talk to Me: Psycholinguistics
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Writing-intensive)
How do we communicate with other people? This class will explore the hows and whys of linguistic communication. Does language really separate us from animals? Is a picture really worth 1000 words? We will look for answers to these types of questions and explore various psycholinguistic topics including speech perception and production, reading, language deficits, language and the brain, animal language, bilingualism, and non-spoken languages. Class presentations will be required.
Prerequisites: a 100-level course in psychology, Psychology 200 and 201, and permission of instructor
Notes: 1 meeting (3 hours).
Instructors: J. Trudeau
Expected enrollment: 16

PSYCH-350-01 - Psychology - 2006-2007
(Spring) Laboratory in Behavioral Neuroscience
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This laboratory provides intensive study and discussion of specific topics in behavioral neuroscience, including psychopharmacology, neuroanatomy, electronics, and surgery. Examination of methods and experimentation in the laboratory.
Prerequisites: Psychology 200, 250, and permission of instructor; pre-enrolled seniors and majors have priority. Students must meet with the instructor during advising week to get permission to enter the course.
Notes: 2 meetings (2 hours)
Instructors: W. Millard
Expected enrollment: 12

PSYCH-351-01 - Psychology - 2006-2007
(Spring) Laboratory in Animal Behavior - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Several projects within such areas as feeding, aggression, reproduction, and learning are researched by students working in small groups. The course stresses the acquisition of research skills required for naturalistic and laboratory observation in the study of animal behavior.
Prerequisites: Psychology 200. Preference given to senior psychology and neuroscience majors.
Notes: 1 meeting (2 hours, 15 minutes) plus 4th hour. During advising week students must submit a written list of psychology and biology courses taken at MHC or elsewhere, along with their name and year of graduation.
Instructors: K. Hollis
Expected enrollment: 12

PSYCH-352-01 - Psychology - 2006-2007
(Spring) Laboratory in Sensory Psychology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Mount Holyoke College Course Information Archive 2000-2016
This laboratory course offers a detailed examination of selected topics in vision research, emphasizing the interrelations of anatomical, physiological, and behavioral data. Laboratory demonstrations and experiments introduce behavioral methods of study of sensory systems. Principles of function generally applicable to all sensory systems are discussed.

Prerequisites: Psychology 200, 240, or 250 and permission of instructor. Students must meet with the instructor during advising week to get permission to enter the course.

Notes: 2 meetings (50 minutes) and 1 lab (3 hours)

Instructors: J. Cohen

Expected enrollment: 10

PSYCH-359-01 - Psychology - 2006-2007
(Seminar: Biological Bases of Behavior: How Experience and Brain Plasticity Shape Cognitive and Social Development - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

What is the function of the brain's visual areas in people who are born blind? How does the brain change when we learn a new skill? How does early auditory deprivation affect the development of language? What changes occur in the brains of people who have a limb amputated and experience a phantom limb? Can knowledge of brain plasticity lead to treatments for cognitive disorders such as dyslexia or ameliorate the effects of traumatic stress during early childhood? Are there critical periods for normal cognitive and social-emotional development? This seminar will consider these and other questions as we explore studies of behavioral and brain plasticity and their potential applications.

Prerequisites: Psychology 240 or 250 or Biological Sciences 333 or permission of instructor

Notes: 1 meeting (3 hours) plus fourth hour

Instructors: J. Cohen

Expected enrollment: 12

PSYCH-359-01 - Psychology - 2006-2007
(Spring) Seminar: Biological Bases of Behavior: Of Madness and Molecules: Seminar in Neuropsychopharmacology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Charpentier, a French scientist of the 1940s, unwittingly discovered a chemical that was to alter dramatically our understanding of madness. The chemical, chlorpromazine, has been widely used for the treatment of psychosis. Of interest is neuropsychopharmacology—the science and the technology. The principles of pharmacology are discussed and precede the examination of applications of the technology to psychopathology (for example, schizophrenia, depression, anxiety, and violent behavior).

Prerequisites: Psychology 250 or Biological Sciences 333. Pre-enrolled seniors and Psychology and Neuroscience and Behavior majors have priority

Notes: 1 meeting (3 hours)

Instructors: W. Millard

Expected enrollment: 15

PSYCH-395-01 - Psychology - 2006-2007
(Fall) Independent Study
Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement.

Students who register for independent research as honors work are encouraged to participate in Psychology 411f-412s.

Prerequisites: jr, sr, permission of instructor

PSYCH-411-01 - Psychology - 2006-2007
(Fall) Seminar in Psychological Research
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
(Speaking- and writing-intensive)

This seminar is designed to promote communication of research activities among students in the department and to encourage students to share knowledge and resources in the solution of problems encountered in all stages of research. Graduate students and students engaged in independent research (Psychology/Neuroscience and Behavior 395) are encouraged to participate.

Notes: 1 meeting (50 minutes)

Instructors: P. Ramsey

Psychology and Education

EDUC-205-01 - Psychology and Education - 2006-2007
(Fall) Whiteness, Racism, and Inequality in Schools and Society
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Community-based learning course; Writing-intensive)
What is race? Who decides? What does it mean to be white? How is the ideology of whiteness maintained? We will explore these and related questions as we examine the ways in which whiteness and racism are enacted in schools, have historically interfered with the educational attainment of children of color, and have led to the mis-education of white children. Readings and assignments will examine dynamics of dominance and how the construction of racial identities influences the lives of teachers and students in classrooms. We will also consider theories of multicultural education and antiracist pedagogies as strategies for addressing racial and other inequities in schools.
Prerequisites: sophomore, junior, senior or permission of instructor
Notes: 2 meetings (75 minutes) plus prepracticum
Instructors: S. Lawrence

(Spring) Foundations of Multicultural Education - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Community-based learning course)
This course offers a study of the historical, theoretical, and philosophical perspectives that are the underpinnings of multiculturalism in education. Through selected readings, class discussion, and oral presentations, the course will examine the epistemological elements of race, class, culture, and gender in the classroom. Requires a prepracticum in a school or community-based setting.
Prerequisites: A 100 level course in psychology
Notes: 2 meetings (75 minutes) and prepracticum (3 hours per week)

(Spring) Differences in Learning - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Psychology 234s)
The course will survey the etiology, diagnosis, and remediation of a variety of learning differences and special needs. Conditions such as dyslexia, attention deficit disorder, and autism will be examined. It will provide an introduction to interpreting test results, systematic behavioral observations, evaluating clinical information, diagnostic hypothesizing, and planning individualized educational programs. The principles of inclusion and their implications for children will be explored. Requires a field component.
Prerequisites: A 100 level course in psychology, 230 or 236, and 233; prerequisites will be strictly enforced
Notes: 1 meeting (3 hours) plus field placement; priority will be given to students applying to Mount Holyoke College's teacher licensure programs
Instructors: L. Carlisle

EDUC-256-01 - Psychology and Education - 2006-2007
(Fall) Making Meaning for Operations/Reasoning Algebraically about Operations
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course will draw on two modules of the Developing Mathematical Ideas (DMI) series. DMI is a curriculum designed to help think through the major ideas of K-7 mathematics and examine how children develop those ideas. The first four sessions will parallel the first four sessions of Making Meaning for Operations. The remaining nine sessions will be based on the Reasoning Algebraically about Operations module. This module focuses on how children's study of operations leads into articulation of generalizations in the number system and justification of such generalizations. Participants will explore and understand how such work in the early grades relates to algebra studied in later grades.
Prerequisites: permission of instructor
Instructors: J. Bodner Lester
Expected enrollment: 12

EDUC-300-01 - Psychology and Education - 2006-2007
(Fall) The Process of Teaching and Learning: Developing Literacy in Early Childhood and Elementary Schools
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Through a balanced and integrated approach students will learn to develop literacy in early childhood/elementary schools. Class members will learn about emergent literacy, diagnosing language needs, integrating phonics skills in a literature-based program, the teaching of process writing, children's fiction and nonfiction literature, and the use of portfolios for assessment. Course required for spring semester practicum students. Course evaluation is based on written and oral work done individually and in groups. Requires a prepracticum.
Prerequisites: limited to students accepted to the practicum year program
Notes: 1 meeting (3 hours) and prepracticum (4 hours per week)
Instructors: L. Carlisle
EDUC-322-01 - Psychology and Education - 2006-2007
(Spring) Practicum Seminar on Teaching and Learning: Early Childhood and Elementary Education
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This weekly seminar provides students with opportunities to examine curriculum development models, develop an integrated curriculum unit utilizing state and national content area standards, review researched based models of classroom management, and engage in dialogue with practicing teachers regarding numerous aspects of teaching and student learning. Additional topics covered include the arts in education, physical education, legal obligations of teachers, and home-school communication. As is the case in all pre-licensure programs, there is continued emphasis on addressing the needs of students with disabilities and English Language Learners.
Prerequisites: Limited to students accepted into the practicum year program
Notes: 1 meeting (2 hours)
Instructors: L. Carlisle

EDUC-323-01 - Psychology and Education - 2006-2007
(Spring) Student Teaching in Early Childhood and Elementary Schools
Credits/PE Units: 10; Requirements met: Does not meet a distribution requirement.
Students participate in full-time student teaching in early childhood and elementary classrooms for 12 weeks. During this semester-long field-based placement, students hone classroom management skills, implement an extended integrated curriculum unit, deliver lessons in all content areas, and develop a wide range of assessment skills. The practicum culminates in two weeks of Lead Teaching, during which the student is responsible for managing all aspects of the classroom program. Students work with classroom teachers and college supervisors to address Professional Teaching Standards as required by the Commonwealth of Massachusetts' Pre-service Performance Assessment Program.
Notes: 5 days a week for 12 weeks; full-time student teaching in school site (includes Mount Holyoke College's spring break); limited to students accepted to the practicum year program
Instructors: L. Carlisle

EDUC-324-01 - Psychology and Education - 2006-2007
(Fall) Observing and Assisting in Early Childhood and Elementary Settings
Credits/PE Units: 1-2; Requirements met: Does not meet a distribution requirement.
Discussions and fieldwork provide the student with an opportunity to understand the classroom as a learning community. The tutorial includes several meetings focusing on the student's participant observations and assigned readings. Fieldwork includes a minimum of 20 hours on site, individually scheduled in early childhood (pre K-2) or elementary (1-6) settings. Assessment includes in-progress reports and a final project related to fieldwork.
Course graded on a credit/no credit basis.
Prerequisites: permission of instructor
Notes: 1 credit (20 hours of prepracticum); 2 credits (40 hours or more of prepracticum)
Instructors: L. Carlisle

EDUC-324-01 - Psychology and Education - 2006-2007
(January) Observing and Assisting in Early Childhood and Elementary Settings
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Students are expected to complete supervised fieldwork full-time every day during the January Term in a school site or other educational setting where daily supervised interaction with children is available. January Term placements can be located either within or outside the Five College area. This course is required of all students doing teacher licensure at the early childhood or elementary levels and must be taken in the junior or senior year.
Graded on a credit/no credit basis.
Prerequisites: A 100-level psychology course and one of the following: Psychology 233, 234, 230, Education 205 or 220 and permission of instructor; 3 mandatory meetings (1 hour) and prepracticum
Notes: Check the events calendar on-line and look for posters in Reese for specific details and meeting dates.

(Fall) The Process of Teaching and Learning: Developing Math/Science/Technology Instruction and Curriculum
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Students will learn about inquiry-based science/math curriculum and use of technology in the classroom. They will construct more extensive understandings of science/math instruction by developing lessons that implement the Massachusetts Frameworks. At the Hitchcock Center and in classes on campus, emphasis will be on learning diverse management and instructional practices, such as the use of manipulatives, problem solving, cooperative learning, and project-based learning. Students will become more adept at developing effective approaches to using assessment to guide instruction. Early childhood candidates will visit Gorse Child Study Center to learn about resources for pre-K students.
Notes: 1 meeting (3 hours); limited to students accepted in the practicum year program
Instructors: L. Carlisle

EDUC-330-01 - Psychology and Education - 2006-2007
(Fall) The Process of Teaching and Learning in Secondary and Middle Schools
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course is intended to help prepare prospective secondary and middle school teachers for effective classroom instruction. The philosophical bases and current research behind classroom practices are also examined. Specific course activities focus on teaching in multicultural ways, establishing the classroom climate, choosing instructional approaches, designing curricula, assessing and attending to the needs of learners, evaluating student performance, and providing for classroom community leadership. Requires a prepracticum.
Prerequisites: limited to students accepted to the practicum year program
Notes: 1 meeting (3 hours) and prepracticum (3 hours per week)
Instructors: S. Lawrence

EDUC-331-01 - Psychology and Education - 2006-2007
(Spring) Student Teaching in Secondary and Middle Schools
Credits/PE Units: 10; Requirements met: Does not meet a distribution requirement.
Students undertake full-time supervised student teaching in secondary or middle school subjects, the visual arts, or music classrooms. Group seminars and individual conferences are held to discuss issues of classroom practice. Evaluation of performance is determined by on-site visits and by written assignments. This course is graded on a credit/no credit basis.
Prerequisites: sr, Education 330 and 332j, and permission of instructor
Notes: 5 days a week for 12 weeks; full-time student teaching in school sites (includes Mount Holyoke College's spring break) plus 1 meeting (1 1/2 hours) to be arranged; students must apply for and be accepted into the practicum semester a year prior to the practicum
Instructors: S. Lawrence

(Spring) Introduction to Judaism - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Jewish Studies 1046)
Judaism is a 3,500-year-old tradition that has developed over time as Jewish communities all over the world creatively interacted with the different cultural and historical milieus in which they lived. This course explores the ways in which Judaism has sought to transform ordinary life into sacred life. What are the ways in which Judaism conceives of God, and what is the meaning of life? What roles do study, prayer, ethics, sex, marriage, family, rituals of the life cycle, and community play in Judaism? These and other questions will be taken up through study of diverse types of religious literature and historical evidence.

(Spring) Issues in Islamic History: Classical Islamic Civilization - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
Preamble (for topics courses): This introductory course provides a broad, chronologically structured overview of Islamic history, focusing on major issues that have been of religious significance to Muslims in various eras. Using case studies, ranging from episodes in the early Islamic conquests to the growth of Islam in urban America, we will examine enduring themes and contextual variations in the history of Islam.
This course examines the development of Islamic civilization from the time of the Prophet Muhammad to the sixteenth century. Particular attention will be paid to the political structures of the caliphates, the process of conquest and conversion, and interaction with non-Muslim cultures. Literature, art, architecture, and philosophical and scientific works of classical Islamic civilization will be used as primary sources for this course.

*(Spring)* Jewish Spiritual Autobiographies  
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement  
(Jewish Studies 215)  
Along with such genres as letters, ethical wills, travel accounts, and other personal communications, spiritual autobiographies and diaries often reveal what people actually thought and felt about matters important to them. These sources provide insight into religion as lived experience. This course studies autobiographical accounts of Jewish religious figures from the medieval period to the contemporary. We include narratives by both women and men, philosophers, mystics, messianic pretenders, travelers, authors of Holocaust memoirs, and other contemporary Jews. Taken together, such accounts bring to life the diversity of spiritual quests in which Jews have engaged.

(Fall) Introduction to the Philosophy of Religion - *Not offered this year/term
This course begins its survey of the discipline of the philosophy of religion with the work of Augustine. We then proceed to an examination of the classical theistic arguments for knowledge of God's existence (those of Anselm, Aquinas, and Maimonides) that dominated Scholastic thought and consider the criticisms of these approaches by Enlightenment philosophers such as Kant. We trace the rise of experience as the central category of pietism and romanticism in the texts of Schleiermacher and Coleridge and in the poetry of Novalis. Finally, we focus on the pragmatic tradition in American philosophy of religion, especially in the work of William James, Josiah Royce, and Cornel West.

**(Fall) Buddhism**
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Asian Studies 263f)
Some scholars have argued that there is no such thing as "Buddhism" in the singular, but only "Buddhisms" in the plural. This course introduces students to the historically and culturally diverse expressions of Buddhism. We will ask ourselves what Buddhism has meant to different people in different times and places, with particular attention to changing conceptions of belief and practice. Among the traditions we will study are Theravada, Zen, Pure Land, and Tantria.

(Spring) Sex and the Early Church
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement (GENDST-333)
This course examines the various ways first-through fifth-century Christians addressed questions regarding human sexuality. We will concentrate on the rise of sexual asceticism and pay particular attention to the relationship between sexuality and issues of gender, culture, power, and resistance. Primary readings will include letters, narrative accounts of female and male ascetics, monastic rules, and "heretical" scriptures. These will be supplemented by modern scholarship in early Christian studies and the history of sexuality.
Prerequisites: Previous course in religion or gender studies
Notes: 2 meetings (75 minutes)

(Fall) Sufism: The Mystic Path in Islam - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
Exploration of the mystical tradition in Islam known as Sufism, from its origins in medieval Iraq to its role in contemporary Islamic societies. This course focuses on how the Sufi pursuit of unity with, or annihilation in, God relates to the core monotheistic beliefs of Islam. Sufi theories and practices are studied through primary source materials. Special attention will be paid to issues of orthodoxy, heresy, and antisocial behavior in the history of Sufism.

(Fall) Forging Early Christian Identities - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This seminar explores how first- through third-century Christians struggled to forge a coherent self-identity. We look at early Christian letters to the Roman emperor, anti-Jewish tracts, New Testament writings, accounts of Christian martyrs, depictions of Satan and his minions, descriptions of early heresies, and an ancient exorcism manual. Our investigations will employ several critical models from anthropology, sociology, and cultural studies to explore the dynamics of how the ancient church defined who was and was not Christian.
Prerequisites: Previous course in religion
Notes: 2 meetings (75 minutes)
Expected enrollment: 15

RELIG-319-01 - Religion - 2006-2007
(Spring) Women and Early Christianity - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This seminar investigates the role of women in the New Testament and in early Christian communities. We will explore controversies concerning women's leadership in the early church as well as the role of gender and gender imagery in the development of early Christian thought and practice. Our seminar will look at ancient marriage guides, misogynistic satires, New Testament gospels, Pauline letters, accounts of female martyrs, early church manuals, Christian art, theological tracts, and accounts of female saints. We also will examine how recent work in women's studies and queer theory can help us better understand the power dynamics of early Christianity.
Prerequisites: Religion 204, 206. or 315

(Full) Topics in Contemporary Theology: Feminist Theologies - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Women's Studies 333f (03))

Mary Daly, Elisabeth Schussler Fiorenza, Phyllis Trible, and Naomi Goldenberg, among others, have argued that traditional Jewish and Christian theological systems have overlooked the needs, concerns, histories, and contributions of women. Their challenges range from the historical modification of a presumably unbiased religious system to the outright rejection of a so-called patriarchal establishment. Whatever their approach, feminist theologies offer diverse and incisive tools for understanding how a theological system operates, how transitory cultural assumptions become embedded in ongoing doctrines, and how apparently minor adjustments can have significant ripple effects.

(Spring) Topics in Contemporary Theology: The Women Who Shaped the Mind of Frederick Douglass

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(GENDST 333)

Eight women - Harriet Bailey, Betsey Bailey, Sophia Auld, Anna Murray, Julia Crofts-Griffiths, Annie Douglass, Ottilia Assing, and Helen Pitts - occupied crucial roles in the formation of Frederick Douglass's mind. In this seminar we will read closely Douglass's three autobiographies and related primary sources in order to discern the theological significance these women had for him. Students also will be introduced to contemporary readings in theological hermeneutics in order to consider its implications for reading and interpreting autobiography.

(Spring) Topics in Contemporary Theology: Theology Meets the Matrix - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Speaking- and writing-intensive)

Nineteenth-century theologians Schleiermacher, Hegel, and Kierkegaard believed that speculation, necessity, and mechanistic perfection were dangerous ideas that had conquered their world. The way to break free from these powers was to reconsider the meaning of religion. As we enter the twenty-first century, we have come full circle. Technology (The Matrix) threatens our humanity and genuine religious sensibility by "blinding" us from truth. We are slaves to a force larger than ourselves, a reality created by machines. This course seeks to show how The Matrix is a contemporary text for understanding the similar (and dissimilar) forces that shaped the nineteenth and twenty-first centuries.

(Spring) Seminar in American Religious History: The Shakers - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Gender Studies 333-02)
Preamble (for topics courses): This course offers advanced students an opportunity to investigate with some sophistication a problem that requires careful attention to research methods, to critical literature, and to writing. Seminar topics include people, periods, or problems that have a particular bearing on religion in America.

This course will examine the historical and cultural creation of the Shaker society, the religious vision of an alternative society whose birth and development paralleled that of the new American nation. By contrast and by imitation, the separate Shaker route thus offers an intriguing critique of American society and its values and an unusual laboratory for examining a religious community based on a dual godhead.

(Spring) Seminar in American Religious History: Creation vs. Evolution - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Preamble (for topics courses): This course offers advanced students an opportunity to investigate with some sophistication a problem that requires careful attention to research methods, to critical literature, and to writing. Seminar topics include people, periods, or problems that have a particular bearing on religion in America.

A distinctive mark of Western thought in the nineteenth century was its fascination with "the origin of things." The origin of the species and the origin of the universe are two prime examples. These two concerns, in particular, had a decisive impact on how religion and science came to be understood and expressed in the twentieth century. As a consequence of the ensuing public debate, this question of "origins" presented a direct challenge to the received theory of creation, the meaning of miracles, as well as the nature of biblical inspiration.

(Fall) Written on the Body: Body Images and Practices in Religious Traditions - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course examines body images and practices in diverse religious traditions around the world. Working with different methodological and theoretical perspectives, we will ask the following questions: What are bodies? How do body images perpetuate or challenge religious and social norms? What roles do bodies play in religious experience? We will generate answers to these questions by investigating a wide range of religious phenomena including healing rituals, relics, saints, fasting, asceticism, and modest dress.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Language requirement or Humanities I-A requirement (SPAN-361, ITAL-361, FREN-321, FLMST-370)
Preamble (for topics courses): This interdisciplinary seminar will focus on a comparative study of Romance languages or literatures. Topics will vary from semester to semester. Seminar discussions will be conducted in English, but students are expected to read works in at least one original language. Papers will be written in the Romance language of the student's choice.
In this seminar, we will study the cross-cultural influences between Italian neo-realism, the French nouvelle vague, and the New Latin American Cinemas. Both the Italian and the French movements represent models and counterparts for those Latin American filmmakers of the 1950s and 60s who sought to redress the dominance of the realist American model in Latin America and the domination of the markets by the products of Hollywood. The New Latin American Cinemas, in turn, paved the way toward the emergence of Third Cinema. We will study films, as well as cinematic theory, from Italy, France, the Soviet Union, Japan, Cuba, Brasil, Argentina, and Mexico.
Prerequisites: Permission of instructor
Notes: 1 meeting (2 hours, 50 minutes). Papers will be written in English or the Romance language of the student's choice. Students wishing to obtain 300-level credit in Spanish, Italian, or French must read texts and write papers in the Romance language for which they wish to receive advanced credit.

RES-117-01 - Russian and Eurasian Studies - 2006-2007
(January) Russian and Georgian Avant-Garde Art
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Community-based learning course)
Preamble (for topics courses): Who were Kandinsky and Chagall, Kakabadze and Malevich, Gabo and Pevzner, Lissitsky, etc? How did it happen that Russia and Georgia gave so many leaders to world avant-garde art but the Russian revolution erased their names from the memories of generations in their own countries? Where is their impact more relevant - inside or outside of their homelands? Why are their lives so important and what do they say to the young people around the world today? The continued stories.
This course will provide students with information on Russian and Georgian avant-garde artists, their lives and work. Art movements like Rayonnism, Cubo-Futurism, Suprematism, biomorphic abstraction, Constructivism, Concrete Art, etc. will be presented. The works of artists will be analysed and their contribution to the new vision in art estimated.

(Taught in English)
Explores the past and present of the diverse peoples and cultures inhabiting the territory once dominated by the Russian Empire and the Soviet Union. How has this region been imagined and mapped? How useful are conventional definitions of the boundary between "Europe" and "Asia"? What is meant by "Eastern Europe," "Central Europe," and "Eurasia"? Topics to be considered will include the struggle for a usable past and the emergence of national identity; techniques of imperial rule and colonial domination; formation and dissemination of knowledge about Eurasia; cultural traditions of the region. Designed to help students navigate the world of post-Soviet and post-socialist Eurasia.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive; Taught in English)
Leo Tolstoy's Anna Karenina is an action-packed drama about love and passion, personal freedom and societal expectations, and the costs of living. We will read the text slowly, with attention to the ambiguities that defeat a clear or simple interpretation of the novel's message. We will screen several films of Anna Karenina and assess interpretations of the novel.

RES-210-01 - Russian and Eurasian Studies - 2006-2007
(Fall) Great Books: The Literature of Nineteenth-Century Russia
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
In no other culture has literature occupied the central role it enjoyed in nineteenth-century Russia. Political, social, and historical constraints propelled Russian writers into the roles of witness, prophet, and sage. Yet, far from being limited to the vast, dark "Big Question" novels of legend, Russian literature offers much humor, lyricism, and fantasy. We will focus on the Russian novel as a reaction to western European forms of narrative and consider the recurring pattern of the strong heroine and the weak hero. Authors will include: Pushkin, Gogol, Turgenev, Tolstoy, Dostoevsky, and Chekhov.

RES-213-01 - Russian and Eurasian Studies - 2006-2007
(Spring) Tolstoy's: War and Peace
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
To explain the fundamental conflict in Tolstoy's art, Sir Isaiah Berlin advanced the now famous formula that Tolstoy was a fox (pluralist) struggling to be a hedgehog (monist). Indeed, throughout his life and in his art, Tolstoy sought to shape experience into a single and all-embracing philosophical principle, but he was never able to suppress his extravagant intuition that existence, being contradictory, fragmentary, and ultimately incoherent, defied attempts at codification. We will read War and Peace in an attempt to understand how that irresolvable conflict fuels Tolstoy's intellectual pursuits and informs his theories on art.

(Fall) Russia and the West
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; Politics 264f)
Taught in English; (same as Politics 264f). Since its creation at the beginning of the twentieth century, the Soviet Union dominated the minds of Western foreign policymakers. None of the West's policies in the Middle East, the Third World, Europe, or China after World War II can be understood without an understanding of Soviet foreign policy. We will examine the development of Soviet foreign policy since 1917 and the role played by Russia and the former Soviet republics in the far more complex "New World Order" we live in today. How have the expansion of the European Union, the tragedy of 9/11, and the war against terrorism influenced Russia's relations with the West?

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; Politics 242s)
Following the collapse of the USSR and the Gulf War, Central Asia and the Caucasus became new centers of geopolitical rivalry. The new states are a source of energy (oil and gas) for Western powers and a vital transit corridor between Eastern Europe and China. While a new "Great Game" is being fought between Western, Far Eastern, and Middle Eastern powers for control over energy pipelines, the region is threatened by environmental catastrophe and water shortages. Is the new oil industry a source of prosperity or an instrument for exploitation, corruption, and instability? How important are the new states to the West's strategic energy interests?

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Hist-260-03)
The Bolshevik Revolution of 1917 marked the coming of totalitarianism to Russia. Led first by Lenin and then by Stalin, the country went through the most brutal civil war, purges, World War II, and the first stages of cold war. This period also saw immense social change and sweeping economic transformation. What were the causes of totalitarianism in Russia? How did the regime function? What were the major landmarks of Russian history in the period 1917-1953?

(Spring) European Studies Seminar: Foreigners Within, Foreigners Without: Europe and Its New Neighbors
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(EURST-316)
The enlargement of the European Union (EU) to Central and Eastern European countries has generated new neighbors to the east and south - the Western Newly Independent States (WNIS) of Russia, Belarus, Moldova, and Ukraine, and Southern Mediterranean countries (SMCs) Egypt, Libya, and Tunisia. Europe's new neighbors make up 410 million inhabitants, but their GDP capita is barely one tenth of the European Union's. This has brought problems for the EU, including migration pressures, human trafficking, and refugees. How is the EU dealing with these issues and how will relations with the new neighbors affect the domestic and foreign policies of the EU?
Prerequisites: jr, sr; at least one course at the 200 or 300 level relevant to European studies or permission of the instructor.

(Fall) Revolutions
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; Politics 350f)
Revolutions have a rich and bloody history on the European continent. In the twentieth century, there were frequent revolutionary upheavals, particularly in Russia and Eastern Europe. We will study two revolutionary periods: Russia in 1917 and the USSR in 1991. These revolutionary events present great contrasts, yet at the same time clarify the nature of revolutions and why they occur. Do they bring the expected fundamental and accelerated change people hope for? Our focus will be on the contrasts and parallels between Russia's early twentieth-century socialist revolution and late twentieth-century capitalist revolution. What was (and is) their impact on European history and thought?

(Fall) *Issues in Sociology: Sociology of the Family*

Preamble (for topics courses): This course will focus on significant issues in the field of sociology not covered in other courses in the sociology curriculum. Topics will vary.

Throughout history, the family has been the social institution that has stood at the very center of society. The principle aim of this course is to introduce the distinctive ways in which sociologists analyze the family. While most of us can understand the family in terms of personal experiences, this course will require you to view marriage and family as social constructions. We will look at the family as a social institution that is subject to change across time and place. We will apply this sociological perspective to an analysis of social changes affecting courtship, mate selection, sexual behavior, parenthood, marital stability, and divorce through the life cycle.

(Spring) *Issues in Sociology: Racial and Ethnic Relations*

Preamble (for topics courses): This course will focus on significant issues in the field of sociology not covered in other courses in the sociology curriculum. Topics will vary.
In this course students will be introduced to the various sociological perspectives and theoretical frameworks used to understand racial and ethnic relations in the United States. Racial and ethnic identities remain an important aspect of how people view themselves and others. In this course, we will discuss the dynamics of individual racial and ethnic groups including African Americans, Latino Americans, Native Americans, Asian Americans, and White Americans. We will also examine what the concepts of race and ethnicity mean and how they affect various aspects of American society.

(January) Sociology of Environmental Disasters

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

Preamble (for topics courses): This course explores the sociological study of environmental disasters, or the ways in which social factors create and/or lead to specific consequences from these events. The ways in which the social and ecological issues intertwine is examined through readings on specific historical and contemporary cases.

Environmental sociology focuses on the ways environmental risks and benefits are not equally distributed across the population. The study of disasters have different consequences for people of different racial/ethnic groups or social classes. This area also explores the ways damage caused by natural events is often magnified, if not wholly created, by the altering of the natural landscape. This course examines these interrelated issues by focusing on specific past events Erickson's study of the Buffalo Creek flood, to more contemporary events such as Hurricane Katrina in 2005.

(Spring) Social Inequality - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course is a critical survey of theoretical and empirical research on social inequality, stratification, and mobility. The central focus is class, race, and gender inequalities as they have changed during the post-World War II period in the United States (although we will look briefly at stratification regimes in other cultures and time periods). The concepts and methods of social stratification have wide application in sociology, economics, public policy, and administration contexts. As the course progresses, we will explore some of these applications as we wrestle with several policy issues currently confronting U.S. society.

SOCI-316-03 - Sociology - 2006-2007
(Spring) Special Topics in Sociology: Satirical Social Commentary
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog. etc. requirement

Preamble (for topics courses): This course focuses on significant problems in the field of sociology with group meetings and reports.

We will read closely, paragraph by paragraph, Samuel Butler's late 19th Century (1872) satirical novel Erewhon; and to unpack his style, technique, and methods for attacking the ills of Victorian Society while suggesting new ways to ameliorate persistent social problems. There are 29 chapters in the Erewhon and each student will be responsible to unpack a chapter each week and present a written paper as well as an oral report. The final project will require students to rewrite a chapter using Butler's satirical techniques

This course will equip students of Spanish with a variety of skills that prepare them for upper-division courses. Specific areas of study will include introduction to literary genres and movements; practice in critical reading and writing; study of figures of speech, rhetoric, and style; presentation of oral reports; use of library resources. In addition, students acquire basic knowledge of the geography, history, and culture of the Hispanic world.

Prerequisites: Spanish 201, 209, or 210 or permission of instructor. For new students, a placement score above 451.

Notes: 2 meetings (75 minutes)

Instructors: R. de Swanson

*(Spring)* U.S. Latino/a Literature

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Taught in English)

After centuries of invisibility and marginalization, Latino culture and literature exploded on the American scene in the 60s. Chicanos, Cubans, Nuyoricans, and lately Dominicans and Central Americans have all contributed to create a diversified body of literature characterized by its bilingualism, biculturalism, and hybridity. This course will center on how U.S. Latino/a literature bears witness to identity formation, self-representation, and celebration of Latino culture and its people. It will explore a series of critical issues that define "latinidad" in the U.S.

*(Fall)* Introduction to Spanish and Latin American Film

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Language requirement or Humanities I-A requirement

(Speaking- and writing-intensive; Filmst-203)

This course offers a broad introduction to the history, politics and aesthetics of Latin American and Spanish cinema in the context of, and in contrast with, cinemas from other regions, especially hegemonic Hollywood aesthetics. This course will also focus specifically on introducing students to the basic terminology and methodologies of film analysis, thus preparing them for the department's film seminar (Spanish 320) and other advanced courses in film studies.

(Spring) Seminar on Spanish/Latin American Cinema: Spring 2007: Feeling the Fake: Pedro Almodóvar
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive)
Preamble (for topics courses): This course examines the history, politics and aesthetics of Latin American and/or Spanish cinema in the context of world cinema, and especially in contrast to mainstream Hollywood cinema. The course will also familiarize students with the specific methodologies of film analysis and with recent debates within film studies.
This year's seminar will examine the films of European cinema's favorite bad boy, Pedro Almodóvar. On the one hand, we will situate his filmmaking in recent Spanish history in an effort to highlight the local contours of "postmodern film." On the other, we will consider what these particularities might contribute to larger aesthetic, political, and ethical debates. Upon seeing Almodóvar's films, one might ask, for instance, what it means for organ transplants and plastic surgery to operate as metaphors? What can a weeping transvestite teach us about desire? Under what conditions, if any, can a moviegoer find child prostitution cute?
Prerequisites: Prerequisites: 1) Spanish 212; 2) Spanish 235, 237, 244, or 246; and 3) Spanish 221 or Film Studies 101; or permission of instructor
Notes: 1 meeting (2 hours, 50 minutes), Screening will be held 7-9pm on Tuesdays

(Spring) Contemporary Latin American Literature: Spring 2007: Literature of the Revolution or Revolution of Literature in Latin America
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
Preamble (for topics courses): This course will concentrate on the various literary genres and cultural movements that have shaped Latin America from modernism to the present. Topics will focus on different genres and the expression of diverse ideologies through literature. Since the topic varies each time the course is offered, a student may receive credit more than once.
The Cuban Revolution symbolizes a moment of tremendous political, social, and cultural transformation in Latin America. These transformations were propelled by lettered cultural institutions and journals that sought to renovate the cultural spheres of these countries. We will study some of these
subversive transformations in the writings of Cortázar, Dalton, and Fernández Retamar. We will focus on different types of practices and discourses (literature, literary and cultural criticism, film and art) that were central in the debates fostered during this period.

Prerequisites: two of the following: Spanish 221, 235, 237, 244, 246, or permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: Y. Perez

Expected enrollment: 16

(Fall) Latin American Thought: Queer Theory in Latin America?

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

Preamble (for topics courses): How does Latin America think about itself? The purpose of this course is to introduce students to different ways in which Latin Americans have approached the problems of self-definition and cultural identity. Readings will explore how various authors have addressed such complex issues as colonialism, mestizaje, literacy, regionalism, and feminism, among others. Since the topic varies each time the course is offered, a student may receive credit more than once.

In the 1990s Queer Liberation entered the public sphere as a major political force. Simultaneously, American academia produced and exported a new academic discipline: Queer Studies. As a consequence, the North American liberational model displaced cultural and theoretical models of sexuality of other countries. We will examine theories and (textual and cinematic) practices from Argentina, Brasil, Chile, Cuba, Mexico, and Peru in order to recuperate cultural models under erasure in the wake of the U.S. model's identity-focused and consumer-driven triumphalism. We will also consider some of the key U.S. texts that have consecrated Queer Studies as a discipline.

Prerequisites: Two of the following: Spanish 221, 235, 237, 244, or 246 or permission of the instructor.

Notes: 1 meeting (2 hours 50 minutes)

(Spring) Seminar on Latin American Literature: Spring 2007: From Bicycle Thieves to Guerrilleros: Italian, French and Latin American New Cinemas

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(ITAL-361, FREN-321, FLMST-370, ROMLG-375)

Preamble (for topics courses): This course will concentrate on specific writers, movements, genres, themes, or cultural phenomena. Students will do close readings, prepare reports, research extensively, and write substantial papers. The seminar will challenge students to demonstrate an understanding of cultural analysis, critical skills, and theoretical approaches at an advanced level. Since the topic varies each time the course is offered, a student may receive credit more than once.

In this seminar, we will study the cross-cultural influences between Italian neo-realism, the French *nouvelle vague*, and the New Latin American Cinemas. Both the Italian and the French movements represent models and counterpoints for those Latin American filmmakers of the 1950s and 60s who sought to redress the dominance of the realist American model in Latin America and the domination of the markets by the products of Hollywood. The New Latin American Cinemas, in turn, paved the way toward the emergence of Third Cinema. We will study films, as well as cinematic theory, from Italy, France, the Soviet Union, Japan, Cuba, Brasil, Argentina, and Mexico.

Prerequisites: Two of the following: Spanish 221, 235, 237, 244 or permission of instructor required. Course will be taught in English, but Spanish majors write their papers in Spanish.

Notes: 2 meetings (75 minutes). For 300-level credit in Spanish, students must enroll in Spanish 361s (not Romance Languages and Literatures 375s)

Instructors: C. Gundermann

Expected enrollment: 16

SPAN-362-01 - Spanish - 2006-2007

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): The specific content of this advanced-level seminar will depend on the instructor. Materials to be studied will vary in terms of medium and genre, and the critical focus will tend to be interdisciplinary. Papers will be based on research and analysis. Since the topic varies each time the course is offered, a student may receive credit more than once.

The democratization of Spain after the Transición, signaled, in the Basque Country, the emergence into the public space of the conflict between competing national narratives. Separatism and Unionism strived to hegemonize a community fractured by terrorism and economic crisis. This seminar intends to study the Basque Radical Culture that emerged in this context, as an antihegemonic, collective struggle that posed a Utopian alternative to a system perceived as the offspring of Francoism. Through music, fanzines, cinema, and the okupazion of public spaces, we will critically trace the evolution of this movement, focusing on issues such as amblearismo, anarchy, feminism, and ecology.

Seminar in Spanish Studies: Spring 2007: Reading Monsters: The Discourse of Good and Evil from Don Quixote to Bin Laden
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): The specific content of this advanced-level seminar will depend on the instructor. Materials to be studied will vary in terms of medium and genre, and the critical focus will tend to be interdisciplinary. Papers will be based on research and analysis. Since the topic varies each time the course is offered, a student may receive credit more than once.
This class examines how the discourse of monstrosity permeates literary and popular texts from early modern to contemporary times. The "monster" articulates a discourse of extremes that encompasses both fear and awe, the need to hide and to be seen, and the mingling of different elements in one unique body. In this course we employ interdisciplinary perspectives to examine early modern masterpieces such as Don Quijote, as well as contemporary occurrences of monstrosity, such as the war on terror, the struggles of street children in Brazil, the U.S.-Mexico borderlands, and the Zapatista revolution in Chiapas, México.

STAT-140-01 - Statistics - 2006-2007
(Fall) Introduction to the Ideas and Applications of Statistics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course provides an overview of statistical methods, their conceptual underpinnings, and their use in various settings taken from current news, as well as from the physical, biological, and social sciences. Topics will include exploring distributions and relationships, planning for data production, sampling distributions, basic ideas of inference (confidence intervals and hypothesis tests), inference for distributions, and inference for relationships, including chi-square methods for two-way tables, analysis of variance, and regression.
Prerequisites: 2 years of high school algebra
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: H. Pollatsek

(Fall) Elementary Data Analysis and Experimental Design
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
A fundamental fact of science is that repeated measurements exhibit variability. The course presents ways to design experiments that will reveal systematic patterns while "controlling" the effects of variability and methods for the statistical analysis of data from well-designed experiments. Topics include completely randomized, randomized complete block, Latin Square and factorial designs, and their analysis of variance. The course emphasizes applications, with examples drawn principally from biology, psychology, and medicine.
Prerequisites: Any 100-level mathematics or statistics course or permission of instructor.
Notes: 2 meetings (75 minutes)
Instructors: G. Cobb

STAT-341-01  - Statistics - 2006-2007
(Spring) Linear Statistical Models  - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
(Also as Mathematics 329b)
Mathematical concepts from linear algebra and n-dimensional Euclidean geometry, together with statistical concepts of estimation and hypothesis testing, are developed and used to construct a unifying theory for two classes of applied methods: analysis of variance and regression analysis. The theory is developed in three stages: least squares and orthogonal projections; moment assumptions and the Gauss-Markov theorem; and the normal distribution and F-tests.
Prerequisites: Mathematics 211, Statistics 240 and 340
Notes: 2 meetings (1 hour and 45 minutes); offered alternate years, next offered spring 2008.
Instructors: G. Cobb

(Fall) Probability - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
(Same as Mathematics 342f)
This course develops the ideas of probability simultaneously from experimental and theoretical perspectives. The laboratory provides a range of experiences that enhance and sharpen the theoretical approach and, moreover, allows us to observe regularities in complex phenomena and to conjecture theorems. Topics include: introductory experiments; axiomatic probability; random variables, expectation, and variance; discrete distributions; continuous distributions; stochastic processes; functions of random variables; estimation and hypothesis testing.
Prerequisites: multivariable calculus
Notes: 2 meetings (75 minutes), 1 lab (50 minutes); offered alternate years at Mount Holyoke and Smith Colleges; offered at Mount Holyoke in fall 2007.
Instructors: G. Cobb

(Spring) Mathematical Statistics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course is an introduction to the mathematical theory of statistics and to the application of that theory to the real world. Topics include probability, random variables, special distributions, introduction to estimation of parameters, and hypothesis testing.
Prerequisites: Mathematics 202, 203, and 342 recommended
Notes: 2 meetings (90 minutes); offered every spring semester alternately at Mount Holyoke and Smith Colleges; offered at Mount Holyoke in spring 2008.
Instructors: G. Cobb

(Spring) Seminar in Statistics and Scientific Research
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
The topic for Spring 2007 is Discrete Markov Chain Monte Carlo: elements of graph theory, discrete probability models, basics of statistics, and their interrelations, with emphasis on the interplay between applied problems and abstract theory. The only prerequisite is familiarity with matrix algebra.
Prerequisites: Math 211 or permission of instructor
Notes: 2 meetings (1 hour and 45 minutes); offered alternate years; next offered in the spring 2007
Instructors: G. Cobb

THEAT-120-01 - Theatre Arts - 2006-2007
(Fall) Topics in Design: Costume Construction - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): Various topics in theatrical design, or in related design fields, including theory, practice, and history. Subjects may include performance and design, costume crafts, and materials and techniques. The course combines historical study with studio work. This course will explore the evolution of costume construction, using both historical and modern methods. Commercial patterning, flat patterning, and draping methods will be covered. Students will learn skills for the construction, care, identification, and treatment of fabric and the use and maintenance of tools used in the costume shop. Through these methods we will interpret costume renderings by prominent designers.

Notes: 2 meetings (2 hours); lab; $10 lab fee; additional purchase of construction supplies and materials is the responsibility of the student

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): Topics courses offer a specific approach to performing. They may include mask characterization, physical theatre techniques, acting Shakespeare, and vocal training, among others.
An in depth study of the dramatic and nondramatic works of two Southern American, mid-century playwrights, Alice Childress and Tennessee Williams. Childress, the only African American woman whose plays were produced for four decades, is known for her sensitive characterizations of black women as seen through the lens of her feminist ideology. Williams, known for his poetic realism, depicted the ills of our world and a search for truth through his passionate characterizations of women and men. Students will study selected texts and present four scenes during the course of the semester.
Prerequisites: Theatre Arts 105 or permission of instructor
Notes: 2 (2 hour) meetings; $10 lab fee. May be taken at 300 level dependent upon previous course work.
Instructors: J. Devlin
Expected enrollment: 12

Preamble (for topics courses): Various topics in theatre studies including particular theatrical periods and genres. Topics may include melodrama, postcolonial theatre, early twentieth-century avant-garde movement, feminist theatre, etc. These courses include historical and theoretical approaches and could involve interdisciplinary collaboration.

Performance studies focuses on how meaning is created through cultural behaviors and practices. This course will teach students the basic skills needed to analyze a variety of performances, from ritual and theatre to the interactions and occurrences that constitute everyday life. Students will learn to use performance theory to examine the ways in which identity is constructed and maintained in social contexts. Each week students will study a particular aspect of performance theory and apply what they have learned to observation in the field. This is a reading and writing intensive course that emphasizes connections between the humanities and social sciences.
Prerequisites: Theatre 100, 105, 122 or permission of instructor

(Fall) Topics in Theatre Studies: Gender and Power in Early Modern Theater
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Engl-317-01)
Preamble (for topics courses): Various topics in theatre studies including particular theatrical periods and genres. Topics may include melodrama, post-colonial theatre, early 20th century avant-garde movements, feminist theatre, etc. These courses include historical and theoretical approaches and could involve interdisciplinary collaboration.

How is gender represented, and how is power gendered, in plays by Shakespeare's contemporaries and successors? Examples: unruly Alice Arden murdering her husband, Kate "tamed" in The Taming of the Shrew, Fletcher's "reply," The Tamer Tamed, and Middleton and Dekker's Roaring Girl, Moll Cutpurse. Topics such as boy actors, cross-dressing, early modern theories of sexuality, and the cultural construction of same-sex relationships.
Readings in plays by such writers as Kyd, Marlowe, Jonson, Elizabeth Cary, Beaumont and Fletcher, Dekker, Middleton, Webster, and Ford, and in recent criticism. Substantial opportunity for independent work reflecting each student's own interests.

African American and African Studies

(Fall) Introduction to African American and African Studies: Identity, Community, and Progress
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
In this introduction to the African American experience in twentieth-century America, historical, cultural, economic, political, and aesthetic elements of the urban African American experience are examined. Because of the interdisciplinary nature of African American studies, we consider methodological issues as they bear on the constitution of the African American subject, the descriptive edifices of the contemporary African American community, and programs for liberation.
Notes: 2 meetings (75 minutes)
Instructors: Z. Elliott
Expected enrollment: 25

(Spring) Black Women Writers: Feminist Visions from the African Diaspora
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Writing-intensive; same as Gender Studies 204)
This course will explore the influence of feminist politics on the writing of women throughout the African Diaspora. By exploring the different cultural, political, and historical contexts in which these writers work, we will attempt to define the continuities and conflicts that exist within the vast field of black women's writing. Why, when, and how did a black feminist consciousness emerge? How did racial tensions within the predominantly white feminist movement lead to the development of a separate black "womanist"/Third World agenda? How does feminist literature of the African Diaspora challenge negative stereotypes and misrepresentations of black women's realities?
Prerequisites: 101 Intro to African American Studies, or permission of instructor
Notes: 1 meeting (2 hours 50 minutes)
Instructors: Z. Elliott
Expected enrollment: 25

(Spring) Luminous Darkness: African American Social Thought
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Examines the causes of and proposed solutions to "the Negro problem" in post-Civil War American public policy. Focuses on the life, work, and legacies of DuBois. Drawing on domestic and diasporic fictional and nonfictional depictions of black life in the "DuBoisian century" the course
considers different responses to his 1903 question, "How does it feel to be a problem?" Examining theories, arguments, movements, and policies targeting blacks and their environment allows us to criticize black modernity, assess the changing role of black intellectuals in society, evaluate "race theory," and consider dominant and marginal attempts to analyze and overcome the "color line" in America.

Prerequisites: 8 credits in department, permission of instructor

Notes: 1 meeting (2 hours 50 minutes)

Instructors: L. Wilson

Expected enrollment: 20

(Fall) Black Feminism: Theory and Praxis: Black Feminism: Theory and Praxis
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Writing-intensive)
This course explores foundational texts of major authors along with lesser-known contributors to the black feminist movement, from the nineteenth century to the present. It also examines the various ways in which black feminist theory has been expressed in and applied to the arts and political activism, analyzing black feminist cultural criticism as it applies to music, film, fine arts, performance, and literature. Conflicts and continuities between black and white feminists, and the role of pro-feminist men within the movement will be considered as well.
Prerequisites: 8 credits in department or permission of instructor

Notes: 1 meeting (3 hours)

Instructors: Z. Elliott

Expected enrollment: 15

(Spring) Sex, Love, and Gender in Contemporary African American Film
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Writing-intensive)
This course will explore the representation in film of intimate relationships among African Americans. Confronting an ongoing history of racist, sexist, and homophobic images, films produced by and featuring blacks can offer alternate interpretations of love, romance, and sexuality. Coupled with literature and theoretical readings by feminists and black cultural critics, students will consider the function of—and challenges to—intimacy in interpersonal relationships among African Americans. Directors under consideration include Spike Lee, Kasi Lemmons, Marlon Riggs, and Sanaa Hamri.

AMST-201-01 - American Studies - 2007-2008
(Spring) Introduction to the Study of American Culture: Comparative Migrations: Borders, Narratives, and Myths
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course is a comparative study of multiple forms of migration that have shaped and continue to shape our understanding of America. Relying on political documents, visual images, films, music, and literature, it focuses on specific forms of migration—westward expansion, 19th century European immigration, the Great Migration, postwar suburbanization, post-65 immigration, and contemporary border crossings—and their role in the formation of American identity and society. The aim of the course is to familiarize students with American studies' expanding methods of inquiry as well as emerging themes, debates, and developments.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course is a comparative study of the shared experiences of colonization, conquest, and displacement among Filipinos, Puerto Ricans, and Native Hawaiians. It operates from the assumption that a critical consideration of their collective experiences not only deepens our comprehension of their social and historical formations but also points to intriguing analytic possibilities that extend beyond the specificities of their histories. In particular, the course asks what an examination of these experiences reveals about America and what it means to be American.

(Fall) Senior Seminar: American Orientalisms: Afro/Arab/Asian Connections
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Linking European imperialism to false constructions of the "Other," Edward Said's theory of Orientalism enables a comparative approach to Afro/Arab/Asian experiences. 9/11 and the current war in Iraq compel this investigation of genealogies of both American Orientalism and the "Third World" self-determination inspired by Marxist, postcolonial, or religious thought. Feminist critiques reveal the gendered nature of Orientalist discourses while theories of Occidentalism and Afro-Orientalism highlight counter-discursive strategies. This course examines both the global forces that "divide and conquer" and the "polycultural" alliances that generate alternative visions of social organization.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(English 334, Film Studies 370 and Gender Studies 333)
This course examines alternative kinship formations in Asian North American cultural production. It will focus on the gender and sexual management of racial bodies since the nineteenth century--from the U.S. Page Law of 1875 that restricted Chinese women on the basis of their presumed sexual immorality to various forms of "racial castration" that mediate Asian masculinities. We will consider how alternative kinship arrangements and queer cultural projects expose and/or upset the narrative assumptions embedded in heteronormative scripts of nationalism.

(Fall) Anthropology of Modern Japan - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Since the mid-nineteenth century, Americans have viewed Japan as the Orient's most exotic and mysterious recess, alternately enticing and frightening in its difference. Intense economic relations and cultural exchange between Japan and the U.S. have not dispelled the image of Japanese society and culture as fundamentally different from our own. In this course, we will strive for greater understanding of shared experiences as well as historical
particularities. Issues covered may vary from one semester to another, but frequently focus on work, women, minorities, and popular culture. Films and anthropological works provide ethnographic examples of some key concepts.

(Fall) Topics in Ethnology: The Latino City
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Writing-intensive)
Preamble (for topics courses): This course offers a periodic examination of culture areas not covered in other area courses, such as Amazonia, Native North America, or Central Asia. Topics vary from year to year.
What would an anthropology of the Latino city look like, and how would it draw on or differ from historical or sociological paradigms? This course explores the ongoing transformation of North American urban spaces by successive and overlapping waves of migration from Latin America and the Caribbean. Interspersing theoretical questions with ethnographic materials from a number of sites (principally Miami, L.A., the Rio Bravo, and New York), this seminar examines the production and reproduction of urban Latino culture under industrialization, postcolonialism, and globalization. We will also examine the relationship between representations of the city and the everyday experience of it.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking- and writing-intensive)
We shop for our food, for our clothes, for our colleges. We purchase cars, manicures, and vacations. It seems that there is little that cannot be bought or sold. But we also give and receive gifts, exchange favors, "go dutch" in restaurants, and invite friends for potlucks. This course examines exchange systems cross-culturally, in order to understand their cultural significance and social consequences. It explores how our own commodity exchange system, which appears to be no more than an efficient means of distributing goods and services, in fact contains intriguing symbolic dimensions similar to the gift exchange systems of Native North America, Melanesia, and Africa.

(Spring) Special Topics in Anthropology: Human Variation and Adaptation
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course explores the scientific basis of human variation in modern populations from an evolutionary perspective. This perspective stresses the functional and adaptive nature of human biological diversity, as well as the influence of behavior and environment on that biology. We will examine patterns of human variation and their associations with health, disease, and social issues. Topics include influences of the environment on human appearance, plasticity of human biology, links between genetic disorders and infectious diseases with human adaptation, sex differences, and the "race concept."

(Spring) Special Topics in Anthropology: Anthropology of Nature
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This seminar explores the place and meaning of "nature" in the postindustrial world. Drawing from recent contributions from fields such as political ecology, geography, poststructuralism, feminist theory, and queer and gender studies, this seminar reflects upon the different forms in which societies
are reshaping both the idea and practices of nature in an age of hyper-mobile social and economic transformations. By exploring issues surrounding sex-change surgery, bioprospecting, ecotourism, and agricultural biotechnology, we will gain insight into the ways the nature concept is being stretched and redefined as it drives heated epistemological and global political debates.

(Spring) Special Topics in Anthropology: Political Ecology: Capitalism, Politics, Nature
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Preamble (for topics courses): This course covers significant problems in the field of anthropology, with group meetings and reports.
Political ecology explores the relations among ecologies, economies, and politics as they play out in diverse communities. By examining such movements as the European-based anti-GMO movement, the U.S. movement against environmental racism, and women's environmental movements in the global South, this course seeks to investigate understandings of nature, society, and environmental justice that surface in particular ecological struggles. Locating these struggles within the context of power, this course will investigate the role of global capital in shaping new understandings, practices, and struggles over nature that are increasingly at the center of international environmental controversy.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Preamble (for topics courses): This course covers significant problems in the field of anthropology, with group meetings and reports.
Within the ethnographic and historical context of a revolutionary socialist state, this course seeks to investigate the nature of social life in Cuba today. In addition to addressing theoretical questions relating to the reproduction of racial and national ideologies in a Marxist state, we consider ethnographic material on the formal and informal economy, politics and the nature of charismatic leadership, material culture and consumption, migration and exile, gender relations, and legal systems within one of the more singular of the American republics, and in counterpoint, in its diaspora.

Architectural Studies

(January) Introduction to Architectural Design
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This course explores both the conceptual and practical realms of architecture. Through a series of selected readings, lectures, and studio projects, students will learn to form criteria for architectural design by integrating the principles of three-dimensional form with the site, the program, and the structural and material requirements. Students will also consider the site/building context and as the course progresses, complete measure drawings and scaled models of a design project. Discussions focus on how experience, the body, daily use, culture, and aesthetics influence the field of architectural design, while studio projects highlight the role of research, drawing, and model making.
Prerequisites: Individuals with or without design experience are welcome, as projects are tailored to each student's background
Notes: 3 meetings (2 hours)
Instructors: B. Williams
Expected enrollment: 12

(Fall) Topics in Architecture: Sculpting Space with Meaning
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This studio course will be a design investigation of a particular theme in or approach to architecture and the built environment.
In this course, students will develop and apply traditional and contemporary architectural skills (sketches, plans, elevations, models, computer diagramming, and various modes of digital representation) to interdisciplinary and socially pertinent design problems. Creative and indexical study and analysis will be used to generate and foster a broad range of concepts and language to solve architectural issues involving site, construction, inhabitation, function, form, and space. Our goal is to apply creative techniques in art and sculpture to the creation of meaningful space.
Prerequisites: One semester of design or drawing is recommended.

Some of the best feature-length films of the past century have commanded our attention and imagination because of their compelling artistry and the imaginative ways they tell stories visually and verbally. This course closely studies narrative films from around the world, from the silent era to the present, and in the process it introduces students to the basic elements of film form, style, and narration. Some of the films to be considered are: Broken Blossoms, Battleship Potemkin, Citizen Kane, Contempt, The Bicycle Thief, Ugetsu, Rear Window, Woman in the Dunes, The Marriage of Maria Braun, Days of Heaven, and Moulin Rouge.

ARTH-211-01 - Art History - 2007-2008
(Fall) Gods and Mortals: Myth in Ancient Art and Literature
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Classics 211)
Many ancient images tell completely different versions of myth from those portrayed in Greek and Roman literary sources. By juxtaposing distinctive modes of communication in the ancient world, students will analyze the rhetorical uses of myth, both then and now. Students will also examine the range of possibilities for translating and interpreting text and image, which will alert them to the vitality of myth as a language of its own, transcending historical parameters.

(Fall) The Hellenistic World: From Alexander to Cleopatra - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Hellenistic art has often been regarded as a chaotic, decadent phase between the golden ages of classical Athens and imperial Rome. In fact, the period in the Mediterranean from the death of Alexander the Great in 323 B.C.E. to the Roman conquest of Egypt in 31 B.C.E. saw the creation of some of the greatest masterpieces of ancient art. The course addresses the new themes and purposes of art in a cosmopolitan culture with its competing centers (Pergamon, Rhodes, Antioch, Alexandria, and Rome); its private patrons, public museums, art historians, and critics; and its innovations in science and politics.
Prerequisites: soph, jr, sr, or permission of the instructor
Notes: 2 meetings (75 minutes)
Instructors: B. Bergmann

ARTH-231-01 - Art History - 2007-2008
(Fall) Northern Renaissance Art
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course will survey artistic production in Northern Europe in the fifteenth and sixteenth centuries, with an emphasis on the media of panel painting, manuscript illumination, and printmaking. Artists to be considered include Jan van Eyck, Rogier van der Weyden, Jean Fouquet, Hieronymous Bosch, and Albrecht Durer. We will examine dazzling examples of artistic virtuosity, the imaginative interpretation of popular and esoteric texts, the introduction of new subject matter, and technical innovations such as the invention of printing. We will also trace the transformation of the status of the artist and the changing conditions of patronage.

(Fall) Building the Modern Environment: Architecture 1890-1990
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
An exploration of major movements and personalities in architecture from the late nineteenth century to the present. Emphasizing the United States against the background of European developments, the course considers the search by architects, including Frank Lloyd Wright, Le Corbusier, and Frank Gehry, for a language of form and space that captures the contemporary spirit as it elevates society to a higher plane of existence. Discussion focuses on issues of technology and utopia, the skyscraper, and the collision of tradition, modernity, and postmodernism in architecture since 1945.

(Fall) Contemporary Art - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course traces the different paths of painting, sculpture, and photography in the United States and, less so, Western Europe since World War II. Initially, most of these paths traced a relationship with the "crisis of modernism," but increasingly, they have taken on a different vitality, drawing energy from a wide variety of postmodern and postcolonial subjects and debates: identity politics, transnationalism, diaspora. Can something that can be identified as an avant-garde practice exist in such a context? What kinds of questions are appropriate to ask about works that stridently attempt to suspend the very category of art?
Prerequisites: soph, jr, sr, or permission of instructor

**Seminar in Twentieth-Century Art: Art of the 1960s - *Not offered this year/term**
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
The seminar will explore the artistic directions and trends defining the 1960s in America, spanning the rise of minimalism, pop art, color field painting, video, and performance art to the emergence of conceptual art around 1968. While at aesthetic odds and thematic cross-purposes, these movements are visually unified by a certain cool, impersonal, and detached stylistic character. By examining the work of artists as well as key critical texts, works, and films, the 1960s will be probed for its cultural and social complexity, a decade that many now view as marking the end of modernism with a radical consciousness that inspired innovative artist forms.
Prerequisites: jr, sr, 8 credits in art history, or permission of instructor

**Coitus Interruptus: Indian Film and Its Attraction**
(Spring)
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(FLMST 370-01)
How are we to respond to Indian popular film, which is notorious for its distracting song and dance numbers, meandering story line, and visually overblown spectacles? This seminar will develop historical and theoretical approaches to Indian films as what scholar Lalitha Gopalan calls a
"constellation of interruptions." Students will examine feature films in class, write critical papers on scholarly essays, and pursue independent research projects on various aspects of Indian film.
Prerequisites: jr, sr, 8 credits in art history, or film studies, or permission of instructor.

ARTST-280-01 - Art Studio - 2007-2008
(Fall) Topics in Studio Art: Body and Space
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course focuses on the issues surrounding body and space through installation, performance, and public arts projects. Students will explore the possibilities of body as an energetic instrument, while investigating the connotations of various spaces as visual vocabulary. As one uses one's own body as an essential part of the expression, naturally the self becomes the reservoir. We will examine the transformational qualities of the body as the conduit of gestural expression, which links conceptual and physical properties of materials, ideas, and space.
Prerequisites: sophomore standing
Notes: 2 meetings (2 hours, 15 minutes); Students enrolled in this course will be responsible for some of the cost of course materials, in addition to the standard studio fee of $50; This course may be taken for 2 credits with permission of the instructor.

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

Preamble (for topics courses): Asian Studies 110f-111s, 120f-121s, 130f-131s and 141f-142s satisfy the Mount Holyoke College language requirement. Students who have had previous training in Arabic, Chinese, Japanese, and Sanskrit and wish to continue their studies should arrange for placement in appropriate courses by contacting Mr. Jiyad for Arabic, Ms. Nemoto for Japanese, Ms. Wang for Chinese, and Ms. Peterson for Sanskrit.

Introduction to Arabic, the classical language of the Arabian Peninsula. Related to other Indo-European languages (including English) and the ancestor of most of the sixteen major Indian languages (e.g., Hindi), Sanskrit is the medium of the literary classics, and of the texts of the Hindu, Buddhist, and Jain religions. The first-semester course covers Sanskrit grammar. The emphasis is on sentence construction, recognition and production of grammatical forms, and making statements involving learned material. Reading materials (messages, personal notes, and short statements) contain formulaic greetings, courtesy expressions, queries about personal well-being, age, family, weather, and time. Students also learn to write frequently used memorized material, such as names and addresses.

Notes: 3 meetings (75 minutes), 1 meeting (1 hour); credit is contingent on enrollment in both the first and second semesters
Expected enrollment: 30

(Fall) First Year Seminar: Stories and Storytelling in India
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

First-year seminar (Speaking- and writing-intensive; Taught in English)

India is a treasure house of tales and the home of vibrant traditions of storytelling in classical Sanskrit as well as in modern languages. Indian tales have been transmitted around the world and have parallels in such collections as *The Arabian Nights* and Chaucer's *Canterbury Tales*. We will study, in English translation, the epics *Ramayana* and *Mahabharata*, animal fables, and women's stories and folktales in a variety of forms including puppet plays, song,
and dramatic performance. We will examine who tells stories, why, and when, and we will compare Indian stories with tales from other parts of the world.

ASTR-137-01 - Astronomy - 2007-2008
(Spring) The Sky
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
A lab/tutorial introduction to observing and understanding the extraterrestrial sky. Daily and annual motions of the sun, moon, planets, and stars; celestial coordinate systems; apparent brightnesses and colors of the stars; time, calendars. Observations at the Williston Observatory with the unaided eye, visually with the eight-inch telescope, and by electronic camera with computer-controlled telescopes.

Prerequisites: fy, soph only
Notes: 1 meeting (3 hours). Primary work of the course will be done in observing sessions.
Instructors: T. Burbine
Expected enrollment: 12

ASTR-137-02 - Astronomy - 2007-2008
(Spring) The Sky
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
A lab/tutorial introduction to observing and understanding the extraterrestrial sky. Daily and annual motions of the sun, moon, planets, and stars; celestial coordinate systems; apparent brightnesses and colors of the stars; time, calendars. Observations at the Williston Observatory with the unaided eye, visually with the eight-inch telescope, and by electronic camera with computer-controlled telescopes.
Prerequisites: fy, soph only

Instructors: T. Burbine
Expected enrollment: 12

(Fall) History of Astronomy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course looks at astronomy and cosmology from earliest times - Egyptian, Babylonian, Greek, Islamic; the medieval universe; Newtonian universe; mechanistic universe of the eighteenth and nineteenth centuries; gravitational theory; origin, structure, and evolution of stars and galaxies; developments in modern astronomy. Nontechnical, with emphasis on history and cosmology.
Notes: 2 meetings (75 minutes);
Expected enrollment: 25

(Spring) Topics in Astronomy: Bringing Astronomy Down to Earth: The Art of Communicating Science Through Electronic Media
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
A scientifically well-informed public is not only crucial for the continued support of sciences but is a necessity in a democratic society dependent on science and technology. The course will introduce students to state of the art examples of science communication methods for the public. The students will learn how to use electronic tools, such as podcasts/vodcasts, animated gifs, digital films, to communicate the science behind some recent astronomical discoveries. Students will work in small teams on projects that integrate science writing with electronic tools to communicate key astronomical concepts.
Prerequisites: one course in a physical science or permission of instructor
Notes: course will be offered at Hampshire’s ’08
Instructors: S. Hameed, H. Crowl
Expected enrollment: 5

ASTR-220-02 - Astronomy - 2007-2008
(Spring) Topics in Astronomy: Astronomy and Public Policy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Astronomical issues that impact our society will be explored in a seminar format. The approach for each issue will be to pose a question based on a body of scientific evidence with potential consequences for human society. The answers to these questions will be investigated both on scientific and societal grounds. Scientific issues include the potential threat of collisions between the earth and other solar system bodies and the potential existence of extraterrestrial life.
Prerequisites: one course in a physical science or permission of instructor
Instructors: The department

ASTR-223-01 - Astronomy - 2007-2008
(Fall) Planetary Science
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Geology 223)
An introductory course for physical science minors and majors. Topics include origin and evolution of the planets; planetary orbits, rotation, and precession; gravitational and tidal interactions; asteroids, comets, and planetary rings; meteorites; interiors and atmospheres of the Jovian and terrestrial planets; geology, tectonics, and mineralogy of the terrestrial planets and satellites; new data from Mars Pathfinder, Lunar Surveyor, and current NASA missions.
Prerequisites: any physical science course
Notes: 2 meetings (75 minutes)
Instructors: T. Burbine, M. Dyar
Expected enrollment: 25

ASTR-224-01 - Astronomy - 2007-2008
(Fall) Stellar Astronomy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The basic observational properties of stars will be explored in an experimental format relying on both telescopic observations and computer programming exercises. No previous computer programming experience is required.
Prerequisites: Physics 115, Mathematics 101 or equivalent
Notes: 2 meetings (2 hours, 45 minutes)
Instructors: The department

ASTR-224-01 - Astronomy - 2007-2008
(Spring) Stellar Astronomy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The basic observational properties of stars will be explored in an experimental format relying on both telescopic observations and computer programming exercises. No previous computer programming experience is required.
Prerequisites: Physics 115, Mathematics 101 or equivalent
Notes: 2 meetings (2 hours, 45 minutes); spring classes to be held at Smith College
Instructors: S. Edwards
Expected enrollment: 25

ASTR-225-01 - Astronomy - 2007-2008
(Spring) Galactic and Extragalactic Astronomy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The basic observational properties of galaxies are explored in an experimental format relying on both telescopic observations and computer programming exercises. No previous computer experience is required.
Prerequisites: Physics 115, Mathematics 101 or equivalent
Notes: 1 meeting (3 hours);
Instructors: The department
Expected enrollment: 25

(Fall) Cosmology
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course looks at cosmological models and the relationship between models and observable parameters. Topics in current astronomy that bear upon cosmological problems, including background electromagnetic radiation, nucleosynthesis, dating methods, determinations of the mean density of the universe and the Hubble constant, and tests of gravitational theories. Discussion of some questions concerning the foundations of cosmology and its future as a science.
Prerequisites: Mathematics 101 and a physical science course
Notes: 2 meetings (75 minutes); fall 2007 classes to be held at Amherst
Instructors: G. Greenstein
Expected enrollment: 25

(Spring) Cosmology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Galaxies, clusters of galaxies, redshift and Hubble constant. Quasars and X-ray bursters. Models of an expanding universe. The geometry of space-time, and how light travels through it; how gravity slows the expansion and "dark energy" might accelerate it. The big bang, cosmic microwave background radiation, and synthesis of deuterium and helium; the cosmological distance scale, age and future prospects of the universe.
Prerequisites: Astronomy 101 or a strong physical science background either in high school or at MHC
Notes: 2 meetings (75 minutes) plus 2 hour lab to be arranged.
Instructors: The department

ASTR-243-01 - Astronomy - 2007-2008
(Spring) Stars: Time and Transformation in the Universe - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement (Writing-intensive)
Gravity, falling, and orbits; gravitational and kinetic energy; orbital mechanics in star clusters and space craft; gravitational collapse and the Kelvin timescale; black holes; nuclear and atomic binding energy; chemical abundances in the universe; nuclear burning in stars and its timescale; history of the chemical elements; life histories of stars; stars as distance indicators; cosmological distance scale; expansion of the universe; cosmological timescale; narrative history of the universe.

Prerequisites: 4 admission units in math and permission of instructor
Notes: 2 meetings (75 minutes), 1 evening lab (2 hours)
Instructors: The department

ASTR-295-01 - Astronomy - 2007-2008
(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph
Instructors: The department

ASTR-295-01 - Astronomy - 2007-2008
(Spring) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph
Instructors: The department

ASTR-326-01 - Astronomy - 2007-2008
(Spring) Cosmology
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
A survey of topics relevant to cosmology: orbits and masses; stellar spectra and the chemical composition of the "ordinary matter" in the universe; and the astronomical distance scale. The course will cover the two fundamental observations of cosmology: Hubble's "law" and the Cosmic Microwave Background Radiation. We will also explore cosmological models: big bang and steady state, Newtonian cosmology and relativistic modification; dark matter; dark "energy"; and the early universe. We will discuss unsolved problems and prospects for the future. Readings, discussion, and problem assignments, including projects and problems to be completed with Mathematica or similar software.
Prerequisites: Physics 115-216 or 103-204; Math 202 or Math 100B; some experience in computer programming.
Notes: 2 meetings (75 minutes)
Instructors: T. Dennis

(Fall) Seminar: Topics in Astrophysics: Asteroids - *Not offered this year/term
Credit/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Geology 330f (01))
This course will cover the relationship of asteroids and meteorites. Topics that will be discussed include how asteroids and meteorites are classified, spectroscopic measurements of asteroids, and how meteorites are transferred from asteroids to the Earth. No prior knowledge of asteroids or meteorites will be assumed.
Prerequisites: any 200 level astronomy or geology course
Notes: 1 meeting (3 hours)
Instructors: The department

Expected enrollment: 18

ASTR-335-01 - Astronomy - 2007-2008
(Spring) Seminar: Topics in Astrophysics: Spectroscopy of the Planets - *Not offered this year/term
Credit/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Geology 330s (01))
Hands-on experience with spectroscopic data acquired from planetary atmospheres and surfaces. Four course modules include: 1) theory of spectroscopy and its application to the planets and stars; 2) broadband imaging of planetary surfaces; 3) in situ spectroscopy of planetary surfaces; 4) spectroscopic techniques used to search for exo-solar planets, and 5) analysis of an unidentified spectrum. The goal will be to identify important absorption/emission features based on knowledge acquired throughout the semester.
Prerequisites: 2 semesters of astronomy, geology, or physics
Notes: 1 meeting (3 hours)
Instructors: The department

Expected enrollment: 18

Mount Holyoke College Course Information Archive 2000-2016
How do astronomers determine the nature and extent of the universe? Following the theme of the "Cosmic Distance Ladder," we explore how our understanding of astrophysics allows us to evaluate the size of the observable universe. We begin with direct distance determinations in the solar system and nearby stars. We then move on to spectroscopic distances of stars; star counts and the structure of our galaxy; Cepheid variables and the distances of galaxies; the Hubble Law and large-scale structure in the universe; quasars and the Lyman-alpha forest.

Prerequisites: Physics 115 and one prior physics or astronomy course at the 200 level or above

Notes: 2 meetings (75 minutes); fall 2007 classes to be held at UMass

Instructors: G. Wilson

Expected enrollment: 25

ASTR-337-01 - Astronomy - 2007-2008

(Spring) Observational Techniques in Infrared and Optical Astronomy

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

An introduction to the techniques of gathering and analyzing astronomical data, particularly in the optical and infrared. Telescope design and optics; instrumentation for imaging, photometry, and spectroscopy; astronomical detectors; computer graphics and image processing; error analysis and curve fitting; data analysis and astrophysical interpretation, emphasizing globular clusters.

Prerequisites: Astronomy 224, 225, Physics 216

Notes: 2 meetings (75 minutes); spring 2008 classes to be held at Smith College

Instructors: J. Lowenthal

ASTR-338-01 - Astronomy - 2007-2008

(Spring) Techniques of Radio Astronomy - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

An introduction to radio astronomy equipment, techniques, and the nature of cosmic radio sources. Radio receiver and antenna theory; radio flux, brightness temperature, and the transfer of radio radiation in cosmic sources; effect of noise, sensitivity, bandwidth, and antenna efficiency; techniques of beam switching, interferometry, and aperture synthesis; basic types of radio astronomical sources: ionized plasmas, masers, recombination and hyperfine transitions; nonthermal sources; applications to the sun, interstellar clouds, and extragalactic objects.

Prerequisites: two semesters of physics and two semesters of calculus

Notes: 2 meetings (75 minutes) and observation sessions;

Instructors: The department

Expected enrollment: 25

ASTR-351-01 - Astronomy - 2007-2008

(Spring) Astrophysics I: Stars and Stellar Evolution - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

This course looks at physical principles governing the properties of stars, their formation and evolution: radiation laws and the determination of stellar temperatures and luminosities; Newton's laws and the determination of stellar masses; hydrostatic equilibrium and the thermodynamics of gas and radiation; nuclear fusion and stellar energy generation; physics of degenerate matter and the evolution of stars to white dwarfs, neutron stars, or black holes; nucleosynthesis in supernova explosions; dynamics of mass transfer in binary systems; viscous accretion disks in star formation and X-ray binaries.

Prerequisites: two 300-level physics courses

Notes: 2 meetings (75 minutes);

Instructors: The department

ASTR-352-01 - Astronomy - 2007-2008

(Spring) Astrophysics II: Galaxies

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

This course applies physics to the understanding of astronomical phenomena. Physical processes in the gaseous interstellar medium; photoionization in HII regions and planetary nebulae; shocks in supernova remnants and stellar jets; energy balance in molecular clouds. Dynamics of stellar systems; star clusters and the virial theorem; galaxy rotation and the presence of dark matter in the universe; spiral density waves. Quasars and active galactic nuclei: synchrotron radiation; accretion disks, supermassive black holes.

Prerequisites: two 300-level physics courses

Notes: 2 meetings (75 minutes); spring 2008 classes to be held at UMass

Instructors: H. Mo

Expected enrollment: 25

(Fall) Independent Study
Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement.
Prerequisites: jr, sr, permission of department
Instructors: The department

Biochemistry

(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Independent work in biochemistry can be conducted with any member of the biochemistry committee and, upon approval, also with other members of the biological sciences and chemistry departments.
Notes: Students conducting an independent lab research project for credit in a department, program, or lab covered by the College's chemical hygiene plan must participate in a safety training session before beginning research; credit will not be granted to students who do not receive safety training.
Instructors: The department

BIOCH-311-01 - Biochemistry - 2007-2008
(Fall) Protein Biochemistry and Cellular Metabolism
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement (Biological Sciences 311f; Chemistry 311f)
This course is a rigorous introduction to the study of protein molecules and their role as catalysts in the cell. Topics include general principles of protein folding, protein structure-function correlation, enzyme kinetics and mechanism, carbohydrate and lipid biochemistry, and metabolic pathways (catabolic and anabolic) and their interaction and cross-regulation. Biological transformation of energy is considered in light of the principles of thermodynamics.
Prerequisites: Biological Sciences 210 (can be taken concurrently), Chemistry 302
Notes: 3 meetings (75 minutes), 1 lab (4 hours)
Instructors: L. Hsu
Section Instructors: 01 LAB L Hsu | 02 LAB L Hsu |

(Spring) Nucleic Acids Biochemistry and Molecular Biology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement (Biological Sciences 314s; Chemistry 314s)
This course is an in-depth examination of DNA and RNA structures and how these structures support their respective functions during replication, transcription, and translation of the genetic material. Emphasis is on the detailed mechanisms associated with each step of gene expression. Discussions incorporate many recent advances brought about by recombinant DNA technology.
Prerequisites: Biological Sciences 210, Chemistry 302, Biochemistry 311, or permission of instructor
Notes: 3 meetings (75 minutes), 1 lab (4 hours)
Instructors: L. Hsu
Section Instructors: 01 LAB L Hsu | 02 LAB L Hsu |
(Spring) Topics in Biochemistry and Molecular Biology
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course each year examines a number of important and exciting topics in biochemistry, molecular biology, and other related fields of biology. The intellectual and research development that formulated these fundamental concepts is traced through extensive readings of the primary literature. Discussions emphasize the critical evaluation of experimental techniques, data analysis, and interpretation. Substantial student participation in the form of oral presentation is expected.
Prerequisites: Biochemistry 311, 314, or permission of instructor
Notes: 1 meeting (2 hours, 30 minutes)
Instructors: L. Hsu

(Fall) Independent Study
Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement.
Independent work in biochemistry can be conducted with any member of the biochemistry committee and, upon approval, also with other members of the biological sciences and chemistry departments.
Notes: See safety training restrictions in the course description for Biochemistry 295
Instructors: The department

BIOL-145-01 - Biological Sciences - 2007-2008
(Fall) Introductory Biology: Nature Harmoniously Confus'd
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
First-year seminar
Most organisms are notably unlike ourselves—a tapestry of bacteria, protozoans, algae, and, off by themselves, the plants, fungi, and other animals. We will survey the whole range of organisms, especially those in the ponds and forests of our campus. Labs will start in the field, offering many opportunities for wet or muddy work. Students will design studies that play to the special features of the organisms they have found. The class counts exactly the same as Biology 150, but it is a small class rather than a large one, and is addressed to students intrigued by natural history.
Prerequisites: fy or permission of instructor
Notes: 3 meetings (50 minutes); 1 lab (3 hours)
Instructors: S. Rachootin
Section Instructors: 01 LAB S Rachootin | 02 LAB S Rachootin |
Expected enrollment: 36

BIOL-145-01 - Biological Sciences - 2007-2008
(Spring) Introductory Biology: Biology in the Age of the Human Genome Project
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
The Human Genome Project is leading to great advances in our understanding of the human body and in our ability to manipulate our own genetic information. We will focus on the science behind the Human Genome Project, and the ways in which it will change our lives. This course will also serve as a general introductory biology course for biology majors as well as nonmajors. We will read articles and books, and make use of the World Wide Web.
Prerequisites: fy or permission of instructor
Notes: 3 meetings (50 minutes) plus 4th hour, 1 lab (3 hours)
Instructors: C. Woodard
Section Instructors: 01 LAB C Woodard | 02 LAB C Woodard |
Expected enrollment: 24
BIOL-145-02 - Biological Sciences - 2007-2008
(Fall) Introductory Biology: A Green World
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
First-year seminar
This course examines the plant life in the woods and fields around us, the exotic plants in our greenhouses, and the plants we depend on for food. We will study plants living in surprising circumstances, settling into winter, escaping from gardens, reclaiming farmland, cooperating with fungi and insects, and fighting for their lives. We will find that plants challenge some conventional, animal-based assumptions about what matters to living things. In labs, students will seek to answer their questions about how plants grow in nature, by studying plant structure and function, ecology, and evolution.
Prerequisites: fy or permission of instructor
Notes: 3 meetings (50 minutes); 1 lab (3 hours)
Instructors: A. Frary
Section Instructors: 03 LAB A Frary | 04 LAB A Frary |
Expected enrollment: 24

BIOL-145-02 - Biological Sciences - 2007-2008
(Spring) Introductory Biology: Model Organisms
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
First-year seminar (Writing-intensive)
Organisms evolve elegant means of adapting to their environments. This course focuses on the ways that an organism’s anatomy and physiology are uniquely suited to the demands of its environment. The course is divided into topical modules that include communication, movement, zoology and diversity, evolution, cellular structure and function, reproduction, and neuroscience. The course provides a broad introduction to topics in biology, but special consideration is given to the physiology of model organisms commonly used in research.
Notes: 2 meetings (75 minutes), fourth hour, 1 lab (3 hours)
Instructors: J. Krans
Section Instructors: 03 LAB J Krans |
Expected enrollment: 12

BIOL-145-03 - Biological Sciences - 2007-2008
(Fall) Introductory Biology: Diversity of Life
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
We will survey the great diversity of life on earth from the archaeabacteria that live in hot sulfur springs to giant sequoia trees to singing birds. In our survey, we will discover a variety of life cycle patterns, different ways of extracting energy from the environment, and multiple life history strategies. Labs will explore biological diversity via collecting trips around campus as well as laboratory experiments and will introduce students to data collection, manipulation, and analysis.
Prerequisites: fy, soph only; jr, sr with permission of instructor
Notes: 4 meetings (50 minutes); 1 lab (3 hours)
Instructors: S. Barry
Section Instructors: 05 LAB S Barry | 06 LAB S Barry | 07 LAB S Barry |
Expected enrollment: 36

BIOL-145-04 - Biological Sciences - 2007-2008
(Fall) Introductory Biology: Organismal Biology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course encompasses a broad range of concepts central to our understanding of how organisms function and evolve. We will investigate important biological processes, such as photosynthesis and metabolism, and of systems, such as the cardiovascular and immune systems. We will also take a holistic view of biology and use our newly acquired knowledge to explore such diverse topics as: the evolution of infectious diseases, the consequences of development and design on the evolution of organisms, and how the physiology and behavior of animals might affect their responses to global climate change.
Notes: 4 meetings (50 minutes); 1 lab (3 hours)
Instructors: R. Brodie
Section Instructors: 08 LAB R Brodie | 09 LAB R Brodie | 10 LAB R Brodie |
Expected enrollment: 36

BIOL-145-04 - Biological Sciences - 2007-2008
(Spring) Introductory Biology: Animal Bodies, Animal Functions - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
First-year seminar (Writing-intensive)
How are animal bodies built to deal with living on earth? In this course we will study the function of cells, organs, and organ systems that have evolved to help animals make their way through the physical and chemical environment. We'll consider the common needs of animals--needs such as feeding, breathing, and reproducing--and the diverse solutions they have devised. A range of life, from unicellular organisms to animals with backbones (including mammals) will be considered.
Prerequisites: fy or permission of instructor
Instructors: S. Bacon
Section Instructors: 01 LAB S Bacon | 02 LAB S Bacon |
Expected enrollment: 24

BIOL-145-05 - Biological Sciences - 2007-2008

BIOL-145-05 - Biological Sciences - 2007-2008
(Spring) Introductory Biology: Patterns and Principles of Life - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
First-year seminar (Writing-intensive)
This course offers an introduction to the central concepts and patterns underlying much of modern biology, including the basic principles of cell biology, genetics, evolution, and energetics. We will examine several "model organisms," such as E. coli, baker's yeast, Arabidopsis, maize, the roundworm, and the mouse to see how and why experimental results in these systems can have such general importance and broad applicability.
Prerequisites: fy or permission of instructor
Instructors: J. Knight
Expected enrollment: 24

BIOL-150-01 - Biological Sciences - 2007-2008
(Fall) Introductory Biology: Form and Function - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
By exploring some of the basic structural and functional systems found in plants and animals, this course will examine assorted strategies that organisms have evolved to solve life's "major problems." Topics will include energy acquisition, water balance, transport systems, and movement. Labs will introduce students to selected plant and animal systems, data collection and analysis, library resources, and scientific writing.
Notes: A liberal arts introduction to biology, open to any student; required for potential majors in biology, biochemistry, and neuroscience and behavior
Instructors: R. Brodie, P. Gruber
Section Instructors: 01 LAB Staff | 02 LAB Staff | 03 LAB Staff | 04 LAB Staff | 05 LAB Staff |

BIOL-160-01 - Biological Sciences - 2007-2008
(Fall) Integrated Introduction to Biology and Chemistry
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This 8-credit course serves as a gateway to both the biology and chemistry core curricula. The course introduces and develops fundamental concepts in chemistry while also exploring the diverse range of strategies adopted by living systems to survive in different environments. This course prepares students for further study in chemistry (Chemistry 201) and/or biology (Biology 200). Students must register for both Biology 160 and Chemistry 160 as well as a single lab section (listed under Chemistry 160). Recommended for students interested in completing pre-health requirements or advanced study in biochemistry or neuroscience.
Notes: Students must enroll in Biology 160 and Chemistry 160 for a total of 8 credits; 3 lectures (50 minutes), and 1 lab (4 hours) per week.
Instructors: S. Decatur, G. Gillis
Expected enrollment: 60

BIOL-164-01 - Biological Sciences - 2007-2008
(January) Ethnobotany
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
This course will focus on the study of medicinal plants and on the process of discovering new natural products from plants using an ethnobotanical approach. Students will be given extended information about world ethnobotanical traditions. They will learn about plant taxonomy, plant geography, chemistry of medicinal plants, and methods for the isolations of active constituents. In addition, problems of conservation ecology of the rainforests and endangered plant species will be discussed.
Notes: Two meetings (75 minutes)
Instructors: N. Mamedov
Expected enrollment: 25

BIOL-200-01 - Biological Sciences - 2007-2008
(Spring) Introductory Biology II: How Organisms Develop
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
An overview of cells to tissues to organisms. Cellular components, the role of the nucleus, cell reproduction, and meiosis will be examined as part of our study of gamete production, fertilization, embryology, and development in an invertebrate (sea urchins), a vertebrate (chick), a fern, and a flowering plant. The basic molecular biology of DNA, RNA, and protein synthesis will be presented and examined in the context of building a fly embryo and a flower.
Prerequisites: Biological Sciences 145 or 150
Notes: 4 meetings (50 minutes), 1 lab (3 hours)

(Spring) Local Flora
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Offers plant identification and natural history, emphasizing trees, native and introduced, and wildflowers. On- and off-campus field trips.
Prerequisites: 4 credits in department or permission of instructor
Notes: 1 meeting (3 hours), with field trips
Instructors: A. Frary
Expected enrollment: 15

BIOL-210-01 - Biological Sciences - 2007-2008
(Fall) Genetics and Molecular Biology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
A comprehensive study of the fundamental principles of classical and molecular genetics. Major topics include transmission genetics, gene linkage and mapping, molecular approaches to genetic analysis, genetic engineering, gene therapy, developmental genetics, quantitative inheritance.
Prerequisites: Biological Sciences 200
Notes: 4 meetings (50 minutes), 1 lab (3 hours). Chemistry 101 must be taken prior to or as a corequisite to this course.
Instructors: J. Knight, C. Woodard
Section Instructors: 01 LAB J Knight | 02 LAB J Knight | 03 LAB J Knight | 04 LAB J Knight | 05 LAB J Knight |

BIOL-220-01 - Biological Sciences - 2007-2008
(Spring) Cell Biology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course undertakes an integrated study of the processes and structures that define life at the cellular level. We will consider the molecular and supramolecular organization of membranes, cytoskeleton, and organelles in the context of the physical and chemical principles governing their assembly, and their participation in phenomena such as the capture and transformation of energy, catalysis, transport, motility, signal transduction, and maintenance of cytoplasmic organization. The laboratory portion of this course illustrates and analyzes these phenomena through selected optical and biochemical approaches.
Prerequisites: Biological Sciences 200, Chemistry 201
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes), 1 lab (3 hours)
Instructors: O. Quintero, A. Springer
Section Instructors: 01 LAB The department | 02 LAB The department | 03 LAB The department | 04 LAB The department |

**BIOL-223-01** - Biological Sciences - 2007-2008

*(Fall) Ecology*

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

Preamble (for topics courses): Biol. 223 and/or Biol. 226 must be taken for the Biology major.

This course will cover the fundamental factors controlling the distribution and abundance of organisms, including interactions with the abiotic environment, fitness and natural selection, population growth and dynamics, species interactions, community dynamics, and diversity. We will address variation across space and time. The course will combine observational, experimental, and mathematical approaches to some of the applications of ecological theory, including conservation, disease dynamics, and biological control.

Prerequisites: Biology 150 or Environmental Studies 100 and a minimum of one semester of high school or college calculus or statistics

Notes: 3 meetings, plus 4th hour, 1 lab (3 hours)

Instructors: B. Hooker

Section Instructors: 01 LAB B Hooker | 02 LAB B Hooker | 03 LAB B Hooker | 04 LAB B Hooker |

Expected enrollment: 40

*(January) The Structure of Memory*

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

Neuroscientists and psychologists have made great strides in the understanding of human memory in the past few years. It is now possible to get a fairly good basic understanding of how different kinds of memory systems work. Through daily class meetings, assignments, games, and exercises, this course will provide information about the several different memory systems that reside in your brain. You may not end up with a better memory, but you will at least understand why you forget.

Notes: Monday - Thursday (75 minutes)

Instructors: C. Smith

Expected enrollment: 40

**BIOL-226-01** - Biological Sciences - 2007-2008

*(Spring) Evolution*

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

The mechanisms of evolutionary change within populations and between species; patterns of change in space, time and form; and the origin of adaptations. These approaches make sense of the diversity of life; then we turn to the evolution of developmental pathways, as a way of approaching the unity of life.

Prerequisites: Biology 210 or 223

Notes: 3 meetings (50 minutes), 1 lab (3 hours); seniors may only take lab on Friday; sophomores and juniors on either Tuesday, Wednesday or Thursday only

Instructors: S. Rachootin

Section Instructors: 01 LAB S Rachootin | 02 LAB S Rachootin | 03 LAB S Rachootin | 04 LAB S Rachootin |

*(Fall) Independent Study*

Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.

Prerequisites: soph, permission of instructor

Notes: Any student conducting an independent laboratory research project for course credit in a department, program, or laboratory covered by the College's chemical hygiene plan must participate in a safety training session before beginning research. Course credit will not be granted to students who do not receive safety training. See department for requirements.

**BIOL-301-01** - Biological Sciences - 2007-2008
Animal Cloning and Stem Cells: Past, Present, and Future

Developmental biologists have been cloning organisms for decades - so why was the world surprised by the birth of Dolly? This course will look at the current state of mammalian cloning and the debate about human stem cell research, reading from primary literature. We will also discuss the legal, ethical, and moral implications of human cloning and stem cell research, and each member of the class will participate in a staged debate on these issues for an introductory biology class. Pending funding, we may travel to attend a session of the President's Council on Bioethics, and/or attend a conference on stem cell biology in Connecticut.

Prerequisites: per instructor only; email rfink
Notes: one meeting (110 minutes)
Instructors: R. Fink
Expected enrollment: 12

BIOL-303-01 - Biological Sciences - 2007-2008  
(Fall) Microbial Genetics - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Studies at the molecular level of various aspects of genetics, as expressed in bacterial and viral systems. Topics include patterns and mechanisms of replication, recombination, repair, and mutation of DNA; regulation of gene activity; gene-protein relationships; and genetic engineering.
Prerequisites: Biological Sciences 210 and 220
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: J. Knight
Section Instructors: 01 LAB J Knight |
Expected enrollment: 14

BIOL-305-01 - Biological Sciences - 2007-2008  
(Fall) Cellular and Molecular Aspects of Development

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Speaking-intensive)
Examines the roles of cellular movement and cellular interaction in the development of multicellular organisms. Topics include cell recognition and adhesion during morphogenesis, the importance of extracellular matrices, and current theories of embryonic pattern formation. Self-designed laboratories include techniques such as microsurgery and time-lapse video microscopy using a wide variety of embryos and cell types.
Prerequisites: Biological Sciences 200, 210, and 220, or permission of instructor
Notes: 3 meetings (50 minutes), 1 lab (3 hours)
Instructors: R. Fink
Section Instructors: 01 LAB R Fink | 02 LAB R Fink |
Expected enrollment: 14

BIOL-308-01 - Biological Sciences - 2007-2008  
(Spring) Darwin

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Writing-intensive; History 361s (02))
This course looks at the scientific content and intellectual context of Darwin’s theory of evolution - his facts, metaphors, hypotheses, and philosophical assumptions. Readings from Darwin and his sources, and examination of the organisms he studied. A background in eighteenth- and nineteenth-century history or whole organism biology is recommended.
Prerequisite: Biological Sciences 223 or 226 or 4 credits in history
Notes: 2 meetings (75 minutes), plus one 4th hour meeting
Instructors: S. Rachootin
Expected enrollment: 20

BIOL-309-01 - Biological Sciences - 2007-2008  
(Spring) Vertebrate Biology - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
A study of vertebrates with emphasis on structural adaptations for functions such as feeding and locomotion, and on natural history. Some morphology and field identification involved in laboratory work.
Prerequisites: two of Biological Sciences 200, 210, 213
Notes: 3 meetings (50 minutes), 1 lab (3 hours)
Section Instructors: 01 LAB |

BIOL-310-01 - Biological Sciences - 2007-2008
**Fall Invertebrate Zoology**

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course looks at the evolutionary relations of the profoundly different groups of animals in light of their structure, development, and fossil history. Emphasizes exceptional organisms that prove - and disprove - biological rules. Themes include coloniality, asexual reproduction, metamorphosis, and making skeletons.

Prerequisites: Biological Sciences 226

Notes: 3 meetings (50 minutes), 1 lab (3 hours)

Instructors: S. Rachootin

Section Instructors: 01 LAB S Rachootin

Expected enrollment: 12

**BIOL-311-01 - Biological Sciences - 2007-2008**

**Fall Protein Biochemistry and Cellular Metabolism**

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

(Biochemistry 311f; Chemistry 311f)

Prerequisites: Biol. 210, chem 302

Instructors: L. Hsu

Section Instructors: 01 LAB Staff | 02 LAB Staff

Expected enrollment: 40

**(Spring) Nucleic Acids Biochemistry and Molecular Biology**

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

(Biochemistry 314f; Chemistry 314f)

This course is an in-depth examination of DNA and RNA structures and how these structures support their respective functions during replication, transcription, and translation of the genetic material. Emphasis is on the detailed mechanisms associated with each step of gene expression. Discussions incorporate many recent advances brought about by recombinant DNA technology.

Prerequisites: Biological Sciences 210, Chemistry 302, Biochemistry 311, or permission of instructor

Notes: Please sign up for this course as Biochemistry 314

Instructors: L. Hsu

Section Instructors: 01 LAB The department | 02 LAB The department

Expected enrollment: 40

**BIOL-315-01 - Biological Sciences - 2007-2008**

**(Spring) Ethology**

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

(Writing-intensive)

In this course, students learn to view and understand animal behavior within an evolutionary context. The mechanistic side of behavior is investigated and students explore how behavioral traits originate and evolve over time. Students will integrate their knowledge of how organisms work with an appreciation of why they work the way they do. At the end of the course, students will understand basic concepts in behavioral biology and know many of the experiments that have facilitated our understanding of this field. They will be able to construct hypotheses and design experiments that address behavioral phenomena. The laboratory portion of this course is based on individual projects.

Prerequisites: 8 credits of biology at the 200 level with 223 or 226 strongly recommended

Notes: 2 meetings (75 minutes) plus one 4th hour, 1 lab (3 hours)

Instructors: R. Brodie

Section Instructors: 01 LAB R Brodie | 02 LAB R Brodie

**BIOL-316-01 - Biological Sciences - 2007-2008**

**(Fall) Scanning Electron Microscopy**

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

(Geology 316f)

Includes theory and operation of the scanning electron microscope and preparation of biological and geological materials for observation. The versatile use of the microscope will be emphasized and will include low magnification, high resolution, and back scattered (reflected) electron modes of operation as well as operation at different pressures. Energy dispersive X-ray microanalysis will be introduced.

Prerequisites: 4 credits of biological sciences or geology course at the 200 level.

Notes: 1 meeting (2 hours), 1 lab (3 hours)

Instructors: P. Gruber, M. Rice

Section Instructors: 01 LAB M Rice

Expected enrollment: 10
BIOL-316-01 - Biological Sciences - 2007-2008
(Spring) Scanning Electron Microscopy
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Geology 316s)
Theory and operation of the scanning electron microscope and X-ray microanalysis (EDS). The course will have a new format this semester. We will meet all day for three Saturdays at the beginning of the semester; the remainder of the semester will be devoted to individual projects. The Saturday meetings will include lectures and workshops and will introduce all aspects of scanning electron microscopy.
Prerequisites: 4 credits of biological sciences or geology course at the 200 level.
Notes: 3 meetings on Saturdays Feb. 9th, 16th & 23rd (10-noon & 1-4:30); preference will be given to seniors
Instructors: O. Quintero, M. Rice
Expected enrollment: 8

BIOL-319-01 - Biological Sciences - 2007-2008
(Fall) Immunology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course will cover the cells, organs, and biochemical signals that constitute the immune system, as well as immune mechanisms for the identification and removal of foreign pathogens. Additional topics may include: autoimmunity, allergy, vaccination, transplantation, immune deficiency, and pathogen evasion strategies. Special emphasis will be placed on the human immune response, with the addition of clinical case studies and independent laboratory projects to reinforce these ideas.
Prerequisites: Biological Sciences 210 and 220
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes), 1 lab (4 hours)
Instructors: R. Herlands
Section Instructors: 01 LAB R Herlands | 02 LAB R Herlands |
Expected enrollment: 30

BIOL-320-01 - Biological Sciences - 2007-2008
(Fall) Studies with the Electron Microscope
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Introduction to the transmission electron microscope and its potential contributions to the biological sciences, through semester-long investigations of students' choosing. Projects may range from the molecular to the cellular/organismal levels and draw upon a variety of preparation techniques. Students wishing to extend their experience in other courses, including Biological Sciences 295 and 395, may enroll in this course concurrently.
Prerequisites: Biological Sciences 220 or permission of instructor
Notes: 1 meeting (2 hours), 1 unarranged lab (2 hours)
Instructors: P. Gruber
Section Instructors: 01 LAB P Gruber |
Expected enrollment: 10

BIOL-321-01 - Biological Sciences - 2007-2008
(Fall) Conference Course: Extreme Life
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individual.
This course will focus on biological systems that push the limits of structural and physiological possibility. For example, midges flap their wings at up to 1000 Hz; bar-headed geese migrate over Mount Everest; deep-sea fish withstand pressures near 300 atmospheres; certain frogs can allow their body temperatures to drop below 0 degrees C. We will explore the diverse mechanisms that underlie how organisms reach extreme levels of performance and survive in extreme environments through readings and discussions.
Prerequisites: jr, sr or permission of instructor
Notes: One meeting (2 hours)
Instructors: G. Gillis
Expected enrollment: 12

BIOL-321-01 - Biological Sciences - 2007-2008
(Spring) Conference Course: Careers in Biotechnology
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individual.
This course will explore career opportunities in the biotechnology industry. We will cover a range of research areas such as pharmaceuticals, immunology, or environmental biology. Other topics include some basics on structure and funding of companies and kinds of opportunities that exist for scientists with bachelor's or graduate degrees. We will hear about current research in local companies from guest speakers.
Prerequisites: Biological Sciences 210; Biological Sciences 220 and 319 recommended but not required
BIOL-321-02 - Biological Sciences - 2007-2008
(Fall) Conference Course: Cytoskeleton and Cell Motility
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individual.
An exploration of the prokaryotic and eukaryotic cytoskeleton with a particular focus on protein filaments and motors involved in a number of cellular processes, including intracellular transport, cell motility, and chromosomal segregation. The course will include explorations into current research in the cytoskeleton via extensive use of the primary literature and review articles.
Prerequisites: jr, sr or permission of instructor
Notes: 3 meetings (50 minutes)
Instructors: O. Quintero
Expected enrollment: 20

BIOL-321-03 - Biological Sciences - 2007-2008
(Spring) Conference Course: The Neurobiology of Art and Music
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individual.
Art and music are a part of all human cultures. Is there something about the human brain that drives us to paint and sing? We will examine how the brain simultaneously processes different aspects of a visual object, such as shape, color, and depth, and ask how this processing may affect the way we draw and paint. We will ask whether musical dissonance and consonance are biologically or culturally determined and whether or not different parts of the brain process different aspects of music such as pitch, melody, harmony, rhythm, and the emotional content of a musical piece.
Prerequisites: jr or sr with at least 8 credits at the 200 level in biology, neuroscience and behavior, studio art, art history, or music
Instructors: S. Barry
Expected enrollment: 10

BIOL-321-04 - Biological Sciences - 2007-2008
(Spring) Conference Course: Computational Techniques in Biology
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individual.
We will explore how mathematics can be used to better understand the remarkable abilities of uniquely evolved organisms (e.g., jumping spider seismic signaling, mammalian cochlea, the sounds of cricket courtship, sensitivity and coding by insect cerci). An appreciation for quantitative concepts is important, but neither mathematical expertise nor prerequisite course work is required. Principles will be introduced in the context of behavior and physiology. The course will involve loosely equal components of discussion and lecture.
Instructors: J. Krans
Expected enrollment: 10

BIOL-321-05 - Biological Sciences - 2007-2008
(Spring) Conference Course: Sustainable Agriculture and Agroecosytems
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individual.
This interdisciplinary science course examines agricultural ecosystems through the study of nutrient cycling, soil processes, hydrology, and plant ecology. The course focuses on reading the primary scientific literature regarding issues of nutrient management, environmental impacts of agricultural practices on adjacent ecosystems, and contributions of agricultural systems to global climate change. Conventional, low-input, and organic agricultural practices are analyzed from the standpoint of environmental impacts. Field trips explore the application of agronomic practices in organic and low-input production systems, with an emphasis on local approaches to sustainable agriculture.
Prerequisites: at least 8 credits of biology, chemistry, or environmental science, or permission of instructor
Notes: 2 meetings (75 minutes) and 1 lab
Instructors: B. Hooker
Section Instructors: 01 LAB B Hooker | 02 LAB B Hooker |
Expected enrollment: 20

BIOL-321-06 - Biological Sciences - 2007-2008
(Spring) Conference Course: Marine Conservation Biology
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Speaking- and writing-intensive)
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small
groups or by individual.
This seminar course will be based entirely on published research related to issues in marine conservation biology. It will focus primarily on the most
recent data on global climate change, but the course will also address other topics such as waste disposal, the management of fisheries, and invasive
species. A semesterlong group project will be conducted by the class, in which students will research and defend a stakeholder's position in a current
environmental affair, submit a position paper, and engage in a debate near the end of the semester. Students taking this course will have in-depth, up-
to-date knowledge of the research that informs our understanding of global environmental change.
Prerequisites: Biological Sciences 223 or 226
Notes: 1 meeting (110 minutes)
Instructors: R. Brodie
Expected enrollment: 15

BIOL-322-01 - Biological Sciences - 2007-2008
(Spring) Comparative Biomechanics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
The main objective of this course is to explore organismal structure and function via an examination of the basic physical principles that guide how
living things are constructed and how organisms interact with their environment. We will use the combined approaches of the biologist and engineer
to study the impact of size on biological systems, address the implications of solid and fluid mechanics for animal design, survey different modes of
animal locomotion, and learn how biologists working in diverse areas (e.g., ecology, development, evolution, and physiology) gain insight through
biomechanical analyses.
Prerequisites: any two courses above Biology 200 or permission of instructor.
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: G. Gillis
Section Instructors: 01 LAB G Gillis | 02 LAB G Gillis |
Expected enrollment: 18

BIOL-323-01 - Biological Sciences - 2007-2008
(Fall) Plant Growth and Development - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is a study of the higher plant, its structure, organization, and development. Examines both endogenous and environmental factors
influencing plant growth and reproduction. Topics include anatomy, hormones and their mode of action, tropisms, photomorphogenesis, and
flowering.
Prerequisites: Biology 150, 200, 210 or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: A. Frary
Section Instructors: 01 LAB A Frary |
Expected enrollment: 24

BIOL-325-01 - Biological Sciences - 2007-2008
(Fall) Plant Diversity and Evolution
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course explores the tremendous diversity of the plant kingdom, emphasizing the local flora. Evolutionary relationships are discussed on the basis
of comparisons of reproductive biology, morphology, anatomy, cell structure, and molecular biology.
Prerequisites: two of Biological Sciences 200, 210, 223 or 226, or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours); offered alternate years
Instructors: A. Frary
Section Instructors: 01 LAB A Frary |
Expected enrollment: 14

BIOL-327-01 - Biological Sciences - 2007-2008
(Spring) Microbiology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is a general study of microorganisms and their activities, including form and structure; biochemical processes of growth, metabolism, and
energy storage; distribution in nature and relationships to other organisms; cycles of matter; beneficial and detrimental effects on humans; and physical
and chemical effects microorganisms make in their environment.
Prerequisites: Biological Sciences 220 and either 210 or 223
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: R. Herlands
Section Instructors: 01 LAB R Herlands | 02 LAB R Herlands |

(Fall) Regulatory and Integrative Human Physiology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
A consideration of the physiological processes involved in the control of human body functions. We will study the mechanisms for regulating individual organ systems and how these mechanisms respond to changing needs of the individual. Our examination of the physiological controls will include an analysis of the underlying cellular and molecular processes that drive the mechanisms and integrate the activities of the different systems.
Prerequisites: Biological Sciences 220 or Biochemistry 311
Instructors: S. Bacon
Section Instructors: 01 LAB S Bacon | 02 LAB S Bacon |
Expected enrollment: 24

BIOL-328-01 - Biological Sciences - 2007-2008
(Spring) Regulatory and Integrative Human Physiology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
We will investigate the fundamental processes by which human body systems function, and how they can be modified to enable the individual to live in a changing environment. We will pay particular attention to how different body systems are integrated with one another, and to the cellular and molecular mechanisms which make this functional integration possible.
Prerequisites: Biological Sciences 220 or Biochemistry 311
Instructors: S. Bacon
Section Instructors: 01 LAB S Bacon | 02 LAB S Bacon |
Expected enrollment: 24

BIOL-331-01 - Biological Sciences - 2007-2008
(Spring) Theory and Application of Conservation Biology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course focuses on advanced ecological theory applied to conservation. Class will combine lectures and discussions of primary scientific literature. Labs will include field trips to collect observational and experimental data and indoor exercises to explore the concepts of rarity, coexistence, and population viability with mathematical models. A community based learning aspect is possible for the final project in this class.
Prerequisites: Biology 223 or 226 or Environmental Studies 200
Notes: 3 meetings (50 minutes), 1 lab (3 hours)
Instructors: M. Hoopes
Section Instructors: 01 LAB M Hoopes | 02 LAB M Hoopes |
Expected enrollment: 20

BIOL-332-01 - Biological Sciences - 2007-2008
(Fall) Macroevolution - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course presents the science of biological form and its relation to adaptation, development, and the modes of evolutionary change. Whole organisms are emphasized in the first part of the course; the emerging field of evo-devo is the emphasis of the second part.
Prerequisites: Biological Sciences 213 or 226
Notes: 2 meetings (75 minutes)
Instructors: S. Rachootin
Expected enrollment: 15

BIOL-333-01 - Biological Sciences - 2007-2008
(Spring) Neurobiology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
We will study the electrical and chemical signals underlying the generation of the nerve impulse and synaptic transmission. We will then explore neuronal circuits underlying learning and memory, movement, and sensory perception.
Prerequisites: Biological Sciences 200, 220 and 4 credits in chemistry or physics
Notes: 2 meetings (75 minutes) and 1 lab (3 hours); preference given to seniors
Instructors: S. Barry
Section Instructors: 01 LAB S Barry | 02 LAB S Barry |
Expected enrollment: 20

BIOL-335-01 - Biological Sciences - 2007-2008
(Spring) Mammalian Anatomy
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course will examine the fundamental structural organization of the mammalian body. The lecture portion of the class will focus largely on humans, and students will gain practical insight into other mammalian systems in the laboratory.
Prerequisites: any two courses above Biological Sciences 200
Notes: 3 meetings (50 minutes); 1 lab (3 hours); course open to 12 juniors and 12 seniors
Instructors: G. Gillis
Section Instructors: 01 LAB B Taft | 02 LAB B Taft |
Expected enrollment: 24

BIOL-340-01 - Biological Sciences - 2007-2008
(Spring) Eukaryotic Molecular Genetics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
In this course we will examine the role of molecular genetic analysis in the study of phenomena such as human disease (e.g., breast cancer), animal development, and gene regulation. We will also study genetic engineering of plants and animals. There will be group discussions of original research articles and review articles, and we will sometimes use a case method approach.
Prerequisites: Biological Sciences 200 and 210
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: C. Woodard
Section Instructors: 01 LAB C Woodard | 02 LAB C Woodard |
Expected enrollment: 24

BIOL-344-01 - Biological Sciences - 2007-2008
(Spring) Biogeochemistry of Northern Ecosystems
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking- and writing-intensive; Environmental Studies 344s)
Global climate models and recent evidence show that ecosystems in the northern latitudes are extremely sensitive to climate change. This interdisciplinary science course examines boreal, subarctic, and arctic ecosystems through the study of nutrient cycling, plant ecology, hydrology, soil processes, and biosphere-atmosphere interactions. Topics include fundamentals of biogeochemical elements such as carbon and nitrogen at scales from the microscopic to global, sensitivity, feedbacks to climate change, and disturbance processes such as fire and permafrost degradation.
Prerequisites: At least two semesters of biology, chemistry, or environmental science, and permission of the instructor
Notes: 1 meeting (3 hours). Please sign up for this course as Environmental Studies 344

CHEM-100-01 - Chemistry - 2007-2008
(Fall) Problem Solving in General Chemistry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is designed to introduce chemistry to students who have had difficulty with quantitative problem solving. The syllabus will follow closely that of Chemistry 101, and students will participate in the 101 laboratory. Chemistry 100 differs from 101 not in content, but in format: through a small enrollment and five weekly course meetings rather than three, the course emphasizes intensive, faculty-supervised group work and the development of quantitative problem-solving skills. Chemistry 100 serves equally with 101 as an introduction to the department's core sequence. Students should also enroll in a lab section of Chemistry 101.
Notes: 5 meetings (50 minutes), 1 lab (3 hours)
Instructors: D. Cotter
Expected enrollment: 20

**CHEM-101-01 - Chemistry - 2007-2008**

*(Fall) General Chemistry I*

**Credits/PE Units:** 4; **Requirements met:** Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course provides introduction and development of fundamental concepts including stoichiometry, reactions in aqueous solutions, thermochemistry, atomic structure, chemical bonding, and acid-base reactions. The laboratory emphasizes basic skills, quantitative chemical measurements, and principles discussed in lectures.

**Notes:** 3 meetings (75 minutes), 1 lab (3 hours)

*(Fall) Chemistry: Applications, Innovations, and Social Justice*

**Credits/PE Units:** 4; **Requirements met:** Meets Science and Math II-C: Natural and physical sciences without lab requirement

First-year seminar (Speaking- and writing-intensive)

The interactions of light, energy, and matter will be explored as they relate to various instrumental methods and applications. In forensic science, what is the chemistry used in identification? How does chemistry shed light on the use of DNA as an identification tool? Does chemistry directly support the health claims of organic foods? What does the chemistry of the nuclear reactor spill at Chernobyl tell us about the wisdom of producing new nuclear reactors? Guest speakers and readings will complement course assignments. The course will introduce students to problem solving as well as scientific writing.

**Prerequisites:** fy or permission of instructor

**Notes:** There is no lab component to this course. 2 meetings (75 minutes)

**Instructors:** C. Allen

**Expected enrollment:** 16

**CHEM-105-02 - Chemistry - 2007-2008**

*(Fall) Gods and Monsters: Science and Scientists in the Modern World*

**Credits/PE Units:** 4; **Requirements met:** Does not meet a distribution requirement.

First-year seminar

Since the emergence of recognizable scientific communities in early modern Europe, Western culture has been increasingly marked by scientific activities and products. Science and technology have evoked a broad range of intellectual and emotional responses from scientists and the public alike: hope, expectation, fear, dread. We will examine the history of modern science from the seventeenth century to the present, paying special attention to literary and popular responses to this new and powerful social force. Texts will include works by historians and other scholars of science, writings of significant scientists from various periods, and a selection of novels, stories, and films.

**Prerequisites:** fy or permission of instructor

**Notes:** 2 meetings (105 minutes)

**Instructors:** D. Cotter

**Expected enrollment:** 16

**CHEM-201-01 - Chemistry - 2007-2008**

*(Spring) General Chemistry II*

**Credits/PE Units:** 4; **Requirements met:** Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course provides background in basic principles of physical, analytical, and inorganic chemistry essential to the study of all chemical phenomena. Topics include elementary principles of molecular electronic structure, quantitative treatment of chemical equilibrium with applications to solubility, acid-base, and electron transfer reactions, introduction to chemical kinetics and thermodynamics, and the chemistry of coordination compounds. Laboratory experiments will include classical analytical and kinetic techniques, preparation of inorganic compounds, and an introduction to ab initio electronic structure calculations.
Prerequisites: Chemistry 100 or 101 with grade of C or better, or permission of instructor

CHEM-202-01 - Chemistry - 2007-2008
(Fall) Organic Chemistry I
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Introduces organic chemistry, emphasizing the principles governing broad classes of reactions. Topics include stereochemistry, nucleophilic substitution and elimination reactions, the chemistry of alkanes, alkenes, alkynes, alcohols, and ethers, and an introduction to infrared and nuclear magnetic resonance spectroscopy. Laboratory work includes synthesis, practice in the techniques of distillation, crystallization, chromatography, molecular modeling, and identifying unknown organic compounds by chemical and spectroscopic means.
Prerequisites: Chemistry 100 or 101, 200 or 201 with grade of C or better, or permission of instructor

CHEM-210-01 - Chemistry - 2007-2008
(Spring) Biotechnology: Science, Culture, and Ethics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
The development of a molecular understanding of the basis of life, and the application of this knowledge to alter and engineer living organisms, is an ongoing scientific revolution with far-reaching social and ethical considerations. This course introduces the science of the biotechnology revolution within its historical and social context; a description of the fundamental chemistry and molecular biology underlying these technologies is integrated with exploration of their social and ethical impacts. Topics to be covered include the structure of DNA, the human genome project, genetic engineering in agriculture, and cloning.
Prerequisites: Chemistry 100 or 101, Biological Sciences 151, or Interdepartmental Courses 121-122, or permission of instructor
Notes: offered every other year
Instructors: S. Decatur
CHEM-212-01 - Chemistry - 2007-2008
(Fall) Chemistry of Biomolecules
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
An examination of the major ideas of biochemistry from the point of view of the chemical sciences rather than the life sciences. Structures of important biomolecules. The role of energetics and reaction dynamics in biochemical processes. Major metabolic pathways are considered, including those of proteins, carbohydrates, lipids, and nucleic acids. This course is not intended for Biochemistry majors, who must complete Biochemistry 311f and 314s. First priority will be given to sophomores and juniors.
Prerequisites: Chemistry 202
Notes: 4 meetings (50 minutes)
Instructors: M. Nunez
Expected enrollment: 25

CHEM-220-01 - Chemistry - 2007-2008
(Fall) Simulating Chemistry, Biochemistry, and Materials Science: An Introduction to Scientific Computing - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
From the very early days of computers, they have been used in atomic simulations. Today, there are many algorithms for simulating chemical events. Simulations allow us to gain insight into possible causes of physical phenomena. This course introduces some of the methods used to simulate chemistry, biochemistry, and materials science. Potential energy surfaces, Monte Carlo methods, and molecular dynamics are introduced and applied to projects in chemistry, biochemistry, and materials science.
Prerequisites: Mathematics 202 (or equivalent), or permission of the instructor
Instructors: M. Gomez
Expected enrollment: 15

(Fall) Global Biogeochemistry
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
This course will examine the chemistry of the surface of the Earth. Our planet is basically a closed system, and chemical cycles of certain elements are driven by biological and geological processes which, in turn, determine the distribution and nature of life on Earth. We will study the chemistry of the atmosphere, soils, rivers, and oceans and look at how these systems are connected via the global nitrogen, phosphorus, and carbon cycles. We will especially focus on the carbon cycle and examine how humans have altered the distribution of this central element. Lecture sessions will be complemented by reading-based discussions.
Prerequisites: Chemistry 101, Chemistry 201 recommended
Notes: 3 meetings (50 minutes)
Instructors: A. Dickens
Expected enrollment: 25

CHEM-250-01 - Chemistry - 2007-2008
(Spring) Introduction to the History of Chemistry
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Writing-intensive)
Traces the growth of chemistry in several ways: as a body of knowledge and beliefs, as a practical means of intervention, and as a community of practitioners linked (or divided) by sociopolitical bonds and common interests, intellectual and otherwise. After an overview of chemical history and an introduction to various scholarly traditions in the field, the balance of the course will be devoted to case studies of narrower topics or episodes, such as the alchemical tradition and Robert Boyle, the eighteenth-century Chemical Revolution, nineteenth-century organic chemistry, Ionism, atomism and elementalism, chemistry and war, the quantum revolution, educational traditions, the role of women.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: D. Cotter
Expected enrollment: 25

CHEM-295-01 - Chemistry - 2007-2008
(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Independent work in chemistry can be conducted with any member of the department.
Prerequisites: soph, permission of department required every semester
Notes: Note: Students conducting an independent laboratory research project for course credit in a department, program, or laboratory covered by the College's chemical hygiene plan must participate in a safety training session before beginning research. Course credit will not be granted to students who do not receive safety training
Instructors: The department
CHEM-295-01 - Chemistry - 2007-2008

(Spring) Independent Study

Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Independent work in chemistry can be conducted with any member of the department.
Prerequisites: Soph, permission of department required every semester.
Notes: Note: Students conducting an independent laboratory research project for course credit in a department, program, or laboratory covered by the College's chemical hygiene plan must participate in a safety training session before beginning research. Course credit will not be granted to students who do not receive safety training.
Instructors: The department.

CHEM-302-01 - Chemistry - 2007-2008

(Spring) Organic Chemistry II

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement.
A continuation of Chemistry 202 that addresses the chemistry of aromatic compounds, the carbonyl group, and a number of other functional groups. Examples drawn from compounds of biochemical interest. The laboratory includes organic synthesis and the identification of unknown compounds by chemical and spectroscopic means.
Prerequisites: Chemistry 202 with grade of C or better.
Notes: 3 lectures (75 minutes), 1 lab (4 hours).
Instructors: S. Browne.

CHEM-308-01 - Chemistry - 2007-2008

(Fall) Chemical Thermodynamics

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement.
A consideration of the contribution of thermodynamics to the understanding of the "driving forces" for physical chemical changes and the nature of the equilibrium state.
Prerequisites: Chemistry 200 or 201, Chemistry 202, Mathematics 101, Physics 103 and 204, or 115 with grade of C or better.
Notes: 3 meetings (75 minutes), 1 lab (4 hours).

Expected enrollment: 36

CHEM-311-01 - Chemistry - 2007-2008

(Fall) Protein Biochemistry and Cellular Metabolism

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement.
(Biochemistry 311f; Biological Sciences 311f)
Instructors: L. Hsu.
Section Instructors: 01 LAB L Hsu | 02 LAB L Hsu |

CHEM-314-01 - Chemistry - 2007-2008

(Spring) Nucleic Acids Biochemistry and Molecular Biology

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement.
(Biochemistry 314s; Biological Sciences 314s)
CHEM-315-01 - Chemistry - 2007-2008  
(Spring) Experimental Methods  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
Uses extended research-style projects to introduce advanced techniques in physical measurement (e.g., high-resolution spectroscopy, calorimetry, electrochemistry), separation and analysis (e.g., gas- and liquid-phase chromatography, mass spectrometry), and chemical synthesis (e.g., catalytic and enantioselective methods, biomolecules, polymers). Students will increase their repertoire of laboratory skills while learning to integrate concepts from different subdisciplines of chemistry into a unified experimental approach to problem solving.  
Prerequisites: Chemistry 302, 2 lectures (75 minutes), 1 discussion (50 minutes), 1 lab (4 hours)  
Instructors: A. Dickens  
Expected enrollment: 20

CHEM-317-01 - Chemistry - 2007-2008  
(Spring) Principles of Polymer Chemistry  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
An introduction to the study of molecules of high molecular weights with emphasis on synthetic rather than naturally occurring polymers. Topics include polymerization, structures, molecular weight determination, molecular weight distribution, chain configurations, rubber elasticity, and thermodynamics and statistical mechanics of polymer solutions.  
Prerequisites: Chemistry 302  
Notes: 2 meetings (75 minutes); 1 discussion (50 minutes); offered once every three years  
Instructors: W. Chen

CHEM-325-01 - Chemistry - 2007-2008  
(Spring) Atomic and Molecular Structure  
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement  
This course is an introduction to experimental and theoretical approaches to the determination of the structure of atoms, molecules, and chemical bonds. Classroom work provides background in the theory of atomic and molecular structure and an introduction to quantum mechanics and spectroscopy.  
Prerequisites: Chemistry 200 or 201, 202, Mathematics 202, Physics 216 with grade of C or better  
Notes: 2 meetings (75 minutes), 1 discussion (50 minutes), 1 lab (4 hours)  
Instructors: M. Gomez  
Expected enrollment: 36

CHEM-333-01 - Chemistry - 2007-2008  
(Fall) Protein Structure and Function - *Not offered this year/term  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
This course introduces the subject of how the three-dimensional molecular structures of proteins determine and modulate their function. Topics will include fundamentals of protein chemistry and structure, comparisons of various structural motifs, and a survey of a wide range of protein functions. Examples will be drawn from the current literature on enzyme mechanisms, photosynthetic systems, motor proteins, ion channels, and topics of student interest.  
Prerequisites: Chemistry 302  
Notes: 2 meetings (75 minutes), 1 discussion (50 minutes); offered every other year  
Instructors: M. Nunez

CHEM-334-01 - Chemistry - 2007-2008  
(Spring) Advanced Inorganic Chemistry  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
The implications of molecular symmetry as expressed in the language of group theory are explored in some depth. Group theory provides the context for a discussion of the structural and spectroscopic properties of inorganic compounds, particularly those of the transition metals.  
Prerequisites: Permission of Instructor required  
Notes: 2 meetings (75 minutes), 1 discussion (50 minutes); offered every other year  
Instructors: D. Cotter  
Expected enrollment: 6
CHEM-336-01 - Chemistry - 2007-2008
(Spring) Organic Synthesis - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course emphasizes recent developments in synthetic organic chemistry and deals with general synthetic methods and specific examples of natural product synthesis. It covers such topics as new methods of oxidation and reduction, stereospecific olefin formation, ring-forming reactions, and methods of carbon-carbon bond formation. The application of these reactions to the synthesis of naturally occurring compounds is examined.
Prerequisites: Chemistry 302
Notes: 3 meetings (50 minutes); offered every other year
Instructors: D. Hamilton
Expected enrollment: 35

CHEM-337-01 - Chemistry - 2007-2008
(Fall) Physical Organic Chemistry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
An introduction to the concepts and methods of physical organic chemistry. Examination of reaction mechanisms and the experimental results that support these mechanisms. Topics include structure and reactivity, reaction kinetics, mechanism determinations, and Woodward-Hoffman Rules.
Prerequisites: Chemistry 302, 308
Notes: 2 meetings (75 minutes); offered every other year
Instructors: S. Browne
Expected enrollment: 35

CHEM-338-01 - Chemistry - 2007-2008
(Fall) Organic Chemistry III - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
An elective sequel to Organic Chemistry II, this course will build directly upon the standard organic chemistry sequence to add both depth of understanding and breadth of application. The course will draw heavily from the reaction classes covered in the earlier courses and add conceptual frameworks to support discussion of rearrangements of carbon skeletons, migrations to electron-deficient centers, the formation and reactions of carbones, and symmetry control of electrocyclic processes. Recognizing that a key goal of contemporary organic chemistry is the preparation of new carbon frameworks, a brief introduction to the use of retrosynthetic analysis will also be included.
Prerequisites: Chemistry 302, Organic Chemistry II
Notes: 2 meetings (75 minutes)
Instructors: D. Hamilton
Expected enrollment: 30

CHEM-345-01 - Chemistry - 2007-2008
(Fall) Physical Biochemistry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course introduces the fields of biophysical chemistry and molecular biophysics, where biological systems are probed and described by physical techniques and models. Topics will include the physical properties of biological molecules (proteins, nucleic acids, carbohydrates, and lipid membranes); applications of spectroscopy to biological systems, both in vitro and in vivo; the mechanisms of light harvesting and energy conversion; and technological developments inspired by biological systems. Lecture sessions (two per week) will be complemented by a weekly discussion of papers from the contemporary literature.
Prerequisites: Chemistry 302 required; Chemistry 212, Biochemistry 311 or Biology 220 recommended, or permission of instructor
Notes: 2 lectures (75 minutes) and discussion section (75 minutes) per week
Instructors: S. Decatur

**CHEM-399-01 - Chemistry - 2007-2008**
**(Fall) Comprehensive Seminar**
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
A seminar series consisting of meetings on alternate weeks to discuss articles from the current chemical literature. The readings will prepare students for attendance at lectures on the chosen topics in the remaining weeks. The lectures are given primarily by visiting speakers, but they may include department faculty. Students will serve as discussion leaders, and each student will write a paper on a presentation of her choice.
Prerequisites: sr
Notes: 1 meeting (90 minutes)
Instructors: The department
Expected enrollment: 20

**CLASS-211-01 - Classics - 2007-2008**
**(Fall) Gods and Mortals: Myth in Ancient Art and Literature**
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Art History 211)
Many ancient images tell completely different versions of myth from those portrayed in Greek and Roman literary sources. By juxtaposing distinctive modes of communication in the ancient world, students will analyze the rhetorical uses of myth, both then and now. Students will also examine the range of possibilities for translating and interpreting text and image, which will alert them to the vitality of myth as a language of its own, transcending historical parameters.

**CLASS-212-01 - Classics - 2007-2008**
**(Spring) Greek Tragedy and Film**
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Flmst-220)
This course examines the evolution of tragedy in classical Athens from choral performance to sophisticated drama through the contributions of the three most important tragedians: Aeschylus, Sophocles, and Euripides. Attention is given both to the political context in which the plays were

performed and to the dramatic effects employed by the playwrights that made the stage an influential medium of powerful artistry. Students will also study the influence of ancient tragedy on film by examining dramatic strategies modern directors employ and the allusions to Greek tragedy found in some innovative films by Roman Polanski, Woody Allen, Jules Dassin, Michael Cacoyannis, and others.

Instructors: B. Arnold

CLASS-224-01 - Classics - 2007-2008
(Spring) The Athenian Empire
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Taught in English)
An intensive study of Athens in the fifth century BCE, from its rise to power in the Persian Wars through its defeat by Sparta in the Peloponnesian War. We will focus on primary sources, including the histories of Herodotus and Thucydides, the records of Athens' dealings with allies and of building programs at home, and selected works of Athenian art and literature (e.g., tragedy and comedy) from this period. This course will be linked to Classics 31 at Amherst College by videoconferences, with occasional joint meetings. (Readings in English)
Prerequisites: so, jr, sr or fy with previous study ancient of ancient Greece, by permission of the instructor.
Notes: May be taken for 300-level credit with permission of the professor
Instructors: P. Debnar
Expected enrollment: 20

CLASS-231-01 - Classics - 2007-2008
(Fall) The City of Athens from Theseus to Alaric
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English; Art History 290-04)
A detailed survey of the principal surviving monuments and the overall architectural development of the city of Athens from its origins in the Bronze Age to the end of the fourth century C.E. The archaeological evidence will be discussed against a broader cultural and historical background, with an emphasis on the specific people and events that helped to shape the city and the general social and political circumstances that gave the monuments meaning.

Complex Organizations

COMOR-201-01 - Complex Organizations - 2007-2008
(Spring) Game Theory - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
((Economic 201))

COMOR-204-01 - Complex Organizations - 2007-2008
(Fall) Poverty in the United States - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
((AMST-290-04))
Why are so many people poor in the most affluent of all nations? Are there self-perpetuating "cultures of poverty?" Is poverty the result of economic conditions; failed government programs; discrimination; out-of-wedlock births; inadequate parenting; divorce; poor schools, health, or housing or defects of intelligence or moral character? This course will examine these and other conflicting explanations of poverty and potential remedies from a variety of social science and political perspectives, with special attention to recent laws affecting public assistance, medical care, and taxation. The course will include a community-based learning component.
Notes: 2 meetings (75 minutes)
Instructors: J. Fox, C. Pyle

COMOR-206-01 - Complex Organizations - 2007-2008
(Spring) Economics of Health Care and Health Service Organizations - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
((Economics 206f))
Instructors: J. Rapoport

COMOR-212-01 - Complex Organizations - 2007-2008
(Fall) Individuals and Organizations
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
((Psychology 212f))
This course focuses on individual and small-group behavior in the organizational setting. The basic objective is to increase knowledge and understanding of human behavior in organizations - especially each individual's own behavior. Three types of knowledge are stressed: (1) intellectual information regarding human behavior in an organizational context; (2) understanding of oneself as a person and as a manager; and (3) behavioral skills in dealing with people.
Prerequisites: soph, jr, sr
Notes: 2 meetings (75 minutes)
Instructors: D. Butterfield

COMOR-220-01 - Complex Organizations - 2007-2008
(Fall) Winners and Losers: Taxation, Social Justice, and Economic Choices
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
((Speaking-intensive; Politics 225))
The maze of laws that make up the U.S. tax system shape and define what our nation is and will be; they also create winners and losers. Who benefits from special relief provisions such as for housing, health care, education, retirement savings, charitable giving, and child care? What are the economic consequences? How are families taxed? Women? The poor? Capital gains? Should we have an estate tax, reform the income tax, or adopt a consumption tax? How can we save Social Security? All these issues and more are addressed, including a review of federal tax history from the Constitution to the present.
Prerequisites: History 171, Politics 104, Economics 103 or 104, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: J. Fox
Expected enrollment: 20

COMOR-232-01 - Complex Organizations - 2007-2008
(Fall) Ethical Issues in Complex Organizations
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
((Philosophy 232s))
There is much talk recently of the need for increased attention to "ethics" in organizational life. This course examines the basis for this concern and the underlying beliefs and structures that give rise to ethical issues, with the goal of helping students to clarify their own positions. Topics addressed will include profit, governance, consumption, distribution and the social contract. Readings will draw on philosophy, religion, economics, history, literature, management theory and current events.

Prerequisites: soph, jr, sr
Notes: 1 meeting (3 hours)
Instructors: F. McGinness

COMOR-295-01 - Complex Organizations - 2007-2008
(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph, jr, sr, and permission of program
Instructors: The department.

COMOR-299-01 - Complex Organizations - 2007-2008
(Spring) Leadership and the Liberal Arts
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)
An interdisciplinary approach to the nature, operations, and directions of complex organizations. Investigates the position of women and men in organizations, with a consideration of the nature and styles of leadership and of the value of a liberal arts degree in organizational interaction, and with an exploration of issues affecting organizations (ethics, competition, legal rights, authority, socialization). Required for the minor in complex organizations.
Notes: 2 meetings (75 minutes)
Instructors: F. McGinness

COMOR-304-01 - Complex Organizations - 2007-2008

Computer Science

COMSC-100-01 - Computer Science - 2007-2008
(Fall) An Introduction to Computer Science
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
An introduction to basic computer science concepts and issues. Topics will be chosen from: origins of computers, data representation and storage, computer architecture, assemblers and compilers, operating systems, networks and the Internet, distributed systems, information retrieval, data organization, graphics, artificial intelligence, robotics, the theory of computation, and trends in Internet commerce and use. Laboratory assignments will offer some experience with programming and the use of application software.
Notes: 2 meetings (75 minutes), 1 lab (2 hours); students should NOT take this course after Computer Science 101
Instructors: P. Dobosh
Section Instructors: 01 LAB P Dobosh | 02 LAB P Dobosh |

COMSC-100-01 - Computer Science - 2007-2008
(Spring) An Introduction to Computer Science
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

(Fall) Problem Solving and Structured Programming
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Introduces the Java language and the use of structured programming techniques. Emphasizes the solution of complex computational problems by their analysis into smaller subproblems that can be solved independently and then combined to form a complete solution. Introduces other topics relevant to computer science. Assumes no previous study or use of computers. This course is programming intensive.
Notes: 2 lectures (75 minutes), 1 lab (2 hours)
Instructors: B. Lerner
Section Instructors: 01 LAB B Lerner | 02 LAB B Lerner |
Expected enrollment: 50

COMSC-102-01 - Computer Science - 2007-2008
(Spring) Object-Oriented Intermediate Programming
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This second course in the programming sequence focuses on object-oriented program design and intermediate programming concepts. This course also introduces fundamental data structures and complexity analysis. Topics include inheritance, polymorphism, recursion, linked lists, stacks and queues. In addition, students will focus on the design and implementation of large programs in Java.

Prerequisites: Computer Science 101
Notes: 2 meetings (75 minutes)
Instructors: X. Li
Expected enrollment: 40

COMSC-211-01 - Computer Science - 2007-2008
(Fall) Data Structures
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Using C++. Solving problems with computers is accomplished by writing programs that operate on data to produce a desired result. The way data is organized and presented to the program can significantly affect its efficiency and simplicity and can sometimes determine whether or not a program can be written to solve the problem at all. This course presents ways of organizing data into "data structures" and analyzes how structuring the data can improve program performance. This course is programming intensive.

Prerequisites: Computer Science 101, 102
Notes: 2 meetings (75 minutes)
Instructors: X. Li
Expected enrollment: 20

COMSC-221-01 - Computer Science - 2007-2008
(Spring) Introduction to Computer Systems
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course looks at the inner workings of a computer and computer systems. It is an introduction to computer architecture, software engineering, and the fundamentals of operating systems. Specific topics include assembly language programming, memory and I/O issues, and the techniques of software design, implementation, and testing as a group. This course is programming intensive.

Prerequisites: Computer Science 101, 102; Computer Science 211 recommended
Notes: 2 meetings (75 minutes)
Instructors: P. Dobosh
Expected enrollment: 20

COMSC-295-01 - Computer Science - 2007-2008
(Fall) Independent Study
Credits/PE Units: I-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph, permission of instructor
Instructors: The department.

COMSC-295-01 - Computer Science - 2007-2008
(Spring) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph, permission of instructor
Instructors: The department

COMSC-311-01 - Computer Science - 2007-2008
(Fall) Theory of Computation
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Are there any limits to what computers can do? Does the answer to this question depend on whether you use a PC or a Mac? Is C more powerful than PASCAL? This seminar explores these questions by investigating several models of computation, illustrating the power and limitations of each of these models, and relating them to computational problems and applications. Topics include finite state automata, pushdown automata, grammars, Turing machines, the Universal Turing Machine, and computability.

Prerequisites: Computer Science 101, 102 and Mathematics 232
Notes: 2 meetings (75 minutes)
Instructors: X. Li
Expected enrollment: 20

COMSC-312-01 - Computer Science - 2007-2008
(Spring) Algorithms
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course is an introduction to the theory of algorithms. The goal of this course is to enable the student to design efficient algorithms as well as to select appropriate existing algorithms for solving complex problems. Topics may include sorting, searching, advanced data structures, and graph algorithms. In addition to discussing the behavior of the algorithms, we will study algorithm performance using a formal mathematical model.

Prerequisites: Computer Science 211 and Mathematics 232

Instructors: B. Lerner

Expected enrollment: 20

COMSC-322-01 - Computer Science - 2007-2008

(Spring) Operating Systems

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

An introduction to the issues involved in orchestrating the use of computer resources. Topics include operating system evolution, file-handling systems, memory management, virtual memory, resource scheduling, multiprogramming, deadlocks, concurrent processes, protection, and design principles. Course emphasis: understanding the effects of operating system design on computer system performance. This course is programming intensive.

Prerequisites: Computer Science 211 and 221

Notes: 2 meetings (75 minutes)

Instructors: J. Teresco

Expected enrollment: 20

COMSC-324-01 - Computer Science - 2007-2008

(Fall) Computer Architecture

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

The goal of this class is to provide the student with a working knowledge of how computers operate and the general principles that affect their performance. New developments in hardware render current technologies obsolete within one to three years. Rather than focusing on specific technology, we cover the fundamentals that allow your understanding of technology to grow with future developments. You will also gain a better appreciation of the cost/performance trade-offs encountered in designing a computer system.

Prerequisites: Computer Science 211 and 221

Notes: 2 meetings (75 minutes)

Instructors: J. Teresco

Expected enrollment: 20

COMSC-325-01 - Computer Science - 2007-2008

(Spring) Computer Networks - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

This course is an introduction to computer networks, the mechanisms used in their construction, and the factors that affect their performance. Topics include network architecture, data transmissions, network protocols, error and connection management, internetworking, the Internet, client-server programming, examples, and applications. This course is programming intensive.

Prerequisites: Computer Science 211 and 322

Notes: 2 meetings (75 minutes)

Instructors: The department

Expected enrollment: 20

COMSC-327-01 - Computer Science - 2007-2008

(Fall) Distributed Systems - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

In decentralized systems, users often solve large problems by spreading effort over groups of computers. Problems involving information, computation, and hardware distributed at various locations must be solved. A distributed system of computers may not share a common memory or a clock. Therefore, efforts to work together require explicit communication and synchronization mechanisms. We will look at issues of problem solving with multiple processors, distributing workload, and providing access to shared resources such as I/O and storage devices and file systems, centralized and distributed methods for control of parallel activities and for detection, and resolution of conflicts.

Prerequisites: Computer Science 211 and 322 or permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: The department

Expected enrollment: 15

COMSC-331-01 - Computer Science - 2007-2008

(Fall) Computer Graphics

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

The creation of pictorial images using a computer. Topics include drawing of two- and three-dimensional scenes using OpenGL and other graphical environments; transformations of objects (translations, scalings, rotations, shearings) using homogeneous coordinates; creating perspective in three-dimensional drawing; algorithms for enhancing realism and visual effect; and the mathematical underpinnings of graphic design. Students will complete a number of graphics projects based on readings and class discussion. This course is programming intensive.
Prerequisites: Computer Science 101, 211 (may be taken concurrently), and at least one of Mathematics 203, Mathematics 211, Mathematics 232, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: R. Weaver
Expected enrollment: 20

COMSC-334-01 - Computer Science - 2007-2008
(Fall) Artificial Intelligence
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
An introduction to AI research issues and models of intelligence. Topics include AI history, philosophical and research questions, LISP, state space representation, search, heuristics, connectionism, learning, and an introduction to advanced AI fields such as Natural Language Processing and Computer Vision. Course emphasis understanding AI model development and how it relates to the theoretical issues. This course is programming intensive.
Prerequisites: Computer Science 211 and Mathematics 232
Notes: 2 meetings (75 minutes)
Instructors: P. Dobosh
Expected enrollment: 20

COMSC-335-01 - Computer Science - 2007-2008
(Spring) Introduction to Computer Vision and Robotics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
An introduction to theories that suggest how to provide a computer with the ability to "see" and how to use that ability to control the actions of a robot. The potential role that robot actions can play in making computer vision possible is also discussed. Specific topics include: the physics of vision, image processing, pattern recognition, image understanding, representations, planning, robot control, architectures, and applications. This course is programming intensive.
Prerequisites: Computer Science 334 and Mathematics 202
Notes: 2 meetings (75 minutes)
Instructors: The department
Expected enrollment: 20

(Spring) Intelligent Information Retrieval
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Introduces the basic concepts, methodologies, and research findings in information retrieval. Special topics include Web searching, cross-language retrieval (query in one language, retrieve documents written in many languages), data mining (automatically identifying hidden relationships from large amounts of information), and data extraction (identifying prespecified types of information).
Prerequisites: Computer Science 211; 2 meetings (75 minutes)
Instructors: X. Li
Expected enrollment: 20

COMSC-341-01 - Computer Science - 2007-2008
(Fall) Topics: Software Design
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Building large software systems introduces new challenges to software development. Making appropriate design decisions early in the development of large software can make a major difference in the ability to develop correct and maintainable software. In this course, students will learn techniques and tools to help them address these problems and develop larger software projects, improving their skills in designing, writing, debugging and testing software. Topics include design patterns, UML, designing for maintainability, software architecture, and designing concurrent and fault tolerant systems. Programming will be done in Java, although no prior experience with Java is required.
Prerequisites: Comsc-102
Notes: 2 meetings (75 minutes)
Instructors: B. Lerner
Expected enrollment: 20

COMSC-341-02 - Computer Science - 2007-2008
(Fall) Topics: TBD
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
TBD
Prerequisites: Comsc-102
Notes: 2 meetings (75 minutes)
Instructors: The Department
Expected enrollment: 20
COMSC-341-03 - Computer Science - 2007-2008
(Fall) Topics: Parallel Processing
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
As processor speeds approach physical limits, performance increases will need to come from larger, parallel computer systems. Parallelism complicates everything from computer hardware design to operating systems and compilers to application programming. This course examines methods, techniques, and languages for parallel programming, libraries and extensions to sequential languages, parallel computing environments, performance analysis, efficiency and complexity of parallel algorithms, and applications. Readings will be taken from technical literature and a textbook. Students complete several programming projects, using parallel computers at MHC and at national supercomputing centers.
Prerequisites: Computer Science 102
Notes: 2 meetings (75 minutes)
Instructors: J. Teresco
Expected enrollment: 20

COMSC-395-01 - Computer Science - 2007-2008

COMSC-399-01 - Computer Science - 2007-2008
(Spring) Comprehensive Seminar - *Not offered this year/term
Credits/PE Units: 1; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
A seminar series consisting of meetings on alternate weeks to discuss articles from the current computing literature. The readings will prepare students for attendance at lectures on the chosen topics in the remaining weeks. The lectures are given by visiting speakers and department faculty. Students will serve as discussion leaders, and each student will write a paper on a presentation of her choice.
Prerequisites: sr or permission of instructor
Notes: Does not meet a distribution requirement
Instructors: The department
Expected enrollment: 20

**Critical Social Thought**

CST-100-01 - Critical Social Thought - 2007-2008
(Fall) An Introduction to Critical Social Thought
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course will examine the relationship among the lives of thinkers who broke with their own worlds, the new visions of reality they created, and the historical context that provoked and in turn was provoked by their ideas. Readings will include short theoretical and fictional works, memoirs and biographies, historical narratives, and secondary critical commentaries.
Prerequisites: fy, soph, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: C. Pleshakov
Expected enrollment: 18

CST-249-01 - Critical Social Thought - 2007-2008
(Spring) Global Diversity/European Modernity
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(English 232)
For two centuries, Western intellectual disciplines have been articulated around the premise that early modern Europe laid the foundation of "modernity"—scientific method, markets, mobility, democracy, and global exchange, or, in a word, "progress"—and then brought it to the rest of the world. But what was the world, both in Europe and outside, that modernity superseded? How did the eighteenth-century's own authors—Dryden, Locke, Defoe, Rousseau, Diderot, Smith, Kant, Bentham, Sade, Edgeworth— perceive those other worlds? Studying global differences at the origins of their erasure, this class aims to rethink what actually constitutes the peculiar modernity that came to shape our lives.
CST-250-01 - Critical Social Thought - 2007-2008
(Fall) Introduction to Nineteenth-Century Critical Social Thought
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
An introduction to some of the great critical voices of the nineteenth century. We will explore the ideas of such mutinous thinkers as Karl Marx, Friedrich Nietzsche, Sigmund Freud, Fyodor Dostoyevsky, and W.E.B. Du Bois, focusing on the style as well as the substance of their works and the circumstances that provoked them to write and/or that their writings helped provoke. The course will highlight the tension between appearance and reality, the dialectic of domination and subordination, and the place of reason and irrationality in social life.
Notes: 2 meetings (75 minutes)
Instructors: J. Cocks
Expected enrollment: 25

CST-251-01 - Critical Social Thought - 2007-2008
(Spring) Twentieth-Century Theory and Its Discontents - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement (Speaking-intensive; German Studies 231s (02))
An introduction to thinkers who broke with prevailing social theories to address the crises and upheavals of the twentieth century. We will examine the ideas of, for example, Frantz Fanon, Walter Benjamin, Hannah Arendt, Michel Foucault, and Edward Said. We also will probe the connections between theory and practice by relating those ideas to case studies of contemporary issues. Students of German studies may focus primarily on German thinkers. This course will be conducted in English.
Prerequisites: Critical Social Thought 249 or 250 or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: K. Remmler
Expected enrollment: 25

CST-252-01 - Critical Social Thought - 2007-2008
(Spring) Literature and Politics: Empire
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
What does it mean to think critically and to express that criticism through fiction? What are the specific challenges of our times, which have seen so many wars and purges but also immense progress in human rights and social fairness? In spring, 2008, the course will focus on how authors, who may include O’Henry, Graham Greene, Che Guevara, Ryszard Kapuscinski, and Edward W. Said, have responded to "imperialism" and "empire" in politics and culture.
Prerequisites: Critical Social Thought 249 or 250 or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: C. Pleshakov
Expected enrollment: 25

CST-253-01 - Critical Social Thought - 2007-2008
(Spring) Critical Race Theory - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement (AFAM 208)
This course examines the discursive relationship between race and law in contemporary U.S. society. Readings examine the ways in which racial bodies are constituted in the cultural and political economy of American society. The main objective is to explore the rules and social practices that govern the relationship of race to gender, nationality, sexuality, and class in U.S. courts and other cultural institutions. Thinkers covered include W.E.B. DuBois, Kimberle Crenshaw, Derrick Bell, Richard Delgado, among others.
Prerequisites: Critical Social Thought 249 or 250 or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: L. Wilson
Expected enrollment: 25

CST-254-01 - Critical Social Thought - 2007-2008
(Spring) Postcolonial Theory
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement (English 254)
Postcolonial theory probes the centrality of colonialism and imperialism to modernity, and examines vital forms of anticolonial insurgency as models for critiques of domination and hegemony. This course will explore these imperatives from Marxist, feminist, and psychoanalytic perspectives, paying
particular attention to nationalism, the state, globalization, and identity formation in the context of empire. Readings will include the work of Fanon, Said, Spivak, Chakrabarty, and Lloyd.

Prerequisites: Critical Social Thought 249 or 250 or permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: A. Martin

Expected enrollment: 25

CST-255-01 - Critical Social Thought - 2007-2008

(Fall) Human Agency and Historical Transformation: Pivotal Moments: Pivotal Moments in the Development of Capitalism

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Economics 204 and History 301)

Preamble (for topics courses): Topics offered under this rubric will be designed to illuminate the interplay between continuity and change, stability and disorder, tradition and expiration in thought and practice, through investigation and analysis of moments or periods when historical actors made critical choices, writing or unwriting, that fundamentally shaped choices possible for later generations.

This seminar examines evidence and theories on the origins, development, and dynamics of capitalism and the modern state. We shall focus on the transition to (agrarian) capitalism in early modern England, the industrialization of production in nineteenth-century Europe and the United States, and the political and economic crisis of the 1930s depression. As we ask how fundamental changes in human communities come about, we shall consider the relative contributions of individual agency and social determination to the creation of a world so many now regard as either natural or inevitable.

Prerequisites: jr, sr only

Notes: 1 meeting (3 hours)

Instructors: H. Garrett-Goodyear, J. Christiansen

Expected enrollment: 25

CST-295-01 - Critical Social Thought - 2007-2008

CST-350-01 - Critical Social Thought - 2007-2008

(Fall) Seminar in Critical Social Thought

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A; Anthro, econ, geog, etc. requirement

(Speaking and writing-intensive)

A seminar for CST juniors and seniors in which both participating faculty and students present their independent research, respond critically to one anothe's work, and lead discussions on relevant secondary readings. Every student will be expected to produce a substantial essay on a question in the broad field of social thought by the end of the semester. Students will be encouraged to cultivate agility in speaking, arguing, and writing.

Prerequisites: Critical Social Thought jr, sr, or permission of instructor

DANCE-011-01  - Dance  - 2007-2008  
(Fall) *AC TH/DA Language of Movement  -  *Not offered this year/term  
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement  
An introduction to movement as a language. In studio sessions students will explore and expand their individual movement vocabularies by working improvisationally with weight, posture, gesture, patterns, rhythm, space, and relationship of body parts. We will ask what these vocabularies might communicate about emotion, thought, physical structures, cultural/social traditions, and aesthetic preferences. In addition we will observe movement practices in everyday situations and in formal performance events and use these observations as inspiration for individual and group compositions. 
Selected readings and viewing of video and live performance. 
Notes: 1 class/studio meetings (2 hours) and a production workshop (2 hours); offered at Amherst College  
Instructors: W. Woodson  
Expected enrollment: 20

DANCE-285-01 - Dance - 2007-2008
(Spring) Laban Movement Analysis I - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Laban Movement Analysis is a system used to describe and record quantitative and qualitative aspects of human movement. Through study and physical exploration of concepts and principles involved in body articulation, spatial organization, dynamic exertion of energy, and modes of shape change, students will examine their own movement patterns and preferences. This creates the potential for expanding personal repertoire and developing skills in observation and analysis of the movement of others.

DANCE-377-01 - Dance - 2007-2008
(Fall) Advanced Studies: Balanchine 100 - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Commemorating the centennial of his birth, this seminar pays tribute to the aesthetic vitality of George Balanchine, the foremost classical choreographer of the twentieth century. In our time, Balanchine (1904-1983) transformed the classic dance from its nineteenth-century codification into a steadily evolving language capable of expressing the most subtle yet profound of human emotions. We will identify the major themes in Balanchine's works, some of which include Diaghilev, waltzes, Tchelitchew and surrealism, Tchaikovsky, Americana, narratives, abstraction, Stravinsky and apotheosis. Each week we will view, discuss, and analyze at least one major work within the theme.
Prerequisites: dance history class.
Notes: Highly recommended for students interested in music, dance, and choreography. 1 meeting (3 hours)
Instructors: C. Valis Hill

ECON-105-01 - Economics - 2007-2008
(Spring) Financial Accounting
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): The Department of Economics does not offer a business major. However, we do offer an accounting course that will be of interest to students interested in business. The accounting course does not serve as an introduction to economics or as a part of the major. The course, while using traditional accounting techniques and methodology, will focus on the needs of external users of financial information. The emphasis is on learning how to read, interpret, and analyze financial information as a tool to guide investment decisions. Concepts rather than procedures are stressed and class time will be largely devoted to problem solutions and case discussions. A basic knowledge of arithmetic (+, -, *, /) and a familiarity with a spreadsheet program is suggested. See <a href="http://www.mtholyoke.edu/courses/cljohnso">http://www.mtholyoke.edu/courses/cljohnso</a>.
Prerequisites: Not open to first-year students
Notes: 2 meetings (75 minutes)
Instructors: C. Johnson

ECON-201-01 - Economics - 2007-2008
(Spring) Game Theory
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): This 200-level course investigates a particular topic in economics at some depth without presupposing prior knowledge of economics. Many students may find this course a useful complement to a major or minor other than economics. The course will illustrate and analyze the strategies used in making interrelated decisions. Concepts from game theory will be developed using examples and cases drawn from economics, business, politics, and even sports. Applications will include the Prisoner's Dilemma and related games, signaling, bargaining, voting and power, brinkmanship, and nuclear deterrence.
Prerequisites: Not open to first-year students as their first course in Economics
Notes: 2 meetings (75 minutes)
Instructors: M. Robinson

(Spring) East Asian Economic Development
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Preamble (for topics courses): This 200-level course investigates a particular topic in economics at some depth without presupposing prior knowledge of economics. Many students may find this course a useful complement to majors and minors other than economics. This course provides an overview of economic development in East Asia. The complex interplay of public policy, global competition, and domestic economic relationships in China, Japan, and Korea will serve as the core subject matter of the course, though patterns of economic development in Indonesia, Malaysia, and Singapore will also be discussed. Special attention is given to conditions under which regional economies have successfully blended elements of import-substituting industrialization with export-oriented growth. The course will conclude with a discussion of the impact of the regional economic crisis, the current wave of reforms, and the potential for future growth and development.
Prerequisites: not open to first-year students as their first course in Economics
Notes: 2 meetings (75 minutes)
Instructors: S. Gabriel

ECON-249-01 - Economics - 2007-2008
(Fall) Topics in Economics: Monetary Policy in Developing Countries - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The course analyzes the application of monetary policy measures in developing countries under various foreign exchange rate arrangements. It starts with a brief review of the basic operation of a monetary sector and its relationship with the balance of payments. It then goes on to examine how the foreign exchange-rate regime affects the ability to control inflation and economic activity. Alternative monetary regimes will be studied, going from the debate on "rules vs. discretion" to the application of "inflation targeting" strategies. The analysis of monetary policy will be directly linked to recent stabilization experiences in South America, Central America, and Asia.
Prerequisites: Economics 103 and 104
Notes: 1 meeting (2 1/2 hours)

(Fall) Whiteness: The Other Side of Racism
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
First-year seminar (Writing-intensive)
What is whiteness—an identity, an ideology, a racialized social system? How is it related to racism? This course will examine the historical, social, psychological, and legal frameworks of whiteness, how whiteness is enacted in everyday practice, and how it influences the lives of whites and people of color. Some of the concepts we will explore include privilege, dominance, the "new" racism, color-blindness, cultural capital, racial identity, racial stratification, power, and antiracism.
Prerequisites: fy
Notes: 2 meetings (75 minutes)
(Spring) Ideas and Ideals in Public Education
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Using an interdisciplinary framework, this course will examine the social, historical, legal, philosophical, economic, and political foundations of education in the United States. It is designed to engage students in an examination of the enduring questions, debates, and tensions that revolve around the institution of schooling in the U.S. Topics covered will include an examination of political ideologies that have informed past and current education reform movements; an historical perspective on access to education; and an analysis of trends in funding of public education; among others.

(Spring) Researching the Enterprise of Education: Researching Race and Racism in Education
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Preamble (for topics courses): Provides an overview on the nature and practice of educational research. Students critique published research, explore ethical considerations, and examine the uses of educational research. Students also propose and conduct a small-scale research project of their own. Particular methodological approaches are stressed in different iterations of this course. Qualitative approaches such participant-observation, grounded theory, ethnography, teacher research, case study and interview studies are central in some courses; in others the quantitative analysis of data on education will be emphasized.
Researching race and racism in education. The central elements of this course include reading qualitative research, writing qualitative research, and conducting qualitative research. These three acts of inquiry explore how race matters in education and provide a deeper understanding of the racial realities of everyday life in schools. Readings and discussions highlight the paradigms, methodological approaches, and uses of qualitative research. Class demonstrations and activities focus on developing research skills. The independently designed research study provides further exploration of the complexities involved in researching racial matters.
Prerequisites: Prior coursework involving race or Education 205, or 220, or 109 or Psych 233 or permission of instructor.
Notes: 2 meetings, 75 minutes

(Fall) Mission and Market: Higher Education
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Is Mount Holyoke a school or a business? Is the institution one sees today what Mary Lyon had in mind in 1837? This course will look at the development of U.S. higher education from upstart colonial colleges into a multi-billion dollar industry. We will look closely at the tension between education mission and market forces, and how the interaction between academy and society has played out from the founding of the republic through women's rights, the world wars, and 60s counterculture. We will touch on a range of contemporary topics such as access and affirmative action, standardized testing, athletics, and e-learning. Mount Holyoke will serve as a recurring case study.

ENGL-101-01 - English - 2007-2008
(Fall) Seminar in Reading, Writing, and Reasoning: Colonialism and Postcolonialism
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

First-year seminar (Writing-intensive)

Preamble (for topics courses): Though sections of English 101 differ in specific content, all develop the skills of careful reading and effective writing essential to the liberal arts and sciences. Students will write frequently and have an opportunity to revise their work. By active participation in class discussion, students will develop their speaking skills and learn to ask critical questions, formulate answers, and frame persuasive arguments. Students who do not take the course in the fall should consider enrolling in the spring. Like other first-year seminars, English 101 is intended primarily for students at the start of their college career.

This course will introduce students to the concept of empire by exploring literature about the non-European world in two periods: the eighteenth century, or the Enlightenment, when Europe colonized the world; and the late twentieth century, the Postcolonial period, when the colonial world revolted against and gained independence from Europe. We will pay particular attention to how literature portrays diverse worlds in violent conflict with each other. Authors may include Locke, Defoe, and Rousseau, as well as Nuruddin Farah, Ahdaf Soueif, Rushdie, and Kirin Desai.

Preamble (for topics courses): Though sections of English 101 differ in specific content, all develop the skills of careful reading and effective writing essential to the liberal arts and sciences. Students will write frequently and have an opportunity to revise their work. By active participation in class discussion, students will develop their speaking skills and learn to ask critical questions, formulate answers, and frame persuasive arguments. Students who do not take the course in the fall should consider enrolling in the spring. Like other first-year seminars, English 101 is intended primarily for students at the start of their college career.
We will examine contemporary American writers who employ a variety of genres to create autobiography. Through close readings of auto-fiction, poetry, the lyric essay, memoir, and journals, we shall interrogate how African American, Asian American, and queer aesthetics intersect and address questions of identity. What is a personal voice? How does it function when it is part of a larger social context? What is the role of the autobiographer? What is the nature of the autobiographical self? Issues of race, gender, and sexual identity are central to this course. Writers include Alice Walker, Zora Neale Hurston, Claudia Rankine, Andy Warhol, Justin Chin, D.A. Powell, and Mecena Alexander. Students will write and revise several short creative and critical pieces, each piece becoming part of a cohesive final project.

(Fall) Seminar in Reading, Writing, and Reasoning: Asian American Visual Culture
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
First-year seminar (Writing-intensive)
Preamble (for topics courses): Though sections of English 101 differ in specific content, all develop the skills of careful reading and effective writing essential to the liberal arts and sciences. Students will write frequently and have an opportunity to revise their work. By active participation in class discussion, students will develop their speaking skills and learn to ask critical questions, formulate answers, and frame persuasive arguments. Students who do not take the course in the fall should consider enrolling in the spring. Like other first-year seminars, English 101 is intended primarily for students at the start of their college career.
This course provides a historical survey of Asian American visual culture, including painting, sculpture, conceptual art, photography, film, and video production. We will begin by examining early Orientalist depictions of Asians by Euro-American artists, followed with examples of Asian American
visual culture through the twentieth century, and conclude with a focus on contemporary artists such as Ruth Asawa, Maya Lin, Yong Soon Min, Wayne Wang, Richard Fung, Tseng Kwong Chi, and Nikk I S. Lee.

Mentioned in songs, nickname of pretty bed sheets, myspace pages, and pop-psychology best-sellers -- Ophelia's flowered, white-nightgowned presence is felt beyond the boundaries of Hamlet. She has not only permeated popular culture: Ophelia is present in many rereadings of female literary characters who meet a tragic and watery end. Yet technique of the role has not been explored nearly as much as other female roles in Shakespeare's work. In addition to Hamlet, our texts will include film, paintings, critical essays, novels, and travel logs of mermaid sightings. Having read the play before is not a requirement but is not a disadvantage, either.

**ENGL-104-01 - English - 2007-2008**

**English for Multilingual Speakers II**

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Speaking- and writing-intensive)

This course is for international students at all levels. It is designed for those who wish to improve their English writing and speaking skills by working on a one-to-one basis with an English instructor. Each student will have one 90-minute tutorial per week with the instructor in order to work on written assignments of various lengths suggested by the instructor and, if appropriate, to discuss writing projects from other courses. The purpose of
the meetings will be to assess the student’s writing style and give personalized instruction in the conventions of college-level writing, research, and academic discourse. Course is pass/fail.
Notes: 1 meeting (90 minutes); register online; tutorial time must be arranged by student with instructor by email: jbrownlo

(Fall) Topics in Medieval Studies: Exploring Medieval Texts and Contexts
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(History 232f-01 & Medieval Studies 200f-01)
This full-year course allies students of late medieval history and literature with its two instructors in exploration of texts and contexts that constituted the society and culture of England, 1350-1530. The first semester emphasizes discovery of published evidence from the era; the second challenges participants to integrate textual analysis and historical interpretation. Major texts include works by Chaucer, Gower, and Malory, read within an array of less familiar medieval sources. Major topics include languages and book culture of late medieval England; violence and chivalry; the worlds of manors and guilds; polity, gender, and governance; and late medieval science.
Prerequisites: soph, jr, sr, or permission of instructor; 2 credits each semester
Notes: 1 meeting (110 minutes); the full-year course will meet the English department pre-1700 requirement
Instructors: The department
Expected enrollment: 25

(Fall) Introduction to British Literary and Cultural Studies since 1660
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This course offers a broad study of selected figures in modern literary and intellectual history and helps prepare students for more advanced classes in British and/or postcolonial studies. We will use these figures to probe the dynamic relationship between imaginative practice and social change, which may involve global as well as national contexts. This course will introduce students to writing sustained pieces of critical analysis, challenging them to explore the theoretical relationship between literary form and historical transformation in the modern period.
This course will focus on four poets: Milton, Pope, Wordsworth, and a twentieth-century poet. It will be particularly concerned with charting the representational problems poetry faces when it confronts the emergence and dissolution of the modern self.
Prerequisites: soph, jr, sr
Notes: 2 meetings (75 minutes); meets English department 1700-1900 requirement
Instructors: N. Alderman

(Spring) Global Diversity/European Modernity
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Critical Social Thought 249s-01)
For two centuries, academic disciplines have been based on the premise that early modern Europe laid the foundations of 'modernity'—scientific method, markets, mobility, democracy, and global exchange, or, in a word, 'progress'—and then brought it to the rest of the world. But what were those other worlds, both in Europe and outside, that modernity superseded? What trace have they left—how can we know them—after they have been destroyed? Juxtaposing Enlightenment literature and post-Enlightenment theory concerned with historical difference, this class aims to rethink what actually constitutes the peculiar modernity that came to shape our lives.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 1 meeting (3 hours); meets English department 1700-1900 requirement
Instructors: S. Ahmed
Expected enrollment: 25

ENGL-233-01 - English - 2007-2008
(Fall) Introduction to Queer Theory
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course introduces students to the social and political contexts mediating nonnormative gender and sexual expression since the nineteenth century. In our examination of queer epistemological genealogies and methodologies, we will also consider the value of queer theory as a subjectless analysis as opposed to a queer of color critique that calls into question the sedimentation of a white, male, North American queer identity with global pretensions.
Prerequisites: soph, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: I. Day

ENGL-234-01 - English - 2007-2008
(Spring) Literature and Film of the Korean Diaspora - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
While recognizing the diasporic globality of Koreans throughout the twentieth century, this course focuses on the geopolitical interpenetration of the U.S. and Korea from the late nineteenth century to the current day. In a century hegemonically labeled "American," Korean diasporic literature and film bespeak the imprint of U.S. power. This course adopts a periodizing frame, aggregating its materials under four rubrics: 1. Sovereign Korea in America (1902-1945); 2. "Liberation" and the "Forgotten War" (1945-1953); 3. The Cultural Politics of Debt (1960s); and 4. Sa-I-Gu (1990s).
Prerequisites: soph, or permission of instructor
Notes: 2 meeting (75 minutes)
Instructors: C. Hong

ENGL-235-01 - English - 2007-2008
(Spring) Modern British Poetry
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This introduction to modern British poetry pays special attention to the emergence, consolidation, and dismantling of modernist poetry and poetics. It will link this literary history with, amongst other things, the loss of faith, the two world wars, and the relationship between monumental aesthetics, utopian poetics, and totalitarian politics. Writers will include Hardy, Yeats, Eliot, H.D., and Auden.

Prerequisites: soph, or English 200
Notes: 2 meetings (75 minutes)
Instructors: N. Alderman

**ENGL-236-01** - English - 2007-2008
( Spring) The English Novel from Defoe to Austen
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course will focus on well-known English novels of the 18th and early 19th century while introducing some of the different theoretical arguments regarding the emergence and history of what is called the modern novel. Novelist will include Defoe, Richardson, Sterne, Burney, Radcliffe, and Austen, with supplementary readings in theory and criticism.
Prerequisites: 4 credits in English, and soph, jr, or sr.
Notes: 2 meetings (75 minutes); meets English department 1700-1900 requirement
Instructors: J. Pyke

**ENGL-240-01** - English - 2007-2008
( Fall) American Literature I
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A survey of American literature from the literature of exploration through the major authors of the mid-nineteenth century, with special attention to the formation of an American literary tradition, along with the political, social, and religious context that helped shape the imaginative response of American writers to their culture.
Prerequisites: soph, or permission of instructor
Notes: 2 meetings (75 minutes); meets English department 1700-1900 requirement
Instructors: C. Benfey

**ENGL-241-01** - English - 2007-2008
( Spring) American Literature II
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A continuation of English 240, which explores the diversity of writers and literary forms that arose in U.S. society in the period from the Civil War to World War I. Authors may include Alcott, Chopin, Crane, Dreiser, Dunbar, Dunbar-Nelson, DuBois, Sui-Sin Far, Gilman, Harper, James, Jewett, Stein, Twain, Wharton, and Whitman. Will address the development of realism and naturalism, and the beginnings of modernism, and explore literary redefinitions of race, gender, sexuality, and class as shaped by social and economic pressures during this era.
Prerequisites: soph, or permission of instructor
Notes: 2 meetings (75 minutes); meets English department 1700-1900 requirement
Instructors: E. Young

( Spring) Twentieth Century and Contemporary African American Literature: Innovation, Strategy, Form
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Speaking-intensive)
This course will explore twentieth-century and contemporary African American writers of great political import and innovation, beginning in the 1950s before the Black Arts movement with Gwendolyn Brooks, Ralph Ellison, James Baldwin, and Lorraine Hansberry, turning to writers such as June Jordan, Amin Baraka, and Ishmael Reed. Post-movement writers may include Lucille Clifton, Toi Derricotte, Toni Morrison, Alice Walker, Harryette Mullen, Rene Gladman, Gary Fisher, and Anna Deveare Smith. Students will address the role of artistic strategy in these writers’ works—poem, essay, play, novel, particularly in thinking about issues of race, gender and sexuality, and (black) self representation.
Prerequisites: soph, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: R. Wilson

(Fall) Asian American Cultural Production: Racial Formation, Historiography, Genre - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Textual form, according to Fredric Jameson, bespeaks the historical situation. By considering case studies--Chinese labor exclusion, Japanese internment, Filipino colonization, and others--we will inquire whether this description holds true for Asian American cultural production. In engaging literary texts and other discursive forms--legal cases, ethnography, visual documents--we will query the relation of "Asian American" form to historical content. How do asymmetries in social terrain--exclusion, ghettoization, occupation, removal--function as limits for modes of narration? We will read America Is in the Heart, No-No Boy, China Men, Dictée, Bone, and State of War.

ENGL-280-01 - English - 2007-2008
(Fall) Literary Criticism and Theory
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)
This course is designed to offer students a broad historical overview of literary theory as well as exposure to contemporary debates about "theory" and literary representation. The course is both an exercise in practical criticism and a survey of the Western critical tradition from Plato to Derrida. Beginning with the question of why Plato wished to ban poets from his ideal Republic, the course will go on to consider such topics as the Classic vs. Romantic theories of the imagination, the "invention" of psychology and the necessary difficulty of much modern literature, the relation of gender and ethnicity to literary expression, and the uncertainties of literary interpretation.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)

ENGL-312-01 - English - 2007-2008
(Fall) Shakespeare, the Theatre, and the Book
In his own time, Shakespeare's writings had life both onstage and in print. This seminar invites students to locate the works we study in relation to the early modern theater and to the history of the book, especially the development of a reading audience for popular art. Readings include such works as *Romeo and Juliet*, the sonnets, *Troilus and Cressida*, and *King Lear*. We will also explore current critical debates about gender, sexuality, and literary genre. Substantial opportunity will be provided for independent work reflecting each student's own interests.

**(Spring) Gender and Class in the Victorian Novel**

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course will investigate how representations of gender and class serve as a structuring principle in the development of the genre of the Victorian novel in Britain. We will devote significant attention to the construction of Victorian femininity and masculinity in relation to class identity, marriage as a sexual contract, and the gendering of labor. The texts chosen for this course also reveal how gender and class are constructed in relation to other axes of identity in the period, such as race, sexuality, and national character. Novelists will include Dickens, Eliot, Gaskell, C. Bronte, and Hardy. Supplementary readings in literary criticism and theory.

**Prerequisites:** jr, sr, 8 credits in department including English 220, 230, or permission of instructor

**Notes:** 2 meetings (75 minutes); meets English department 1700-1900 requirement

(Spring) Queer Kinship in Asian North American Literature, Film, and Video

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(American Studies 301s-03 & Film Studies 370s-02 & Gender Studies 333s-15)

This course examines alternative kinship formations in Asian North American cultural production. It will focus on the gender and sexual management of racial bodies since the nineteenth century—from the U.S. Page Law of 1875 that restricted Chinese women on the basis of their presumed sexual immorality to various forms of "racial castration" that mediate Asian masculinities. We will consider how alternative kinship arrangements and queer cultural projects expose and/or upset the narrative assumptions embedded in heteronormative scripts of nationalism.

(Spring) The Political Imagination in Contemporary South Africa

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

This seminar examines the variety of literary and cultural expression in South Africa since the 1970s, focusing on the relations between art and political struggle. Among the topics to be discussed are the imagination of history in South African literature; the emergence of the Black Consciousness movement (and its legacies); the role of theater and poetry in the anti-apartheid movements; and the responses of the Truth of Reconciliation Commission. Among the authors to be studied are Gordimer, Coetzee, Fugard, Ndebele, Wicomb, Tlali, and Mda, along with a number of contemporary poets, playwrights, and filmmakers.

(Spring) In the Law's Shadow: The Visual Archive of America at War - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course isolates three sets of events—Hiroshima/Japanese American internment, Vietnam, and 9/11/Iraq/Guantanamo—as a foundation for our look at the visual archive of the U.S. as superpower at war. Given that the camera image has emerged a privileged narrative mode for U.S. wartime conflict, we will consider the restraints (from state repression to codes of "taste") determining what can and cannot be seen. We will examine shadowy sites associated with the suspension of law and fundamental rights, spaces such as Tule Lake, My Lai, and Abu Ghraib, and consider how the war photograph functions as a mediated yet equivocal exposure of the logic used to justify U.S. intervention.

(Spring) Globalization and Culture

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This class will probe the global conflicts exploding around us to find the material forces hidden there. We will briefly study market cultures from time out of mind to recover how Greek and Renaissance literature reconciled “civilization” with the ancient powers that precede it and remain occulted within it. Topics will include neoliberalism and neocolonialism; terrorism, counter-terrorism, and torture; and, inevitably, the U.S. in the Middle East. Fiction by Coetzee, Ondaatje, Rushdie, Devi, and Subcomandante Marcos; documentary film on the Caribbean and Chiapas as well as the backrooms of U.S. foreign enterprise; theory by Klare, E. Ahmed, Khalidi, Mamdani, and Chomsky, among others.

(Spring) Readings in Literary Biography

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Biography is both a literary genre and a mode of literary scholarship. This course will explore some varieties of the biographical impulse in both fiction and non-fiction. We will begin with eighteenth-century British models: Samuel Johnson’s *Lives of the English Poets* and James Boswell’s *Life of Johnson*. Then we will turn to ideas of biography and literary portraiture in the work of Henry James and Gertrude Stein. We will explore the shift associated with the advent of Freud and the Bloomsbury innovations of Lytton Strachey and Virginia Woolf, and close with attention to recent experiments in biography by writers such as Janet Malcolm, Rachel Cohen, and Richard Holmes.

**ENGL-373-01 - English - 2007-2008**

**(Fall) Nature and Gender: "A Landscape of One's Own"
This seminar will focus on how women writers in the nineteenth and early twentieth centuries told their life stories in the context of the islands, prairies, forests, and deserts of the United States. Readings will include works by such writers as Thaxter, Freeman, Jewett, Stewart, Zitkala-Sa, Austin, Cather, and Hurston; genre will include autobiographical essays, narratives, biography, fiction, and poetry. Some visual works (paintings, photographs, film) may also be added to the list of texts.

Prerequisites: jr, sr, 8 credits from the department or permission of instructor
Notes: 1 meeting (3 hours); meets English department 1700-1900 requirement; meets English department seminar requirement
Instructors: L. Glasser
Expected enrollment: 15

ENGL-374-01 - English - 2007-2008
(Spring) Hitchcock and After
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Gender Studies 333f-03 & Film Studies 380s-01)
This course will examine the films of Alfred Hitchcock and the afterlife of Hitchcock in contemporary U.S. culture. We will interpret Hitchcock films in a variety of theoretical frames, including feminist and queer theories, and in historical contexts including the Cold War. We will also devote substantial attention to the legacy of Hitchcock in remakes, imitations, and parodies. Hitchcock films may include Spellbound, Strangers on a Train, Rear Window, Vertigo, North by Northwest, Psycho, The Man Who Knew Too Much, Mannie, and The Birds; additional works by Brooks, Craven, De Palma, and Sherman. Readings in film and cultural theory; screenings at least weekly.

Prerequisites: jr, sr, at least 4 credits in film studies, and at least 4 credits in English beyond 101, or permission of instructor
Notes: 1 meeting (3 hours); plus weekly screening; meets English Department seminar requirement
Instructors: E. Young
Expected enrollment: 18

ENGL-375-01 - English - 2007-2008
(Fall) The Conceptual Black Body in Twentieth-Century and Contemporary Visual Culture
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

We will explore the black body through the visual artists Ellen Gallagher, Kara Walker, William Pope, and Adrian Piper as well as pop icons Michael Jackson, Missy Elliot, and Jay Z. How does their work complicate representations of blackness through painting, video, text, music, and performance, whether through the black body's realness, abstraction, opulence, or annihilation? Using theoretical discussions by Michele Wallace, Roland Barthes, Tricia Rose, Homi Bhahba, Fred Moten, and others, students will write several very short creative and critical pieces, each one becoming part of a larger, cohesive final project.

Prerequisites: jr, sr, or permission of instructor
Notes: 1 meeting (3 hours); meets English department seminar requirement
Instructors: R. Wilson
Expected enrollment: 15

ENGL-379-01 - English - 2007-2008
(Spring) Suzan-Lori Parks, Revolutionary Playwright
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Theatre Arts 350s-02)
This seminar examines the plays and other writings of Suzan-Lori Parks, from her "juvenilia" at Mount Holyoke (95) to her epic 365 Days/ 365 Plays, focusing on The Death of the Last Black Man in the Whole Entire World, The America Play, Venus, In the Blood, Topdog/Underdog, the novel Getting Mother's Body, and biographical and critical sources. Particular attention is paid to the eclectic influences upon her work (Hawthorne, Lincoln, Faulkner, Brecht, Beckett, Baldwin, A. Kennedy, Shange, A. Wilson) and to her performance practices and collaborators. Before the course, students should see productions of her work, particularly 365 Plays (www.365days365plays.com).

Prerequisites: jr, sr, 8 credits in English, Theatre Arts, or African American studies beyond the 100-level, and permission of instructor
Notes: 1 meeting (3 hours); occasional screenings/live performances; meets English and Theatre Arts department seminar requirements
Instructors: J. Lemly
Expected enrollment: 15

ENGL-381-01 - English - 2007-2008
(Spring) Asian North American Critical Genealogies
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This seminar examines the distinct critical genealogies within Asian Canadian and Asian American literary and cultural studies over the last three decades, probing their evolving objectives and their intellectual futures. Throughout the course, we will examine the major shifts and intersections in these fields, focusing in particular on: androcentric cultural nationalism; feminist and queer interventions; historical materialist, psychoanalytic, postcolonial, and deconstructive theoretical approaches; and domestic and transnational critical formations.

Prerequisites: jr, sr, 8 credits in department beyond English 101, or permission of instructor
Notes: 1 meeting (3 hours); meets English department seminar requirement
Instructors: I. Day
ENGL-382-01 - English - 2007-2008
(Fall) Topics in Postcolonial Studies: Literary and Global Form
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course will juxtapose Enlightenment philosophy—the first attempt to think of the globe as a single and unified entity, occupying common time and shared space—with postcolonial attempts, both literary and theoretical, to capture the globe's inescapable interconnectedness and its irreducible heterogeneity. The course will offer a selective but wide survey of postcolonial theory and literature on the latter topic, including authors such as Harvey, Spivak, Said, Rushdie, Selvadurai, and Ghosh.
Prerequisites: jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: S. Ahmed

(Fall) Environmental Science
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement (Community-based learning course)
Most of our society's environmental problems are complex and interdisciplinary in nature. Environmental science is a course designed to teach integrative thinking, the "scientific method," and problem solving. Lectures will be drawn from a variety of scientific fields including ecology, hydrology, chemistry, geology, and biology with an emphasis on ecosystems and biogeochemical cycles. The course will use case studies of regional environmental problems, practical hands-on problem solving, and landscape analysis. Training in field and laboratory techniques is an integral part of the course. Priority given to environmental studies majors.
Prerequisites: Environmental Studies 100 or Environmental Geology 101; one course in statistics is recommended
Notes: 2 meetings (75 minutes); 1 lab (3 hours)
Instructors: J. Bubier
Section Instructors: 01 LAB J Bubier | 02 LAB J Bubier |

(Spring) Women and the Environment - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Geog-209, Gndst-212)
Examines the complex factors that shape different women's interactions with and on behalf of the environments and communities in which they live. Drawing on diverse cultural, national, and disciplinary backgrounds, this course explores women's theories and practices regarding ideas of nature, ecofeminism, children's health and welfare, resource and land-based systems, human rights and social justice, wildlife preservation and animal rights, toxins and environmental health, sustainable development, and global environmental change.
Notes: 2 meetings (75 minutes)

(Spring) Conference Courses in Environmental Studies: International Water Issues and Policies
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Selected topics in areas of environmental interest, determined by faculty expertise and student needs. Study in small groups or by individual students working with faculty.
Water scarcity now poses serious constraints on food security, ecological health, and regional peace and stability in many parts of the world. This course examines the history of water development, the signs and consequences of water scarcity today, and the emerging politics of water. Case studies (e.g., the Everglades, Middle East rivers) provide an opportunity to grapple with real-world problems. A key focus is the interplay between technologies, policies, institutions, and law in confronting water challenges.
Prerequisites: Department major or minor, priority to jrs, srs
Notes: 1 meeting (3 hours)
ENVS-321-02 - Environmental Studies - 2007-2008  
(Spring) Conference Courses in Environmental Studies: Environmental Justice: Theory and Practice  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
Preamble (for topics courses): Selected topics in areas of environmental interest, determined by faculty expertise and student needs. Study in small  
groups or by individual students working with faculty.  
Examines the historical, theoretical, and political foundations of environmental justice. Drawing connections between the exploitation of the  
environment and broader social dynamics of inequality, environmental justice links concerns with ecological degradation and sustainability with issues  
such as civil rights and socioeconomic inequalities. Uses interdisciplinary approaches from geography, anthropology, history, and political economy to  
explore diverse environmental justice struggles in both U.S. and international contexts. Examines interconnections between environmental justice  
theory and practice in contemporary issues focusing on health, livelihood, and community sustainability.  
Prerequisites: jr, sr, or permission of instructor  
Notes: 1 meeting (3 hours)  
Instructors: G. Di Chiro  
Expected enrollment: 15

ENVS-321-03 - Environmental Studies - 2007-2008  
(Spring) Conference Courses in Environmental Studies: Race, Gender, and Environment  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
(Gender Studies 333)  
Preamble (for topics courses): Selected topics in areas of environmental interest, determined by faculty expertise and student needs. Study in small  
groups or by individual students working with faculty.  
An investigation into the sociocultural histories, definitions, and causes of environmental problems. Explores how race, gender, and class are  
embedded in social, scientific, and political formations, including perceptions of "environment." Using multiple theoretical traditions the course  
examines ways that different cultures and societies confront questions of identity, power, and knowledge in their ideas and actions to protect the  
environment. Draws on contemporary scholarship and social activism from national and international contexts and addresses environmental topics  
including ideas/theories of nature, feminist environmentalism, environmental justice, and sustainable development.  
Prerequisites: jr, sr or permission of instructor  
Notes: 1 meeting (3 hours)  
Instructors: G. Di Chiro  
Expected enrollment: 15

ENVS-321-04 - Environmental Studies - 2007-2008  
(Spring) Conference Courses in Environmental Studies: Environmental Contaminants and Health: Communicating the Science to the  
Public  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
Preamble (for topics courses): Selected topics in areas of environmental interest, determined by faculty expertise and student needs. Study in small  
groups or by individual students working with faculty.  
It is essential for scientists, particularly environmental scientists, to communicate their findings to the public. One excellent outlet is the World Wide  
Web. Students will learn the basic concepts of both toxicology, the study of chemical contaminants, and communicating science. They will apply these  
skills as they pursue focused research and intensive writing projects (topics to be decided by the class) for publication in the Encyclopedia of Earth, an  
online high quality science-based public resource. Through reading, discussion and writing, students will learn how to: interpret and translate scientific  
literature; write for the general public; edit their own work and that of others.  
Prerequisites: 300-level science course or permission of instructor  
Notes: 1 meeting (3 hours)  
Instructors: E. Monosson  
Expected enrollment: 12

(Spring) Conference Courses in Environmental Studies: Sustainable Agriculture and Agroecosystems  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
Preamble (for topics courses): Selected topics in areas of environmental interest, determined by faculty expertise and student needs. Study in small  
groups or by individual students working with faculty.  
This interdisciplinary science course examines agricultural ecosystems through the study of nutrient cycling, soil processes, hydrology, and plant  
ecology. The course focuses on reading the primary scientific literature regarding issues of nutrient management, environmental impacts of agricultural  
practices on adjacent ecosystems, and contributions of agricultural systems to global climate change. Conventional, low-input, and organic agricultural  
practices are analyzed from the standpoint of environmental impacts. Field trips explore the application of agronomic practices in organic and low-  
input production systems, with an emphasis on local approaches to sustainable agriculture.  
Prerequisites: at least 8 credits of biology, chemistry, or environmental science, or permission of instructor  
Notes: 1 meeting (3 hours)
Instructors: B. Hooker  
Expected enrollment: 18

*(Spring)* Photography and Landscape: Earth As Visual Text - *Not offered this year/term*  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
Our understanding of the world around us is deeply influenced by the visual images created in response to human experience of nature. This course explores photography as a way of seeing and interpreting landscape and environment through time. Projects allow students to examine visual elements of landscape, develop photographic techniques, and create photo narratives of their own. Using readings, observations, and photographs we consider how cultural and environmental issues and insights are communicated through photographic media. Basic understanding of photography and access to a camera are required.  
Prerequisites: Art (Studio) 200 or permission of instructor  
Instructors: L. Savoy  
Expected enrollment: 15

*(Spring)* Biogeochemistry of Northern Ecosystems  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
(Speaking- and writing-intensive; Biology 344s)  
Global climate models and recent evidence show that ecosystems in the northern latitudes are extremely sensitive to climate change. This interdisciplinary science course examines boreal, subarctic, and arctic ecosystems through the study of nutrient cycling, plant ecology, hydrology, soil processes, and biosphere-atmosphere interactions. Topics include fundamentals of biogeochemical cycling of major elements such as carbon and nitrogen at scales from the microscopic to global, sensitivity and feedbacks to climate change, and disturbance processes such as fire and permafrost degradation.  
Prerequisites: at least 8 credits of 200-level lab science and permission of the instructor. Global Biogeochemistry (Chem 232) recommended.  
Notes: 1 meeting (3 hours)  
Instructors: J. Bubier  
Expected enrollment: 15

*(Fall)* Senior Seminar in Environmental Studies  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
(Community-based learning course)  
This is the capstone course of the environmental studies major. The course explores linkages among the diversity of disciplines that contribute to the environmental studies major, illustrates how these disciplines that contribute to the environmental studies major are used in environmental decision making, enables students to inform one another's roles as environmentalists, and provides students with opportunities to develop individual and cooperative projects. See the course catalogue supplement for topics, which change from year to year.

*(Spring)* European Studies Seminar: Foreigners Within, Foreigners Without: Europe and Its New Neighbors  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The enlargement of the European Union (EU) to Central and Eastern European countries has generated new neighbors to the east and south: the Western Newly Independent States (WNIS) of Russia, Belarus, Moldova, and Ukraine, and Southern Mediterranean countries (SMCs) Egypt, Libya, and Tunisia. Europe's new neighbors make up 410 million inhabitants, but their GDP capita is barely one tenth of the European Union's. This has brought problems for the EU, including migration pressures, human trafficking, and refugees. How is the EU dealing with these issues and how will relations with the new neighbors affect the domestic and foreign policies of the EU?

Prerequisites: jr, sr; at least one course at the 200 or 300 level relevant to European studies or permission of the instructor

(Fall) Film and History: The Remake - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive)
How do films about historical figures and events differ from written versions? Why do Hollywood and the world's film industries continually re-imagine the events of the past (there have been over 40 films made about Joan of Arc alone), and what do audiences enjoy in these films? Through readings, discussion, and film screenings we will examine the relationship between cinema and history.
Prerequisites: fy or permission of instructor
Notes: 2 meetings (75 minutes), with a Tuesday night screening.
FLMST-201-01  -  Film Studies - 2007-2008  
(Spring) Introduction to Film  
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement  
This course teaches the basic concepts and critical skills involved in interpreting film. Through lecture, reading, discussion, and screening of films both in and outside of class, the student will become a more informed and sophisticated observer of the cinema. During the first half of the semester, the class will study form and style in narrative film as well as in nonnarrative practices such as avant-garde and documentary filmmaking. For the remainder of the course, the class will examine some of the major critical approaches in the field.  
Notes: 2 meetings (75 minutes), 1 screening (2 1/2 hours)

(Fall) Talking Pictures: An Introduction to Film - *Not offered this year/term  
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement  
(ARTH-202)  
Some of the best feature-length films of the past century have commanded our attention because of their compelling artistry and the imaginative ways they tell stories visually and verbally. This course closely studies narrative films from around the world, from the silent era to the present, and in the process it introduces students to the basic elements of film form, style, and narration. Some of the films to be considered are: Broken Blossoms, Battleship Potemkin, Citizen Kane, Contempt, The Bicycle Thief, Ugetsu, Rear Window, Woman in the Dunes, The Marriage of Maria Braun, Days of Heaven, and Moulin Rouge.  
Notes: 2 meetings, (1 75 minute and 1 2-hour screening)

(Fall) Production Seminar in the Moving Image: Eye and Ear Control: Beginning Video Production  
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement  
In this class we plunge into the multiple, overlapping, and contradictory histories and practices of experimental film and video. We will investigate the structures of experimental media and its makers’ deep understanding of craft and material. We will unpack the term "experimental" and create our own videos that engage, embrace, and dismantle traditional practices. We begin by looking at historical works and move into analyzing contemporary experimental media. This is a beginning course that covers the basics of shooting video, lighting, audio, and digital editing in the context of the above themes.  
Prerequisites: Permission of Instructor required.  
Notes: 1 meeting (3 hours), 1 screening (3 hours); a lab fee may be charged  
Instructors: J. Perlin

(January) Reading and Writing Film Criticism
To write about the movies is to write about much more than individual films. In this course we will study the film criticism of writers as diverse as Carl Sandberg, James Agee, and Susan Sontag in order to investigate the ways in which the cinema has been understood as an art form, a means of communication, and a cultural influence over the course of the 20th century. In addition to reading a substantial amount of film criticism, we will also watch films and write our own film reviews.

(Spring) Special Topics in Film Studies: Greek Tragedy and Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Class-212)
This course examines the evolution of tragedy in classical Athens from choral performance to sophisticated drama through the contributions of the three most important tragedians: Aeschylus, Sophocles, and Euripides. Attention is given both to the political context in which the plays were performed and to the dramatic effects employed by the playwrights that made the stage an influential medium of powerful artistry. Students will also study the influence of ancient tragedy on film by examining dramatic strategies modern directors employ and the allusions to Greek tragedy found in some innovative films by Roman Polanski, Woody Allen, Jules Dassin, Michael Cacoyannis, and others.

FLMST-230-01 - Film Studies - 2007-2008
(Spring) Documentary Film - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course examines the principles, methods, and styles of nonfiction film. Beginning with the "actualités" of film history's first practitioners and ending with contemporary self-reflexive films, such as Errol Morris's *The Thin Blue Line*, the class studies films that strive to represent some aspect of the real world as opposed to the fictional worlds of narrative cinema.

(Fall) History of World Cinema
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course offers an historical survey of the cinema as a developing art form and a means of communication. We will consider the national, economic, and social conditions of an international medium that has existed for over a century. The national and thematic focus of the course shifts through the semester. For example, we will focus on U.S. film in studying the earliest developments in film technology and narrative, Soviet and French films to study the formal and social experimentation of the 1920s, and films made in Cuba and Brazil to elucidate political filmmaking in the 1960s. The course provides a background for understanding film history and pursuing further studies in the field.
Prerequisites: Film Studies 201 or 202 or permission of instructor

(Fall) Film Genre: Film Genre and Gender
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to a specific film genre. Some examples of genres that might be studied are: the science fiction, horror, melodrama, musical, Western, detective, or gangster film.

This course examines the development of Hollywood film genres largely in the post-studio era, particularly the musical, the melodrama, the horror film, and the science fiction film. We will consider the evolution of these four genres in relation to changes in the film industry and in American society, especially in relation to gender.

(Spring) Film Genre: Race, Ethnicity, and the Hollywood Musical
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to a specific film genre. Some examples of genres that might be studied are: the science fiction, horror, melodrama, musical, Western, detective, or gangster film.

The musical film has been the most criticized of Hollywood genres for its "escapism" and all-pervasive "whiteness." Yet it was also one of the few genres to feature and promote performers from different racial and ethnic groups such as Al Jolson, Lena Horne, and Carmen Miranda. We will examine the ways in which this prototypical Hollywood product ignored and reflected the dynamics of race and ethnicity in American society.

Prerequisites: Film Studies 201 or 202 or permission of instructor
Notes: 2 meetings (75 minutes) and 1 screening (2 hours, 30 minutes)
Instructors: D. Garcia
Expected enrollment: 25

(Fall) Film Genre: The Musical Film - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Gender Studies 204-02)
Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to a specific film genre. Some examples of genres that might be studied are: the science fiction, horror, melodrama, musical, Western, detective, or gangster film.

This course explores the American musical film from its first appearance in the early 1930s in the films of Busby Berkeley to its recent revival in films such as Baz Luhrmann's Moulin Rouge. The course also examines musical films from other national cinemas that either comment self-reflexively on the genre and its American context and/or expand common definitions of the genre.

Prerequisites: Film Studies 201 or 202 or permission of instructor
Notes: 2 meetings (75 minutes) and 1 screening (2 hours, 30 minutes)
Instructors: R. Blaetz

(Spring) Film Genre: The Science Fiction Film - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to a specific film genre. Some examples of genres that might be studied are: the science fiction, horror, melodrama, musical, Western, detective, or gangster film.

This course explores various manifestations of the science fiction film as it has appeared from the beginning of film history. Examples include the early "magic" films of Melies and Clair, as well as the numerous examples of the genre from the 1950s, and more contemporary films such as 2001 and Videodrome. The course traces the formal and thematic history of the genre, with attention paid to the figuration of modern science, the evolution of social roles, the logical body, and postmodern representations of time and space.

(Fall) National and Transnational Cinema: American Silent Film and Spectatorship, 1905-1927
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to the cinema of a single country or group of countries. Some examples that might be studied are: French cinema, Francophone cinema, Indian cinema, Eastern European cinema, or Latin American cinema.

This course is an introduction to silent cinema in the U.S. and the contexts of its reception. We will consider issues of gender, age, race, and ethnicity in the making of the cinematic audience. Contemporary forms of live entertainment, such as vaudeville, minstrelsy, burlesque, paglism, and ethnic theatre, will be discussed in order to illuminate the broader cultural origins of American film.

*(Fall) Film Authorship: Films of Margarethe von Trotta - *Not offered this year/term*
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive; Grmst-223)
Award-winning contemporary filmmaker Margarethe von Trotta has created controversy both as a woman in a "male" domain and through her women protagonists. We study unconventional women who challenge their worlds and themselves, trying to forge a place in society and relationships which break through traditional patterns. The course also introduces basic film vocabulary and explores such cultural topics as lifestyle changes (in the comedy Mit fünfzig küssen Männer besser), German terrorism and the tabloid press (The Lost Honor of Katharina Blum), love in divided Germany (The Promise), a women's boycott which saved their Jewish husbands (Rosenstra&szligje), and the "secret" police (Die andere Frau).

(Spring) Topics in National/Transnational Cinemas: Queer Kinship in Asian North American Literature, Film, and Video
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): Offers a critical, historical, and theoretical approach to the cinema of a single country or group of countries. Some examples of national cinemas that might be studied are: French cinema, Francophone cinema, Indian cinema, Eastern European cinema, or Latin American cinema.

This course examines alternative kinship formations in Asian North American cultural production. It will focus on the gender and sexual management of racial bodies since the nineteenth century—from the U.S. Page Law of 1875 that restricted Chinese women on the basis of their presumed sexual immorality to various forms of "racial castration" that mediate Asian masculinities. We will consider how alternative kinship arrangements and queer cultural projects expose and/or upset the narrative assumptions embedded in heteronormative scripts of nationalism.

(Spring) Topics in Film Theory: Queer Theory and Recent Queer Film in Latin America
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Reading-intensive; Spanish 320-08.)
Preamble (for topics courses): Offers a consideration of one or more of the methods through which the medium of film is understood aesthetically and/or culturally.
In the 1990s GLBT liberation entered the public sphere as a major political force. Simultaneously, American academia produced and exported a new academic discipline: queer studies. As a consequence, the North American liberational model displaced cultural and theoretical models of sexuality of other countries. We will consider some of the key U.S. texts that have consecrated queer studies as a discipline and juxtapose them with theories and cinematic texts from Argentina, Brazil, Chile, Cuba, and Mexico in order to recuperate cultural models under erasure in the wake of the U.S. model's identity-focused and consumer-driven triumphalism.

(Fall) First Year Seminar: Sex and the City: Gender-Power Relations in Early Modern Europe

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

First-year seminar (Writing-intensive; Taught in English; RLL 105, SPAN 105, ITAL 106)

Preamble (for topics courses): Seminar in Reading Writing and Reasoning

Political, social, and economic life was radically changed by the growth of Europe’s cities between medieval and modern times. These changes were debated in sexual terms as conflicts between men and women. As we study short stories from early modern France (Madame de Lafayette), Italy (Giovanni Boccaccio), and Spain (Miguel de Cervantes and María de Zayas), and place them in their historical contexts, we will ask questions such as: To what extent do these works challenge or reinforce dominant models of gender relations and negotiate concepts and institutions such as marriage, honor, patriarchy, and blood purity? How do those topics apply to us today?

(Fall) Period Courses: Topic: Jeanne d'Arc: réalité disputée et mythe conquérant à travers les siècles (pre-1800)
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): The usual periodization of French literature and culture is by century. Some period courses focus on the characteristics of specific centuries. Others focus on artistic or intellectual movements: gothic, Renaissance, romantic. All period courses, whatever their conceptual framework, integrate texts and historical contexts.
This seminar will explore the changing image of Joan of Arc from medieval times to the present--mainly pre-1800--via literature, historiography, and the visual arts. Authors to be examined include Joan herself, Christine de Pizan, Montaigne, Voltaire, Sade, Michelet, and Anouilh, via genres ranging from poetry and novels, through catalogues of "femmes fortes", to theatre. Artists and filmmakers will include Guillonnet, Dreyer, and Rivette. Readings and images will represent religious and political sentiments from the left-wing and Resistance as well as the secular-centrist and Catholic right and their analogues, within their respective cultural-historical contexts, through the ages.
Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor
Notes: one meeting (2 hours, 50 minutes)
Instructors: N. Margolis

FREN-331-01 - French - 2007-2008
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Preamble (for topics courses): These courses examine a definable phenomenon--an idea, a movement, an event, a mentality, a cultural structure or system, an historical problem, a critical mode--relevant to the civilization of France or of French-speaking countries. Readings from a variety of disciplines shed light on the particular aspect of thought or culture being studied.
From the very beginning, innovation, experimentation, and artistic ambitions have shaped the evolution of French cinema. For more than a century, filmmaking in France has been defined by these innovations: Georges Mélès and the invention of special effects, Buñuel's antics, Jean Renoir's involved narratives, the creative explosion of the New Wave, or today's adventurous directors. This class will focus on those movies and those directors that have transformed and expanded the art of cinema, and will include works by Cocteau, Varda, Pontecorvo, Godard, Clément, Truffaut, Carax, and many others.
Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): These courses examine a definable phenomenon—an idea, a movement, an event, a mentality, a cultural structure or system, an historical problem, a critical mode—relevant to the civilization of France or of French-speaking countries. Readings from a variety of disciplines shed light on the particular aspect of thought or culture being studied.

In this course, we will study novels (and a few films) that chronicle and analyze the coming-of-age process of a principal character. In each case, we will travel with the character as she/he moves from ignorance to knowledge, from naïveté to sophistication, from inexperience to experience, from adolescence to adulthood. Comparing and contrasting a number of works from several different historical periods, we will define both the constants and the variables of the subgenre of the roman d’initiation and examine its corollary themes: the family, the individual and society, gender, sexuality, travel, education, egotism, and introspection.

Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor

(Spring) Courses in Francophone Studies: Topic: Ousmane Sembène: L’oeuvre d’un artist-militant - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): These courses study nonmetropolitan French-speaking cultures and literary works written in French outside Europe. Areas of focus are one or more of the following regions: Africa, the Caribbean, or Canada.

Né en 1923 au Sénégal, l’écrivain-cinéaste Ousmane Sembène est un des rares témoins des trois périodes marquantes de l’histoire contemporaine de l’Afrique dite francophone: la période coloniale, la lutte pour les indépendances politiques et économiques et l’effort de secourir le joug du néocolonialisme à travers la réhabilitation du patrimoine culturel du continent. Ce cours consacré à son oeuvre vise à explorer les grands faits marquants de sa vie, son engagement dans les mouvements de gauche européens, sa venue à l’écriture et surtout les caractéristiques dominantes de son œuvre cinématographique.

Prerequisites: Two of 215, 219, 225, or 230, *and* all students must schedule an interview with the course instructor during November 2005 advising period

Notes: 1 meeting (2 hours, 50 minutes). NOTE: Interview with course instructor during fall 2005 advising period is mandatory.

(Fall) Courses on Women and Gender: Topic: "Every Secret Thing": Contemporary Women's Autobiographical Narrative in French - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): These courses explore cultural, literary, and social issues relating to women and gender identities in France and French-speaking countries. Topics may include women’s writing, writing about women and men, the status of women, feminist criticism, and theories of sexuality and sexual difference.

This course will examine contemporary autobiographical narratives written by women, with a particular focus on living authors whose works include fictional, nonfictional, and semifictional texts (Ernaux, Condé, Cusset, Nothomb). We will analyze the ways in which these authors present their life stories, especially traumatic or secret episodes, and the ways in which their works discuss the process of that presentation and of memory itself.

Themes that are common to these autobiographical texts include: relationships with family, education, sexuality, class, and love. We will study several autobiographical films made by women.

Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor

(Fall) Courses in Advanced Language Study: Topic: Atelier de traduction
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): These courses investigate the French language, past or present, and refine students' linguistics skills by focusing on nuances of written and spoken expression. Areas of study may include stylistics, translation, phonology, morphology, syntax, rhetoric, and dramatic art.
This course is designed to give students practical, hands-on experience in the translation, from French to English, of a literary work. We will begin the semester with readings in translation theory before moving on to the selection (by students) of a literary text. Students will work collaboratively in teams on a collective translation; teams will meet on a weekly basis with the professor for a detailed review of the work in progress. At the end of the semester, each team will submit the definitive version of their translation as well as a paper reflecting on the particular linguistic challenges encountered and their resolution thereof.
Prerequisites: Two of 215, 219, 225, or 230; or permission of department chair and course instructor
Notes: 1 meeting (2 hours, 50 minutes). NOTE: Limited to students who have taken at least two 300-level French courses or, in special cases, per instructor.
Instructors: C. Rivers

(Spring) Advanced Level Seminar: Topic: Proust: À la Recherche du temps perdu
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Preamble (for topics courses): The seminar is intended to challenge students at the highest level. A regular rotation of topics ensures a variety of perspectives across genre and period, encompassing linguistic, literary, theoretical, and cultural issues of French and Francophone studies.
Development of critical skills is stressed through classroom discussion and critique of writing projects, drawing on individual student interests and experiences as they relate to the topic of the course.
À la Recherche du temps perdu is the greatest literary masterpiece of the twentieth century and is both rooted in a specific past and universal in its analysis of human intellect and emotion. We will concentrate on themes of love and desire in three relationships: Swann's adoration of Odette; the narrator's fixation on Albertine; and the Baron de Charlus's homosexual passions. Assignments will include most of Du Côté de chez Swann, Sodome et Gomorrhe, and Le Temps retrouvé; excerpts from the other four novels; selections from important criticism; and film. Analysis of construction of the entire work will facilitate reading unassigned sections for ambitious Proustians.
Prerequisites: 12 credits including two courses at the advanced level, or permission of department chair and instructor
Notes: 1 meeting (2 hours, 50 minutes).

Gender Studies

GNDST-101-01 - Gender Studies - 2007-2008
(Fall) Introduction to Gender Studies
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking-intensive)
This course examines the social and historical construction of gender from cross-cultural and interdisciplinary perspectives. The intersections among gender, race, class, and sexuality in various contexts, past and present, will be central to our inquiry. Topics will include the politics of appearance, women's economic status, sexual violence, racism, legacies of colonialism, the challenges of transnational feminist activism, and strategies for change. We will examine the development of feminist theory and its practices in various local and transnational contexts.

GNDST-101-01 - Gender Studies - 2007-2008
(Spring) Introduction to Gender Studies
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Gender Studies takes its departure from insights made by feminists about the separation between sex and gender. Thus, this course will start by investigating how that distinction was first drawn and then add an intersectional analysis that takes into account class, race, and sexuality (among other tropes). Then we will turn our focus specifically to understanding what gender is as theorized by various contemporary theorists. Once that has been understood, we will set ourselves to the task of investigating more explicitly particular and ambiguous gender identities—female femininity, female masculinity, male femininity, male masculinity, trans, intersexed, and more.

(Fall) Women's Public Voices - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
First-year seminar (Writing-intensive)
This course will explore creating and critiquing public writing by women. It will examine the genres of the op-ed, political column, memoir, and broadcast commentary. The seminar will ask the questions: what constitutes a “women's issue” in public discourse and how can women best influence public debate. Among the public writers we will read are MHC alumnae who write for newspapers, magazines, and other media outlets. Students also will learn to write and submit for publication or broadcast op-eds and short radio commentaries. A field trip to meet with women writers and editors at the New York Times is planned.
Prerequisites: fy or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: M. Ackmann

GNDST-201-01 - Gender Studies - 2007-2008
(Spring) Methods and Practices in Feminist Scholarship
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course examines a range of methodologies from the humanities, social sciences, and natural sciences and provides a foundation for advanced work in the major. It considers the specific advantages of diverse disciplinary approaches for feminist inquiry as well as their limitations for considering issues that do not divide neatly along disciplinary lines. The course encourages students to begin to think about the challenges of doing rigorous interdisciplinary research.
Prerequisites: Gender Studies 101 or Women's Studies 101; one laboratory course in a natural or physical science (completed or taken concurrently); or permission of the instructor
Notes: 2 meetings (75 minutes)
Instructors: M. Renda
Expected enrollment: 25

(Fall) Women and Gender in the Study of Culture: Sexuality and Women's Writing
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(English 286)
An examination of how U.S. women writers in the twentieth century represented lesbian, queer, and homoerotic possibilities in prose. Topics to include: literary strategies for encoding sexuality; thematic interdependencies between sexuality and race; historical contexts such as the "inversion" model of homosexuality and the Stonewall rebellion; theoretical issues such as the "heterosexual matrix," the "epistemology of the closet," and tensions between lesbian and queer models of sexuality. Authors studied may include Allison, Brown, Cather, Gomez, Larsen, McCullers, Moraga, Nestle, Pratt, Stein, and Woolson; theorists may include Butler, Lorde, Rich, and Sedgwick.

(Spring) Women and Gender in the Study of Culture: Women Writing in India
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Taught in English; Asian Studies 220)
Critical study of women's writing in India, in genres ranging from classical and medieval poems, tales and songs (e.g., Tiruppavai) to novels, plays and personal narratives by modern women writers (e.g., Rokeya Hossain's Sultana's Dream, Arundhati Roy's The God of Small Things), in translation from Indian languages and in the original English. We will focus on women's perspectives and voices, women's agency, and resistance to dominant discourses. Attention is paid to historical contexts, the socio-religious constructions of women and gender, and the role of ideologies such as colonialism and nationalism in the production and reception of women's writing.
Notes: 2 meetings (75 minutes)
Instructors: I. Peterson
Expected enrollment: 30

(Spring) Women and Gender in the Study of Culture: Black Women Writers: Feminist Visions from the African Diaspora
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Writing-intensive; African American and African Studies 206)
This course will explore the influence of feminist politics on the writing of women throughout the African Diaspora. By exploring the different cultural, political, and historical contexts in which these writers work, we will attempt to define the continuities and conflicts that exist within the vast field of black women's writing. Why, when, and how did a black feminist consciousness emerge? How did racial tensions within the predominantly white feminist movement lead to the development of a separate black "womanist"/Third World agenda? How does feminist literature of the African Diaspora challenge negative stereotypes and misrepresentations of black women's realities?
Prerequisites: AFRAM 101 Intro to African American Studies, or permission of instructor
Notes: 2 meetings (75 minutes each)
Instructors: Z. Elliott
Expected enrollment: 25

(Fall) Women and Gender in History: Sexual Revolutions in U.S. History
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(History 283)
This class will evaluate the notion of "sexual revolutions" by examining three moments in U.S. history; the late eighteenth century, the turn of the twentieth century, and the 1960s and 1970s. In each, we will look at shifts in the relationships between race, class, gender, and sexuality. Our history will include the role of experts in the fields of religion, medicine, sexuality, and psychology and their efforts to define sexual deviance and promote sexual "normality." At the same time, we will study popular and subcultural sexual cultures found in brothels, bars, same-sex institutions, sports, bohemian circles, and political groups and look for strategies of resistance to normative regimes.
Notes: 2 meetings (75 minutes)

(Spring) Women and Gender in Philosophy and Religion: Women and Buddhism
The course examines Buddhist representations of women and women's representations of Buddhism. We will study materials by and about Buddhist women from Thailand, India, China, Tibet, Japan, and the U.S. Some of the questions we will ask are: How are women portrayed in Buddhist literature? How do they portray themselves? How have Buddhist women responded to sexism in their communities? How have Buddhist women contributed to the development of new Buddhist institutions?

Notes: 2 meetings (75 minutes)
Instructors: S. Mrozik
Expected enrollment: 20
This course explores the overlapping dualities of the feminine and the masculine, the private and the public, the home and the world. We examine different forms of power over the body; the ways gender and sexual identities reinforce or challenge the established order; and the cultural determinants of "women's emancipation." We emphasize the politics of feminism, dealing with themes that include culture, democracy, and the particularly political role of theory and on theoretical attempts to grasp the complex ties and tensions between sex, gender, and power.

(Spring) Women and Gender in Science: Gender in Science
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

This course examines explanations for the under-representation of women in science, technology, engineering, and math (STEM) with an eye to identifying how to increase the participation of women in science. The course will address questions about gender differences in cognition and ability, the role of stereotyping, as well as the "leaky pipeline" issue, that is, the rate and timing of the departure of women from scientific fields. Course readings will explore the psychology of gender, as it relates to STEM. In addition, we will read research from physical scientists, reports from professional organizations such as the American Physical Society, and reports from congressional committees.

(Fall) Interdisciplinary Seminar: U.S. Gender History Research Seminar
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(History 381)

Gender history focuses on the relationship between women and men, masculinity and femininity, and the evolution and transformation of that sprawling and multidimensional system of meanings we call "gender." This seminar will allow students interested in gender and women's history to do research on a topic of their choice. Readings will establish key themes and central methods in the study of gender. Reading topics include politics and activism, race and imperialism, popular culture and consumption, reproduction and sexuality, family and marriage. By mid-semester, students will be working with primary and secondary sources with the goal of producing a substantial and original paper.

(Spring) Interdisciplinary Seminar: Feminist Theory and the Practice of History
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(History 301)

Feminist theory asks about the nature of gender and its relation to racism, capitalism, state power, institutions of cultural production, and diverse patterns of intimacy, identity, and embodiment. How have historians built upon the work of feminist theorists to explore our gendered pasts? And how has feminist theory drawn on historical scholarship? In what senses are the work of theorizing and the practices of history distinct? Where do they converge? And how do they, separately and together, contribute to the production of knowledge in gender studies scholarship? Prerequisites: Gender Studies 201 or 221 and 8 credits of history; or permission of the instructor

(Spring) Interdisciplinary Seminar: Hitchcock and After
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(English 274 and Film Studies 380)

This course will examine the films of Alfred Hitchcock and the afterlife of Hitchcock in contemporary U.S. culture. We will interpret Hitchcock films in a variety of theoretical frames, including feminist and queer theories, and in historical contexts including the Cold War. We will also devote substantial attention to the legacy of Hitchcock in remakes, imitations, and parodies. Hitchcock films may include Spellbound, Strangers on a Train, Rear Window, Vertigo, North by Northwest, Psycho, The Man Who Knew Too Much, Marnie, and The Birds; additional works by Brooks, Craven, De Palma, and Sherman. Readings in film and cultural theory; screenings at least weekly.

Prerequisites: jr, sr, at least 4 credits in film studies, and at least 4 credits in English beyond 101, or permission of instructor

(Spring) Interdisciplinary Seminar: Queer Theory and Recent Queer Film in Latin America
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive; Spanish 320 and Film Studies 390)

In the 1990s GLBT liberation entered the public sphere as a major political force. Simultaneously, American academia produced and exported a new academic discipline: queer studies. As a consequence, the North American liberational model displaced cultural and theoretical models of sexuality of...
other countries. We will consider some of the key U.S. texts that have consecrated queer studies as a discipline and juxtapose them with theories and cinematic texts from Argentina, Brazil, Chile, Cuba, and Mexico in order to recuperate cultural models under erasure in the wake of the U.S. model's identity-focused and consumer-driven triumphalism.

(Fall) Interdisciplinary Seminar: Black Feminism: Theory and Praxis
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Prerequisite: permission of instructor)
This course explores foundational texts of major authors along with lesser-known contributors to the black feminist movement, from the nineteenth century to the present. It also examines the various ways in which black feminist theory has been expressed in and applied to the arts and political activism, analyzing black feminist cultural criticism as it applies to music, film, fine arts, performance, and literature. Conflicts and continuities between black and white feminists, and the role of pro-feminist men within the movement will be considered as well.

(Fall) Interdisciplinary Seminar: Women and Gender in South Asia
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Speaking-intensive; History 301)
This colloquium will explore the history of South Asia as seen from women's perspectives. We will read writings by women from the ancient period to the present. We will focus on the diversity of women's experiences in a range of social, cultural, and religious contexts. Themes include sexuality, religiosity, rights to education and employment, violence against women, modernity, and citizenship—-in short, those issues central to women's movements in modern South Asia. In addition to the textual sources, the course will analyze Indian popular film and the representation of women in this modern visual genre.

(Fall) Interdisciplinary Seminar: Feminist Technoscience Studies
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This highly theoretical seminar investigates the histories, paradigms, categories, and assumptions associated with gender, sexuality, and race in scientific, technological, and medical discourse and praxis. Throughout the course, we will interrogate and unpack what we mean when we use the words "nature," "human," "animal," "science," and "technology." This will clarify the ways in which human "nature" along with our sexualities, genders, and races are viewed, studied, "discovered," and/or constructed by science and technology. Readings will be drawn from, among others, theorists such a Haraway, Shiva, Traweek, Lykke, Braidotti, Balsamo, Fausto-Sterling, Shiebinger, Harding, Barad.

(Spring) Interdisciplinary Seminar: Gender and Class in the Victorian Novel
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(English 323)
This course will investigate how representations of gender and class serve as a structuring principle in the development of the genre of the Victorian novel in Britain. We will devote significant attention to the construction of Victorian femininity and masculinity in relation to class identity, marriage as a sexual contract, and the gendering of labor. The texts chosen for this course also reveal how gender and class are constructed in relation to other axes of identity in the period, such as race, sexuality, and national character. Novelists will include Dickens, Eliot, Gaskell, C. Bronte, and Hardy.
Supplementary readings in literary criticism and theory.
Prerequisites: jr, sr, 8 credits in English including English 220, 230, or permission of instructor

(Spring) Interdisciplinary Seminar: Sex, Love, and Gender in Contemporary African American Film
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Writing-intensive; African American and African Studies 340)
This course will explore the representation in film of intimate relationships among African Americans. Confronting an ongoing history of racist, sexist, and homophobic images, films produced by and featuring blacks can offer alternate interpretations of love, romance, and sexuality. Coupled with literature and theoretical readings by feminists and black cultural critics, students will consider the function of--and challenges to--intimacy in interpersonal relationships among African Americans. Directors under consideration include Spike Lee, Kasi Lemmons, Marlon Riggs, and Sanaa Hamri.
Prerequisites: AFRAM 101 plus 8 credits in African American and African studies or permission of instructor

(Spring) Interdisciplinary Seminar: Women and Gender in the Middle East

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(Writing-intensive; History 301)

This course is designed to provide students with a nuanced historical understanding of issues related to women and gender in the region defined as the area from Morocco to Iran. After an introduction to the main themes and approaches in the study of women and gender, we will examine the development of discourses on gender and the lived experiences of women from the rise of Islam, through the Ottoman Empire, and up to the twentieth century. Topics: the politics of marriage, divorce, and reproduction; women's political and economic participation; Islamist movements; the new field of masculinity studies; and the highly contested topics of homosexuality and transsexuality in the Middle East.

(Spring) Interdisciplinary Seminar: Gender and the State in Latin American History

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(History 301)

This seminar examines the history of gender in Latin America, with an emphasis on its relation to nation building and state formation. How has gender, along with race, ethnicity, and class, shaped the ways that Latin American men and women have imagined their relation to state and nation? How have imperialism, revolution, dictatorship, poverty, and programs for modernization shaped acceptable gender behavior and sexual norms? And how have Latin American states wielded gender and sexuality to consolidate their power? We will pay particular attention to everyday struggles over gender politics, citizenship, political action, the exercise of state power, and human rights.

(Spring) Interdisciplinary Seminar: Framing Youth Culture: Critical Approaches, Critical Issues

Mount Holyoke College Course Information Archive 2000-2016
This course provides a rigorous theoretical and historical understanding of youth culture incorporating insights from the fields of cultural studies, feminist theory, queer theory, ethnic studies, and diaspora studies. We will study a variety of youth expressive forms including teen magazines, high school proms, riot grrrl culture, Chicano/a punk, and Bollywood film. The aim of the course is to provide a more nuanced understanding of youth culture, a sense of how youth culture both reflects and shapes existing social relations.

Prerequisites: jr & sr only, except by permission of instructor

Instructors: A. Tiongson

Expected enrollment: 15

(Spring) Interdisciplinary Seminar: Queer Kinship in Asian North American Literature, Film, and Video

This course examines alternative kinship formations in Asian North American cultural production. It will focus on the gender and sexual management of racial bodies since the nineteenth century—from the U.S. Page Law of 1875 that restricted Chinese women on the basis of their presumed sexual immorality to various forms of "racial castration" that mediate Asian masculinities. We will consider how alternative kinship arrangements and queer cultural projects expose and/or upset the narrative assumptions embedded in heteronormative scripts of nationalism.

(Spring) Race, Gender, and Environment: Interdisciplinary Seminar

An investigation into the sociocultural histories, definitions, and causes of environmental problems. Explores how race, gender, and class are embedded in social, scientific, and political formations, including perceptions of "environment." Using multiple theoretical traditions the course examines ways that different cultures and societies confront questions of identity, power, and knowledge in their ideas and actions to protect the environment. Draws on contemporary scholarship and social activism from national and international contexts and addresses environmental topics including ideas/theories of nature, feminist environmentalism, environmental justice, and sustainable development.

(Spring) Internship or Field Project

This course, required for the major, presents an opportunity for students to apply feminist theory and to synthesize their work in gender studies. The connections between the academy and the community, and between scholarship and social action, are emphasized. Students either design their own field project or arrange for a placement at an agency, institution, or place of work that deals with the concerns of women. A weekly seminar with other students engaged in 390 work provides a structured setting in which to analyze these experiences and share works-in-progress. Frequent writing assignments are required.

(Fall) Senior Seminar
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This year-long capstone course brings seniors together to think through relationships among empirical research, theory, activism, and practice in gender studies. Majors with diverse interests, perspectives, and expertise (and other seniors with substantial background in the field) will have the opportunity to reflect on the significance of their gender studies education in relation to their current work (including work in 333s, 390, 395), their academic studies as a whole, and their plans for the future. Course readings and discussion will be shaped by students in collaboration with the instructor. This course continues in the spring semester as Gender Studies 392.
Prerequisites: Seniors only, GNDST 101 or WOMST 101, GNDST 221 or WOMST 208, GNDST or WOMST 250, GNDST or WOMST 333, 20 credits in gender studies and/or related courses, written application for permission required.
Notes: 1 meeting (2 hours)
Instructors: M. Renda
Expected enrollment: 15

GNDST-392-01 - Gender Studies - 2007-2008
(Spring) Senior Seminar - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Continuation of Gender Studies 391.
Prerequisites: Gender Studies 391

Geography
GEOG-105-01 - Geography - 2007-2008
(Fall) World Regional Geography
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Surveys physical and human geographic patterns, providing a comprehensive background discussion of individual regions. Analyzes each region in terms of its environmental base and resource distribution, agricultural systems and rural development, population growth and characteristics, and patterns of urbanization and industrial growth.
Notes: 2 meetings (75 minutes) and 4-th hour (60 minutes)
Instructors: K. Barrett
Expected enrollment: 40

GEOG-204-01 - Geography - 2007-2008
(Spring) Human Dimensions of Environmental Change
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement (Geology 204s)
Using case studies from Africa, Asia, North and South America, and Europe, this course examines the interactions between human institutions (such as political and economic structures, science and technology, class and gender systems, and cultures) and the environmental/earth systems that provide their contexts and have been impacted by them. The course will provide a forum to analyze the environmental consequences of a variety of land-use
systems, resource use, and development projects and explore possible alternative strategies of human-environment relations that could create a balance between human needs and environmental constraints.

Notes: 1 meeting (3 hours)
Instructors: G. Kebbede
Expected enrollment: 25

GEOG-205-01 - Geography - 2007-2008
(Fall) Mapping and Spatial Analysis
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Provides a comprehensive introduction to maps, including their design, compilation, and computer production. Introduces students to the principles of abstracting the Earth's surface into spatial databases using GIS, remote sensing, and Global Positioning Satellites.
Notes: 2 meetings (75-min)
Instructors: K. Barrett
Expected enrollment: 20

GEOG-206-01 - Geography - 2007-2008
(Spring) Political Geography - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Systematically studies political phenomena and their geographic expression, at a variety of spatial scales - national, regional, and international. Major themes include nation-state formation, boundary, territory, and ethnic issues, regional blocs and spheres of influence, and conflicts over access to and use of resources.
Notes: 2 meeting (75-min)
Instructors: G. Kebbede
Expected enrollment: 40

GEOG-209-01 - Geography - 2007-2008
(Spring) Women and the Environment - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Envst-209, Gndst-212)
Examines the complex factors that shape different women's interactions with and on behalf of the environments and communities in which they live. Drawing on diverse cultural, national, and disciplinary backgrounds, this course explores women's theories and practices regarding: ideas of nature, ecofeminism, children's health and welfare, resource and land-based systems, human rights and social justice, wildlife preservation and animal rights, toxins and environmental health, sustainable development, and global environmental change.
Notes: 2 meetings (75 minutes)
Instructors: G. Di Chiro
Expected enrollment: 20

GEOG-210-01 - Geography - 2007-2008
(Fall) Political Ecology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course examines political, economic, cultural, and ecological factors that help shape human-environment interactions. It probes the influence of civic, state, corporate, and transnational institutions on environmental change by examining debates about environment and development, cultural perceptions of nature and natural resources, and the uneven distribution of environmental "goods" and "bads." Case studies draw on local and international issues in the context of globalization including: agriculture and the global food system, health disparities and globalized industrial development, local impacts of climate change, water distribution and access, and sustainable development policies.
Notes: 2 meetings (75 minutes)
Instructors: G. Di Chiro
Expected enrollment: 25

GEOG-211-01 - Geography - 2007-2008
(Fall) Geographic Information Systems - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
In this comprehensive introduction to the theory and technology of geographic information systems (GIS), students are introduced to basic raster and vector data structures, spatial database design, attribute database processing, and the role they play in a GIS. This is a studio-based class that uses the MHC campus as a GIS database exploration.
Prerequisites: Geography 205 or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: The department
Expected enrollment: 16

(Fall) Geography of Europe - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The human geography of western Europe has changed substantially since the 1960s. Enlargement of the European Union (EU) symbolizes a greater sense of European identity, but at the same time important regional differences have reemerged and strengthened. Evaluating the viability of the EU first requires understanding the physical, economic, and political geography of the member states. This course offers the opportunity to focus on the common characteristics and shared problems of the member countries to better assess the future prospects and problems of the community.

GEOG-214-01 - Geography - 2007-2008
(Fall) Geography of South Asia: India, Pakistan, Bangladesh, and Sri Lanka - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The region is studied in terms of its physical, cultural, and political geography. Emphasis is given to the numerous ways in which the peoples of South Asia have adapted to and utilized their local environments, the reasons for varying patterns of population growth throughout the region, and the environmental impact of economic development programs.
Notes: 1 meeting (2 hours)
Instructors: G. Kebbede

(Spring) Geography of the Middle East and North Africa
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
In this course, the Middle East and North Africa are studied in terms of their physical, cultural, economic, and political geography. Emphasis is placed on the environmental conditions and ecological evolution, population and demographic characteristics, the resource base and major problems in the social, political, and economic transformation of the region.
Notes: 2 meetings (75-minutes)
Instructors: G. Kebbede
Expected enrollment: 25

GEOG-217-01 - Geography - 2007-2008
(Spring) The African Environments - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
The course provides an integrated analysis of biogeography, environmental change, and hydrology within each of the biomes found in the African continent: forest, savanna, desert, coast, wetland, mountain, and Mediterranean environments. It also discusses the impact and significance of human activity on African environments by exploring debates about soil erosion, desertification, biodiversity and depletion, and conservation and development.
Notes: 1 meeting (3-hr)
Instructors: G. Kebbede
Expected enrollment: 40

GEOG-224-01 - Geography - 2007-2008
(Fall) Atmosphere and Weather
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
In this course we will learn weather forecasting skills. This will involve examining weather observations, satellite and radar images, surface and upper-air weather charts, and predictions made by computer models. Along the way we will have an opportunity to learn some atmospheric dynamics and gain an understanding of the Earth's radiation budget. Topics will include severe weather, hurricanes, and winter precipitation.
Prerequisites: high school earth science or any 100-level natural science course
Notes: 3 meetings (50 minutes)
Instructors: P. Batra
Expected enrollment: 15

GEOG-225-01 - Geography - 2007-2008
(Fall) Evolution of North American Landscapes - *Not offered this year/term
(Geology 225f)
The landscapes of Earth are the result of complex processes and have evolved dramatically since the planet's formation over 4.5 billion years ago. In this course we examine the geologic evolution of the North American continent and its natural features. Using narrative descriptions, scientific articles, maps, photographs, and videos, in addition to the texts, we tour North America and explore the origin and anatomy of its landscapes, including national parks and monuments. We then consider how the geologic setting or physical environment influenced human exploration and settlement of the continent.
Prerequisites: high school earth science or any 100-level geology course or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)

GEOG-304-01  -  Geography  -  2007-2008
(Fall) Selected Problems in Regional Geography: Planning and the Environment - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
As development continues to put pressure on the environment, increased interest in planning at the local and regional levels of government is seen as a grassroots approach to environmental management. This seminar examines successful and innovative approaches used by planning agencies to monitor and protect the environment. Topics include town and regional master plan development, zoning, land evaluation and site assessment studies, growth management, and wetland conservation.
Prerequisites: Geography 204
Notes: 1 meeting (3 hours)
Instructors: The department
Expected enrollment: 15

(Spring) Remote Sensing
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement (Geology 307f)
This course presents the fundamentals of digital analysis of aerial satellite imagery. Students are introduced to the characteristics of Earth images and learn to make qualitative and quantitative assessments of multispectrum and satellite data. Basic photo interpretation exercises are complemented with computer analysis of satellite data for land use and land cover analysis, forest modeling, and urban hydrology.

GEOG-311-01  -  Geography  -  2007-2008
(Fall) Seminars--Third World Development: Third World Development - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Preamble (for topics courses): These seminars present selected topics in geography that reflect contemporary problems, current geographical ideas, philosophical and methodological trends in geography, and/or the history and development of geographical thought.
Offers an interdisciplinary perspective on social, economic, and political features of contemporary development in Africa, Asia, and Latin America, regions referred to as the Third World or the South, and provides an introduction to theoretical origins and definitions of economic growth, development, and underdevelopment. It then addresses more specific aspects of development such as trends in population growth, migration, and urbanization; agrarian change; livelihood strategies and aspects of social welfare such as health, education, and shelter; poverty and the environment; and external economic relationships. The latter part of the course draws extensively on selected case studies.
Prerequisites: jr., sr., 4 credits in department and 4 credits in related social sciences at 200 level or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: G. Kebbede
Expected enrollment: 20

GEOG-319-01  -  Geography  -  2007-2008
(Fall) Africa: Problems and Prospects
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course intends to offer an interdisciplinary perspective on selected contemporary development problems in Africa south of the Sahara. Central to the course will be an examination of the social, economic, and political consequences of colonialism, the physical resource base and ecological crisis, agrarian systems and rural development, gender relations and development, urbanization and industrialization, and the problems and prospects of regional cooperation and integration.

Prerequisites: jr, sr, soph with permission of instructor; 4 credits in department and 4 credits at the 200 level in geography or related social science.

Notes: 1 meeting (3 hours)
Instructors: G. Kebbede

**GEOG-321-01** - Geography - 2007-2008
(Spring) Practicum in Geographic Information Systems
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
In this course students will apply the skills they have learned in GEOG 205 to a real-world problem. Data from various sources are combined to create a spatial database from which a spatial model is derived. Synthesis and manipulation of spatial data are used to undertake environmental analysis. The end result is a spatial suitability model for wildfires, and a study of the interactions between factors that influence wildfires.
Prerequisites: Geography 205 or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: K. Barrett
Expected enrollment: 10

Geology

**GEOL-100-01** - Geology - 2007-2008
(Spring) Physical Geology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
From earthquakes to landscapes, minerals to glaciers, this course introduces the surficial and internal processes of the earth. Learn to interpret the geology of your surroundings when traveling to new places and understand how geologic setting influences how people live. Labs focus on rock identification, map reading, the geology of fossil fuels and nuclear energy, and local field trips. Grades depend on four exams, lab exercises, and lab quizzes.
Prerequisites: Preference given to first- and second-year students.
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: M. Markley
Section Instructors: 01 LAB P Taylor | 02 LAB P Taylor | 03 LAB P Taylor | 04 LAB P Taylor |
Expected enrollment: 60

**GEOL-101-01** - Geology - 2007-2008
(Fall) Environmental Geology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Our existence on the planet is greatly affected by changing environmental conditions. Some of these changes are "natural" (e.g., floods, earthquakes), but many directly result from human mismanagement (groundwater contamination, acid rain, the greenhouse effect). Although some of these problems are of local concern, an increasing number are of global scale. In this course, students develop an appreciation for the way the Earth's environment affects our lives. In the laboratory, students learn techniques to recognize and interpret environmental hazards and develop strategies to address environmental problems.
Notes: 2 meetings (75 minutes), 1 lab (3 hours), field trips; 25 spaces allocated to first-year students
Instructors: P. Batra

GEOL-102-01 - Geology - 2007-2008
(Spring) History of Life
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Life forms have inhabited the surface of our planet for most of its history. Earth, as a result, has a unique geology that is unlike that of any other planet. In this course we will examine the interrelations between life processes and Earth’s crust and atmosphere and how they work together to create the geology of the planet. Using both the rock and fossil record, we will study the origin and evolution of life, the history of continents and oceans, and the diversification of complex life forms. Laboratory and field trips will emphasize identification and analysis of sediments, rocks, and fossils.
Notes: 2 meetings (75 minutes), 1 lab (3 hours)

Expected enrollment: 30

GEOL-115-01 - Geology - 2007-2008
(Spring) Convergence in Geologic Time - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
First-year seminar (Writing-intensive)
This course will introduce students to recent advances in the study of convergent evolution in the history of life. In this class we will study the fossil record of convergent evolution using actual fossils and will also consider the likelihood of ancient convergence using simple computer models. The class will focus on helping students to read, write, discuss, and think clearly. Students will receive a broad survey of a wide variety of disciplines. This course is particularly well suited for first-year students.
Prerequisites: fy or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: M. McMenamin

GEOL-201-01 - Geology - 2007-2008
(Fall) Rocks and Minerals
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
In this course you will learn to recognize the common rock-forming minerals and principal rock types, and to understand their origins, properties, associations, and geological significance. Observational skills and hand sample identification will be emphasized in lab and on field trips.
Prerequisites: Prereq. high-school earth science and high-school chemistry, or any 100 level geology course
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: S. Dunn
Section Instructors: 01 LAB S Dunn |

GEOL-202-01 - Geology - 2007-2008
(Spring) History of Earth
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Speaking- and writing-intensive)
This course explores major events in the past four billion years of earth history, the interaction of earth systems, and the design and testing of earth science theories. Some topics covered are: ice ages and greenhouse atmospheres, continental drift, the nature of the sedimentary rock record, extinctions and radiations of flora and fauna, the early evolution of earth, and absolute and relative dating of rocks. Final grades depend on class and field trip participation, oral presentations, short papers, computer labs, and quizzes on the geologic time scale.
Prerequisites: high school earth science or any 100-level geology course or permission of instructor
Notes: 3 meetings (50 minutes); 1 lab (3 hours)
Instructors: M. Markley
Section Instructors: 01 LAB M Markley |

GEOL-203-01 - Geology - 2007-2008
(Fall) Surface Processes - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
The surface of the Earth is a history book of past environmental change. Every hill and valley, every erosional feature, every deposit is the result of processes acting at the Earth's surface. In this course we study these processes (e.g., glaciers, rivers, slopes, coastlines, windblown sand, frozen ground, cave formation, soil development) to better understand how they work and to understand the resulting landforms and deposits. Armed with this understanding we can then observe different landforms and deposits and infer past process (environments of deposition). Fieldwork and trips allow students to explore firsthand the processes that have created and modified the Earth's surface.
Prerequisites: Geology 100 or 101
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: A. Werner
Section Instructors: 01 LAB A Werner
Expected enrollment: 11

**GEOL-204-01** - Geology - 2007-2008
(Spring) Human Dimensions of Environmental Change
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(geography 204s)
Using case studies from Africa, Asia, North and South America, and Europe, this course examines the interactions between human institutions (such as political and economic structures, science and technology, class and gender systems, and cultures) and the environmental/earth systems that provide their contexts and have been impacted by them. The course will provide a forum to analyze the environmental consequences of a variety of land-use systems, resource use, and development projects and explore possible alternative strategies of human-environment relations that could create a balance between human needs and environmental constraints.

(Spring) Earth System Science
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course is an interdisciplinary introduction to the processes, interactions, and evolution of the Earth's biosphere, atmosphere, geosphere, and hydrosphere. We will investigate how the Earth system has changed over geologic time, as well as how humans have affected and are affecting it. Some topics include global warming, biodiversity, and the Gaia hypothesis.
Notes: 2 meetings (75 minutes)
Instructors: P. Batra
Expected enrollment: 15

**GEOL-223-01** - Geology - 2007-2008
(Fall) Planetary Science
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Astronomy 223s)
An introductory course for physical science minors and majors. Topics include origin and evolution of the planets; planetary orbits, rotation, and precession; gravitational and tidal interactions; asteroids, comets, and planetary rings; meteorites; interiors and atmospheres of the Jovian and terrestrial planets; geology, tectonics, and mineralogy of the terrestrial planets and satellites; new data from Mars Pathfinder, Lunar Surveyor, and current NASA missions.
Prerequisites: any physical science course
Notes: 2 meetings (75 minutes)
Instructors: M. Dyar
Expected enrollment: 50

(Fall) Ocean Environments - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Because more than 70 percent of our planet is covered by ocean water, the study of marine systems is crucial to our understanding of the Earth. In this course, we will examine chemical, physical, geological, and biological dimensions of the marine environment at a variety of scales in time and space.
Along the way, we will explore how the Earth's oceans formed, how they provided the foundations for life, and how they continue to control weather and climate, stabilize global chemical cycles, interact with terrestrial systems, and give us access to valuable resources. Discussions and field trips may be planned to augment other course activities and materials.

Notes: 2 meetings (75 minutes); does not normally satisfy Science and Math II-B requirement, but may be arranged with permission of instructor

(Spring) Groundwater - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

As population and development increases the demand for and the contamination of ground water supplies also increases. This course focuses on water at the surface and in the subsurface, how it moves, how it can be exploited, how it can be protected, and how ground water contamination can be evaluated. Weekly problem sets and labs are an important part of this course along with a ten-page term paper and an oral presentation.

(Spring) The Biosphere - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Speaking- and writing-intensive; Envst-250)

The biosphere has a pronounced geochemical influence on the Earth; indeed, life has been called the greatest geological force. In this course, we will study the chemistry of life through geologic time and examine its influence on the formation and weathering of rocks, on the composition and temperature of the atmosphere, on the accumulation of gas hydrates and other hydrocarbon resources, and its role in the initiation of naturally occurring, water-mediated nuclear reactors. We will also take a close look at the Biosphere concept of Vladimir Vernadsky, the Gaia hypothesis, and Hypersea theory, and the ways in which these concepts inform our understanding of life's geological impact.

**GEOL-321-01 - Geology - 2007-2008**
*(Fall) Paleontology - *Not offered this year/term*
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course takes a careful look at the fossil record, emphasizing the history and evolution of the marine biosphere; the recognition, distribution, and significance of faunas and their environments through geologic time; and the paleoecologic significance, evolutionary relationships, and biostratigraphic importance of major groups of fossil-forming organisms. Several local field trips, including one weekend excursion.
Prerequisites: Geol 102, 202 or Biol 225 or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: M. McMenamin
Section Instructors: 01 LAB M McMenamin

**GEOL-322-01 - Geology - 2007-2008**
*(Spring) Igneous and Metamorphic Petrology*
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Studies mineralogical and chemical compositions, classification, genesis, and mode of occurrence of igneous and metamorphic rocks. Special attention paid to the relationships between rock-forming processes and global plate tectonics. Laboratory study of representative rock suites in hand specimen and thin section, introduction to analytical techniques, including mineral optics, and one or more field trips.
Prerequisites: Geology 201 or Permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: S. Dunn
GEOL-324-01 - Geology - 2007-2008
(Fall) Stratigraphy-Sedimentology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is an interpretive study of sediments, sedimentary rocks, and processes of sedimentation. We will employ the principles of stratigraphic analysis and correlation of sedimentary sequences as we interpret modern and ancient environments, sequence stratigraphy of sedimentary basins, paleogeography, and paleoclimates. A variety of techniques are introduced in laboratory exercises and field trips.
Prerequisites: any 200-level geology course or Geol 102 or permission of instructor
Notes: 2 meetings (75 minutes); 1 lab (3 hours)

(Spring) Seminar: Climate Change
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
In the first part of this course we will analyze components and interactions within the climate system, and how these have evolved over geologic time.
In the second part we will examine past societies that have been impacted by climate change to highlight vulnerabilities. Finally, we will examine model projections of future climate change and speculate about the impacts this change may have on humans and the earth system.
Prerequisites: 1 200-level geology course or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: P. Batra
Expected enrollment: 15

GEOL-333-01 - Geology - 2007-2008
(Fall) Structural Geology and Orogenesis
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course covers the basic techniques of field geology, structural analysis, and multidisciplinary approaches to mountain building (orogenesis). Lectures concentrate on field techniques, stress, strain, faulting, folding, rock strength, the relation between rock deformation and metamorphism, and deformation mechanisms. Five labs are field trips that involve data collection. Short problem sets emphasize quantitative skills. During the final weeks of the semester, two oral presentations emphasize fluency in the published literature of structural geology; the final assignment is a paper. This course is normally taught every other year.
Prerequisites: any 200-level geology course or permission of the instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: M. Markley

GRMST-100-01 - German Studies - 2007-2008
(Spring) Memories of War and Atrocity in Germany and Japan
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive; Taught in English)
Cultural exchanges between German and Japanese peoples have taken place for over 400 years. What has triggered and sustained exchanges of cultural, social, artistic, and military traditions? How have these historical exchanges affected the remembrance of World War II, the Holocaust, and Hiroshima/Nagasaki in postwar narratives of both national cultures? We focus on the process of remembering war and atrocity as expressed in memoirs and fictional prose by Japanese and German-speaking writers in order to explore the politics of memory within transnational perspectives.
Prerequisites: fy or permission of instructor
Notes: 2 meetings (75 minutes); no knowledge of German required
Instructors: K. Remmler
Expected enrollment: 16

GRMST-100-02 - German Studies - 2007-2008
(Fall) Memories of War and Exile: The Second World War in Photographs, Memoirs, and Fiction - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive; Taught in English)
We will explore the documentation of war through images and text with emphasis on the Second World War. How do civilians, soldiers, resisters, survivors, victims, and émigrés directly affected by war remember the experience of war? What is the impact of war on emigrants forced into exile? How is war remembered by nations, institutions, and social groups in Western culture through myth, imagination, and fiction? This course focuses on the memory of the war experience in Germany and France with special emphasis on the impact upon European refugees at Mount Holyoke College. Readings include essays on the role of memory in shaping culture, archival material, and literary accounts of war.
Prerequisites: fy or permission of instructor
Notes: 2 meetings (75 minutes) , 1 meeting (120 minutes)
Instructors: K. Remmler
Expected enrollment: 15

(Spring) German Studies in a European Context: Hags and Heretics: Witches in History, Myth and Fiction
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive)
Preamble (for topics courses): These courses are taught in English and satisfy a Humanities I-a distribution requirement but not the language requirement. For credit toward the minimum major/minor in German Studies students must enroll in German 232 (2 cr.) as well (and read, write about, and discuss selected materials from 231 in German)
The course focuses on the construction and representation of the witch in the context of the historical and social realities of the (wo)men labeled as witches. We will examine historical records with a focus on the "Burning Times" in early modern Europe and 17th-century New England and the Salem witch trials. Subsequently, we will analyze the representation of witches in literature and film with a particular focus not only on the depiction of the witch in fairy tales from the Grimms to Disney, but also in literature that purports to rely on historical sources. Analyzing different texts and genres, we will deconstruct stereotypes about witchcraft, sexuality, gender, age, and occult powers.

*(Fall) Constructing German(y) 1800 to 1848: A Blueprint for the Twenty-first Century - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
(Speaking- and writing-intensive; Film Studies Component Course)
Highlights the dramatic cultural and political shifts from the Romantic worldview to post-Napoleonic reactionary regression and democratic political activism culminating in the Revolution of 1848. We investigate the impact of nineteenth-century ideas on twentieth-century writers and filmmakers, e.g., the youth culture of the early 2000s, the GDR resistance movement. We explore the concept of literature as an instrument for social change propagated by these groups, e.g., individual, gender, and sexual as well as political self-determination. Selection of fiction, nonfiction, and films by Marx, Büchner, von Droste-Hülshoff, Hebbel, Heine, Kleist, Rohmer, Stark, Ripstein, Fassbinder.

(Spring) Topic for 2008: German Cultures of Memory in Global Contexts
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
(Speaking- and writing-intensive)
Preamble (for topics courses): This seminar is designed to explore theoretically and practically the nature of our field of inquiry. We explore such
questions as: What does German studies mean? What is interdisciplinary work? What role does literature play in culture studies? What is the
relationship between language and the construction of culture? What meanings have been attributed to the terms of "culture" and "civilization?" Texts
from a variety of disciplines. Students write term papers on topics related to their major field(s) of interest.
How do nations, groups, and individuals recall the past in order to situate themselves within local and global contexts of power? How do cultures of
memory create multiple recollections of "the" past and to what purpose? In this seminar, we explore how German cultural memories emerge in literary
texts, films, and artifacts; at memorial sites and architectural domains; and in theoretical literature pertaining to memory. Readings include works by
Sigmund Freud, Maurice Halbwachs, Aleida Assmann and other cultural theorists, literary works by the late German author, W. G. Sebald, as well as
case studies of public debates about the remembrance of the Holocaust and World War II.
Prerequisite: Open to students who have completed at least 8 credits in the department in upper mid-level courses or beyond, or per permission of
department chair.
Notes: 1 meeting (2 1/2 hours) or 2 meetings (75 min.) This course fulfills the nineteenth- or twentieth-century major requirement in German studies,
depending on the topic of a student's semester project

(Fall) **Foundation: Women in the Reformation** - *Not offered this year/term*  
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement  
First-year seminar (Writing-intensive)  
The Protestant Reformation (1517-1559) has long been recognized as a crucial point in the development of Western culture. The story of Martin Luther is well-known, but the deeper issues of religious doctrine that led so many to reject Catholicism are often overlooked. Even more overlooked is the role women played in supporting the various Protestant sects and in defending the traditional Church against the charges of corruption raised by Protestants. This course will focus on the roles played by women, using both secondary sources and the writings of some of these women to gain a clearer understanding of how the Reformation changed the lives and beliefs of Western Europe.

(Spring) Europe and the Atlantic World, 1300-1700

Mount Holyoke College Course Information Archive 2000-2016
This course inquires into several dimensions of European society and culture during the transition from principalities and fiefs to early modern states, from feudalism to capitalism, from serfdom to both free and slave labor. Equally important, however, will be comparison of western Europe with other Atlantic societies of these centuries and examination of consequences for Europeans, Africans, and Americans (north and south) of encounters among them. Using both voices from the period and recent scholarship about early modern Western and Atlantic societies, the course will look critically at the making and remaking of "Western" culture between the Middle Ages and the modern era.

(Fall) African Cities: Development Dreams and Nightmares in the Twentieth Century
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
African cities demonstrate the failure of models of development with the aim and ideal of industrialization. This course examines the empty promises of modernity through the lens of African urban history using fiction, film, and city archives. Beginning with Timbuctu and Cairo, the course explores the emergence and decline of trade entrepots, the rise of colonial cities, and the dilemmas of postcolonial economies and politics. Dar es Salaam, Nairobi, Kampala, Kinshasa, Harare, Johannesburg, Lagos, Accra, and Dakar are among the cities studied. Designed for those seeking only an introduction to development as well as those with further ambitions, it assumes no previous knowledge of Africa.

(Fall) History of Global Inequality
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Community-based learning course)
Why are some nations so much richer and more powerful than others? This course demonstrates that global inequality is not natural; it has a history. Exploring patterns of exchange that developed among regions of the world over the past 600 years, we will ask about the role of power in the establishment of practices of production and exchange. We will explore how cross-regional productive systems benefited some participants at the expense of others. Having traced the consequences of unequal exchange over several centuries, we will ask how global trade and production would have to change for all participants to benefit equally. The course includes a community-based learning component.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
 SAME as Medieval Studies 217s
The medieval Crusades were a strange mixture of romantic sensibility, religious inspiration, and bloodthirsty xenophobia. How was it that Western Christendom was inspired to recover the Holy Land in 1099, coming face to face with two other great civilizations: Byzantium and Islam? What was the aftermath? Topics considered will include the exploration of violence in Eastern Europe, medieval pilgrimage to holy places and the idea of a "holy land," the structure and divisions within Islam, chivalric culture, and the idea of crusading martyrdom.(p)

(Spring) African Popular Culture
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This class uses popular music, dance, fiction, film, street art, bus slogans, newspapers, and other sources to document African interpretations of the decades since "flag independence" in 1960. We will let African musicians, writers, filmmakers, and artists direct our investigation of the big questions of the class: Why is the gap between rich and poor in African societies increasing? What is happening to gender relations? What do African people think of their political leaders and how do they imagine political situations might improve?

(Spring) The Long Nineteenth Century - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
The long nineteenth century, from the French to the Bolshevik Revolution, was the period from which modern Europe emerged. New political philosophies, socio-cultural changes, rising imperialism, and increasing competition for territories, compelled Europe to develop. Rapid scientific change also contributing to widespread economic and demographic changes, which in turn drove the increased political participation of ordinary Europeans. The map of Europe was drastically altered by four major revolutionary upheavals, which we will examine as we explore how political change was interconnected to industrial, scientific, economic, and social change across Europe as the modern age was begun.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(Speaking- and writing-intensive)

Is the United States an "empire"? Today, U.S. political, military, and economic involvement in many parts of the world, such as the Middle East, makes this an urgent and important question. This course addresses the issue of American imperial power by examining the history of U.S. colonization of the Philippines, during the first half of the twentieth century, and by comparing it with that of two other imperial powers—Spain and Japan. Themes to be discussed include imperialism, colonialism, religion, ethnicity, gender, orientalism, nationalism, postcolonialism, neocolonialism, crony capitalism, globalization, and militarism. Requirements include two exams and a final paper.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Same as Gender Studies 206f(01))

Introduction to major themes in U.S. history through the lens of women's history. Located both near the centers of power in American society and at its margins, the history of women as a social group is one of conflict and diversity. While women do not make up a coherent group, all share the unique experience of being "women" in class, racial, and religiously specific ways. Themes include Native American and Hispanic women during European contact and settlement; the impact of the American Revolution; benevolent women and the "fallen" women they hoped to help; enslaved women and the plantation mistress; women in the multicultural west; women's involvement in the Civil War and Reconstruction.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Same as Gender Studies 205s(01))
This course introduces students to the major themes of U.S. women's history from the 1880s to the present. We will look both at the experiences of a diverse group of women in the U.S. as well as the ideological meaning of gender as it evolved and changed over the twentieth century. We will chart the various meanings of womanhood (for example, motherhood, work, the domestic sphere, and sexuality) along racial, ethnic, and class lines and in different regions, and will trace the impact multiple identities have had on women's social and cultural activism.

(Fall) Topics in the Recent History of the United States: Sexual Revolutions in U.S. History
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Preamble (for topics courses): These courses are designed for students with a background in American history who wish to focus attention on developments since the late nineteenth century.
This class will evaluate the notion of "sexual revolutions" by examining three moments in U.S. history; the late eighteenth century, the turn of the twentieth century, and the 1960s and 1970s. In each, we will look at shifts in the relationships between race, class, gender, and sexuality. Our history will include the role of experts in the fields of religion, medicine, sexology, and psychology and their efforts to define sexual deviance and promote sexual "normality." At the same time, we will study popular and subcultural sexual cultures found in brothels, bars, same sex institutions, sports, bohemian circles, and political groups and look for strategies of resistance to normative regimes.

(Fall) Colloquium: Martyrdom as Social Protest: Honor and Resistance from Antiquity to Early Modern Europe
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Not all victims of tyranny and persecution become martyrs, nor are all martyrs victims of tyranny. What social and political conditions foster the choice of martyrdom? What cultural values drive this form of self-immolation? What's worth dying for? In antiquity, the word "martyr" meant an active "witness." Today it can mean a passive "victim." Our approach uses cross-cultural comparisons to help understand how martyrdom shaped the history and culture of the ancient world of the Mediterranean and of Europe in the Middle Ages and early modern period.

(Spring) Colloquium: Jazz in American Culture
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course will offer a survey of the most significant historical and stylistic developments of jazz in the twentieth century. Between 1910 and 1945, jazz evolved in a remarkably swift manner from a provincial, brass band music in New Orleans through a period of immense popularity in the 1930s as big band, dance-oriented swing before emerging as the virtuosic nightclub and concert hall idiom known as bebop in the mid-1940s. The course will examine the musical and social evolution of jazz against the backdrop of racial, economic, and gender relations in American society and look at the influence of jazz on aspects of American literature including language, cinema, and art.

(Spring) Gender and Colonialism: Masculinities, Feminisms, and the European Imperial State - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

This course considers how gender was a central frame for regulating political and social relations in European empires and their colonies in the last 200 years. The readings bring interrelated historical themes into play: the multiple ways in which masculinity and its privileges structured the ways that European men negotiated with non-European men over questions of political authority; how women, both European and native, became a focus of social, cultural, and sexual regulation. A final theme addresses the relationship between European feminist discourses and feminist movements in colonies. Students will be asked to analyze a memoir, travel narrative, or another primary source.

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary research in the history of particular times and places, resulting in a substantial piece of historical writing.

What causes the transformation of patterns of production and exchange? This seminar uses richly detailed African social histories to explore the complex interactions of culture, power, and material resources in economic and social processes. We will examine recolonial forms of exchange, the social and political conflicts engendered by nineteenth-century integration into a global economy, the shaping of modern African cities, and the changing meanings of commodities such as soap, alcohol, and cloth. Evaluation will be based on active engagement in discussions, short reflections on each week's reading, and a substantial research paper.

(Spring) Early American History: The Revolutionary Generation, 1776-1800
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.

An appraisal of the political leadership of the American republic. After reviewing the two founding moments in 1776 and 1787, we will assess the achievements and failures of Adams, Hamilton, Jefferson, Madison, and Washington during the 1790s when the institutions and ideals of the new nation were congealing. Students will be asked to select one Founding Father and one specific topic (i.e., Jefferson and slavery, Madison and political parties) for intensive study.
Prerequisites: permission of instructor; 8 credits in history; written application prior to Academic Advising period
Notes: 1 meeting (2 hours)

HIST-375-01 - History - 2007-2008
(Spring) American History: The Middle Period: Age of Emancipation
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.

This seminar examines the causes and the course of the Civil War, its social, economic, and political results during Reconstruction, and the early roots of both de jure segregation and the civil rights movement. It will examine the process of emancipation from the perspective of social history. Violent conflicts over free labor, the establishment of sharecropping, and the political and economic policies pursued by various groups - freedpeople, ex-masters, northern policymakers, wage laborers, and African American women, for example - will be covered. African American viewpoints and histories will receive particular emphasis.
Prerequisites: permission of instructor; 8 credits in history; written application prior to Academic Advising period

HIST-381-01 - History - 2007-2008
(Fall) Recent American History: U.S. Gender History
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Gender history focuses on the relationship between women and men, masculinity and femininity, and the evolution and transformation of that sprawling and multidimensional system of meanings we call "gender." This seminar will allow students interested in gender and women's history to do research on a topic of their choice. Readings will establish key themes and central methods in the study of gender. Reading topics include politics and activism, race and imperialism, popular culture and consumption, reproduction and sexuality, family and marriage. By mid semester, students will be working with primary and secondary sources with the goal of producing a substantial and original paper.
Prerequisites: permission of instructor, written application prior to academic advising period
Notes: 1 meeting (3 hours)
Instructors: J. Gerhard
Expected enrollment: 15

(Spring) Recent American History: The 1960s As History and Myth - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This research seminar offers an in-depth opportunity to explore the 1960s--to what extent was it a unique historical era? We will focus on several political and cultural movements, including civil rights, the anti-Vietnam war struggle, the counter culture, and the emergence of feminism, with special reference to their complex relationship to the larger society. We will also examine the 1960s as an era of conservative backlash, as well as the ways in which the conflicts of that day still shape the contemporary scene. Each student will write an original piece of history, based on primary and secondary sources.
Prerequisites: permission of instructor, 8 credits in history, written application prior to Academic Advising period

(Spring) The Rise of China
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Team-taught by Asian Studies, Economics, IR, and Politics faculty (the course counts as departmental credit in all four departments).
China's phenomenal growth over the past two decades has profound economic, political and environmental implications, internally as well as globally. Can China make its growth compatible with environmental sustainability and growing demands for political rights and citizenship? Does China's rising power offer more resources and policy space to other developing countries or does it reduce their ability to develop? What are the geopolitical implications of this rising future super power for US-China relations, for a reconfiguration of political and economic relations in Asia, and for multilateral strategies to address global challenges?

(Spring) Teilhard Controversies
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Writing-intensive)
Geologist Pierre Teilhard de Chardin attempted an ambitious synthesis of science and religion. Teilhard's work has recently come under renewed scrutiny because of the need to understand the linkages among evolutionary theory, religious doctrine, and environmental stewardship. Intense discussions of these matters have influenced the political landscape in the United States and interpretations of science at the Vatican. This course poses two main questions. First, what evidence does Teilhard use to construct his synthesis? Second, does his theoretical scheme make any sense, and if so, does it shed light on the Evolution versus Intelligent Design controversy?

(Fall) Peer Mentoring: Theory and Practice
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Speaking- and writing-intensive)
This course is an introduction to theories and practices of collaborative learning for students preparing to work as mentors and assistants in the Speaking, Arguing, and Writing Program (SAW). We will draw on existing research, practice sessions, class discussion, and our own writing and speaking to craft our philosophies of peer mentoring and to develop effective practical strategies.
Prerequisites: Open only to students hired as SAW mentors or assistants; permission of instructor.

(Spring) Interdepartmental Topics: Debate - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Speaking-intensive)
The focus of the class will be improving public-speaking skills, especially under circumstances when one's position is being actively challenged. To accomplish this, students will learn three of the most popular styles of competition debate: Policy Debate, Lincoln-Douglas Debate, and Parliamentary Debate. Each student will participate in two debates in each style of debate during the course of the semester, as well as evaluate other students' debating. These debates will be scheduled outside of regular class time at the convenience of the participants. Topics for the debates will likely concern domestic and international policy, morality, politics, and the law.

(January) Advanced Peer Mentoring: Research and Publication on Mentoring ESOL Students
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
(Speaking- and writing-intensive)
This course is for peer mentors to engage in more advanced scholarship on mentoring English speakers of other languages. What can we learn from existing writing center theory and what arguments stand to be reconsidered? How do we provide meaningful assistance without appropriating students' texts or becoming grammar editors? How can mentors who themselves are ESOL students draw on their experiences to enrich their sessions? To explore these and other questions, students will read contemporary scholarship, engage in class conversation, and design their own research projects that will culminate in writing an original article for submission to a writing center journal.

**(Spring) War and Propaganda**
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course analyzes propaganda techniques and war mobilization strategies. We present comparative, cross-cultural analyses of recent and historical examples of the influences of the state, state-society relations, the media, and information control and distortion in the mobilization for war. Case studies are selected to address the following questions: Why is propaganda necessary? What is the media's relationship to state propaganda efforts? How do citizen groups and protest movements contest state propaganda efforts? We conclude by examining key trends in the development of mass media forms and technologies and their implications for global politics.

(Spring) International Society
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
An intensive reading course in theories of international society: the idea that states and peoples are or should be linked to each other through a web of shared values and institutions. It focuses on the work of Hedley Bull, Immanuel Kant, and John Rawls. How did these three men understand international society? What are or should be the values and institutions that give rise to it and support it? What implications do their visions of international society have for war and peace, state sovereignty, religion, democracy, capitalism, distributive justice, human rights, and international law? What responses and criticisms have their arguments engendered?

ITAL-106-01 - Italian - 2007-2008
(Fall) First Year Seminar: Sex and the City: Gender-Power Relations in Early Modern Europe

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

First-year seminar (Writing-intensive; Taught in English; FREN 120, SPAN-105, ROML 105)

Preamble (for topics courses): Seminar in Reading Writing and Reasoning taught in English

Political, social, and economic life was radically changed by growth of Europe’s cities between medieval and modern times. These changes were debated in sexual terms as conflicts between men and women. As we study short stories from Early Modern France (Madame de Lafayette), Italy (Giovanni Boccacio), and Spain (Miguel de Cervantes and María de Zayas), and place them in their historical contexts, we will ask questions such as: To what extent do these works challenge or reinforce dominant models of gender relations and negotiate concepts and institutions such as marriage, honor, patriarchy, and blood purity? How do those topics apply to us today?

(Spring) Introduction to Judaism - *Not offered this year/term*
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Religion 104fs)
Judaism is a 3,500-year-old tradition that has developed over time as Jewish communities all over the world creatively interacted with the different cultural and historical milieus in which they lived. This course explores the ways in which Judaism has sought to transform ordinary life into sacred life. What are the ways in which Judaism conceives of God, and what is the meaning of life? What roles do study, prayer, ethics, sex, marriage, family, rituals of the life cycle, and community play in Judaism? These and other questions will be taken up through study of diverse types of religious literature and historical evidence.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Religion 215f)
Along with such genres as letters, ethical wills, travel accounts, and other personal communications, spiritual autobiographies and diaries often reveal what people actually thought and felt about matters important to them. These sources provide insight into religion as lived experience. This course studies autobiographical accounts of Jewish religious figures from the medieval period to the contemporary. We include narratives by both women and men, philosophers, mystics, messianic pretenders, travelers, authors of Holocaust memoirs, and other contemporary Jews. Taken together, such accounts bring to life the diversity of spiritual quests in which Jews have engaged.

(Fall) *Introduction to Jewish Mysticism*

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Religion 235f)

Mysticism refers to a type of religious life in which individuals seek intimate and personal, direct and intense experience of the Divine. There exists a rich and fascinating Jewish mystical tradition with hundreds of books of diverse kinds. This course examines the *Kabbalah* of thirteenth-century Spain, focusing upon the seminal work of this period, the *Zohar*; the synthesis of mysticism and messianism that occurred in the city of Safed (in the Land of Israel) in the sixteenth century; and the popular pietistic movement of Eastern Europe from the eighteenth century forward, Hasidism; and various expressions of mystical spirituality in our own time.

**JWST-313-01 - Jewish Studies - 2007-2008**

**(Spring) The Song of Songs: A Theology of Love**

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(RELIG-313-01)

While the Song of Songs strikes the modern reader as remarkably moving and graphic love poetry, Jews and Christians have traditionally understood it to be about the love between God and human beings. This course explores the song's literary beauty and poetics, as well as later rabbinic and Christian theological interpretations.

Prerequisites: Jr. Sr. 8 cr in department or permission of instructor

Instructors: L. Lyke

Expected enrollment: 15

**JWST-350-01 - Jewish Studies - 2007-2008**

**(Fall) Special Topics in Judaism: Contemporary Jewish Ethics - *Not offered this year/term**

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Religion 350f (01))

Preamble (for topics courses): A study of a particular problem of inquiry, topic, or theme, with a comparative focus.

This course will explore issues of contemporary ethics from the point of view of Jewish religious thought and tradition. Topics will include medical and genetic ethics, death and dying, family and sexual ethics, ethics of war, poverty, and the environment. The course will explore these issues in the context of theoretical approaches to questions of religion and ethics.

Prerequisites: 4 credits in religion or Jewish studies, or permission of instructor

Notes: 1 meeting (2 1/2 hours)

**(Spring) Special Topics in Judaism: Love, Friendship, and Interpersonal Relations in Judaism - *Not offered this year/term**

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Religion 350f (01))

Preamble (for topics courses): A study of a particular problem of inquiry, topic, or theme, with a comparative focus.

This course will explore ideas and practices having to do with interpersonal relations in Judaism, particularly notions of love and friendship in various contexts: teachers and disciples, fellow students, wives and husbands, and among members of specific communities, including intentional fellowships. There will be a special focus on traditions and communities rooted in Jewish mystical tradition, including Hasidism.

Prerequisites: 4 credits in religion or Jewish studies, or permission of instructor

Expected enrollment: 20

LATIN-102-02 - Latin - 2007-2008
(Spring) Elementary Latin
Credits/PE Units: 4; Requirements met: Meets Language requirement; does not meet a distribution requirement
Offers study and practice in the grammar and syntax of classical Latin.
Notes: 4 meetings (50 minutes); Students who have not completed Latin 101 should consult the department. Students must complete both Latin 101 (4 credits) and 102 (4 credits) to satisfy the language requirement
Instructors: G. Ryan
Expected enrollment: 20

LATIN-201-01 - Latin - 2007-2008
(Fall) Intermediate Latin I
Credits/PE Units: 4; Requirements met: Meets Language requirement; does not meet a distribution requirement
Combines a thorough review of Latin grammar and syntax with an introduction to the life and literature of ancient Rome, based on the reading of selected passages of Roman prose and poetry.
Notes: Students who have not completed Latin 102 must take the diagnostic exam; 3 meetings (75 minutes)
Instructors: B. Arnold

LATIN-222-01 - Latin - 2007-2008
(Spring) Intermediate Latin II
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Includes the life and literature of the early Roman empire, as seen in selected works of authors such as Petronius, Ovid, Pliny, and others. Offers further review of grammar and syntax.
Notes: Students who have not completed Latin 201 should consult with the professor; 3 meetings (50 minutes)
Instructors: The Department
Expected enrollment: 20

(Fall) Vergil: Aeneid
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
A study of the Aeneid with attention both to its presentation of the classic conflict between Greek and Roman value systems and to its controversial portrayal of empire in the Augustan age.
Prerequisites: Latin 222 or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: B. Arnold
LATIN-312-01 - Latin - 2007-2008
(Spring) Roma Ludens: Comedy and Satire in Ancient Rome - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Could Romans be funny? Perhaps surprisingly, in a culture where seriousness (gravitas) and sternness (severitas) were praiseworthy attributes, Romans enjoyed theatrical productions adapted from Greek comedies - from raucous and ribald farces to more subtle comedies of manners. They also believed that satire, poetry that poked fun at the vices and foibles of human nature, was a truly Roman genre. Moreover, both comic and satirical elements appear in a wide range of Roman literature. Authors may include Plautus, Terence, Horace, Ovid, Martial, Juvenal, and others.
Prerequisites: Latin 222 or permission of instructor; 2 meetings (75 minutes)
Instructors: P. Debnar

LATIN-313-01 - Latin - 2007-2008
(Spring) The Roman Historians
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
In the minds of Romans, history and historiography were closely linked. Thus, in this course, we will examine equally form and content (i.e., how Romans wrote their history and what they tended to write about) in the works of Livy, Sallust, and/or Tacitus.
Prerequisites: Latin 222 or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: M. Landon
Expected enrollment: 20

(Fall) Junior/Senior Tutorial
Credits/PE Units: 2-4; Requirements met: Meets Language requirement or Humanities I-A requirement
Studies in Roman lyric, elegy, didactic poetry, the Roman novel, Roman use of myth in literature, or other authors or genres.
Prerequisites: jr, sr with 8 credits of advanced work in Latin; Permissions of instructor
Instructors: The department

Latin American Studies

LATAM-170-01 - Latin American Studies - 2007-2008
(Fall) Readings in Caribbean Literature - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
Features comparison of selected readings in the literature of the Spanish-, French-, and English-speaking Caribbean. Introduces the literary personality of the area, the transformation of the material of Caribbean social life into formally crafted and effective literary statement, and characteristic thematic and broader cultural preoccupations. Asks primary questions, such as "How does a novel - or poem - work?" and addresses similar issues related to forms of critical thinking and literary analysis. Readings and discussion in English.
Notes: 2 meetings (75 minutes)
Instructors: R. Marquez

LATAM-175-01 - Latin American Studies - 2007-2008
(Fall) Historical Emergence of the Caribbean
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
The historical development of the Caribbean from the Conquest to the mid-twentieth century. Patterns of conquest, colonization, and settlement by European nations; the rise of plantation-dominated society; the process of insular and interregional differentiation; the emergence of American imperial designs; and the rise of anticolonial, nationalist movements. Comparative reviews of the experience of Haiti, Jamaica, and Puerto Rico highlight broader regional trends and the ways the Caribbean's major language zones have responded to the challenge of their shared history.
Notes: 2 meetings (75 minutes)
Instructors: R. Márquez

LATAM-180-01 - Latin American Studies - 2007-2008
(Fall) Introduction to Latin American Cultures
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(History 180f)
Examines the confrontation, assimilation, and transformation of Amerindian, African, and European cultures in Latin America from the sixteenth century to the present. Focuses on the processes in which distinctive self-images emerged in the region and how these images have been challenged and changed over time. Uses films, literature, and folk traditions to complement scholarly analyses of the emergence of a New World mentality.
Notes: 2 meetings (75 minutes)
Instructors: L. Gudmundson

(Spring) Paradigms of New World Thought - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This course is devoted to the work of commanding figures of Latin American and Caribbean thought at various times and different places. Thinkers whose work may form its basis in various offerings include among others: Columbus, Bartolomé de Las Casas, José Martí, J. C. Mariátegui, C.L.R. James, etc. Their lives and work exemplify the diversities, varying regional settings, social contexts, and shifting historical coordinates of major epochs of transition. Their assessment of a myriad of key issues has made each a touchstone of continuing authority and influence extending beyond their particular locale, time, or region. Why this should be so is among the many questions we will address.
Instructors: R. Marquez

(Spring) Caribbean Women Writers - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
Comparative examination of contemporary women's writing in the Caribbean. Emphasis will be on their engagement with issues of history, cultural articulation, race, class, gender, and nationality, including exploration of their formal procedures, individual moods, regional particularity, and general impact as writers. Rosario Ferré, Ana Lydia Vega, Julia Alvarez, Edna Brodber, Maryse Conde, Simone Schwarz-Bart, Jean Rhys, Beryl Gilroy, and Rosa Guy are among those whose works we will review.

(Fall) The Fiction of History: Historical Truth and Imaginative Invention in the Latin American Novel - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
Examination of the scope, reach, and limits of the Latin American variant of the historical novel as a narrative form. The variety of ways in which it fictionally strives to re-create "certain crisis in the personal destinies of a number of human beings [which] coincide and interweave with the determining context of an historical crisis," the historical vision each writer brings to the work, will be given particular attention.
Instructors: R. Márquez

(Fall) Topics in Latin American Studies - *Not offered this year/term

Prerequisites: jr, sr, 4 credits in Latin American studies
Notes: 2 meetings (75 minutes)

(Fall) Modern Mexico - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
An analysis of the modern Mexican nation-state organized around three major themes: the conflictive yet symbiotic relationship with the United States, from the war of the 1840s through the North American Free Trade initiative of today; the succession of reformist and revolutionary upheavals in 1810-1821, 1856-1867, 1910-1917, the 1930s, and again today, seeking to resolve both problems of the colonial past and new conflicts traceable to the very reforms generated by earlier political and social struggles; and the meaning of Mexican nationality from different ethnic, gender, and class perspectives. Readings include autobiographical and literary works, historical studies, and films.
Notes: 2 meetings (75 minutes)
Instructors: L. Gudmundson

(Spring) Slavery in the Americas - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
A course, organized topically rather than geographically or nationally, that offers a comparative analysis of African American slavery as a dominant social system in Brazil, the Caribbean, and the U.S. South. Topics include: why slavery?; sugar and slavery; historical demography; culture and the law; kinship and family; long-run economic development; patterns of race relations; master class and racist ideologies; resistance to slavery; and abolition and its aftermath. Readings include historical and anthropological studies, as well as a major documentary collection on slavery in Brazil.

(Spring) Studies in Comparative Caribbean Culture: Contemporary Caribbean Writers - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
A sustained, comparative study of the developing canon of at least three major contemporary writers from the Caribbean, representing the region's Spanish-, English-, and French-speaking cultural zones. Articulates the evolution, contours, and scope of each author's unique perception of the New World and, especially, the broadly defining features of what Welsh cultural historian Raymond Williams would have called their peculiarly Antillean "structure of feeling."

Notes: 2 meetings (75 minutes)
Instructors: R. Márquez

LATAM-386-01 - Latin American Studies - 2007-2008
(Fall) Central America: Reform, Reaction, Revolution
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This seminar explores the diverse experiences of Central American nations in the twentieth century. From a common basis in an export-oriented agriculture, social and political alternatives ranging from social democracy to recurrent military rule, neofascist regimes, and revolutionary socialism have emerged in the isthmus. The course uses materials ranging from autobiography and literature to historical and anthropological studies to understand how this came to be. In addition to national cases, we consider the unique experiences of the area's indigenous and Atlantic-coast peoples within and outside the nation-state framework.
Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor
Notes: 1 meeting (2 1/2 hours)
Instructors: L. Gudmundson

(Spring) Special Topics in Latin American Studies - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
Preamble (for topics courses): This course offers advanced students an opportunity for intensive study of a problem with careful attention to research methods and to presenting their work in oral and written form.
Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor
Notes: 1 meeting (2 1/2 hours)

(Spring) Postmodernism and Latin America - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
For many the "discovery" of America opened the modern era. Its closing may also have been foretold in Latin America's confounding of diverse theories of modernization and development in recent times. This seminar will introduce the student to a number of both classic and more recent works on Latin America (in English) that advance along postmodernist lines, ranging from cultural contact and conflict, language, meaning, and power in the sixteenth century, to the invention of national identities in the nineteenth century, to discourses of ethnicity, class, gender, and reason in the twentieth century.
Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor
Notes: 1 meeting (2 1/2 hours)
Instructors: L. Gudmundson

(Spring) Agrarian America: Sugar, Cotton, Coffee, Wheat
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course explores the structure and variety of societies generated in North, Central, and South America by four widely distributed export crops. Although not bound by rigid chronology, our focus will be primarily on the period 1750-1950. Principal concerns of the course are variations by time and place in each commodity's technologies, labor systems, farm sizes, and social structure; the political dynamics associated with each type of farming; and the problematic features of capitalism in agriculture, or, how and when do peasants become farmers and farming agribusiness? Readings in English on cases drawn from throughout the Americas.
Notes: Prereq. jr, sr, 8 credits in Latin American studies or related field, or permission of instructor; 1 meeting (2 1/2 hours)

Mathematics

(Fall) Enriched Calculus IA
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): This yearlong course includes the topics in Mathematics 101, Calculus I. It is intended for students who, based on the results of their precalculus assessment and the agreement of the instructor, need to strengthen their quantitative and algebraic precalculus skills in order to learn calculus.
Features modeling of phenomena in the natural and social sciences. Mathematics 100A: representation and interpretation of data, functions and their graphs, the derivative. Mathematics 100B: logarithmic and trigonometric functions, integrals and the varied processes that they can represent, accumulation and antidifferentiation, the several forms of the fundamental theorem.
Prerequisites: permission of instructor. Student may send assessment score and background information to gdavidof@mtholyoke.edu. 2 meetings (75 minutes), 1 meeting (50 minutes)
Notes: Completion of the year-long sequence fulfills a Science and Math II-A requirement.
Instructors: G. Davidoff
Expected enrollment: 30

(Fall) Calculus I
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Preamble (for topics courses): Students who have not studied calculus and who have the necessary precalculus background belong in Calculus I. Because some sections of Calculus I differ significantly from traditional high school calculus, it has been our experience that students who "start over," in order to ease the transition into college, initially may have more difficulty in Calculus I than beginners. However, students who take Calculus I expecting and welcoming new ideas have found it rich and rewarding. Please read the "Beginning the Study of Mathematics" section.
This course presents rates of change and their applications, integrals, the fundamental theorem, and modeling of phenomena in the natural and social sciences.

**MATH-110-01** - Mathematics - 2007-2008
(Fall) Explorations in Algebra - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

High school algebra is essentially the study of the laws that govern the system of numbers we use for ordinary arithmetic. This course focuses on certain of these laws and studies the systems, called "groups," governed by them. Groups have beautiful properties and describe many phenomena: crystallography, graphic art, matrix algebra, counting, nuclear physics, codes, and more. The course studies the group laws and their consequences, as well as many examples of systems satisfying these laws.

(Fall) Explorations in Number Theory - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Studies basic mathematical structures using as models symmetries of plane figures, the ordinary integers, and other number systems. Using examples to uncover patterns that help reveal and explain relationships. Solving simple equations in these new settings quickly brings students into contact with some intriguing problems being studied by contemporary mathematicians.

Prerequisites: 4 admission units or permission of instructor

(Fall) Explorations in Geometry - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

The system of geometry devised by the ancient Greeks was immutable until the nineteenth century, when it was put in a broader framework better able to accommodate the varied interests of physical science and mathematics. In this course, we study geometry as it developed historically, from the time of Pythagoras to the recent past.

MATH-139-01 - Mathematics - 2007-2008
(Fall) Explorations in Cryptology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Cryptology is the study of secret codes. Since the beginning of civilization to the present day, encrypted messages have played an important role in war, espionage, diplomacy, and business. This course examines the history of these codes and their mathematical basis.

MATH-202-01 - Mathematics - 2007-2008
(Fall) Calculus II
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Preamble (for topics courses): Most students who have taken calculus in high school begin with Calculus II. In particular, if you have studied the derivative and its applications and have been introduced to the definite integral, you will be prepared for Calculus II. Please read the "Beginning the Study of Mathematics" section.
Topics include techniques of integration, applications of integration, differential equations, sequences, series, and Taylor series.
Prerequisites: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: The department

MATH-202-02 - Mathematics - 2007-2008
(Fall) Calculus II
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Preamble (for topics courses): Most students who have taken calculus in high school begin with Calculus II. MATH-203-01 - Mathematics - 2007-2008
(Fall) Calculus III
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Preamble (for topics courses): If you have a good knowledge of applications of integration and of transcendental functions, and if you enjoy mathematics, we encourage you to begin your college-level study of calculus with Calculus III. Please read the "Beginning the Study of Mathematics" section.
Topics include differential and integral calculus of functions of several variables.
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: M. Peterson

MATH-203-01 - Mathematics - 2007-2008
(Spring) Calculus III
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

MATH-211-01 - Mathematics - 2007-2008
(Fall) Linear Algebra
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics include elements of the theory of matrices and vector spaces.
Prerequisites: any 100-level mathematics course
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: J. McLeod

MATH-211-01 - Mathematics - 2007-2008
(Spring) Linear Algebra
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics include elements of the theory of matrices and vector spaces.
Prerequisites: any 100-level mathematics course
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: R. Jordan

(Spring) Discrete Mathematics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Studies some aspects of discrete mathematics. Topics include sets, functions, elementary probability, induction proofs, and recurrence relations.
Prerequisites: any 100-level mathematics or computer science course, or permission of instructor
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: R. Jordan
MATH-251-01 - Mathematics - 2007-2008

(Fall) Laboratory in Mathematical Experimentation
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
(Writing-intensive)
Offers mathematics as a laboratory science. After a short introduction to the computer, uses hand and computer computation to explore mathematical ideas. Directs laboratory projects toward discovery of properties and patterns in mathematical structures. The choice of projects varies from year to year and is drawn from algebra, analysis, discrete mathematics, geometry, and statistics.
Prerequisites: 4 credits from the department or permission of instructor
Notes: 2 meetings (1 hour and 50 minutes)
Instructors: G. Davidoff

Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph, permission of department
Instructors: The department.

MATH-301-01 - Mathematics - 2007-2008

(Spring) Real Analysis
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics include the real number system, convergence of sequences and series, power series, uniform convergence, compactness and connectedness, continuity, abstract treatment of differential and integral calculus, metric spaces, and point-set topology.
Prerequisites: Mathematics 251 or permission of instructor
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: M. Robinson

MATH-302-01 - Mathematics - 2007-2008

(Fall) Complex Analysis - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics include differentiation and integration of functions of a complex variable, the Cauchy integral formula, residues, conformal mapping, and applications to physical science and number theory.
Prerequisites: Mathematics 203 or Physics 303
Notes: 2 meetings (90 minutes); offered alternate years at Mount Holyoke and Smith Colleges; offered at Mount Holyoke fall 2008
Instructors: The department

MATH-309-01 - Mathematics - 2007-2008

(Fall) Topics in Analysis - *Not offered this year/term
MATH-309-01 - Mathematics - 2007-2008
(Spring) Topics in Analysis - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics to be announced.
Prerequisites: Mathematics 203 and 211, or permission of instructor
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: The department

MATH-311-01 - Mathematics - 2007-2008
(Fall) Abstract Algebra
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics include algebraic structures: groups, rings (including some elementary number theory), fields, and vector spaces.
Prerequisites: Mathematics 211 and another 200-level mathematics course
Notes: 2 meetings (1 hour and 45 minutes)
Instructors: M. Robinson

MATH-319-01 - Mathematics - 2007-2008
(Fall) Topics in Algebra: Lie Groups
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
The topic for fall 2007 is Lie groups. The study of Lie groups (named for the Norwegian mathematician Sophus Lie) provides rich connections to many parts of mathematics and important applications to physics and chemistry. Topics include symmetry groups, linearization, one-parameter subgroups and the exponential map, Lie algebras and adjoint maps, and classical matrix groups.
Prerequisites: Mathematics 211; Math 311 helpful but not necessary
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: H. Pollatsek

MATH-322-01 - Mathematics - 2007-2008
(Fall) Differential Geometry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
We will study the differential geometry of curves and surfaces. In particular, we will use calculus and linear algebra to develop rigorous notions that correspond to our intuitive understanding of smoothness and curvature.
Prerequisites: Mathematics 203, 211. Mathematics 301 helpful but not necessary.
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: The department

MATH-324-01 - Mathematics - 2007-2008
(Spring) Methods of Applied Mathematics
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

MATH-327-01 - Mathematics - 2007-2008
(Spring) Advanced Logic
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(See Philosophy 327s)
Instructors: S. Mitchell
MATH-329-01 - Mathematics - 2007-2008
(Spring) Topics in Geometry and Topology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This is an introduction to point-set topology (also referred to as general topology). Point-set topology is one branch of the much broader area, topology. It is concerned with the study of properties of abstract topological spaces and structures related to such spaces. The material covered in this course will provide the common foundation for courses in algebraic topology, geometric topology, and differential topology. The core topics to be studied include: basic set theory, various interesting topologies, continuous functions, connectedness and compactness, separation axioms, countability axioms, nets and filters.
Prerequisites: Mathematics 203, one of Mathematics 211 or 251, or permission of the instructor
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes); this course may be repeated for credit
Instructors: J. McLeod

MATH-333-01 - Mathematics - 2007-2008
(Spring) Differential Equations
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This is an introduction to differential equations for students in the mathematical or other sciences. Topics include first-order equations, second-order linear equations, qualitative study of dynamical systems, and first- and second-order linear partial differential equations.
Prerequisites: Mathematics 202
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: M. Peterson

MATH-339-01 - Mathematics - 2007-2008
(Fall) Topics in Applied Mathematics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics to be selected from: the stochastic calculus, review of Black-Scholes, yield curves, swaps, interest rate derivatives, risk measurement and management, statistical analysis of financial data, Monte Carlo simulation.
Prerequisites: Mathematics 203 and 211 or permission of the instructor;
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: The department

Medieval Studies

(Spring) Medieval Culture and Society: Clash of Cultures: the Formation of the Medieval World
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar
The medieval world was forged around the movements of tribes, missionaries, invaders, and sometimes crusaders. In this course we will ask: What happens when disparate cultures come together as a result of invasion, conversion, or immigration? How does mobility shape cultural identity, and what effect does an influx of foreign traditions, language, and religion have upon a land and people? We will examine case studies of cultural conflict and blending: the barbarians in Rome, Islamic Spain, Viking England, and Anglo-Norman Ireland. Topics include race and nationhood, cultural and religious identity, and the impulses of war and immigration.
Prerequisites: fy or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: S. Hayes-Healy
Expected enrollment: 17

(Fall) Medieval Culture and Society: Seminar in Reading, Writing, and Reasoning: Europe and the Atlantic World, 1300-1700 - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
First-year seminar (Speaking- and writing-intensive; same as History 150f-01)
This course inquires into several dimensions of European society and culture during the transition from principalities and fiefs to early modern states, from feudalism to capitalism, from serfdom to both free and slave labor. Equally important, however, will be comparison of western Europe with other Atlantic societies of these centuries and examination of consequences for Europeans, Africans, and Americans (north and south) of encounters among them. Using both voices from the period and recent scholarship about early modern Western and Atlantic societies, the course will look critically at the making and remaking of "Western" culture between the Middle Ages and the modern era.
Prerequisites: fy or permission of instructor
Notes: 2 meetings (75 minutes), 4th hour
Instructors: H. Garrett-Goodyear
Expected enrollment: 15

(Fall) Medieval Culture and Society: Seminar in Reading, Writing, and Reasoning: Crossing Medieval Boundaries - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (same as English 101f)
How did medieval people think about themselves and how did they imagine, move in, and represent the physical world? This course explores the various ways medieval culture created and crossed significant boundaries in the areas of art, literature, religion, mathematics, and science. Texts will include medieval maps, travel literature such as Mandeville's Travels, letters of Heloise and Abelard, works of Christine de Pizan, Malory's Morte D'Arthur, manuscript illuminations, and selected material from late medieval theories of love, medicine, astrology, and mathematics.
Prerequisites: fy or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: C. Collette
Expected enrollment: 17

MEDST-200-01 - Medieval Studies - 2007-2008
(Fall) Special Topics in Medieval Studies: Exploring Medieval Texts and Contexts
Credits/PE Units: 2, Requirements met: Does not meet a distribution requirement.
(same as History 232f and English 214f)
Preamble (for topics courses): This course is designed to address themes and historical periods in an interdisciplinary framework. Topics will bring together the study of art, literature, and history to heighten awareness of the complex interaction of cultural and political forces in medieval society. Issues will be explored through the methods of different disciplines in order to develop the student's analytical and critical skills.
This full-year course allies students of late medieval history and literature with its two instructors in exploration of texts and contexts that constituted the society and culture of England, 1350-1530. The first semester emphasizes discovery of published evidence from the era; the second challenges participants to integrate textual analysis and historical interpretation. Major texts include works by Chaucer, Gower, and Malory, read within an array of
less familiar medieval sources. Major topics include languages and book culture of late medieval England; violence and chivalry; the worlds of manors and guilds; polity, gender, and governance; and late medieval science.

Prerequisites: Prereq. soph, jr, sr, or permission of instructor; 2 credits each semester.

Notes: A full-year course, 2 credits for each semester; 1 meeting (110 minutes)

Instructors: H. Garrett-Goodyear, C. Collette

Expected enrollment: 25

MEDST-200-03 - Medieval Studies - 2007-2008

(Spring) Special Topics in Medieval Studies: Illustrious and Abandoned Women - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement.

(same as English 214s and Italian 214s)

Preamble (for topics courses): This course is designed to address themes and historical periods in an interdisciplinary framework. Topics will bring together the study of art, literature, and history to heighten awareness of the complex interaction of cultural and political forces in medieval society. Issues will be explored through the methods of different disciplines in order to develop the student's analytical and critical skills.

A comparative reading of Christine de Pizan's *Book of the City of Ladies*, Boccaccio's *Ilustrious Women*, and Chaucer's *Legend of Good Women*. How did these late medieval authors imagine women's voice, agency, and virtue in the public and private spheres? Why does the figure of the strong secular woman emerge in medieval culture at this period? How do these medieval heroines compare to their Classical predecessors? What ideologies of female virtue do these three writers reflect? All readings in translation.

Prerequisites: Medieval Studies 101 or 102, or 8 credits in either English or Italian

Notes: credit available for medieval studies, Italian, or English; 2 meetings (75 minutes)

Instructors: C. Chierichini, C. Collette

(Spring) Special Topics in Medieval Studies: The Crusades and the Making of Medieval Europe - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement.

(same as History 217s)

Long before Operations "Desert Storm" and "Iraqi Freedom," Westerners were drawn to the Middle East. This course will examine the "Holy War" of Christians against Moslems and Jews in the Middle Ages and seek to determine underlying causes: the need to defend Constantinople and the Holy...
Land from the infidel, the greed for markets and the spoils of war, the domestic frustrations that were displaced to an external enemy, the ideology of divine mission and martyrdom. Sources: laws, chronicles, memoirs, sermons, and treatises from Latin, Greek, and Moslem perspectives.

**MEDST-300-01** - Medieval Studies - 2007-2008
(Fall) Old Norse
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Engl-310)
An introduction to the language, literature, and mythology of medieval Scandinavia in a series of grammar lessons and readings from the *Prose Edda* of the Icelandic chieftain Snorri Sturluson (1178-1241). We will also learn the two Norse runic alphabets and read the earliest runic inscriptions from Denmark, Sweden, and Norway. Requirements: daily grammar review and translation in class; a final translation project.
Prerequisites: jr, sr, 8 credits in department beyond English 101, or permission of instructor
Notes: 2 meetings (75 minutes); meets English department pre-1700 requirement
Instructors: C. Davis
Expected enrollment: 15

**MEDST-300-01** - Medieval Studies - 2007-2008
(Spring) Seminar in Medieval Studies: Forging the Ring - *Not offered this year/term*
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive; same as English 316s)
This course will study J. R. R. Tolkien's imaginative creation of Middle Earth within the context of his extensive knowledge of philology and mythology, as well as within the context of his participation in the Inklings, the literary group that also included C. S. Lewis and Charles Williams. It will discuss their theories of myth, literature, and fable, as well as their influence on twentieth-century understanding of medieval culture. Reading will include works of fiction and literary theory by all three authors, as well as secondary material.
Prerequisites: Medieval Studies 101 or English 311, or permission of instructor
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: C. Collette
Expected enrollment: 15

**MEDST-300-02** - Medieval Studies - 2007-2008
(Spring) Seminar in Medieval Studies: Gender, Language, and Power 1300-1700 - *Not offered this year/term*
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(same as History 351s)
This course explores how some women expressed their understanding of the social, ideological, and political struggles in which they were engaged between the early fourteenth and late seventeenth centuries. It asks what roles they played in the construction of public discourse and the state, the reshaping of the family, the reconstruction of Christianity, and the change from medieval feudal estates to early modern agrarian capitalism. Readings will include works by Christine de Pisan, the Paston women, Anne Askew, Lady Mary Wroth, Elizabeth Carey, Lady Eleanor Davies, as well as records of Elizabethan coronation pageants, public ceremonies, household accounts, and diaries.
Prerequisites: written application and permission of instructor
Notes: 1 meeting (3 hours)
Instructors: H. Garrett-Goodyear
Expected enrollment: 15

Music

MUSIC-100-01 - Music - 2007-2008
(Fall) Basic Musicianship
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Explores the ways in which sound is organized into musical structures. Topics include the physical properties of sound; the basic vocabulary of Western music (scales, key signatures, intervals, triads, rhythm, meter); and an introduction to musical form and analysis. Includes extensive practice in music reading, sight singing, ear training, and critical listening.
Notes: 3 meetings (50 minutes), 2 labs (50 minutes)
Instructors: G. Steigerwalt
Section Instructors: 01 LAB T.B.A. | 02 LAB T.B.A. |
Expected enrollment: 28

(Spring) Music and Technology
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
It is now possible to record, manipulate, notate, and compose music with a variety of powerful and flexible tools using the personal computer. This course will focus on hands-on experience with various sorts of music software, including recording and editing, mixing, synthesis and midi interfaces, notation, and various instructional programs. In the process of experimenting with these tools and operating on their favorite musical styles, students will learn a good bit of notation, ear training, and rudimentary principles of arrangement and composition. Basic computer literacy (such as comfort with basic editing commands and the concept of keyboard shortcuts) is required.
Notes: 2 meetings (75 minutes)
Instructors: R. Eisenstein
Expected enrollment: 15

MUSIC-103-01 - Music - 2007-2008
(Fall) History of Jazz - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course will follow the origins and evolution of jazz from the late nineteenth century to the present, with emphases on prominent stylistic trends and significant individuals. Along with some analysis of the musical language jazz employs, the music will be examined in its relation to the social contexts that helped produce and shape it. The ability to read music is not a requirement for this course.
Notes: 2 meetings (75 minutes)
Instructors: D. Sanford
Expected enrollment: 40

MUSIC-105-01 - Music - 2007-2008
(Fall) Music in the American Musical: The Golden Age - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Have you ever wondered what the name of that marvelous melody was that you were humming? Could it be part of our heritage? "It's so familiar..."
This course will focus on the "classic" genre of popular music - its form, structure, relationship to text, dramatic context, incidental usage, etc. -
expressed in the great musicals of American tradition. Special emphasis will be directed to masterpieces of Kern, Porter, Gershwin, Rodgers, and Bernstein among others.

Notes: 2 meetings (75 minutes)
Instructors: A. Bonde
Expected enrollment: 40

(January) Jazz Ensemble Concert Design
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
A course based on the creation and development of a Jazz Ensembles of Mount Holyoke concert performance with added theatrical elements. A radio show (circa 1940) will be scripted with attention to historical detail. Production related responsibilities (stage design, costume design, lighting design, sound design, stage management and staffing) will also be discussed and planned out.
Prerequisites: Prior enrollment in Jazz Ensembles and/or permission of the instructor.
Notes: 5 meetings (4 hours, MTWTHF, 10-12 and 2-4)
Instructors: M. Gionfriddo

(January) The Artful Ear
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
What are we doing when we are listening to music? How does the human brain process sound and why do those sounds affect us the way they do? Drawing on recent neurological findings, music history, ethnomusicology and our own personal experiences, students will learn to listen more deeply to all of the world's musics.
Notes: TuTh 10-12 (6 meetings)
Instructors: E. Benjamin

(Spring) Performance Practices in African Music - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
This course examines African performance conventions, styles and techniques as illustrated in selected musical traditions. The course addresses important questions about African performances including: How are performing groups organized? What are the internal dynamics of group performance? When and how is improvisation appropriate? Selected examples, including Yoruba "dundun" music, Dagomba drumming and Shona "mbira" music, are studied with a view to understanding African performance practices and presentational skills. The course combines lectures with practical sessions, and culminates in a group performance and write-up based on the performance.

(Fall) Topics in Music: Nineteenth-Century Chamber Music
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)
Preamble (for topics courses): This seminar is designed to increase familiarity with and facility in the use of primary materials for musicological and/or theoretical research, as well as in the critical evaluation of published scholarship. Engagement with a shared topic at the outset of the semester provides the context from which each student fashions an independent project. Oral presentations are integral to the course, with a major paper as the final requirement.
Chamber music was something of an anomaly after Beethoven. It fell uneasily between the two apparent ideals of the nineteenth century: the solo, intimate, expressive miniature on the one hand, and the large and monumental on the other. The role of chamber music, its significance in a composer's output, the preeminence of the string quartet over other chamber combinations, and chamber music's association with non-public performance venues all underwent dramatic transformation during the century. The course will include chamber works by composers such as Beethoven, Schubert, Mendelssohn, Schumann, Verdi, Brahms, Fauré, Debussy, and Schoenberg.

Philosophy

PHIL-101-01 - Philosophy - 2007-2008
(Fall) Introduction to Philosophy
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
For thousands of years, humankind has grappled with questions concerning such fundamental topics as existence, knowledge, and morality. For example: Does the world exist as we perceive it? What distinguishes right from wrong? Do we possess souls existing independently of our corporeal bodies? What is the ideal form for society? Can anything be known with certainty? In this course, we explore these and other perplexing questions through an analysis of classic philosophic texts drawn from the Western intellectual tradition. Works by authors such as Plato, Aristotle, Descartes, Leibniz, Hume, Mill, Kant, Russell, and others will be considered.
Notes: 2 meetings (75 min)

PHIL-102-01 - Philosophy - 2007-2008
(Fall) First-Year Seminar: Introduction to Philosophy
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar
This seminar explores some of the great philosophical problems pondered by the Western canon such as: What makes an action morally right or just? What obligations do we have to our fellow human? Can we have any moral obligations if our actions are causally determined in the same way that other physical events are? How is it that we know what we think we know about our own existence and the existence of the world? Are we obligated to form beliefs on the basis of evidence, not faith or wishful thinking? If so, why?
Prerequisites: fy or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: C. Lee
Expected enrollment: 20

PHIL-103-01 - Philosophy - 2007-2008
(Spring) Comparative Introduction to Philosophy
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
What kind of life should a person live? What can we know about the world? Do we have souls that are separate from our bodies? The aim of the course is to learn something about the ways that thinkers throughout the globe have discussed important philosophical questions. We read some European philosophers (such as Plato, Descartes, and Kant) alongside philosophers from other traditions, such as the Chinese and Indian traditions (e.g., Chung-Tzu or Santideva), and we also read some contemporary writers from other cultural traditions (such as James Baldwin and Glorta Anzalda). This course is equivalent to Philosophy 101.

PHIL-201-01 - Philosophy - 2007-2008
(Fall) Philosophical Foundations of Western Thought: The Greek Period
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
An introduction to ancient Greek philosophy, focusing mainly but not exclusively on the works and ideas of three Athenian philosophers who worked and taught in the period between the Persian Wars and the rule of Alexander the Great, more than 2,300 years ago: Socrates, Plato, and Aristotle. Topics to be discussed include: What is the nature of the world? What is truth, and how can it be known? What kind of life should we live? We will work to understand each philosopher's responses to these questions, but we will also learn to develop our own answers. We will take care to place these figures and their works in proper historical and cultural context.
Notes: 2 meetings (75 minutes)
Instructors: C. Perin
Expected enrollment: 30

PHIL-202-01 - Philosophy - 2007-2008
(Spring) Philosophical Foundations of Western Thought: The Modern Period
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Investigates the development of Western philosophy in the seventeenth and eighteenth centuries through the writings of Descartes, Locke, Spinoza, Leibniz, Berkeley, Hume, and Kant. Focuses on the impact of modern scientific thought on the philosophical tradition's understanding of the place of the human being in the world. Topics include the nature and extent of human knowledge, the nature of the mind, and the possibility of human freedom.

PHIL-206-01 - Philosophy - 2007-2008
(Fall) Introduction to the Philosophy of Science - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course provides students with an introduction to philosophy based upon the philosophy of science. Questions to be discussed include: What is the nature of scientific reasoning? What are scientific theories, and how are they tested? How are scientific concepts and explanations used? The social aspects of scientific inquiry will be addressed, as will some feminist criticisms of science. The idea of scientific progress will also be given extended treatment.

Expected enrollment: 50

PHIL-208-01 - Philosophy - 2007-2008
(Fall) Knowledge and Reality - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course is an introduction to the central topics in epistemology (theory of knowledge) and metaphysics (theory of reality). The course aims to be both historical and contemporary. It will look at questions such as: How is knowledge possible? What is knowledge? What is it to say something exists? What is the nature of cause and effect?
Notes: 3 meetings (50 minutes)
Instructors: C. Lee
Expected enrollment: 50

PHIL-208-01 - Philosophy - 2007-2008
(Spring) Knowledge and Reality
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
What is knowledge? Does the world exist independently of our minds? What makes me a single, unified person who exists continuously over time? In this course, we will explore these and other central questions in epistemology (theory of knowledge) and metaphysics (theory of reality) concerning predictions about the future, universal generalizations, the categories/concepts we employ in making such predictions and generalizations, and the nature of cause and effect. This course aims to be both historical and contemporary.
Notes: 2 meetings (75 minutes)
Instructors: C. Lee
Expected enrollment: 30

PHIL-210-01 - Philosophy - 2007-2008
(Fall) Logical Thought
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course cultivates sound reasoning. Students will learn to see the structure of claims and arguments and to use those structures in developing strong arguments and exposing shoddy ones. We will learn to evaluate arguments on the strength of the reasoning rather than on the force of their associations and buzzwords.
Notes: 3 meetings (50 minutes)

PHIL-212-01 - Philosophy - 2007-2008
(Fall) Philosophical Foundations of Chinese Thought: The Ancient Period - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Asian Studies 214)
An introduction to Chinese thought in the classical period roughly between 500 and 221 BCE, a time of social and political furor. We will survey different philosophical responses to this upheaval, with an eye to the contemporary relevance of ancient Chinese wisdom. The course format consists of lecture and discussion preceded by extensive reading of primary texts (in translation). No familiarity with Chinese history, philosophy, or language is assumed.

(Spring) Philosophical Foundations of Chinese Thought: The Post-Classical Period - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Asian Studies 214)
An introduction to Chinese thought in the post-classical period, from the beginning of the Qin dynasty (221 BCE) onward. The focus will be on Neo-Confucianism and Neo-Daoism. Some versions of Buddhism also will be covered, for Neo-Confucianism draws substantially on Buddhist metaphysical conceptions. Asian Studies 214/Philosophy 212 provides helpful background to this course but is not a prerequisite.
Notes: 2 meetings (75 minutes)
Expected enrollment: 50

PHIL-225-01 - Philosophy - 2007-2008
(Spring) Introduction to the Philosophy of Science - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course covers the central philosophical positions and topics in philosophy of science from mid-twentieth century until the present day. It begins with the positivist view current at mid-century, covers the move to pragmatism of the 1960s and 1970s and looks at sociological and historical attitudes since then. It asks to what degree it is possible for science to investigate a value-independent reality in the light of these developments.
Prerequisites: 4 cr in D
Instructors: S. Mitchell
Expected enrollment: 50

PHIL-226-01 - Philosophy - 2007-2008
(Spring) Symbolic Logic
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course develops a symbolic system that can be used as the basis for inference in all fields. It will provide syntax and semantics for the language of this system and investigate its adequacy. It provides the basis for all further work in logic or in the philosophical foundations of mathematics. Much of the course has a mathematical flavor, but no knowledge of mathematics is necessary.
Notes: 3 meetings (50 minutes)
Instructors: S. Mitchell
Expected enrollment: 75

PHIL-227-01 - Philosophy - 2007-2008
(Fall) Feminism and Knowledge
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Gender Studies 212)
Is knowledge gendered? Is science objective? What does it mean to make such claims, and how does one justify them? In this course, we will investigate how gender roles, gender identity, and ideas about gender influence the construction of knowledge. We will look at three competing views about these influences - in particular, empiricism, standpoint theory, and postmodernism - in the context of empirical research in the social sciences.
and biology. We will consider what it means to do research as a feminist and what kind of cognitive authority women hold in the creation of knowledge.

Prerequisites: 4 credits in gender studies or philosophy or permission of instructor

Notes: 2 meetings (75 minutes)

(Fall) Ethical Issues in Complex Organizations

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Complex Organizations 232)

There is much talk recently of the need for increased attention to "ethics" in organizational life. This course examines the basis for this concern and the underlying beliefs and structures that give rise to ethical issues, with the goal of helping students to clarify their own positions. Topics addressed will include profit, governance, consumption, distribution, and the social contract. Readings will draw on philosophy, religion, economics, history, literature, management theory, and current events.

Prerequisites: Prereq. soph, jr, sr; 4 credits

Notes: 1 meeting (3 hours)

(Fall) Medical Ethics

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Modern medicine has raised new and difficult moral and philosophical problems. Topics discussed include: What is the distinction between health and illness? How should limited health care resources be distributed? How are medical problems related to larger social problems (e.g., sex inequality)? What are the responsibilities of medical researchers toward their research subjects? What moral reasons do we have to be concerned about the growth of technology in medicine? Are the basic institutions of medicine and medical education just?

(Fall) Environmental Ethics: Nature/Culture/Values - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

A fundamental problem we face as humans is how we should relate to the natural world. Why not turn Yosemite into a parking lot? Is nature to be controlled through applying technological expertise? Or is Thoreau correct in his suggestion that we must immerse ourselves in nature to discover who we truly are? Might the value of nature extend beyond its utility for humans? Students have the opportunity to explore these questions, challenging widespread assumptions about nature, culture, and values.

(Fall) Issues in Contemporary Moral Theory - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Do we need to develop virtues to lead a good life? Is morality founded on freedom or happiness? What does it involve for an individual to be just?

What is the relationship between morality and power? This course explores questions and texts relevant to contemporary ethical philosophy. We will examine a number of contemporary texts written by philosophers interested in concepts such as virtue, freedom, justice, and power.

Prerequisites: Philosophy 205 or permission of instructor

Notes: 2 meetings (75 minutes)
Some say that philosophers pursue objective knowledge. Feminist philosophy is a body of scholarship that questions the extent to which traditional philosophy has pursued or can pursue knowledge in an objective way. This course is an introduction to issues in feminist philosophy, including its critique of traditional Western philosophy and its contributions to major areas of philosophy such as metaphysics, ethics, epistemology, social and political philosophy, and the philosophy of language.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course will take us on an odyssey through philosophy, literature, and film in order to understand the relationship between our most fundamental assumptions about human nature and our visions of human community. We will examine both positive and negative models and imagined futures to decipher their underlying (and often unacknowledged) claims about human existence, our role in the world, and our place in the cosmos. Readings will include selections from Plato, Huxley, More, Descartes, Marx, Orwell, Lincoln, Paine, Atwood, and others. Students will complete frequent, brief writing assignments and class presentations as well as a more involved final project.

(Spring) Medieval Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Survey of medieval philosophy, focusing on such puzzling questions as (1) Is human free will compatible with God's foreknowledge of all that will ever happen? (2) Are there good arguments for the existence of God? (3) Is the idea of an omnipotent being coherent? (4) Could morality be adequately based on the mere fact that God wants us to do something, rather than on the reason God has for wanting us to do it? (5) Can there be a thing that is a universal thing? Text: Philosophy in the Middle Ages, edited by Hyman and Walsh.

(Spring) Philosophical Foundations of Western Thought: The Nineteenth Century - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course explores the ways the nature, possibility, and extent of human freedom were conceptualized by German philosophers in the nineteenth century. Readings are drawn from the work of Hegel, Feuerbach, Marx, and Nietzsche. Specific topics include Hegel's metaphysics of spirit, Feuerbach's critique of religious and philosophical mystification, Marx's analysis of alienation, and Nietzsche's ideal of the "Over-Man."

PHIL-253-01 - Philosophy - 2007-2008
(Fall) Introduction to Asian Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course introduces students to the traditional systems of thought in Asia, concentrating on Hinduism in India; Taoism in China; and Buddhism in China, India, and Japan, with occasional reference to other systems. Secondary and primary texts are read, along with some literature inspired by these philosophies. Cross-cultural explorations - and considerations of gender, caste, and elitism - are encouraged.
PHIL-255-01 - Philosophy - 2007-2008
(Fall) Existentialism
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Is life absurd? Do human beings really want to be free? Or do we prefer to sacrifice our freedom for comfort and amusement? Is God dead? Is it possible to live without religious belief? These are among the central questions about human life raised by existential thinkers. We will discuss these issues, and many others, through careful reading of philosophic and literary texts by such important existentialists as Søren Kierkegaard, Friedrich Nietzsche, Martin Heidegger, Jean-Paul Sartre, Albert Camus, Simone de Beauvoir, and Franz Fanon.

(Fall) Philosophy of Physics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Twentieth-century physics is a philosophical goldmine, rich with profound multifaceted challenges to common conceptions of space, time, matter, identity, and causality. Our primary focus will be quantum physics, with some attention given to the special and general theories of relativity, chaos theory, complexity theory, and quantum field theory. We will explore the nature of being and the nature of human understanding through an investigation of theoretical and experimental developments, including recent and surprising laboratory actualizations of canonical thought experiments. This course does not require prior knowledge or skills in physics or mathematics.
Notes: 2 meetings (75 minutes)
Expected enrollment: 15

PHIL-263-01 - Philosophy - 2007-2008
(Fall) Philosophy of Biology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Biology gives rise to many interesting philosophical questions. For example: How could there be evidence for evolution when we can't predict new species? How could adaptations be intended for some purpose? Are individuals selected by natural selection or could groups be selected too? How does evolution add light on human behavior, if at all? In this course we will consider these issues. Designed to be accessible to those with backgrounds in either philosophy or biology.

Expected enrollment: 50

PHIL-264-01 - Philosophy - 2007-2008
(Fall) Philosophy of Mind - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
An introduction to the mind/body problem and the way that it shapes our view of ourselves, this course emphasizes work in cognitive science, an interdisciplinary approach that draws together artificial intelligence, neurobiology, linguistics, philosophy, and cognitive psychology. Readings are from these areas and from classical philosophical sources.

Notes: 2 meetings (75 minutes)

PHIL-264-01 - Philosophy - 2007-2008
(Spring) Philosophy of Mind - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course explores long-standing questions about the nature of consciousness; the relationship between mind and body; the relationship between mind and language; and the role that science has in negotiating these questions (if any at all). We also will discuss contemporary, topical debates in the philosophy of mind.
Prerequisites: 4 credits in D or per I
Notes: 2 meetings (75 minutes)
Instructors: C. Lee

PHIL-270-01 - Philosophy - 2007-2008
(Fall) Epistemology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Issues in epistemology (the theory of knowledge) are fundamental to nearly all fields of study. This course uses both historical and contemporary texts to consider traditional questions in the theory of knowledge. Included are the following questions: Can I have knowledge of anything outside of my mind, for example, physical objects or other minds? Can we answer the skeptic's challenge that we are not justified in any of our beliefs? What is knowledge, and how does it differ from belief? Does our knowledge have a foundation or is it unavoidably circular? Is all knowledge derived from experience or is some innate?
Prerequisites: 4 credits in department or permission of instructor
Notes: 2 meetings (75 minutes)

PHIL-271-01 - Philosophy - 2007-2008
(Fall) Philosophy of Language - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
In the twentieth century, problems in the philosophy of language have become central to nearly all philosophical concerns. This course addresses key questions: What is truth? What is it for a sentence to have a meaning? Does language determine the way we think? Readings are drawn from Frege, Russell, Wittgenstein, Whorf, Quine, Chomsky, Frye, and others.
Prerequisites: 4 credits in department or permission of instructor
Notes: 2 meetings (75 minutes)

PHIL-272-01 - Philosophy - 2007-2008
(Spring) Metaphysics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Metaphysics has as its topic a cluster of interconnected issues arising out of the nature of existence, truth, reality, and freedom. Questions such as the following are addressed: What makes an individual the person she or he is? Is human freedom possible in a world in which all actions are caused? How should we decide what exists? Is there a difference between essential and contingent properties of certain things? What is the nature of truth?
Prerequisites: 4 credits in department or permission of instructor
Notes: 2 meetings
PHIL-273-01 - Philosophy - 2007-2008
(Spring) Philosophy of the Arts - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Can a pile of bricks be art? What is the difference between a musical work and a bunch of random noise? What makes a Marx Brothers movie funny? Othello a tragedy? Should art appeal to the masses?
Notes: 2 meetings (75 minutes)

PHIL-275-01 - Philosophy - 2007-2008
(Fall) Philosophy and Film Theory - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
( Film Studies)
An exploration of philosophical issues encountered in the study of film. Why do we need a theory of film? What is a film anyway? Do films have "authors"? How do films engage our emotions? Can films be socially critical? What can we learn from films? These are examples of the topics to be discussed in this course as we investigate the nature of film and its relation to philosophy. There will be weekly required film screenings
Prerequisites: 4 credits in department or in film studies, or permission of instructor
Notes: 2 meetings (75 minutes), 1 screening (3 hours)
Instructors: T. Wartenberg
Expected enrollment: 30

PHIL-275-01 - Philosophy - 2007-2008
(Spring) Philosophy and Film - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
An exploration of philosophical issues encountered in the study of film. Are films art or entertainment? Do films have "authors"? Can popular films be socially critical? These are examples of the topics to be discussed in this course as we investigate the nature of film and its relation to philosophy. Readings will be drawn from a variety of sources: philosophy, film and cultural theory, film criticism. There will be weekly film screenings.
Prerequisites: 4 credits in department or in film studies, or permission of instructor
Notes: 2 meetings (75 minutes), 1 screening (3 hours)

PHIL-280-01 - Philosophy - 2007-2008
(Fall) Philosophy for Children
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Community-based learning course; Speaking-intensive)
When you act bravely, can you be scared? How do you know that you are not dreaming now? If everyone kept telling you that you weren't a person, would you believe them? These are examples of questions raised by children's books, such as Frog and Toad Together and The Bear That Wasn't. This seminar will discuss whether young children can be taught to philosophize and what the importance of doing so would be. Participants will be required to take part in a community-based learning project of teaching philosophy to elementary school children.
Prerequisites: 4 credits in department or Education 215 or permission of instructor
Notes: 2 meetings (75 minutes); 1 lab (90 minutes)
Instructors: T. Wartenberg
Expected enrollment: 12

PHIL-290-01 - Philosophy - 2007-2008
(Spring) Philosophy in Dialogue - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Speaking- and writing-intensive)
Does life have meaning? Is time real? Must art be beautiful? Philosophers have had radically different solutions to these fundamental questions. The aim of this course is for students to develop their own answers to each of these questions through discussion and dialogue. Emphasis on developing oral and written skills. This course is recommended for all sophomores thinking of majoring or minoring in philosophy and is required for the major.

(Fall) Feminist Science Studies and Philosophy of Science - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Gndst 333)

This course examines different approaches to understanding the nature of scientific practices. Of central interest will be the diverse accounts offered by feminist and other interdisciplinary approaches to the study of science. We will pay particular attention to notions of evidence, methods, cultural and material constraints, and the heterogeneous nature of laboratory practices. We will consider the ways in which gender, race, and sexuality are constructed by science and how they influence both scientific practices and conceptions of science. We will also examine the feminist commitment to taking social factors into account without forfeiting the notion of objectivity.

Prerequisites: jr, sr, 8 credits in women's studies, or 8 credits in philosophy, or 8 credits in science courses, or permission of instructor

Notes: 1 meeting (2 hours, 50 minutes)

Expected enrollment: 15

**PHIL-310-01 - Philosophy - 2007-2008**

(Fall) Twentieth-Century Analytic Philosophy - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

An introduction to the history, themes, and methods of analytic philosophy, the dominant movement in twentieth-century English-speaking philosophy. Analytic philosophy uses logic and a careful analysis of language to solve philosophical problems. We will study most of the major figures of this movement, including Frege, Russell, Carnap, Quine, and Kripke. Topics addressed will include the logic of numerical identity, reference and existence, Quine’s criticisms of logical positivism, and the meaning of necessity.

Prerequisites: 8 credits in department

(Spring) Topics in Ancient Greek Philosophy: Hellenistic Philosophy: Happiness - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

In this course we will examine the ethical theories of the three main schools of Hellenistic philosophy—Stoicism, Epicureanism, and Skepticism. The central theme of the course is eudaimonia, or happiness—a concept which serves as the starting-point for ancient Greek ethics. We will discuss a number of related issues, such as: What is the relation between virtue and happiness? What is the place of pleasure in the good life? Is knowledge
required for happiness—and if so, what kind? And how should one relate to others and to society? We will also consider how the philosophers' views on knowledge, human nature, and god contribute to their ethical theories.

Prerequisites: 8 credits in department or permission of instructor

Notes: 1 meeting (3 hours)

Expected enrollment: 20

PHIL-321-01 - Philosophy - 2007-2008
(Fall) Seminar in Philosophy of Language - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

This seminar attempts to investigate carefully the broad relationship between language and the world by focusing on issues of realism and idealism: Does language merely attach labels to things (and kinds of things) that exist independently of our thought? Or do we contribute to the construction of the world by developing a conceptual scheme for describing or representing it? The seminar will focus on the work of two pivotal figures in the philosophy of language: Wittgenstein and Chomsky.

Prerequisites: 8 credits in department

Notes: 1 meeting (2 hours)

Expected enrollment: 20

What do proper names like 'Plato', 'Sally', and 'Times Square' mean? How do 'Santa Claus' and 'Neverland' differ from the names of real people and places? Does the name 'George Washington' mean the same thing as the phrase 'the first president of the United States'? In this seminar, we will explore these and related questions about the analysis of names and descriptions. We will read papers by Russell, Kripke, Searle, and Putnam, among others.

PHIL-334-01 - Philosophy - 2007-2008
(Fall) Topics in Ethics: Meta-Ethics - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Preamble (for topics courses): This course studies issues of current concern in contemporary moral theory, moral psychology, and foundations of ethics.

Meta-ethics is the study of the concepts and methods used in ethical discourse and debate. It is not the study, for example, of which actions are right or wrong, but rather of what the terms "right" and "wrong" mean. Possible questions to be discussed in this seminar include: Can moral judgments be true or false? Are moral judgments expressions of feelings? Are they objective or subjective? Are we rationally required to be moral? Are there moral
facts? How are moral and aesthetic judgments different? This course presupposes a strong background in philosophy. Prior coursework in ethics and logic is recommended.

(Fall) Developments in Feminist Philosophy: Rethinking the World: Philosophy of Sex - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
What makes a body sexy? Is heterosexuality natural? What is "sex"? Feminist philosophy is in the midst of a revolutionary transformation. Rather than remaining content with the task of indicating the shortcomings of the philosophical canon, feminist philosophers are constructing their own distinctively feminist version of philosophy. In this course, we shall explore what contemporary feminist philosophers have written about the nature of sex and sexuality.

PHIL-350-01 - Philosophy - 2007-2008
(Fall) Topics in Philosophy: Imagination
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
The topic of this seminar is the phenomenon of imagination. What exactly is it that we are doing when we imagine? Does imagination make our knowledge of other people's (or even our own) minds possible? Is imaginability a sound test of conceptual possibility? Does moral behavior and reasoning require imagination? What is the role of imagination in aesthetic experience? Are all of these kinds of imagination the same? What is imagination, and is it as important as is often thought? We will read works by a variety of contemporary philosophers.
Prerequisites: 8 credits from the department or permission of the instructor.
Instructors: J. Harold

(Spring) Topics in Philosophy: Explanations in the Cognitive Sciences
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Psych-341)
This seminar will have a special focus on the methods psychologists have adopted in their theorizing - especially those methods borrowed from the cognitive sciences more generally. The methods we will focus on include computer simulation, mathematical modeling, brain imaging, solvability analyses, and evolutionary theorizing. We will evaluate: the theoretical purpose of adopting each of these particular methods; the degree to which these methods give rise to explanations of different types or grain; and whether the plurality of methods discussed can converge towards a unified science of the mind.
Prerequisites: 4 credits in Psychology or 4 credits in Philosophy; or, by permission of the instructor.
PHIL-350-02 - Philosophy - 2007-2008
(Spring) Topics in Philosophy: Postmodern Feminist Philosophy
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Gndst-333-04)
This course examines the work of key feminist theorists of, or informed by, the French/Continental tradition. We focus on the issues of materialism, psychoanalysis, language, materiality, performativity, subjectivity, post-structuralism, and postmodern philosophy. We read works of the following: Helene Cixous, Luce Irigaray, Julia Kristeva, Rosi Braidotti, Judith Butler, and Elizabeth Grosz.

PHIL-351-01 - Philosophy - 2007-2008
(Fall) Systematic Study of One Philosopher: Martin Heidegger - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
An in-depth critical examination of the philosophy of Martin Heidegger. Emphasis will be on his magnum opus *Being and Time*, but other works may be discussed as well. Some familiarity with modern Western philosophy will be helpful.
Prerequisites: 8 credits in department
Notes: 1 meeting (1 hour, 50 minutes)
Instructors: T. Wartenberg
Expected enrollment: 20

(Spring) Systematic Study of One Philosopher: Kant's Critique of Pure Reason - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Kant's *Critique of Pure Reason*, one of the central works in the Western philosophic tradition, is noted for both the breadth of its vision and the obscurity of its prose. This seminar involves a careful, critical reading of the text in order to assess the validity of its argumentation, its historical importance, and its significance for contemporary philosophy.
Prerequisites: 8 credits in department including Philosophy 202 or equivalent, or per instructor
Notes: 1 meeting (1 hour, 50 minutes)
Instructors: T. Wartenberg
Expected enrollment: 20

PHIL-352-01 - Philosophy - 2007-2008
(Spring) Nineteenth-Century Continental Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
During the nineteenth century, a distinctive mode of philosophizing arose, now known as Continental Philosophy, that placed the issue of human alienation squarely on the philosophic agenda. We will investigate how this topic achieved such importance through careful reading, analysis, and comparison of works by Hegel, Kierkegaard, Feuerbach, Marx, and Nietzsche. We will explore how these philosophers understood the potentials of human life as well as how they saw society limiting them.
Prerequisites: 8 credits in department

Instructors: The department
Expected enrollment: 20

PHIL-373-01 - Philosophy - 2007-2008
(Fall) Philosophy of Art - *Not offered this year/term
Preamble (for topics courses): This class examines philosophical issues arising concerning the interpretation, creation, and experience of art. Topics vary from year to year.
This seminar will focus on the work of Arthur Danto, perhaps the preeminent contemporary philosopher of art and art critic for *The Nation*. We will explore his writings from his seminal essay, "The Artworld," to his recent book, *The Abuse of Beauty*, in an attempt to understand his views on art, its development, and its future.
Prerequisites: 8 credits in department
Instructors: T. Wartenberg

Prerequisites: 8 credits in department or in film studies or permission of instructor
Notes: 1 meeting (2 hours) and screening
Expected enrollment: 20

PHIL-375-01 - Philosophy - 2007-2008
(Spring) Philosophy of Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Film Studies)
Preamble (for topics courses): An examination of different theoretical issues concerning the nature of film and film viewing. Topics vary yearly. Recently, philosophers have argued that films resemble philosophy in their use of thought experiments. But the role of thought experiments in philosophy is itself contested. The seminar will investigate how thought experiments are used in science and philosophy in order to determine whether films and, more generally, art can legitimately claim that their presentation of thought experiments connects them to philosophy. Some previous acquaintance with philosophy highly recommended.

(Spring) Bon Odori (Japanese Spiritual Dance)
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
This course focuses on a Japanese Buddhist Folk Dance performed outdoors and danced in a concentric circle around a raised platform. It is celebrated as a reminder of the gratefulness one should feel toward one’s ancestors. From this dance of joy comes Bon Odori, a time in which ancestors and their sacrifices are remembered and appreciated. Through studying the dance, students will understand its intentions: remembering and appreciating who you are and where you come from. Because the dance is closely related to Buddhism, this course will provide an opportunity for the students both to exercise through dancing and to calm their minds.

PHYS-211-01 - Physics - 2007-2008
(Spring) Gender in Science
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Gndst-241)
This course examines explanations for the under-representation of women in science, technology, engineering, and math (STEM) with an eye to identifying how to increase the participation of women in science. The course will address questions about gender differences in cognition and ability, the role of stereotyping, as well as the "leaky pipeline" issue, that is, the rate and timing of the departure of women from scientific fields. Course readings will explore the psychology of gender, as it relates to STEM. In addition, we will read research from physical scientists, reports from professional organizations such as the American Physical Society, and reports from congressional committees.
Notes: 2 meetings (75 minutes)
Instructors: K. Aidala

PHYS-216-01 - Physics - 2007-2008
(Fall) Waves and Electromagnetism
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Topics include: electromagnetism, emphasizing fields and energy; electrostatics; electric circuits; magnetism; induction; and electromagnetic radiation. Introduces both mechanical and electromagnetic wave phenomena. Additional topics chosen according to the interests of the class and instructor.
Prerequisites: Physics 115; Mathematics 202 or concurrent enrollment
Notes: 4 meetings (50 minutes), 1 lab (3 hours)
Instructors: S. Tewari
Section Instructors: 01 LAB C Thomas | 02 LAB C Thomas |

PHYS-252-01 - Physics - 2007-2008
(January) Physics K-12 Outreach
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This course will allow students to develop and participate in labs and activities for use in junior or senior high school physical science and physics classrooms. Lab development will be done in collaboration with a local teacher for integration into the curriculum and will include conception, development of lab materials (i.e. lectures, handouts, etc.), and piloting the lab in class. In addition, weekly introductory reading and discussions focusing on the history and background of K-12 science curricula in the US, science in the media, and public perception of science.
Prerequisites: Physics majors or instructor permission
Instructors: J. Summers
Expected enrollment: 12

PHYS-300-01 - Physics - 2007-2008
(Spring) Advanced Laboratory in Physics
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Often physics courses lack the sense of exploration and discovery that brings so many of us into the sciences in the first place. Advanced lab strives to capture some of that spirit by focusing on a few experimental techniques that are relevant to present day research, while guiding students through relevant journal papers. The students will be expected to design aspects of the experiments and write up their results in a journal-style format.
This course consists of two modules that each focus on one area of contemporary physics. For each module, we will read recent journal papers and perform an experiment relevant to present day research. Students will give presentations and write up their results in journal paper format.
Prerequisites: Physics 302, 308 or permission of instructor
Notes: The class will usually meet once a week for 75 minutes (exact time TBD); lab time will be flexible and independent. Weeks heavy on lab time will not have structured meeting time.
Instructors: K. Aidala
Expected enrollment: 12

PHYS-301-01 - Physics - 2007-2008
(Fall) Waves and Particles
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
A comprehensive treatment of wave phenomena, particularly light, leading to an introductory study of quantum mechanics. Topics include wave propagation, polarization, interference and interferometry, diffraction, X-ray and electron diffraction, the wave nature of particles, the uncertainty principle, and Schroedinger's equation in one dimension.
Prerequisites: Physics 216, 303 or concurrent enrollment
Notes: 4 meetings (50 minutes), 1 lab (3 hours)
Instructors: C. Sutton
Section Instructors: 01 LAB C Sutton
Expected enrollment: 12
PHYS-302-01  - Physics - 2007-2008
(Spring) Quantum Mechanical Phenomena
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course provides an introduction to quantum mechanics. The Uncertainty Principle, Schroedinger's Equation, and the hydrogen atom are studied in depth, with emphasis on angular momentum, electron spin, and the Pauli Exclusion Principle.
Prerequisites: Physics 301
Notes: 4 meetings (50 minutes), 1 lab (3 hours)
Instructors: C. Sutton
Section Instructors: 01 LAB C Sutton |
Expected enrollment: 14

PHYS-303-01  - Physics - 2007-2008
(Fall) Introduction to Mathematical Methods for Scientists
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Topics include infinite series, complex numbers, partial differentiation, multiple integration, selected topics in linear algebra and vector analysis, ordinary differential equations, and Fourier series.
Prerequisites: Physics 216 or concurrent enrollment
Notes: 4 meetings (50 minutes)
Instructors: S. Tewari
Expected enrollment: 25

PHYS-308-01  - Physics - 2007-2008
(Fall) Electronics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is a study of electrical circuits and components with emphasis on the underlying physical principles; solid-state active devices with applications to simple systems such as linear amplifiers; feedback-controlled instrumentation; and analog and digital computing devices.
Prerequisites: Physics 216
Notes: 2 meetings (3 hours) - hands-on lecture and lab combined
Instructors: K. Aidala
Section Instructors: 01 LAB K Aidala |
Expected enrollment: 12

PHYS-315-01  - Physics - 2007-2008
(Spring) Analytical Mechanics
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Newton's great innovation was the description of the world by differential equations, the beginning of physics as we know it. This course studies Newtonian mechanics for a point particle in 1, 2, and 3 dimensions, systems of particles, rigid bodies, and the Lagrangian and Hamiltonian formulations.
Prerequisites: Physics 303
Notes: 4 meetings (50 minutes)
Instructors: C. Sutton
Expected enrollment: 25

PHYS-324-01  - Physics - 2007-2008
(Spring) Methods of Applied Mathematics
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Chemistry 324b)
This course is an introduction to theories and techniques important to applied mathematics. Topics include special functions, calculus of variations, theory of functions of a complex variable, solution of partial differential equations, integral transform methods, and Green's functions. While the focus of the course is on analytical techniques, we will develop numerical approaches to problem-solving.
Prerequisites: Physics 216, 303
Notes: 4 meetings (50 minutes)
Instructors: S. Tewari
Expected enrollment: 25

PHYS-325-01  - Physics - 2007-2008
(Fall) Electromagnetic Theory
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course presents the development of mathematical descriptions of electric and magnetic fields; study of interactions of fields with matter in static and dynamic situations; mathematical description of waves; and development of Maxwell's equations with a few applications to the reflection and refraction of light and microwave cavities.

Prerequisites: Physics 301, 315, or 324

Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)

Instructors: W. Lopes

Expected enrollment: 25

PHYS-326-01 - Physics - 2007-2008
(Spring) Statistical Mechanics and Thermodynamics
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course presents thermodynamic and statistical descriptions of many-particle systems. Topics include classical and quantum ideal gases with applications to paramagnetism; black-body radiation; Bose-Einstein condensation; and the Einstein and Debye solid; the specific heat of solids.
Prerequisites: Physics 301
Notes: 2 meetings (75 minutes); Physics 326 or 336 will normally be offered in alternating years
Instructors: K. Aidala
Expected enrollment: 25

PHYS-329-01 - Physics - 2007-2008

Instructors: The department
Expected enrollment: 25

PHYS-336-01 - Physics - 2007-2008
(Spring) Quantum Mechanics
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course is an introduction to formal quantum theory: the wave function and its interpretation, observables and linear operators, matrix mechanics and the uncertainty principle; solutions of one-dimensional problems; solutions of three-dimensional problems and angular momentum; physics and perturbative methods.
Prerequisites: Physics 302, 324 or 325
Notes: 3 meetings (50 minutes); Physics 326 or 336 will normally be offered in alternating years
Instructors: S. Tewari
Expected enrollment: 25

Politics

POLIT-101-01 - Politics - 2007-2008
(Fall) Fundamentals of Politics: Concepts and Controversies - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Writing-intensive)
This course examines three contrasting conceptions of freedom and of what threatens or denies or enhances freedom, in light of selective controversies in American politics and society. We explore concepts related to "freedom," such as "community," "equality," and "the common good"; and we acquaint ourselves with competing political perspectives on contemporary America. We also consider some pressing issues, such as the role of government and the future of public goods; the social limits to economic growth; the character and ramifications of economic inequality; racial, ethnic, and gender discrimination; and affirmative action.
Notes: 2 meetings (75 minutes); conducted in small sections, with students submitting short essays throughout the semester
Instructors: S. Ellenburg

POLIT-104-01 - Politics - 2007-2008
(Fall) American Politics
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Offers an overview of the American political system and the theories of those who celebrate it and criticize it. Focuses on the institutions of American politics, including the Constitution, the presidency, Congress, the courts, parties and elections, interest groups, and movements seeking political change. Also includes a theoretical focus: a critical examination of the notions of liberalism, pluralism, and democracy that inform the practice of American politics.
Notes: 2 meetings (75 minutes)

(Fall) Confessions, Novels, and Notebooks: The Self and Political Thought - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
First-year seminar (Writing-intensive)
What is the relationship between personal experience and political theory? How do political thinkers grasp and articulate the connections between self and political order? Our first-year seminar will probe the links between heart and mind in political philosophy by exploring the lives and writings of three illustrative figures who together span the history of political thought. This coming year those figures will be Saint Augustine, Jean-Jacques Rousseau, and Simone de Beauvoir.
Prerequisites: Andrea Emmershy aemmersh@mtholyoke.edu.

(Fall) Speaking and Arguing: The Rhetoric of Peace and War
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)
The art and mechanics of persuading a polity to support either war or peace through oral argument. How speeches frame issues, mobilize public opinion, and persuade individuals to support or resist decisions to go to war. Students will be expected to deliver speeches, lead discussions, and critique their own and others' presentations.
Prerequisites: limited to first-year students

POLIT-116-01 - Politics - 2007-2008
(Fall) World Politics
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course is a survey of contending approaches to the study of conflict and cooperation in world politics. Examines key concepts—including balance of power, imperialism, collective security, deterrence, and interdependence—with historical examples ranging from the Peloponnesian War to the post-cold war world. Analyzes the emerging world order.

(Fall) Globalization and Its Discontents
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
First-year seminar (Writing-intensive)
What is the world coming to? Is globalization expanding global trade, fostering new information technology, engendering an emerging global culture, and spreading democratization, as its supporters claim? Or is it a new form of first-world imperialism deepening inequality, undermining genuine democratic politics, and escalating the environmental crisis? Intensive writing and discussion.

POLIT-202-01 - Politics - 2007-2008
(Spring) Politics of Globalization
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A; Anthro, econ, geog, etc. requirement
The social, economic, and cultural dimensions of globalization are shaping a new and complex world. We will discuss the political implications of expanding global trade, internet technology, and cultural conflicts. Does deepening global inequality undermine democratic politics? Is there a global civil society emerging which we can use to respond to these enormous challenges? Can we build systems of global governance to solve the pressing environmental crises? And how will these forces affect you and your lifeplans?

POLIT-208-01 - Politics - 2007-2008
(Spring) Chinese Politics
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A; Anthro, econ, geog, etc. requirement
This course examines the politics of contemporary China. Beginning with an assessment of the origins of the Chinese Revolution, the course then examines core institutions and events in the People's Republic, including the Great Leap Forward, Cultural Revolution, post-Mao reforms, and the Tiananmen Incident. In addition, the course analyzes the changing nature of state-society relations, the emergence of new social and political identities, and China's role in the international arena.

(Spring) Minorities and the Law - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A; Anthro, econ, geog, etc. requirement
Focuses on the interrelationship of law and the distribution of political power as they impinge on members of disadvantaged ethnic and racial minorities. Examines the legal status of Native Americans, African Americans, Chinese, Japanese, and Latino/Hispanic groups in historical perspective, together with the impact of ethnic and racial stratification on the contemporary exercise of police and the operation of jails as social institutions. Assesses the contemporary status of minority groups under the U.S. Constitution in the areas of "equal protection" and "due process," and legislation purporting to eliminate racial discrimination in housing, banking, and employment.

POLIT-211-01 - Politics - 2007-2008
(Spring) Ancient and Medieval Political Thought
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A; Anthro, econ, geog, etc. requirement
Through the writings of thinkers such as Sophocles, Plato, Aristotelie, Thucydides, and Plutarch we will explore the broad themes of ancient political thought. Recurring issues include the obligation to obey and disobey, tyrannicide, the role that different kinds of knowledge or reason ought to play in politics, distributive justice, who ought to rule and who ought not to rule, alternative classifications of political societies, and the uses of arguments by analogy in politics.
Prerequisites: soph, jr, sr
POLIT-212-01 - Politics - 2007-2008
(Spring) Modern Political Thought
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
The political writings of Hobbes, Locke, Mill, Rousseau, Burke, Hegel, and Marx in the context of a sustained critique of liberal individualism (natural rights and utilitarianism) and an examination of radical egalitarian, conservative, and revolutionary alternatives. Recurring issues include law and liberty, the fragility of the good life, "human nature" arguments in politics, contrasting understandings or justifications of "private" property, and the claims by Hobbes, Rousseau, Hegel, and Marx, after having dismissed all predecessors as mistaken or superficial or both, to have refounded and then completed the enterprise of political theory.

(Fall) Marx and Marxism - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
On theoretical and practical questions at the heart of the nineteenth- and early twentieth-century Marxist tradition. These questions include the master/slave relation, the movement of history, the inner logic of capital, alienation and mystification, and the making of the revolutionary subject. While focusing on Marx's own writings, we also inspect Marx's intellectual debt to Hegel, as well as Lenin's and Luxemburg's intellectual and political debt to Marx.
Prerequisites: soph, jr, sr, or fy with permission of instructor

POLIT-228-01 - Politics - 2007-2008
(Fall) East Asian Politics
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course examines the dramatic rise of East Asia in the post-World War II period in comparative perspective. The focus will be on understanding the process and consequences of rapid development in Japan, Korea, Taiwan, and China. Assess the strengths and weaknesses of the "East Asian model of development" and explores how different developmental experiences and policies affect state-society relations, social and political identities, and prospects for peace and cooperation throughout the region.
Prerequisites: jr, sr; Politics 106 or permission of instructor
Notes: 2 meetings (75 minutes)

(Fall) Invitation to Feminist Theory
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Gender Studies 221)
This course explores the overlapping dualities of the feminine and the masculine, the private and the public, the home and the world. We examine different forms of power over the body; the ways gender and sexual identities reinforce or challenge the established order; and the cultural determinants of "women's emancipation." We emphasize the politics of feminism, dealing with themes that include culture, democracy, and the particularly political role of theory and on theoretical attempts to grasp the complex ties and tensions between sex, gender, and power.

(Spring) Russia and the West
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; RES-241)
Throughout its modern history, Russia has been viewed as a Western power, the colonizer of Asian and East European peoples, and as an object of Western colonial expansion. In the eyes of the West, it functioned as the "other" for most of the 20th century. Such ambiguities were reflected by the debate in Russia on its national identity. What was its relationship to the East and West? We will analyze Russian history from the 17th century to the post-Soviet period focusing on Russia and the USSR's multifaceted relations with the West. We will compare social, cultural, economic and political developments in Russia and the Soviet Union to those in Europe and the US.

(Spring) European Studies Seminar: Foreigners Within, Foreigners Without: Europe and Its New Neighbors
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(EURST-316, RES-316)
The enlargement of the European Union (EU) to Central and Eastern European countries has generated new neighbors to the east and south - the Western Newly Independent States (WNIS) of Russia, Belarus, Moldova, and Ukraine, and Southern Mediterranean countries (SMCs) Egypt, Libya, and Tunisia. Europe's new neighbors make up 410 million inhabitants, but their GDP capita is barely one tenth of the European Union's. This has brought problems for the EU, including migration pressures, human trafficking, and refugees. How is the EU dealing with these issues and how will relations with the new neighbors affect the domestic and foreign policies of the EU?
Prerequisites: jr, sr, at least one course at the 200 or 300 level relevant to European studies or permission of the instructor

(Spring) Punishment, Politics, and Culture
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Whom a society punishes and how it punishes are key political questions as well as indicators of its character and that of the people in whose name it acts. With particular reference to the contemporary American situation, we will consider how crime and punishment have been politicized in recent national elections and the racialization of punishment in the U.S. Question include: Does punishment express our noblest aspirations for justice or our basest desires for vengeance? Can it ever be an adequate expression of the pain of victims of crime? When is it appropriate to forgive? We will also discuss the meaning of punishment by examining its treatment in literature and popular culture.

PSYCH-101-01 - Psychology - 2007-2008
(Fall) Introduction to Psychology: A Biological Perspective
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
How do we remember and why do we forget? Can we inherit schizophrenia? How does stress affect health? In what ways does learning affect our emotions? Why are we fearful of some situations and not others? This course addresses such questions from an interdisciplinary, biological perspective to understand what scientists have discovered about mind, brain, and behavior.
Notes: 2 meetings (75 minutes) plus fourth hour
Instructors: K. Hollis

PSYCH-110-01 - Psychology - 2007-2008
(Fall) Introductory Seminars in Psychology: Brain/Mind
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
First-year seminar (Writing-intensive)
What is the relationship between brain activity and how we think, feel, perceive, remember, and communicate? How does the brain contribute to our development as unique individuals? How does subjective experience shape the structure and activity of our brains? In approaching these questions, we will bridge the perspectives of psychoanalysis and neuroscience. We will explore how the brain works; the role of conscious and unconscious processes in determining our behavior; and the effects of traumatic injury to the brain.
Prerequisites: fy or permission of instructor
Notes: 2 meetings (75 minutes) plus fourth hour; 4 sophomores allowed
Instructors: J. Cohen
Expected enrollment: 12

PSYCH-110-01 - Psychology - 2007-2008
(Spring) Introductory Seminars in Psychology: Psychological Controversies
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
First-year seminar (Speaking-intensive)
Are there racial differences in intelligence? Is madness rooted in faulty biology? Do women's personalities differ from men's? Is violence innate or learned? We will consider a range of controversies (both historical and contemporary) concerning key psychological issues, exploring the arguments and evidence offered by proponents of each side. Oral presentations and short papers will foster critical reading of primary and secondary source materials and highlight the social contexts of debates within psychology.
Prerequisites: fy or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: G. Hornstein
Expected enrollment: 12
PSYCH-110-02 - Psychology - 2007-2008

PSYCH-110-02 - Psychology - 2007-2008
(Spring) Introductory Seminars in Psychology:: Families, Groups and Organizations: An Introduction to Systems Thinking
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
First-year seminar (Writing-intensive)
If psychology is the study of the mind, how do we understand what happens when individuals get together? Do we then simply have a collection of human minds and a laundry list of human behaviors and feelings? Or does something more complex happen when individuals gather together in groups? This course will introduce students to the fundamentals of group dynamics, family systems and organizational psychology. We will discuss, read and write about the psychology of larger systems and the class will serve also as a laboratory for understanding group dynamics.
Prerequisites: fy or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: P. Romney
Expected enrollment: 16

PSYCH-110-03 - Psychology - 2007-2008
(Fall) Introductory Seminars in Psychology: First Love: Attachment Theory and Research - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
First-year seminar (Writing-intensive)
The relationship with the infant's primary caretaker, usually the mother, develops in a complex way during the first year after birth. We will study what is now known about this relationship, its parallels in other animals, and variations in the mother-child relationship in early life. We will probe the importance of this first love for later development in childhood, adolescence, and adult life. Students will give class presentations.
Prerequisites: fy or permission of instructor

PSYCH-300-01 - Psychology - 2007-2008
(Spring) Seminar in History and Systems of Psychology: Psychology and the Media
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)
A seminar designed to give advanced psychology and neuroscience students an opportunity to evaluate and critically analyze media representations of their discipline. Drawing upon a range of sources (both historical and contemporary)—including newspapers, magazines, books, films, advertisements, and Web sites—we will compare popular and professional depictions of such topics as personality, memory, child development, and mental illness. Psychologists' efforts to establish authority over the subject matter of their field will be contrasted with the enduring appeal of "pop psychology." Students will give frequent oral presentations and write a major research paper on a topic of their choosing.
Prerequisites: a 100-level course in Psychology, 200, 201, plus 8 additional credits in the department. Preference given to senior psychology and neuroscience majors.

Notes: 1 meeting (3 hours); Students in this course will be expected to attend 4 required film showings at 7 pm on the following Tuesdays: Feb 12, March 4, April 1, and April 22.

Instructors: G. Hornstein

Expected enrollment: 20

**(Spring) Concepts of Abnormality - *Not offered this year/term**

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course is a study of how maladaptive patterns of thought and action are understood from a psychological viewpoint. Behaviors ranging from neurotic to psychotic are studied in terms of underlying character structure and origins in childhood experience. Competing psychoanalytic theories are brought to bear on these phenomena.

Prerequisites: jr, sr (permission required for exceptions), two prior psychology courses, Psychology 230 recommended

Notes: 2 meetings (75 minutes)

Instructors: R. Shilkret

**PSYCH-322-01 - Psychology - 2007-2008**
**(Fall) Psychoanalytic Psychology - *Not offered this year/term**

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This extensive examination of Freud’s systematic psychology focuses on such phenomena as the effects of early experience, continuity and change in development, and similarities among and differences between individuals. Readings include selections from Sigmund Freud’s earlier work and from the sweeping revisions of the 1920s. Criticisms and revisions of Freud are discussed. Throughout, ideas from contemporary psychoanalysis are compared and contrasted with those of Freud.

Prerequisites: Psychology 230, 220 recommended and permission of instructor

Notes: 2 meetings (75 minutes). Students must submit a letter of interest during advising week. Include a list of courses taken in psychology and other disciplines that have prepared you for this course.

Instructors: R. Shilkret

**(Fall) Laboratory in Phenomenological Research**

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Writing-intensive)

This laboratory course introduces methods of research that focus on the qualitative description and analysis of human experience. Students learn a variety of techniques of data collection (interviewing, intensive observation, archival research) and become proficient in using phenomenological methods to interpret and analyze the content and structure of data of this type. Readings focus on specific methodological practices as well as on the...
history and philosophy of science that differentiate qualitative and experimental approaches to psychological research. Students work both collaboratively and individually on projects throughout the course.

Prerequisites: Psychology 200 and permission of instructor.

Notes: 1 meeting (3 hours). This course also counts in the Social area of psychology.

Expected enrollment: 12

**PSYCH-324-01 - Psychology - 2007-2008**

**(Spring) Laboratory in Personality Research: Quantitative Methods** - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Personality-relevant constructs, such as attachment, adjustment, achievement motivation, communality, dominance, sociality, and others, are usually studied among adults using questionnaires and inventories. A single large class research project will be conducted, with all students participating in all phases of the research.

Prerequisites: Psychology 200 and 201, and either Psychology 210 or 230 and permission of instructor; an essay (due during advising week) explaining why you want to take the course is required

Notes: 2 meetings (75 minutes)

Instructors: R. Shilkret

Expected enrollment: 15

**(Spring) Laboratory in Psychological Assessment** - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Historical development, theoretical bases, and critical evaluation of tests used to describe adult cognitive and personality functioning. Supervised practicum in test administration, scoring, and interpretation.

Prerequisites: Psychology 200 and 201, either Psychology 230 or 320, and permission of instructor

Notes: 1 meeting (3 hours); students MUST submit a statement and schedule an interview with the instructor during the advising week. There will be a schedule posted on the professor's door, and students should submit the statement a day before they schedule the appointment.

Instructors: R. Shilkret

Expected enrollment: 12

**(Fall) Laboratory in Personality and Abnormal Psychology**

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course is an introduction to research methods in abnormal and personality psychology. Students will work as a class to collect data using quantitative and qualitative methodologies. Students will be expected to collect survey- and questionnaire-based data as well as engage in some interviewing projects. We will consider the various stages of research including literature review, design, ethical considerations, data collection, and analysis (qualitative and quantitative), and consider the statistical inference or implications of our findings. The course focuses on the impact of stress and coping on the lives of individuals, identity, their relationships, and psychological adjustment.

Prerequisites: Psychology 200, 201; 220 or 210 or permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: A. Douglas

Expected enrollment: 12

**PSYCH-329-01 - Psychology - 2007-2008**

**(Fall) Seminar in Personality and Abnormal Psychology: First-Person Narratives of Madness**

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Writing-intensive)

Psychologists have typically conceptualized "mental illness" in terms of the symptoms and diagnoses proposed by psychiatrists in the Diagnostic and Statistical Manual of Mental Disorders (DSM). These categories, while perhaps useful for prescribing medication, do little to help us understand the subjective experiences that are considered "mad." In this seminar, we analyze accounts (historical and contemporary) written by people who have experienced extreme states, intense emotions, or unusual perceptions or beliefs, to understand how these "counter-narratives" offer new insights into psychological life.

Prerequisites: A 100 level course in Psychology, jr and sr and permission of instructor; Students with a background in literature particularly welcome. Preference given to senior psychology and neuroscience majors

Notes: 1 meeting (3 hours). Students must submit an information sheet (available in department office) by noon on Thursday of advising week to get permission to register for the course.

Instructors: G. Hornstein

Expected enrollment: 15

**(Spring) Seminar in Personality and Abnormal Psychology: Psychology of Trauma**

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
What happens after a traumatic event? Why do some people develop psychological disorders and others do not? This course will explore the psychological theories and research on trauma and stress. Topics covered will include childhood abuse, domestic violence, combat violence, community violence, and interpersonal violence. The seminar will explore psychological dysfunction, disorders, as well as adaptation and coping following exposure to traumatic stress. In addition, the course will explore the concept of "cultural trauma."

Prerequisites: Psychology 100, jr or sr; Psychology 230 preferred or a course in abnormal psychology

Notes: 1 meeting (3 hours).

Expected enrollment: 16

PSYCH-330-01 - Psychology - 2007-2008
(Spring) Lab in Developmental Psychology: Knowledge, Science, and Parent-Child Conversations
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

How do ideas about knowledge (folk epistemology) develop, and how do these ideas relate to the types of reasoning strategies people emphasize? Using existing transcript data, students will define and explore specific questions about how conversations with parents may help guide elementary school children's emerging ideas about knowledge and about the nature of science. Students will also help develop a questionnaire and collect data to explore variation in these ideas and possible relation to reasoning biases among college students.

Prerequisites: Psychology 200 and either 230 or 241. Interested students should review course information sheet available from instructor during advising week

Notes: 2 meetings (2 hours). This course also counts in the Cognitive and Perception area of psychology.

Instructors: A. Valle

(Spring) Lab in Developmental Psychology: Emergent Literacy
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

The field of Emergent Literacy studies how children come to read and write before they are formally taught. This lab is designed to examine the major theories and research on emergent literacy, with a special emphasis on how sociocultural practices and parent-child language interactions support children's later reading and writing abilities. The lab involves a weekly discussion of assigned readings and frequent observations at the Gorse Child Study Center. Students will search for relevant bibliography, analyze videos of parent-child interactions, make several observations/collect data at the Gorse Child Study Center, and write a short paper based on these observations.

Prerequisites: Psych 200 and 230

Notes: 2 meetings (75 min.)

Instructors: D. Leyva

(Fall) Lab in Early Social and Personality Development
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

In the role of a participant-observer, each student studies intensively the social and personality development of the children in one classroom at the Gorse Child Study Center. Students learn how to articulate developmental changes and individual differences by analyzing detailed observations. Topics include social cognition, peer relationships, social skills, concepts of friendship, emotional development, identity formation, self-esteem, and the social and cultural context of development.

Prerequisites: Psychology 200, 201, and 230 or permission of instructor

Notes: 1 meeting (2 hours), 2 labs (3 hours each) at Gorse Child Study Center

Instructors: P. Ramsey

Expected enrollment: 18

*(Fall) Seminar in Educational Psychology: Motivation - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Community-based learning course; Speaking-intensive)

What influences our desire to learn, to participate in certain activities, or to become particular kinds of people? We will examine the topic of "motivation" using several perspectives, across age levels and in various settings. Drawing from a variety of resources, including autobiographies, research studies, and videos, we will target our own motivation through reflection and action and the motivation of others through active coaching and mentoring in a community-based setting.

Instructors: P. Ramsey

*(Fall) Seminar in Developmental Psychology: Culture and Human Development*

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This seminar examines theory and research on the cultural basis of human development and on cultural variations and similarities in development in different historical and current world communities. The approach is interdisciplinary, drawing on psychology, anthropology, linguistics, sociology, and history, to examine varying and universal goals of development and participation of children and their families in cultural practices.

Instructors: A. Valle

Expected enrollment: 16

Notes: 2 meetings (75 min)

Prerequisites: jr, sr, and one of the following courses: Psychology 220, 230, 236, 241, or a 200-level course in anthropology

**PSYCH-340-01 - Psychology - 2007-2008**

*(Fall) Laboratory in Perception and Cognition: Cognition and Literacy*

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Community-based learning course)

Adult illiteracy in the U.S. presents an ever-growing challenge. To understand this problem, we will learn various theories of reading. However, since many models of reading are based on data gathered from children, we will also examine how the cognitive abilities of adults are different from those of children. A large component of this class concerns learning the lab techniques associated with assessing reading abilities. In addition, since this is a community-based learning course, each student will become a tutor for an adult enrolled in an area literacy program.

Instructors: K. Binder

Expected enrollment: 15

Notes: 1 meeting (3 hours) plus 3 hours per week as a literacy tutor in Springfield

**PSYCH-341-01 - Psychology - 2007-2008**

*(Spring) Topics in Philosophy: Explanations in the Cognitive Sciences*

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Phil-350)
This seminar will have a special focus on the methods psychologists have adopted in their theorizing - especially those methods borrowed from the cognitive sciences more generally. The methods we will focus on include computer simulation, mathematical modeling, brain imaging, solvability analyses, and evolutionary theorizing. We will evaluate the theoretical purpose of adopting each of these particular methods; the degree to which these methods give rise to explanations of different types or grain; and whether the plurality of methods discussed can converge towards a unified science of the mind.

Prerequisites: 4 credits in Psychology or 4 credits in Philosophy; or, by permission of the instructor.

Instructors: C. Lee

(Spring) Laboratory in Sensory Psychology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This laboratory course offers a detailed examination of selected topics in vision research, emphasizing the interrelations of anatomical, physiological, and behavioral data. Laboratory demonstrations and experiments introduce behavioral methods of study of sensory systems. Principles of function generally applicable to all sensory systems are discussed.
Prerequisites: Psychology 200, 240, or 250 and permission of instructor. Students must meet with the instructor during advising week to get permission to enter the course

(Fall) Seminar: Biological Bases of Behavior: How Experience and Brain Plasticity Shape Cognitive and Social Development - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
What is the function of the brain's visual areas in people who are born blind? How does the brain change when we learn a new skill? How does early auditory deprivation affect the development of language? What changes occur in the brains of people who have a limb amputated and experience a phantom limb? Can knowledge of brain plasticity lead to treatments for cognitive disorders such as dyslexia or ameliorate the effects of traumatic stress during early childhood? Are there critical periods for normal cognitive and social-emotional development? This seminar will consider these and other questions as we explore studies of behavioral and brain plasticity and their potential applications.

(Spring) Seminar: Biological Bases of Behavior: Of Madness and Molecules: Seminar in Neuropsychopharmacology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Charpentier, a French scientist of the 1940s, unwittingly discovered a chemical that was to alter dramatically our understanding of madness. The chemical, chlorpromazine, has been widely used for the treatment of psychosis. Of interest is neuropsychopharmacology—the science and the technology. The principles of pharmacology are discussed and precede the examination of applications of the technology to psychopathology (for example, schizophrenia, depression, anxiety, and violent behavior).
Prerequisites: Psychology 250 or Biological Sciences 333. Pre-enrolled seniors and Psychology and Neuroscience and Behavior majors have priority

(Fall) Whiteness, Racism, and Inequality in Schools and Society
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
What is race? Who decides? What does it mean to be white? How is the ideology of whiteness maintained? We will explore these and related questions as we examine the ways in which whiteness and racism are enacted in schools, have historically interfered with the educational attainment of children of color, and have led to the mis-education of white children. Readings and assignments will examine dynamics of dominance and how the construction of racial identities influences the lives of teachers and students in classrooms. We will also consider theories of multicultural education and antiracist pedagogies as strategies for addressing racial and other inequities in schools.

Prerequisites: sophomore, junior, senior or permission of instructor

The course will survey the etiology, diagnosis, and remediation of a variety of learning differences and special needs. Conditions such as dyslexia, attention deficit disorder, and autism will be examined. It will provide an introduction to interpreting test results, systematic behavioral observations, evaluating clinical information, diagnostic hypothesizing, and planning individualized educational programs. The principles of inclusion and their implications for children will be explored. Requires a field component.
Prerequisites: A 100 level course in psychology, 230 or 236, and 233; prerequisites will be strictly enforced
Notes: 1 meeting (3 hours) plus field placement; priority will be given to students applying to Mount Holyoke College's teacher licensure programs
Instructors: L. Carlisle
EDUC-255-01 - Psychology and Education - 2007-2008
(Fall) Patterns, Functions, and Change
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

Preamble (for topics courses): Understanding what functions are, learning how to interpret representations of functions as descriptions of change in phenomena, and in particular, becoming familiar with the notion of constant change and how it relates to ratio is one focus of the Patterns, Functions, and Change seminar. Examining non-constant change is the entry into understanding quadratic and exponential functions as well as functions that are not determined by algebraic formula.

This seminar will focus on the mathematical tools used to describe change, with respect to concrete problems such as measuring changes in the heights of plants or in temperature, buying apples at a given rate, and saving allowances, as well as more abstract ones such as changing geometric figures represented in tables, graphs, and equations. The course's main focus will be on ratio and linear functions, but we will also touch on quadratic, exponential, and hyperbolic ones. These ideas will be investigated through work on mathematics problems and through cases documenting how elementary-aged students think about mathematics.

(Fall) The Process of Teaching and Learning: Developing Literacy in Early Childhood and Elementary Schools
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

Through a balanced and integrated approach students will learn to develop literacy in early childhood/elementary schools. Class members will learn about emergent literacy, diagnosing language needs, integrating phonics skills in a literature-based program, the teaching of process writing, children's fiction and nonfiction literature, and the use of portfolios for assessment. Course required for spring semester practicum students. Course evaluation is based on written and oral work done individually and in groups. Requires a prepracticum.
Prerequisites: limited to students accepted to the practicum year program

(January) Observing and Assisting in Inclusive Classrooms
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

Students are expected to complete a supervised field experience full-time every day during the January Term in an inclusive classroom in a school setting. Placements can be located within or outside of the Five College area. In addition to the field experience component, students attend three course meetings (detailed below). Reading and writing assignments focus on a survey of learning disabilities, descriptions of special education programs, understanding Individuals with Disabilities Education Act policies and placement options, interpreting Individualized Education Program plans, and planning curriculum for inclusive classrooms.
Prerequisites: One of the following: Psychology 230, 233, 236, Education 205, Educational Studies 109, 215, 301 or permission of instructor. Three mandatory meetings (2 hours each): two in November and one in February. Prepracticum: five days a week for three weeks in January; permission to participate in prepracticum experience for credit is contingent upon attendance at the meetings in November. Consult Ms. Lawrence or Ms. Carlisle in October for exact dates of the November course meetings.
Notes: This course is required of all students pursuing teacher licensure. Graded on a credit/no credit basis.

(Spring) Practicum Seminar on Teaching and Learning: Early Childhood and Elementary Education
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This weekly seminar provides students with opportunities to examine curriculum development models, develop an integrated curriculum unit utilizing state and national content area standards, review researched based models of classroom management, and engage in dialogue with practicing teachers regarding numerous aspects of teaching and student learning. Additional topics covered include the arts in education, physical education, legal obligations of teachers, and home-school communication. As is the case in all pre-licensure programs, there is continued emphasis on addressing the needs of students with disabilities and English Language Learners.
Prerequisites: Limited to students accepted into the practicum year program
Notes: 1 meeting (2 hours)
Instructors: L. Carlisle

(Spring) Student Teaching in Early Childhood and Elementary Schools
Credits/PE Units: 10; Requirements met: Does not meet a distribution requirement.
Students participate in full-time student teaching in early childhood and elementary classrooms for 12 weeks. During this semester-long field-based placement, students hone classroom management skills, implement an extended integrated curriculum unit, deliver lessons in all content areas, and develop a wide range of assessment skills. The practicum culminates in two weeks of Lead Teaching, during which the student is responsible for managing all aspects of the classroom program. Students work with classroom teachers and college supervisors to address Professional Teaching Standards as required by the Commonwealth of Massachusetts' Pre-service Performance Assessment Program.
Prerequisites: Prereq. sr, Education 300, 325 and 324j, and permission of instructor
Notes: 5 days a week for 12 weeks; full-time student teaching in school site (includes Mount Holyoke College's spring break); limited to students accepted to the practicum year program. This course is graded on a credit/no credit basis.
Instructors: L. Carlisle

(Fall) Observing and Assisting in Early Childhood and Elementary Settings
Credits/PE Units: 1-2; Requirements met: Does not meet a distribution requirement.
Discussions and fieldwork provide the student with an opportunity to understand the classroom as a learning community. The tutorial includes several meetings focusing on the student’s participant observations and assigned readings. Fieldwork includes a minimum of 20 hours on site, individually scheduled in early childhood (pre K-2) or elementary (1-6) settings. Assessment includes in-progress reports and a final project related to fieldwork.
Prerequisites: permission of instructor
Notes: 1 credit (20 hours of prepracticum); 2 credits (40 hours or more of prepracticum)

(Fall) The Process of Teaching and Learning: Developing Math/Science/Technology Instruction and Curriculum
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Students will learn about inquiry-based science/math curriculum and use of technology in the classroom. They will construct more extensive understandings of science/math instruction by developing lessons that implement the Massachusetts Frameworks. At the Hitchcock Center and in classes on campus, emphasis will be on learning diverse management and instructional practices, such as the use of manipulatives, problem solving, cooperative learning, and project-based learning. Students will become more adept at developing effective approaches to using assessment to guide instruction. Early childhood candidates will visit Gorse Child Study Center to learn about resources for pre-K students.

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

This course is intended to help prepare prospective secondary and middle school teachers for effective classroom instruction. The philosophical bases and current research behind classroom practices are also examined. Specific course activities focus on teaching in multicultural ways, establishing the classroom climate, choosing instructional approaches, designing curricula, assessing and attending to the needs of learners, evaluating student performance, and providing for classroom community leadership. Requires a prepracticum.

Prerequisites: limited to students accepted to the practicum year program

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Jewish Studies 104Sh)

Judaism is a 3,500-year-old tradition that has developed over time as Jewish communities all over the world creatively interacted with the different cultural and historical milieus in which they lived. This course explores the ways in which Judaism has sought to transform ordinary life into sacred life. What are the ways in which Judaism conceives of God, and what is the meaning of life? What roles do study, prayer, ethics, sex, marriage, family, rituals of the life cycle, and community play in Judaism? These and other questions will be taken up through study of diverse types of religious literature and historical evidence.

(Spring) Issues in Islamic History: Classical Islamic Civilization - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
Preamble (for topics courses): This introductory course provides a broad, chronologically structured overview of Islamic history, focusing on major issues that have been of religious significance to Muslims in various eras. Using case studies, ranging from episodes in the early Islamic conquests to the growth of Islam in urban America, we will examine enduring themes and contextual variations in the history of Islam.

This course examines the development of Islamic civilization from the time of the Prophet Muhammad to the sixteenth century. Particular attention will be paid to the political structures of the caliphates, the process of conquest and conversion, and interaction with non-Muslim cultures. Literature, art, architecture, and philosophical and scientific works of classical Islamic civilization will be used as primary sources for this course.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(JS 215f)
Along with such genres as letters, ethical wills, travel accounts, and other personal communications, spiritual autobiographies and diaries often reveal what people actually thought and felt about matters important to them. These sources provide insight into religion as lived experience. This course studies autobiographical accounts of Jewish religious figures from the medieval period to the contemporary. We include narratives by both women and
men, philosophers, mystics, messianic pretenders, travelers, authors of Holocaust memoirs, and other contemporary Jews. Taken together, such accounts bring to life the diversity of spiritual quests in which Jews have engaged.

(Spring) Religion and Violence
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course will investigate pervasive connections between religion and violence as they are theorized in classical texts such as Benedict de Spinoza’s Theologico-Political Treatise and David Hume’s Natural History of Religion. It will then examine scholarly responses to contemporary religious violence, through texts such as Mark Juergensmeyer’s Terror in the Mind of God and Bruce Lincoln’s Holy Terrors: Thinking About Religion After September 11. The aim of this course is not to discern a universal feature that predisposes religion to violent action but instead to create conditions for responsible action in the face of persisting religious violence.

(Fall) Introduction to the Philosophy of Religion
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Speaking- and writing-intensive; Philosophy 226fs)
This course begins its survey of the discipline of the philosophy of religion with the work of Augustine. We then proceed to an examination of the classical theistic arguments for knowledge of God’s existence (those of Anselm, Aquinas, and Maimonides) that dominated Scholastic thought and
consider the criticisms of these approaches by Enlightenment philosophers such as Kant. We trace the rise of experience as the central category of pietism and romanticism in the texts of Schleiermacher and Coleridge and in the poetry of Novalis. Finally, we focus on the pragmatic tradition in American philosophy of religion, especially in the work of William James, Josiah Royce, and Cornel West.

(Fall) Yoga Traditions
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This course engages the philosophies and practices of yoga from ancient South Asian religious to modern global secular forms. Yoga entails training in postural, respiratory, and contemplative techniques for well-being. Yogic techniques are central to religions of ancient South Asian origin, wherein yoga is a means to such varied goals as knowing the true self, experiencing nirvana, meeting god, making good karma, and curing ailments. We will examine the roots of yogic practice in the Vedas and the Bhagavadgita, and its flowering in the subsequent highly pluralistic world of yogas, including Patanjali, hatha yoga, tantra, gurus, low-impact exercise, and stress management.

(Fall) The Quest for Meaning after the Holocaust - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Jewish Studies 245fs)
The destruction of European Jewry by the Nazis during the Second World War was the most devastating tragedy in all of modern Jewish history, and perhaps of the twentieth century as a whole. The Holocaust poses fundamental questions for all people about what it means to be human, the nature of social community, and about religious faith and tradition. This course explores significant attempts to come to grips with these moral and philosophical questions through literature, religious thought, and film, including the work of Paul Celan, Primo Levi, Elie Wiesel, Aharon Appelfeld, Arthur Cohen, Richard Rubenstein, Jean Amery, Claude Lanzmann, Eva Fogelman, and Pierre Sauvage.

Some scholars have argued that there is no such thing as "Buddhism" in the singular, but only "Buddhisms" in the plural. This course introduces students to the historically and culturally diverse expressions of Buddhism. We will ask ourselves what Buddhism has meant to different people in different times and places, with particular attention to changing conceptions of belief and practice. Among the traditions we will study are Theravada, Zen, Pure Land, and Tantra.

RELIG-315-01 - Religion - 2007-2008
(Fall) Forging Early Christian Identities - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This seminar explores how first- through third-century Christians struggled to forge a coherent self-identity. We look at early Christian letters to the Roman emperor, anti-Jewish tractates, New Testament writings, accounts of Christian martyrs, depictions of Satan and his minions, descriptions of early heresies, and an ancient exorcism manual. Our investigations will employ several critical models from anthropology, sociology, and cultural studies to explore the dynamics of how the ancient church defined who was and was not Christian.
Prerequisites: Previous course in religion

RELIG-319-01 - Religion - 2007-2008
(Spring) Women and Early Christianity - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This seminar investigates the role of women in the New Testament and in early Christian communities. We will explore controversies concerning women's leadership in the early church as well as the role of gender and gender imagery in the development of early Christian thought and practice. Our seminar will look at ancient marriage guides, misogynistic satires, New Testament gospels, Pauline letters, accounts of female martyrs, early church manuals, Christian art, theological tractates, and accounts of female saints. We also will examine how recent work in women's studies and queer theory can help us better understand the power dynamics of early Christianity.

(Fall) Topics in Contemporary Theology: Modern Mythmaking and Religion
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
The power of sacred myths to shape cultural worldviews is extraordinary. This course examines, compares, and critiques this phenomenon in an attempt to understand how it informs the spiritual journey. From Siddhartha to The DaVinci Code, chronicles on religious personalities have commanded rapt attention throughout history. Using the structural analysis of Geertz, Tillich, Eliade, and Crites, texts such as Life of Pi, The Alchemist, The Matrix, and other prominent accounts will be placed against the great spiritual stories of major religious traditions in order to determine their status as contemporary sacred myths.
Prerequisites: 8 credits in department or permission of instructor

(Spring) Seminar in American Religious History: The Shakers
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Preamble (for topics courses): This course offers advanced students an opportunity to investigate with some sophistication a problem that requires careful attention to research methods, to critical literature, and to writing. Seminar topics include people, periods, or problems that have a particular bearing on religion in America.
This course will examine the historical and cultural creation of the Shaker society, the religious vision of an alternative society whose birth and development paralleled that of the new American nation. By contrast and by imitation, the separate Shaker route thus offers an intriguing critique of American society and its values and an unusual laboratory for examining a religious community based on a dual godhead.
Preamble (for topics courses): This course offers advanced students an opportunity to investigate with some sophistication a problem that requires careful attention to research methods, to critical literature, and to writing. Topics will include issues that have a particular bearing on Islamic religious traditions.

This course will examine the spread and development of Islamic religious traditions in South Asia, i.e., India, Pakistan, and Bangladesh. Particular attention will be paid to different modes of interaction with the indigenous, largely Hindu, traditions, including conversion, accommodation, and conflict. The relationship between political and religious identities, the Partition of South Asia on religious lines, and the recent growth of fundamentalism and religious violence, will also be covered.

*(Fall)* First Year Seminar: Sex and the City: Gender-Power Relations in Early Modern Europe

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

First-year seminar (Writing-intensive; Taught in English; FREN 120, SPAN 105, ITAL 106)

Preamble (for topics courses): Seminar in Reading Writing and Reasoning taught in English

Political, social, and economic life was radically changed by growth of Europe's cities between medieval and modern times. These changes were debated in sexual terms as conflicts between men and women. As we study short stories from Early Modern France (Madame de Lafayette), Italy (Giovanni Boccacio), and Spain (Miguel de Cervantes and María de Zayas), and place them in their historical contexts, we will ask questions such as: To what extent do these works challenge or reinforce dominant models of gender relations and negotiate concepts and institutions such as marriage, honor, patriarchy, and blood purity? How do those topics apply to us today?

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Language requirement or Humanities I-A requirement (SPAN-361, ITAL-361, FREN-321, FLMST-370)
Preamble (for topics courses): This interdisciplinary seminar will focus on a comparative study of Romance languages or literatures. Topics will vary from semester to semester. Seminar discussions will be conducted in English, but students are expected to read works in at least one original language. Papers will be written in the Romance language of the student's choice.
In this seminar, we will study the cross-cultural influences between Italian neo-realism, the French *nouvelle vague*, and the New Latin American Cinemas. Both the Italian and the French movements represent models and counterpoints for those Latin American filmmakers of the 1950s and 60s who sought to redress the dominance of the realist American model in Latin America and the domination of the markets by the products of Hollywood. The New Latin American Cinemas, in turn, paved the way toward the emergence of Third Cinema. We will study films, as well as cinematic theory, from Italy, France, the Soviet Union, Japan, Cuba, Brasil, Argentina, and Mexico.
Prerequisites: Permission of instructor
Notes: 1 meeting (2 hours, 50 minutes). Papers will be written in English or the Romance language of the student's choice. Students wishing to obtain 300-level credit in Spanish, Italian, or French must read texts and write papers in the Romance language for which they wish to receive advanced credit.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English)
Explores the past and present of the diverse peoples and cultures inhabiting the territory once dominated by the Russian Empire and the Soviet Union. How has this region been imagined and mapped? How useful are conventional definitions of the boundary between "Europe" and "Asia"? What is meant by "Eastern Europe," "Central Europe," and "Eurasia"? Topics to be considered will include the struggle for a usable past and the emergence of national identity; techniques of imperial rule and colonial domination; formation and dissemination of knowledge about Eurasia; cultural traditions of the region. Designed to help students navigate the world of post-Soviet and post-socialist Eurasia.

(Spring) The Romanovs: Triumph and Tragedy
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; History 205)
We will study defining periods in Russian and world history with an emphasis on the powerful Russian monarchs who shaped them: in particular, Peter the Great, Catherine the Great, Alexander II, and Nicholas II. Russia's tsarist system raises important questions about the nature of the monarchy. The Russian case shows how monarchies can change and develop, and why, ultimately, many of them failed. Why did the Romanovs fail when their relatives, the House of Windsor, did not? Could Russia have survived as a constitutional monarchy? What is the role of a royal dynasty in defining nationhood?

RES-210-01 - Russian and Eurasian Studies - 2007-2008
(Fall) Great Books: The Literature of Nineteenth-Century Russia
In no other culture has literature occupied the central role it enjoyed in nineteenth-century Russia. Political, social, and historical constraints propelled Russian writers into the roles of witness, prophet, and sage. Yet, far from being limited to the vast, dark "Big Question" novels of legend, Russian literature offers much humor, lyricism, and fantasy. We will focus on the Russian novel as a reaction to western European forms of narrative and consider the recurring pattern of the strong heroine and the weak hero. Authors will include: Pushkin, Lermontov, Gogol, Turgenev, Tolstoy, Dostoevsky, and Chekhov.

(Spring) Topics in 20th Century Russian Literature: Literature and Film on Trial
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
Art and artists in twentieth-century Russian society were especially challenged by cataclysmic violence—revolutions, wars, and totalitarian oppression. We will study major works of literature and film and place them in the esthetic and political contexts that influenced their creation and their reception in Russia. Artists to be studied include Chekhov, Vertov, Babel, Eisenstein, Bulgakov (The White Guard), Kupreyanova, Zamyatin (IF), Solzhenitsyn, Tarkovsky, Erofeev, Brodsky.

(Spring) Tolstoy's War and Peace - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
To explain the fundamental conflict in Tolstoy's art, Sir Isaiah Berlin advanced the now famous formula that Tolstoy was a fox (pluralist) struggling to be a hedgehog (monist). Indeed, throughout his life and in his art, Tolstoy sought to shape experience into a single and all-embracing philosophical principle, but he was never able to suppress his extravagant intuition that existence, being contradictory, fragmentary, and ultimately subject to forces beyond human control, defeated attempts at codification. We will read War and Peace in an attempt to understand how that irresolvable conflict fuels Tolstoy's intellectual pursuits and informs his theories on art.

(Spring) Dostoevsky and the Problem of Evil: The Brothers Karamazov
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
Perhaps no other novelist hasdelved as deeply into the psychological and metaphysical dimensions of evil as the Russian novelist Fyodor Dostoevsky. This course will be devoted to a close reading of Dostoevsky's landmark novel of murderous passion and parricide, The Brothers Karamazov. Why should crime and transgression be a privileged avenue of access into the human interior? How is psychology tied to the metaphysical aspect of human existence? What are the sources of evil—and redemption?

(Fall) Russian Politics
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; Politics 209f)
Russia was transformed by communist revolution into a global superpower that challenged the dominant ideologies of liberalism and nationalism. It became a powerful alternative to capitalism. In 1991, this imperial state collapsed and underwent an economic, political, and cultural revolution. What explains the Soviet Union's success for 70 years and its demise in 1991? What sort of country is Russia as it enters the twenty-first century? Is it a democracy? How has Russia's transformation affected ordinary people and Russia's relationship to the West?

(Fall) Russia and the West - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; Politics 264f)
Taught in English; (same as Politics 264f). Since its creation at the beginning of the twentieth century, the Soviet Union dominated the minds of Western foreign policymakers. None of the West's policies in the Middle East, the Third World, Europe, or China after World War II can be understood without an understanding of Soviet foreign policy. We will examine the development of Soviet foreign policy since 1917 and the role played by Russia and the former Soviet republics in the far more complex "New World Order" we live in today. How have the expansion of the European Union, the tragedy of 9/11, and the war against terrorism influenced Russia's relations with the West?

Since its creation at the beginning of the twentieth century, the Soviet Union dominated the minds of Western foreign policymakers. None of the West's policies in the Middle East, the Third World, Europe, or China after World War II can be understood without the study of Soviet foreign policy. We will examine the development of Soviet foreign policy since 1917 and, following the collapse of the USSR in 1991, the role played by Russia and Russia and the former Soviet republics in the far more complex and multipolar "New World Order." Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; Politics 242s)
Following the collapse of the USSR and the Gulf War, Central Asia and the Caucasus became new centers of geopolitical rivalry. The new states are a source of energy (oil and gas) for Western powers and a vital transit corridor between Eastern Europe and China. While a new "Great Game" is being fought between Western, Far Eastern, and Middle Eastern powers for control over energy pipelines, the region is threatened by environmental catastrophe and water shortages. Is the new oil industry a source of prosperity or an instrument for exploitation, corruption, and instability? How important are the new states to the West's strategic energy interests?

(Spring) Topics in the Recent History of Europe: Red Star Over Russia: The Totalitarian Regime of Lenin and Stalin, 1917-1953 - *Not offered this year/term
The Bolshevik Revolution of 1917 marked the coming of totalitarianism to Russia. Led first by Lenin and then by Stalin, the country went through the most brutal civil war, purges, World War II, and the first stages of cold war. This period also saw immense social change and sweeping economic transformation. What were the causes of totalitarianism in Russia? How did the regime function? What were the major landmarks of Russian history in the period 1917-1953?

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; Politics 300f)
With the collapse of the USSR we were told that history was dead and liberal democracy triumphant. There was a "third wave" of democratic change. How accurate have these optimistic characterizations turned out to be? After an introduction to theories of liberal democracy and to the new discipline of "transitology" we will look at how states and leaders have applied such liberal-democratic ideas in Eastern Europe and the former USSR (with comparative examples from Africa and South America), and with what success.

(Spring) European Studies Seminar: Foreigners Within, Foreigners Without: Europe and Its New Neighbors
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(EURST-316, POLIT-316)
The enlargement of the European Union (EU) to Central and Eastern European countries has generated new neighbors to the east and south - the Western Newly Independent States (WNIS) of Russia, Belarus, Moldova, and Ukraine, and Southern Mediterranean countries (SMCs) Egypt, Libya, and Tunisia. Europe's new neighbors make up 410 million inhabitants, but their GDP capita is barely one tenth of the European Union's. This has brought problems for the EU, including migration pressures, human trafficking, and refugees. How is the EU dealing with these issues and how will relations with the new neighbors affect the domestic and foreign policies of the EU?

(Fall) Revolutions - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; Politics 350f)
Revolutions have a rich and bloody history on the European continent. In the twentieth century, there were frequent revolutionary upheavals, particularly in Russia and Eastern Europe. We will study two revolutionary periods: Russia in 1917 and the USSR in 1991. These revolutionary events present great contrasts, yet at the same time clarify the nature of revolutions and why they occur. Do they bring the expected fundamental and accelerated change people hope for? Our focus will be on the contrasts and parallels between Russia's early twentieth-century socialist revolution and late twentieth-century capitalist revolution. What was (and is) their impact on European history and thought?

Preamble (for topics courses): This course will focus on significant issues in the field of sociology not covered in other courses in the sociology curriculum. Topics will vary.
This course analyzes criminal behavior, the criminal justice system, and theoretical approaches to understanding crime. We will explore current theories of deviance and evaluate research into the causes and sociological implications of criminal and delinquent behavior patterns. The course will also focus on the central issue of defining crime. We will assess street, white collar, and juvenile crime over time and place. We will also explore the socioeconomic backgrounds of criminals. Finally, this course will also examine criminal justice systems, including police, courts, and corrections, from a sociological perspective.

SOCI-222-01 - Sociology - 2007-2008
(January) Sociology of Environmental Disasters
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): This course explores the sociological study of environmental disasters, or the ways in which social factors create and/or lead to specific consequences from these events. The ways in which the social and ecological issues intertwine is examined through readings on specific historical and contemporary cases.
Environmental sociology focuses on the ways environmental risks and benefits are not equally distributed across the population. The study of disasters have different consequences for people of different racial/ethnic groups or social classes. This area also explores the ways damage caused by natural events is often magnified, if not wholly created, by the altering of the natural landscape. This course examines these interrelated issues by focusing on specific past events Ericsson's study of the Buffalo Creek flood, to more contemporary events such as Hurricane Katrina in 2005.
Prerequisites: Sociology 123 or permission of instructor
Notes: Meets 3 days a week, 2 hours a day

(Fall) First Year Seminar: Sex and the City: Gender-Power Relations in Early Modern Europe
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive; Taught in English; FREN 120, ITAL 106, ROML 105)
Preamble (for topics courses): Seminar in Reading Writing and Reasoning taught in English
Political, social, and economic life was radically changed by growth of Europe's cities between medieval and modern times. These changes were debated in sexual terms as conflicts between men and women. As we study short stories from Early Modern France (Madame de Lafayette), Italy (Giovanni Boccacio), and Spain (Miguel de Cervantes and María de Zayas), and place them in their historical contexts, we will ask questions such as: To what extent do these works challenge or reinforce dominant models of gender relations and negotiate concepts and institutions such as marriage, honor, patriarchy, and blood purity? How do those topics apply to us today?
Prerequisites: fy or permission of instructor

(Spring) Preparation for Advanced Studies

This course will equip students of Spanish with a variety of skills that prepare them for upper-division courses. Specific areas of study will include introduction to literary genres and movements; practice in critical reading and writing; study of figures of speech, rhetoric, and style; presentation of oral reports; use of library resources. In addition, students acquire basic knowledge of the geography, history, and culture of the Hispanic world.

Prerequisites: Spanish 201, 209 or 210 or permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: R. Miñana

Expected enrollment: 15

SPAN-219-01 - Spanish - 2007-2008
(Spring) U.S. Latino/a Literature

After centuries of invisibility and marginalization, Latino culture and literature exploded on the American scene in the 60s. Chicanos, Cubans, Nuyoricans, and lately Dominicans and Central Americans have all contributed to create a diversified body of literature characterized by its bilingualism, biculturalism, and hybridity. This course will center on how U.S. Latino/a literature bears witness to identity formation, self-representation, and celebration of Latino culture and its people. It will explore a series of critical issues that define "latinidad" in the U.S.

(Fall) Introduction to Spanish and Latin American Film

This course offers a broad introduction to the history, politics and aesthetics of Latin American and Spanish cinema in the context of, and in contrast with, cinemas from other regions, especially hegemonic Hollywood aesthetics. This course will also focus specifically on introducing students to the basic terminology and methodologies of film analysis, thus preparing them for the department's film seminar (Spanish 320) and other advanced courses in film studies.

Prerequisites: Spanish 212 or permission by the instructor

Notes: 2 meetings (75 minutes)

Instructors: J. Crumbaugh

Expected enrollment: 16

SPAN-235-01 - Spanish - 2007-2008
(Fall) Introduction to Latin American Literature I

This course explores the diversity of cultures and writings of Latin America, from pre-Columbian indigenous texts through the nineteenth century. Readings will include the Popol Vuh, Chronicles, the works of Sor Juana Inés de la Cruz, Ricardo Palma, and José Martí, among others. Class discussions and assigned papers based on literary analysis and research.

Prerequisites: Spanish 212 or permission of department

Notes: 2 meetings (75 minutes)

Instructors: R. Miñana

Expected enrollment: 18

(Spring) Introduction to Latin American Literature II

An introduction to Latin American texts from modernismo to the present. Different cultural movements and their sociopolitical contexts are examined through representative works. Class discussions and assigned papers are based on literary analysis and research.
Prerequisites: Spanish 212 or permission of department
Notes: 2 meetings (75 minutes)

SPAN-244-01 - Spanish - 2007-2008
(Fall) Foundations of Spanish Literature
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
An introduction to art, history, and literature from pre-1800 Spain. Materials may include medieval music such as the Cantigas, Arab architecture like the Cordoban Mosque, and literary texts such as the Poema de Mio Cid or Don Quijote. Class discussion and assigned papers based on literary analysis and research.
Prerequisites: Spanish 212 or permission of department
Notes: 2 meetings (75 minutes)
Instructors: N. Romero-Díaz
Expected enrollment: 18

SPAN-246-01 - Spanish - 2007-2008
(Spring) Modern Spanish Studies
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A survey of Spain's visual culture, intellectual history, and literature from the eighteenth century to the present. Aesthetic and philosophical movements will be studied against the backdrop of social history. Materials to be studied will include, among others, paintings by Francisco de Goya and Salvador Dali, poems by Federico Garcia Lorca, and films by Luis Buñuel and Pedro Almodóvar. Class discussions and assigned papers based on analysis and research.
Prerequisites: Spanish 212 or permission of department
Notes: 2 meetings (75 minutes)

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive; Film Studies 390-04, Gender Studies 333-03)
Preamble (for topics courses): This course examines the history, politics and aesthetics of Latin American and/or Spanish cinema in the context of world cinema, and especially in contrast to mainstream Hollywood cinema. The course will also familiarize students with the specific methodologies of film analysis and with recent debates within film studies.
In the 1990s GLBT liberation entered the public sphere as a major political force. Simultaneously, American academia produced and exported a new academic discipline: queer studies. As a consequence, the North American liberational model displaced cultural and theoretical models of sexuality of other countries. We will consider some of the key U.S. texts that have consecrated queer studies as a discipline and juxtapose them with theories and cinematic texts from Argentina, Brazil, Chile, Cuba, and Mexico in order to recuperate cultural models under erasure in the wake of the U.S. model's identity-focused and consumer-driven triumphalism.
Prerequisites: Prerequisites: 1) Spanish 212; 2) Spanish 235, 237, 244, or 246 or permission of instructor

(Spring) Spanish Literature: Medieval, Renaissance, and Golden Age: Assault, Rape, and Murder: Gendered Violence from Medieval to Contemporary Spain
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
SPAN-362-01  
Expected enrollment: 18

Preamble (for topics courses): This course will study pre-1800 Spanish texts (literary and non-literary) from an interdisciplinary perspective. Since the topic varies each time the course is offered, a student may receive credit more than once.

This course will examine the complex interaction of gender and violence as a personal and institutional issue in Spain from medieval times to the present. We will study both the ideological and sociocultural constructs that sustain and perpetuate violence against women as well as different forms of resistance. From a feminist perspective, we will approach topics such as: private/public, honor, jealousy, masculinity, etc. Some of the texts are: Lucanor’s La mujer brava; Zayas’s Desengaños amorosos; Bebè’s song, Malo; Boyaín’s movie Te doy mis ojos; and the Ley orgánica contra la Violencia de Género from 2004.

Prerequisites: two of the following: Spanish 221, 235, 237, 244, or 246 and permission of instructor

Notes: 1 meeting (2 hours, 50 minutes)

Instructors: J. Crumbaugh

SPAN-341-01  
(Fall) Contemporary Latin American Literature: Fall 2007: Treading the Ebony Path: Afro-Hispanic Literature

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Speaking- and writing-intensive)

Preamble (for topics courses): This course will concentrate on the various literary genres and cultural movements that have shaped Latin America from modernism to the present. Topics will focus on different genres and the expression of diverse ideologies through literature. Since the topic varies each time the course is offered, a student may receive credit more than once.

The study of Afro-Hispanic literature has grown recently with the recovery and reexamination of lost texts and forgotten authors, as well as the desire of contemporary authors to contest the invisibility and racial ideologies in their national literatures. We will examine texts by authors of African descent in the Spanish-speaking world of the nineteenth, twentieth, and twenty-first centuries. We will read a variety of genres and discuss the construction and meaning of “race,” color, national and cultural identity—which is in constant dialogue with dominant discourses. Secondary objectives include the development of research and writing skills and rudimentary theoretical orientation.

Prerequisites: two of the following: Spanish 221, 235, 237, 244, 246, or permission of instructor

Notes: 1 meetings (2 hours 50 minutes)

Instructors: N. Romero-Díaz

SPAN-342-01  
(Fall) Teaching and Learning Spanish as a Second Language

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): What is a human language? What is a second language? Can an adult achieve native competence when learning a second language? What is the role of teaching in this psycholinguistic process? And, ultimately, can a language be taught? These questions will be the starting point of this course, which will explore, both in a practical and a theoretical way, how second language teaching has implemented research findings.

Since the 1950s, human language has been considered an innate cognitive ability developed in conjunction with others such as memory, perception, judgment, and imagination. In this sense, when acquiring language, the brain is conceived not as a blank that must be filled, but as a complex system endowed to make sense of language input. This seminar will emphasize the practical aspects involved in the teaching of Spanish as a second language within this frame. These issues will be explored through readings, class discussions, studying grammar from a pedagogical point of view, critical review of teaching materials, reports on class observations, design of lesson plans, and other activities.

Prerequisites: Two of the following: Spanish 221, 235, 237, 244, 246, and permission of the instructor

Notes: 1 Meeting (2 hours, 50 minutes)

Instructors: E. Castro

Expected enrollment: 16

(Fall) Seminar in Spanish Studies: Fall 2007: Terror and Victimhood: The State of Spain

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): The specific content of this advanced-level seminar will depend on the instructor. Materials to be studied will vary in terms of medium and genre, and the critical focus will tend to be interdisciplinary. Papers will be based on research and analysis. Since the topic varies each time the course is offered, a student may receive credit more than once.

Since Spain’s bloody and bitterly divisive Civil War (1936-1939), the country’s successive government administrations have established their legitimacy through a peculiar combination of violence and claims to victim status. Attempts to contest the legitimacy of the Spanish state have, in turn, responded with their own acts of violence and competing appeals to victimhood. This course will ask what the particularities of contemporary Spain can teach us about modern state formation, and the commonplace understandings of fascism and democracy. Materials to be studied include novels, films, paintings, and works of political theory.

Prerequisites: Spanish 212 and two of the following: Spanish 221, 235, 237, 244, 246 or permission of the instructor

Notes: 1 meetings (2 hours 50 minutes)

Instructors: J. Crumbaugh

Seminar in Spanish Studies: Spring 2008: Media Monsters: Empire and Resistance in Twenty-First-Century Spain and the Americas

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): The specific content of this advanced-level seminar will depend on the instructor. Materials to be studied will vary in terms of medium and genre, and the critical focus will tend to be interdisciplinary. Papers will be based on research and analysis. Since the topic varies each time the course is offered, a student may receive credit more than once.

In a political climate shaped by mass media and the threat of global terrorism, this seminar will examine the discourse of monstrosity that official and dissident powers employ to divide the world between those who are "with" and those who are "against us." Through discourse analysis, media, and subaltern studies, we will analyze a variety of literary and mass media texts that utilize monstrosity to enact and/or challenge the complex forces of globalization. Main themes include U.S.-Latin America relations, neoliberalism and its consequences (Zapatismo in Mexico, street children in Brazil), and the war on terror in the U.S. and Spain.

Statistics

STAT-140-01 - Statistics - 2007-2008

(Fall) Introduction to the Ideas and Applications of Statistics

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

This course provides an overview of statistical methods, their conceptual underpinnings, and their use in various settings taken from current news, as well as from the physical, biological, and social sciences. Topics will include exploring distributions and relationships, planning for data production, sampling distributions, basic ideas of inference (confidence intervals and hypothesis tests), inference for distributions, and inference for relationships, including chi-square methods for two-way tables and regression.

Prerequisites: 2 years of high school algebra

Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)

Instructors: J. Gifford

(Fall) Elementary Data Analysis and Experimental Design
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
A fundamental fact of science is that repeated measurements exhibit variability. The course presents ways to design experiments that will reveal systematic patterns while "controlling" the effects of variability and methods for the statistical analysis of data from well-designed experiments. Topics include completely randomized, randomized complete block, Latin Square and factorial designs, and their analysis of variance. The course emphasizes applications, with examples drawn principally from biology, psychology, and medicine.
Prerequisites: Any 100-level mathematics or statistics course or permission of instructor.
Notes: 2 meetings (75 minutes)

STAT-341-01 - Statistics - 2007-2008
(Spring) Linear Statistical Models
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Mathematical concepts from linear algebra and n-dimensional Euclidean geometry, together with statistical concepts of estimation and hypothesis testing, are developed and used to construct a unifying theory for two classes of applied methods: analysis of variance and regression analysis. The theory is developed in three stages: least squares and orthogonal projections; moment assumptions and the Gauss-Markov theorem; and the normal distribution and F-tests.
Prerequisites: Mathematics 211
Notes: 2 meetings (1 hour and 45 minutes); offered alternate years, next offered spring 2010.
Instructors: R. Horowitz

STAT-342-01 - Statistics - 2007-2008
(Fall) Probability
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
(Same as Mathematics 342f)
This course develops the ideas of probability simultaneously from experimental and theoretical perspectives. The laboratory provides a range of experiences that enhance and sharpen the theoretical approach and, moreover, allows us to observe regularities in complex phenomena and to conjecture theorems. Topics include: introductory experiments; axiomatic probability; random variables, expectation, and variance; discrete distributions; continuous distributions; stochastic processes; functions of random variables; estimation and hypothesis testing.
Prerequisites: Mathematics 203
Notes: 2 meetings (75 minutes), 1 lab (50 minutes); offered alternate years at Mount Holyoke and Smith Colleges; offered at Mount Holyoke in fall 2009.
Instructors: R. Jordan

STAT-343-01 - Statistics - 2007-2008
(Spring) Mathematical Statistics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course is an introduction to the mathematical theory of statistics and to the application of that theory to the real world. Topics include probability, random variables, special distributions, introduction to estimation of parameters, and hypothesis testing.
Prerequisites: Mathematics 202 and 342 recommended
Notes: 2 meetings (90 minutes); offered every spring semester alternately at Mount Holyoke and Smith Colleges; offered at Mount Holyoke in spring 2010.
Instructors: J. Gifford

(Spring) Seminar in Statistics and Scientific Research - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
The topic for Spring 2007 is Discrete Markov Chain Monte Carlo: elements of graph theory, discrete probability models, basics of statistics, and their interrelations, with emphasis on the interplay between applied problems and abstract theory. The only prerequisite is familiarity with matrix algebra.
Prerequisites: Math 211 or permission of instructor

THEAT-120-01 - Theatre Arts - 2007-2008
(Fall) Topics in Design: Costume Construction - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): Various topics in theatrical design, or in related design fields, including theory, practice, and history. Subjects may include performance and design, costume crafts, and materials and techniques. The course combines historical study with studio work.
This course will explore the evolution of costume construction, using both historical and modern methods. Commercial patterning, flat patterning, and draping methods will be covered. Students will learn skills for the construction, care, identification, and treatment of fabric and the use and maintenance of tools used in the costume shop. Through these methods we will interpret costume renderings by prominent designers.
Notes: 2 meetings (2 hours); lab; $10 lab fee; additional purchase of construction supplies and materials is the responsibility of the student
Instructors: P. Spees

THEAT-122-01 - Theatre Arts - 2007-2008
(Fall) Design I
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
An introduction to the art and work of the set and costume designer in the performing arts. Students will learn how a designer approaches a script, how their work impacts a production, and what means are used in the execution of this process. They will learn how to develop their own visual imaginations and how to create visual concepts through discussions, renderings, and models. No previous experience in theatre, performance, or the visual arts is required.
Notes: 1 meeting (3 hours); $25 lab fee. Additional purchase of design supplies and materials is the responsibility of the student.

THEAT-150-01 - Theatre Arts - 2007-2008
(Fall) What Is Performance?
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive)
What's the difference between acting and being, and how does the idea of "performance" structure this difference? How do we "perform" our own identities, and how do we interpret the performances of others? This seminar offers a basic introduction to performance studies, an exciting new discipline through which everyday life, ritual behaviors, and artistic practices are studied. Perspectives from the arts, humanities, and social sciences will be explored using both textual and performative approaches. This is a speaking-, reading-, and writing-intensive class that includes innovative individual and group exercises.
Prerequisites: fy or permission of instructor
Notes: 2 (75 minute meetings)
Instructors: E. Rundle
Expected enrollment: 14

THEAT-166-01 - Theatre Arts - 2007-2008
(Fall) Introduction to the Music of Africa
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
This course concentrates on indigenous musical traditions from different parts of Africa. Cross-cultural features as well as regional varieties are examined. A major objective of the course is to facilitate an understanding of the cultural contexts within which African musical traditions derive their meaning and significance. Relying on live performances and recordings, the course examines the conceptual and behavioral aspects of music, the contexts and functions of performances, musical instruments and vocal styles, the training and status of musicians, and the stylistic features of the music. The course culminates in a performance of an African opera.
Instructors: O. Omojola
Expected enrollment: 25

THEAT-205-01 - Theatre Arts - 2007-2008
(Spring) Acting II
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A continuation of techniques developed in Performance I with a greater commitment to the culture of collaboration. Concentration is on scene work with “classic” realist playwrights, Chekhov, Ibsen, and Williams. Scene study continues with contemporary masters Churchill, Mamet, and Parks. Actor
training will involve the embodiment of physical behavior, the visceral use of language, and more intermediate composition work with Viewpoints to
develop and refine character. Practical tools explored in class are intended to offer the student greater vocal, physical, and imaginative freedom and
clarity, as well as formidable text analysis skills.

Prerequisites: Theatre Arts 105 or permission of instructor
Notes: 2 meetings (2 hours); lab; $10 lab fee.
Instructors: R. Babb
Expected enrollment: 14

(Fall) Topics in Performance: Principles of Voice and Verse

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): Topics courses offer a specific approach to performing. They may include mask characterization, physical theatre
techniques, acting Shakespeare, and vocal training, among others.

An introduction to vocal work with an emphasis on Shakespeare's verse. Speaking is a physical, visceral act of power. Class work will focus on the
beginnings of strengthening and tuning the body as total expressive vocal instrument with the aim of embodying language. Working with passages
from Shakespeare's poetry and plays is intended to liberate emotional impulses, articulate complex intellectual arguments and engage the imagination in
thoughtful play.

Prerequisites: Theatre Arts 105 or permission of instructor
Notes: 2 (2 hour) meetings; $10 lab fee.
Instructors: S. Skiles
Expected enrollment: 12

(Spring) Topics in Performance: Suzuki Actor Training

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): Topics courses offer a specific approach to performing. They may include mask characterization, physical theatre
 techniques, acting Shakespeare, and vocal training, among others.

This course will focus on Suzuki actor training, a rigorous, physical method developed by Tadashi Suzuki. Drawing from the classical Japanese art
forms, Noh and Kabuki, and other sources. Suzuki trains actors to connect to their "animal" energy and also to the ground. Through a series of
exercises, actors develop physical strength and projection. The work will culminate in a performance based on a dramatic text.

Prerequisites: 105 or permission of instructor.
Notes: 2 meetings (2 hours)
Instructors: J. Devlin
Expected enrollment: 14

(Spring) Topics in Performance: Viewpoints/Grotowski training - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): Topics courses offer a specific approach to performing. They may include mask characterization, physical theatre
techniques, acting Shakespeare, and vocal training, among others.

An intense, physically demanding course that explores two theatre training idioms—the collaborative-based approach of Viewpoints created by director
Anne Bogart and the SITI Company and the Objective Drama phase of work explored by Polish director Jerzy Grotowski. While the cultural contexts
of these practices differ, both strive for a heightened sense of physical intelligence and dexterity on the part of the actors. Through work sessions, film
viewings, and readings, this course will focus on two major presentations—a group performance and an original solo work inspired by these two
approaches.

Prerequisites: Theatre Arts 105 or permission of instructor
Notes: 2 meetings (2 hours); $10 lab fee
Instructors: S. Skiles
Expected enrollment: 12

THEAT-220-01 - Theatre Arts - 2007-2008
(Fall) Topics in Design - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): Various topics in theatrical design, or in related design fields, including theory, practice, and history. Subjects may
include opera performance and design, costume crafts, and materials and techniques. The course combines historical study with studio work.

This course will explore the evolution of costume construction, using both historical and modern methods. Commercial patterning, flat patterning, and
draping methods will be covered. Students will learn skills for the construction, care, identification, and treatment of fabric and the use and
maintenance of tools used in the costume shop. Through these methods we will interpret costume renderings by prominent designers.

Prerequisites: 100, 120 or permission of instructor
Notes: 2 meetings (2 hours)
Instructors: P. Spees
Expected enrollment: 12

(Spring) Topics in Theatre Studies: Introduction to Performance Studies - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)
Preamble (for topics courses): Various topics in theatre studies including particular theatrical periods and genres. Topics may include melodrama, postcolonial theatre, early twentieth-century avant-garde movement, feminist theatre, etc. These courses include historical and theoretical approaches and could involve interdisciplinary collaboration.

Performance studies focuses on how meaning is created through cultural behaviors and practices. This course will teach students the basic skills needed to analyze a variety of performances, from ritual and theatre to the interactions and occurrences that constitute everyday life. Students will learn to use performance theory to examine the ways in which identity is constructed and maintained in social contexts. Each week students will study a particular aspect of performance theory and apply what they have learned to observation in the field. This is a reading and writing intensive course that emphasizes connections between the humanities and social sciences.

Prerequisites: Theatre 100, 105, 122 or permission of instructor

Instructors: E. Rundle

THEAT-251-01 - Theatre Arts - 2007-2008
(Fall) Histories of Performance I
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
A survey of world performance history, including: the evolution of human language and consciousness; the rise of oral, ritual, and shamanic performance; religious and civic festivals; and imperial theatre practices that position the stage at the dangerous intersection of religious worship, public taste, royal patronage, and government censure. Understanding performance as both artistic practice and social institution, this course emphasizes the role performance has played in changing audiences and as a cultural and political force in various societies. We explore not only how performances were created--in terms of design, dramaturgy, architecture, and acting--but also for whom, and why.
Notes: 2 meetings (75 minutes)
Instructors: E. Rundle
Expected enrollment: 25

THEAT-252-01 - Theatre Arts - 2007-2008
(Spring) Histories of Performance II
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
A historical survey of dramatic texts and world performance traditions from the seventeenth to the twentieth centuries, with attention given to the influence of print culture on early modern theatrical movements; the rise of nationalism and the creation of dramatic genres; and the effects of industry and technology on experimental modernist forms. Understanding performance as both artistic practice and social institution, this course emphasizes the role performance has played in changing audiences and as a cultural and political force. As such, we explore not only how performances are created--in terms of design, dramaturgy, architecture, and acting--but for whom, and why.

THEAT-350-01 - Theatre Arts - 2007-2008
(Spring) Seminar: Staging Theory
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course examines the major theoretical and critical statements on performance from the classical period to the postmodern era—from Plato to Brecht and beyond. Central to our study will be the evolving concepts of representation, structure, and genre as elements of changing ideologies. The writings of theorists, critics, and practitioners—contextualized and supplemented by play texts—will be further explored, illuminated, and challenged through writing and performance projects that require students to put theory into practice.
Prerequisites: 8 credits in the department or in related subjects or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: E. Rundle
Expected enrollment: 12

THEAT-350-02 - Theatre Arts - 2007-2008
(Fall) Seminar: Shakespeare, the Theatre, and the Book
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking-intensive; English 312)
In his own time, Shakespeare’s writings had life both onstage and in print. This seminar invites students to locate the works we study in relation to the early modern theatre and also the history of the book, especially the development of a reading audience for popular art. Readings include such works as Romeo and Juliet, the sonnets, and Troilus and Cressida and King Lear. We will also explore current critical debates about gender, sexuality, and literary genre. Substantial opportunity will be provided for independent work reflecting each student's own interests.
Prerequisites: Theatre: 8 credits in department and some previous study of Shakespeare, or permission of instructor. English prereq: See English 312
Notes: 1 meeting (3 hours)
Instructors: P. Berek

African American and African Studies

AFRAM-100-01 - African American and African Studies - 2008-2009
(Spring) American Dreams, American Dilemmas: Race, Democracy, and Human Capability in the Twenty-first Century
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
First-year seminar (Writing-intensive)
In the twentieth century, American dreams of full citizenship for the descendants of enslaved Americans were always tempered by dilemmas of racial conflict. The struggle for racial, gender, and economic justice has achieved much during the last 60 years. What challenges remain in education, housing, employment, and consumer markets? What resources and policies are available to enhance well-being and agency for all citizens? This course surveys the strivings of people of African descent in the United States. The quest for racial justice and equality of opportunity is unfinished. The course reviews the accomplishments and work outstanding as our society moves from access to achievement.
Prerequisites: fy only
Notes: 2 meetings (75 minutes)
Instructors: L. Wilson
Expected enrollment: 18

(Fall) Introduction to African American and African Studies: Identity, Community, and Progress
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course will introduce students to topics and methodologies within the vast field of African studies. This course will attempt to disrupt the history-based, U.S.-centric model by presenting alternate texts and approaches to the study of the global/black experience. We must necessarily begin by questioning the idea, definition, and practice of blackness: what is it? How/did a unified black identity emerge from disparate people, practices, and experiences? After investigating the formation of the African diaspora, we will consider texts from the Americas, Europe, and the continent, assessing each for its historical, aesthetic, political, and cultural value.
Notes: 2 meetings (75 minutes)
Instructors: Z. Elliott
Expected enrollment: 25

(Spring) Black Women Writers: Feminist Visions from the African Diaspora
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement (Writing-intensive; same as Gender Studies 204)
This course will explore the influence of feminist politics on the writing of women throughout the African Diaspora. By exploring the different cultural, political, and historical contexts in which these writers work, we will attempt to define the continuities and conflicts that exist within the vast field of black women's writing. Why, when, and how did a black feminist consciousness emerge? How did racial tensions within the predominantly white feminist movement lead to the development of a separate black "womanist"/Third World agenda? How does feminist literature of the African Diaspora challenge negative stereotypes and misrepresentations of black women's realities?
Prerequisites: 101 Intro to African American Studies, or permission of instructor
Notes: 1 meeting (2 hours 50 minutes)
Instructors: Z. Elliott
Expected enrollment: 20

(Fall) Introduction to Twentieth-Century Critical Race Theory

(Spring) Luminous Darkness: African American Social Thought - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Examines the causes of and proposed solutions to "the Negro problem" in post-Civil War American public policy. Focuses on the life, work, and legacies of DuBois. Drawing on domestic and diasporic fictional and nonfictional depictions of black life in the "DuBoisian century" the course considers different responses to his 1903 question, "How does it feel to be a problem?" Examining theories, arguments, movements and policies targeting blacks and their environment allows us to criticize black modernity, assess the changing role of black intellectuals in society, evaluate "race theory" and consider dominant and marginal attempts to analyze and overcome the "color line" in America.

(Fall) Gender, Terror, and Trauma in African American Culture
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
This course will explore representations of violence in African American culture, with special consideration given to literary depictions of rape and lynching. After examining the historical function of violence within the United States, students will perform a comparative analysis of texts authored by black women and men. We will also explore cultural, social, and political movements (abolition, civil rights, black power, black feminism, hip-hop) that have emerged in response to the violent policing of black bodies. How has violence been used to terrorize blacks? What role has violence played in the African American struggle for liberation and equality?
Prerequisites: 8 credits in the department or permission of instructor

Instructors: Z. Elliott
Expected enrollment: 15

(Fall) Black Feminism: Theory and Praxis: Black Feminism: Theory and Praxis - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Writing-intensive)
This course explores foundational texts of major authors along with lesser-known contributors to the black feminist movement, from the nineteenth century to the present. It also examines the various ways in which black feminist theory has been expressed in and applied to the arts and political activism, analyzing black feminist cultural criticism as it applies to music, film, fine arts, performance, and literature. Conflicts and continuities between black and white feminists, and the role of profeminist men within the movement will be considered as well.

(Spring) Sex, Love, and Gender in Contemporary African American Film
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Writing-intensive; Flmst-320-01)
This course will explore the representation in film of intimate relationships among African Americans. Confronting an ongoing history of racist, sexist, and homophobic images, films produced by and featuring blacks can offer alternate interpretations of love, romance, and sexuality. Coupled with literature and theoretical readings by feminists and black cultural critics, students will consider the function of--and challenges to--intimacy in
interpersonal relationships among African Americans. Directors under consideration include Spike Lee, Kasi Lemmons, Marlon Riggs, and Sanaa Hamri.

American Studies

AMST-201-01 - American Studies - 2008-2009
(Spring) Introduction to the Study of American Culture: Metaphors, Borders, Migrations
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): This course introduces students to American studies' interdisciplinary methods of inquiry and emerging themes and debates by focusing on spatial metaphors of "America" that have mediated popular and scholarly interpretations of U.S. culture and politics since the nineteenth century.

Drawing on a diverse archive of speeches, political documents, photography, film, music, and literature, we will examine the interplay of race, gender, and sexual meanings embedded in historical constructions of the westward frontier, the virgin wilderness, America's gateway, the border, the north and the south, and the midwestern heartland. Throughout the course, we will consider the role of multiple migrations and border crossings in an evolving cultural mapping of America.

(Fall) Senior Seminar: Reimagining Los Angeles: Multiethnic Fictions of Tomorrowland
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(English 387)

In Ridley Scott's 1982 science fiction film, *Blade Runner*, Los Angeles is a beleaguered metropolis overrun by immigrant "borders" and menacing replicants, presenting a dystopic forecast of multiculturalism. By surveying major genres in relation to the racialized and gendered contexts of migration, labor, and urban redevelopment, this course focuses on alternative constructions of Los Angeles in African American, Asian American, and Chicano/a short stories, novels, and film. Works will include *Southland, Tropic of Orange, Twilight: Los Angeles 1992, Their Dogs Came with Them, Devil in a Blue Dress, We Should Never Meet*, and *Kindred*.

(Spring) Senior Seminar: Prison Writing
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive; English 348 and Gender Studies 333)
In this course we will look at media and legal representations of prisoners and especially at the writing of prisoners themselves. Authors include Barbara Harlow, Jennifer Gonnerman, Mumia Abu-Jamal, George Jackson, and Salwa Bakr. Movies may include Dead Man Walking and Aileen Wuornos: The Selling of a Serial Killer. Some are castigated as rule breakers; structures are built for them, and in these realms men and women are cordoned off, envisioned and held separately in their transgressions—what stories emerge from the prisoners' mouths? Do those stories challenge the deep architecture of the prisons themselves?

(Spring) Senior Seminar: American Women's History
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(History 381 and Gender Studies 333)
In this research seminar we will be looking at American women's history through a range of women's writings, including memoirs, letters, and diaries as well as oral histories, first person accounts, and literature from the 1890s to the present. Attention will be paid to the role of personal narrative in the writing of history and the place of history in personal writing. Students will do an oral history of a friend or family member, write a biographical essay on a woman in the past, and produce a 25-page research paper on a topic of their choice. Trips to local archives will help students who are unfamiliar with historical research gain confidence.

(Fall) Anthropology of Modern Japan - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Since the mid-nineteenth century, Americans have viewed Japan as the Orient's most exotic and mysterious recess, alternately enticing and frightening in its difference. Intense economic relations and cultural exchange between Japan and the U.S. have not dispelled the image of Japanese society and culture as fundamentally different from our own. In this course, we will strive for greater understanding of shared experiences as well as historical particularities. Issues covered may vary from one semester to another, but frequently focus on work, women, minorities, and popular culture. Films and anthropological works provide ethnographic examples of some key concepts.

(Fall) Shopping and Swapping: Cultures of Consumption and Exchange
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking- and writing-intensive)
We shop for our food, for our clothes, for our colleges. We purchase cars, manicures, and vacations. It seems that there is little that cannot be bought or sold. But we also give and receive gifts, exchange favors, "go dutch" in restaurants, and invite friends for potlucks. This course examines exchange systems cross-culturally, in order to understand their cultural significance and social consequences. It explores how our own commodity exchange system, which appears to be no more than an efficient means of distributing goods and services, in fact contains intriguing symbolic dimensions similar to the gift exchange systems of Native North America, Melanesia, and Africa.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Every society is held together by systems of interpersonal and institutional communication. This course examines the nature of communication codes, including those based on language (speaking and writing) and those based on visual images (art, advertising, television). To understand communication in its social and historical dimensions, we study the psychological and cultural impact of media revolutions and then look at ways communication systems manipulate individual consciousness. Illustrative examples are drawn from Western and non-Western societies.

(Fall) Visualizing Culture - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
In this course we go behind the scenes and behind the screens of anthropological films, television, museum exhibitions, and publications such as National Geographic Magazine, to explore the social contexts of their production, distribution, and interpretation. We consider how popular images of cultural "others" reveal the lives and times that produce them, and how, as sites of cultural exchange and political debate, such images shape and are shaped by relations of power. Further, we consider the diversity of local responses to images of cultural identity and begin to explore the complexities of "picturing cultures" from different subject positions across the global mediascape.

**ARTH-110-01 - Art History - 2008-2009**

**(Fall) Introductory Seminar in Art History: The Artist in History**

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar
A study of artistic identity in diverse time periods and regions of Europe, Asia, and North America. How have artists defined themselves, and how can we understand their roles in the societies in which they worked? Our investigation will include the study of myths and legends about the artist and the origins of art making, self-portraits and artworks that take on the subject of artistic creation, writings by artists and others, and historical analyses by recent scholars. We will encounter the artist as magician, entrepreneurial artisan, a channel to the divine, theoretician, ambassador, social critic, and revolutionary. Themes include art vs. craft, gender, technology, and collaboration.
Prerequisites: fy or permission of the instructor
Notes: 2 meetings (75 minutes);
Instructors: C. Andrews
Expected enrollment: 18

**(Spring) Talking Pictures: An Introduction to Film**

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Film Studies 202)
Some of the best feature-length films of the past century have commanded our attention and imagination because of their compelling artistry and the imaginative ways they tell stories visually and verbally. This course closely studies narrative films from around the world, from the silent era to the present, and in the process it introduces students to the basic elements of film form, style, and narration. Some of the films to be considered are: *Broken Blossoms, Battleship Potemkin, Citizen Kane, Contempt, The Bicycle Thief, Ugetsu, Rear Window, Woman in the Dunes, The Marriage of Maria Braun, Days of Heaven,* and *Moulin Rouge.*

**(Fall) Gods and Mortals: Myth in Ancient Art and Literature - *Not offered this year/term**

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Classics 211)
Many ancient images tell completely different versions of myth from those portrayed in Greek and Roman literary sources. By juxtaposing distinctive modes of communication in the ancient world, students will analyze the rhetorical uses of myth, both then and now. Students will also examine the range of possibilities for translating and interpreting text and image, which will alert them to the vitality of myth as a language of its own, transcending historical parameters.

**ARTH-215-01 - Art History - 2008-2009**

**(Fall) The Hellenistic World: From Alexander to Cleopatra**

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Hellenistic art has often been regarded as a chaotic, decadent phase between the golden ages of classical Greece and imperial Rome. Yet the period in the Mediterranean from the death of Alexander the Great in 323 BCE to the Roman conquest of Egypt in 31 BCE saw the creation of some of the greatest masterpieces of ancient art, the development of formal art criticism, and the mass production of art for private enjoyment. The course addresses the new themes and purposes of art in a cosmopolitan culture that, in many respects, was not unlike our own.

Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: B. Bergmann
Expected enrollment: 20

(Fall) Nineteenth-Century European Art: Neoclassicism to Impressionism
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course traces major developments in European art during the periods traditionally designated by the terms neoclassicism, romanticism, realism, and impressionism. Focusing primarily on French art, but branching out to consider the art of England and Spain, it explores the key artistic themes of the century: the engagement with history, the rise of nationhood, the experience of the urban, the Marxist proposal, the grappling with modernity, the dealing in individual temperaments. Among the major figures to be studied are Constable, Courbet, David, Delacroix, Goya, Ingres, Manet, Monet, and Renoir.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: A. Lee

(Fall) Building the Modern Environment: Architecture 1890-1990
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
An exploration of major movements and personalities in architecture from the late nineteenth century to the present. Emphasizing the United States against the background of European developments, the course considers the search by architects, including Frank Lloyd Wright, Le Corbusier, and Frank Gehry, for a language of form and space that captures the contemporary spirit as it elevates society to a higher plane of existence. Discussion focuses on issues of technology and utopia, the skyscraper, and the collision of tradition, modernity, and postmodernism in architecture since 1945.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 3 meetings (50 minutes)
Instructors: M. Davis
Expected enrollment: 30

ARTH-244-01 - Art History - 2008-2009
(Spring) Modern Art: 1885-1945
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course examines the great ruptures in European art that today we call modernist. It relates aspects of that art to the equally great transformations in European society: revolutionary ferment, the rise and consolidation of industrial capitalism, colonization and its discontents, and world war. Among the major figures to be studied are Duchamp, Matisse, Malevich, Picasso, Seurat, and van Gogh.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)

ARTH-245-01 - Art History - 2008-2009
(Spring) Contemporary Art - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course traces the different paths of painting, sculpture, and photography in the United States and, less so, Western Europe since World War II. Initially, most of these paths traced a relationship with the "crisis of modernism," but increasingly, they have taken on a different vitality, drawing energy from a wide variety of postmodern and postcolonial subjects and debates: identity politics, transnationalism, diaspora. Can something that can be identified as an avant-garde practice exist in such a context? What kinds of questions are appropriate to ask about works that stridently attempt to suspend the very category of art?
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: A. Lee

ARTH-290-01 - Art History - 2008-2009
(Spring) Issues in Art History: Trading Partners: Visual Culture and Economies of Exchange
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Trade and cross-cultural exchange form the central themes of this colloquium. Focusing upon early modernity, circa 1500-1800, we consider the relationship among visual culture, long-distance trade, and travel. We ask: how local desires for foreign commodities—such as Chinese porcelains, African ivories, Dutch tulips, Indonesian spices, Indian textiles and American silver—shaped the visual culture of daily lives; and how travelers, be they merchants or conquistadors, slaves or scientists, pilgrims or refugees, changed local visual cultures. Research projects may focus on any region(s) of the early modern world.
Prerequisites: Soph, jr, sr, or permission of instructor

(Fall) **Great Cities: Paris-Paradise: The Medieval City and Its Transformation - *Not offered this year/term**
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
In 1323, Jean of Jandun wrote that Paris "seems to have received from the Most-High the role of the earthly paradise." Using medieval eyewitness accounts and descriptions, surviving monuments, and graphic records, this seminar will explore the transformation of Paris from a small twelfth-century town into Europe's most important metropolis by 1300. We will then consider the metamorphosis of medieval Paris into a modern capital in the nineteenth century paying particular attention to representations of the city by painters, writers, and, most recently, filmmakers.

(Fall) **Seminar in Ancient Art: The Unearthed Cities of Vesuvius**
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Life on the Bay of Naples came to an abrupt halt in 79, when Vesuvius erupted, preserving surrounding cities and villas with lava and ash. The rediscovery of Pompeii and Herculaneum since the eighteenth century had significant impact upon European art and literature. The seminar examines the surviving environment and artifacts created to Roman tastes in the late republic and early empire. It considers the history of archaeological and art
historical methods and the romantic visions of art, theatre, and film up to the present. One highlight will be a visit the Pompeii exhibition at the National Gallery in Washington, DC.

Prerequisites: courses in art history, classics, or ancient history or per permission of instructor.

Notes: 1 meeting (3 hours);
Instructors: B. Bergmann
Expected enrollment: 15

ARTH-310-01 - Art History - 2008-2009
(Spring) Seminar in Ancient Art: Roman Rooms - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Romans embellished every available surface of public and private buildings with frescoes, mosaics, and marble inlay. The seminar examines well-preserved interiors throughout the Roman empire. Looking at houses, villas, and farms in such sites as Pompeii, southern France and Syria we will consider how workshop practice, personal taste, cosmopolitan and local traditions shaped choices of materials and imagery in the spaces of daily experience.

Prerequisites: courses in art history, classics, or ancient history or permission of instructor.

Notes: 1 meeting (3 hours);
Instructors: B. Bergmann
Expected enrollment: 12

(Fall) Seminar in Medieval Art: Miracles, Romance, and Satire: Storytelling in Medieval Art - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course will explore the ways in which images are composed into visual narratives to both inform and persuade. Discussion will focus on stained glass, featuring Chartres Cathedral, as well as religious and secular manuscripts including the Cantigas de Santa Maria and the Book of Fauvel, a wicked critique of the French court. We will investigate the multimedia interplay of pictures with texts and music to present complex, sometimes contradictory, messages.

Prerequisites: jr, sr, 8 credits in art history or medieval studies, or permission of instructor

Notes: 1 meeting (3 hours)

(Spring) Seminar in Medieval Art: Illuminated Manuscripts of the Later Middle Ages
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
The decorated book was one of the most important forms of art making in the middle ages. This course presents an integrative approach to the study of these objects, taking into consideration their structure, text, pictorial and decorative programs, and bindings. We will investigate the patronage, production, use, and afterlife of a range of illuminated manuscripts in the later middle ages, including the continuous traditions of monastic and courtly book production, as well as the new development of urban manuscript industries by lay artisans.

Prerequisites: jr, sr, 8 credits in art history or medieval studies, or permission of instructor

Notes: 1 meeting (3 hours)
Instructors: C. Andrews

(Fall) Seminar in Baroque Art: Palaces and Identity in Early Modern Europe: 1450-1750
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This seminar explores the residence as the primary site of familial, institutional, and cultural identity formation. Using primary and modern texts, historical accounts, and theoretical tracts, we will analyze the form and function of urban dwellings at specific moments in European history. Starting with the palazzi of Florentine merchants in the Renaissance and ending up with the hôtels of eighteenth-century Parisian women, we will examine the ways in which architects took into account multiple concerns, from antiquity, vernacular tradition, and the need for material display, to gender and social roles, political status, and ceremonial uses.

Prerequisites: jr, sr, 8 credits in art history or permission of instructor

Notes: 1 meeting (3 hours)
Instructors: A. Jarrard

(Spring) Modern Art: The Work and Mythology of Vincent Van Gogh - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
In this seminar, we will explore the brief but productive career of Vincent van Gogh and the mythology that developed around him during and after his lifetime. We will look closely at Van Gogh's paintings, drawings, and writings, studying them in the context of such diverse issues as his relationship to Gauguin and other contemporary artists and movements, his attitude towards modernity, and his interest in Japanese art and culture. We will also
undertake a critical examination of the myth surrounding Van Gogh's life and work, discussing such themes as the modern artist as mad genius, quest for originality and immediacy in modern art, and Van Gogh's place in the international art market.

Prerequisites: jr, sr; (soph only with permission of instructor); 8 credits in art history, preferably including 241 or 244, or permission of instructor;

Notes: 1 meeting (3 hours);

Instructors: M. Foa

(Fall) Seminar in Twentieth-Century Art: Art of the 1960s - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

The seminar will explore the artistic directions and trends defining the 1960s in America, spanning the rise of minimalism, pop art, color field painting, video, and performance art to the emergence of conceptual art around 1968. While at aesthetic odds and thematic cross-purposes, these movements are visually unified by a certain cool, impersonal, and detached stylistic character. By examining the work of artists as well as key critical texts, works, and films, the 1960s will be probed for its cultural and social complexity, a decade that many now view as marking the end of modernism with a radical consciousness that inspired innovative artist forms.

Prerequisites: jr, sr, 8 credits in art history, or permission of instructor

Notes: 1 meeting (3 hours)

Instructors: D. Balken

Expected enrollment: 15

(Spring) Seminar in Twentieth-Century Art: Shudders! Photography Goes Public
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This seminar will explore the explosion of photography in 1930s America. The decade's photography is often epitomized by the heartrending images of the Great Depression, of social concern, of the traumas experienced by the poor and displaced. But in fact the period also witnessed photography's extraordinary vitality and new visibility, in the colorful pages of Life magazine and the tabloids, on the walls of MOMA, in experimental photobooks, at Photo League exhibitions, and much more. Among the major figures to be studied are photographers as diverse as Walker Evans, Weegee, and Aaron Siskind.

Prerequisites: jr, sr, or permission of instructor

ARTH-350-01 - Art History - 2008-2009
(Spring) Seminar in American Art: Skyscrapers
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Steel, elevators, money: skyscrapers are the quintessential creations of modern society, born out of sophisticated technological developments and the economic realities of commerce. In transfiguring the built environment, skyscraper designs establish unforgettable images of urban identity and corporate status. This seminar will explore the history of the tall building from its beginnings in mid-nineteenth-century America to current projects that circle the globe, from Chicago to Dubai to Shanghai.

Prerequisites: jr, sr, 8 credits in art history or architectural studies required with a course in modern architecture strongly recommended

Notes: 1 meeting (3 hours)

Instructors: M. Davis

Expected enrollment: 15

ARTH-360-01 - Art History - 2008-2009
(Fall) Seminar in Visual Cultures of Asia: Indian Photography
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Asian Studies 360f (01))
Explores the way photography seized hold of the imagination in India. Nineteenth-century documentary photographs of Indian ruins memorialized the reach of the British Empire when used for dioramas, panoramas, and magic lantern shows on the streets of London. By the twentieth century, manipulated photographs and mechanically reproduced "photos" of Indian gods complicated photography's claim to truth. Students will debate scholarly views and develop research projects to examine photography's imaginative uses in India.

Prerequisites: jr, sr, or permission of instructor; 8 credits in art history, Asian studies, or film studies, or permission of instructor

Notes: 1 meeting (3 hours), occasional screenings

Instructors: A. Sinha

Expected enrollment: 15

(Spring) Seminar in Asian Art: Bollywood Films

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Film Studies 370-01)

How are we to respond to Indian popular film, which is notorious for its distracting song and dance numbers, meandering story line, and visually overblown spectacles? This seminar will develop historical and theoretical approaches to Indian films as what scholar Lalitha Gopalan calls a "constellation of interruptions." Students will examine feature films in class, write critical papers on scholarly essays, and pursue independent research projects on various aspects of Indian film.

Prerequisites: jr, sr, 8 credits in art history, or film studies, or permission of instructor.

Notes: 1 meeting (3 hours), 1 screening (3 hours)

Instructors: A. Sinha

(Fall) Making Things: A Studio Arts Perspective

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

First-year seminar

This course introduces students to the studio experience as a creative act and shows them how they might experience a work of art. Through critiques, class discussion, visits to museums or galleries, and their own practical experience in the studio, students will examine many of the core issues in art, such as: How do we talk about visual physical objects? What role do materials play in the life of an object of art? What do we mean when we use the word "Art"?

(Fall) Topics in Studio Art II: Body and Space
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): Topics courses are offered each semester which are outside the realm of the usual course offerings, focusing on contemporary issues.
This course focuses on the issues surrounding body and space through installation, performance, and public arts projects. Students will explore the possibilities of body as an energetic instrument, while investigating the connotations of various spaces as visual vocabulary. As one uses one's own
body as an essential part of the expression, naturally the self becomes the reservoir. We will examine the transformational qualities of the body as the
conduit of gestural expression, which links conceptual and physical properties of materials, ideas, and space.

Introduction to Sanskrit, the classical language of India. Related to other Indo-European languages (including English) and the ancestor of most of the sixteen major Indian languages (e.g., Hindi), Sanskrit is the medium of the literary classics, and of the texts of the Hindu, Buddhist, and Jain religions. The first-semester course covers Sanskrit grammar. The emphasis is on sentence construction, recognition and production of grammatical forms, and making statements involving learned material. Reading materials (messages, personal notes, and short statements) contain formulaic greetings, courtesy expressions, queries about personal well-being, age, family, weather, and time. Students also learn to write frequently-used, memorized material, such as names and addresses.

(Fall) First Year Seminar: Stories and Storytelling in India - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
First-year seminar (Speaking- and writing-intensive; Taught in English)
India is a treasure house of tales and the home of vibrant traditions of storytelling in classical Sanskrit as well as in modern languages. Indian tales have been transmitted around the world and have parallels in such collections as The Arabian Nights and Chaucer’s Canterbury Tales. We will study, in English translation, the epics Rámâyana and Mahábhárata, animal fables, and women’s stories and folktales in a variety of forms including puppet plays, song,
and dramatic performance. We will examine who tells stories, why, and when, and we will compare Indian stories with tales from other parts of the world.

(Spring) Asian Religions: Sacred Hindu Narratives - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Taught in English; Religion 325)
Preamble (for topics courses): This course provides the opportunity for intensive study in Asian religious traditions. One of the traditions listed here is considered each time the course is offered. The student may therefore receive credit more than once. I. The Islamic Tradition II. History of Chinese Thought III. Japanese Religious Traditions IV. Hinduism
Telling, enacting, and listening to stories are essential modes of religious activity in the Hindu tradition. We will study the major types of sacred narrative in Hinduism, including creation myths, epic tales, stories of the gods, women's stories, and the lives of exemplary figures such as the saint-devotees of Shiva and Krishna. The tales will be examined from the perspectives of narrative structure and meaning in relation to forms of expression (e.g., the icon of the dancing Shiva, the Ramayana epic theater), and contexts (e.g., women's rites and the festival of the great Goddess).

*(Fall)* Love, Gender-Crossing, and Women's Supremacy: A Reading of *The Story of the Stone*
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Speaking- and writing-intensive; Taught in English)
A seminar on the eighteenth-century Chinese masterpiece *The Story of the Stone* and selected literary criticism in response to this work. Discussions will focus on love, gender-crossing, and women’s supremacy and the paradoxical treatments of these themes in the novel. We will explore multiple aspects of these themes, including the sociopolitical, philosophical, and literary milieus of eighteenth-century China. We will also examine this novel in its relation to Chinese literary tradition in general and the genetic conventions of premodern Chinese vernacular fiction in particular.
Prerequisites: Permission of instructor
Notes: 1 meeting (3 hours)
Instructors: Y. Wang
Expected enrollment: 15

**ASIAN-350-01** - Asian Studies - 2008-2009
*(Spring)* Love and the Erotic in Indian Poetry - *Not offered this year/term*
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Speaking-intensive; Taught in English; Gender Studies 333(09))
Seminar on the major themes, genres, and aesthetic conventions of love and the erotic in classical and medieval Indian poetry (in translation from Sanskrit, Tamil, Hindi, and other languages), in relation to theoretical texts, visual, performance genres (miniature paintings and dance). Study of the literary grammar of courtly love (aesthetic mood [rasa], landscape, the situations of love, the typologies of lovers), the transformation of classical conventions in Hindu bhakti and Sufi Muslim mystical poems, the Radha-Krishna myth, and love in folk genres. Focus on women as subjects and personae, and on the articulation of issues of gender, power, relationality, voice, and agency.
Prerequisites: Permission of Instructor
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: I. Peterson
Expected enrollment: 16

**Astronomy**

**ASTR-100-01** - Astronomy - 2008-2009
*(Fall)* Survey of the Universe
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
Discover how the forces of nature shape our understanding of the cosmos. Explore the origin, structure, and evolution of the earth, moons and planets, comets and asteroids, the sun and other stars, star clusters, the Milky Way and other galaxies, clusters of galaxies, and the universe as a whole.
Notes: The lecture for this course meets at the same time as the lecture for AST 101 but this course does not have a lab.
ASTR-100-01 - Astronomy - 2008-2009

ASTR-101-01 - Astronomy - 2008-2009
(Fall) Survey of the Universe with Lab
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Preamble (for topics courses): Students are expected to consistently attend one of the two sections of Astr-100 (TTh 11-12:15 or TTh 1:15-2:30) as the lecture portion of this course as well as the lab section.
Discover how the forces of nature shape our understanding of the cosmos. Explore the origin, structure, and evolution of the earth, moons and planets, comets and asteroids, the sun and other stars, star clusters, the Milky Way and other galaxies, clusters of galaxies, and the universe as a whole. 
In lab, learn the constellations and how to use the telescopes. Use them to observe celestial objects, including the moon, the sun, the planets, nebulae, and galaxies. Learn celestial coordinate and timekeeping systems. Find out how telescopes work.
Notes: 2 meetings (75 minutes) and 1 lab (3 hours). Designed for non-science majors. The lecture for this course meets at the same time as the lecture for AST 100.
Instructors: M. Dyar

ASTR-110-01 - Astronomy - 2008-2009
(Fall) Introduction to Astronomy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
A comprehensive introduction to the study of modern astronomy that explores the celestial bodies that inhabit the universe- planets, stars and galaxies- and examines the universe itself- its origin, structure, and ultimate destiny.
Prerequisites: Math 100 or 101 or the equivalent
Notes: The lecture for this course meets at the same time as the lecture for AST 100 and 101. Students in AST 110 attend lab and also must attend the 4th hour section. Problem sets and exams are different from those in AST 100 and 101 because they are calculus-based.

ASTR-220-01 - Astronomy - 2008-2009
(Spring) Special Topics in Astronomy: Bringing Astronomy Down to Earth: The Art of Communicating Science Through Electronic Media
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Intermediate level classes designed to introduce special topics in astronomy such as comets and asteroids, meteorites, and science and public policy, generally without prerequisites. Special offerings vary from year to year.
A scientifically well-informed public is not only crucial for the continued support of sciences but is a necessity in a democratic society dependent on science and technology. The course will introduce students to state of the art examples of science communication methods for the public. The students will learn how to use electronic tools, such as podcasts/vodcasts, animated gifs, digital films, to communicate the science behind some recent astronomical discoveries. Students will work in small teams on projects that integrate science writing with electronic tools to communicate key astronomical concepts.
Prerequisites: one course in a physical science or permission of instructor
Notes: Course will be taught at Hampshire College
Instructors: H. Crowl
Expected enrollment: 5

ASTR-220-02 - Astronomy - 2008-2009
(Spring) Special Topics in Astronomy: Astronomy and Public Policy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Intermediate level classes designed to introduce special topics in astronomy such as comets and asteroids, meteorites, and science and public policy, generally without prerequisites. Special offerings vary from year to year.
Astronomical issues that impact our society will be explored in a seminar format. The approach for each issue will be to pose a question based on a body of scientific evidence with potential consequences for human society. The answers to these questions will be investigated both on scientific and societal grounds. Scientific issues include the potential threat of collisions between the earth and other solar system bodies and the potential existence of extraterrestrial life.
Prerequisites: one course in a physical science or permission of instructor
Instructors: The department

ASTR-223-01 - Astronomy - 2008-2009
(Fall) Planetary Science
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement (Geology 223f)
This intermediate-level course covers fundamentals of spectroscopy, remote sensing, and planetary surfaces. Discussions will include interiors, atmospheres, compositions, origins, and evolution of terrestrial planets; satellites, asteroids, comets, and planetary rings.
Prerequisites: Math 100/101 and one semester of a physical science course
Notes: 1 meeting (140 minutes)
Instructors: M. Dyar
Expected enrollment: 25

ASTR-224-01 - Astronomy - 2008-2009
(Spring) Stars
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The basic observational properties of stars will be explored in an experimental format relying on both telescopic observations and computer programming exercises. No previous computer programming experience is required.
Prerequisites: Physics 115, Mathematics 202 and one astronomy course
Notes: 2 meetings (2 hours, 45 minutes); spring classes to be held at Smith College; alternates with Astronomy 225.
ASTR-225-01 - Astronomy - 2008-2009
(Spring) Galaxies and Dark Matter - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The role of gravity in determining the mass of the universe will be explored in an interactive format making extensive use of computer simulations and independent projects.
Prerequisites: Physics 115, Mathematics 202 and one astronomy course
Notes: 1 meeting (3 hours); will normally be taught at Smith College. alternates with Astronomy 224.
Instructors: The department
Expected enrollment: 25

ASTR-226-01 - Astronomy - 2008-2009
(Fall) Cosmology
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The course introduces cosmological models and the relationship between models and observable parameters. Topics in current astronomy that bear upon cosmological problems will be covered, including background electromagnetic radiation, nucleosynthesis, dating methods, determinations of the mean density of the universe and the Hubble constant, and tests of gravitational theories. We will discuss questions concerning the foundations of cosmology and its future as a science.
Prerequisites: Mathematics 101 and a physical science course
Notes: 2 meetings (75 minutes); fall 2008 classes to be held at Amherst
Instructors: G. Greenstein
Expected enrollment: 12

ASTR-229-01 - Astronomy - 2008-2009
(Spring) Astrophysics I: Stars and Galaxies
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
A calculus-based introduction to the properties, structure, formation and evolution of stars and galaxies. The laws of gravity, thermal physics, and atomic physics provide a basis for understanding observed properties of stars, interstellar gas, and dust. We apply these concepts to develop an understanding of stellar atmospheres, interiors, and evolution, the interstellar medium, and the Milky Way and other galaxies.
Prerequisites: Physics 115, Physics 216 or concurrent enrollment, and Math 202
Notes: 2 meetings (75 minutes)
Instructors: J. Levine

ASTR-330-01 - Astronomy - 2008-2009
(Fall) Seminar: Topics in Astrophysics: Mars
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): In-class discussions will be used to formulate a set of problems, each designed to illuminate a significant aspect of the topic at hand. The problems will be difficult and broad in scope: their solutions, worked out individually and in class discussions, will constitute the real work of the course. Students will gain experience in both oral and written presentation. Topics vary from year to year.
Exploration of several unresolved questions about the Red Planet, such as 1) Where was the water on Mars and where did it go? How well will future missions answer this question? 2) How has the martian atmosphere evolved over time? 3) What rock types are present on the martian surface based on meteoric studies vs. direct observation? 4) How can geomorphic features of Mars best be interpreted, and what do they tell us about the evolution of the planet? and 5) Was there life on Mars at any time? Is there life on Mars at present, and if so, where? An interactive seminar with students and faculty reading current papers from the literature as well as daily reports from current mission Web sites.

Mount Holyoke College Course Information Archive 2000-2016
Prerequisites: any intermediate-level astronomy or geology course; AST/GEO 223 recommended
Notes: 1 meeting (3 hour)
Instructors: D. Dyar

ASTR-330-01 - Astronomy - 2008-2009
(Spring) Topics in Astrophysics: Cosmology
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): In-class discussions will be used to formulate a set of problems, each designed to illuminate a significant aspect of the topic at hand. The problems will be difficult and broad in scope; their solutions, worked out individually and in class discussions, will constitute the real work of the course. Students will gain experience in both oral and written presentation. Topics vary from year to year.
A survey of topics relevant to cosmology: orbits and masses; stellar spectra and the chemical composition of the "ordinary matter" in the universe; and the astronomical distance scale. The course will cover the two fundamental observations of cosmology: Hubble's "law" and the Cosmic Microwave Background Radiation. We will also explore cosmological models: big bang and steady state; Newtonian cosmology and relativistic modification; dark matter; dark "energy"; and the early universe. We will discuss unsolved problems and prospects for the future. Readings, discussion, and problem assignments, including projects and problems to be completed with Mathematica or similar software.
Prerequisites: Physics 115-216 or 103-204; Math 202 or Math 100B; some experience in computer programming.
Notes: 2 meetings (75 minutes)
Instructors: T. Dennis

ASTR-330-03 - Astronomy - 2008-2009
(Fall) Seminar: Topics in Astrophysics: Asteroids - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): In-class discussions will be used to formulate a set of problems, each designed to illuminate a significant aspect of the topic at hand. The problems will be difficult and broad in scope; their solutions, worked out individually and in class discussions, will constitute the real work of the course. Students will gain experience in both oral and written presentation. Topics vary from year to year.
This course will cover the relationship of asteroids and meteorites. Topics that will be discussed include how asteroids and meteorites are classified, spectroscopic measurements of asteroids, and how meteorites are transferred from asteroids to the Earth. No prior knowledge of asteroids or meteorites will be assumed.
Prerequisites: any 200 level astronomy or geology course
Notes: 1 meeting (3 hours)
Instructors: The department
Expected enrollment: 18

ASTR-335-01 - Astronomy - 2008-2009
(Fall) Astrophysics II: Stellar Structure
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
How do astronomers determine the nature and extent of the universe? Centering around the theme of the "Cosmic Distance Ladder," we explore how astrophysics has expanded our comprehension to encompass the entire universe. Topics include: the size of the solar system; parallactic and spectroscopic distances of stars; star counts and the structure of our galaxy; Cepheid variables and the distances of galaxies; the Hubble Law and large-scale structure in the universe; quasars and the Lyman-Alpha Forest.
Prerequisites: Astronomy 229 or instructor approval
Notes: 2 meetings (75 minutes); fall 2008 classes to be held at UMass
Instructors: G. Wilson
Expected enrollment: 25

ASTR-337-01 - Astronomy - 2008-2009
(Spring) Observational Techniques in Optical and Infrared Astronomy
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
An introduction to the techniques of gathering and analyzing astronomical data, particularly in the optical and infrared. Telescope design and optics will be discussed, along with instrumentation for imaging, photometry, and spectroscopy. Topics will include astronomical detectors, computer graphics and image processing, error analysis and curve fitting, and data analysis and astrophysical interpretation, with an emphasis on globular clusters.
Prerequisites: at least one 200-level astronomy course
Notes: 2 meetings (75 minutes)
Instructors: J. Lowenthal

ASTR-352-01 - Astronomy - 2008-2009
(Spring) Astrophysics III: Galaxies and the Universe
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Advanced course covering physical processes in the gaseous interstellar medium, including photoionization in HII regions and planetary nebulae, shocks in supernova remnants and stellar jets, and energy balance in molecular clouds. Dynamics of stellar systems, star clusters, and the virial theorem will also be discussed, along with galaxy rotation and the presence of dark matter in the universe, as well as spiral density waves. The course concludes with quasars and active galactic nuclei, synchrotron radiation, accretion disks, and supermassive black holes.
Prerequisites: astronomy 335 or two physics courses at the 200 or 300 level
Notes: 2 meetings (75 minutes); spring 2009 classes to be held at UMass
Instructors: H. Mo
Expected enrollment: 25

BIOCH-311-01 - Biochemistry - 2008-2009
Protein Biochemistry and Cellular Metabolism

This course is a rigorous introduction to the study of protein molecules and their role as catalysts in the cell. Topics include general principles of protein folding, protein structure-function correlation, enzyme kinetics and mechanism, carbohydrate and lipid biochemistry, and metabolic pathways (catabolic and anabolic) and their interaction and cross-regulation. Biological transformation of energy is considered in light of the principles of thermodynamics.

Prerequisites: Biological Sciences 210 (can be taken concurrently), Chemistry 302

Notes: 3 meetings (75 minutes), 1 lab (4 hours)

Instructors: L. Hsu

Section Instructors: 01 LAB L Hsu | 02 LAB L Hsu | 03 LAB L Hsu |

Nucleic Acids Biochemistry and Molecular Biology

This course is an in-depth examination of DNA and RNA structures and how these structures support their respective functions during replication, transcription, and translation of the genetic material. Emphasis is on the detailed mechanisms associated with each step of gene expression.

Discussions incorporate many recent advances brought about by recombinant DNA technology.

Prerequisites: Biological Sciences 210, Chemistry 302, Biochemistry 311, or permission of instructor

Notes: 3 meetings (75 minutes), 1 lab (4 hours)

Instructors: K. Mix

Section Instructors: 01 LAB TBA | 02 LAB TBA |

Topics in Biochemistry and Molecular Biology - *Not offered this year/term

This course each year examines a number of important and exciting topics in biochemistry, molecular biology, and other related fields of biology. The intellectual and research development that formulated these fundamental concepts is traced through extensive readings of the primary literature.

Discussions emphasize the critical evaluation of experimental techniques, data analysis, and interpretation. Substantial student participation in the form of oral presentation is expected.

Prerequisites: Biochemistry 311, 314, or permission of instructor

Notes: 1 meeting (2 hours, 30 minutes)

Instructors: L. Hsu

Independent Study

Independent work in biochemistry can be conducted with any member of the biochemistry committee and, upon approval, also with other members of the biological sciences and chemistry departments.

Biological Sciences

Introductory Biology: Nature Harmoniously Confus'd
Most organisms are notably unlike ourselves—a tapestry of bacteria, protozoans, algae, and, off by themselves, the plants, fungi, and other animals. We will survey the whole range of organisms, especially those in the ponds and forests of our campus. Labs will start in the field, offering many opportunities for wet or muddy work. The class is addressed to students intrigued by natural history; it might be useful for students interested in further study of the environment.

Prerequisites: fy

**BIOL-145-01** - Biological Sciences - 2008-2009

*(Spring)* Introductory Biology: Physiological Ecology

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

As our climate changes on global scales, we need to explore how such changes will affect living things. This course will explore how physiological functions (such as metabolism, photosynthesis, and temperature regulation) drive the behavior (such as habitat selection and foraging) and ecology (such as competition and predator/prey interactions) of plants and animals in the context of their environment. Through laboratory sessions, research projects, and other oral and written assignments, students will gain experience with experimental design, data analysis and interpretation, and presentation of scientific results.

**BIOL-145-02** - Biological Sciences - 2008-2009

*(Fall)* Introductory Biology: Diversity of Life

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

We will survey the great diversity of life on earth from the archaeabacteria that live in hot sulfur springs to giant sequoia trees to singing birds. Labs will explore biological diversity via collecting trips around campus as well as laboratory experiments and will introduce students to data collection, manipulation, and analysis.

Prerequisites: fy or permission of instructor

*(Fall)* Introductory Biology: Organismal Biology

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course encompasses a broad range of concepts central to our understanding of how organisms function and evolve. We will investigate important biological processes, such as photosynthesis and metabolism, and of systems, such as the cardiovascular and immune systems. We will also take a holistic view of biology and use our newly acquired knowledge to explore such diverse topics as: the evolution of infectious diseases, the consequences of development and design on the evolution of organisms, and how the physiology and behavior of animals might affect their responses to global climate change.

**BIOL-145-04** - Biological Sciences - 2008-2009

*(Fall)* Introductory Biology: Model Organisms

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

(Writing-intensive)

Organisms evolve elegant means of adapting to their environments. This course will focus on the ways that an organism's anatomy and physiology are uniquely suited to the demands of its environment. The course is divided into topical modules that include: communication, movement, zoology and diversity, evolution, cellular structure and function, reproduction, and neuroscience. The course provides a broad introduction to topics in biology, but special consideration is given to the physiology of model organisms commonly used in research.
