This course will focus on the behavior of animals in their natural environment. To understand how and why animals behave the way they do, we will study how: neurons, muscles and sensory systems function; animals differentiate into males and females and the influence of hormones on their adult behavior; biological rhythms that track environmental changes are controlled; behavior allows animals to find food, avoid predators, and attract mates; and behavior varies between species and has evolved over time. Field and laboratory exercises will explore these different approaches.

(Fall) Introductory Biology: Form and Function - *Not offered this year/term  
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement  
By exploring some of the basic structural and functional systems found in plants and animals, this course will examine assorted strategies that organisms have evolved to solve life's "major problems." Topics will include energy acquisition, water balance, transport systems, and movement. Labs will introduce students to selected plant and animal systems, data collection and analysis, library resources, and scientific writing.

(Fall) Introductory Biology: Diversity of Life - *Not offered this year/term  
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement  
We will survey the great diversity of life on earth from the archaebacteria that live in hot sulfur springs to giant sequoia trees to singing birds. In our survey, we will discover a variety of life cycle patterns, different ways of extracting energy from the environment, and multiple life history strategies. Labs will explore biological diversity via collecting trips around campus as well as laboratory experiments and will introduce students to data collection, manipulation, and analysis.

BIOL-160-01  - Biological Sciences  - 2008-2009  
(Fall) Integrated Introduction to Biology and Chemistry  
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement  
This 8-credit course serves as a gateway to both the biology and chemistry core curricula. The course introduces and develops fundamental concepts in chemistry while also exploring the diverse range of strategies adopted by living systems to survive in different environments. This course prepares students for further study in chemistry (Chemistry 201) and/or biology (Biology 200). Students must register for both Biology 160 and Chemistry 160 as well as a single lab section (listed under Chemistry 160). Recommended for students interested in completing pre-health requirements or advanced study in biochemistry or neuroscience.  
Notes: Students must enroll in Biology 160 and Chemistry 160 for a total of 8 credits; 3 lectures (50 minutes), and 1 lab (4 hours) per week.  
Instructors: G. Gillis, D. Cotter
Expected enrollment: 48

**BIOL-164-01 - Biological Sciences - 2008-2009**
(January) Ethnobotany

Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.

This course will focus on the study of medicinal plants and on the process of discovering new natural products from plants using an ethnobotanical approach. Students will be given extended information about world ethnobotanical traditions. They will learn about plant taxonomy, plant geography, chemistry of medicinal plants, and methods for the isolations of active constituents. In addition, problems of conservation ecology of the rainforests and endangered plant species will be discussed.

(Spring) Introductory Biology II: How Organisms Develop

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

An overview of cells to tissues to organisms. Cellular components, the role of the nucleus, cell reproduction, and meiosis will be examined as part of our study of gamete production, fertilization, embryology, and development in an invertebrate (sea urchin), a vertebrate (chick), a fern, and a flowering plant. The basic molecular biology of DNA, RNA, and protein synthesis will be presented and examined in the context of building a fly embryo and a flower.

**BIOL-220-01 - Biological Sciences - 2008-2009**
(Spring) Cell Biology

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course undertakes an integrated study of the processes and structures that define life at the cellular level. We will consider the molecular and supramolecular organization of membranes, cytoskeleton, and organelles in the context of the physical and chemical principles governing their assembly, and their participation in phenomena such as the capture and transformation of energy, catalysis, transport, motility, signal transduction, and maintenance of cytoplasmic organization. The laboratory portion of this course illustrates and analyzes these phenomena through selected optical and biochemical approaches.

Prerequisites: Biological Sciences 200, Chemistry 201 (can be taken concurrently)

Notes: 2 meetings (75 minutes), 1 meeting (50 minutes), 1 lab (3 hours)
Instructors: O. Quintero, S. Stranford

BIOL-223-01 - Biological Sciences - 2008-2009
(Fall) Ecology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Preamble (for topics courses): Biol. 223 and/or Biol. 226 must be taken for the Biology major.
This course will cover the fundamental factors controlling the distribution and abundance of organisms, including interactions with the abiotic environment, fitness and natural selection, population growth and dynamics, species interactions, community dynamics, and diversity. We will address variation across space and time. The course will combine observational, experimental, and mathematical approaches to some of the applications of ecological theory, including conservation, disease dynamics, and biological control.
Prerequisites: Biology 145, 150 or Environmental Studies 100 and a minimum of one semester of high school or college calculus or statistics
Notes: 2 (75 minutes) meetings, plus 4th hour, 1 lab (3 hours)
Instructors: M. Hoopes

BIOL-225-01 - Biological Sciences - 2008-2009
(January) The Structure of Memory
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Neuroscientists and psychologists have made great strides in the understanding of human memory in the past few years. It is now possible to get a fairly good basic understanding of how different kinds of memory systems work. Through daily class meetings, assignments, games, and exercises, this course will provide information about the several different memory systems that reside in your brain. You may not end up with a better memory, but you will at least understand why you forget.
Notes: Monday - Thursday (90 minutes)
Instructors: C. Smith
Expected enrollment: 40

BIOL-226-01 - Biological Sciences - 2008-2009
(Spring) Evolution
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
The mechanisms of evolutionary change within populations and between species; patterns of change in space, time and form; and the origin of adaptations. These approaches make sense of the diversity of life; then we turn to the evolution of developmental pathways, as a way of approaching the unity of life.
Prerequisites: Biology 210 or 223
Notes: 3 meetings (50 minutes), 1 lab (3 hours); seniors may only take lab on Friday; sophomores and juniors on either Tuesday, Wednesday or Thursday only

(Spring) Animal Cloning, Stem Cells and Regenerative Medicine: Past, Present, and Future
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This course will look at the current state of mammalian cloning and the debates about human stem cell research, reading from primary literature. We will study adult, embryonic, and induced pluripotent stem cells. We will discuss the legal, ethical, and moral implications of using these cells in medical therapies, and each member of the class will participate in a staged debate on these issues for an introductory biology class. Pending funding, we may attend a conference on stem cell biology in Connecticut, or travel to Washington, D.C.

**(January) Research Studies in Acquired Immune Deficiency - *Not offered this year/term**

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

(Laboratory-intensive course) This course will focus on laboratory experiments and primary literature related to animal models of AIDS. Students will learn how to read and interpret data related to immune deficiency research and will have the opportunity to conduct original experiments aimed at identifying genes that control susceptibility to murine acquired immune deficiency, a model system used to study human AIDS. Students will be expected to work in collaborative groups to: 1) conduct inquiry-based laboratory experiments, 2) present relevant primary and secondary literature and, 3) discuss their experimental findings in light of original research studies in the field.

Prerequisites: Biological Sciences 319 or permission of the instructors

Notes: January 12-22, 3+ hours per day

Instructors: S. Stranford, S. Bakkour

**(Spring) Darwin**

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Writing-intensive; History 361s (02))

This course looks at the scientific content and intellectual context of Darwin's theory of evolution - his facts, metaphors, hypotheses, and philosophical assumptions. Readings from Darwin and his sources, and examination of the organisms he studied. A background in eighteenth- and nineteenth-century history or whole organism biology is recommended.

Prerequisite: Biological Sciences 223 or 226 or 4 credits in history

Notes: 2 meetings (75 minutes), plus one 4th hour meeting

(Spring) Nucleic Acids Biochemistry and Molecular Biology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Biochemistry 314f; Chemistry 314f)
This course is an in-depth examination of DNA and RNA structures and how these structures support their respective functions during replication, transcription, and translation of the genetic material. Emphasis is on the detailed mechanisms associated with each step of gene expression. Discussions incorporate many recent advances brought about by recombinant DNA technology.
Prerequisites: Biological Sciences 210, Chemistry 302, Biochemistry 311, or permission of instructor
Notes: Please sign up for this course as Biochemistry 314
Instructors: K. Mix
Section Instructors: 01 LAB The department | 02 LAB The department |

BIOL-315-01 - Biological Sciences - 2008-2009
(Spring) Behavioral Ecology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Writing-intensive)
In this course, students learn to view and understand animal behavior within an evolutionary context. The mechanistic side of behavior is investigated and students explore how behavioral traits originate and evolve over time. Students will integrate their knowledge of how organisms work with an appreciation of why they work the way they do. At the end of the course, students will understand basic concepts in behavioral biology and know many of the experiments that have facilitated our understanding of this field. They will be able to construct hypotheses and design experiments that address behavioral phenomena. The laboratory portion of this course is based on individual projects.
Prerequisites: 8 credits of biology at the 200 level with 223 or 226 strongly recommended
Notes: 2 meetings (75 minutes) plus one 4th hour, 1 lab (3 hours)
Instructors: D. Pope
Section Instructors: 01 LAB D Pope | 02 LAB D Pope |
Expected enrollment: 24

BIOL-316-01 - Biological Sciences - 2008-2009
(Fall) Scanning Electron Microscopy
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Geology 316f)
Includes theory and operation of the scanning electron microscope and preparation of biological and geological materials for observation. The versatile use of the microscope will be emphasized and will include low magnification, high resolution, and back scattered (reflected) electron modes of operation as well as operation at different pressures. Energy dispersive X-ray microanalysis will be introduced.
Prerequisites: 4 credits of biological sciences or geology course at the 200 level.
Notes: 1 meeting (2 hours), 1 lab (3 hours)
Instructors: M. Rice, (Quintero)
Section Instructors: 01 LAB M Rice |
Expected enrollment: 10

BIOL-319-01 - Biological Sciences - 2008-2009
(Fall) Immunology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course will cover the cells, organs, and biochemical signals that constitute the immune system, as well as immune mechanisms for the identification and removal of foreign pathogens. Additional topics may include: autoimmunity, allergy, vaccination, transplantation, immune deficiency, and pathogen evasion strategies. Special emphasis will be placed on the human immune response, with the addition of clinical case studies and independent laboratory projects to reinforce these ideas.
Prerequisites: Biological Sciences 210 and 220
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes), 1 lab (4 hours)
Instructors: S. Stranford
Section Instructors: 01 LAB S Stranford | 02 LAB S Stranford |
Expected enrollment: 28
BIOL-320-01 - Biological Sciences - 2008-2009
(Fall) Introduction to Transmission Electron Microscopy
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Basic principles of transmission electron microscopy (TEM) and potential uses in biological studies. Each student selects a project and learns the fundamentals of specimen preparation, operation of the TEM, and image acquisition. Assessment and interpretation of the resulting electron micrographs culminates in an individual portfolio. Students wishing to extend their experience in other courses, including Biological Sciences 295 and 395, may enroll in this course concurrently.
Prerequisites: Biological Sciences 220
Notes: 1 meeting (2 hours), 1 unarranged lab (2 hours)
Instructors: O. Quintero, S. Lancelle, M. Rice
Section Instructors: 01 LAB S. Lancelle, M. Rice
Expected enrollment: 8

BIOL-321-01 - Biological Sciences - 2008-2009
(Fall) Conference Course: Computational Techniques in Biology
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.
We will explore how mathematics can be used to better understand the phenomena of natural science (e.g., aggregation in bird flocking and fish schooling, noise patterns in neural coding, and voice recognition of newborns). An appreciation for quantitative concepts is important, but mathematical expertise is not required. Principles will be introduced in the context of behavior and physiology. The course will involve loosely equal components of discussion and student-guided lectures.
Prerequisites: 8 credits of biological sciences
Notes: 1 meeting (2 hours)
Instructors: J. Krans
Expected enrollment: 12

BIOL-321-01 - Biological Sciences - 2008-2009
(Spring) Conference Course: Emerging Infectious Diseases - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking-intensive)
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.
What is the current state of infectious disease in the world? What are the important factors that favor the emmergence or reemergence of specific infectious agents? In this course the primary literature will be used as a foundation for discussing global emerging and re-emerging infectious diseases. As a group we will discuss the science behind these diseases and their therapies as well as some of the social aspects relevant to the present day spread of infectious disease. Students will be expected to work in collaborative groups to present background material and original research findings relevant to these pathogens and the diseases they cause.
Prerequisites: Biological Sciences 319, or permission of instructor
Notes: 1 meeting, 3 hours
Instructors: S. Stranford
Expected enrollment: 12

BIOL-321-02 - Biological Sciences - 2008-2009
(Fall) Conference Course: The Neurobiology of Art and Music
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.
Art and music are a part of all human cultures. Is there something about the human brain that drives us to paint and sing? We will examine how the brain simultaneously processes different aspects of a visual object, such as shape, color, and depth, and ask how this processing may affect the way we draw and paint. We will ask whether musical dissonance and consonance are biologically or culturally determined and whether or not different parts of the brain process different aspects of music such as pitch, melody, harmony, rhythm, and the emotional content of a musical piece.
Prerequisites: seniors with at least 8 credits at the 200 level in biology, neuroscience and behavior, studio art, art history, or music
Instructors: S. Barry
Expected enrollment: 10

BIOL-321-05 - Biological Sciences - 2008-2009
(Spring) Conference Course: Marine Conservation Biology - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Speaking- and writing-intensive)
This seminar course will be based entirely on published research related to issues in marine conservation biology. It will focus primarily on the most recent data on global climate change, but the course will also address other topics such as waste disposal, the management of fisheries, and invasive species. A semester-long group project will be conducted by the class, in which students will research and defend a stakeholder's position in a current environmental affair, submit a position paper, and engage in a debate near the end of the semester. Students taking this course will have in-depth, up-to-date knowledge of the research that informs our understanding of global environmental change.

Prerequisites: Biological Sciences 223 or 226
Notes: 1 meeting (110 minutes)
Instructors: R. Brodie
Expected enrollment: 15

BIOL-321-06 - Biological Sciences - 2008-2009
(Fall) Conference Course: Extreme Life - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This course will focus on biological systems that push the limits of structural and physiological possibility. For example, midges flap their wings at up to 1000 Hz; bar-headed geese migrate over Mount Everest; deep-sea fish withstand pressures near 300 atmospheres; certain frogs can allow their body temperatures to drop below 0 degrees C. We will explore the diverse mechanisms that underlie how organisms reach extreme levels of performance and survive in extreme environments through readings and discussions.
Prerequisites: jr, sr or permission of instructor
Notes: One meeting (2 hours)
Instructors: G. Gillis
Expected enrollment: 12

BIOL-321-06 - Biological Sciences - 2008-2009
(Spring) Conference Course: Careers in Biotechnology - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This course will explore career opportunities in the biotechnology industry. We will cover a range of research areas such as pharmaceuticals, immunology, or environmental biology. Other topics include some basics on structure and funding of companies and kinds of opportunities that exist for scientists with bachelor's or graduate degrees. We will hear about current research in local companies from guest speakers.
Prerequisites: Biological Sciences 210; Biological Sciences 220 and 319 recommended but not required
Notes: 1 meeting, 2 hours
Instructors: A. Springer
Expected enrollment: 24

BIOL-322-01 - Biological Sciences - 2008-2009
(Spring) Comparative Biomechanics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
The main objective of this course is to explore organismal structure and function via an examination of the basic physical principles that guide how living things are constructed and how organisms interact with their environment. We will use the combined approaches of the biologist and engineer to study the impact of size on biological systems, address the implications of solid and fluid mechanics for animal design, survey different modes of animal locomotion, and learn how biologists working in diverse areas (e.g., ecology, development, evolution, and physiology) gain insight through biomechanical analyses.
Prerequisites: any two courses above Biology 200 or permission of instructor.
Notes: 2 meetings (75 minutes), 1 lab (3 hours) with 12 per lab
Instructors: G. Gillis
Section Instructors: 01 LAB G Gillis | 02 LAB G Gillis |
Expected enrollment: 24

BIOL-323-01 - Biological Sciences - 2008-2009
(Fall) Plant Growth and Development - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is a study of the higher plant, its structure, organization, and development. Examines both endogenous and environmental factors influencing plant growth and reproduction. Topics include anatomy, hormones and their mode of action, tropisms, photomorphogenesis, and flowering.
Prerequisites: Biology 150, 200, 210 or permission of instructor.
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: A. Frary
BIOL-324-01 - Biological Sciences - 2008-2009
(Fall) Cytoskeleton and Cell Motility
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking-intensive)
An exploration of the prokaryotic and eukaryotic cytoskeleton with a particular focus on protein filaments and motors involved in a number of cellular processes, including: intracellular transport, cell motility, and chromosomal segregation. The course will include explorations into current research in the cytoskeleton via extensive use of the primary literature and review articles. Substantial student participation in the form of oral presentation is expected.
Prerequisites: Biological Sciences 220
Notes: 2 meetings (75 minutes) plus one 4th hour meeting
Instructors: O. Quintero
Expected enrollment: 20

BIOL-325-01 - Biological Sciences - 2008-2009
(Fall) Plant Diversity and Evolution - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course explores the tremendous diversity of the plant kingdom, emphasizing the local flora. Evolutionary relationships are discussed on the basis of comparisons of reproductive biology, morphology, anatomy, cell structure, and molecular biology.
Prerequisites: two of Biological Sciences 200, 210, 223 or 226, or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours); offered alternate years
Instructors: A. Frary

BIOL-327-01 - Biological Sciences - 2008-2009
(Spring) Microbiology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is a general study of microorganisms and their activities, including form and structure; biochemical processes of growth, metabolism, and energy storage; distribution in nature and relationships to other organisms; cycles of matter; beneficial and detrimental effects on humans; and physical and chemical effects microorganisms make in their environment.
Prerequisites: Biological Sciences 220 or 311 and either 210 or 223
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: J. Knight

BIOL-328-01 - Biological Sciences - 2008-2009
(Spring) Regulatory and Integrative Human Physiology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
We will investigate the fundamental processes by which human body systems function, and how they can be modified to enable the individual to live in a changing environment. We will pay particular attention to how different body systems are integrated with one another, and to the cellular and molecular mechanisms which make this functional integration possible.
Prerequisites: Biological Sciences 220 or Biochemistry 311
Notes: 3 meetings (50 minutes) and 1 lab
Instructors: TBA

BIOL-331-01 - Biological Sciences - 2008-2009
(Spring) Theory and Application of Conservation Biology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course focuses on advanced ecological theory applied to conservation. Class will combine lectures and discussions of primary scientific literature. Labs will include field trips to collect observational and experimental data and indoor exercises to explore the concepts of rarity, coexistence, and population viability with mathematical models. A community-based learning aspect is possible for the final project in this class.
Prerequisites: Biology 223 or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)

BIOL-332-01 - Biological Sciences - 2008-2009
(Fall) Macroevolution
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course presents the science of biological form and its relation to adaptation, development, and the modes of evolutionary change. Emphases include primary theoretical literature, whole organisms, the emerging field of evolutionary developmental biology, and major transitions in vertebrate evolution.
Prerequisites: Biological Sciences 226 and permission of instructor
Notes: 2 meetings (75 minutes), 4th hour
Instructors: S. Kachootin
Expected enrollment: 15

BIOL-333-01 - Biological Sciences - 2008-2009
(Spring) Neurobiology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
We will study the electrical and chemical signals underlying the generation of the nerve impulse and synaptic transmission. We will then explore neuronal circuits underlying learning and memory, movement, and sensory perception.
Prerequisites: Biological Sciences 200, 220 and 4 credits in chemistry or physics
Notes: 2 meetings (75 minutes) and 1 lab (3 hours); preference given to seniors
Instructors: S. Barry
Section Instructors: 01 LAB S Barry | 02 LAB S Barry |
Expected enrollment: 24

BIOL-335-01 - Biological Sciences - 2008-2009
(Spring) Mammalian Anatomy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course will examine the fundamental structural organization of the mammalian body. The lecture portion of the class will focus largely on humans, and students will gain practical insight into other mammalian systems in the laboratory.
Prerequisites: any two courses above Biological Sciences 200
Notes: 3 meetings (50 minutes); 1 lab (3 hours); course open to 12 juniors and 12 seniors
Instructors: G. Gillis
Section Instructors: 01 LAB B Taft | 02 LAB B Taft |
Expected enrollment: 24

BIOL-340-01 - Biological Sciences - 2008-2009
(Spring) Eukaryotic Molecular Genetics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
In this course we will examine the role of molecular genetic analysis in the study of phenomena such as human disease (e.g., breast cancer), animal development, and gene regulation. We will also study genetic engineering of plants and animals. There will be group discussions of original research articles and review articles.
Prerequisites: Biological Sciences 200 and 210
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: C. Woodard
Section Instructors: 01 LAB C Woodard | 02 LAB C Woodard |
Expected enrollment: 24

BIOL-344-01 - Biological Sciences - 2008-2009
(Spring) Biogeochemistry of Northern Ecosystems
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking- and writing-intensive; Environmental Studies 344s)
Global climate models and recent evidence show that ecosystems in the northern latitudes are extremely sensitive to climate change. This interdisciplinary science course examines boreal, subarctic, and arctic ecosystems through the study of nutrient cycling, plant ecology, hydrology, soil processes, and biosphere-atmosphere interactions. Topics include fundamentals of biogeochemical elements such as carbon and nitrogen at scales from the microscopic to global, sensitivity, feedbacks to climate change, and disturbance processes such as fire and permafrost degradation.
Prerequisites: At least two semesters of biology, chemistry, or environmental science, and permission of the instructor
Notes: 1 meeting (3 hours). Please sign up for this course as Environmental Studies 344
Instructors: J. Bubier
Expected enrollment: 15
BIOL-395-01 - Biological Sciences - 2008-2009
(Fall) Independent Study
Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement.
Prerequisites: jr, sr, and permission of department; submit application in biological sciences office or via the department's Web site
Notes: NOTE: See safety training restrictions in description of Biological Sciences 295
Instructors: The department
Expected enrollment: 30

Chemistry

CHEM-101-01 - Chemistry - 2008-2009
(Fall) General Chemistry I
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course provides introduction and development of fundamental concepts including stoichiometry, reactions in aqueous solutions, thermochemistry, atomic structure, chemical bonding, and acid-base reactions. The laboratory emphasizes basic skills, quantitative chemical measurements, and principles discussed in lectures.
Notes: 3 meetings (75 minutes), 1 lab (3 hours)

CHEM-105-01 - Chemistry - 2008-2009
(Fall) Chemistry: Applications, Innovations, and Social Justice
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
First-year seminar (Speaking- and writing-intensive)
The interactions of light, energy, and matter will be explored as they relate to various instrumental methods and applications. In forensic science, what is the chemistry used in identification? How does chemistry shed light on the use of DNA as an identification tool? Does chemistry directly support the health claims of organic foods? What does the chemistry of the nuclear reactor spill at Chernobyl tell us about the wisdom of producing new nuclear reactors? Guest speakers and readings will complement course assignments. The course will introduce students to problem solving as well as scientific writing.

Prerequisites: fy or permission of instructor

Notes: There is no lab component to this course. 2 meetings (75 minutes)

Instructors: C. Allen

Expected enrollment: 16

CHEM-201-01 - Chemistry - 2008-2009
(Spring) General Chemistry II

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course provides background in basic principles of physical, analytical, and inorganic chemistry essential to the study of all chemical phenomena. Topics include elementary principles of molecular electronic structure, quantitative treatment of chemical equilibrium with applications to solubility, acid-base, and electron transfer reactions, introduction to chemical kinetics and thermodynamics, and the chemistry of coordination compounds. Laboratory experiments will include classical analytical and kinetic techniques, preparation of inorganic compounds, and an introduction to ab initio electronic structure calculations.

Prerequisites: Chemistry 100, 101, or 160 with grade of C or better, or permission of instructor

Notes: 3 meetings (75 minutes), 1 lab (3 hours)

Instructors: The department

CHEM-202-01 - Chemistry - 2008-2009
(Fall) Organic Chemistry I

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

Introduces organic chemistry, emphasizing the principles governing broad classes of reactions. Topics include stereochemistry, nucleophilic substitution and elimination reactions, the chemistry of alkanes, alkenes, alkynes, alcohols, and ethers, and an introduction to infrared and nuclear magnetic resonance spectroscopy. Laboratory work includes synthesis, practice in the techniques of distillation, crystallization, chromatography, molecular modeling, and identifying unknown organic compounds by chemical and spectroscopic means.

Prerequisites: Chemistry 201 with grade of C or better, or permission of instructor

Notes: 3 meetings (75 minutes), 1 lab (3 hours)

Instructors: D. Hamilton

Prerequisites: Chemistry 201 with grade of C or better, or permission of instructor
CHEM-212-01 - Chemistry - 2008-2009
(Fall) Chemistry of Biomolecules - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
An examination of the major ideas of biochemistry from the point of view of the chemical sciences rather than the life sciences. Structures of important biomolecules. The role of energetics and reaction dynamics in biochemical processes. Major metabolic pathways are considered, including those of proteins, carbohydrates, lipids, and nucleic acids. This course is not intended for Biochemistry majors, who must complete Biochemistry 311f and 314s. First priority will be given to sophomores and juniors.
Prerequisites: Chemistry 202
Expected enrollment: 25

CHEM-232-01 - Chemistry - 2008-2009
(Fall) Global Biogeochemistry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
This course will examine the chemistry of the surface of the Earth. Our planet is basically a closed system, and chemical cycles of certain elements are driven by biological and geological processes which, in turn, determine the distribution and nature of life on Earth. We will study the chemistry of the atmosphere, soils, rivers, and oceans and look at how these systems are connected via the global nitrogen, phosphorus, and carbon cycles. We will especially focus on the carbon cycle and examine how humans have altered the distribution of this central element. Lecture sessions will be complemented by reading-based discussions.
Prerequisites: Chemistry 101, Chemistry 201 recommended
Expected enrollment: 25

CHEM-250-01 - Chemistry - 2008-2009
(Spring) Introduction to the History of Chemistry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Writing-intensive)
Traces the growth of chemistry in several ways: as a body of knowledge and beliefs, as a practical means of intervention, and as a community of practitioners linked (or divided) by sociopolitical bonds and common interests, intellectual and otherwise. After an overview of chemical history and an introduction to various scholarly traditions in the field, the balance of the course will be devoted to case studies of narrower topics or episodes, such as the alchemical tradition and Robert Boyle, the eighteenth-century Chemical Revolution, nineteenth-century organic chemistry, Ionism, atomism and elementalism, chemistry and war, the quantum revolution, educational traditions, the role of women.
Prerequisites: soph, jr, sr, or permission of instructor
Expected enrollment: 25
Notes: Note: Students conducting an independent laboratory research project for course credit in a department, program, or laboratory covered by the College's chemical hygiene plan must participate in a safety training session before beginning research. Course credit will not be granted to students who do not receive safety training.

Instructors: The department

CHEM-295-01 - Chemistry - 2008-2009
(Spring) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Independent work in chemistry can be conducted with any member of the department.
Prerequisites: soph, permission of department required every semester
Notes: Note: Students conducting an independent laboratory research project for course credit in a department, program, or laboratory covered by the College's chemical hygiene plan must participate in a safety training session before beginning research. Course credit will not be granted to students who do not receive safety training.

CHEM-302-01 - Chemistry - 2008-2009
(Spring) Organic Chemistry II
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement.
A continuation of Chemistry 202 that addresses the chemistry of aromatic compounds, the carbonyl group, and a number of other functional groups. Examples drawn from compounds of biological interest. The laboratory includes organic synthesis and the identification of unknown compounds by chemical and spectroscopic means.
Prerequisites: Chemistry 202 with grade of C or better
Notes: 3 lectures (75 minutes), 1 lab (4 hours)
Instructors: S. Browne
Section Instructors: 01 LAB The department | 02 LAB The department | 03 LAB The department | 04 LAB The department | 05 LAB The department | 06 LAB The department | 07 LAB The department | 08 LAB The department |

CHEM-308-01 - Chemistry - 2008-2009
(Fall) Chemical Thermodynamics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement.
A consideration of the contribution of thermodynamics to the understanding of the "driving forces" for physical chemical changes and the nature of the equilibrium state.
Prerequisites: Chemistry 201, Chemistry 202, Mathematics 101, Physics 103 and 204, or 115 with grade of C or better
Notes: 3 meetings (75 minutes), 1 lab (4 hours)
Instructors: W. Chen
Section Instructors: 01 LAB W Chen | 02 LAB W Chen |
Expected enrollment: 32

CHEM-311-01 - Chemistry - 2008-2009
(Fall) Protein Biochemistry and Cellular Metabolism
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement.
(Biochemistry 311f; Biological Sciences 311f)
Instructors: L. Hsu
Section Instructors: 01 LAB L Hsu | 02 LAB L Hsu | 03 LAB L Hsu |

CHEM-314-01 - Chemistry - 2008-2009
(Spring) Nucleic Acids Biochemistry and Molecular Biology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement.
(Biochemistry 314s; Biological Sciences 314s)
Instructors: K. Mix
Section Instructors: 01 LAB L Hsu | 02 LAB L Hsu |

CHEM-315-01 - Chemistry - 2008-2009
(Spring) Experimental Methods
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Uses extended research-style projects to introduce advanced techniques in physical measurement (e.g., high-resolution spectroscopy, calorimetry, electrochemistry), separation and analysis (e.g., gas- and liquid-phase chromatography, mass spectrometry), and chemical synthesis (e.g., catalytic and enantiopure methods, biomolecules, polymers). Students will increase their repertoire of laboratory skills while learning to integrate concepts from different subdisciplines of chemistry into a unified experimental approach to problem solving.

Prerequisites: Chemistry 302, 2 lectures (75 minutes), 1 discussion (50 minutes), 1 lab (4 hours)

Instructors: A. Dickens

Section Instructors: 01 LAB A Dickens | 02 LAB A Dickens |

Expected enrollment: 20

CHEM-317-01 - Chemistry - 2008-2009
(Spring) Principles of Polymer Chemistry - *Not offered this year/term

An introduction to the study of molecules of high molecular weights with emphasis on synthetic rather than naturally occurring polymers. Topics include polymerization, structures, molecular weight determination, molecular weight distribution, chain configurations, rubber elasticity, and thermodynamics and statistical mechanics of polymer solutions.

Prerequisites: Chemistry 302

Notes: 2 meetings (75 minutes); 1 discussion (50 minutes); offered once every three years

Instructors: W. Chen

CHEM-325-01 - Chemistry - 2008-2009
(Spring) Atomic and Molecular Structure

This course is an introduction to experimental and theoretical approaches to the determination of the structure of atoms, molecules, and chemical bonds. Classroom work provides background in the theory of atomic and molecular structure and an introduction to quantum mechanics and spectroscopy.

Prerequisites: Chemistry 201, Chemistry 202, Mathematics 202, Physics 216 with grade of C or better

Notes: 2 meetings (75 minutes), 1 discussion (50 minutes), 1 lab (4 hours)

Instructors: W. Chen

Section Instructors: 01 LAB M Gomez | 02 LAB M Gomez |

Expected enrollment: 36

CHEM-334-01 - Chemistry - 2008-2009
(Spring) Advanced Inorganic Chemistry

The implications of molecular symmetry as expressed in the language of group theory are explored in some depth. Group theory provides the context for a discussion of the structural and spectroscopic properties of inorganic compounds, particularly those of the transition metals.

Prerequisites: permission of instructor; corequisite Chemistry 325

Notes: 2 meetings (75 minutes), 1 discussion (50 minutes); offered every other year

Instructors: D. Cotter

Expected enrollment: 6

CHEM-336-01 - Chemistry - 2008-2009
(Spring) Organic Synthesis

This course emphasizes recent developments in synthetic organic chemistry and deals with general synthetic methods and specific examples of natural product synthesis. It covers such topics as new methods of oxidation and reduction, stereospecific olefin formation, ring-forming reactions, and methods of carbon-carbon bond formation. The application of these reactions to the synthesis of naturally occurring compounds is examined. A general strategy for the synthesis of complex molecules is also presented.

Prerequisites: Chemistry 302

Notes: 3 meetings (50 minutes); offered every other year

Instructors: D. Hamilton

Expected enrollment: 35

CHEM-337-01 - Chemistry - 2008-2009
(Fall) Physical Organic Chemistry

An introduction to the concepts and methods of physical organic chemistry. Examination of reaction mechanisms and the experimental results that support these mechanisms. Topics include structure and reactivity, reaction kinetics, mechanism determinations, and Woodward-Hoffman Rules.

Prerequisites: Chemistry 302, 308

Notes: 2 meetings (75 minutes); offered every other year
Instructors: S. Browne
Expected enrollment: 35

CHEM-338-01 - Chemistry - 2008-2009

(Fall) Organic Chemistry III - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

An elective sequel to Organic Chemistry II, this course will build directly upon the standard organic chemistry sequence to add both depth of understanding and breadth of application. The course will draw heavily from the reaction classes covered in the earlier courses and add conceptual frameworks to support discussion of rearrangements of carbon skeletons, migrations to electron-deficient centers, the formation and reactions of carbenes, and symmetry control of electrocyclic processes. Recognizing that a key goal of contemporary organic chemistry is the preparation of new carbon frameworks, a brief introduction to the use of retrosynthetic analysis will also be included.

Prerequisites: Chemistry 302, Organic Chemistry II
Notes: 2 meetings (75 minutes)
Instructors: D. Hamilton
Expected enrollment: 30

CHEM-343-01 - Chemistry - 2008-2009

(Spring) Chemistry of DNA
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking-intensive)

This advanced-level seminar will focus on the molecular properties of DNA. Using as sources a graduate-level text and readings from the primary literature, the class will discuss a variety of current topics in the research community, including the binding of proteins and small molecules to DNA, the covalent modification of DNA by mutagenic agents, and the dynamic nature of DNA across timescales. Critical analysis of experimental design and conclusions from data will be encouraged. Students will be evaluated based on participation in discussions, oral presentations, and an original research proposal.

Prerequisites: Chemistry 302 and one additional 300-level chemistry course
Notes: 2 meetings (75 minutes)
Instructors: M. Nunez
Expected enrollment: 12

CHEM-345-01 - Chemistry - 2008-2009

(Fall) Physical Biochemistry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

This course introduces the fields of biophysical chemistry and molecular biophysics, where biological systems are probed and described by physical techniques and models. Topics will include the physical properties of biological molecules (proteins, nucleic acids, carbohydrates, and lipid membranes); applications of spectroscopy to biological systems, both in vitro and in vivo; the mechanisms of light harvesting and energy conversion; and technological developments inspired by biological systems. Lecture sessions (two per week) will be complemented by a weekly discussion of papers from the contemporary literature.

Prerequisites: Chemistry 302 required; Chemistry 212, Biochemistry 311 or Biology 220 recommended, or permission of instructor
Notes: 2 lectures (75 minutes) and discussion section (75 minutes) per week
Instructors: The Department

CHEM-399-01 - Chemistry - 2008-2009  
(Fall) Comprehensive Seminar
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
A seminar series consisting of meetings on alternate weeks to discuss articles from the current chemical literature. The readings will prepare students for attendance at lectures on the chosen topics in the remaining weeks. The lectures are given primarily by visiting speakers, but they may include department faculty. Students will serve as discussion leaders, and each student will write a paper on a presentation of her choice.
Prerequisites: sr
Notes: 1 meeting (90 minutes)
Instructors: D. Hamilton

Classics

CLASS-208-01 - Classics - 2008-2009  
(Spring) Ancient Greek Sanctuaries
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Art History 290-03)
A detailed examination of the history, art, and archaeology of several major Greek cult centers, including the Sanctuary of Zeus at Olympia, the Sanctuary of Apollo at Delphi, and the Sanctuary of Asklepios at Epidauros, together with a briefer consideration of other sacred sites around the Greek world. The approach is primarily archaeological, with special attention to the surviving monuments and the results of excavation, but topics to be discussed also include ancient Greek religious practice, panhellenic festivals and athletic competitions, and the role played by Greek sanctuaries in the international political rivalries of the ancient Mediterranean world.
Notes: 2 meetings (75 minutes)
Instructors: M. Landon
Expected enrollment: 30

CLASS-213-01 - Classics - 2008-2009  
(Fall) Cleopatra and Rome: Gender, Politics, and History in the Ancient World
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(History 218)
Cleopatra, last of the dynasty that ruled Egypt for three centuries, was renowned for her learning and wit, her beauty and ambition, and for being both the mistress of Julius Caesar and wife of Marc Antony. A controversial figure in antiquity, Cleopatra has enjoyed a remarkable afterlife in modern literature, drama, and cinema. In this course we attempt to recover the historical Cleopatra by placing her in the social and political context of her time, including the role of women in ancient societies and the political power struggles at the end of the Roman Republic, and then by analyzing her portrayal in ancient literature and art, culminating in a discussion of Cleopatra's image today.

**CLASS-223-01 - Classics - 2008-2009**  
*(Spring)* Introduction to Archaeology  
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement  
(Anth-290-02)  
This course will introduce students to the vast array of archaeological methods, including excavation, survey, laboratory techniques, architectural analysis, bioarchaeological practices, and technological approaches. Using examples of methods from all parts of the world and all time periods, students will also learn the history of archaeology as it evolved from several related disciplines. Field school opportunities for students will also be explored.  
Prerequisites: Soph, Jr, Sr, or permission of instructor  
Notes: 2 meetings (75 minutes)  
Instructors: E. Poehler  
Expected enrollment: 18

**CLASS-232-01 - Classics - 2008-2009**  
*(Spring)* From Hoplites to Legions: Warfare in the Ancient World  
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement  
Greeks and Romans viewed warfare as an abiding part of the human condition. The literature and artwork of this period are filled with images of the two faces of war: it conferred great glory on the victors as well as profound horror and suffering on all involved. This course examines warfare from archaic Greece and the rise of the city-state (c. 800 BCE) to the fall of the Roman Empire in the West (c. 476 CE). By closely reading a variety of primary sources and secondary materials, we will consider such topics as the culture and ethics of war and imperialism; logistics and strategies of warfare; and armor, weaponry, and battlefield tactics.

**COLL-133-01 - College Courses - 2008-2009**  
*(Fall)* Gods and Monsters: Science and Scientists in the Modern World
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

First-year seminar

Since the emergence of recognizable scientific communities in early modern Europe, Western culture has been increasingly marked by scientific activities and products. Science and technology have evoked a broad range of intellectual and emotional responses from scientists and the public alike: hope, expectation, fear, dread. We will examine the history of modern science from the seventeenth century to the present, paying special attention to literary and popular responses to this new and powerful social force. Texts will include works by historians and other scholars of science, writings of significant scientists from various periods, and a selection of novels, stories, and films.

Prerequisites: fy or permission of instructor

Notes: 2 meetings (2 hours)

Instructors: D. Cotter

Expected enrollment: 16

COLL-145-01 - College Courses - 2008-2009
(Fall) Western Civilization: An Introduction through Great Books
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

First-year seminar (Writing-intensive)

Beginning with works emerging from Athens and Jerusalem and proceeding to the modern world, this year-long course will explore the prominent ideas of Western civilization. The course material will be centered on the Great Books from across disciplinary boundaries and will include authors such as Shakespeare, Plato, Dante, Einstein, Augustine, Darwin, Homer, Locke, Goethe, Eliot, and the writers of the Old and New Testaments. Students are expected to register for Interdepartmental 146 in the spring semester.

Prerequisites: fy or permission of instructor

Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)

Instructors: J. Hartley

Expected enrollment: 16

COLL-146-01 - College Courses - 2008-2009
(Spring) Western Civilization: An Introduction through Great Books
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

First-year seminar (Writing-intensive)

Beginning with works emerging from Athens and Jerusalem and proceeding to the modern world, this yearlong course will explore the ideas that constitute Western civilization. The course material will be centered on the Great Books from across disciplinary boundaries and will include authors such as Shakespeare, Plato, Dante, Einstein, Augustine, Darwin, Homer, Locke, Goethe, Eliot, and the writers of the Old and New Testaments.

Prerequisites: Indpt-145

Notes: 2 meetings (75 minutes); 1 meeting (50 minutes)

Instructors: J. Hartley

Expected enrollment: 17

COLL-210-01 - College Courses - 2008-2009
(Spring) Ready for the World: Preparing Your Internship and Research Project
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

This course is designed for students embarking on summer internships and research projects. It focuses on the connections students will make in the world beyond Mount Holyoke College, looking at the workings of organizations, taking account of the particular social situations in which students find themselves, understanding social dynamics in interpersonal and professional interactions, exploring interviewing techniques for research and other modes of communication, learning about organizational priorities, objectives, and ethical guidelines, and strategies for human survival. Students are expected to keep a journal of their readings and activities and participate fully in each session.

Notes: Class will meet: April 7 (7-9pm Clapp 206); April 18 (9am-1pm Clapp 206); April 25 (9am-1pm Clapp 206); and April 28 (7-9pm Art 220). Registration will be handled at the first class meeting. For Ungraded Option or to withdraw from the course, submit request to the Registrar's Office by April 15.

Instructors: F. McGinness, A. Bloomgarden, H. Hanson, M. Hoopes, M. McKeever, J. Okay, M. Pierson, J. Roth

Expected enrollment: 30

COLL-295-01 - College Courses - 2008-2009
(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.

Prerequisites: soph, jr, sr, and permission of instructor

Instructors: The department

COLL-395-01 - College Courses - 2008-2009
(Fall) Independent Study
Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement.
Prerequisites: jr, sr, and permission of instructor
Instructors: The department

Complex Organizations

COMOR-212-01 - Complex Organizations - 2008-2009
(Fall) Individuals and Organizations
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Psychology 212f)
This course focuses on individual and small-group behavior in the organizational setting. The basic objective is to increase knowledge and understanding of human behavior in organizations - especially each individual's own behavior. Three types of knowledge are stressed: (1) intellectual information regarding human behavior in an organizational context; (2) understanding of oneself as a person and as a manager; and (3) behavioral skills in dealing with people.
Prerequisites: soph, jr, sr
Notes: 2 meetings (75 minutes)
Instructors: D. Butterfield

COMOR-220-01 - Complex Organizations - 2008-2009
(Fall) Winners and Losers: Taxation, Social Justice, and Economic Choices
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive; Politics 225)
The maze of laws that make up the U.S. tax system shape and define what our nation is and will be; they also create winners and losers. Who benefits from special relief provisions such as for housing, health care, education, retirement savings, charitable giving, and child care? What are the economic consequences? How are families taxed? Women? The poor? Capital gains? Should we have an estate tax, reform the income tax, or adopt a consumption tax? How can we save Social Security? All these issues and more are addressed, including a review of federal tax history from the Constitution to the present.
Prerequisites: History 171, Politics 104, Economics 103 or 104, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: J. Fox
Expected enrollment: 20

COMOR-232-01 - Complex Organizations - 2008-2009
(Fall) Ethical Issues in Complex Organizations
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Philosophy 232s)
There is much talk recently of the need for increased attention to "ethics" in organizational life. This course examines the basis for this concern and the underlying beliefs and structures that give rise to ethical issues, with the goal of helping students to clarify their own positions. Topics addressed will include profit, governance, consumption, distribution and the social contract. Readings will draw on philosophy, religion, economics, history, literature, management theory and current events
Prerequisites: soph, jr, sr
Notes: 1 meeting (3 hours)
Instructors: The department

COMOR-295-01 - Complex Organizations - 2008-2009
(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph, jr, sr, and permission of program
Instructors: The department.

COMOR-295-01 - Complex Organizations - 2008-2009
(Spring) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph, jr, sr, and permission of program
Instructors: The department.
COMOR-299-01 - Complex Organizations - 2008-2009
(Fall) Leadership and the Liberal Arts
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)
An interdisciplinary approach to the nature, operations, and directions of complex organizations. Investigates the position of women and men in organizations, with a consideration of the nature and styles of leadership and of the value of a liberal arts degree in organizational interaction, and with an exploration of issues affecting organizations (ethics, competition, legal rights, authority, socialization). Required for the minor in complex organizations.
Notes: 2 meetings (75 minutes)
Instructors: The department

Computer Science

COMSC-100-01 - Computer Science - 2008-2009
(Fall) An Introduction to Computer Science
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
An introduction to basic computer science concepts and issues with a focus on HTML and JavaScript programming. Additional topics will be chosen from: origins of computers, computer architecture, assemblers and compilers, digital logic, the Internet, and artificial intelligence. Laboratory assignments will offer some experience with programming and the use of application software.
Notes: 2 meetings (75 minutes), 1 lab (2 hours); students should NOT take this course after Computer Science 101
Instructors: P. Dobosh
Section Instructors: 01 LAB P Dobosh | 02 LAB P Dobosh |

COMSC-100-01 - Computer Science - 2008-2009

COMSC-101-01 - Computer Science - 2008-2009
(Fall) Problem Solving and Object Oriented Programming
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Computers are used every day for an enormous variety of tasks, from playing games and chatting with friends to transferring billions of dollars, delivering radiation treatments, and controlling the electrical grid. Computer programs are an essential ingredient in allowing for this great diversity of applications. In this course, you will learn to create programs, not just use programs that others have written. You will develop animations using Alice, a tool specifically designed for learning programming by creating animations, and graphical applications using Java, a very popular modern programming language. We assume no prior study of computer science. Programming intensive.
Notes: 2 lectures (75 minutes), 1 lab (2 hours)
Instructors: B. Lerner
Section Instructors: 01 LAB B Lerner | 02 LAB B Lerner |
Expected enrollment: 50

COMSC-102-01 - Computer Science - 2008-2009
(Fall) Advanced Object Oriented Programming
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course builds on the basic programming concepts learned in CS 101. Emphasis is on developing the skills needed to write more sophisticated programs. This includes strategies to aid in assuring the correctness of programs through the use of assertions and unit testing as well as advanced Java features such as inheritance, polymorphism, and network programming. We will also introduce some widely used data structures such as vectors and linked lists. This course is programming intensive.
Prerequisites: Computer Science 101
Notes: 2 meetings (75 minutes)
Instructors: The department
Expected enrollment: 40

COMSC-102-01 - Computer Science - 2008-2009
(Spring) Intermediate Object-Oriented Programming
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

COMSC-211-01 - Computer Science - 2008-2009
(Fall) Data Structures
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Using Java. Solving problems with computers is accomplished by writing programs that operate on data to produce a desired result. The way data is organized and presented to the program can significantly affect its efficiency and simplicity and can sometimes determine whether or not a program can be written to solve the problem at all. This course presents ways of organizing data into "data structures" and analyzes how structuring the data can improve program performance. This course is programming intensive.
Prerequisites: Computer Science 101, 102
Notes: 2 meetings (75 minutes)
COMSC-221-01 - Computer Science - 2008-2009
(Spring) Computer System & Assembly Language
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course looks at the inner workings of a computer and computer systems. It is an introduction to computer architecture. Specific topics include assembly language programming, memory, and I/O issues. *This course is programming intensive.*
Prerequisites: Computer Science 101,102; Computer Science 211 recommended
Notes: 2 meetings (75 minutes)
Instructors: L. Ballesteros
Expected enrollment: 20

COMSC-295-01 - Computer Science - 2008-2009
(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph, permission of instructor
Instructors: The department.

COMSC-295-01 - Computer Science - 2008-2009

COMSC-311-01 - Computer Science - 2008-2009
(Fall) Theory of Computation
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Are there any limits to what computers can do? Does the answer to this question depend on whether you use a PC or a Mac? Is C more powerful than PASCAL? This seminar explores these questions by investigating several models of computation, illustrating the power and limitations of each of these models, and relating them to computational problems and applications. Topics include finite state automata, pushdown automata, grammars, Turing machines, the Universal Turing Machine, and computability.
Prerequisites: Computer Science 101,102 and Mathematics 232
Notes: 2 meetings (75 minutes)
Instructors: The department
Expected enrollment: 20

COMSC-312-01 - Computer Science - 2008-2009
(Spring) Algorithms
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
How does Mapquest find the best route between two locations? How do computers help to decode the human genome? At the heart of these and other complex computer applications are nontrivial algorithms. While algorithms must be specialized to an application, there are some standard ways of approaching algorithmic problems that tend to be useful in many applications. Among other topics, we will explore graph algorithms, greedy algorithms, divide-and-conquer, dynamic programming, and network flow. We will learn to recognize when to apply each of these strategies as well as to evaluate the expected runtime costs of the algorithms we design.
Prerequisites: Computer Science 211 and Mathematics 232
Instructors: B. Lerner
Expected enrollment: 20

COMSC-315-01 - Computer Science - 2008-2009
(Fall) Software Design
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Building large software systems introduces new challenges to software development. Appropriate design decisions early in the development of large software can make a major difference in developing software that is correct and maintainable. In this course, students will learn techniques and tools to help them address these problems and develop larger software projects, improving their skills in designing, writing, debugging, and testing software. Topics include design patterns, UML, designing for maintainability, software architecture, and designing concurrent and fault tolerant systems. Programming intensive.
Prerequisites: Computer Science 211
Notes: 2 meetings (75 minutes)
COMSC-316-01 - Computer Science - 2008-2009
(Spring) Software Practicum
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Real software differs from most classroom projects in several significant ways. It must satisfy the needs of users in terms of functionality, reliability, and usability and it must be maintainable so that it can be adapted as user needs change. In this course, students will work with a client to develop software for that client. This requires meeting with the client to understand the needs, designing, implementing and testing the software, and finally delivering the software to the client. Strong communication skills and good teamwork will be emphasized, as the entire class works together and with the client to produce a single piece of software. Programming intensive.
Prerequisites: Computer Science 315
Notes: 2 meetings (75 minutes)
Instructors: B. Lerner
Expected enrollment: 20

COMSC-322-01 - Computer Science - 2008-2009
(Spring) Operating Systems
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
An introduction to the issues involved in orchestrating the use of computer resources. Topics include operating system evolution, file-handling systems, memory management, virtual memory, resource scheduling, multithreading, deadlocks, concurrent processes, protection, and design principles. Course emphasis: understanding the effects of operating system design on computer system performance. This course is programming intensive.
Prerequisites: Computer Science 211 and 221
Notes: 2 meetings (75 minutes)
Instructors: P. Dobosh
Expected enrollment: 20

COMSC-324-01 - Computer Science - 2008-2009
(Fall) Computer Architecture
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
The goal of this class is to provide the student with a working knowledge of how computers operate and the general principles that affect their performance. New developments in hardware render current technologies obsolete within one to three years. Rather than focusing on specific technology, we cover the fundamentals that allow your understanding of technology to grow with future developments. You will also gain a better appreciation of the cost/performance trade-offs encountered in designing a computer system.
Prerequisites: Computer Science 211 and 221
Notes: 2 meetings (75 minutes)
Instructors: L. Ballesteros
Expected enrollment: 20

COMSC-331-01 - Computer Science - 2008-2009
(Spring) Computer Graphics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
The creation of pictorial images using a computer. Topics include drawing of two- and three-dimensional scenes using OpenGL and other graphical environments; transformations of objects (translations, scalings, rotations, shearings) using homogeneous coordinates; creating perspective in three-dimensional drawing; algorithms for enhancing realism and visual effect; and the mathematical underpinnings of graphic design. Students will complete a number of graphics projects based on readings and class discussion. This course is programming intensive.
Prerequisites: Computer Science 101, 211 (may be taken concurrently), and at least one of Mathematics 203, Mathematics 211, Mathematics 232, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: R. Weaver
Expected enrollment: 20

COMSC-334-01 - Computer Science - 2008-2009
(Fall) Artificial Intelligence - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
An introduction to AI research issues and models of intelligence. Topics include AI history, philosophical and research questions, LISP, state space representation, search, heuristics, connectionism, learning, and an introduction to advanced AI fields such as Natural Language Processing and Computer Vision. Course emphasis: understanding AI model development and how it relates to the theoretical issues. This course is programming intensive.
Prerequisites: Computer Science 211 and Mathematics 232
Notes: 2 meetings (75 minutes)
Instructors: P. Dobosh
Critical Social Thought

CST-100-01 - Critical Social Thought - 2008-2009
(Fall) An Introduction to Critical Social Thought
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course will examine the relationship among the lives of thinkers who broke with their own worlds, the new visions of reality they created, and the historical context that provoked and in turn was provoked by their ideas. Readings will include short works by Voltaire, Franz Kafka, Albert Camus, Susan Sontag, and Oriana Fallaci.
Prerequisites: fy, soph, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: C. Pleshakov
Expected enrollment: 25

CST-250-01 - Critical Social Thought - 2008-2009
(Fall) Introduction to Nineteenth-Century Critical Social Thought
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(German Studies 23)
An introduction to some of the great critical voices of the nineteenth century. We will explore the ideas of such mutinous thinkers as Karl Marx, Friedrich Nietzsche, Sigmund Freud, Fyodor Dostoyevsky, W.E.B. Du Bois and Franz Kafka focusing on the style as well as the substance of their works and the circumstances that provoked them to write and/or that their writings helped provoke. The course will highlight the tension between appearance and reality, the dialectic of domination and subordination, and the place of reason and irrationality in social life.
Notes: Students with previous study of German may opt for German 232. Students with no previous study of German are encouraged to take German 101 or 103 to complement this course. 2 meetings (75 minutes)
Instructors: K. Remmler
Expected enrollment: 25

**CST-252-01 - Critical Social Thought - 2008-2009**
**(Spring) Literature and Politics: Second Living: Imagined Worlds of Literature and Internet**
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A; Anthro, econ, geog, etc. requirement
We will study the tradition of imagined worlds in Western culture, with its mystique of utopia, social engineering, escapism, and selectiveness. Readings will include Thomas More, George Orwell, J.R.R. Tolkien, and J.K. Rowling; Jorge Luis Borges' works will be our methodological guide to the worlds of the Internet that, for the purposes of this course, may include Second Life and Postsecret.
Prerequisites: soph, jr, sr. CST 249 or 250 recommended but NOT required
Notes: 2 meetings (75 minutes)
Instructors: C. Pleshakov
Expected enrollment: 25

**CST-253-01 - Critical Social Thought - 2008-2009**
**(Fall) Critical Race Theory**
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(African American and African Studies 208)
This course examines the discursive relationship between race and law in contemporary U.S. society. Readings examine the ways in which racial bodies are constituted in the cultural and political economy of American society. The main objective is to explore the rules and social practices that govern the relationship of race to gender, nationality, sexuality, and class in U.S. courts and other cultural institutions. Thinkers covered include W.E.B. DuBois, Kimberle Crenshaw, Derrick Bell, and Richard Delgado, among others.
Notes: 2 meetings (75 minutes)
Instructors: L. Wilson
Expected enrollment: 25

**CST-254-01 - Critical Social Thought - 2008-2009**
**(Spring) Postcolonial Theory**
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(English 254)
Postcolonial theory probes the centrality of colonialism and imperialism to modernity, and examines vital forms of anticolonial insurgency as models for critiques of domination and hegemony. This course will explore these imperatives from Marxist, feminist, and psychoanalytic perspectives, paying particular attention to nationalism, the state, globalization, and identity formation in the context of empire. Readings will include the work of Fanon, Said, Spivak, Chakrabarty, and Lloyd.
Prerequisites: soph, jr, sr, or permission of instructor; CST 249 or 250 recommended but NOT required
Notes: 2 meetings (75 minutes)
Instructors: A. Martin
Expected enrollment: 25

**CST-255-01 - Critical Social Thought - 2008-2009**
**(Fall) Human Agency and Historical Transformation: Pivotal Moments: Pivotal Moments in the Development of Capitalism**
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Economics 204 and History 301)
Preamble (for topics courses): Topics offered under this rubric will be designed to illuminate the interplay between continuity and change, stability and disorder, tradition and expiration in thought and practice, through investigation and analysis of moments or periods when historical actors made critical choices, witting or unwitting, that fundamentally shaped choices possible for later generations.
This seminar examines evidence and theories on the origins, development, and dynamics of capitalism and the modern state. We shall focus on the transition to (agrarian) capitalism in early modern England, the industrialization of production in nineteenth-century Europe and the United States, and the political and economic crisis of the 1930s depression. As we ask how fundamental changes in human communities come about, we shall consider the relative contributions of individual agency and social determination to the creation of a world so many now regard as either natural or inevitable.
Prerequisites: jr, sr, or permission of instructors
Notes: 1 meeting (3 hours)
Instructors: H. Garrett-Goodyear, J. Christiansen
Expected enrollment: 25

**CST-295-01 - Critical Social Thought - 2008-2009**
**(Fall) Independent Study**
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph, permission of department
Instructors: The department.

CST-295-01 - Critical Social Thought - 2008-2009
(Spring) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph, permission of department
Instructors: The department.

CST-350-01 - Critical Social Thought - 2008-2009
(Fall) Seminar in Critical Social Thought
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking- and writing-intensive)
A seminar for CST juniors and seniors in which both participating faculty and students present their independent research, respond critically to one another's work, and lead discussions on relevant secondary readings. Every student will be expected to produce a substantial essay on a question in the broad field of social thought by the end of the semester. Students will be encouraged to cultivate agility in speaking, arguing, and writing.
Prerequisites: Critical Social Thought jr, sr, or permission of instructor
Notes: 1 meeting (3 hours); seniors who intend to write a thesis must take 4 credits of Critical Social Thought 395 in the fall, in addition to this course
Instructors: J. Cocks
Expected enrollment: 15

CST-395-01 - Critical Social Thought - 2008-2009
(Fall) Independent Study
Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement.
Instructors: The department

Curricular Support Courses

CUSP-100-01 - Curricular Support Courses - 2008-2009
(Spring) Engaging the Pioneer Valley: Community-Based Learning (CBL) Theory and Practice
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Community-based learning course)
This course will equip students to enter communities effectively and responsibly as learners, researchers, volunteers, interns and citizens. Successful community-based learning depends on familiarity with history, politics, policies, and practices in campus-community partnership. Students will refine their interests, hone their skills, identify and prepare to meet critical needs and opportunities via interaction with the region's organizations, issues, and people. Panel sessions on-campus and in the community will complement readings and research assignments engaging issues and practice in arts & culture, education, environment, health, human services, and public advocacy organizations.
Notes: 1 meeting (90 minutes)
Instructors: A. Bloomgarden
Expected enrollment: 25

CUSP-103-01 - Curricular Support Courses - 2008-2009
(January) Design and Ethics in Community Research
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Community-based learning course)
This course will introduce undergraduates to issues and practices in social research design and ethics. Students will engage with two major areas of knowledge that are essential preparation for entry into academic field study. The first portion of the course will examine research design including: formulating a question, selecting appropriate methods, collecting, managing and analyzing data, and sharing results. The second portion of the course will consider ethical issues, including: involving human subjects, dilemmas and choices in research practice, and principles and practices in community-based research.
Prerequisites: Enrolling students must be in an advanced stage of planning summer and/or fall 2009 research projects via summer or term-time internships or independent study.
Notes: 3 meetings (2 hours) weekly, plus 4.5 hour on-line course module.
Instructors: A. Bloomgarden
Expected enrollment: 25

CUSP-104-01 - Curricular Support Courses - 2008-2009
(Fall) Public Speaking and Civic Discourse: Theory and Practice
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking-intensive)
What are the elements of an effective public speech? Who are considered notable speakers? What rhetorical strategies do people use to support and/or influence one another? This course explores theories of civic discourse and the role of language in public life. We will investigate how ethnicity, gender, class, sexuality, nationality, and social status are bound to cultural patterns and to verbal and nonverbal codes. We will develop skills in applying the principles of effective public speaking in structured speaking situations. A number of public speeches will be analyzed to enable students to evaluate critically the effects of culture on communication and communication on culture.

(January) Weighing, Arguing and Advocating: A Case Study in Justice Gone Wrong

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

How well are institutions like the justice system, the press and the political process equipped to handle claims of false convictions? We will explore this question by examining the case of an inmate who has claimed for 25 years that he was wrongfully convicted of a rape. We will examine the case's particulars and consider: questions that arise in efforts to evaluate truth claims; the role of journalists as a check on state power; how the legal system handles post-conviction challenges; and strengths and pitfalls of forensic evidence, especially DNA. Through discussion, readings, guest speakers, documentary film and several writing assignments, we will explore the issues this case embodies.

Notes: Eight 2-hour meetings that includes one film screening followed by a discussion. Optional field trip to state prison featured in wrongful conviction case.

ECON-105-01 - Economics - 2008-2009
(Spring) Financial Accounting
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): The Department of Economics does not offer a business major. However, we do offer an accounting course that will be of interest to students interested in business. The accounting course does not serve as an introduction to economics or as a part of the major.
The course, while using traditional accounting techniques and methodology, will focus on the needs of external users of financial information. The emphasis is on learning how to read, interpret, and analyze financial information as a tool to guide investment decisions. Concepts rather than procedures are stressed and class time will be largely devoted to problem solutions and case discussions. A basic knowledge of arithmetic (+,-,*,/) and a familiarity with a spreadsheet program is suggested. See <a href=http://www.mtholyoke.edu/courses/cljohnso>http://www.mtholyoke.edu/courses/cljohnso</a>.
Prerequisites: Not open to first-year students
Notes: 2 meetings (75 minutes)
Instructors: C. Johnson

(Spring) Game Theory - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): This 200-level course investigates a particular topic in economics at some depth without presupposing prior knowledge of economics. Many students may find this course a useful complement to a major or minor other than economics.
The course will illustrate and analyze the strategies used in making interrelated decisions. Concepts from game theory will be developed using examples and cases drawn from economics, business, politics, and even sports. Applications will include the Prisoner's Dilemma and related games, signaling, bargaining, voting and power, brinkmanship, and nuclear deterrence.
Prerequisites: Not open to first-year students as their first course in Economics
Notes: 2 meetings (75 minutes)
Instructors: M. Robinson

ECON-202-01 - Economics - 2008-2009
(Spring) East Asian Economic Development
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog. etc. requirement
Preamble (for topics courses): This 200-level course investigates a particular topic in economics at some depth without presupposing prior knowledge of economics. Many students may find one or more of these courses useful complements to majors and minors other than economics.
This course provides an overview of economic development in East Asia. The complex interplay of public policy, global competition, and domestic economic relationships in China, Japan, and Korea will serve as the core subject matter of the course, though patterns of economic development in Indonesia, Malaysia, and Singapore will also be discussed. Special attention is given to conditions under which regional economies have successfully blended elements of import-substituting industrialization with export-oriented growth. The course will conclude with a discussion of the impact of the regional economic crisis, the current wave of reforms, and the potential for future growth and development.
Prerequisites: Not open to first-year students as their first course in Economics
Notes: 2 meetings (75 minutes)
Instructors: S. Gabriel

(Spring) Advanced Topics in Economics: Empirical Research in Economics: Globalization and Development

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

We will explore—both theoretically and through applied research—one of the most hotly contested issues in development economics: how globalization affects the development prospects of developing countries. We will study different theories and existing empirical evidence on the impact of transnationalized production, international trade, and global capital flows on economic development. Using econometric tools, each student will spend a large part of the course undertaking applied research in one of these areas.

Prerequisites: jr, sr, Economics 213 or 216 or 217 and, past or current enrollment in Economics 320; 4 credits.

Notes: 1 meeting (3 hours)

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Is Mount Holyoke a school or a business? Is the institution one sees today what Mary Lyon had in mind in 1837? This course will look at the development of U.S. higher education from upstart colonial colleges into a multi-billion dollar industry. We will look closely at the tension between education mission and market forces, and how the interaction between academe and society has played out from the founding of the republic through women's rights, the world wars, and 60s counterculture. We will touch on a range of contemporary topics such as access and affirmative action, standardized testing, athletics, and e-learning. Mount Holyoke will serve as a recurring case study.

(Spring) Researching the Enterprise of Education: Researching Race and Racism in Education - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Preamble (for topics courses): Provides an overview on the nature and practice of educational research. Students critique published research, explore ethical considerations, and examine the uses of educational research. Students also propose and conduct a small-scale research project of their own. Particular methodological approaches are stressed in different iterations of this course. Qualitative approaches such as participant-observation, grounded theory, ethnography, teacher research, case study and interview studies are central in some courses; in others the quantitative analysis of data on education will be emphasized.

The central elements of this course include reading qualitative research, writing qualitative research, and conducting qualitative research. These three acts of inquiry explore how race matters in education and provide a deeper understanding of the racial realities of everyday life in schools. Readings and discussions highlight the paradigms, methodological approaches, and uses of qualitative research. Class demonstrations and activities focus on developing research skills. The independently designed research study provides further exploration of the complexities involved in researching racial matters.

Prerequisites: two courses (one with substantial race-related content) from Anthropology, African American St., Asian St., CST, English, Gender St., Psych. & Education, or Sociology, and permission of instructor.

Notes: 2 meetings, 75 minutes

ENGL-101-01 - English - 2008-2009

(Fall) Seminar in Reading, Writing, and Reasoning: Into Africa

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

First-year seminar (Writing-intensive)

Preamble (for topics courses): Though sections of English 101 differ in specific content, all develop the skills of careful reading and effective writing essential to the liberal arts and sciences. Students will write frequently and have an opportunity to revise their work. By active participation in class discussion, students will develop their speaking skills and learn to ask critical questions, formulate answers, and frame persuasive arguments. Students who do not take the course in the fall should consider enrolling in the spring. Like other first-year seminars, English 101 is intended primarily for students at the start of their college career.

An introduction to some topics in African studies, reading and writing about such contemporary authors as Ama Ata Aidoo, Tsitsi Dangarembga, Bessie Head, Ayi Kwei Armah, Nuruddin Farah. Studying both fiction and essays, the course focuses on recent political situations (Ghana, Congo, South Africa), on images of women, and on representations of Africa in news media and in cinema, both from Africa and the West.

Prerequisites: Only first-year students may preregister for this course. Sophomores, juniors, and seniors may inquire if there is space available during the first two weeks of class.

(Spring) Seminar in Reading, Writing, and Reasoning: I Am My Language: Exploring Linguistic Diversity in Contemporary America

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

First-year seminar (Speaking- and writing-intensive)

Preamble (for topics courses): Though sections of English 101 differ in specific content, all develop the skills of careful reading and effective writing essential to the liberal arts and sciences. Students will write frequently and have an opportunity to revise their work. By active participation in class discussion, students will develop their speaking skills and learn to ask critical questions, formulate answers, and frame persuasive arguments. Students who do not take the course in the fall should consider enrolling in the spring. Like other first-year seminars, English 101 is intended primarily for students at the start of their college career.

This course will explore the relationships among language, identity, and citizenship in contemporary America from historical, educational, political, social, literary, and personal perspectives. We will learn about the origins and histories of various U.S. languages and dialects. We will analyze education and political controversies, such as the Oakland Ebonics controversy and the national English-Only movement. We will consider how dominant linguistic forms are resisted or accepted by American authors. We will also investigate the histories of our own languages to make meaning of our various experiences.

Like other first-year seminars, English 101 is intended primarily for students at the start of their college career.

This course examines the various ways the multicultural family in contemporary American, British, European, and South African culture is imagined by writers and filmmakers. Issues to be explored include: generational conflict, the struggle to "break away," and the claims of memory and nostalgia. Above all, the course seeks to explore the range of cultural forms in which these themes find expression.
Prerequisites: Only first-year students may preregister for this course. Sophomores, juniors, and seniors may inquire if there is space available during the first two weeks of class.

Like other first-year seminars, English 101 is intended primarily for students at the start of their college career.

We will examine contemporary American writers who employ a variety of genres to create autobiography. Through close readings of auto-fiction, poetry, the lyric essay, memoir, and journals, we shall interrogate how African American, Asian American, and queer aesthetics intersect and address this difficult question: What is an American story of the self? Writers include Wayne Koestenbaum, Gary Fisher, Toi Derricotte, June Jordan, Claudia Rankine, Andy Warhol, Justin Chin, D.A. Powell, and Meena Alexander. Students will write and revise several short creative and critical pieces, each piece becoming part of a cohesive final project.

Prerequisites: Only first-year students may preregister for this course. Sophomores, juniors, and seniors may inquire if there is space available during the first two weeks of class.

ENGL-103-01 - English - 2008-2009
(Fall) English for Multilingual Speakers I
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking- and writing-intensive)
Intended for students whose native language is not English and who would like to refine their writing and speaking skills by composing frequent short essays in response to a variety of texts written in English. There will be oral presentations as well as exercises in style, usage, dramatic reading, textual analysis, and research techniques at the college level. Although it is the first in a two-course sequence (103f-104s), international students who have already taken English 104s may register.
Notes: 2 meetings (50 minutes) plus one-hour individual tutorial; pass/fail only; enrollment strictly limited to 12
Instructors: J. Brownlow
Expected enrollment: 12

ENGL-104-01 - English - 2008-2009
(Spring) English for Multilingual Speakers II
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking- and writing-intensive)
This is a writing- and speaking-intensive course for international students at all levels. It is designed for those who would like to improve their English writing and speaking skills by working on a one-to-one basis with an English instructor. Each student will have one 90-minute tutorial with the instructor in order to work on written assignments of various lengths and, if appropriate, to discuss writing assignments in other courses. The purpose of the meetings will be to assess the student's writing level and give personalized instruction in the conventions of college-level writing, research, and academic discourse.
Notes: 1 individual tutorial per week (90 minutes), days and times to be arranged by student with instructor; pass-fail only; enrollment strictly limited to 12
Instructors: J. Brownlow

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)
This course introduces and defines a medieval "alliterative tradition" by investigating the rise of medieval vernacular poetry, the partnership of form and content, and the materiality of language. Principally, we'll ask how alliterative practices in fourteenth-century English works manifest poetic thought; and to do so, we'll historicize these works in terms of their religious, political, and philosophical implications. Readings will include Anglo-Saxon poems in translation, *Sir Gawain and the Green Knight*, *Piers Plowman*, and the *Alliterative Morte Arthure*. Middle English works will be read in the original language, but no prior knowledge of Middle English is required.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meeting (75 minutes); meets English department pre-1700 requirement
Instructors: W. Yu
Expected enrollment: 25

ENGL-214-01 - English - 2008-2009
(Spring) Topics in Medieval Studies: Exploring Medieval Texts and Contexts - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(History 232s-01 & Medieval Studies 200s-01)
This full-year course allies students of late medieval history and literature with its two instructors in exploration of texts and contexts that constituted the society and culture of England, 1350-1530. The first semester emphasizes discovery of published evidence from the era; the second challenges participants to integrate textual analysis and historical interpretation. Major texts include works by Chaucer, Gower, and Malory, read within an array of lesser familiar medieval sources. Major topics include languages and book culture of late medieval England; violence and chivalry; the worlds of manors and guilds; policy, gender, and governance; and late medieval science.
Prerequisites: soph, jr, sr, or permission of instructor; 2 credits per semester
Notes: 1 meeting (110 minutes)
Instructors: C. Collette, H. Garrett-Goodyear
Expected enrollment: 25

ENGL-220-01 - English - 2008-2009
(Fall) Introduction to British Literary and Cultural Studies since 1660: Culture and Society: 1798-1900
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This course offers a broad study of selected figures in modern literary and intellectual history and helps prepare students for more advanced classes in British and/or postcolonial studies. We will use these figures to probe the dynamic relationship between imaginative practice and social change, which may involve global as well as national contexts. This course will introduce students to writing sustained pieces of critical analysis, challenging them to explore the theoretical relationship between literary form and historical transformation in the modern period. This course will examine a number of major literary texts from the *Lyrical Ballads* of Wordsworth and Coleridge through Conrad's *Heart of Darkness*. The focus will be on major poets and novelists of the period, but we will also consider some nonfiction prose writers as well. The course will be particularly concerned with the literary response to social change such as the migration from the country to the city, the rise of industry, the situation of women, and the legacy of imperialist expansion.
Prerequisites: soph, jr, sr
Notes: 2 meetings (75 minutes); meets English department 1700-1900 requirement
Instructors: W. Quillian
Expected enrollment: 20

ENGL-232-01 - English - 2008-2009
(Fall) Introduction to Queer Theory - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Critical Social Thought 249s-01)
For two centuries, academic disciplines have been based on the premise that early modern Europe laid the foundations of "modernity"--scientific method, markets, mobility, democracy, and global exchange, or, in a word, 'progress'--and then brought it to the rest of the world. But what were those other worlds, both in Europe and outside, that modernity superseded? What trace have they left--how can we know them--after they have been destroyed? Juxtaposing Enlightenment literature and post-Enlightenment theory concerned with historical difference, this class aims to rethink what actually constitutes the peculiar modernity that came to shape our lives.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 1 meeting (3 hours); meets English department 1700-1900 requirement
Instructors: S. Ahmed

ENGL-233-01 - English - 2008-2009
(Fall) Introduction to Queer Theory - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course introduces students to the social and political contexts mediating nonnormative gender and sexual expression since the nineteenth century. In our examination of queer epistemological genealogies and methodologies, we will also consider the value of queer theory as a subjectless analysis as opposed to a queer of color critique that calls into question the sedimentation of a white, male, North American queer identity with global pretensions.

Prerequisites: soph, or permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: I. Day

ENGL-235-01 - English - 2008-2009
(Spring) Modern British Poetry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This introduction to modern British poetry pays special attention to the emergence, consolidation, and dismantling of modernist poetry and poetics. It will link this literary history with, amongst other things, the loss of faith, the two world wars, and the relationship between monumental aesthetics, utopian poetics, and totalitarian politics. Writers will include Hardy, Yeats, Eliot, H.D., and Auden.

Prerequisites: soph, or English 200
Notes: 2 meetings (75 minutes)

Instructors: N. Alderman

Expected enrollment: 25

ENGL-236-01 - English - 2008-2009
(Fall) The English Novel from Defoe to Austen
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course will focus on well-known English novels of the eighteenth and early nineteenth centuries while introducing some of the different theoretical arguments regarding the emergence and history of what is called the modern novel. Novelists may include Defoe, Richardson, Sterne, Burney, Radcliffe, and Austen, with supplementary readings in theory and criticism.

Prerequisites: soph, jr, sr, 4 credits in department beyond English 101, or permission of instructor
Notes: 2 meetings (75 minutes); meets English department 1700-1900 requirement

Instructors: J. Pyke

ENGL-241-01 - English - 2008-2009
(Spring) American Literature II - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

A continuation of English 240, which explores the diversity of writers and literary forms that arose in U.S. society in the period from the Civil War to World War I. Authors may include Alcott, Chopin, Crane, Dreiser, Dunbar, Dunbar-Nelson, DuBois, Sui-Sin Far, Gilman, Harper, James, Jewett, Stein, Twain, Wharton, and Whitman. Will address the development of realism and naturalism, and the beginnings of modernism, and explore literary redefinitions of race, gender, sexuality, and class as shaped by social and economic pressures during this era.

Prerequisites: soph, or permission of instructor
Notes: 2 meetings (75 minutes); meets English department 1700-1900 requirement

Instructors: E. Young

ENGL-243-01 - English - 2008-2009
(Fall) American Gothic
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Film Studies 220f.01)

An examination of the gothic—a world of fear, haunting, claustrophobia, paranoia, and monstrosity—in American literature and culture, with an emphasis upon issues of race and gender. Topics include: the gothic; gothic sexuality; Southern, Northern, and national gothic; freakishness and grotesqueness; and visual gothic. Focus on fiction, with some film and photography. Authors and artists may include Alcott, Arbus, Browning, Crafts, Crane, Dunbar, Dunn, Faulkner, Gilman, Hawthorne, McCullers, Morrison, O'Connor, Oates, Parks, Poe, and Romero.
ENGL-250-01 - English - 2008-2009
(Fall) African American Literature
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
This course offers an introduction to the literary works of African Americans from the late-eighteenth century to the present, with an emphasis on poetry and fiction. Beginning with slave narratives and early poetry, we will consider issues of genre, literary traditions, and historical context while gaining experience in reading and analyzing literary texts. We will examine how authors consciously went about creating a literary tradition that mirrored, challenged and created a dialogue with the American canon.
Prerequisites: soph, second-semester fy with permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: G. Pemberton
Expected enrollment: 25

ENGL-250-01 - English - 2008-2009
(Spring) Twentieth Century and Contemporary African American Literature: Innovation, Strategy, Form - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Speaking-intensive)
This course will explore twentieth-century and contemporary African American writers of great political import and innovation, beginning in the 1950s before the Black Arts movement with Gwendolyn Brooks, Ralph Ellison, James Baldwin, and Lorraine Hansberry, turning to writers such as June Jordan, Amiri Baraka, and Ishmael Reed. Post-movement writers may include Lucille Clifton, Toi Derricotte, Toni Morrison, Alice Walker, Harryette Mullen, Rene Gladman, Gary Fisher, and Anna Deveare Smith. Students will address the role of artistic strategy in these writers' works--poem, essay, play, novel, particularly in thinking about issues of race, gender and sexuality, and (black) self representation.
Prerequisites: soph, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: R. Wilson
Expected enrollment: 20

ENGL-252-01 - English - 2008-2009
(Spring) Harlem Renaissance
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
The course will study the literature, politics, and art of the Harlem Renaissance--roughly a period from 1915 to 1940. The New Negro Movement brought together writers, artists, philosophers, musicians, and everyday people from many parts of the United States and the Caribbean to New York City's Harlem. Their efforts to create a distinct African American art resulted in a flowering of art from several different perspectives. The era has most frequently been thought of as a 1920s-only phenomenon, and many have suggested that it was less a "renaissance" than a first flowering of a collective artistic spirit. We will energetically take on the debate.
Prerequisites: soph, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: G. Pemberton
Expected enrollment: 25

ENGL-253-01 - English - 2008-2009
(Spring) African Literature
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
An introduction to African literature in English since 1960. Fiction, drama, autobiography, essays by such writers as Ama Ata Aidoo, Ayi Kwei Armah, Chinua Achebe, Buchi Emecheta, Ngugi was Thiong'o, Chimamanda Adichie, Zakes Mda, Sindiwe Magona, and Zoe Wicomb. Particular attention to themes of exile and imprisonment, political struggle before and after independence, the convergence of oral cultures and European languages, and the emergence of postcolonial and feminist discourses in contemporary Africa.
Prerequisites: soph, or permission of instructor

(Fall) Reading and Writing in the World

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

"Most people are on the world, not in it." --John Muir. An introduction to reading and writing about nature, this seminar will attempt an exchange across distinct approaches to observing and describing the world around us. Do lenses of culture, discipline, and gender determine how we see and experience nature, environment, and place? Course work will include reading such authors as N. Scott Momaday, Henry David Thoreau, bell hooks, Leslie Marmon Silko, Mary Oliver, and Annie Dillard; field trips; and writing assignments--weekly field notes and journals, analytical papers, and personal essays.

Prerequisites: Permission of instructor

ENGL-271-01 - English - 2008-2009

(Fall) Women Writers: Twentieth-Century American Women Writers: Protest and Pleasure

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

In this course we will examine the work of American women writers with an emphasis on the themes of protest and pleasure. Material will range from the overtly political to the intensely personal, will often merge the two, and will date from the late-nineteenth century to today. Despite our long-standing reputation for being "emotional," both outrage and ecstasy have oft been considered taboo for women. Yet women have been motivated by each to pick up the pen and have proved influential as writers on these themes. Authors will range from Emma Goldman, Ida B. Wells, and Kate Chopin to Audre Lorde, Adrienne Rich, and Dorothy Allison.

Prerequisites: soph, jr, sr; English 240, 241, or 270 recommended

Notes: 2 meetings (75 minutes)

Instructors: S. Davis

Expected enrollment: 20

(Fall) Asian American Cultural Production: Racial Formation, Historiography, Genre - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Textual form, according to Fredric Jameson, bespeaks the historical situation. By considering case studies--Chinese labor exclusion, Japanese internment, Filipino colonization, and others--we will inquire whether this description holds true for Asian American cultural production. In engaging literary texts and other discursive forms--legal cases, ethnography, visual documents--we will query the relation of "Asian American" form to historical content. How do asymmetries in social terrain--exclusion, ghettosization, occupation, removal--function as limits for modes of narration? We will read America Is in the Heart, No-No Boy, China Men, Drums, Bone, and State of War.

Prerequisites: soph, or permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: C. Hong

ENGL-274-01 - English - 2008-2009

(Spring) Introduction to Asian American Literature
This course surveys Asian American literature (Chinese, Japanese, Korean, Filipino, Vietnamese, South Asian) since the late nineteenth century, including fiction, memoir, drama, and poetry. Throughout the course we will evaluate major developments and debates in the field, including feminist critiques of cultural nationalism; the gender politics of genre; and domestic, transnational, and queer diasporic critical frameworks. Readings of primary texts will be supplemented by historical and critical source materials. Authors may include Edith Eaton, Louis Chu, John Okada, Theresa Hak Kyung Cha, David Henry Hwang, Jessica Hagedorn, Chang-rae Lee, Jhumpa Lahiri, and Andrew Pham.

Prerequisites: soph, or permission of instructor

Notes: 2 meetings (75 minutes)

ENGL-280-01 - English - 2008-2009
(Fall) Literary Criticism and Theory

This course is designed to offer students a broad historical overview of literary theory as well as exposure to contemporary debates about "theory" and literary representation. The course is both an exercise in practical criticism and a survey of the Western critical tradition from Plato to Derrida. Beginning with the question of why Plato wished to ban poets from his ideal Republic, the course will go on to consider such topics as the Classic vs. Romantic theories of the imagination, the "invention" of psychology and the necessary difficulty of much modern literature, the relation of gender and ethnicity to literary expression, and the uncertainties of literary interpretation.

Prerequisites: soph, jr, sr, or permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: W. Quillian

Expected enrollment: 20

ENGL-286-01 - English - 2008-2009
(Fall) Sexuality and Women's Writing - *Not offered this year/term

An examination of how U.S. women writers in the twentieth century represented lesbian, queer, and homoerotic possibilities in prose. Topics to include: literary strategies for encoding sexuality; thematic interdependencies between sexuality and race; historcal contexts such as the "inversion" model of homosexuality and the Stonewall rebellion; theoretical issues such as the "heterosexual matrix," the "epistemology of the closet," and tensions between lesbian and queer models of sexuality. Authors studied may include Allison, Brown, Cather, Gomez, Larsen, McCullers, Moraga, Nestle, Pratt, Stein, and Woolson; theorists may include Butler, Lorde, Rich, and Sedgwick.

(Fall) Studies in Journalism: Multimedia Journalism

The fast-changing landscape of new information technologies, from the Internet to iPods, is redefining the nature and practice of journalism today. We will examine the political, sociological, legal, and ethical issues raised by these new media technologies. We will also explore the multimedia platforms now available to journalists and learn how to tell stories across different platforms. The Web is both a threat and an opportunity to mainstream media. We will study its impact on the press' traditional watchdog role in democracy.

ENGL-301-02 - English - 2008-2009
(Fall) Studies in Journalism: Narrative Nonfiction
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)
This class is designed to immerse students in some of the most powerful nonfiction being published today. Here we will read extensively to explore the art of telling factual stories with drama, accuracy, imagination, and skill by examining works on topics ranging from business to science to history and politics. Outside the classroom students will be expected to apply these skills to their own writing through a series of assignments culminating in the production of one magazine-length work. Throughout, we will focus on challenges of structure, "voice," and sustaining a narrative. Our goal will be to produce work distinguished by simple, accurate, and compelling prose.
Prerequisites: sr, jr English 202

(Spring) Jane Austen: Readings in Fiction and Film - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A study of Austen's six novels through the lenses of Regency culture and of twentieth-century filmmakers. How do these modest volumes reflect and speak to England at the end of world war, on the troubled verge of Pax Britannica? What do the recent films say to and about Anglo-American culture at the millennium? What visions of women's lives, romance, and English society are constructed through the prose and the cinema?
Prerequisites: jr, sr, 8 credits in English/Film studies beyond 101; prior work in eighteenth- to nineteenth-century literature, history, or film recommended; students should have read at least two Austen novels
Notes: 1 meeting (5 hours) plus screenings; meets English department 1700-1900 requirement; meets English department seminar requirement

(Spring) Gender and Class in the Victorian Novel
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Gender Studies 333s-08)
This course will investigate how representations of gender and class serve as a structuring principle in the development of the genre of the Victorian novel in Britain. We will devote significant attention to the construction of Victorian femininity and masculinity in relation to class identity, marriage as a sexual contract, and the gendering of labor. The texts chosen for this course also reveal how gender and class are constructed in relation to other axes of identity in the period, such as race, sexuality, and national character. Novelists will include Dickens, Eliot, Gaskell, C. Bronte, and Hardy. Supplementary readings in literary criticism and theory.

Prerequisites: jr, sr, 8 credits in department including English 220, 230, or permission of instructor

Notes: 2 meetings (75 minutes); meets English department 1700-1900 requirement

(Fall) Victorian Literature and Visual Culture

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course will examine literary texts that represent new forms of visuality in nineteenth-century Britain as well as examples of visual culture that provide a framework for reading Victorian culture in innovative ways. We will study nineteenth-century photography—portraiture, prison photography, imperial photographs, and private and popular erotic images— as well as novels and autobiographical writing that engage with new photographic technology and its transformation of the ways in which Victorians understood identity, politics, aesthetics, and representation. The course will take a similar approach to painting, literary illustration, political cartoons and caricature, and advertising.

Prerequisites: English 220 or English 323 and at least 4 credits in art history or film studies, or permission of instructor

(Spring) Queer Kinship in Asian North American Literature, Film, and Video - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(American Studies 301s-03 and Film Studies 370s-02 and Gender Studies 333s-15)
This course examines alternative kinship formations in Asian North American cultural production. It will focus on the gender and sexual management of racial bodies since the nineteenth century—from the U.S. Page Law of 1875 that restricted Chinese women on the basis of their presumed sexual immorality to various forms of "racial castration" that mediate Asian masculinities. We will consider how alternative kinship arrangements and queer cultural projects expose and/or upset the narrative assumptions embedded in heteronormative scripts of nationalism.

(Spring) The Curious Middle Ages
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive; Medieval Studies 300s-02)

Medieval curiosity, both a spiritual danger and a vehicle of knowledge, expresses a conflict that helps us mark change in the period's intellectual traditions. We'll consider curiosity's enabling of developments in historiography, cosmology, cartography, optics, and architecture to help us explore various literary genres. Through allegory, travel and religious narrative, romance, fabliau, and dream vision, we'll inquire into the intellectual functions that literature performs, asking how literary curiosity may have been both an approach toward and opponent of scientific truth. Middle English works will be read in Middle English; however, no prior knowledge of Middle English is necessary.

(Fall) Theories of the Lyric - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course will focus on how to read lyric poetry and to think about reading lyric poetry. We will be particularly interested in considering Adorno's post-1945 argument that this seemingly most individual and unsocial literary practice is in fact the most collective and social of forms. The three poets we will use as case studies are Geoffrey Hill, Sylvia Plath, and Seamus Heaney.

(Spring) Projects in Critical Thought - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course will explore the work of a range of the most important cultural theorists of the last 50 years and consider what they can contribute to the analysis of all forms of cultural works, both past and present. We will be particularly interested in writers who attempt to construct models that seek to explain everything, who in their intellectual projects try to think the totality. This semester we will be focusing on Western Marxism, particularly in relation to cultural theory.

Biography is both a literary genre and a mode of literary scholarship. This course will explore some varieties of the biographical impulse in both fiction and non-fiction. We will begin with eighteenth-century British models: Samuel Johnson’s *Lives of the English Poets* and James Boswell’s *Life of Johnson*. Then we will turn to ideas of biography and literary portraiture in the work of Henry James and Gertrude Stein. We will explore the shift associated with the advent of Freud and the Bloomsbury innovations of Lytton Strachey and Virginia Woolf, and close with attention to recent experiments in biography by writers such as Janet Malcolm, Rachel Cohen, and Richard Holmes.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

In this course we will read some of the central texts emerging from the field of cultural studies. In their research projects, students will have the opportunity to put into practice both ethnographic and semiotic approaches to cultural phenomena. Assigned readings will include work by Raymond Williams, Constance Penley on Star Trek fanzines, Kathy Acker on bodybuilding, Anna Deavere Smith, Roland Barthes, and Stuart Hall. Can we "read" the world like a text? Why should we? What changes when we open up our field of inquiry in this way?

*(Fall)* Gender and War

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Gender Studies 333f-05)

This seminar will focus on depictions of war in the context of gender. When asked how we might prevent war, Virginia Woolf suggested that we must invent new language and methods rather than follow the path of the traditional "procession of educated men." What language emerges in works about the effects of war? Texts will include essays and films as well as selected works by writers such as Alcott, Whitman, Crane, Twain, Hemingway, Woolf, Silko, Morrison, and O’Brien.

*(Spring)* Hitchcock and After - *Not offered this year/term
This course will examine the films of Alfred Hitchcock and the afterlife of Hitchcock in contemporary U.S. culture. We will interpret Hitchcock films in a variety of theoretical frames, including feminist and queer theories, and in historical contexts including the Cold War. We will also devote substantial attention to the legacy of Hitchcock in remakes, imitations, and parodies. Hitchcock films may include *Spellbound*, *Strangers on a Train*, *Rear Window*, *Vertigo*, *North by Northwest*, *Psycho*, *The Man Who Knew Too Much*, *Marnie*, and *The Birds*; additional works by Brooks, Craven, De Palma, and Sherman. Readings in film and cultural theory; screenings at least weekly.

(Fall) The Conceptual Black Body in Twentieth-Century and Contemporary Visual Culture - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

We will explore the black body through the visual artists Ellen Gallagher, Kara Walker, William Pope, and Adrian Piper as well as pop icons Michael Jackson, Missy Elliot, and Jay Z. How does their work complicate representations of blackness through painting, video, text, music, and performance, whether through the black body's reality, abstraction, opulence, or annihilation? Using theoretical discussions by Michele Wallace, Roland Barthes, Tricia Rose, Homi Bhabha, Fred Moten, and others, students will write several very short creative and critical pieces, each one becoming part of a larger, cohesive final project.

(Fall) Topics in Postcolonial Studies: Literary and Global Form - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course will juxtapose Enlightenment philosophy—the first attempt to think of the globe as a single and unified entity, occupying common time and shared space—with postcolonial attempts, both literary and theoretical, to capture the globe's inescapable interconnectedness and its irreducible heterogeneity. The course will offer a selective but wide survey of postcolonial theory and literature on the latter topic, including authors such as Harvey, Spivak, Said, Rushdie, Selvadurai, and Ghosh.

(Spring) Feminist Theory and Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive; Film Studies 390s-01 & Gender Studies 333s-07)
Preamble (for topics courses): You must apply for admission to this course by completing the  application.
This seminar investigates contemporary feminist theory—including but not limited to feminist film theory—in relation to film. We will examine the influential formulations of the cinematic "male gaze" and woman's film, recent theorizations of race and sexuality in cinema, gender complexities in classic and contemporary Hollywood film, and new trends in film-making by women. Requirements include extensive readings, weekly essays, and film screenings.
Prerequisites: jr, sr, 8 credits in English and/or Gender Studies beyond the 100 level, and permission of instructor; Film Studies 201 and/or other background in film strongly recommended.

(Fall) Re-imagining Los Angeles: Multiethnic Fictions of Tomorrowland
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(American Studies 301f-01)
In Ridley Scott's 1982 science fiction film, Blade Runner, Los Angeles is a beleaguered metropolis overrun by immigrant "borders" and menacing replicants, presenting a dystopic forecast of multiculturalism. By surveying major genres in relation to the racialized and gendered contexts of migration, labor, and urban redevelopment, this course focuses on alternative constructions of Los Angeles in African American, Asian American, and Chicana/o short stories, novels, and film. Works will include Southland, Tropic of Orange, Twilight: Los Angeles 1992, Their Dogs Came with Them, Devil in a Blue Dress, We Should Never Meet, and Kindred.

(Fall) The City in American Fiction
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
The rise of city life in the United States in the nineteenth century gave rise to a literature of the city. This was sometimes a utopian vision, as in John Winthrop's charge to new arrived Puritans to "build a city upon a hill." Writers created visions of the city as welcoming, benign or sometimes malignant—with the city often functioning as a character itself within a narrative. We will examine the rich history of the city in American literature from the nineteenth century to the present.

(Spring) American Memoir
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course examines the ways that authors have written autobiographically from the seventeenth century to the present. For the Puritans, writing a journal was a means of gauging their faith, noting their failures, examining in detail their everyday lives. For enslaved African Americans, the memoir became a site of protest against slavery and injustice as well as an example of hope for the disheartened. The memoir has flourished throughout American literary history, especially in the last 20 years. We will examine the memoir, asking questions about form, content, and why the genre has flourished.

(Spring) Special Topics in Judaism: Jewish Women's Literature: A Feminist Tradition?
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Jewish Studies-350; Gender Studies-333(11))
Preamble (for topics courses): A study of a particular problem of inquiry, topic, or theme, with a comparative focus.
This course will explore the rich literature written by religious and secular Jewish women, including memoirs, fiction, poetry, and criticism. While most of this writing comes from the modern and contemporary periods—the primary focus of this course—we will also study examples of early modern women’s authorship. Our writers are drawn from diverse geographies, and articulate a wide range of creative responses to modernity, secularization, nationalism, political radicalization, violence, exile and migration, and literary experimentation.

(Fall) Environmental Science
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Community-based learning course)
Most of our society’s environmental problems are complex and interdisciplinary in nature. Environmental science is a course designed to teach integrative thinking, the "scientific method," and problem solving. Lectures will be drawn from a variety of scientific fields including ecology, hydrology, chemistry, geology, and biology with an emphasis on ecosystems and biogeochemical cycles. The course will use case studies of regional environmental problems, practical hands-on problem solving, and landscape analysis. Training in field and laboratory techniques is an integral part of the course. Priority given to environmental studies majors.
Prerequisites: One 100-level lab science; one course in statistics is recommended
Notes: 2 meetings (75 minutes): 1 lab (3 hours)
Instructors: J. Babier

(Fall) Political Ecology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course examines political, economic, cultural, and ecological factors that help shape human-environment interactions. It probes the influence of civic, state, corporate, and transnational institutions on environmental change by examining debates about environment and development, cultural perceptions of nature and natural resources, and the uneven distribution of environmental "goods" and "bads." Case studies draw on local and international issues in the context of globalization including agriculture and the global food system, health disparities and globalized industrial development, local impacts of climate change, water distribution and access, and sustainable development policies.

(Spring) Reading and Writing in the World
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive; English 267s)
An introduction to reading and writing about nature, this seminar will attempt an exchange across distinct approaches to observing and describing the world around us. Do lenses of culture, discipline, and gender determine how we see and experience nature, environment, and place? Course work will include reading such authors as N. Scott Momaday, Henry David Thoreau, bell hooks, Leslie Marmon Silko, Mary Oliver, and Annie Dillard; field trips; and writing assignments--weekly field notes and journals, analytical papers, and personal essays.

(Spring) Perspectives on American Environmental History
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking- and writing-intensive)

Explores the history of human-environment interactions in North America from precolonial times to the present from different cultural perspectives.
How have such human activities as migration, colonization, and resource use depended on or modified the natural world? How have different cultural perceptions of and attitudes toward environment shifted through time and helped to reshape American landscapes? Case studies include ecological histories of Native America and Euro-America, slavery and land use, wilderness and conservation, and environmental racism and social justice. Our approach entails historical review of scientific studies, literature, visual records, and oral tradition.

(Fall) Conference Courses in Environmental Studies: Energy and the Environment

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

This course focuses on increasing student understanding and analytical capability regarding social and political issues at the boundary between energy and the environment. Topics include sustainable energy development, renewables, fossil fuels and nuclear power. During the course, students will be asked to consider themselves as citizens and potential future policy makers.

Prerequisites: jr, sr, or permission of instructor

(Spring) Conference Courses in Environmental Studies: Sustainable Agriculture and Agroecosystems

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

This interdisciplinary science course examines agricultural ecosystems through the study of nutrient cycling, soil processes, hydrology, and plant ecology. The course focuses on reading the primary scientific literature regarding issues of nutrient management, environmental impacts of agricultural practices on adjacent ecosystems, and contributions of agricultural systems to global climate change. Conventional, low-input, and organic agricultural practices are analyzed from the standpoint of environmental impacts. Field trips explore the application of agronomic practices in organic and low-input production systems, with an emphasis on local approaches to sustainable agriculture.

(Spring) Conference Courses in Environmental Studies: Wetland Ecosystem Research

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking- and writing-intensive)

Peatlands have sequestered vast stores of soil carbon since deglaciation, accounting for approximately one-third of the global pool of soil carbon. This seminar will focus on responses of northern wetlands to climate change. In particular, we will address three main topics: the environmental controls on interannual and seasonal variability in CO2 and CH4 gas exchanges, the responses of plant communities along hydrologic and nutrient gradients to climate variability, and the influence of atmospheric nitrogen deposition on carbon exchanges and vegetation. Group discussion of primary scientific literature, independent research, and investigation of research methods are core components.

Prerequisites: At least 8 credits of 200 or 300-level laboratory science, and permission of the instructor.

(Spring) Conference Courses in Environmental Studies: Sustainable Energy: Systems, Policy, & Planning

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Speaking- and writing-intensive)

This course introduces energy systems, policy, and planning at multi-governmental levels. We will learn the fundamentals of energy systems, resource extraction and projections, economics, energy accounting and environmental impact methods, primarily utilizing life-cycle assessment. Topics will include energy policy and initiatives such as renewable portfolio and fuel standards, green building codes, and carbon cap & trade/taxation. We will explore the relationship between land and energy use reviewing smart growth, transit-oriented development and climate action planning. Lastly, we will examine how the public planning process run the how, where, and when of energy infrastructure projects.

Prerequisites: At least 8 credits of 200 or 300-level laboratory science, and permission of the instructor.

(Spring) Photography and Landscape: Earth As Visual Text - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

Our understanding of the world around us is deeply influenced by the visual images created in response to human experience of nature. This course explores photography as a way of seeing and interpreting landscape and environment through time. Projects allow students to examine visual elements of landscape, develop photographic techniques, and create photo-narratives of their own. Using readings, observations, and photographs we consider how cultural and environmental issues and insights are communicated through photographic media. Basic understanding of photography and access to a camera are required.

(Spring) Biogeochemistry of Northern Ecosystems - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Speaking- and writing-intensive)

Global climate models and recent evidence show that ecosystems in the northern latitudes are extremely sensitive to climate change. This interdisciplinary science course examines boreal, subarctic, and arctic ecosystems through the study of nutrient cycling, plant ecology, hydrology, soil processes, and biosphere-atmosphere interactions. Topics include fundamentals of biogeochemical cycling of major elements such as carbon and nitrogen at scales from the microscopic to global, sensitivity and feedbacks to climate change, and disturbance processes such as fire and permafrost degradation.

Prerequisites: at least 8 credits of 200-level lab science and permission of the instructor. Global Biogeochemistry (Chem 232) recommended.

Film Studies

FLMST-101-01 - Film Studies - 2008-2009
(Fall) Film and History: The Remake - *Not offered this year/term
First-year seminar (Writing-intensive)

How do films about historical figures and events differ from written versions? Why do Hollywood and the world's film industries continually reimagine the events of the past (there have been over 40 films made about Joan of Arc alone), and what do audiences enjoy in these films? Through readings, discussion, and film screenings we will examine the relationship between cinema and history.

(Fall) Introduction to Film

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course teaches the basic concepts and critical skills involved in interpreting film. Through lecture, reading, discussion, and screening of films both in and outside of class, the student will become a more informed and sophisticated observer of the cinema. During the first half of the semester, the class will study form and style in narrative film as well as in nonnarrative practices such as avant-garde and documentary filmmaking. For the remainder of the course, the class will examine some of the major critical approaches in the field.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Art History 202)

Some of the best feature-length films of the past century have commanded our attention because of their compelling artistry and the imaginative ways they tell stories visually and verbally. This course closely studies narrative films from around the world, from the silent era to the present, and in the process it introduces students to the basic elements of film form, style, and narration. Some of the films to be considered are: Broken Blossoms, Battleship Potemkin, Citizen Kane, Contempt, The Bicycle Thief, Rear Window, Woman in the Dunes, The Marriage of Maria Braun, Days of Heaven, and Moulin Rouge.

(Fall) Production Seminar in the Moving Image: Eye and Ear Control: Beginning Video Production

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

In this class we plunge into the multiple, overlapping, and contradictory histories and practices of experimental film and video. We will investigate the structures of experimental media and its makers' deep understanding of craft and material. We will unpack the term "experimental" and create our own videos that engage, embrace, and dismantle traditional practices. We begin by looking at historical works and move into analyzing contemporary experimental media. This is a beginning course that covers the basics of shooting video, lighting, audio, and digital editing in the context of the above themes.

(Spring) History of World Cinema
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course offers an historical survey of the cinema as a developing art form and a means of communication. We will consider the national, economic, and social conditions of an international medium that has existed for over a century. The national and thematic focus of the course shifts through the semester. For example, we will focus on U.S. film in studying the earliest developments in film technology and narrative, Soviet and French films to study the formal and social experimentation of the 1920s, and films made in Cuba and Brazil to elucidate political filmmaking in the 1960s. The course provides a background for understanding film history and pursuing further studies in the field.

(Fall) Film Genre: Film Genre and Gender - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to a specific film genre. Some examples of genres that might be studied are: the science fiction, horror, melodrama, musical, Western, detective, or gangster film.
This course examines the development of Hollywood film genres largely in the post-studio era, particularly the musical, the melodrama, the horror film, and the science fiction film. We will consider the evolution of these four genres in relation to changes in the film industry and in American society, especially in relation to gender.

(Spring) Film Genre: Race, Ethnicity, and the Hollywood Musical - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to a specific film genre. Some examples of genres that might be studied are: the science fiction, horror, melodrama, musical, Western, detective, or gangster film.
The musical film has been the most criticized of Hollywood genres for its "escapism" and all-pervasive "whiteness." Yet it was also one of the few genres to feature and promote performers from different racial and ethnic groups such as Al Jolson, Lena Horne, and Carmen Miranda. We will examine the ways in which this prototypical Hollywood product ignored and reflected the dynamics of race and ethnicity in American society.

Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to the cinema of a single country or group of countries. Some examples that might be studied are: French cinema, Francophone cinema, Indian cinema, Eastern European cinema, or Latin American cinema.
This course is an introduction to silent cinema in the U.S. and the contexts of its reception. We will consider issues of gender, age, race, and ethnicity in the making of the cinematic audience. Contemporary forms of live entertainment, such as vaudeville, minstrelsy, burlesque, pugilism, and ethnic theatre, will be discussed in order to illuminate the broader cultural origins of American film.

(Fall) Film Authorship: Films of Margarethe von Trotta - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive; German Studies 223)
Award-winning contemporary filmmaker Margarethe von Trotta has created controversy both as a woman in a "male" domain and through her women protagonists. We study unconventional women who challenge their worlds and themselves, trying to forge a place in society and relationships which break through traditional patterns. The course also introduces basic film vocabulary and explores such cultural topics as lifestyle changes (in the
comedy Mit fünfzig küssen Männer besser), German terrorism and the tabloid press (The Lost Honor of Katharina Blum), love in divided Germany
(The Promise), a women's boycott which saved their Jewish husbands (Rosensträfzelige), and the "secret" police (Die andere Frau).

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): An advanced course in the theory and practice of film/video production as an art form. Topics for the seminar will vary
from year to year.
This advanced production course will examine relationships between language and image in film and video art. Text on screen, the resonance of the
voice, conceptual lists, experimental screenplays, online projects and video installation will inspire independent and group production. Prior work in
video production required. In addition to class projects, students will be required to write papers and give presentations. Screenings and readings may
include works by Accconci, Barthes, Benjamin, Brakhage, Cage, Camnitzer, Chion, Edison, Frampton, Gatten, Gunning, Howe, Joyce, Nauman,
Mureh, Ono, Rainer, Riggs, Rose, Snow, Tajiri, Trinh. Course registration by instructor permission only.
Prerequisites: Permission of instructor only
Notes: 1 meeting (3 hours), 1 screening (2 1/2 hours); a lab fee may be charged; Students must apply for entrance into this course. Please go to the art

(Fall) Seminar in Film Studies: Playing the Past: History on Stage and Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Theat-350f (01))
Theatre and film have a vast potential to portray, assert, question, and alienate ideas of history. Through close analyses of play texts, films and, when
possible, live theatre performances, we'll examine the overt and implied views of history in dramatizations of historical events. The course will feature
the work of artists ranging from Friedrich Schiller, Shakespeare, and Brecht to Martin Scorsese, Caryl Churchill, and Anna Deavere Smith, among
others.

(Spring) Sex, Love, and Gender in Contemporary African American Film
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Writing-intensive; Afram-340-01)
This course will explore the representation in film of intimate relationships among African Americans. Confronting an ongoing history of racist, sexist,
and homophobic images, films produced by and featuring blacks can offer alternate interpretations of love, romance, and sexuality. Coupled with
literature and theoretical readings by feminists and black cultural critics, students will consider the function of—and challenges to—intimacy in
interpersonal relationships among African Americans. Directors under consideration include Spike Lee, Kasi Lemmons, Marlon Riggs, and Sanaa
Hamri.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement  
(See French 341 -In French Component course)

Preamble (for topics courses): Offers a critical, historical, and theoretical approach to the cinema of a single country or group of countries. Some examples of national cinemas that might be studied are: French cinema, Francophone cinema, Indian cinema, Eastern European cinema, or Latin American cinema.

Born in 1923 in Senegal, the writer/filmmaker Ousmane Sembène is one of the rare witnesses of the three key periods of contemporary African history: the colonial period; the period of struggle for political and economic independence; and the period of effort to eliminate neocolonialism through the rehabilitation of African cultures. This course is entirely devoted to the works of Ousmane Sembène and will explore the key moments of his life, his activism in European leftist organizations, his discovery of writing, and most of all the dominant features of his film work.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement  
(Art History 360 (Core))

Preamble (for topics courses): Offers a critical, historical, and theoretical approach to the cinema of a single country or group of countries. Some examples of national cinemas that might be studied are: French cinema, Francophone cinema, Indian cinema, Eastern European cinema, or Latin American cinema.

How are we to respond to Indian popular film, which is notorious for its distracting song and dance numbers, meandering story line, and visually overblown spectacles? This seminar will develop historical and theoretical approaches to Indian films as what scholar Lalitha Gopalan calls a "constellation of interruptions." Students will examine feature films in class, write critical papers on scholarly essays, and pursue independent research projects on various aspects of Indian film.

Prerequisites: jr, sr, 8 credits in art history or film studies, or permission of instructor  
Notes: 1 meeting (3 hours), 1 screening (3 hours)

Instructors: A. Sinha

*(Spring)* Topics in National/Transnational Cinemas: Breaking New Ground in French Cinema

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement  
(French 331s.)

Preamble (for topics courses): Offers a critical, historical, and theoretical approach to the cinema of a single country or group of countries. Some examples of national cinemas that might be studied are: French cinema, Francophone cinema, Indian cinema, Eastern European cinema, or Latin American cinema.

From the very beginning, innovation, experimentation, and artistic ambitions have shaped the evolution of French cinema. For more than a century, filmmaking in France has been defined by these innovations: Georges Méliès and the invention of special effects, Buñuel's antics, Jean Renoir's involved narratives, the creative explosion of the New Wave, or today's adventurous directors. This class will focus on those movies and those directors that have transformed and expanded the art of cinema, and will include works by Cocteau, Varda, Pontecorvo, Godard, Clément, Truffaut, Carax, and many others. In French.

(Spring) Topics in National/Transnational Cinemas: Queer Kinship in Asian North American Literature, Film, and Video - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(English 334s (01). Component)

Preamble (for topics courses): Offers a critical, historical, and theoretical approach to the cinema of a single country or group of countries. Some examples of national cinemas that might be studied are: French cinema, Francophone cinema, Indian cinema, Eastern European cinema, or Latin American cinema.

This course examines alternative kinship formations in Asian North American cultural production. It will focus on the gender and sexual management of racial bodies since the nineteenth century—from the U.S. Page Law of 1875 that restricted Chinese women on the basis of their presumed sexual immorality to various forms of "racial castration" that mediate Asian masculinities. We will consider how alternative kinship arrangements and queer cultural projects expose and/or upset the narrative assumptions embedded in heteronormative scripts of nationalism.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive; Spanish 320s (01) Seminar on Spanish/Latin American Cinema)

Preamble (for topics courses): Film Studies 380 offers a critical, historical, and theoretical approach to a specific cinematic author. While most courses focus on a director or group of directors, courses may also focus on designers, technicians, performers, producers, or some combination of these personnel.

This course studies the films of Pedro Almodóvar, European cinema's favorite bad boy turned acclaimed auteur. On the one hand, students learn to situate films within the context of contemporary Spanish history (the transition to democracy, the advent of globalization, etc.) in order to consider the local contours of postmodern aesthetics. On the other hand, the films provide a springboard to reflect on larger theoretical and ethical debates. For instance, what can a weeping transvestite teach us about desire? What happens when plastic surgery and organ transplants become metaphors? Under what circumstances, if any, can spectators find child prostitution cute? Taught in English.

Preamble (for topics courses): You must apply for admission to this course by completing the <a href=http://snipurl.com/courserequestform>application</a>.
In the 1990s GLBT liberation entered the public sphere as a major political force. Simultaneously, American academia produced and exported a new academic discipline: queer studies. As a consequence, the North American liberalational model displaced cultural and theoretical models of sexuality of other countries. We will consider some of the key U.S. texts that have consecrated queer studies as a discipline and juxtapose them with theories and cinematic texts from Argentina, Brazil, Chile, Cuba, and Mexico in order to recuperate cultural models under erasure in the wake of the U.S. model's identity-focused and consumer-driven triumphalism.

This course will introduce students to contemporary popular culture in France and the French-speaking world, largely through the study of recent (post-1990) best-selling novels, popular music, and feature films. Students will be asked to give formal oral presentations based on up-to-date materials gathered from the Internet and/or French television and to participate actively in class discussion.
Prerequisites: French 203, or placement score of 450+, or department placement
Notes: 2 meetings (75 minutes)
Instructors: C. Rivers
Expected enrollment: 16

(Fall) Intermediate Courses in Culture and Literature: Introduction to the Civilization of France
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
(Speaking-intensive)
Preamble (for topics courses): In order to explain the complexity of present-day France, this course will explore its most conflictual historical moments—feudalism, absolute monarchy, political and social revolutions. Students will learn the social and historical context of French art and architecture.
While exploring the decisive periods of France's past, students will also examine the development of art and architecture, from the Middle Ages to the twentieth century, and familiarize themselves with the mentality of each period (emphasis on medieval cathedrals and Renaissance castles, Baroque and Rococo works of art, and nineteenth-century paintings). Course content can be found at http://www.mtholyoke.edu/courses/nvaget/.

(Fall) Period Courses: Topic: Christine de Pizan: Lyric Poet and Political Advocate (pre-1800)
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English; MEDST 300F-01)
Preamble (for topics courses): The usual periodization of French literature and culture is by century. Some period courses focus on the characteristics of specific centuries. Others focus on artistic or intellectual movements: gothic, Renaissance, romantic. All period courses, whatever their conceptual framework, integrate texts and historical contexts.
This seminar will examine the career, sources, and influence of France's first professional woman writer, exploring her uniquely varied contribution well beyond that of her famous feminist history, the City of Ladies. Along with this work, and the Romance of the Rose Debate, we shall also read selections from her innovative lyric poetry, critique of courtly romance, autobiography, manual for princes, biography of King Charles V, political and military treaties, and also religious poems and prose, culminating in her patriotic hymn to Joan of Arc.

Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor

Notes: NOTE: French majors must do the readings and papers in French for credit toward the major; 1 meeting (2 hours, 50 minutes)

Instructors: N. Margolis

Expected enrollment: 16

(Spring) Period Courses: Topic: From Baroque to Rococo: Viewpoints on Aristocratic Societies of the Ancien Régime (pre-1800)

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): The usual periodization of French literature and culture is by century. Some period courses focus on the characteristics of specific centuries. Others focus on artistic or intellectual movements: gothic, Renaissance, romantic. All period courses, whatever their conceptual framework, integrate texts and historical contexts.

Through the study of novels, plays, and visual arts, we will contrast French society in the age of Baroque (when Louis XIV ruled with absolute authority, 1660-1715) with the Rococo period that followed when French aristocrats enjoyed their privileged status adopting a life of selfish frivolity and libertinage (1615-1789). Works studied will include novels by Madame de Lafayette and Choderlos de Laclos; plays by Molière, Marivaux, and Beaumarchais; and emblematic paintings of Baroque and Rococo artists. These times will be revisited through contemporary period films such as Le Roi des dames (2000), Velleda (1989), Radieux, and Marie-Antoinette (2006).

Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor

Notes: 1 meeting (2 hours, 50 minutes)

Instructors: N. Vaget

(Spring) Seminar in Romance Languages and Literatures: Topic: The Mind of the Traveler: Journeys, Expeditions, Tours

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Taught in English; Spanish 361, Italian 361, Romance Languages and Literatures 375, European Studies 316)

Preamble (for topics courses): This interdisciplinary seminar will focus on a comparative study of Romance languages or literatures. Topics will vary from semester to semester. Seminar discussions will be conducted in English, but students are expected to read works and write papers in French.

Travel literature has always been a precious source for the study of culture, politics, arts, and, last but not least, people. From Caesar to Marco Polo, from Stendhal to Carmen de Burgos, we will read and discuss authors who traveled for political, personal, and recreational reasons. We will also pay special attention to tales of emigration and immigration in the third millennium.

Prerequisites: Permission of instructor. Students who wish to receive 300-level credit in French must write their papers and do appropriate course readings in French.

Notes: 1 meeting (2 hours, 50 minutes)

FREN-331-01 - French - 2008-2009

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): These courses examine a definable phenomenon—an idea, a movement, an event, a mentality, a cultural structure or system, an historical problem, a critical mode–relevent to the civilization of France or of French-speaking countries. Readings from a variety of disciplines shed light on the particular aspect of thought or culture being studied.

From the very beginning, innovation, experimentation, and artistic ambitions have shaped the evolution of French cinema. For more than a century, filmmaking in France has been defined by these innovations: Georges Méliès and the invention of special effects, Buñuel's antics, Jean Renoir's involved narratives, the creative explosion of the New Wave, or today's adventurous directors. This class will focus on those movies and those directors that have transformed and expanded the art of cinema, and will include works by Cocteau, Varda, Pontecorvo, Godard, Clément, Truffaut, Carax, and many others.

Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor

Notes: 1 meeting (2 hours, 50 minutes)

Instructors: F. Guévremont

Expected enrollment: 16

(Fall) Courses in Francophone Studies: Topic: Ousmane Sembène: L'oeuvre d'un artist-militant

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): These courses study nonmetropolitan French-speaking cultures and literary works written in French outside Europe. Areas of focus are one or more of the following regions: Africa, the Caribbean, or Canada.
Born in 1923 in Senegal, the writer/filmmaker Ousmane Sembène is one of the rare witnesses of the three key periods of contemporary African history: the colonial period; the period of struggle for political and economic independence; and the period of effort to eliminate neocolonialism through the rehabilitation of African cultures. This course is entirely devoted to the works of Ousmane Sembène and will explore the key moments of his life, his activism in European leftist organizations, his discovery of writing, and most of all the dominant features of his film work.

Prerequisites: 215, 219, 225, or 230

Notes: 1 meeting (2 hours, 50 minutes)

(Fall) Courses on Women and Gender: Topic: Mothers and Daughters

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(GNDST 333)

Preamble (for topics courses): These courses explore cultural, literary, and social issues relating to women and gender identities in France and French-speaking countries. Topics may include women’s writing, writing about women and men, the status of women, feminist criticism, and theories of sexuality and sexual difference.

Study of this crucial and problematic relationship in novels, films, and paintings by French-speaking women representing diverse cultures and historical periods. Exploration of the mother-daughter bond as literary theme, social institution, psychological dynamic, and metaphor for female creativity.

Preliminary readings include founding myths and influential theories of family arrangements (Rousseau, Freud, Chodorow, Rich, Irigaray, Mernissi, Naameka). Major authors and films will be grouped cross-culturally by theme and may include: LaFayette, Charrière, Sand, Colette, Beauvoir, Ernaux, Hébert, Chen, Schwarz-Bart, Beyala, Bouaroui; La maternelle; Indochine; Les silences du palais.

Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor

Notes: 1 meeting (2 hours, 50 minutes)

Instructors: E. Gelfand

(Spring) Courses on Women and Gender: Topic: Love for Sale: The Figure of the Prostitute in French Literature and Culture

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(Gender Studies 333)

Preamble (for topics courses): These courses explore cultural, literary, and social issues relating to women and gender identities in France and French-speaking countries. Topics may include women’s writing, writing about women and men, the status of women, feminist criticism, and theories of sexuality and sexual difference.

This course will examine the ubiquitous figure of the prostitute in works of narrative fiction by the great French authors of the nineteenth century (Balzac, Dumas, Maupassant, Zola). Specifically, we will analyze the ways in which the prostitute serves in so many texts as a reflection of broader social and literary questions: female sexuality, links between sex and money, family honor, the evolution of realism in narrative fiction, et al.

Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor

Notes: 1 meeting (2 hours, 50 minutes)

Instructors: C. Rivers

Expected enrollment: 16

(Fall) Courses in Advanced Language Study: Topic: Atelier de traduction

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): These courses investigate the French language, past or present, and refine students’ linguistics skills by focusing on nuances of written and spoken expression. Areas of study may include stylistics, translation, phonology, morphology, syntax, rhetoric, and dramatic art.

This course is designed to give students practical, hands-on experience in the translation, from French to English, of a literary work. We will begin the semester with readings in translation theory before moving on to the selection (by students) of a literary text. Students will work collaboratively in teams on a collective translation; teams will meet on a weekly basis with the professor for a detailed review of the work in progress. At the end of the semester, each team will submit the definitive version of their translation as well as a paper reflecting on the particular linguistic challenges encountered and their resolution thereof.

Prerequisites: two of 215, 219, 225, or 230; or permission of department chair and course instructor

Notes: 1 meeting (2 hours, 50 minutes). NOTE: Limited to students who have taken at least two 300-level French courses or, in special cases, per instructor. May be used for written part of advanced language requirement for the French major.

Instructors: C. Rivers

FREN-370-01 - French - 2008-2009

(Fall) Advanced Level Seminar: Topic: The Detective Novel in France

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Preamble (for topics courses): The seminar is intended to challenge students at the highest level. A regular rotation of topics ensures a variety of perspectives across genre and period, encompassing linguistic, literary, theoretical, and cultural issues of French and Francophone studies. Development of critical skills is stressed through classroom discussion and critique of writing projects, drawing on individual student interests and experiences as they relate to the topic of the course.

The French detective novel found its origins in Poe and in the disillusionment and malaise of the increasingly urban universe of the nineteenth century. It generally centered on a dark, mysterious Parisian atmosphere that spoke to a growing public awareness of the worlds of crime and of the police. Realist novelists, in particular Dostoevsky, enriched the genre's conventions, but the detective novel evolved beyond realism as it moved into the twentieth century, combining unsettling social critique with reassuringly flawless reasoning.

Prerequisites: 12 credits including two courses at the advanced level, or permission of department chair and instructor
Notes: 1 meeting (2 hours, 50 minutes)

Gender Studies

GNDST-101-01 - Gender Studies - 2008-2009
(Fall) Introduction to Gender Studies
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Speaking-intensive)
This course examines the social and historical construction of gender from cross-cultural and interdisciplinary perspectives. The intersections among gender, race, class, and sexuality in various contexts, past and present, will be central to our inquiry. Topics will include the politics of appearance, women's economic status, sexual violence, racism, legacies of colonialism, the challenges of transnational feminist activism, and strategies for change. We will examine the development of feminist theory and its practices in various local and transnational contexts.

(Fall) Gender and Power in the History of Mount Holyoke College
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar (Writing-intensive; History 101f (03))
Mary Lyon, founder in 1837 of Mount Holyoke Female Seminary, held out to her students the possibility that they might transform the world—a tall order for young women who were excluded from proper citizenship and political power. To Lyon, duty, discipline, and community would make it possible. What transformations ensued? And what can we learn from them about the complexities of gender and power? This course will introduce students to the craft of historical research through the richness of the College Archives. Special attention will be paid to the College's missionary past, its role in labor research and activism, and the place of racism and antiracism in its history.
Notes: 3 meetings (75 minutes)

GNDST-201-01 - Gender Studies - 2008-2009
(Spring) Methods and Practices in Feminist Scholarship
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
How do scholars produce knowledge? What can we learn from differences and similarities in the research process of a novelist, a biologist, an historian, a sociologist, and a film critic? Who decides what counts as knowledge? We will examine a range of methods from the humanities, social sciences, and natural sciences, including visual analysis, archival exploration, interviewing, and ethnography, as we consider the specific advantages (and potential limitations) of diverse disciplinary approaches for feminist inquiry. We will take up numerous practical questions as well as larger methodological and ethical debates. This course provides a foundation for advanced work in the major.
Prerequisites: Gender Studies 101; one laboratory course in a natural or physical science (completed or taken concurrently); or permission of the instructor
Notes: 2 meetings (75 minutes)

(Fall) Women and Gender in the Study of Culture: Protest and Pleasure
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(English 271)
In this course we will examine the work of American women writers with an emphasis on the themes of protest and pleasure. Material will range from the overtly political to the intensely personal, will often merge the two, and will date from the late-nineteenth century to today. Despite our long-standing reputation for being "emotional," both outrage and ecstasy have oft been considered taboo for women. Yet women have been motivated by each to pick up the pen and have proved influential as writers on these themes. Authors will range from Emma Goldman, Ida B. Wells and Kate Chopin to Audre Lorde, Adrienne Rich, and Dorothy Allison.
Prerequisites: soph, jr, sr; English 240, 241, or 270 recommended
Notes: 2 meetings (75 minutes)
Instructors: S. Davis
Expected enrollment: 20

(Spring) Women and Gender in the Study of Culture: Black Women Writers: Feminist Visions from the African Diaspora
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Writing-intensive; African American and African Studies 206)
This course will explore the influence of feminist politics on the writing of women throughout the African Diaspora. By exploring the different cultural, political, and historical contexts in which these writers work, we will attempt to define the continuities and conflicts that exist within the vast field of black women's writing. Why, when, and how did a black feminist consciousness emerge? How did racial tensions within the predominantly white feminist movement lead to the development of a separate black "womanist"/Third World agenda? How does feminist literature of the African Diaspora challenge negative stereotypes and misrepresentations of black women's realities?

Prerequisites: AFRAM 101 Intro to African American Studies, or permission of instructor

(Fall) Women and Gender in History: American Women's History, From Settlement to the Civil War
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(History 275)
Introduction to major themes in U.S. history through the lens of women's history. Located both near the centers of power in American society and at its margins, the history of women as a social group is one of conflict and diversity. While women do not make up a coherent group, all share the unique experience of being "women" in class, racial, and religiously specific ways. Themes include Native American and Hispanic women during European contact and settlement; the impact of the American Revolution; benevolent women and the "fallen" women they hoped to help; enslaved women and the plantation mistress; women in the multicultural west; women's involvement in the Civil War and Reconstruction.

(Spring) Women and Gender in History: African Women's Work, 1880-1980
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(History 296)
Transformations in gendered divisions of labor and in women's access to resources are fundamental to understanding contemporary African societies. We explore how African women have created contexts for productivity using strategies such as marriage, pledged female friendship, and voluntary dependency. We investigate the loss of women's work of governing in the colonial period, and the consequences for women's wealth and productivity of incorporation into a global market economy. Texts include recorded life histories, autobiography, fiction, and film, and primary sources such as the testimony of participants in the Ibo Women's War of 1929.

(Fall) Women and Gender in Philosophy and Religion: Women in American Religious History
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Religion 218)
This course is a critical study of significant women (Anne Hutchinson, Mother Ann Lee, Mary Baker Eddy, Ellen Gould White, Aimee Semple McPherson, Dorothy Day, and others) and their roles in the pluralistic character of American religion. It raises central questions concerning leadership, marginality, deviant behavior, and criticism of women. Students are expected to contribute to the course by their participation and individual research.

(Spring) Women and Gender in Philosophy and Religion: Women and Buddhism
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
The course examines Buddhist representations of women and women's representations of Buddhism. We will study materials by and about Buddhist women from Thailand, India, China, Tibet, Japan, and the U.S. Some of the questions we will ask are: How are women portrayed in Buddhist literature? How do they portray themselves? How have Buddhist women responded to sexism in their communities? How have Buddhist women contributed to the development of new Buddhist institutions?

Notes: 2 meetings (75 minutes)
Instructors: S. Mrozik

(Fall) Women and Gender in the Social Sciences: Gender and the City
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course examines the dynamic relationship between gender and urban space in the United States. We will consider theories of place (Chicago School urban ecology, Hannerz, Lefebvre, de Certeau, Zukin, Sassen) to understand cities as symbols and as products of political and economic processes. Racism, gentrification, labor migration, immigration—and designations such as slum, ghetto, neighborhood, and cosmopolitan—are topics central to this course.

(Fall) Feminist Theory: Invitation to Feminist Theory
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Politics 233)
This course explores the overlapping dualities of the feminine and the masculine, the private and the public, the home and the world. We examine different forms of power over the body; the ways gender and sexual identities reinforce or challenge the established order, and the cultural determinants of "women's emancipation." We emphasize the politics of feminism, dealing with themes that include culture, democracy, and the particularly political role of theory and on theoretical attempts to grasp the complex ties and tensions between sex, gender, and power.
Prerequisites: soph, jr, sr

(Spring) Feminist Theory: Voicing Traditions, Changing Conditions
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Do women as a group, in Gilligan's words, speak "in a different voice"? This course examines the history of feminist theory through an investigation of "voice." Does a focus on voice privilege western European feminist traditions? How have debates over who may speak for marginalized women facilitated feminist interdisciplinary dialogue on topics such as violence against women, class oppression, and racism? We will explore these questions in literature, film, and scholarship in anthropology, psychology, and socio-linguistics.

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Physics 211)
This course examines explanations for the under-representation of women in science, technology, engineering, and math (STEM) with an eye to identifying how to increase the participation of women in science. The course will address questions about gender differences in cognition and ability, the role of stereotyping, as well as the "leaky pipeline" issue, that is, the rate and timing of the departure of women from scientific fields. Course readings will explore the psychology of gender, as it relates to STEM. In addition, we will read research from physical scientists, reports from professional organizations such as the American Physical Society, and reports from congressional committees.

(Anthropology 216)
This course will address the predicaments of women who must negotiate local contexts shaped by transnational markets, changing patterns of agriculture and agro-forestry, and struggles over indigenous land rights. How have arguments about democracy shaped the struggles women take up locally, nationally, and transnationally in opposition to corporate power, national policies, and supranational agencies such as the World Trade Organization?

(Fall) Seminar: Anthropology and Sexualities
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This seminar focuses on contemporary anthropological scholarship concerned with the varieties of sexual expression in diverse cultural settings. We will read ethnographic accounts of sexual ideologies and the politics and practices of sexuality in Brazil, Japan, Native North America, India, and elsewhere. We will examine anthropological theories of sexuality with an emphasis on contemporary issues, including performance theory, "third gender" theories, sexual identity formulation, and techniques used by various societies to discipline the body.
Prerequisites: sr or jr major in anthropology or gender studies, plus 8 credits in anthropology
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: L. Morgan
Expected enrollment: 20

(Spring) Seminar: Gender, Food and Agriculture in the Global Context
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement (ANTHR-316-02)
This course explores the gendered domains of food and agriculture as they unfold within household and community economies in the global south and in G-8 countries. We will examine the place of women in systems of food production, processing, marketing, and consumption. We will address locally regulated markets, cuisines, and peasant farming systems as they interface with international neo-liberal systems of market and trade. We will also pay close attention to emergent women's agricultural cooperatives and unions as they shape new transnational coalitions that offer sustainable (and flourishing) solutions to problems associated with post-industrial agriculture.

(Fall) Seminar: Bodily Desires: Sexuality in the U.S. from 1900 to the Present
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement (History 301)
In this seminar, we will study the history of sexuality, desire, and bodies. The premise of this interdisciplinary seminar is that sexuality is both historically constructed (fluid and changing over time and culture) and embodied and lived (experienced for many as essential and unchanging). We will study experts who set out terms and frameworks for understanding modern sexuality; how in different ways and in different times communities of sexual minorities strategically used selected elements of expert discourse to forge their own narratives of self and desire. Students will examine sexual classifications—mainstream and "normal" or subcultural and "deviant"—as mutually constructed.
Prerequisites: permission of instructor; 8 credits in history or equivalent preparation; written application prior to academic advising period (http://www.mtholyoke.edu/acad/hist/application.shtml) is required
Notes: 1 meeting (2 hours, 50 minutes)

Logocentric thinking is characterized by the desire for a center or original guarantee of all meaning, and has dominated the Western world since Greek antiquity. It attempts to repress difference in favor of identity and presence. Feminists have extended the concept to talk about phallogocentrism as the logical underpinning of patriarchy. In this course, we will study attempts at breaking with the (phal)logocentric model of subjectivity, many of which have emerged in the mestizo/a continent.

With the growth of Afro-Latin American literary studies, there has been a growing interest in the recovery and the study of works by women of African descent. This course will examine the intersections of ethnic, cultural, national, class, sexual, and gender identities in representative texts (poems, short stories, essays, testimonios, and film) by Afro-Latina and Afro-Latin American women. We will discuss the construction and meaning of "race," color, and racialized gender roles. Secondary objectives include the development of research and writing skills and rudimentary orientation on various regional ethnic and feminist, cultural, and post/neocolonial theories.

Prerequisites: two of the following: Spanish 221, 235, 237, 244, 246, or permission of instructor

Notes: 1 meetings (2 hours, 50 minutes); taught in Spanish

In this course we will look at media and legal representations of prisoners and especially at the writing of prisoners themselves. Authors include Barbara Harlow, Jennifer Gonnerman, Mumia Abu-Jamal, George Jackson, and Salwa Bakr. Movies may include Dead Man Walking and Aileen Wuornos: The Selling of a Serial Killer. Some are castigated as rule breakers; structures are built for them, and in these realms men and women are cordoned off, envisioned and held separately in their transgressions—what stories emerge from the prisoners' mouths? Do those stories challenge the deep architecture of the prisons themselves?

Prerequisites: jr, sr, 8 credits in English

Notes: 2 meetings (75 minutes)

Instructors: S. Davis

This course will explore representations of violence in African American culture, with special consideration given to literary depictions of rape and lynching. After examining the historical function of violence within the United States, students will perform a comparative analysis of texts authored by black women and men. We will also explore cultural, social, and political movements (abolition, civil rights, black power, black feminism, hip-hop) that have emerged in response to the violent policing of black bodies. How has violence been used to terrorize blacks? What role has violence played in the African American struggle for liberation and equality?

Prerequisites: 8 credits in African American and African Studies or permission of instructor

Notes: 1 meeting (3 hours)

Instructors: Z. Elliott

In Chaucer's Troilus and Criseyde, love is a destructive force that fazes those who make it their end: loving Criseyde results in losing her, and in the loss of her, the narrator loses his soul. This course will focus on the construction and function of this love story, as well as the lasting legacy of the romance genre. The initial section will explore the ways in which Troilus and Criseyde serve as an allegory for the political realm of war and peace. The course will then turn to the gallery of women who inhabit the poem, who are no more than motives for desire and action, and who are often seen only as the objects of desire of men. The final section of the course will focus on the role of the narrator, who is also the teller of the tale of his own loss and redemption. The class will focus on the textual and interpretive challenges of the poem, as well as on the larger implications of its structure and meaning.

Prerequisites: 8 credits in English

Notes: 1 meeting (2 hours, 50 minutes); taught in Spanish

Instructors: C. Gundermann
This course will read Chaucer's great love story *Troilus and Criseyde*, an exploration of love, compulsion, and betrayal, within the multiple intellectual contexts that framed the narrative for a late medieval audience: close attention to issues of free will, women's agency, the story of Troy in medieval literature, love as obsession, chivalry and war, construction of medieval authorship. We will also explore Chaucer's poetic achievement in this poem long recognized as his master work.

Prerequisites: soph, jr, sr, 8 credits in English or medieval studies

This seminar will focus on depictions of war in the context of gender. When asked how we might prevent war, Virginia Woolf suggested that we must invent new language and methods rather than follow the path of the traditional "procession of educated men." What language emerges in works about the effects of war? Texts will include essays and films as well as selected works by writers such as Alcott, Whitman, Crane, Twain, Hemingway, Woolf, Silko, Morrison, and O'Brien.

**(Spring) Seminar: Research in American Women's History**

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(History 381 and American Studies 301)

In this research seminar we will be looking at American women's history through a range of women's writings, including memoirs, letters, and diaries as well as oral histories, first-person accounts, and literature from the 1890s to the present. Attention will be paid to the role of personal narrative in the writing of history and the place of history in personal writing. Students will do an oral history of a friend or family member, a biographical essay on a woman in the past, and produce a 25-page research paper on a topic of their choice. Trips to local archives will help students who are unfamiliar with historical research gain confidence.

**(Fall) Seminar: Mothers and Daughters (taught in French)**

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
(French 351)

Study of this crucial and problematic relationship in novels, films, and paintings by French-speaking women representing diverse cultures and historical periods. Exploration of the mother-daughter bond as literary theme, social institution, psychological dynamic, and metaphor for female creativity. Preliminary readings include founding myths and influential theories of family arrangements (Rousseau, Freud, Chodorow, Rich, Irigaray, Mernissi, Nnaemeka). Major authors and films will be grouped cross-culturally by theme and may include: LaFayette, Charrière, Sand, Colette, Beauvoir, Ernaux, Hébert, Chen, Schwarz-Bart, Beyala, Bouraoui; *La maternelle; Indochine; Les silences du palais.*

Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of French department chair and course instructor

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Writing-intensive; African American and African Studies 340)

This course will explore the representation in film of intimate relationships among African Americans. Confronting an ongoing history of racist, sexist, and homophobic images, films produced by and featuring blacks can offer alternate interpretations of love, romance, and sexuality. Coupled with literature and theoretical readings by feminists and black cultural critics, students will consider the function of--and challenges to--intimacy in interpersonal relationships among African Americans. Directors under consideration include Spike Lee, Kasi Lemmons, Marlon Riggs, and Sanaa Hamri.

Prerequisites: Afram 101 plus 8 credits in African American and African Studies or permission of instructor

(Fall) Seminar: Recasting History: Power and Gender in Early Modern Spain (taught in Spanish)

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Spanish 332)

This course looks at Early Modern Spanish history (1500-1700), through the lens of the complex connections between gender and other dimensions of power and culture (e.g., religion, class, sexuality, and race), by focusing on how gender differences/expectations and women's agency were negotiated at the time. Recasting history and including gender as a category of analysis not only help us understand the impact of women in Early Modern Spain, but also force us to rethink other important historical categories (e.g., power/authority, private/public). Objects of study include letters, legal texts, (auto)biographies, political treatises, books of conduct, as well as paintings and movies.

(Spring) Seminar: Feminist Theory and Film

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking- and writing-intensive; English 385)

This seminar investigates contemporary feminist theory—including but not limited to feminist film theory—in relation to film. We will examine the influential formulations of the cinematic "male gaze" and women's film, recent theorizations of race and sexuality in cinema, gender complexities in classic and contemporary Hollywood film, and new trends in filmmaking by women. Requirements include extensive readings, weekly essays, and film screenings.

Prerequisites: jr, sr, 8 credits in English and/or Gender Studies beyond English 101, and permission of instructor; Film Studies 201 and/or other background in film strongly recommended

Notes: 1 meeting (2 hours, 50 minutes) plus evening screening; meets English department seminar requirement; meets Gender Studies department feminist theory requirement; You must apply for admission to this course by completing the <a href="http://snipurl.com/courserequestform">application</a>.

(Fall) Seminar: Traveling Women and Tired Bodies: Gender, Migration, and Immigration

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course examines contemporary global population movements through the lens of gender studies. How have neoliberal political and economic frameworks shaped gendered migration experiences since the 1990s? We will consider refugee sites in Africa and Europe; the market for maids in Indonesia and the Philippines; the role of social networks, documentation, and family reunification policies in the United States; differences in status for refugees, displaced persons, immigrants, and asylum seekers; and theories of transnational social organization. We will be especially attentive to symbols of group identity linked to race, ethnicity, nation, language, and labor.

Prerequisites: 8 credits of gender studies and/or anthropology or permission of instructor

(Spring) Seminar: Gender and Class in the Victorian Novel

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(English 323)

This course will investigate how representations of gender and class serve as a structuring principle in the development of the genre of the Victorian novel in Britain. We will devote significant attention to the construction of Victorian femininity and masculinity in relation to class identity, marriage as a sexual contract, and the gendering of labor. The texts chosen for this course also reveal how gender and class are constructed in relation to other axes of identity in the period, such as race, sexuality, and national character. Novelists will include Dickens, Eliot, Gaskell, C. Bronte, and Hardy. Supplementary readings in literary criticism and theory.

Prerequisites: jr, sr, 8 credits in department including English 220, 230, or permission of instructor

Notes: 2 meetings (75 minutes); meets English department 1700-1900 requirement

(Spring) Seminar: Feminist Theologies
Mary Daly, Elisabeth Schussler Fiorenza, Phyllis Trible, and Judith Plaskow, among others, have argued that traditional Jewish and Christian theological systems have overlooked the needs, concerns, histories, and contributions of women. Their challenges range from the historical modification of a presumably unbiased religious system to the outright rejection of a so-called patriarchal establishment. Whatever their approach, feminist theologies offer diverse and incisive tools for understanding how a theological system operates, how transitory cultural assumptions become embedded in ongoing doctrines, and how apparently minor adjustments can have significant ripple effects.

*(Spring) Seminar: Love for Sale: The Figure of the Prostitute in French Literature and Culture (taught in French)*

Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

(French 351)

This course will examine the ubiquitous figure of the prostitute in works of narrative fiction by the great French authors of the nineteenth century (Balzac, Dumas, Maupassant, Zola). Specifically, we will analyze the ways in which the prostitute serves in so many texts as a reflection of broader social and literary questions: female sexuality, links between sex and money, family honor, the evolution of realism in narrative fiction, et al.

Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of French department chair and course instructor

*(Spring) Seminar: Jewish Women’s Literature: A Feminist Tradition?*

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Jewish Studies 350 and English 393)

This course will explore the rich literature written by religious and secular Jewish women, including memoirs, fiction, poetry, and criticism. While most of this writing comes from the modern and contemporary periods—the primary focus of this course—we will also study examples of early modern women’s authorship. Our writers are drawn from diverse geographies, and articulate a wide range of creative responses to modernity, secularization, nationalism, political radicalization, violence, exile and migration, and literary experimentation.

Prerequisites: 4 credits in religion or Jewish studies, or permission of instructor

*(Spring) Seminar: Gender and Sexuality in Latin America*

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Latam-387, Hist-387)

This course introduces students to the emerging historiography on gender and sexuality in Latin America. We examine themes of changing gender roles and shifting constructions of masculinity, femininity and honor in Latin America, with particular attention to issues of sexuality, sexual preference, sexual constraints, and sexual transgressions. The course also focuses on how class and race intersect with gender in the construction of identities, social roles, and sexual relations. Readings include works on the colonial period and the 19th century, but most of the course will focus on these issues in the context of the 20th century.

Prerequisites: jr, sr, 8 credits in Latin American or Gender Studies or related field, or permission of instructor

Notes: 1 meeting (2 hours 30 minutes)

Instructors: S. Sarzynski

*(Spring) Seminar: Gender, Health, and HIV/AIDS in Africa*

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This seminar will examine gender as a determinant of health and well-being as well as how sex and gender interact with other factors to influence health in Sub-Saharan Africa. A major focus of the course will be the case of HIV/AIDS, which disproportionately affects women, who constitute 61% of those living with HIV. HIV/AIDS has wreaked devastation across Africa, vastly undermining the fight against poverty, reversing development gains, and compounding the struggle for food security, education and economic growth. We will also consider other gender-based health problems including violence against women, child abuse, trafficking, and the dangers of commercial sex work.

Prerequisites: Gender Studies 101; 4 more credits in Gender Studies or African Studies. Online application required; see http://www.mtholyoke.edu/acad/womst/application.html

(Spring) Seminar: Race, Gender, and Empire: Cultural Histories of the United States and the World - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(History 301)
Recent cultural histories of imperialism--European as well as U.S.--have illuminated the workings of race and gender at the heart of imperial encounters. This course will examine the United States' relationship to imperialism through the lens of such cultural histories. How has the encounter between Europe and America been remembered in the United States? How has the cultural construction of "America" and its "others" called into play racial and gender identities? How have the legacies of slavery been entwined with U.S. imperial ambitions at different times? And what can we learn from transnational approaches to "the intimacies of empire"?

(Spring) Field Placement
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Community-based learning course; Speaking-intensive)
This course presents an opportunity for students to apply gender theory to practice and synthesize their work in gender studies. Connections between the academy and the community, scholarship and social action will be emphasized. Students will arrange for a placement at a non-profit organization, business or institution that incorporates a gender focus. A weekly seminar with other students provides a structured reflection forum to analyze experience and methods.

(Fall) Senior Seminar
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This year-long capstone course brings seniors together to think through relationships among empirical research, theory, activism, and practice in gender studies. Majors with diverse interests, perspectives, and expertise (and other seniors with substantial background in the field) will have the opportunity to reflect on the significance of their gender studies education in relation to their current work (including work in 333s, 390, 395), their academic studies as a whole, and their plans for the future. Course readings and discussion will be shaped by students in collaboration with the instructor. This course continues in the spring semester as Gender Studies 392.
Prerequisites: Seniors only, GNDST 101, GNDST 221, GNDST 250, GNDST 333, 20 credits in gender studies and/or related courses, written application for permission required.

(Fall) World Regional Geography
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Surveys physical and human geographic patterns, providing a comprehensive background discussion of individual regions. Analyzes each region in terms of its environmental base and resource distribution, agricultural systems and rural development, population growth and characteristics, and patterns of urbanization and industrial growth.
Notes: 2 meetings (75 minutes)
Instructors: J. Long

GEOG-107-01 - Geography - 2008-2009
(Fall) Introduction to the Physical Environment
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
A systematic introduction to the processes operating on the surface of the earth, their spatial variation, and their contribution to the spatial patterning of life on earth. The course stresses interactions among climate, landforms, soils, and vegetation and examines human impacts on environmental systems.
Notes: 2 meetings (75 minutes)
Instructors: T. Millette
Expected enrollment: 60

(Spring) Cities of the Twenty-first Century
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This is an introductory geography course on World Cities and Urban Systems. We focus on processes that produce spatial differences and inter-relations within and between cities across the world. Cities of the Twenty-first Century, incorporating theoretical, critical and empirical approaches, covers a range of topics, including historical development of cities; colonial and post-colonial structures in Third World cities; urban governance; social patterns within cities; urban economies; urban planning; urban environment, and the linkages among all these.
Prerequisites: Any 100-level geography and or social science class
Notes: 2 meetings (75 minutes)
Instructors: W. Ahmed
Expected enrollment: 25

GEOG-205-01 - Geography - 2008-2009
(Fall) Mapping and Spatial Analysis
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Provides a comprehensive introduction to maps, including their design, compilation, and computer production. Introduces students to the principles of abstracting the Earth's surface into spatial databases using GIS, remote sensing, and Global Positioning Satellites.
Notes: 2 meetings (75-min)
Instructors: T. Millette

GEOG-206-01 - Geography - 2008-2009
(Spring) Political Geography
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Systematically studies political phenomena and their geographic expression, at a variety of spatial scales - national, regional, and international. Major themes include nation-state formation, boundary, territory, and ethnic issues, regional blocs and spheres of influence, and conflicts over access to and use of resources.
Notes: 2 meetings (75-minutes)
Instructors: J. Long
Expected enrollment: 30

GEOG-214-01 - Geography - 2008-2009
(Fall) Geography of South Asia
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The region is studied in terms of its physical, cultural, and political geography. Emphasis is given to the numerous ways in which the peoples of South Asia have adapted to and utilized their local environments, the reasons for varying patterns of population growth throughout the region, and the environmental impact of economic development programs.
Notes: 1 meeting (2 hours)

GEOG-304-01 - Geography - 2008-2009
(Spring) Regional and Town Planning
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Regional Planning. (Formally Planning & the Environment) This course examines the shift from planning as an urban issue to the recognition that planning decisions often have broader regional impacts. The first part of the semester will survey urban planning efforts from the early 1900s through the 1960s. The second half of the semester will focus on the "new" comprehensive planning efforts, using growth management of urbanization to protect rural areas, agricultural lands and sensitive environments. Emphasis will be placed on current "Smart Growth" approaches to development.
Prerequisites: Any 200-level geography course
Notes: 1 meeting (3 hours)
Instructors: T. Millette
Expected enrollment: 15

GEOG-307-01 - Geography - 2008-2009
(Spring) Remote Sensing - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course presents the fundamentals of digital analysis of aerial satellite imagery. Students are introduced to the characteristics of Earth images and learn to make qualitative and quantitative assessments of multispectrum and satellite data. Basic photo interpretation exercises are complemented with computer analysis of satellite data for land use and land cover analysis, forest modeling, and urban hydrology.
Prerequisites: Geography 205
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: T. Millette
Section Instructors: 01 LAB The department
Expected enrollment: 12

GEOG-311-01 - Geography - 2008-2009
(Fall) Seminars: Third World Development
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Preamble (for topics courses): These seminars present selected topics in geography that reflect contemporary problems, current geographical ideas, philosophical and methodological trends in geography, and/or the history and development of geographical thought.
Offers an interdisciplinary perspective on social, economic, and political features of contemporary development in Africa, Asia, and Latin America, regions referred to as the Third World or the South, and provides an introduction to theoretical origins and definitions of economic growth, development, and underdevelopment. It then addresses more specific aspects of development such as trends in population growth, migration, and urbanization; agrarian change; livelihood strategies and aspects of social welfare such as health, education, and shelter; poverty and the environment; and external economic relationships. The latter part of the course draws extensively on selected case studies.
Prerequisites: jr., sr., 4 credits in department and 4 credits in related social sciences at 200 level or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: J. Long
Expected enrollment: 20

GEOG-311-02 - Geography - 2008-2009
(Fall) Seminars: Geographies of Globalization
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Preamble (for topics courses): These seminars present selected topics in geography that reflect contemporary problems, current geographical ideas, philosophical and methodological trends in geography, and/or the history and development of geographical thought.

Using case studies, this course examines the effects of globalization on the well-being of communities in developing societies. The course traces the complex interactions of globalization with social, economic, and political processes around the world and the ways in which different groups and communities have mobilized to respond to globalization's challenges.

Prerequisites: jr., sr., 4 credits in department and 4 credits in related social sciences at 200 level or permission of instructor

Notes: 1 meeting (3 hours)
Instructors: W. Ahmed
Expected enrollment: 20

GEOG-312-01 - Geography - 2008-2009
(Spring) Seminars: Perspectives on Global Food Issues
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course offers an interdisciplinary perspective on the environmental, economic, and cultural relationship between producers and consumers in the global food network. The seminar begins with an examination of the driving forces of food commodity consumption, and then explores the entrenched agro-economic links between industrialized countries and the developing world. The remainder of the seminar addresses ecological sustainability and food supply as they relate to this global relationship.

Prerequisites: jr, sr and 4 credits from the department and 4 200 level related social science credits
Notes: 1 meeting (3 hours)
Instructors: J. Long
Expected enrollment: 15

GEOG-319-01 - Geography - 2008-2009
(Fall) Africa: Problems and Prospects - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking-intensive)
This course intends to offer an interdisciplinary perspective on selected contemporary development problems in Africa south of the Sahara. Central to the course will be an examination of the social, economic, and political consequences of colonialism, the physical resource base and ecological crisis, agrarian systems and rural development, gender relations and development, urbanization and industrialization, and the problems and prospects of regional cooperation and integration.

Prerequisites: jr, sr, soph with permission of instructor; 4 credits in department and 4 credits at the 200 level in geography or related social science.
Notes: 1 meeting (3 hours)
Instructors: G. Kebbede

GEOG-321-01 - Geography - 2008-2009
(Spring) Geographic Information Systems
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
In this course, students will apply the skills they have learned in Geography 205 to a real-world problem. Data from various sources are combined to create a spatial database from which a spatial model is derived. Synthesis and manipulation of spatial data are used to undertake analysis of land cover change for the last 20 years in Massachusetts, with emphasis in the Pioneer Valley. The end result is a study of the factors that influence changes from undeveloped to developed land.

Prerequisites: Geography 205 or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: E. Marcano
Expected enrollment: 10

**Geology**

**GEOL-100-01 - Geology - 2008-2009**

*(Spring) Physical Geology*

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

From earthquakes to landscapes, minerals to glaciers, this course introduces the surficial and internal processes of the earth. Learn to interpret the geology of your surroundings when traveling to new places and understand how geologic setting influences how people live. Labs focus on rock identification, map reading, the geology of fossil fuels and nuclear energy, and local field trips. Grades depend on exams, lab exercises, and lab quizzes.

Prerequisites: Preference given to first- and second-year students.

Notes: 2 meetings (75 minutes), 1 lab (3 hours)

Instructors: M. Markley

Section Instructors: 01 LAB P Taylor | 02 LAB P Taylor | 03 LAB P Taylor | 04 LAB P Taylor |

Expected enrollment: 60

**GEOL-101-01 - Geology - 2008-2009**

*(Fall) Environmental Geology*

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

Our existence on the planet is greatly affected by changing environmental conditions. Some of these changes are "natural" (e.g., floods, earthquakes), but many directly result from human mismanagement (groundwater contamination, acid rain, the greenhouse effect). Although some of these problems are of local concern, an increasing number are of global scale. In this course, students develop an appreciation for the way the Earth's environment affects our lives. In the laboratory, students learn techniques to recognize and interpret environmental hazards and develop strategies to address environmental problems.

Notes: 2 meetings (75 minutes), 1 lab (3 hours), field trips; 25 spaces allocated to first-year students

Instructors: A. Werner

Section Instructors: 01 LAB P Taylor | 02 LAB P Taylor | 03 LAB P Taylor | 04 LAB P Taylor |

Expected enrollment: 60

*(Spring) History of Life - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

Life forms have inhabited the surface of our planet for most of its history. Earth, as a result, has a unique geology that is unlike that of any other planet. In this course we will examine the interrelations between life processes and Earth's crust and atmosphere and how they work together to create the geology of the planet. Using both the rock and fossil record, we will study the origin and evolution of life, the history of continents and oceans, and the diversification of complex life forms. Laboratory and field trips will emphasize identification and analysis of sediments, rocks, and fossils.

Notes: 2 meetings (75 minutes), 1 lab (3 hours)

Instructors: M. Mc Menamin

Section Instructors: 01 LAB M Mc Menamin | 02 LAB M Mc Menamin |

Expected enrollment: 30

**GEOL-103-01 - Geology - 2008-2009**

*(Spring) Oceanography*

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

Because more than 70 percent of our planet is covered by ocean water, the study of marine systems is crucial to our understanding of the Earth. In this course, we will examine chemical, physical, geological, and biological processes in the oceans at a variety of scales in time and space. We will explore how the Earth's oceans formed, how they provided the foundations for life, and how they continue to affect weather and climate, stabilize global chemical cycles, interact with the terrestrial environment, and give us access to resources.

Notes: 2 meetings (75 minutes)

Instructors: P. Batra

Expected enrollment: 40

**GEOL-115-01 - Geology - 2008-2009**

*(Spring) Convergence in Geologic Time - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

First-year seminar (Writing-intensive)

This course will introduce students to recent advances in the study of convergent evolution in the history of life. In this class we will study the fossil record of convergent evolution using actual fossils and will also consider the likelihood of ancient convergence using simple computer models. The class will focus on helping students to read, write, discuss, and think clearly. Students will receive a broad survey of a wide variety of disciplines. This course is particularly well suited for first-year students.

Prerequisites: fy or permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: M. McMenamin
Expected enrollment: 25

GEOL-201-01 - Geology - 2008-2009
(Fall) Rocks and Minerals
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
In this course you will learn to recognize the common rock-forming minerals and principal rock types, and to understand their origins, properties, associations, and geological significance. Observational skills and hand sample identification will be emphasized in lab and on field trips.
Prerequisites: Prereq. high-school earth science and high-school chemistry, or any 100 level geology course
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: S. Dunn
Section Instructors: 01 LAB S Dunn

GEOL-202-01 - Geology - 2008-2009
(Spring) History of Earth
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Speaking- and writing-intensive)
This course explores major events in the past four billion years of earth history, the interaction of earth systems, and the design and testing of earth science theories. Some topics covered are: ice ages and greenhouse atmospheres, continental drift, the nature of the sedimentary rock record, extinctions and radiations of flora and fauna, the early evolution of earth, and absolute and relative dating of rocks. Final grades depend on class and field trip participation, oral presentations, short papers, quizzes on the geologic time scale, and a final exam.
Prerequisites: high school earth science or any 100-level geology course or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: M. Markley
Section Instructors: 01 LAB M Markley

GEOL-203-01 - Geology - 2008-2009
(Fall) Surface Processes
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
The surface of the Earth is a history book of past environmental change. Every hill and valley, every erosional feature, every deposit is the result of processes acting at the Earth’s surface. In this course we study these processes (e.g., glaciers, rivers, slopes, coastlines, windblown sand, frozen ground, cave formation, soil development) to better understand how they work and to understand the resulting landforms and deposits. Armed with this understanding we can then observe different landforms and deposits and infer past process (environments of deposition). Fieldwork and trips allow students to explore firsthand the processes that have created and modified the Earth’s surface.
Prerequisites: Geology 100 or 101
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: A. Werner
Section Instructors: 01 LAB A Werner

GEOL-210-01 - Geology - 2008-2009
(Fall) Plate Tectonics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Speaking- and writing-intensive)
Plate tectonic theory explains the origins of volcanoes and earthquakes and the locations of mountain belts and oceans. This course focuses on the geometry of plate tectonics. Topics include continental drift, relative plate motion, earthquake analysis, the creation and destruction of ocean crust, marine magnetic anomalies, triple point junctions, and stereographic projection. Work includes individual research projects on active plate boundaries.
Prerequisites: Comfort with geometry and trigonometry
Notes: 3 meetings (50-minutes)
Instructors: M. Markley
Expected enrollment: 20

GEOL-223-01 - Geology - 2008-2009
(Fall) Planetary Science
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Astronomy 223fs)
This intermediate-level course covers fundamentals of spectroscopy, remote sensing, and planetary surfaces. Discussions will include interiors, atmospheres, compositions, origins, and evolution of terrestrial planets, satellites, asteroids, comets, and planetary rings.
Prerequisites: Math 100/101 and one semester of a physical science course
Notes: 1 meeting (140 minutes)
GEOL-227-01 - Geology - 2008-2009
(Spring) Groundwater
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
The demand for and the contamination of groundwater resources are major societal concerns. To better understand the dynamics of the groundwater system, we cover topics including the hydrologic cycle, surface and subsurface hydrology, groundwater resource evaluation, and groundwater geotechnical problems. Students prepare weekly problem sets, a term paper, and an oral presentation. Many of the homework problems involve computer applications.
Prerequisites: Any 100-level geology course
Notes: 2 meetings (75 minutes), 1 lab (3 hours)

Expected enrollment: 11

GEOL-240-01 - Geology - 2008-2009
(Spring) Geological Resources and the Environment - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
This course is a survey of the geology of important mineral deposits and energy resources, the factors that govern the economics of their production, and the environmental implications of their exploitation.
Notes: 3 meetings (50 minutes)
Instructors: S. Dunn

(Fall) Paleontology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course takes a careful look at the fossil record, emphasizing the history and evolution of the marine biosphere; the recognition, distribution, and significance of faunas and their environments through geologic time; and the paleoecologic significance, evolutionary relationships, and biostratigraphic importance of major groups of fossil-forming organisms. Several local field trips, including one weekend excursion.
Prerequisites: Geol 102, 202 or Biol 225 or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: M. McMenamin
Section Instructors: 01 LAB M McMenamin |

GEOL-322-01 - Geology - 2008-2009
(Spring) Igneous and Metamorphic Petrology
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Studies mineralogical and chemical compositions, classification, genesis, and mode of occurrence of igneous and metamorphic rocks. Special attention paid to the relationships between rock-forming processes and global plate tectonics. Laboratory study of representative rock suites in hand specimen and thin section, introduction to analytical techniques, including mineral optics, and one or more field trips.
Prerequisites: Geology 201 or Permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: S. Dunn
Section Instructors: 01 LAB S Dunn |

GEOL-324-01 - Geology - 2008-2009
(Fall) Stratigraphy-Sedimentology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course provides an intensive study of sediments, sedimentary rocks, and the processes of sedimentation. We will employ the principles of stratigraphic analysis and correlation to interpret modern and ancient environments, the sequence stratigraphy of sedimentary basins, paleogeography, and paleoclimatic. A variety of techniques are introduced in laboratory exercises and field trips. This course will include a required weekend fieldtrip.
Prerequisites: Geology 102 or 321 or permission of instructor
Notes: 2 meetings (75 minutes); 1 lab (3 hours)
Instructors: M. McMenamin
Section Instructors: 01 LAB M McMenamin |

GEOL-326-01 - Geology - 2008-2009
(Spring) Seminar: Global Change - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The Earth's climate system is dynamic. Relatively small changes have been associated with profound environmental change; therefore, understanding historic and geologic climate change is paramount to predicting future change. This course reviews the evidence of past climatic change, the prospects of greenhouse warming, and the environmental impact of a warmer world.
Prerequisites: 1 200-level geology course or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: A. Werner

GEOL-333-01 - Geology - 2008-2009
(Fall) Structural Geology and Orogenesis - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course covers the basic techniques of field geology, structural analysis, and multidisciplinary approaches to mountain building (orogenesis). Lectures concentrate on field techniques, stress, strain, faulting, folding, rock strength, the relation between rock deformation and metamorphism, and deformation mechanisms. Five labs are field trips that involve data collection. Short problem sets emphasize quantitative skills. During the final weeks of the semester, two oral presentations emphasize fluency in the published literature of structural geology; the final assignment is a paper. This course is normally taught every other year.
Prerequisites: Geology 201 (can be taken concurrently)
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: M. Markley
Section Instructors: 01 LAB M Markley |

GEOL-341-01 - Geology - 2008-2009
(Fall) Seminars: Bedrock Geology Maps
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Seminars offer directed study and discussion of one or more selected topics in geology. Topics vary from year to year.
A bedrock geologic map shows the distribution of different kinds of rocks at the surface of the earth. "A geologic map is a subtle combination of observed facts and interpretations," says Lucien Platt. "Map making is a fine art. To appreciate fully and to understand a geologic map takes thoughtful and careful analysis." Through such analysis, this course focuses on: (1) using maps to infer regional geological histories, (2) drawing cross sections, and (3) visualization in three dimensions. This course meets for the first six weeks of the semester, and it is recommended for students who plan to pursue graduate degrees in the geosciences.
Prerequisites: At least two 200- or 300-level geology courses
Notes: 1 meeting (3 hours)
Instructors: M. Markley
GEOL-342-01 - Geology - 2008-2009
(Spring) Death Valley Field Course
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Seminars offer directed study and discussion of one or more selected topics in geology. Topics vary from year to year. Consult the department for information about future seminars.
This seminar will cover selected topics on the geology of Death Valley region, California. We will meet for two hours per week up until spring break, then embark on a ten-day fieldtrip to Death Valley National Park, March 12-21. A participation fee is required. Students will be responsible for researching particular topics and presenting a final report.
Prerequisites: two geology courses and permission of instructor
Notes: 1 meeting (2 hours) and ten-day fieldtrip (Thursday, March 12 to Saturday, March 21); enrollment limited.

GRMST-100-01 - German Studies - 2008-2009
(Fall) The Politics of Memory in Postwar German and Japanese culture - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive; Taught in English)
Cultural exchanges between German and Japanese peoples have taken place for over 400 years. What has triggered and sustained exchanges of cultural, social, artistic, and military traditions? How have these historical exchanges affected the remembrance of World War II, the Holocaust, and Hiroshima/Nagasaki in postwar narratives of both national cultures? We focus on the process of remembering war and atrocity as expressed in memoirs and fictional prose by Japanese and German-speaking writers in order to explore the politics of memory within transnational perspectives.
Prerequisites: fy or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: K. Remmler
Expected enrollment: 15

GRMST-101-01 - German Studies - 2008-2009
(Fall) Elementary German
Credits/PE Units: 4; Requirements met: Meets Language requirement; does not meet a distribution requirement
This course introduces speaking, reading, and writing German. Cultural and literary readings together with frequent use of Internet resources dealing with everyday situations and experiences in the German-speaking countries sensitize students to the cultural context in which the language is used. Online grammar and listening comprehension exercises, as well as weekly conversation sessions with a peer assistant from Germany supplement class work.

GRMST-104-01 - German Studies - 2008-2009
(Fall) Accelerated Elementary German - *Not offered this year/term
Credits/PE Units: 6; Requirements met: Does not meet a distribution requirement.
Practice in speaking, reading, and writing German. Cultural and literary readings, video materials, and World Wide Web resources dealing with everyday situations and experiences in the German-speaking countries will be used on a regular basis. In the second semester discussion of texts by such authors as Friedrich Dürrenmatt, Erich Kästner, and Janosch, as well as focus on strategies that help students learn to read, write, and use vocabulary and grammatical structures more effectively. An additional weekly conversation session with a language assistant from Germany supplements class work.
Notes: The combination of German Studies 104 and 204 constitutes 3 semesters of study in 2 semesters. Completion of the two-semester sequence equivalent to completion of 101, 102, and 201. To fulfill the language requirement students must complete 204s. 4 meetings (3 75 minutes, 1 50 minutes), 1 lab

GRMST-201-01 - German Studies - 2008-2009
(Fall) Intermediate German: Experiencing the German-Speaking World
Credits/PE Units: 4; Requirements met: Meets Language requirement; does not meet a distribution requirement
The course emphasizes the development of reading, writing, and speaking German by focusing on contextualized grammatical features. Combining content- and language knowledge, we look at a variety of texts and genres. The completion of various task-sheets and specific instructions on speaking and writing assignments will complement the work with the texts.
Prerequisites: previous study of German
Notes: 3 meetings (75 minutes), 1 lab (50 minutes)
Instructors: M. Lauer

GRMST-209-01 - German Studies - 2008-2009
(Fall) German Conversation and Composition I - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement. (Speaking- and writing-intensive)
This course will help students improve their written and spoken German and review important points of grammar and syntax. Readings range from popular culture to literary texts. Extensive use of films, multimedia, and Internet resources to supplement class discussion. Topics based on students' individual interests. Recommended for students in conjunction with German Studies 220 and 223, or for those who desire additional preparation before entering upper-level courses in the department.
Prerequisites: Previous study of German
Notes: 1 meeting (1 1/2 hours)
Instructors: The department

(Spring) Creation and Production of a German Play - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement (Speaking-intensive)
Students write and stage an original one-act play in German. Students develop proficiency in the language through reading several short stories by authors such as Friedrich Dürrenmatt, Bertolt Brecht, Doris Dörrie, and Judith Hermann, as well as theoretical writings on the theater; students will then rewrite one of the short stories as a play. Students write a substantial essay describing how they applied the specific theories of the theater to their
original adaptation. The play will be performed at the annual German Theatre Festival and Competition hosted each spring by Mount Holyoke College.
Prerequisites: Open to students who have completed an intermediate-level German course, or per permission of department chair.
Instructors: D. Van Handle

(Fall) Studies in German Language and Composition - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
(Speaking- and writing-intensive)
Written and oral expression are strengthened through essays, class discussion, and work with more advanced grammatical structures. Frequent use of Internet resources dealing with current political, social, economic, and cultural issues in German-speaking countries. One unit will focus on Wirtschaftsdeutsch, and students will learn how to write cover letters and résumés for internships and jobs. Students will participate in a Web-Diskussionsforum with students at a German university, prepare an oral report, and write a final paper or design a Web page as a final project. Meetings with a native German assistant for additional cultural insight and contextual conversational practice.
Prerequisites: Open to students who have previously studied German and per permission of department

(Fall) Topics in German Studies: Geistegeschichten--Geistesgeschichte? Spirits and Spirit of German Culture
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
(Speaking- and writing-intensive)
Preamble (for topics courses): German culture from 1800 to 2000: The selection of materials is exemplary rather than comprehensive and is based on thematic, historical, generic and other units.
We will discuss "unreal" narratives, films, ballads, and fairytales that include elements of the fantastic and grotesque and inquire: how can these represent the "reality" of key periods in German culture? What kind of reality is meant? We will include Goethe's "vampire" ballad, a grotesque Brecht ballad, and a Borchartt manifesto; classic "Nosferatu/Dracula" films from the 1920s and 70s; ghost stories, serious or humorous, by Kleist and Heine; grotesque art and narrative by Grosz and Kafka; film comedies of the later twentieth century. Short historical, sociological, scientific texts further elucidate cultural reality. (Emphasis on essay revisions; oral presentations.)

(Fall) Introduction to Nineteenth-Century Critical Social Thought
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive)
Preamble (for topics courses): This course is taught in English and satisfy a Humanities I-A distribution requirement but not the language requirement. For credit toward the major/minor in German studies students must enroll in German 232 (2 credits) as well (and read, write about, and discuss selected materials from 231 in German).
An introduction to some of the great critical voices of the nineteenth century. We will explore the ideas of such mutinous thinkers as Karl Marx, Friedrich Nietzsche, Sigmund Freud, and Franz Kafka, focusing on the style as well as the substance of their works and the circumstances that provoked them to write and/or that their writings helped provoke. The course will highlight the tension between appearance and reality, the dialectic of domination and subordination, and the place of reason and irrationality in social life.
Notes: taught in English, no knowledge of German required. Students with previous study of German are encouraged to take German Studies 232, as a complement to this course. 2 meetings (75 minutes)

**(Fall) Senior Seminar: German Cultures of Memory in Global Contexts - *Not offered this year/term**  
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement  
(Speaking- and writing-intensive)
Preamble (for topics courses): This seminar is designed to explore theoretically and practically the nature of our field of inquiry. We explore such questions as: What does German studies mean? What is interdisciplinary work? What role does literature play in culture studies? What is the relationship between language and the construction of culture? What meanings have been attributed to the terms of "culture" and "civilization?" Texts from a variety of disciplines. Students write term papers on topics related to their major field(s) of interest.

How do nations, groups, and individuals recall the past in order to situate themselves within local and global contexts of power? How do cultures of memory create multiple recollections of "the" past and to what purpose? In this seminar, we explore how German cultural memories emerge in literary texts, films, and artifacts; at memorial sites and architectural domains; and in theoretical literature pertaining to memory. Readings include works by Sigmund Freud, Maurice Halbwachs, Aleida Assmann and other cultural theorists, literary works by the late German author, W. G. Sebald, as well as case studies of public debates about the remembrance of the Holocaust and World War II.

Prerequisites: Open to students who have completed at least 8 credits in the department in upper mid-level courses or beyond, or per permission of department chair.

Notes: 1 meeting (21/2 hours) or 2 meetings (75 min.) This course fulfills the nineteenth- or twentieth-century major requirement in German studies, depending on the topic of a student's semester project.

(Spring) Senior Seminar: Faust vs. Mephisto: The Struggle for the "Western Soul"
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
(Speaking- and writing-intensive)

Preamble (for topics courses): This seminar is designed to explore theoretically and practically the nature of our field of inquiry. We explore such questions as: What does German studies mean? What is interdisciplinary work? What role does literature play in culture studies? What is the relationship between language and the construction of culture? What meanings have been attributed to the terms of "culture" and "civilization?" Texts from a variety of disciplines. Students write term papers on topics related to their major field(s) of interest.

Faust is often called "the epitome of Western 'man'"; but the Faustian is tied to the struggle with the Mephistophelian, thereby signifying the dualism characteristic of the Western worldview. We will focus on an investigation of the Faust topos from early sixteenth-century historical records and Johann Spieß's Faustbuch, via Christopher Marlowe's The Tragical History of the Life and Death of Dr. Faustus (1594/1605), Goethe's Faust I (excerpts from Urfaust, Faust II) and Klaus Mann's Mephisto and its censorship scandal in 1968. Other possibilities for class or seminar projects: excerpts from Thomas Mann's Dr. Faustus; Michail Bulgakov's Der Meister und Margarita; opera by Gounod or Berlioz.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Preamble (for topics courses): History 120 is divided into two courses, the History of Ancient Greece and the History of Ancient Rome. These lecture courses are offered in alternate years and are intended to provide students in history, ancient studies, and other disciplines with a solid historical foundation in the ancient period. Students seeking to concentrate in the ancient world are encouraged to take both. The courses are open to all students, and there are no prerequisites.
A survey of the political, social, and cultural history of Greece from the Bronze Age to Alexander the Great and the Hellenistic world. We shall strive to recreate the entire experience of the peoples of the Greek and Hellenistic worlds: their art, philosophy, and religion; their democratic and imperialist politics; the social dynamics of their clans and families; technology and trade. Special emphasis will be given to the growth of the city state and its meaning in Western history. Sources include Homer, Herodotus, Thucydides, Plato, Xenophon, Demosthenes, Plutarch, and others.

HIST-120-02 - History - 2008-2009
(Fall) Ancient Greece and Rome: Ancient Rome - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Preamble (for topics courses): History 120 is divided into two courses, the History of Ancient Greece and the History of Ancient Rome. These lecture courses are offered in alternate years and are intended to provide students in history, ancient studies, and other disciplines with a solid historical foundation in the ancient period. Students seeking to concentrate in the ancient world are encouraged to take both. The courses are open to all students, and there are no prerequisites.
A survey of the political, social, and cultural history of Rome from the Republic to the Empire, down to the early fourth century with the rise of Constantine. We shall strive to recreate the entire experience of the peoples of Rome and those that came in contact with it as it rose to become the dominant power in the Mediterranean: their history, war, trade and technology, religion, republican government and imperial administration, slavery, economic and the Roman family. Special emphasis will be given to the growth of Rome and its empire. Sources include Polybius, Sallust, Livy, Suetonius, Tacitus, Seneca, Plutarch, and others.(p)

HIST-124-01 - History - 2008-2009
(Spring) History of Modern South Asia, 1700 to the Present
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course will explore the history of South Asia between the eighteenth century and the present. Using a combined chronological and thematic approach and against a historical canvas that engages such diverse issues as gender, political economy, conquest, resistance, state formation, economic exploitation, national liberation, and identity politics, the aim of this course is to interrogate the impact of British colonialism and South Asian nationalisms on the state, society, and people of the subcontinent. Using primary and secondary sources, we will address both the most significant historical moments of modern South Asian history and the historiographical debates that surround them.

(Fall) African Cities: Development Dreams and Nightmares in the Twentieth Century - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
African cities demonstrate the failure of models of development with the aim and ideal of industrialization. This course examines the empty promises of modernity through the lens of African urban history using fiction, film, and city archives. Beginning with Timbuctu and Cairo, the course explores the emergence and decline of trade entrepots, the rise of colonial cities, and the dilemmas of postcolonial economies and politics. Dar es Salaam, Nairobi, Kampala, Kinshasa, Harare, Johannesburg, Lagos, Accra, and Dakar are among the cities studied. Designed for those seeking only an introduction to development as well as those with further ambitions, it assumes no previous knowledge of Africa.

(Fall) History of Global Inequality
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Community-based learning course)
Why are some nations so much richer and more powerful than others? This course demonstrates that global inequality is not natural; it has a history. Exploring patterns of exchange that developed among regions of the world over the past 600 years, we will ask about the role of power in the establishment of practices of production and exchange. We will explore how cross-regional productive systems benefited some participants at the expense of others. Having traced the consequences of unequal exchange over several centuries, we will ask how global trade and production would have to change for all participants to benefit equally. The course includes a community-based learning component.

(Spring) The Crusades and the Making of Medieval Europe - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Same as Medieval Studies 217s)
The medieval Crusades were a strange mixture of romantic sensibility, religious inspiration, and bloodthirsty xenophobia. How was it that Western Christendom was inspired to recover the Holy Land in 1099, coming face to face with two other great civilizations: Byzantium and Islam? What was the aftermath? Topics considered will include the exploration of violence in Eastern Europe, medieval pilgrimage to holy places and the idea of a "holy land," the structure and divisions within Islam, chivalric culture, and the idea of crusading martyrdom.

(Hist) The Long Nineteenth Century - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
The long nineteenth century, from the French to the Bolchevik Revolution, was the period from which modern Europe emerged. New political philosophies, socio-cultural changes, rising imperialism, and increasing competition for territories, compelled Europe to develop. Rapid scientific change also contributing to widespread economic and demographic changes, which in turn drove the increased political participation of ordinary Europeans. The map of Europe was drastically altered by four major revolutionary upheavals, which we will examine as we explore how political change was interconnected to industrial, scientific, economic, and social change across Europe as the modern age was begun.

Nazi Germany and the Holocaust
This lecture/seminar explores the Nazi genocide of European Jewry and asks why scholars consider it to be a defining event of the twentieth century. The acts of genocide will be placed in their multiple, overlapping historical contexts, including the history of Jews in Europe and Germany; modern anti-Semitism; the rise of National Socialism; fascism and National Socialist racial policy; as well as World War II. We'll discuss the acts and
experiences of genocide from the perspectives of both perpetrators and victims; and we'll discuss the afterlife of genocide in forms of memorialization and cultural memory.

(Fall) Americanization in Europe
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This seminar explores European perspectives on America during the 20th century. We'll discuss whether "Americanization" is a useful term for understanding transatlantic relationships from a European perspective. Initial readings will focus on how "Americanization" became a synonym for modernization in European debates over socio-economic change. Considerable attention will be paid to the years after World War II, when American influence became explicit through the Marshall Plan and the so-called "Coca-colanization" of Europe. We'll also discuss the influence of American popular culture over European youth in both Eastern and Western Europe during and after the cold war.

(Fall) American Women's History, From Settlement to Reconstruction
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Same as Gender Studies 206f(01))
Introduction to major themes in U.S. history through the lens of women's history. Located both near the centers of power in American society and at its margins, the history of women as a social group is one of conflict and diversity. While women do not make up a coherent group, all share the unique experience of being "women" in class, racial, and religiously specific ways. Themes include Native American and Hispanic women during European contact and settlement; the impact of the American Revolution; benevolent women and the "fallen" women they hoped to help; enslaved women and the plantation mistress; women in the multicultural west; women's involvement in the Civil War and Reconstruction.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Preamble (for topics courses): These courses are designed for students with a background in American history who wish to focus attention on developments since the late nineteenth century.

This class will evaluate the notion of "sexual revolutions" by examining three moments in U.S. history: the late eighteenth century, the turn of the twentieth century, and the 1960s and 1970s. In each, we will look at shifts in the relationships between race, class, gender, and sexuality. Our history will include the role of experts in the fields of religion, medicine, sexology, and psychology and their efforts to define sexual deviance and promote sexual "normality." At the same time, we will study popular and subcultural sexual cultures found in brothels, bars, same sex institutions, sports, bohemian circles, and political groups and look for strategies of resistance to normative regimes.

(Fall) Topics in Latin American Studies: Voices of the Excluded: Latin American History Through Testimonial Literature
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Latin American Studies 287fs)

Latin America's inequalities have led to the exclusion of millions of voices from official historical documents. These voices emerge in testimonial literature, a literary genre where scholars create a written account of the "testimonies" of marginalized individuals. The factors that influence the production of testimonial literature will be explored through memory, authorship, and first world/third world relations, using I, Rigoberta Menchu: An Indian Woman in Guatemala, and the debates that arose after she won the Nobel Peace Prize. The class focuses on issues of subjectivity, identity, and discourse analysis as tools for using testimonial literature as a historical source.

Transformations in gendered divisions of labor and in women's access to resources are fundamental to understanding contemporary African societies. We explore how African women have created contexts for productivity using strategies such as marriage, pledged female friendship, and voluntary dependency. We investigate the loss of women's work of governing in the colonial period, and the consequences for women's wealth and productivity of incorporation into a global market economy. Texts include recorded life histories, autobiography, fiction, and film, and primary sources such as the testimony of participants in the Ibo Women's War of 1929.

(Fall) Colloquium: Reading the New York Times: Journalism, Power, History
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Same as American Studies 301)
This course will examine the political and cultural power of the New York Times in the American past and present. Students will analyze the Times today through careful, daily readings. They will also study its evolution as an institution, as well as its coverage of and involvement in several of the critical historical events of this century. By focusing on the Times as the most influential "agenda setter" in American journalism, we will also address the larger issues of objectivity, bias, and influence in the mass media.

(Spring) Colloquium: States and Sovereignty in the British Empire
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Speaking-intensive)
In its colonies, Britain had to negotiate the claims and interests of a diverse group of people, from settlers to ex-slaves and indigenous populations. The questions addressed had tremendous consequences for the forging of an international global order: Did indigenous peoples have rights comparable to those of white settlers? Did slave emancipation require a new political order? What rights were possessed by preexisting indigenous states? When were colonies "ready" for independence? In this colloquium we discuss some of the central intellectual concerns addressed by British colonial policy, namely those that concerned the rights and sovereignty of people and states in the modern era.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Is history a reliable form of prophecy? This course attempts to assess the likely developments in the domestic and foreign policy of the United States over the next century by looking backward at long-term historical trends and at historical patterns that have shaped early nations. Readings include John Keegan on war, Alexis de Tocqueville on democracy, Winthrop Jordan on racism, Paul Kennedy on imperial decline, Arthur Schlesinger on liberalism, and George Kennan on foreign policy.

(Spring) Colloquium: Ecology and Imperialism in Africa
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
Local ecological realities and external power have deeply affected African societies over the past century: as colonial administrations sought to reconfigure economic production in Africa, African societies became arenas in which local knowledge and imperial ideologies contested with each other. Postcolonial politics have changed little in this regard. Through intensive readings, this course explores such tensions over a broad range of topics, including the interaction between local economies and state power, different discourses of power and knowledge, and current debates over the relation of global ideologies to local realities. Case studies will address West, East, and Southern Africa.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This colloquium will explore the historical debates about the causes and timing of racial segregation, its effects on African Americans and social inequality, and its most resistant legacy in the twentieth century, residential segregation. Violence against blacks, the use of gender to bolster segregation, biracial alliances and the onset of disfranchisement, the nationalist character of segregation, and black resistance to segregation will be prominent themes. Weekly readings will include primary and secondary works, documentary films, and historical fiction.

(Fall) Colloquium: Bodily Desires: Sexuality in the U.S. from 1900 to the Present
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Same as Gender Studies 333)
In this seminar, we will study the history of sexuality, desire, and bodies. The premise of this interdisciplinary seminar is that sexuality is both historically constructed (fluid and changing over time and culture) and embodied and lived (experienced for many as essential and unchanging). We will study experts who set out terms and frameworks for understanding modern sexuality; how in different ways and in different times communities of sexual minorities strategically used selected elements of expert discourse to forge their own narratives of self and desire. Students will examine sexual classifications—mainstream and “normal” or subcultural and “deviant”—as mutually constructed.

(Spring) Colloquium: Race, Gender, and Empire: Cultural Histories of the United States and the World - *Not offered this year/term
Recent cultural histories of imperialism—European as well as U.S.—have illuminated the workings of race and gender at the heart of imperial encounters. This course will examine the United States' relationship to imperialism through the lens of such cultural histories. How has the encounter between Europe and America been remembered in the United States? How has the cultural construction of "America" and its "others" called into play racial and gender identities? How have the legacies of slavery been entwined with U.S. imperial ambitions at different times? And what can we learn from transnational approaches to "the intimacies of empire?"

(Spring) 1968 in Comparative and Transnational Perspectives

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

This seminar examines the political and (counter-)cultural developments associated with "1968" in various locales around the world. We'll consider the advantages and limitations of thinking about "1968" as a single, global phenomenon. Readings will focus on local and regional articulations of protest in Europe and the Americas, as well as on the political, social, and cultural concerns (e.g. Vietnam War, sexual liberation, racial discrimination) that preoccupied protesters across geographic boundaries. Analytic questions about both comparative and transnational approaches to the study of history will also be raised.

(Fall) Germans, Slavs, and Jews, 1900-1950 - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary research in the history of particular times and places, resulting in a substantial piece of historical writing.

This course explores relations among Germans, Slavs, and Jews in Central and Eastern Europe before, during, and after the First and Second World Wars. Emphasis lies on tracing continuities and ruptures in nationalist and racist ideologies and policies, from late imperial Germany and Austria through the interwar republics and then on to the Third Reich and the post-Nazi regimes. Topics covered include the Holocaust, Nazi treatment of Poles, and the expulsion of millions of ethnic Germans from Poland and Czechoslovakia after 1945, but also mutual accommodation, assimilation, liberal group rights, and the ambiguities of who was German or Slavic or Jewish in the first place.

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary research in the history of particular times and places, resulting in a substantial piece of historical writing.

This seminar focuses on the extreme failure of accountability commonly called political corruption. How do economic conditions shape political realities, and how do political conditions shape economies? We consider precolonial forms of exchange, the social and political conflicts engendered by nineteenth-century integration into a global economy, and ask how the modernizing projects that were supposed to lead to efficient, representative governance and dynamic economic growth have instead yielded forms of rule that consume their populations. Evaluation will be based on participation, short written reflections on each reading, and a substantial research paper.

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.
This survey of Western monasticism from its origins in the Egyptian desert to the mendicant orders of fourteenth-century Europe seeks to understand what motivates men and women to define perfection as abnegation of food, sex, wealth, success, and even laughter—all that we now consider valuable in life. Topics: fasting, virginity, voluntary poverty; monastic rules and reform movements (e.g., Celtic, Benedictine, Cistercian, Franciscan, etc.). Also various saints' lives, mysticism, and women's spirituality. Course includes a stay at the Abbey of Regina Laudis.

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.
This course explores cultural and social transformations (especially in England) on the eve of "modernity." Class discussions will ordinarily focus on selections from major English writers of the period (Chaucer, Gower, and Malory, for example), and on the relationship between their writings and other kinds of evidence about the world in which they wrote. In consultation with instructors and colleagues, students will also be expected individually to locate, analyze, and interpret a collection of primary sources such as court records, chronicles and correspondence from a culture of their choosing in order to write a final essay on one dimension of the late medieval world.

This course analyzes propaganda techniques and war mobilization strategies. We present comparative, cross-cultural analyses of recent and historical examples of the influences of the state, state-society relations, the media, and information control and distortion in the mobilization for war. Case studies are selected to address the following questions: Why is propaganda necessary? What is the media's relationship to state propaganda efforts? How do citizen groups and protest movements contest state propaganda efforts? We conclude by examining key trends in the development of mass media forms and technologies and their implications for global politics.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course provides an introduction to the basic concepts of, and issues in, international human rights. Prior to World War II, there was very little focus on the question of human rights within the international system and within the discipline of international relations. Since that time we have seen a significant expansion of human rights theory, practice, and institutions. This course outlines the historical ideational and institutional developments of human rights. It exposes students to a range of theoretical propositions and empirical findings to understand the role (and limits) of human rights in the international system today.

(Spring) International Society - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
An intensive reading course in theories of international society: the idea that states and peoples are or should be linked to each other through a web of
shared values and institutions. It focuses on the work of Hedley Bull, Immanuel Kant, and John Rawls. How did these three men understand
international society? What are or should be the values and institutions that give rise to it and support it? What implications do their visions of
international society have for war and peace, state sovereignty, religion, democracy, capitalism, distributive justice, human rights, and international law?
What responses and criticisms have their arguments engendered?

(Religion 212)
Judaism is a 3,500-year-old tradition that has developed over time as Jewish communities all over the world creatively interacted with the different cultural and historical milieus in which they lived. This course explores the ways in which Judaism has sought to transform ordinary life into sacred life. What are the ways in which Judaism conceives of God, and what is the meaning of life? What roles do study, prayer, ethics, sex, marriage, family, rituals of the life cycle, and community play in Judaism? These and other questions will be taken up through study of diverse types of religious literature and historical evidence.

LATIN-308-01 - Latin - 2008-2009
(Fall) Lucretius
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
This course explores Lucretius' philosophical poem De Rerum Natura as an exposition of Epicurean atomic theory and ethics, and considers the place of the poem in later literature and thought.
Prerequisites: Latin 222 or above
Notes: 2 meetings (75 minutes)
Instructors: P. Debnar
Expected enrollment: 16

LATIN-313-01 - Latin - 2008-2009
(Spring) The Roman Historians
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
In the minds of Romans, history and historiography were closely linked. Thus, in this course, we will examine equally form and content (i.e., how Romans wrote their history and what they tended to write about) in the works of Livy, Sallust, and/or Tacitus.
Prerequisites: Latin 222 or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: G. Sumi
Expected enrollment: 20

LATIN-350-01 - Latin - 2008-2009
(Fall) Junior/Senior Tutorial
Credits/PE Units: 2-4; Requirements met: Meets Language requirement or Humanities I-A requirement
Studies in Roman lyric, elegy, didactic poetry, the Roman novel, Roman use of myth in literature, or other authors or genres.
Prerequisites: jr, sr with 8 credits of advanced work in Latin; Permissions of instructor
Instructors: The department

LATIN-350-01 - Latin - 2008-2009
(Spring) Junior/Senior Tutorial
Credits/PE Units: 2-4; Requirements met: Meets Humanities I-A requirement
Studies in Roman lyric, elegy, didactic poetry, the Roman novel, Roman use of myth in literature, or other authors or genres.
Prerequisites: jr, sr with 8 credits of advanced work in Latin; Permission of instructor

Latin American Studies

LATAM-150-01 - Latin American Studies - 2008-2009
(January) New Migrants, New Migrations: A Study of Latin Americans in Europe
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This course explores the boom of Latin American migration to Europe, with emphasis on post-1990 trends. We will use the UK experience as a case study, while drawing on examples from the EU and, ultimately, beyond Europe. This course seeks to expose students to migration as a global force and to break away from an Americentric analysis of North-South migration debates. Though course discussions and materials may have a comparative US-UK aspect, students are challenged to root themselves in the particular and unique issues faced by a new wave of migrants who are increasingly forging new migratory paths. Course materials will be taken from a variety of disciplines and popular culture.
Notes: 3 meetings (2 hours)
Instructors: N. Anujo
Expected enrollment: 50

LATAM-170-01 - Latin American Studies - 2008-2009
(Fall) Readings in Caribbean Literature - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
Features comparison of selected readings in the literature of the Spanish-, French-, and English-speaking Caribbean. Introduces the literary personality of the area, the transformation of the material of Caribbean social life into formally crafted and effective literary statement, and characteristic thematic and broader cultural preoccupations. Asks primary questions, such as "How does a novel - or poem - work?" and addresses similar issues related to forms of critical thinking and literary analysis. Readings and discussion in English.
Notes: 2 meetings (75 minutes)
Instructors: R. Marquez

LATAM-175-01 - Latin American Studies - 2008-2009
(Fall) Historical Emergence of the Caribbean
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
The historical development of the Caribbean from the Conquest to the mid-twentieth century. Patterns of conquest, colonization, and settlement by European nations; the rise of plantation-dominated society; the process of insular and interregional differentiation; the emergence of American imperial designs; and the rise of anticolonial, nationalist movements. Comparative reviews of the experience of Haiti, Jamaica, and Puerto Rico highlight broader regional trends and the ways the Caribbean's major language zones have responded to the challenge of their shared history.

(Fall) Introduction to Latin American Cultures - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(History 180)
Examines the confrontation, assimilation, and transformation of Amerindian, African, and European cultures in Latin America from the sixteenth century to the present. Focuses on the processes in which distinctive self-images emerged in the region and how these images have been challenged and changed over time. Uses films, literature, and folk traditions to complement scholarly analyses of the emergence of a New World mentality.
Notes: 2 meetings (75 minutes)

(Spring) Paradigms of New World Thought - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This course is devoted to the work of commanding figures of Latin American and Caribbean thought at various times and different places. Thinkers whose work may form its basis in various offerings include among others: Columbus, Bartolomé de Las Casas, José Marti, J. C. Mariátegui, C.L.R. James, etc. Their lives and work exemplify the diversities, varying regional settings, social contexts, and shifting historical coordinates of major epochs of transition. Their assessment of a myriad of key issues has made each a touchstone of continuing authority and influence extending beyond their particular locale, time, or region. Why this should be so is among the many questions we will address.

LATAM-277-01 - Latin American Studies - 2008-2009
(Spring) Caribbean Women Writers - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
Comparative examination of contemporary women's writing in the Caribbean. Emphasis will be on their engagement with issues of history, cultural articulation, race, class, gender, and nationality, including exploration of their formal procedures, individual moods, regional particularity, and general impact as writers. Rosario Ferré, Ana Lydia Vega, Julia Álvarez, Edna Brodber, Maryse Condé, Simone Schwarz-Bart, Jean Rhys, Beryl Gilroy, and Rosa Guy are among those whose works we will review.

(Fall) The Fiction of History: Historical Truth and Imaginative Invention in the Latin American Novel
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
Examination of the scope, reach, and limits of the Latin American variant of the historical novel as a narrative form. The variety of ways in which it fictionally strives to re-create "certain crisis in the personal destinies of a number of human beings [which] coincide and interweave with the determining context of an historical crisis," the historical vision each writer brings to the work, will be given particular attention.
Instructors: R. Márquez

LATAM-287-01 - Latin American Studies - 2008-2009
(Fall) Topics in Latin American Studies: Voices of the Excluded: Latin American History Through Testimonial Literature
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
Preamble (for topics courses): Designed for students who have had an introduction to Latin America through Latin American Studies 180 or 181 or a course on Latin America in some other discipline (anthropology, history, literature, or politics, for example), this course studies significant problems relating to Latin America in greater depth from the perspectives of appropriate disciplines. Some topics may be cross-listed with other departments. Latin America's inequalities have led to the exclusion of millions of voices from official historical documents. These voices emerge in testimonial literature, a literary genre where scholars create a written account of the "testimonies" of marginalized individuals. The factors that influence the production of testimonial literature will be explored through memory, authorship, and first world/third world relations, using *I, Rigoberta Menchu: An Indian Woman in Guatemala*, and the debates that arose after she won the Nobel Peace Prize. The class focuses on issues of subjectivity, identity, and discourse analysis as tools for using testimonial literature as a historical source.
Prerequisites: jr, sr, 4 credits in Latin American studies
Notes: 2 meetings (75 minutes)
Instructors: S. Sarzynski

(Fall) Modern Mexico - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
An analysis of the modern Mexican nation-state organized around three major themes: the conflictive yet symbiotic relationship with the United States, from the war of the 1840s through the North American Free Trade initiative of today; the succession of reformist and revolutionary upheavals in 1810-1821, 1856-1867, 1910-1917, the 1930s, and again today, seeking to resolve both problems of the colonial past and new conflicts traceable to the very reforms generated by earlier political and social struggles; and the meaning of Mexican nationality from different ethnic, gender, and class perspectives. Readings include autobiographical and literary works, historical studies, and films.
Notes: 2 meetings (75 minutes)

LATAM-289-01 - Latin American Studies - 2008-2009
(Spring) Slavery in the Americas - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
A course, organized topically rather than geographically or nationally, that offers a comparative analysis of African American slavery as a dominant social system in Brazil, the Caribbean, and the U.S. South. Topics include: why slavery?; sugar and slavery; historical demography; culture and the law; kinship and family; long-run economic development; patterns of race relations; master class and racist ideologies; resistance to slavery; and abolition and its aftermath. Readings include historical and anthropological studies, as well as a major documentary collection on slavery in Brazil.

(Spring) Studies in Comparative Caribbean Culture: Contemporary Caribbean Writers

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
A sustained comparative study of the developing canon of three major contemporary writers--Alejo Carpentier (Cuba), V.S. Naipaul (Trinidad), and Maryse Conde (Guadeloupe)--from the Caribbean, representing the region's Spanish-, English-, and French-speaking cultural zones. Examines the evolving content, contours and scope of each writer's work and unique perception of the New World, as well as its distinctively Antillean "structure of feeling," participation in modern debates about Caribbean culture, and distinctive contributions to the development of the novel in the contemporary Caribbean.

LATAM-386-01 - Latin American Studies - 2008-2009
(Fall) Central America: Reform, Reaction, Revolution - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This seminar explores the diverse experiences of Central American nations in the twentieth century. From a common basis in an export-oriented agriculture, social and political alternatives ranging from social democracy to recurrent military rule, neofascist regimes, and revolutionary socialism have emerged in the isthmus. The course uses materials ranging from autobiography and literature to historical and anthropological studies to understand how this came to be. In addition to national cases, we consider the unique experiences of the area's indigenous and Atlantic-coast peoples within and outside the nation-state framework.
Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor
Notes: 1 meeting (2 1/2 hours)

(Fall) Special Topics in Latin American Studies: Brazilian Cinema in Comparative Perspective

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
Preamble (for topics courses): This course offers advanced students an opportunity for intensive study of a problem with careful attention to research methods and to presenting their work in oral and written form.
Can you imagine a movie audience breaking into song and dance in the middle of a film screening? Has the Hollywood depiction of the Brazilian as either a "Bombshell" or a flirtatious male parrot changed over time? How does a Brazilian Western differ from a Spaghetti Western? What were the accomplishments and limitations of the "aesthetic of hunger"? The course examines Brazilian cinema and popular culture in light of theoretical issues of reception and production, Third Cinema, and the shaping of identities and politics. Two films per week. (English subtitles).
Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor
Notes: 1 meeting (2 1/2 hours)
Instructors: S. Sarzynski

LATAM-387-01 - Latin American Studies - 2008-2009
(Spring) Special Topics in Latin American Studies: Gender and Sexuality in Latin America

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
Preamble (for topics courses): This course offers advanced students an opportunity for intensive study of a problem with careful attention to research methods and to presenting their work in oral and written form.
This course introduces students to the emerging historiography on gender and sexuality in Latin America. We examine themes of changing gender roles and shifting constructions of masculinity, femininity and honor in Latin America, with particular attention to issues of sexuality, sexual preference, sexual constraints, and sexual transgressions. The course also focuses on how class and race intersect with gender in the construction of identities, social roles, and sexual relations. Readings include works on the colonial period and the 19th century, but most of the course will focus on these issues in the context of the 20th century.
Prerequisites: jr, sr, 8 credits in Latin American or Gender Studies or related field, or permission of instructor
Notes: 1 meeting (2 1/2 hours)
Instructors: S. Sarzynski

(Spring) Postmodernism and Latin America - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

For many the "discovery" of America opened the modern era. Its closing may also have been foretold in Latin America's confounding of diverse theories of modernization and development in recent times. This seminar will introduce the student to a number of both classic and more recent works on Latin America (in English) that advance along postmodernist lines, ranging from cultural contact and conflict, language, meaning, and power in the sixteenth century, to the invention of national identities in the nineteenth century, to discourses of ethnicity, class, gender, and reason in the twentieth century.

Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor
Notes: 1 meeting (2 1/2 hours)
Instructors: L. Gudmundson

(Spring) Agrarian America: Sugar, Cotton, Coffee, Wheat - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

This course explores the structure and variety of societies generated in North, Central, and South America by four widely distributed export crops. Although not bound by rigid chronology, our focus will be primarily on the period 1750-1950. Principal concerns of the course are variations by time and place in each commodity's technologies, labor systems, farm sizes, and social structure; the political dynamics associated with each type of farming; and the problematic features of capitalism in agriculture, or, how and when do peasants become farmers and farming agribusiness? Readings in English on cases drawn from throughout the Americas.

Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor
Notes: 1 meeting (2 1/2 hours)

Mathematics

MATH-100-A - Mathematics - 2008-2009
(Fall) Enriched Calculus IA
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

Preamble (for topics courses): This yearlong course includes the topics in Mathematics 101, Calculus I. It is intended for students who, based on the results of their precalculus assessment and the agreement of the instructor, need to strengthen their quantitative and algebraic precalculus skills in order to learn calculus.

Features modeling of phenomena in the natural and social sciences. Mathematics 100A: representation and interpretation of data, functions and their graphs, the derivative. Mathematics 100B: logarithmic and trigonometric functions, integrals and the varied processes that they can represent, accumulation and antidifferentiation, the several forms of the fundamental theorem.

Prerequisites: permission of instructor. Student may send assessment score and background information to jmcleod@mtholyoke.edu. 2 meetings (75 minutes), 1 meeting (50 minutes)
Notes: Completion of the year-long sequence fulfills a Science and Math II-A requirement.
Instructors: J. McLeod
Expected enrollment: 30

MATH-101-01 - Mathematics - 2008-2009
(Fall) Calculus I
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Preamble (for topics courses): Students who have not studied calculus and who have the necessary precalculus background belong in Calculus I. Because some sections of Calculus I differ significantly from traditional high school calculus, it has been our experience that students who "start over," in order to ease the transition into college, initially may have more difficulty in Calculus I than beginners. However, students who take Calculus I expecting and welcoming new ideas have found it rich and rewarding. Please read the "Beginning the Study of Mathematics" section.

This course presents rates of change and their applications, integrals, the fundamental theorem, and modeling of phenomena in the natural and social sciences.

Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)

MATH-110-01 - Mathematics - 2008-2009
(Fall) Explorations in Algebra
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
High school algebra is essentially the study of the laws that govern the system of numbers we use for ordinary arithmetic. This course focuses on certain of these laws and studies the systems, called "groups," governed by them. Groups have beautiful properties and describe many phenomena: crystallography, graphic art, matrix algebra, counting, nuclear physics, codes, and more. The course studies the group laws and their consequences, as well as many examples of systems satisfying these laws.

(Spring) Explorations in Algebra - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Studies basic mathematical structures using as models symmetries of plane figures, the ordinary integers, and other number systems. Using examples to uncover patterns that help reveal and explain relationships. Solving simple equations in these new settings quickly brings students into contact with some intriguing problems being studied by contemporary mathematicians.
Prerequisites: 4 admission units or permission of instructor

(Fall) Explorations in Geometry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
The system of geometry devised by the ancient Greeks was immutable until the nineteenth century, when it was put in a broader framework better able to accommodate the varied interests of physical science and mathematics. In this course, we study geometry as it developed historically, from the time of Pythagoras to the recent past.

MATH-156-01 - Mathematics - 2008-2009
(Fall) Making Meaning for Operations/Reasoning Algebraically about Operations
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Ed 256)
This course will draw on two modules of the Developing Mathematical Ideas (DMI) series. DMI is a curriculum designed to help think through the major ideas of K-8 mathematics and examine how children develop those ideas. The first four sessions will parallel the first four sessions of Making Meaning for Operations. The remaining nine sessions will be based on the Reasoning Algebraically about Operations module. This module focuses on how children's study of operations leads into articulation of generalizations in the number system and justification of such generalizations. Participants will explore and understand how such work in the early grades relates to algebra studied in later grades.
Prerequisites: Permission of instructor

MATH-160-01 - Mathematics - 2008-2009
(Fall) Introductory Seminar: Mathematics and Music
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
First-year seminar (Music-114-02)
For centuries people have explored the connections between mathematics and music. Sounds are waves, and pleasant-sounding musical intervals are simple fractions. Keyboard instruments are tuned following both regular and slightly irregular mathematical rules. Bells in change ringing follow simple patterns. Some musical pieces can be played both backwards and forwards. On the other hand, aesthetics are paramount in music, yet also play a part in mathematics. This course will explore these ideas.

MATH-202-01 - Mathematics - 2008-2009
(Fall) Calculus II
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Preamble (for topics courses): Most students who have taken calculus in high school begin with Calculus II. In particular, if you have studied the derivative and its applications and have been introduced to the definite integral, you will be prepared for Calculus II. Please read the "Beginning the Study of Mathematics" section.
Topics include techniques of integration, applications of integration, differential equations, sequences, series, and Taylor series.

Prerequisites: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: M. Robinson

MATH-203-01 - Mathematics - 2008-2009
(Fall) Calculus III
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Preamble (for topics courses): If you have a good knowledge of applications of integration and of transcendental functions, and if you enjoy
mathematics, we encourage you to begin your college-level study of calculus with Calculus III. Please read the "Beginning the Study of Mathematics"
section.
Topics include differential and integral calculus of functions of several variables.
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: H. Pollatsek

MATH-203-01 - Mathematics - 2008-2009
(Spring) Calculus III
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: A. Bak

MATH-211-01 - Mathematics - 2008-2009
(Fall) Linear Algebra
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics include elements of the theory of matrices and vector spaces.
Prerequisites: any 100-level mathematics course
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: J. McLeod

MATH-211-01 - Mathematics - 2008-2009
(Spring) Linear Algebra
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics include elements of the theory of matrices and vector spaces.
Prerequisites: any 100-level mathematics course
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: G. Cobb

MATH-232-01 - Mathematics - 2008-2009
(Spring) Discrete Mathematics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Studies some aspects of discrete mathematics. Topics include sets, functions, elementary probability, induction proofs, and recurrence relations.
Prerequisites: any 100-level mathematics or computer science course, or permission of instructor
Notes: 2 meetings (1 hour 45 minutes)
Instructors: J. McLeod

MATH-251-01 - Mathematics - 2008-2009
(Fall) Laboratory in Mathematical Experimentation
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
(Writing-intensive)
Offers mathematics as a laboratory science. After a short introduction to the computer, uses hand and computer computation to explore mathematical ideas. Directs laboratory projects toward discovery of properties and patterns in mathematical structures. The choice of projects varies from year to year and is drawn from algebra, analysis, discrete mathematics, geometry, and statistics.
Prerequisites: 4 credits from the department or permission of instructor
Notes: 2 meetings (1 hour and 50 minutes)
Instructors: M. Robinson

(Spring) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph, permission of department
Instructors: The department.

MATH-301-01 - Mathematics - 2008-2009
(Spring) Real Analysis
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics include the real number system, convergence of sequences and series, power series, uniform convergence, compactness and connectedness, continuity, abstract treatment of differential and integral calculus, metric spaces, and point-set topology.
Prerequisites: Mathematics 251 or permission of instructor
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: G. Davidoff

MATH-302-01 - Mathematics - 2008-2009
(Fall) Complex Analysis
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics include differentiation and integration of functions of a complex variable, the Cauchy integral formula, residues, conformal mapping, and applications to physical science and number theory.
Prerequisites: Mathematics 203 or Physics 303
Notes: 2 meetings (90 minutes); offered alternate years at Mount Holyoke and Smith Colleges
Instructors: G. Davidoff

MATH-309-01 - Mathematics - 2008-2009
(Fall) Topics in Analysis - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics to be announced
Prerequisites: Mathematics 203 and 211, or permission of instructor
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: The department

MATH-309-01 - Mathematics - 2008-2009
(Spring) Topics in Analysis - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics to be announced.
Prerequisites: Mathematics 203, 211
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: The department

MATH-311-01 - Mathematics - 2008-2009
(Fall) Abstract Algebra
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics include algebraic structures: groups, rings (including some elementary number theory), fields, and vector spaces.
Prerequisites: Mathematics 211 and another 200-level mathematics course
Notes: 2 meetings (1 hour and 45 minutes)
MATH-319-01 - Mathematics - 2008-2009
(Spring) Topics in Algebra: A second course in Linear Algebra
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
A second course in Linear Algebra. In this class we will take a linear transformation of a finite dimensional vector space to itself and study how you choose a basis so that the matrix associated with the transformation has a nice form. Topics include: Vector spaces, subspaces, linear independence, basis and dimension, change of basis; Linear transformations, eigenvalues, eigenvectors and spectral theory, Jordan canonical form, operators on inner product spaces, dual spaces, bilinear and quadratic forms, module theory, the classification of finitely generated modules over a principal ideal domain with applications to abelian groups and canonical forms for matrices.
Prerequisites: Mathematics 311 or permission of instructor
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: J. Sidman

MATH-322-01 - Mathematics - 2008-2009
(Fall) Differential Geometry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
We will study the differential geometry of curves and surfaces. In particular, we will use calculus and linear algebra to develop rigorous notions that correspond to our intuitive understanding of smoothness and curvature.
Prerequisites: Mathematics 203, 211. Mathematics 301 helpful but not necessary.
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: M. Robinson

MATH-324-01 - Mathematics - 2008-2009
(Spring) Methods of Applied Mathematics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(See Physics 324s)
Instructors: The department

MATH-327-01 - Mathematics - 2008-2009
(Fall) Advanced Logic - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(See Philosophy 327f)
Instructors: S. Mitchell

MATH-329-01 - Mathematics - 2008-2009
(Spring) Topics in Geometry and Topology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This is an introduction to point-set topology (also referred to as general topology). Point-set topology is one branch of the much broader area, topology. It is concerned with the study of properties of abstract topological spaces and structures related to such spaces. The material covered in this course will provide the common foundation for courses in algebraic topology, geometric topology, and differential topology. The core topics to be studied include: basic set theory, various interesting topologies, continuous functions, connectedness and compactness, separation axioms, countability axioms, nets and filters.
Prerequisite: Mathematics 203, one of Mathematics 211 or 251, or permission of the instructor
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes); this course may be repeated for credit
Instructors: The department

MATH-333-01 - Mathematics - 2008-2009
(Spring) Differential Equations
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This is an introduction to differential equations for students in the mathematical or other sciences. Topics include first-order equations, second-order linear equations, qualitative study of dynamical systems, and first- and second-order linear partial differential equations.
Prerequisites: Mathematics 202
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
MATH-339-01 - Mathematics - 2008-2009
(Fall) Topics in Applied Mathematics: Mathematical Finance
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics include interest rates, forwards and futures, options, payoff diagrams, geometric Brownian motion, binomial trees, risk-neutral valuation, stochastic calculus, Ito's lemma, Black-Scholes, volatility smiles, exotic options, the Greeks, Monte Carlo methods, and statistical data analysis.
Prerequisites: Mathematics 203 and 211 or permission of instructor
Notes: 3 meetings (50 minutes)
Instructors: A. Bak

MATH-339-01 - Mathematics - 2008-2009
(Spring) Topics in Applied Mathematics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics to be selected from: the stochastic calculus, review of Black-Scholes, yield curves, swaps, interest rate derivatives, risk measurement and management, statistical analysis of financial data, Monte Carlo simulation.
Prerequisites: Mathematics 203 and 211 or permission of the instructor;
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: The department

MATH-342-01 - Mathematics - 2008-2009
(Fall) Probability - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
(See Statistics 342f)
Prerequisites: Math-203
Instructors: The department

MATH-395-01 - Mathematics - 2008-2009

Medieval Studies

(Spring) Medieval Culture and Society: Seminar in Reading, Writing, and Reasoning: Women in the Medieval World
Credits/PE Units: 4; Requires Humanities I-A requirement
Preamble (for topics courses): This course offers a foundation for inquiry into medieval culture. Using readings in literature, art, music, history, politics, philosophy, and science to interpret the Middle Ages, a student sharpens her awareness of language and imagery as means of communicating experience, and improves her skills of attentive reading and persuasive writing.
An introductory cross-cultural course on medieval women (though mainly European women, for practical reasons) via the quality, breadth, and influence of women's writings (950-1450). Readings (in English translation) to include Hrotsvitha, Heloise, Hildegard, Marie de France, Julian of Norwich, Christine de Pizan, Margery Kempe, German and Italian examples, plus some Hebrew, Arabic, Armenian, Indian, and Japanese selections: tracing major recurrent themes and differences while examining the historical context for each. Also to be introduced are various approaches to women's history, such as those of Natalie Zemon Davis, Joan Kelly, and Barbara Hanawalt.
Instructors: N. Margolis
MEDST-200-02 - Medieval Studies - 2008-2009  
(Fall) Special Topics in Medieval Studies: Medieval England - *Not offered this year/term  
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement  
(same as History 232F-01)  
Preamble (for topics courses): This course is designed to address themes and historical periods in an interdisciplinary framework. Topics will bring together the study of art, literature, and history to heighten awareness of the complex interaction of cultural and political forces in medieval society. Issues will be explored through the methods of different disciplines in order to develop the student's analytical and critical skills.  
The British Isles from the ancient Celts to the fourteenth century. Topics include Celtic culture, Roman Britain, early Christianity, Sutton Hoo and the invasions of the Anglo-Saxons, the Vikings, the birth of the English monarchy, the Norman conquest of England, Wales, and Ireland, Norman achievement in government and art, Cistercian monasteries, Richard the Lion-Hearted and the Crusades, the towns and their Jewish communities, King John, the Magna Carta and the development of Parliament, English Gothic, the beginning of Hundred Years' War, the Black Death, and the Peasants' Revolt of 1381.  
Notes: 2 meetings (75 minutes)  
Instructors: F. McGinness  
Expected enrollment: 75  

MEDST-200-03 - Medieval Studies - 2008-2009  
(Spring) Special Topics in Medieval Studies: Illustrious and Abandoned Women - *Not offered this year/term  
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement  
(same as English 214s and Italian 214s)  
Preamble (for topics courses): This course is designed to address themes and historical periods in an interdisciplinary framework. Topics will bring together the study of art, literature, and history to heighten awareness of the complex interaction of cultural and political forces in medieval society. Issues will be explored through the methods of different disciplines in order to develop the student's analytical and critical skills.  
A comparative reading of Christine de Pizan's *Book of the City of Ladies*, Boccaccio's *Illustrious Women*, and Chaucer's *Legend of Good Women*. How did these late medieval authors imagine women's voice, agency, and virtue in the public and private spheres? Why does the figure of the strong secular woman emerge in medieval culture at this period? How do these medieval heroines compare to their Classical predecessors? What ideologies of female virtue do these three writers reflect? All readings in translation.  
Prerequisites: Medieval Studies 101 or 102, or 8 credits in either English or Italian  
Notes: credit available for medieval studies, Italian, or English; 2 meetings (75 minutes)  
Instructors: C. Chiarchiini, C. Collette  

MEDST-217-01 - Medieval Studies - 2008-2009  
(Spring) Special Topics in Medieval Studies: The Crusades and the Making of Medieval Europe - *Not offered this year/term  
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement  
(same as History 217s)  
Long before Operations "Desert Storm" and "Iraqi Freedom," Westerners were drawn to the Middle East. This course will examine the "Holy War" of Christians against Moslems and Jews in the Middle Ages and seek to determine underlying causes: the need to defend Constantinople and the Holy Land from the infidel, the greed for markets and the spoils of war, the domestic frustrations that were displaced to an external enemy, the ideology of divine mission and martyrdom. Sources: laws, chronicles, memoirs, sermons, and treatises from Latin, Greek, and Moslem perspectives.  
Notes: 2 meetings (75 minutes)  
Instructors: C. Straw, F. McGinness

MEDST-300-01 - Medieval Studies - 2008-2009  
(Fall) Seminar in Medieval Studies: Christine de Pizan: Lyric Poet and Political Advocate  
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This seminar will examine the career, sources, and influence of France's first professional woman writer, exploring her uniquely varied contribution well beyond that of her famous feminist history, the *City of Ladies*. Along with this work, and the *Romance of the Rose* Debate, we shall also read selections from her innovative lyric poetry, critique of courtly romance, autobiography, manual for princes, biography of King Charles V, political and military treatises, and also religious poems and prose, culminating in her patriotic hymn to Joan of Arc.

Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor

Notes: NOTE: French majors must do the readings and papers in French for departmental credit; 1 meeting (2 hours, 50 minutes)
Instructors: N. Margolis
Expected enrollment: 16
MEDST-300-22 - Medieval Studies - 2008-2009
(Spring) Seminar in Medieval Studies: Gender, Language, and Power 1300-1700 - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(same as History 351s)
This course explores how some women expressed their understanding of the social, ideological, and political struggles in which they were engaged between the early fourteenth and late seventeenth centuries. It asks what roles they played in the construction of public discourse and the state, the reshaping of the family, the reconstruction of Christianity, and the change from medieval feudal estates to early modern agrarian capitalism. Readings will include works by Christine de Pisan, the Paston women, Anne Askew, Lady Mary Wroth, Elizabeth Cary, Lady Eleanor Davies, as well as records of Elizabethan coronation pageants, public ceremonies, household accounts, and diaries.
Prerequisites: written application and permission of instructor
Notes: 1 meeting (3 hours)
Instructors: H. Garrett-Goodyear
Expected enrollment: 15

Music

MUSIC-100-01 - Music - 2008-2009
(Fall) Basic Musicianship
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Explores the ways in which sound is organized into musical structures. Topics include the physical properties of sound; the basic vocabulary of Western music (scales, key signatures, intervals, triads, rhythm, meter); and an introduction to musical form and analysis. Includes extensive practice in music reading, sight singing, ear training, and critical listening.
Notes: 3 meetings (50 minutes), 2 labs (50 minutes)
Instructors: G. Steigerwalt
Section Instructors: 01 LAB S Andrade | 02 LAB T.B.A. |
Expected enrollment: 28

(Spring) Music and Technology
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
It is now possible to record, manipulate, notate, and compose music with a variety of powerful and flexible tools using the personal computer. This course will focus on hands-on experience with various sorts of music software, including recording and editing, mixing, synthesis and midi interfaces, notation, and various instructional programs. In the process of experimenting with these tools and operating on their favorite musical styles, students will learn a good bit of notation, ear training, and rudimentary principles of arrangement and composition. Basic computer literacy (such as comfort with basic editing commands and the concept of keyboard shortcuts) is required.
Notes: 2 meetings (75 minutes)
Instructors: R. Eisenstein
Expected enrollment: 15

**MUSIC-103-01** - Music - 2008-2009
(Fall) History of Jazz - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course will follow the origins and evolution of jazz from the late nineteenth century to the present, with emphases on prominent stylistic trends and significant individuals. Along with some analysis of the musical language jazz employs, the music will be examined in its relation to the social contexts that helped produce and shape it. The ability to read music is not a requirement for this course.
Notes: 2 meetings (75 minutes)
Instructors: D. Sanford
Expected enrollment: 40

(Fall) Music in the American Musical: The Golden Age - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Have you ever wondered what the name of that marvelous melody was that you were humming? Could it be part of our heritage? "It's so familiar..." expressed in the great musicals of American tradition. Special emphasis will be directed to masterpieces of Kern, Porter, Gershwin, Rodgers, and Bernstein among others.
Notes: 2 meetings (75 minutes)
Instructors: A. Bonde
Expected enrollment: 40

**MUSIC-107-01** - Music - 2008-2009
(January) Jazz Ensemble Concert Design
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
A course based on the creation and development of a Jazz Ensembles of Mount Holyoke concert performance with added theatrical elements. A radio show (circa 1940) will be scripted with attention to historical detail. Production-related responsibilities (stage design, costume design, lighting design, sound design, stage management and staffing) will also be discussed and planned out.
Prerequisites: Prior enrollment in Jazz Ensembles and/or permission of the instructor.
Notes: 5 meetings (4 hours)
Instructors: M. Gionfriddo
Expected enrollment: 25

(Fall) The Artful Ear
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
What are we doing when we listen to music? How does the human brain process sound and why do those sounds affect us as they do? Drawing on recent neurological data, information from musicological and ethnomusicological sources, readings in aesthetics, and our own personal experiences as listeners and makers of music, students will learn to listen with greater awareness and discernment to music from the widest variety of styles.
Notes: 2 meetings (75 minutes)
Instructors: E. Benjamin
Expected enrollment: 25

**MUSIC-114-01** - Music - 2008-2009
(Fall) Music of Heroism, Protest, and Lament during the Second World War
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar
This seminar examines the artistic and social impact of the war on composers such as Stravinsky, Bartók, Shostakovich, Schoenberg, and Copland. The music under consideration includes a wide range of responses to the world conflict. Experience in reading music is not required.
MUSIC-114-02 - Music - 2008-2009
(Fall) Introductory Seminar: Mathematics and Music
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
First-year seminar (Mathematics 160)
For centuries people have explored the connections between mathematics and music. Sounds are waves, and pleasant-sounding musical intervals are simple fractions. Keyboard instruments are tuned following both regular and slightly irregular mathematical rules. Bells in change ringing follow simple patterns. Some musical pieces can be played both backwards and forwards. On the other hand, aesthetics are paramount in music, yet also play a part in mathematics. This course will explore these ideas.
Prerequisites: fy or permission of instructor
Notes: 2 meetings (75 minutes); 1 meeting (50 minutes)
Instructors: A. Durfee
Expected enrollment: 17

MUSIC-115-01 - Music - 2008-2009
(Fall) Introduction to Composition
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Introduces musical composition through the writing of original pieces, emphasizing twentieth-century techniques. Includes demonstrations of various musical instruments, readings of student compositions in class, and consideration of the "creative process."
Prerequisites: Music 100 or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: L. Schipull
Expected enrollment: 15

(Fall) Chamber Music: Wind Ensembles
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Study and perform representative chamber works for varying combinations of instruments.
Prerequisites: enrollment is by audition only for new students or previous study in the ensemble
Notes: 1 rehearsal (2 hours)
Instructors: The department

MUSIC-143-B - Music - 2008-2009

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Writing-intensive)
This course is a survey of selected musical traditions from different parts of the world, including Africa, Indonesia, India, the Caribbean, and the United States. The course adopts an anthropological approach that explains music as a cultural phenomenon, and explores the social and aesthetic significance of musical traditions within their respective historical and cultural contexts. It examines how musical traditions change over time, and how such changes reflect and relate to social and political changes within a given society. Weekly reading and listening assignments provide the basis for class discussions. Students are expected to undertake a final project in music ethnography.

(Spring) Performance Practices in African Music - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
This course examines African performance conventions, styles and techniques as illustrated in selected musical traditions. The course addresses important questions about African performances including: How are performing groups organized? What are the internal dynamics of group performance? When and how is improvisation appropriate? Selected examples, including Yoruba "dundun" music, Dagomba drumming and Shona "mbira" music, are studied with a view to understanding African performance practices and presentational skills. The course combines lectures with practical sessions, and culminates in a group performance and write-up based on the performance.

Philosophy

PHIL-101-01 - Philosophy - 2008-2009
(Fall) Introduction to Philosophy
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course will explore topics that philosophers have grappled with for thousands of years, and that still undergird (or sometimes threaten to undermine) our understanding of the world, our knowledge, ourselves, and each other. In historical and modern texts of the Western intellectual tradition, we will read answers to questions such as: What exists? What knowledge can we claim? What are people like? What is, or should be, our role in the world? In considering these answers, we will learn to do philosophy ourselves, developing our own careful reflections on these issues.
Notes: 2 meetings (75 min)
Instructors: T. Wartenberg
Expected enrollment: 40

PHIL-101-01 - Philosophy - 2008-2009
(Spring) Introduction to Philosophy
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
We will consider influential philosophical texts and theories that attempt to answer questions such as these: Is there good reason to believe that God exists? Is it possible for creatures like us to have knowledge of an external world that exists outside of our own minds? Are we justified in believing that events in the future will be much like events in the past? Is the human mind an immaterial substance (like a soul), or is it a mere physical object (such as the brain)? Do human beings have free will? Is a person’s having free will compatible with all of her actions being predetermined by events occurring before her birth? What, if anything, makes an action morally right or morally wrong?
Notes: 2 meetings (75 minutes)
Instructors: M. Rubin
Expected enrollment: 40

PHIL-101-02 - Philosophy - 2008-2009
(Fall) Introduction to Philosophy

PHIL-101-03 - Philosophy - 2008-2009
(Fall) Introduction to Philosophy
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
For thousands of years, humankind has grappled with questions concerning such fundamental topics as existence, knowledge, and morality. For example: Does the world exist as we perceive it? What distinguishes right from wrong? Do we possess souls existing independently of our corporeal bodies? What is the ideal form for society? Can anything be known with certainty? In this course, we explore these and other perplexing questions through an analysis of classic philosophic texts drawn from the Western intellectual tradition. Works by authors such as Plato, Aristotle, Descartes, Leibniz, Hume, Mill, Kant, Russell, and others will be considered.

PHIL-102-01 - Philosophy - 2008-2009
(Fall) First-Year Seminar: Introduction to Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar
This seminar explores some of the great philosophical problems pondered by the Western canon such as: What makes an action morally right or just? What obligations do we have to our fellow human? Can we have any moral obligations if our actions are causally determined in the same way that other physical events are? How is it that we know what we think we know about our own existence and the existence of the world? Are we obligated to form beliefs on the basis of evidence, not faith or wishful thinking? If so, why?
Prerequisites: fy or permission of instructor
Notes: 2 meetings (75 minutes)

Instructors: C. Lee
Expected enrollment: 20

PHIL-103-01 - Philosophy - 2008-2009
(Spring) Comparative Introduction to Philosophy
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
In this course, questions concerning views of the self, humans in relation to one another, and humans in relation to the non-human world will be explored by bringing together conventional philosophy texts with culturally diverse philosophical writings. Through these questions and the materials which address them, issues of ethnicity, race, class, and gender will impact our discussion of various perspectives on fundamental problems.
Notes: 2 meetings (75 minutes)

Instructors: M. Brown
Expected enrollment: 40

PHIL-201-01 - Philosophy - 2008-2009
(Fall) Philosophical Foundations of Western Thought: The Greek Period
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
An introduction to ancient Greek philosophy, focusing mainly but not exclusively on the works and ideas of three Athenian philosophers who worked and taught in the period between the Persian Wars and the rule of Alexander the Great, more than 2,300 years ago: Socrates, Plato, and Aristotle. Topics to be discussed include: What is the nature of the world? What is truth, and how can it be known? What kind of life should we live? We will work to understand each philosopher's responses to these questions, but we will also learn to develop our own answers. We will take care to place these figures and their works in proper historical and cultural context.
Notes: 2 meetings (75 minutes)

Instructors: J. Harold
Expected enrollment: 35

PHIL-202-01 - Philosophy - 2008-2009
(Spring) Philosophical Foundations of Western Thought: The Modern Period
Investigates the development of Western philosophy in the seventeenth and eighteenth centuries through the writings of Descartes, Locke, Spinoza, Leibniz, Berkeley, Hume, and Kant. Focuses on the impact of modern scientific thought on the philosophical tradition's understanding of the place of the human being in the world. Topics include the nature and extent of human knowledge, the nature of the mind, and the possibility of human freedom.

Notes: 2 meetings (75 minutes)
Instructors: T. Wartenberg
Expected enrollment: 30

PHIL-205-01 - Philosophy - 2008-2009
(Fall) Ethics
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
An introduction to some of the main philosophical approaches to ethics and ideas about human nature through a study of works by major philosophers including Plato, Kant, Mill, Marx, Nietzsche. Among the issues covered will be the justification of morality, pleasure and happiness, human nature, and the human good.
Notes: 2 meetings (75 minutes)
Instructors: The department
Expected enrollment: 40

PHIL-208-01 - Philosophy - 2008-2009
(Fall) Knowledge and Reality - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course is an introduction to the central topics in epistemology (theory of knowledge) and metaphysics (theory of reality). The course aims to be both historical and contemporary. It will look at questions such as: How is knowledge possible? What is knowledge? What is it to say something exists? What is the nature of cause and effect?
Notes: 3 meetings (50 minutes)
Instructors: C. Lee
Expected enrollment: 50

PHIL-208-01 - Philosophy - 2008-2009
(Spring) Knowledge and Reality
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
What is knowledge? Does the world exist independently of our minds? What makes me a single, unified person who exists continuously over time? In this course, we will explore these and other central questions in epistemology (theory of knowledge) and metaphysics (theory of reality) concerning predictions about the future, universal generalizations, the categories/concepts we employ in making such predictions and generalizations, and the nature of cause and effect. This course aims to be both historical and contemporary.
Notes: 2 meetings (75 minutes)
Instructors: S. Mitchell
Expected enrollment: 30

PHIL-210-01 - Philosophy - 2008-2009
(Fall) Logical Thought
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course cultivates sound reasoning. Students will learn to see the structure of claims and arguments and to use those structures in developing strong arguments and exposing shoddy ones. We will learn to evaluate arguments on the strength of the reasoning rather than on the force of their associations and buzzwords.
Notes: 3 meetings (50 minutes)
Instructors: S. Mitchell
Expected enrollment: 75

PHIL-212-01 - Philosophy - 2008-2009
(Fall) Philosophical Foundations of Chinese Thought: The Ancient Period - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Asian Studies 214)
An introduction to Chinese thought in the classical period roughly between 500 and 221 BCE, a time of social and political furor. We will survey different philosophical responses to this upheaval, with an eye to the contemporary relevance of ancient Chinese wisdom. The course format consists of lecture and discussion preceded by extensive reading of primary texts (in translation). No familiarity with Chinese history, philosophy, or language is assumed.
Notes: 2 meetings (75 minutes)
Instructors: The department
Expected enrollment: 50
PHIL-220-01 - Philosophy - 2008-2009
(Spring) Introduction to the Philosophy of Science
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Scientific theories come and go—what was once believed true is often later thought false. What then is the status of current scientific theories? What makes a theory "good"? How do we know whether accepting a theory is based on scientific reasoning—rather than scientistic or nonscientific rationales? This course will explore answers to these questions proposed by scientists and philosophers of science. We will study some historical views, but will focus on scholars writing in the 1960s through the present.
Prerequisites: No prerequisites
Notes: 2 meetings (75 minutes)
Instructors: S. Hawthorne
Expected enrollment: 30

PHIL-225-01 - Philosophy - 2008-2009
(Spring) Symbolic Logic
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course develops a symbolic system that can be used as the basis for inference in all fields. It will provide syntax and semantics for the language of this system and investigate its adequacy. It provides the basis for all further work in logic or in the philosophical foundations of mathematics. Much of the course has a mathematical flavor, but no knowledge of mathematics is necessary.
Notes: 3 meetings (50 minutes)
Instructors: S. Mitchell
Expected enrollment: 75

PHIL-226-01 - Philosophy - 2008-2009
(Fall) Introduction to the Philosophy of Religion - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Religion 226-01)
This course begins its survey of the discipline of the philosophy of religion with the work of Augustine. We then proceed to an examination of the classical theistic arguments for knowledge of God's existence (those of Anselm, Aquinas, and Maimonides) that dominated Scholastic thought and consider the criticisms of these approaches by Enlightenment philosophers such as Kant. We trace the rise of experience as the central category of pietism and romanticism in the texts of Schleiermacher and Coleridge and in the poetry of Novalis. Finally, we focus on the pragmatic tradition in American philosophy of religion, especially in the work of William James, Josiah Royce, and Cornel West.
Notes: 2 meetings (75 minutes)

PHIL-227-01 - Philosophy - 2008-2009
(Fall) Feminism and Knowledge - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Gender Studies 212)
Is knowledge gendered? Is science objective? What does it mean to make such claims, and how does one justify them? In this course, we will investigate how gender roles, gender identity, and ideas about gender influence the construction of knowledge. We will look at three competing views about these influences - in particular, empiricism, standpoint theory, and postmodernism - in the context of empirical research in the social sciences and biology. We will consider what it means to do research as a feminist and what kind of cognitive authority women hold in the creation of knowledge.
Prerequisites: 4 credits in gender studies or philosophy or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: C. Lee
Expected enrollment: 30

PHIL-232-01 - Philosophy - 2008-2009
(Fall) Ethical Issues in Complex Organizations
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Complex Organizations 232)
There is much talk recently of the need for increased attention to "ethics" in organizational life. This course examines the basis for this concern and the underlying beliefs and structures that give rise to ethical issues, with the goal of helping students to clarify their own positions. Topics addressed will include profit, governance, consumption, distribution, and the social contract. Readings will draw on philosophy, religion, economics, history, literature, management theory, and current events.
Prerequisites: Prereq. soph, jr, sr; 4 credits
Notes: 1 meeting (3 hours)

PHIL-235-01 - Philosophy - 2008-2009

Mount Holyoke College Course Information Archive 2000-2016
(Fall) Medical Ethics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Modern medicine has raised new and difficult moral and philosophical problems. Topics discussed include: What is the distinction between health and illness? How should limited health care resources be distributed? How are medical problems related to larger social problems (e.g., sex inequality)? What are the responsibilities of medical researchers toward their research subjects? What moral reasons do we have to be concerned about the growth of technology in medicine? Are the basic institutions of medicine and medical education just?
Notes: 2 meetings (75 minutes)
Instructors: J. Harold
Expected enrollment: 50

PHIL-240-01 - Philosophy - 2008-2009
(Fall) Environmental Ethics: Nature/Culture/Values - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
A fundamental problem we face as humans is how we should relate to the natural world. Why not turn Yosemite into a parking lot? Is nature to be controlled through applying technological expertise? Or is Thoreau correct in his suggestion that we must immerse ourselves in nature to discover who we truly are? Might the value of nature extend beyond its utility for humans? Students have the opportunity to explore these questions, challenging widespread assumptions about nature, culture, and values.
Notes: 2 meetings (75 minutes)
Instructors: J. Inness
Expected enrollment: 50

PHIL-241-01 - Philosophy - 2008-2009
(Spring) Issues in Contemporary Moral Theory - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Do we need to develop virtues to lead a good life? Is morality founded on freedom or happiness? What does it involve for an individual to be just? What is the relationship between morality and power? This course explores questions and texts relevant to contemporary ethical philosophy. We will read a mix of contemporary and historical texts examining some of these questions in detail.
Prerequisites: Philosophy 205 or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: J. Harold
Expected enrollment: 30

PHIL-242-01 - Philosophy - 2008-2009
(Fall) Social and Political Philosophy
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
An examination of a variety of topics in social and political philosophy, drawing from historical as well as contemporary sources. We will examine questions such as the following: What is the nature and scope of political authority? Do citizens have a duty to obey the laws of their state? What duties do we have to oppressed and marginalized groups? How do race, class, gender, and sexual orientation matter to political freedom and authority? How should we balance political liberties against the public good? Attention will also be given to the application of these questions to particular contemporary social and political issues.

PHIL-249-01 - Philosophy - 2008-2009
(Spring) Women and Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Gender Studies 210)
Some say that philosophers pursue objective knowledge. Feminist philosophy is a body of scholarship that questions the extent to which traditional philosophy has pursued or can pursue knowledge in an objective way. This course is an introduction to issues in feminist philosophy, including its
critique of traditional Western philosophy and its contributions to major areas of philosophy such as metaphysics, ethics, epistemology, social and political philosophy, and the philosophy of language.

**PHIL-250-01** - Philosophy - 2008-2009
(Spring) Topics in Philosophy: Utopia/Dystopia and Human Value - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course will take us on an odyssey through philosophy, literature, and film in order to understand the relationship between our most fundamental assumptions about human nature and our visions of human community. We will examine both positive and negative models and imagined futures to decipher their underlying (and often unacknowledged) claims about human existence, our role in the world, and our place in the cosmos. Readings will include selections from Plato, Huxley, More, Descartes, Marx, Orwell, Lincoln, Paine, Arwood, and others. Students will complete frequent, brief writing assignments and class presentations as well as a more involved final project.
Instructors: N. Belmonte
Expected enrollment: 50

**PHIL-251-01** - Philosophy - 2008-2009
(Spring) Medieval Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Survey of medieval philosophy, focusing on such puzzling questions as (1) Is human free will compatible with God's foreknowledge of all that will ever happen? (2) Are there good arguments for the existence of God? (3) Is the idea of an omnipotent being coherent? (4) Could morality be adequately based on the mere fact that God wants us to do something, rather than on the reason God has for wanting us to do it? (5) Can there be a thing that is a universal thing? Text: Philosophy in the Middle Ages, edited by Hyman and Walsh.
Instructors: G. Matthews
Expected enrollment: 50

**PHIL-255-01** - Philosophy - 2008-2009
(Fall) Existentialism - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Is life absurd? Do human beings really want to be free? Or do we prefer to sacrifice our freedom for comfort and amusement? Is God dead? Is it possible to live without religious belief? These are among the central questions about human life raised by existential thinkers. We will discuss these issues, and many others, through careful reading of philosophic and literary texts by such important existentialists as Søren Kierkegaard, Friedrich Nietzsche, Martin Heidegger, Jean-Paul Sartre, Albert Camus, Simone de Beauvoir, and Franz Fanon.
Notes: 2 meetings (75 minutes)

**PHIL-264-01** - Philosophy - 2008-2009
(Spring) Philosophy of Mind - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course explores long-standing questions about the nature of consciousness; the relationship between mind and body; the relationship between mind and language; and the role that science has in negotiating these questions (if any at all). We also will discuss contemporary, topical debates in the philosophy of mind.
Prerequisites: 4 credits in D or per I
Notes: 2 meetings (75 minutes)
Instructors: C. Lee

**PHIL-271-01** - Philosophy - 2008-2009
(Spring) Philosophy of Language - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Topics in the philosophy of language have become central to many philosophical debates since the early twentieth century. What gives words meaning? Must we understand a speaker's intentions in order to know what she says? What makes a statement true? How do pointing, nodding, and other contextual factors influence interpretation? We will explore these and related issues through readings from Frege, Russell, Wittgenstein, Quine, Grice, Stalnaker, Perry, and others.
Prerequisites: 4 credits in department or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: The department
(Fall) Philosophy of the Arts
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
The purpose of this course is to explore philosophical problems concerning the arts and aesthetic experience. Some questions to be explored include: What is the difference between beauty and moral goodness? Can taste be objective? What does it mean for a work of music to be "sad"? Are the intentions of artists relevant to appreciation? What is the purpose of art criticism? How do pictures represent objects? Readings will be drawn from both historical and contemporary philosophical writings.

PHIL-273-01 - Philosophy - 2008-2009
(Fall) Philosophy of the Arts - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Can a pile of bricks be art? What is the difference between a musical work and a bunch of random noise? What makes a Marx Brothers movie funny? Othello a tragedy? Should art appeal to the masses?
Notes: 2 meetings (75 minutes)
Instructors: T. Wartenberg

PHIL-275-01 - Philosophy - 2008-2009
(Fall) Philosophy and Film Theory - *Not offered this year/term
(Film Studies)
An exploration of philosophical issues encountered in the study of film. Why do we need a theory of film? What is a film anyway? Do films have "authors"? How do films engage our emotions? Can films be socially critical? What can we learn from films? These are examples of the topics to be discussed in this course as we investigate the nature of film and its relation to philosophy. There will be weekly required film screenings
Prerequisites: 4 credits in department or in film studies, or permission of instructor
Notes: 2 meetings (75 minutes), 1 screening (3 hours)
Instructors: T. Wartenberg
Expected enrollment: 30

PHIL-275-01 - Philosophy - 2008-2009
(Spring) Philosophy and Film - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
An exploration of philosophical issues encountered in the study of film. Are films art or entertainment? Do films have "authors"? Can popular films be socially critical? These are examples of the topics to be discussed in this course as we investigate the nature of film and its relation to philosophy. Readings will be drawn from a variety of sources: philosophy, film and cultural theory, film criticism. There will be weekly film screenings.
Prerequisites: 4 credits in department or in film studies, or permission of instructor
Notes: 2 meetings (75 minutes), 1 screening (3 hours)

PHIL-280-01 - Philosophy - 2008-2009
(Fall) Philosophy for Children
(Co-mmunity-based learning course; Speaking-intensive)
When you act bravely, can you be scared? How do you know that you are not dreaming now? If everyone kept telling you that you weren't a person, would you believe them? These are examples of questions raised by children's books, such as *Frog and Toad Together* and *The Bear That Wasn't*. This seminar will discuss whether young children can be taught to philosophize and what the importance of doing so would be. Participants will be required to take part in a community-based learning project of teaching philosophy to elementary school children.
Prerequisites: 4 credits in department or Education 215 or permission of instructor
Notes: 1 meeting (3 hours); 1 lab (90 minutes)

PHIL-310-01 - Philosophy - 2008-2009
(Fall) Twentieth-Century Analytic Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
An introduction to the history, themes, and methods of analytic philosophy, the dominant movement in twentieth-century English-speaking philosophy. Analytic philosophy uses logic and a careful analysis of language to solve philosophical problems. We will study most of the major figures of this movement, including Frege, Russell, Carnap, Quine, and Kripke. Topics addressed will include the logic of numerical identity, reference and existence, Quine’s criticisms of logical positivism, and the meaning of necessity.
Prerequisites: 8 credits in department
Notes: 1 meeting (2 hours 50 minutes)
Instructors: S. Mitchell
Expected enrollment: 20

PHIL-321-01 - Philosophy - 2008-2009
(Fall) Seminar in Philosophy of Language - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This seminar attempts to investigate carefully the broad relationship between language and the world by focusing on issues of realism and idealism: Does language merely attach labels to things (and kinds of things) that exist independently of our thought? Or do we contribute to the construction of the world by developing a conceptual scheme for describing or representing it? The seminar will focus on the work of two pivotal figures in the philosophy of language: Wittgenstein and Chomsky.
Prerequisites: 8 credits in department
Notes: 1 meeting (2 hours)
Expected enrollment: 20

PHIL-327-01 - Philosophy - 2008-2009
(Fall) Advanced Logic - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Mathematics 327s)
This course presents a careful development of predicate calculus, formal elementary number theory, and elementary recursion theory, culminating in a proof of Gödel's incompleteness results. It includes some discussion of the philosophical significance of these results for the foundations of mathematics.
Prerequisites: Philosophy 225, 4 credits in department or in mathematics and permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: S. Mitchell
Expected enrollment: 20

PHIL-327-01 - Philosophy - 2008-2009
(Spring) Advanced Logic - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Mathematics 327s)
Recently there has been a considerable flowering of non-classical logics, most prominently modal logics concerning necessity and possibility for one to dominate work in metaphysics and epistemology. In addition, conditional logics, intuitionist logics, and relevance logics have become important. This course will look at this broad range of topics. These logics are particularly useful in graduate-level classes in philosophy and are intrinsically interesting in their own right.
Prerequisites: Philosophy 225, 4 credits in department or in mathematics and permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: S. Mitchell
Expected enrollment: 15

PHIL-328-01 - Philosophy - 2008-2009
(Fall) Non-Classical Logic
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course looks at the recent flowering of non-classical logics. The most prominent are modal logics concerning necessity and possibility, which have come to dominate work in metaphysics and epistemology. Conditional logics, intuitionist logics, and relevance logics have also become important. These logics are particularly useful in graduate-level classes in philosophy but also are interesting in their own right.

PHIL-334-01 - Philosophy - 2008-2009
(Fall) Topics in Ethics: Meta-Ethics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Preamble (for topics courses): This course studies issues of current concern in contemporary moral theory, moral psychology, and foundations of ethics.
Meta-ethics is the study of the concepts and methods used in ethical discourse and debate. It is not the study, for example, of which actions are right or wrong, but rather of what the terms "right" and "wrong" mean. Possible questions to be discussed in this seminar include: Can moral judgments be true or false? Are moral judgments expressions of feelings? Are they objective or subjective? Are we rationally required to be moral? Are there moral facts? How are moral and aesthetic judgments different? This course presupposes a strong background in philosophy. Prior coursework in ethics and logic is recommended.
Prerequisites: 8 credits in department or permission of instructor
Notes: 1 meeting (2 hours)
Instructors: J. Harold
Expected enrollment: 20

PHIL-334-01 - Philosophy - 2008-2009

PHIL-347-01 - Philosophy - 2008-2009
(Fall) Developments in Feminist Philosophy: Rethinking the World: Philosophy of Sex - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
What makes a body sexy? Is heterosexuality natural? What is "sex?" Feminist philosophy is in the midst of a revolutionary transformation. Rather than remaining content with the task of indicating the shortcomings of the philosophical canon, feminist philosophers are constructing their own distinctively feminist version of philosophy. In this course, we shall explore what contemporary feminist philosophers have written about the nature of sex and sexuality.
Prerequisites: 8 credits in department or permission of instructor
Notes: 1 meeting (2 hours)
Instructors: The department
Expected enrollment: 20

PHIL-350-01 - Philosophy - 2008-2009
(Fall) Topics in Philosophy: Philosophy of Neuroscience
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Psychiatry, psychology, neurology, and the biological neurosciences are rapidly providing new interpretations of human thoughts, emotions, and behaviors. To what extent do modern neurosciences and technologies challenge or change our understanding of such subjects as mental illness, free will, the unconscious, human enhancement, and ethical behavior? How can we evaluate the conclusions of present-day science against the backdrop of past theory change? Readings for this course will be drawn from the recent philosophical, scientific, and clinical literatures.
Prerequisites: 8 credits in the department and one course in psychology or biology, or consent of instructor
Instructors: S. Hawthorne
Expected enrollment: 15

PHIL-350-01 - Philosophy - 2008-2009

PHIL-350-02 - Philosophy - 2008-2009
(Spring) Topics in Philosophy: Postmodern Feminist Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Gender Studies 333(04))
This course examines the work of key feminist theorists of, or informed by, the French/Continental tradition. We focus on the issues of materialism, psychoanalysis, language, materiality, performativity, subjecivity, post-structuralism, and postmodern philosophy. We read works of the following: Helene Cixous, Luce Irigaray, Julia Kristeva, Rosi Braidotti, Judith Butler, and Elizabeth Grosz.
Prerequisites: jr or sr
Notes: 1 meeting (2 hours)
Instructors: J. Weinstein
Expected enrollment: 15

PHIL-351-01 - Philosophy - 2008-2009
(Spring) Systematic Study of One Philosopher: Aristotle
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course will look closely at Aristotle's moral and aesthetic thought through a careful examination of his Nicomachean Ethics and his Poetics. In these works Aristotle gives us his conception of a well-lived life, as well as his view about the relationship between emotions and reason. In addition to the primary texts, we'll read some contemporary commentary on Aristotle, and we'll look at the influence of Aristotle's ideas on contemporary philosophical debates about art and life. This course presupposes prior study of ancient Greek philosophy. Prior coursework in ethics or aesthetics is also recommended.
Prerequisites: Philosophy 201 and 4 additional credits in department, or per I
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: J. Harold
Expected enrollment: 20

PHIL-373-01 - Philosophy - 2008-2009
(Fall) Philosophy of Art - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Preamble (for topics courses): This class examines philosophical issues arising concerning the interpretation, creation, and experience of art. Topics vary from year to year.
This seminar will focus on the work of Arthur Danto, perhaps the preeminent contemporary philosopher of art and art critic for The Nation. We will explore his writings from his seminal essay, "The Artworld," to his recent book, The Abuse of Beauty, in an attempt to understand his views on art, its development, and its future.
Prerequisites: 8 credits in department
Instructors: T. Wartenberg
Expected enrollment: 20

PHIL-373-01 - Philosophy - 2008-2009
(Spring) The Philosophy of Art: The Shock of the New
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Art Studio 280n-01)
Preamble (for topics courses): This class examines philosophical issues arising concerning the interpretation, creation, and experience of art. Topics vary from year to year.
Innovative works of art shock the world and are difficult for viewers to interpret in light of previous artistic practice. How, then, can viewers and critics understand new and challenging works of art? This is the topic that we will investigate in this course by looking at art, reading about art, making art, and writing about art.
Prerequisites: 8 credits in department
Notes: 2 meetings (2 hours 50 minutes); Note: students enrolled in this course will be responsible for some of the cost of materials in addition to the standard studio fee of $60.
Instructors: T. Wartenberg, R. Hachiyamagi
Expected enrollment: 10

PHIL-375-01 - Philosophy - 2008-2009
(Spring) Philosophy of Film - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Film Studies)
Preamble (for topics courses): An examination of different theoretical issues concerning the nature of film and film viewing. Topics vary yearly.
Recently, philosophers have argued that films resemble philosophy in their use of thought experiments. But the role of thought experiments in philosophy is itself contested. The seminar will investigate how thought experiments are used in science and philosophy in order to determine whether films and, more generally, art can legitimately claim that their presentation of thought experiments connects them to philosophy. Some previous acquaintance with philosophy highly recommended.

Prerequisites: 8 credits in department or in film studies or permission of instructor
Notes: 1 meeting (2 hours) and screening
Instructors: T. Wartenberg
Expected enrollment: 15

(Spring) Bon Odori (Japanese Spiritual Dance)

Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.

This course focuses on a Japanese Buddhist folk dance performed outdoors and danced in a concentric circle around a raised platform. It is celebrated as a reminder of the gratefulness one should feel toward one’s ancestors. From this dance of joy comes Bon Odori, a time in which ancestors and their sacrifices are remembered and appreciated. Through studying the dance, students will understand its intentions: remembering and appreciating who you are and where you come from. Because the dance is closely related to Buddhism, this course will provide an opportunity for the students both to exercise through dancing and to calm their minds.

**PE-451-04** - Physical Education and Athletics - 2008-2009
(Spring) Advanced Riding
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Riding Fee $550
Develops the art of communication with the horse for improved harmony through effective use of legs, seat, and hands in dressage and when jumping.
Riders taking this course should be capable of jumping a 3'3" to 3'6" course.
Notes: 2 meetings (50 minutes); fee course
Instructors: C. Law
Expected enrollment: 8

(Fall) Advanced Dressage
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Riding Fee: $550
For experienced dressage riders to improve understanding of straightness, rhythm, obedience, and suppleness. The goal is to improve application of aids through a balanced and effective seat. Riders at this level must have experience riding First Level movements or above.
Prerequisites: permission of instructor
Notes: 2 meetings (50 minutes); fee course
Instructors: R. Schurink

(Fall) Advanced Dressage and Jumping
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Riding Fee $550
This course ties the concepts of straightness, rhythm, obedience and suppleness to technique over fences. Focuses on riders' effectiveness and position in both disciplines. Riders should be comfortable riding a green or unknown horse over a course of 3'3” jumps and capable of riding a 1st level dressage test on an unknown horse. Two spots will be reserved for riders without their own horse.
Prerequisites: Permission of Instructor. 2 meetings, 50 minutes. Fee course.
Instructors: P. Pierce
Expected enrollment: 6

Physical Education and Athletics (Academic Credit)
PHYED-261-01 - Physical Education and Athletics (Academic Credit) - 2008-2009
(Spring) Women in Sport - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Gender Studies 216)
This course is designed to introduce students to the history of women in sport, the status of women in sport since the passage of Title IX in 1972, and current issues impacting women in sport such as race, gender, and sexual orientation. Students will explore the influence of sport on the lives of women and how selected women sport leaders have influenced the growth and development of sport.
Notes: 1 meeting (3 hours) No P.E. credit. Academic credit only.
Instructors: L. Priest
Expected enrollment: 20

PHYED-275-01 - Physical Education and Athletics (Academic Credit) - 2008-2009
(Spring) Introduction to Sport Pedagogy
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This course is designed to introduce students to sport pedagogy with a focus on coaching youth sports. Topics include coaching philosophy, motor learning, sport physiology, sport biomechanics, sport psychology and risk management/liability. We will consider the benefits of playing sports, the development of age appropriate instruction and training programs, goal setting, effective feedback, and the importance of coaches as role models for children.
Notes: 2 meetings (75 minutes) no PE units.
Instructors: D. Allen
Expected enrollment: 20

Physics

PHYS-103-01 - Physics - 2008-2009
(Fall) Foundations of Physics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course studies a variety of topics in physics unified by the physical notions of force, energy, and equilibrium. Mathematics is used at the level of geometry, proportion, and dimensional analysis. Topics, which are drawn from the MCAT syllabus, include geometrical optics, time, oscillation, statics, elasticity, conservation of energy, and fluids.
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes), 1 lab (3 hours)
Instructors: The department
Section Instructors: 01 LAB The department | 02 LAB The department |
Expected enrollment: 28

PHYS-115-01 - Physics - 2008-2009
(Fall) Force, Motion, and Energy
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Studies the mechanics of material objects. Topics include Newton's laws, projectile motion, circular motion, momentum, kinetic and potential energy, angular momentum, gravitation, and oscillations. Calculus is used at the level of Calculus I.
Notes: 4 meetings (50 minutes), 1 lab (3 hours)
Instructors: C. Sutton
Section Instructors: 01 LAB | 02 LAB | 03 LAB |
Expected enrollment: 42

PHYS-115-01 - Physics - 2008-2009
(Spring) Force, Motion, and Energy
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Studies the mechanics of material objects. Topics include Newton's laws, projectile motion, circular motion, momentum, kinetic and potential energy, angular momentum, gravitation, and oscillations. This course is appropriate for students intending to major in a physical science.
Prerequisites: Math 101 (Calc I)
Notes: 4 meetings (50 minutes), 1 lab (3 hours)
Instructors: T. Hawkins
Section Instructors: 01 LAB | 02 LAB | 03 LAB |
Expected enrollment: 42

PHYS-200-01 - Physics - 2008-2009
(January) Special Relativity using Space Trigonometry
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This course is an introduction to Galilean and Special Relativity. Physical intuition is developed with a new approach using the geometry and
trigonometry of spacetime diagrams, together with thought-experiments. Topics include: Kinematics (proper-time, velocity, and acceleration),
Dynamics (energy and momentum), and Spacetime Structure (light cones and causality). Time permitting, we may offer brief introductions to tensors
and to the relativistic formulation of Electromagnetism. The first part of each class meeting is mainly a lecture presentation of the various topics. The
second part is a problem-solving session for treating standard textbook problems with these new methods.
Prerequisites: high school geometry and trigonometry; introductory physics and calculus would be helpful.
Notes: 4 meetings (2 hours)
Instructors: R. Salgado
Expected enrollment: 25

PHYS-204-01 - Physics - 2008-2009
(Spring) Phenomena of Physics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course studies a variety of topics in physics, drawn from the MCAT syllabus, including thermodynamics, acoustics, wave optics, electricity, magnetism, and nuclear phenomena. As in Physics 103f, the applicable mathematics is geometry, proportion, and dimensional analysis.
Prerequisites: Physics 103 or 115
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes), 1 lab (3 hours)
Instructors: R. Salgado
Section Instructors: 01 LAB | 02 LAB |
Expected enrollment: 28

PHYS-211-01 - Physics - 2008-2009
(Spring) Gender in Science - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Gndst-241)
This course examines explanations for the under-representation of women in science, technology, engineering, and math (STEM) with an eye to
identifying how to increase the participation of women in science. The course will address questions about gender differences in cognition and ability,
the role of stereotyping, as well as the "leaky pipeline" issue, that is, the rate and timing of the departure of women from scientific fields. Course
readings will explore the psychology of gender, as it relates to STEM. In addition, we will read research from physical scientists, reports from
professional organizations such as the American Physical Society, and reports from congressional committees.
Notes: 2 meetings (75 minutes)
Instructors: K. Aidala
Expected enrollment: 16

PHYS-216-01 - Physics - 2008-2009
(Fall) Waves and Electromagnetism
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Topics include: electromagnetism, emphasizing fields and energy; electrostastics; electric circuits; magnetism; induction; and electromagnetic radiation. Introduces both mechanical and electromagnetic wave phenomena. Additional topics chosen according to the interests of the class and instructor.
Prerequisites: Physics 115; Mathematics 202 or concurrent enrollment
Notes: 4 meetings (50 minutes), 1 lab (3 hours)
Instructors: J. Hudgings
Section Instructors: 01 LAB | 02 LAB |
Expected enrollment: 28

PHYS-216-01 - Physics - 2008-2009
(Spring) Electromagnetism
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Topics include electromagnetism, emphasizing fields and energy; electrostastics; electric circuits; magnetism; induction; and electromagnetic radiation. Additional topics chosen according to the interests of the class and instructor.

PHYS-231-01 - Physics - 2008-2009
(Fall) Techniques of Experimental Physics
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
Provides training in the techniques employed in the construction of scientific equipment.
Prerequisites: jr, sr, major
PHYS-231-01 - Physics - 2008-2009
(Spring) Techniques of Experimental Physics
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
Provides training in the techniques employed in the construction of scientific equipment.
Prerequisites: jr, sr, major in department
Notes: 1 meeting (2 hours) for 3 weeks
Instructors: L. McEachern
Expected enrollment: 4

PHYS-241-01 - Physics - 2008-2009
(January) Modern Optoelectronics - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This course for first- or second-year students will combine an intensive lab experience with reading primary literature in the area of semiconductor device physics. In the lab, student teams will explore a scientific question developed by the students and instructor. Lab work will be complemented by "journal club" meetings, in which students will present papers on their topic. 32 contact hours include a minimum of 24 hours of lab time plus 8 hours of discussion, consistent with the course goal of offering an intensive lab experience.
Prerequisites: permission of instructor
Notes: 5 meetings per week of 4 hours each, for two weeks
Instructors: J. Hudgings
Expected enrollment: 25

PHYS-295-01 - Physics - 2008-2009
(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.

Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph
Instructors: The department

PHYS-301-01 - Physics - 2008-2009
(Fall) Waves and Optics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
A comprehensive treatment of wave phenomena, particularly light, leading to an introductory study of quantum mechanics. Topics include wave propagation, polarization, interference and interferometry, diffraction, and special relativity.
Prerequisites: Physics 216, 303 or concurrent enrollment
Notes: 4 meetings (50 minutes), 1 lab (3 hours)
Instructors: C. Sutton
Expected enrollment: 12

PHYS-302-01 - Physics - 2008-2009
(Spring) Quantum Mechanical Phenomena
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course provides an introduction to quantum mechanics. The Uncertainty Principle, Schroedinger's Equation, and the hydrogen atom are studied in depth, with emphasis on angular momentum, electron spin, and the Pauli Exclusion Principle.
Prerequisites: Physics 301
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: J. Hudgings
Expected enrollment: 14
PHYS-303-01 - Physics - 2008-2009
(Fall) Introduction to Mathematical Methods for Scientists
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Topics include infinite series, complex numbers, partial differentiation, multiple integration, selected topics in linear algebra and vector analysis, ordinary differential equations, and Fourier series. The course includes a brief introduction to Mathematica and Matlab, in addition to a traditional emphasis on analytic solutions.
Prerequisites: Physics 216 or concurrent enrollment
Notes: 4 meetings (50 minutes)
Instructors: J. Hudgings
Expected enrollment: 25

PHYS-308-01 - Physics - 2008-2009
(Fall) Electronics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is a study of electrical circuits and components with emphasis on the underlying physical principles; solid-state active devices with applications to simple systems such as linear amplifiers; feedback-controlled instrumentation; and analog and digital computing devices.
Prerequisites: Physics 216
Notes: 2 meetings (3 hours - hands-on lecture and lab combined)
Instructors: K. Aidala
Expected enrollment: 12

PHYS-315-01 - Physics - 2008-2009
(Spring) Analytical Mechanics
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Newton's great innovation was the description of the world by differential equations, the beginning of physics as we know it. This course studies Newtonian mechanics for a point particle in 1, 2, and 3 dimensions, systems of particles, rigid bodies, and the Lagrangian and Hamiltonian formulations.
Prerequisites: Physics 303
Notes: 2 meetings (75 minutes)
Instructors: R. Salgado
Expected enrollment: 25

PHYS-324-01 - Physics - 2008-2009
(Spring) Methods of Applied Mathematics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Mathematics 324s)
This course is an introduction to theories and techniques important to applied mathematics. Topics include special functions, calculus of variations, theory of functions of a complex variable, solution of partial differential equations, integral transform methods, and Green's functions. While the focus of the course is on analytical techniques, we will develop numerical approaches to problem-solving.
Prerequisites: Physics 216, 303
Notes: 4 meetings (50 minutes); Physics 324 or 336 will normally be offered in alternating years
Instructors: The department
Expected enrollment: 25

PHYS-325-01 - Physics - 2008-2009
(Fall) Electromagnetic Theory
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course presents the development of mathematical descriptions of electric and magnetic fields; study of interactions of fields with matter in static and dynamic situations; mathematical description of waves; and development of Maxwell's equations with a few applications to the reflection and refraction of light and microwave cavities.
Prerequisites: Physics 301, 315, or 324
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: The department
Expected enrollment: 25

PHYS-326-01 - Physics - 2008-2009
(Spring) Statistical Mechanics and Thermodynamics
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course presents thermodynamic and statistical descriptions of many-particle systems. Topics include classical and quantum ideal gases with applications to paramagnetism; black-body radiation; Bose-Einstein condensation; and the Einstein and Debye solid; the specific heat of solids.

Prerequisites: Physics 301

Notes: 2 meetings (75 minutes)

Instructors: The department

Expected enrollment: 25

PHYS-329-01 - Physics - 2008-2009

(Fall) Topics in Advanced Physics: Computational Physics

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

Preamble (for topics courses): Topics chosen according to the interests of the students and the instructor.

This course is intended for Physics majors who are interested in scientific modeling, computation, simulation, and visualization. We will draw on a variety of examples from introductory and intermediate physics. More advanced examples may be considered, depending on student interest. Some previous computer programming experience will be helpful, but not required as a prerequisite. We will work in the Python programming language, together with the VPython visualization module.

Prerequisites: Phys 216

Instructors: R. Salgado

Expected enrollment: 25

PHYS-329-01 - Physics - 2008-2009

(Spring) Topics in Advanced Physics - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

Preamble (for topics courses): Topics chosen according to the interests of the students and the instructor.

Prerequisites: will depend on the subject being discussed for this semester

Notes: 2 meetings (75 minutes)

Instructors: The department

Expected enrollment: 25

PHYS-336-01 - Physics - 2008-2009

(Spring) Quantum Mechanics

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

This course is an introduction to formal quantum theory: the wave function and its interpretation, observables and linear operators, matrix mechanics and the uncertainty principle; solutions of one-dimensional problems; solutions of three-dimensional problems and angular momentum; physics and perturbative methods.

Prerequisites: Physics 302, 324 or 325

Notes: 2 meetings (75 minutes); Physics 324 or 336 will normally be offered in alternating years

Instructors: K. Aidala

Expected enrollment: 25

PHYS-341-01 - Physics - 2008-2009

(January) Modern Optoelectronics - *Not offered this year/term

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

This advanced course will combine intensive hands-on lab experience with reading primary literature in the area of optoelectronics and semiconductor device physics. In the lab, student teams will design/implement experiments exploring a scientific question developed by the students in consultation with the instructor. Lab work will be complemented by "journal club" style meetings in which, on a rotating basis, students present papers on their topic from the primary literature. There will be a mini-symposium at the end. 32 contact hours include a minimum of 24 hours of lab time plus 8 hours of discussion, consistent with the course goal of offering an intensive lab experience.

Prerequisites: Phys 326 and 336 or permission of instructor

Notes: 5 meetings weekly of 4 hours each for 2 weeks

Instructors: J. Hudgings

(Spring) Political Economy of Work and Culture
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
What is the relationship between work, identity, and property? What is environmental justice? How do the everyday activities of eating, drinking, breathing, playing, and working take on political meaning? What is the hybridization of economic power involving race and ethnicity, class, and gender? Through the study of American political economy in its theoretical and practical applications, we will rethink everyday life. Political economy is the mapping of politics according to notions of property, wealth, citizenship, and community.

(Spring) Who Counts? Understanding Inequality and Social Policy Through Methodological Literacy
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
It is one thing to deplore inequality; it is another to do something about it. For example, how should we define poverty, or evaluate programs for increasing educational equality? Are alleged generalizations about different races, sexes, social classes, or ethnicities supported by reliable data, or is there more variability within these groups than between them? How do we know which statistics to trust? How do the ways in which we ask these questions affect the answers we're likely to find? In this course, we will seek to understand the methods employed by scholars of politics from a critical perspective, looking not only at what they let us see, but also at what they obscure.

(Fall) Legal Spaces: A Semiotic Approach to Politics
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Everyday local places, such as the mall, war memorial, pub, cinema, park, coffeehouse, sidewalk, dormitory, or courtroom, are actually critical sites of power. Semiotics, or the study of signs and symbols, is a visual approach to political meaning. The semiotic study of ordinary spaces enables us to better understand the implications of constructed places, boundaries and terrains in our relations to and with one another. As sites of contestation, these spaces produce and reproduce rights, legality, and community. We will examine these places according to the ideas of justice and diversity from perspectives involving and reflecting race, gender, class, and ability.
Prerequisites: 8 credits from the department
Instructors: S. Marusek

(Spring) Politics & Rhetoric
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Writing-intensive)
People have long accused politicians of using rhetoric to pander to audiences and get what they want regardless of the truth. But politics, especially democratic politics, depends on the persuasive force of communication to persuade and motivate others. What is the relationship between speech and politics? Can we have political communication without rhetoric? How can citizens use speech to improve democracy? What are the political effects of different rhetorical styles? How can speech help communities deal with conflict? The course will focus on these questions, moving from classical writings on rhetoric to contemporary democratic political theory.
Prerequisites: jr, sr, 8 credits in department or in critical social thought

Introductory Seminars in Psychology: Brain/Mind

First-year seminar (Writing-intensive)

What is the relationship between brain activity and how we think, feel, perceive, remember, and communicate? How does the brain contribute to our development as unique individuals? How do subjective experience shape the structure and activity of our brains? In approaching these questions, we will bridge the perspectives of psychoanalysis and neuroscience. We will explore how the brain works; the role of conscious and unconscious processes in determining our behavior; and the effects of traumatic injury to the brain.

(Spring) Introductory Seminars in Psychology: All in the Family
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
First-year seminar (Writing-intensive)
If psychology is the study of the mind and behavior, do psychologists only study individuals? When we look at families do we simply have a collection of individual human psyches that we must try to understand one by one or does something more complex happen when groups such as the family come together? Can we understand families as whole complex systems with narratives all their own? Through the study of the family, this course will introduce students to systems thinking, another theoretical perspective from which to understand the psychology of human behavior. Our texts will include case studies, films, and writings by major family theorists.

PSYCH-222-01 - Psychology - 2008-2009
(Spring) Abnormal Psychology: Clinical Perspectives - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This survey course on abnormal psychology focuses on understanding diagnoses included in the American Psychiatric Association's "Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition" and their implications for the understanding and treatment of psychological disorders. Throughout the course we will question the concept of abnormality and examine its positive and negative effects in the amelioration of human suffering.
Prerequisites: 100-level psychology course
Notes: 1 meeting (3 hours)
Instructors: P. Romney
Expected enrollment: 25

PSYCH-230-01 - Psychology - 2008-2009
(Fall) Developmental Psychology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Examines changes in cognitive, social, and emotional functioning, including theory and research that illuminate some central issues in characterizing these changes: the relative contributions of nature and nurture, the influence of the context on development, continuity versus discontinuity in development, and the concept of stage. Includes observations at the Gorse Children's Center at Stonybrook.
Prerequisites: a 100-level course in psychology or permission of instructor
Notes: 2 meetings (75 minutes) plus 4th hour
Instructors: R. Shilkret

**PSYCH-233-01** - Psychology - 2008-2009

(Fall) Educational Psychology

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

What do we learn? How do we learn? Why do we learn? In this course, we will study issues of learning, teaching, and motivation that are central to educational psychology. We will explore the shifting paradigms within educational psychology, multiple subject matter areas, (dis)continuities between classroom and home cultures, students' prior experiences, teachers as learners, ethnic and gender identity in the classroom, and learning in out-of-school settings. Requires a prepracticum in a community-based setting.

Prerequisites: soph, jr or sr

Notes: 2 meetings (75 minutes) plus prepracticum 2 hours per week

Instructors: M. Babineau

**PSYCH-234-01** - Psychology - 2008-2009

**PSYCH-236-01** - Psychology - 2008-2009

(Fall) Adolescent Development

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course offers a comprehensive introduction to human development during adolescence. It considers historical and cultural forces that contribute to adolescence as a distinct segment of the life span. Contemporary problems confronting adolescents--such as crime, violence, gender, race, eating disorders, substance abuse, and depression--are also examined.

Prerequisites: a 100-level course in psychology

Notes: 2 meetings (75 minutes)

Instructors: The department

**PSYCH-240-01** - Psychology - 2008-2009

(Spring) Visual and Auditory Perception

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Why is it that some people, mostly men, cannot distinguish red socks from green ones? Why does the moon on the horizon appear larger than when it is overhead? How do Magic Eye pictures work? Why does the Mona Lisa's smile seem so elusive? This course addresses such questions by examining biological and psychological studies of the visual and auditory systems. Among the topics we will explore are object recognition; color vision; the perception of depth, size, and movement; the effects of experience on perception; sound localization; and the perception of pitch.

Prerequisites: a 100-level course in psychology

Notes: 2 meetings (75 minutes)
Instructors: J. Cohen

**PSYCH-241-01** - Psychology - 2008-2009
(Spring) Cognitive Psychology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Cognition encompasses a range of phenomena that define our mental lives. This course considers empirical investigations and theoretical accounts of cognitive issues, including learning and memory, creativity and problem solving, decision making, attention, consciousness, and language.
Prerequisites: a 100-level course in psychology
Notes: 3 meetings (50 minutes)
Instructors: R. Polewan

**PSYCH-250-01** - Psychology - 2008-2009
(Fall) Introduction to the Biological Bases of Behavior
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Neuroscience and Behavior 250f)
This course is an introduction to and survey of the biological bases of behavior, including physiological, biochemical, and neurophysiological determinants of sensation, motor control, sleep, eating and drinking, learning and memory, language, and mental disorders.
Prerequisites: a 100-level course in psychology and 4 credits in biological sciences
Notes: 3 meetings (50 minutes)
Instructors: The department

**PSYCH-251-01** - Psychology - 2008-2009
(Fall) Animal Behavior
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)
Examines the development, causal mechanisms, evolutionary history, and function of the behavior of animals. Topics include sensory capacities, predator evasion, reproduction, parental care, social behavior, and learning.
Prerequisites: a 100-level course in psychology
Notes: 2 meetings (75 minutes)
Instructors: K. Hollis

(Fall) Bon Appetit! Food, Appetite, and Culture - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Food is energy, an occasion for intimacy, and often a cause of aggression and pathology. The provenance of food preferences in humans and other species is considered from the perspectives of anthropology, biology, neuroscience, and psychology. Specific topics include the sensory properties of food, attitudes toward food, the psychology of ingestion, and the neuroscience of feeding.
Prerequisites: a 100-level course in psychology
Notes: 2 meetings (75 minutes)
Instructors: W. Millard

**PSYCH-300-01** - Psychology - 2008-2009
**(Spring) Seminar in History and Systems of Psychology: Psychology and the Military**
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)
Psychology’s history as a discipline is inextricably linked to the military -- as an employer of psychologists, as the context and funding source for many of psychology’s products, and as the stimulus for the development of key areas of the field. In addition, psychologists’ role in warfare (as test administrators, clinicians, and interrogators), and the psychological consequences of war on soldiers (from the shell shock of the 1920s to the PTSD of today) represent some of psychology’s most persistent controversies. Reading a range of primary and secondary sources from World War I to the present, we will analyze psychology’s complex relations to the military from multiple perspectives.
Prerequisites: Jr, Sr, 8 credits in department and permission of instructor. Preference given to students with some background in sociology, politics, or history.
Notes: 1 meeting (3 hours). Interested students need to fill out an application form available in the Psychology department office.
Instructors: G. Hornstein
Expected enrollment: 15

**PSYCH-310-01** - Psychology - 2008-2009
**(Fall) Laboratory: Research Methods in Social Psychology**
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course is an introduction to laboratory and field methods in social psychology: methodology, data analysis, ethical problems, statistical inference, and research design. All students are expected to design and conduct a research project.
Prerequisites: Psychology 200
Notes: 1 meeting (2 hours)
Instructors: The department
Expected enrollment: 12

**PSYCH-319-01** - Psychology - 2008-2009
**(Spring) Seminar in Social Psychology: Social Psychology of Stigma**
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Why are some groups devalued and stigmatized, while others are not? What social and psychological factors perpetuate the stigmatization of these groups? How can social psychologists reduce stigmatization? This seminar will draw from research in social psychology and related fields to examine the ways in which social stigma affect stigmatized and non-stigmatized individuals, and their interactions.
Prerequisites: Jr, Sr, a 100 level course in Psychology
Notes: 1 meeting (3 hours)
Instructors: S. Knapp
Expected enrollment: 15

**PSYCH-320-01** - Psychology - 2008-2009
**(Spring) Concepts of Abnormality**
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course is a study of how maladaptive patterns of thought and action are understood from a psychological viewpoint. Behaviors ranging from neurotic to psychotic are studied in terms of underlying character structure and origins in childhood experience. Competing psychoanalytic theories are brought to bear on these phenomena.
Prerequisites: Jr, sr (permission required for exceptions), two prior psychology courses, Psychology 230 recommended
Notes: 2 meetings (75 minutes)
Instructors: R. Shilkret
PSYCH-322-01 - Psychology - 2008-2009
(Fall) Psychoanalytic Psychology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This extensive examination of Freud's systematic psychology focuses on such phenomena as the effects of early experience, continuity and change in development, and similarities among and differences between individuals. Readings include selections from Sigmund Freud's earlier work and from the sweeping revisions of the 1920s. Criticisms and revisions of Freud are discussed. Throughout, ideas from contemporary psychoanalysis are compared and contrasted with those of Freud.
Prerequisites: Psychology 230, 220 recommended and permission of instructor
Notes: 2 meetings (75 minutes). Students must submit a letter of interest to the professor during advising week. Include a list of courses taken in psychology and other disciplines that have prepared you for this course.
Instructors: R. Shilkret
Expected enrollment: 12

PSYCH-323-01 - Psychology - 2008-2009
(Fall) Laboratory in Phenomenological Research - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Writing-intensive)
This laboratory course introduces methods of research that focus on the qualitative description and analysis of human experience. Students learn a variety of techniques of data collection (interviewing, intensive observation, archival research) and become proficient in using phenomenological methods to interpret and analyze the content and structure of data of this type. Readings focus on specific methodological practices as well as on the history and philosophy of science that differentiate qualitative and experimental approaches to psychological research. Students work both collaboratively and individually on projects throughout the course.
Prerequisites: Psychology 200 and permission of instructor.
Notes: 1 meeting (3 hours). This course also counts in the Social area of psychology.
Instructors: G. Hornstein
Expected enrollment: 12

PSYCH-325-01 - Psychology - 2008-2009
(Fall) Laboratory in Psychological Assessment
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Historical development, theoretical bases, and critical evaluation of tests used to describe adult cognitive and personality functioning. Supervised practicum in test administration, scoring, and interpretation.
Prerequisites: Psychology 200 and 201, either Psychology 230 or 320, jr. or sr. and permission of instructor
Notes: 1 meeting(3 hours); Submit an essay by April 10 to Robert Shilkret (box in Reese). List psychology courses (and grades); current psych courses; GPA. In an essay (max 500 words), describe why you want to take this course, relevant past experiences, and future goals related to the work for the course.
Instructors: R. Shilkret
Expected enrollment: 12

PSYCH-326-01 - Psychology - 2008-2009
(Fall) Laboratory in Personality and Abnormal Psychology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course is an introduction to research methods in abnormal and personality psychology. Students will work as a class to collect data using quantitative and qualitative methodologies. Students will be expected to collect survey and questionnaire-based data as well as engage in some interviewing projects. We will consider the various stages of research including literature review, design, ethical considerations, data collection, and analysis (qualitative and quantitative), and consider the statistical inference or implications of our findings. The course focuses on the impact of stress and coping on the lives of individuals, identity, their relationships, and psychological adjustment.
Prerequisites: Psychology 200, 201; 220 or 210 or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: A. Douglas
Expected enrollment: 12

PSYCH-329-01 - Psychology - 2008-2009
(Fall) Seminar in Personality and Abnormal Psychology: First-Person Narratives of Madness
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)
Psychologists have typically conceptualized "mental illness" in terms of the symptoms and diagnoses proposed by psychiatrists in the Diagnostic and Statistical Manual of Mental Disorders (DSM). These categories, while perhaps useful for prescribing medication, do little to help us understand the subjective experiences that are considered "mad." In this seminar, we analyze accounts (historical and contemporary) written by people who have experienced extreme states, intense emotions, or unusual perceptions or beliefs, to understand how these "counter-narratives" offer new insights into psychological life.

Mount Holyoke College Course Information Archive 2000-2016
Prerequisites: A 100-level course in psychology, jr, sr and permission of instructor; Students with a background in literature particularly welcome.
Preference given to senior psychology and neuroscience majors
Notes: 1 meeting (3 hours). Students must submit an information sheet (available in department office) by noon on Thursday of advising week to get permission to register for the course.
Instructors: G. Hornstein
Expected enrollment: 15

PSYCH-329-02 - Psychology - 2008-2009
(Fall) Seminar in Personality and Abnormal Psychology: Psychology of Trauma
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
What happens after a traumatic event? Why do some people develop psychological disorders and others do not? This course will explore the psychological theories and research on trauma and stress. Topics covered will include childhood abuse, domestic violence, combat violence, community violence, and interpersonal violence. The seminar will explore psychological dysfunction, disorders, as well as adaptation and coping following exposure to traumatic stress. In addition, the course will explore the concept of "cultural trauma."
Prerequisites: 100 level psychology course, jr or sr; Psychology 230 preferred or a course in abnormal psychology
Notes: 1 meeting (3 hours).
Instructors: A. Douglas
Expected enrollment: 16

PSYCH-330-01 - Psychology - 2008-2009
(Spring) Lab in Developmental Psychology: Knowledge, Science, and Parent-Child Conversations
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
How do ideas about knowledge (folk epistemology) develop, and how do these ideas relate to the types of reasoning strategies people emphasize? Using existing transcript data, students will define and explore specific questions about how conversations with parents may help guide elementary school children's emerging ideas about knowledge and about the nature of science. Students will also help develop a questionnaire and collect data to explore variation in these ideas and possible relation to reasoning biases among college students.
Prerequisites: Psychology 200, either 230 or 241, and permission of instructor. Interested students should review a course information sheet available from instructor during advising week.
Notes: 2 meetings (75 min). This course also counts in the Cognitive and Perception area of psychology. Students wishing to take the course must send the professor a short statement indicating the reasons for taking the course and prior coursework.
Instructors: A. Valle
Expected enrollment: 12

PSYCH-330-02 - Psychology - 2008-2009
(Spring) Lab in Developmental Psychology: Adolescent Development in Community Settings
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course is a study of research methods in developmental psychology, focusing on observational, survey, and interview techniques for studying young children, adolescents, and adults. It encourages the student to think about the basic issues of developmental psychology research: the conceptualization of problems, design of research, choice of methods to be used, and ethical questions that might arise. Students complete a major research project.
Prerequisites: Psychology 200, 201; 230 or 233 and permission of instructor.
Notes: 1 meeting (2 1/2 hours) plus a 4th hour; Students must pick up an information sheet from the dept. office and submit a statement by email to the professor during advising week.
Instructors: B. Packard
Expected enrollment: 12

PSYCH-330-03 - Psychology - 2008-2009
(Spring) Lab in Developmental Psychology: Laboratory in Romantic Development: Observational Coding Methodology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Students will work in teams to code videotaped observations of romanticconflict discussions. Students will learn to code emotion expressions, humor, conflict avoidance, hostility, attachment behaviors, and relationship quality at both the dyadic and individual levels. Students will also write their own coding scales to apply to these observations. Issues of coding bias, construct validity, and intercoder reliability will be addressed. Emphasis will be on conceptual and methodological aspects of developing, coding, and analyzing observational data for individuals and individuals nested within dyads.
Prerequisites: Psychology 200, 201; 230 or 236 and permission of instructor.
Notes: 1 meeting (3 hours); During advising week students must submit a essay to the professor on why they want to take the course.
Instructors: K. Haydon
Expected enrollment: 12

PSYCH-331-01 - Psychology - 2008-2009
(Fall) Lab in Early Social and Personality Development
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
In the role of a participant-observer, each student studies intensively the social and personality development of the children in one classroom at the Gorse Children's Center at Stonybrook. Students learn how to articulate developmental changes and individual differences by analyzing detailed observations. Topics include social cognition, peer relationships, social skills, concepts of friendship, emotional development, identity formation, self-esteem, and the social and cultural context of development.

Prerequisites: Psychology 200, 201, and 230 or permission of instructor

Notes: 1 meeting (2 hours), 2 labs (3 hours each) at Gorse Children's Center at Stonybrook

Instructors: P. Ramsey

Expected enrollment: 18

PSYCH-337-01 - Psychology - 2008-2009
(Fall) Seminar in Educational Psychology: Motivation
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Community-based learning course; Speaking-intensive)

What influences our desire to learn, to participate in certain activities, or to become particular kinds of people? We will examine the topic of "motivation" using several perspectives, across age levels and in various settings. Drawing from a variety of resources, including autobiographies, research studies, and videos, we will target our own motivation through reflection and action and the motivation of others through active coaching and mentoring in a community-based setting.

Prerequisites: Psychology 233 and permission of instructor

Notes: 1 meeting (3 hours); requires a field component in a community-based site (at least a 2-hour block per week); A statement of interest must be submitted electronically during the week of advising - please pick up an information sheet in the department office.

Instructors: B. Packard

Expected enrollment: 15

PSYCH-339-01 - Psychology - 2008-2009
(Fall) Seminar in Developmental Psychology: Close Relationships across the Lifespan
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course will cover developmental implications of close relationships from infancy through adulthood with a focus on parents, friendships, and romantic partners. The goal is to examine normative developmental processes through a relational lens.

Prerequisites: jr, sr, and Psychology 230

Notes: 1 meetings (3 hours)

Instructors: K. Haydon

Expected enrollment: 15

PSYCH-339-01 - Psychology - 2008-2009
(Spring) Seminar in Developmental Psychology: Culture and Human Development
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This seminar examines theory and research on the cultural basis of human development and on cultural variations and similarities in development in different historical and current world communities. The approach is interdisciplinary, drawing on psychology, anthropology, linguistics, sociology, and history, to examine varying and universal goals of development and participation of children and their families in cultural practices.

Prerequisites: jr, sr, and one of the following courses: Psychology 220, 230, 236, 241, or a 200-level course in anthropology

Notes: 2 meetings (75 min)

Instructors: A. Valle

Expected enrollment: 16

PSYCH-339-02 - Psychology - 2008-2009
(Spring) Seminar in Developmental Psychology: First Love: Attachment Theory and Research - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

The relationship with the infant's primary caretaker, usually the mother, develops in a complex way during the first year after birth. We will study what is now known about this relationship, how we know about its importance to the infant, and the variation in types of such relationships early in life.
The importance of this first love for later development, in childhood, adolescence, and adult life will be considered. Methods of research will be emphasized and students will be expected to give class presentations.

Prerequisites: jr, sr, Psychology 200, 230 and permission of instructor; written statement to Professor Shilkret during advising week required

Notes: 1 meeting (3 hours)

Instructors: R. Shilkret

Expected enrollment: 12

**PSYCH-340-01 - Psychology - 2008-2009**

**(Fall) Laboratory in Perception and Cognition: Cognition and Literacy**

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog. etc. requirement

(Community-based learning course)

Adult illiteracy in the U.S. presents an ever-growing challenge. To understand this problem, we will learn various theories of reading. However, since many models of reading are based on data gathered from children, we will also examine how the cognitive abilities of adults are different from those of children. A large component of this class concerns learning the lab techniques associated with assessing reading abilities. In addition, since this is a community-based learning course, each student will become a tutor for an adult enrolled in an area literacy program.

Prerequisites: a 100-level course in psychology, 201, 200 and permission of instructor. Students must meet with the professor during advising week to get permission to enter the course.

Notes: 1 meeting (2 hours) plus 4th hour, plus 3 hours per week as a literacy tutor in Springfield

Instructors: K. Binder

Expected enrollment: 15

**(Spring) Seminar in Perception and Cognition - *Not offered this year/term**

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog. etc. requirement

In this seminar we will explore various genetic syndromes, developmental disabilities, and brain damage cases that produce asymmetric cognitive profiles. We will examine the cognitive strengths and weaknesses associated with various syndromes and disabilities in order to gain a greater understanding of the syndrome itself, but we will also explore how these cases inform us about learning, memory, and development in "normal" individuals.

Prerequisites: a 100-level course in psychology, Psychology 200 and 201, and permission of instructor

Notes: 1 meeting (3 hours)

Instructors: K. Binder

Expected enrollment: 15

**(Spring) Laboratory in Behavioral Neuroscience**

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog. etc. requirement

This laboratory provides intensive study and discussion of specific topics in behavioral neuroscience, including neuroanatomy, surgery, laboratory instrumentation, and psychopharmacology. The course will also include an examination of methods and experimentation in the laboratory.

Prerequisites: Psychology 200, 201, and one of the following: Psychology 240, 250, 251, or Biological Sciences 333

Notes: 2 meetings (1 1/2 hours)

Instructors: R. Polewan

Expected enrollment: 12

**(Spring) Laboratory in Animal Behavior - *Not offered this year/term**

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog. etc. requirement

Several projects within such areas as feeding, aggression, reproduction, and learning are researched by students working in small groups. The course stresses the acquisition of research skills required for naturalistic and laboratory observation in the study of animal behavior.

Prerequisites: Psychology 251. Preference given to senior psychology and neuroscience majors.

Notes: 1 meeting (2 hours, 15 minutes) plus 4th hour. During advising week students must submit to the professor a written list of psychology and biology courses taken at MHC or elsewhere, along with their name and year of graduation.

Instructors: K. Hollis

Expected enrollment: 12

**(Fall) Seminar: Biological Bases of Behavior: Memory and Cognitive Processes**

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog. etc. requirement

This seminar will explore the biological bases of memory and cognitive processes. Students will gain an understanding of how the nervous system acquires, stores, and retrieves memory. Concepts studied will include characteristics of short-term and long-term memory; models of perception, attention, and memory; and disorders that affect memory and cognition such as amnesia and Alzheimer's disease.

Prerequisites: Psychology 250
Notes: 1 meeting (3 hours)
Instructors: R. Polewan
Expected enrollment: 15

(Fall) Whiteness, Racism, and Inequality in Schools and Society - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Community-based learning course; Writing-intensive)
What is race? Who decides? What does it mean to be white? How is the ideology of whiteness maintained? We will explore these and related questions as we examine the ways in which whiteness and racism are enacted in schools, have historically interfered with the educational attainment of children of color, and have led to the mis-education of white children. Readings and assignments will examine dynamics of dominance and how the construction of racial identities influences the lives of teachers and students in classrooms. We will also consider theories of multicultural education and antiracist pedagogies as strategies for addressing racial and other inequities in schools.
Prerequisites: sophomore, junior, senior or permission of instructor
Notes: 2 meetings (75 minutes) plus practicum
Instructors: S. Lawrence

(Fall) Making Meaning for Operations/Reasoning Algebraically about Operations
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Math-156)
This course will draw on two modules of the Developing Mathematical Ideas (DMI) series. DMI is a curriculum designed to help think through the major ideas of K-8 mathematics and examine how children develop those ideas. The first four sessions will parallel the first four sessions of Making Meaning for Operations. The remaining nine sessions will be based on the Reasoning Algebraically about Operations module. This module focuses on how children's study of operations leads into articulation of generalizations in the number system and justification of such generalizations. Participants will explore and understand how such work in the early grades relates to algebra studied in later grades.

(Fall) The Process of Teaching and Learning: Developing Math/Science/Technology Instruction and Curriculum
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

Students will learn about inquiry-based science/math curriculum and use of technology in the classroom. They will construct more extensive understandings of science/math instruction by developing lessons that implement the Massachusetts Frameworks. At the Hitchcock Center and in classes on campus, emphasis will be on learning diverse management and instructional practices, such as the use of manipulatives, problem solving, cooperative learning, and project-based learning. Students will become more adept at developing effective approaches to using assessment to guide instruction. Early childhood candidates will visit Gorse Children's Center to learn about resources for pre-K students.

(Jewish Studies 104fs)
Judaism is a 3,500-year-old tradition that has developed over time as Jewish communities all over the world creatively interacted with the different cultural and historical milieus in which they lived. This course explores the ways in which Judaism has sought to transform ordinary life into sacred life. What are the ways in which Judaism conceives of God, and what is the meaning of life? What roles do study, prayer, ethics, sex, marriage, family, rituals of the life cycle, and community play in Judaism? These and other questions will be taken up through study of diverse types of religious literature and historical evidence.

First-year seminar
The extraordinary witness demonstrated by Dietrich Bonhoeffer—German pastor and Christian theologian—during the Second World War serves as a sober reminder of the high stakes the world places on religious commitment. Bonhoeffer's complicity in the plot to assassinate Hitler raises the ethical dilemma everyone faces when confronted by the forces of evil. What is the believer's proper response? Is violent resistance ever justified? Does "the end justify the means"?

(Spring) Issues in Islamic History: Classical Islamic Civilization - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

Preamble (for topics courses): This introductory course provides a broad, chronologically structured overview of Islamic history, focusing on major issues that have been of religious significance to Muslims in various eras. Using case studies, ranging from episodes in the early Islamic conquests to the growth of Islam in urban America, we will examine enduring themes and contextual variations in the history of Islam.

This course examines the development of Islamic civilization from the time of the Prophet Muhammad to the sixteenth century. Particular attention will be paid to the political structures of the caliphates, the process of conquest and conversion, and interaction with non-Muslim cultures. Literature, art, architecture, and philosophical and scientific works of classical Islamic civilization will be used as primary sources for this course.

RELG-226-01 - Religion - 2008-2009
(Fall) Introduction to the Philosophy of Religion - *Not offered this year/term
(Philosophy 226fs)
This course begins its survey of the discipline of the philosophy of religion with the work of Augustine. We then proceed to an examination of the classical theistic arguments for knowledge of God's existence (those of Anselm, Aquinas, and Maimonides) that dominated Scholastic thought and consider the criticisms of these approaches by Enlightenment philosophers such as Kant. We trace the rise of experience as the central category of pietism and romanticism in the texts of Schleiermacher and Coleridge and in the poetry of Novalis. Finally, we focus on the pragmatic tradition in American philosophy of religion, especially in the work of William James, Josiah Royce, and Cornel West.

(Spring) Spirituals and the Blues
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This course examines and analyzes African American music as a primary textual source for understanding philosophical and religious language within that community. It addresses various questions: What are the central philosophical and religious themes expressed within the text? How are these themes reflected in the music? What is the intrinsic character of the spirituals and the blues? Is there such a thing as a "music of oppression"? In what way(s) does the black experience contribute to philosophical and religious understanding, as well as the use of language? What does this material suggest about the connections among art, literature, and experience?

(Fall) The Short Story in the Hebrew Bible: From Hero to Heroine
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Jewish Studies 231)
In this course we shall read a number of self-contained stories in the Hebrew Bible with attention to the subtlety and sophistication with which they are crafted. We shall also consider the social nature of the composition of these biblical traditions and the ways that stories once told of the great men of tradition evolve to telling of the great women who save their people. Texts considered include the Joseph novella, the account of David's demise, Jonah, Ruth, Esther, and Judith.

(Fall) Introduction to Jewish Mysticism - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Jewish Studies 235f)
Mysticism refers to a type of religious life in which individuals seek intimate and personal, direct and intense experience of the Divine. There exists a rich and fascinating Jewish mystical tradition with hundreds of books of diverse kinds. This course examines the Kabbalah of thirteenth-century Spain, focusing upon the seminal work of this period, the Zohar; the synthesis of mysticism and messianism that occurred in the city of Safed (in the Land of Israel) in the sixteenth century; and the popular pietistic movement of eastern Europe from the eighteenth century forward, Hasidism; and various expressions of mystical spirituality in our own time.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

The power of sacred myths to shape cultural worldviews is extraordinary. This course examines, compares, and critiques this phenomenon in an attempt to understand how it informs the spiritual journey. From Siddhartha to The Da Vinci Code, chronicles on religious personalities have commanded rapt attention throughout history. Using the structural analysis of Geertz, Tillich, Eliade, and Crites, texts such as Life of Pi, The Alchemist, The Matrix, and other prominent accounts will be placed against the great spiritual stories of major religious traditions in order to determine their status as contemporary sacred myths.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Gender Studies 333)

Mary Daly, Elisabeth Schussler Fiorenza, Phyllis Trible, and Judith Plaskow, among others, have argued that traditional Jewish and Christian theological systems have overlooked the needs, concerns, histories, and contributions of women. Their challenges range from the historical modification of a presumably unbiased religious system to the outright rejection of a so-called patriarchal establishment. Whatever their approach, feminist theologies offer diverse and incisive tools for understanding how a theological system operates, how transitory cultural assumptions become embedded in ongoing doctrines, and how apparently minor adjustments can have significant ripple effects.

(Spring) Asian Religions: IV. Sacred Narratives in the Hindu Tradition. - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

Mount Holyoke College Course Information Archive 2000-2016
RELIK-325 - Religion - 2008-2009
Preamble (for topics courses): This course provides the opportunity for intensive study in Asian religious traditions. One of the traditions listed here is considered each time the course is offered. The student may therefore receive credit more than once.  I. The Islamic Tradition II. History of Chinese Thought III. Japanese Religious Traditions IV. Hinduism

Telling, enacting, and listening to stories are essential modes of religious activity in the Hindu tradition. We will study the major types of sacred narrative in Hinduism, including creation myths, epic tales, stories of the gods, women's stories, and the lives of exemplary figures such as the saint-devotees of Shiva and Krishna. The tales will be examined from the perspectives of narrative structure and meaning in relation to forms of expression (e.g., the icon of the dancing Shiva, the Ramayana epic theater), and contexts (e.g., women's rites and the festival of the great Goddess).

(Fall) Anton Chekhov: The Major Plays
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive; Taught in English)
A study of Chekhov’s major plays (Seagull, Uncle Vanya, Three Sisters, and The Cherry Orchard) in the context of his short stories, farces, and letters. This course will focus on the singular traits of a Chekhov play: the dependence of character on ensemble; the startling effects of grotesque and absurdist humor; and the pervasive deflation of dramatic climax in favor of destabilizing trivia and laconicism. Analysis of notable productions of Chekhov’s plays, including Stanislavsky’s Seagull (1896), the Chichester Festival’s Uncle Vanya (1963), and Louis Malle’s Vanya on 42 Street (1994). Students will keep journals and participate in short staged readings.
Prerequisites: fy or permission of instructor

Expected enrollment: 15

RES-151-03 - Russian and Eurasian Studies - 2008-2009
(Fall) Anna Karenina: Loving to Death - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive; Taught in English)
Leo Tolstoy’s Anna Karenina is an action-packed drama about love and passion, personal freedom and societal expectations, and the costs of living. We will read the text slowly, with attention to the ambiguities that defeat a clear or simple interpretation of the novel’s message. We will screen several films of Anna Karenina and assess interpretations of the novel.
Prerequisites: fy or permission of instructor
Notes: 2 meetings (75 minutes)

(Spring) The Romanovs: Triumph and Tragedy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; History 205)
We will study defining periods in Russian and world history with an emphasis on the powerful Russian monarchs who shaped them: in particular, Peter the Great, Catherine the Great, Alexander II, and Nicholas II. Russia's tsarist system raises important questions about the nature of the monarchy. The Russian case shows how monarchies can change and develop, and why, ultimately, many of them failed. Why did the Romanovs fail when their relatives, the House of Windsor, did not? Could Russia have survived as a constitutional monarchy? What is the role of a royal dynasty in defining nationhood?

RES-210-01 - Russian and Eurasian Studies - 2008-2009
(Fall) Great Books: The Literature of Nineteenth-Century Russia
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
In no other culture has literature occupied the central role it enjoyed in nineteenth-century Russia. Political, social, and historical constraints propelled Russian writers into the roles of witness, prophet, and sage. Yet, far from being limited to the vast, dark "Big Question" novels of legend, Russian literature offers much humor, lyricism, and fantasy. We will focus on the Russian novel as a reaction to western European forms of narrative and consider the recurring pattern of the strong heroine and the weak hero. Authors will include: Pushkin, Lermontov, Gogol, Turgenev, Tolstoy, Dostoevsky, and Chekhov.

RES-211-01 - Russian and Eurasian Studies - 2008-2009
(Spring) Topics in Twentieth-Century Russian Literature: Doctor Zhivago: A Poet in History
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
Combining epic sweep with lyrical intensity, Doctor Zhivago is a great writer's look back at a turbulent epoch in his country's history. Set in Russia's revolutionary years, Boris Pasternak's novel is a testament to the survival of life, love, art—and the possibility of freedom even under the most difficult conditions. This course will situate a close reading of Pasternak's novel within the various contexts (biographical, political, literary) relevant to understanding this major, but sometimes mysterious, work of Russian fiction.
Notes: 2 meetings (75 minutes; meets RES twentieth-century literature requirement
Instructors: P. Scotto

RES-212-01 - Russian and Eurasian Studies - 2008-2009
This course examines pivotal archetypes of Russian civilization that reflect Russia’s past, demarcate its present, and constrain its future. We will focus on the canonic historical monuments of Russia, such as the Kremlin of Moscow and the downtown of St. Petersburg. Starting with the representation of these landmarks in the media, we will explore them in depth by reading conflicting historical narratives and cultural histories and eventually deconstruct their cultural message and value. By the end of the course, students will be familiar with the Eastern Orthodox Christianity rites and able to identify and discuss the most common artifacts of Russian civilization.

RES-213-01 - Russian and Eurasian Studies - 2008-2009
(Spring) Tolstoy’s: War and Peace
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
To explain the fundamental conflict in Tolstoy’s art, Sir Isaiah Berlin advanced the now famous formula that Tolstoy was a fox (pluralist) struggling to be a hedgehog (monist). Indeed, throughout his life and in his art, Tolstoy sought to shape experience into a single and all-embracing philosophical principle, but he was never able to suppress his extravagant intuition that existence, being contradictory, fragmentary, and ultimately subject to forces beyond human control, defeated attempts at codification. We will read *War and Peace* in an attempt to understand how that irresolvable conflict fuels Tolstoy’s intellectual pursuits and informs his theories on art.

(Spring) Dostoevsky and the Problem of Evil: *The Brothers Karamazov* - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
Perhaps no other novelist has delved as deeply into the psychological and metaphysical dimensions of evil as the Russian novelist Fyodor Dostoevsky. This course will be devoted to a close reading of Dostoevsky’s landmark novel of murderous passion and parricide, *The Brothers Karamazov*. Why should crime and transgression be a privileged avenue of access into the human interior? How is psychology tied to the metaphysical aspect of human existence? What are the sources of evil—and redemption?

(Fall) Russian Politics
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; Politics 209f)
Russia was transformed by communist revolution into a global superpower that challenged the dominant ideologies of liberalism and nationalism. It became a powerful alternative to capitalism. In 1991, this imperial state collapsed and underwent an economic, political, and cultural revolution. What explains the Soviet Union's success for 70 years and its demise in 1991? What sort of country is Russia as it enters the twenty-first century? Is it a democracy? How has Russia's transformation affected ordinary people and Russia's relationship to the West?

(Spring) Russia and the West - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; Politics 264)

Since its creation at the beginning of the twentieth century, the Soviet Union dominated the minds of Western foreign policymakers. None of the West's policies in the Middle East, the Third World, Europe, or China after World War II can be understood without the study of Soviet foreign policy. We will examine the development of Soviet foreign policy since 1917 and, following the collapse of the USSR in 1991, the role played by Russia and Russia and the former Soviet republics in the far more complex and multipolar "New World Order." What should U.S. policy be toward the emerging new states of the Baltics, Central Asia, and Caucasus?

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; Politics 242)

Following the collapse of the USSR and the Gulf War, Central Asia and the Caucasus became new centers of geopolitical rivalry. The new states are a source of energy (oil and gas) for Western powers and a vital transit corridor between Eastern Europe and China. While a new "Great Game" is being fought between Western, Far Eastern, and Middle Eastern powers for control over energy pipelines, the region is threatened by environmental catastrophe and water shortages. Is the new oil industry a source of prosperity or an instrument for exploitation, corruption, and instability? How important are the new states to the West's strategic energy interests?

(Spring) Topics in the Recent History of Europe: Red Star Over Russia: The Totalitarian Regime of Lenin and Stalin, 1917-1953 - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(History 260(03))

The Bolshevik Revolution of 1917 marked the coming of totalitarianism to Russia. Led first by Lenin and then by Stalin, the country went through the most brutal civil war, purges, World War II, and the first stages of cold war. This period also saw immense social change and sweeping economic transformation. What were the causes of totalitarianism in Russia? How did the regime function? What were the major landmarks of Russian history in the period 1917-1953?

With the collapse of the USSR we were told that history was dead and liberal democracy triumphant. There was a "third wave" of democratic change. How accurate have these optimistic characterizations turned out to be? After an introduction to theories of liberal democracy and to the new discipline of "transitology" we will look at how states and leaders have applied such liberal-democratic ideas in Eastern Europe and the former USSR (with comparative examples from Africa and South America), and with what success.

(Spring) Nationalism
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Preamble (for topics courses): Courses in this section satisfy the distribution requirement in social sciences.
Nationalism is one of the greatest challenges to multiench states. They have had to create new strategies to deal with the demands of ethnic minorities. Taking the four states of Spain, Canada, Russia, and the former Yugoslavia as examples, we will focus on nationalist movements within these states and the central governments' responses. What has been the effect of the Communist legacy? Are there alternatives to federalism as a way of managing national claims? What socioeconomic policies have governments used to control ethnicity? What role can international organizations play in finding solutions to ethnic conflict?

(Fall) Revolutions
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Taught in English; Politics 350f)
Revolutions have a rich and bloody history on the European continent. In the twentieth century, there were frequent revolutionary upheavals, particularly in Russia and Eastern Europe. We will study two revolutionary periods: Russia in 1917 and the USSR in 1991. These revolutionary events present great contrasts, yet at the same time clarify the nature of revolutions and why they occur. Do they bring the expected fundamental and accelerated change people hope for? Our focus will be on the contrasts and parallels between Russia's early twentieth-century socialist revolution and late twentieth-century capitalist revolution. What was (and is) their impact on European history and thought?

(Spring) Social Inequality
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
First-year seminar (Speaking-intensive)
The study of social inequality constitutes one of sociology's major areas of inquiry. In this seminar, we will focus on class, racial, and gender inequality. We will explore the origins and social consequences of these forms of inequality. Our examples will be drawn primarily from the United States, but the course will also touch on issues of inequality throughout the globe.

SPAN-219-01 - Spanish - 2008-2009
(Fall) U.S. Latino/a Literature
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
After centuries of invisibility and marginalization, Latino culture and literature exploded on the American scene in the 60s. Chicanos, Cubans, Nuyoricans, and lately Dominicans and Central Americans have all contributed to create a diversified body of literature characterized by its bilingualism, biculturalism, and hybridity. This course will center on how U.S. Latino/a literature bears witness to identity formation, self-representation, and celebration of Latino culture and its people. It will explore a series of critical issues that define "latinidad" in the U.S.
Notes: 2 meetings (75 minutes)

This course explores the diversity of cultures and writings of Latin America, from pre-Columbian indigenous texts through the nineteenth century. Readings will include the Popol Vuh, Chronicles, the works of Sor Juana Inés de la Cruz, Ricardo Palma, and José Martí, among others. Class discussions and assigned papers based on literary analysis and research.
Prerequisites: Spanish 212 or permission of department
Notes: 2 meetings (75 minutes)
Instructors: D. Mosby
Expected enrollment: 16

SPAN-237-01 - Spanish - 2008-2009
(Spring) Introduction to Latin American Literature II
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
An introduction to Latin American texts from modernismo to the present. Different cultural movements and their sociopolitical contexts are examined through representative works. Class discussions and assigned papers are based on literary analysis and research.
Prerequisites: Spanish 212 or permission of department
Notes: 2 meetings (75 minutes)

(Spring) Seminar on Spanish/Latin American Cinema: Natural’s Not in It: Pedro Almodóvar
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive; Taught in English; Film Studies 380(01))
Preamble (for topics courses): This course examines the history, politics and aesthetics of Latin American and/or Spanish cinema in the context of world cinema, and especially in contrast to mainstream Hollywood cinema. The course will also familiarize students with the specific methodologies of film analysis and with recent debates within film studies.
This course studies the films of Pedro Almodóvar, European cinema’s favorite bad boy turned acclaimed auteur. On the one hand, students learn to situate films within the context of contemporary Spanish history (the transition to democracy, the advent of globalization, etc.) in order to consider the local contours of postmodern aesthetics. On the other hand, the films provide a springboard to reflect on larger theoretical and ethical debates. For instance, what can a weeping transvestite teach us about desire? What happens when plastic surgery and organ transplants become metaphors? Under what circumstances, if any, can spectators find child prostitution cute? Taught in English.
Prerequisites: Film Studies 201, Film Studies 202, or Spanish 221 or permission of instructor
Notes: 1 meeting (3 hours), Weekly evening screenings
Instructors: J. Crumbaugh
Expected enrollment: 16

SPAN-332-01 - Spanish - 2008-2009
(Fall) Spanish Literature: Medieval, Renaissance, and Golden Age: Recasting History: Power and Gender in Early Modern Spain
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This course will study pre-1800 Spanish texts (literary and non-literary) from an interdisciplinary perspective. Since the topic varies each time the course is offered, a student may receive credit more than once.
This course looks at Early Modern Spanish history (1500-1700) through the lens of the complex connections between gender and other dimensions of power and culture (e.g., religion, class, sexuality, and race), by focusing on how gender differences/expectations and women's agency were negotiated at the time. Recasting history and including gender as a category of analysis not only help us understand the impact of women in Early Modern Spain, but also force us to rethink other important historical categories (e.g., power/authority, private/public). Objects of study include letters, legal texts, (auto)biographies, political treatises, books of conduct, as well as paintings and movies.
Prerequisites: two of the following: Spanish 221, 235, 237, 244, or 246 and permission of instructor
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: N. Romero-Díaz
Expected enrollment: 16

(Fall) Contemporary Latin American Literature: Skin of a Woman: Afro-Latina and Afro-Latin American Women Writers
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Speaking- and writing-intensive)
Preamble (for topics courses): This course will concentrate on the various literary genres and cultural movements that have shaped Latin America from modernismo to the present. Topics will focus on different genres and the expression of diverse ideologies through literature. Since the topic varies each time the course is offered, a student may receive credit more than once.
With the growth of Afro-Latino American literary studies, there has been a growing interest in the recovery and the study of works by women of African descent. This course will examine the intersections of ethnic, cultural, national, class, sexual, and gender identities in representative texts (poems, short stories, essays, testimonios, and film) by Afro-Latina and Afro-Latin American women. We will discuss the construction and meaning of "race," color, and racialized gender roles. Secondary objectives include the development of research and writing skills and rudimentary orientation on various regional ethnic and feminist, cultural, and post/neocolonial theories.
Prerequisites: two of the following: Spanish 221, 235, 237, 244, 246, or permission of instructor
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: C. Gundermann
Expected enrollment: 16

(Fall) Latin American Thought: Latin Music in the US: From Doo-wop to Hip Hop and More - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
Preamble (for topics courses): How does Latin America think about itself? The purpose of this course is to introduce students to different ways in which Latin Americans have approached the problems of self-definition and cultural identity. Readings will explore how various authors have addressed such complex issues as colonialism, mestizaje, literacy, regionalism, and feminism, among others. Since the topic varies each time the course is offered, a student may receive credit more than once.
This course explores representations of "Latinidad,"(Latinoness) via music and how Latinos use music as an expression of cultural citizenship in the US. Using scholarly essays, sound and video recordings, and other writings. We will examine the aesthetic and historic contexts of Latin music; music as a repository of collective memory; the relationship between commodification and culture; and how artists engage normative representations of Latinidad as related to representations of race, gender, and sexuality. We will question the meanings of "crossing over" and explore how salsa and reggaetón affect the relationship of Latin communities in the US with their respective island counterparts.
Prerequisites: Two of the following: Spanish 221, 235, 237, 244, or 246 or permission of the instructor.
Notes: 1 meeting (2 hours 50 minutes)
Instructors: M. Negron

(Spring) Latin American Thought: Beyond Logocentrism
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Gender Studies 333(02))
Preamble (for topics courses): How does Latin America think about itself? The purpose of this course is to introduce students to different ways in which Latin Americans have approached the problems of self-definition and cultural identity. Readings will explore how various authors have addressed such complex issues as colonialism, mestizaje, literacy, regionalism, and feminism, among others. Since the topic varies each time the course is offered, a student may receive credit more than once.
Logocentric thinking is characterized by the desire for a center or original guarantee of all meaning, and has dominated the Western world since Greek antiquity. It attempts to repress difference in favor of identity and presence. Feminists have extended the concept to talk about phallogocentrism as the logical underpinning of patriarchy. In this course, we will study attempts at breaking with the (phal)logocentric model of subjectivity, many of which have emerged in the mestiza/a continent.
Prerequisites: Two of the following: Spanish 221, 235, 237, 244, or 246 or permission of instructor

(Fall) Latin American Thought: U.S. Latino/a Theatre
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Taught in English)
Preamble (for topics courses): How does Latin America think about itself? The purpose of this course is to introduce students to different ways in which Latin Americans have approached the problems of self-definition and cultural identity. Readings will explore how various authors have addressed such complex issues as colonialism, mestizaje, literacy, regionalism, and feminism, among others. Since the topic varies each time the course is offered, a student may receive credit more than once.
Latino/a theatre is a broad and complex topic with a dynamic array of artists working to push the boundaries of performance and contest the limitations of labels for their work and their identities. We will consider various forms of performance and performance art created by U.S.-based Latino/a artists. Close attention will be paid to the social, political, and historical contexts of these works. We will examine the innovations and experimentation with artistic form, use of language, and thematic content. Topics will include gender roles, class position, and cultural identity as articulated by the artists. We will attend relevant performances and generate in-class performances.
Prerequisites: Two of the following: Spanish 221, 235, 237, 244, or 246 or permission of instructor

(Spring) Seminar in Romance Languages and Literatures: The Mind of the Traveler: Journeys, Expeditions, Tours
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
(Taught in English; Romance Languages and Literatures 375, Italian 361, French 321, European Studies 316)
Preamble (for topics courses): This interdisciplinary seminar will focus on a comparative study of Romance languages or literatures. Topics will vary from semester to semester. Seminar discussions will be conducted in English, but students are expected to read works in at least one original language. Papers will be written in the Romance language of the student's choice.
Travel literature has always been a precious source for the study of culture, politics, arts and, last but not least, people. From Caesar to Marco Polo, from Stendhal to Carmen de Burgos, we will read and discuss authors who traveled for political, personal, and recreational reasons. We will also pay special attention to tales of emigration and immigration in the third millennium.
Prerequisites: Permission of instructor. Student who wish to receive 300-level credit in Spanish must write their papers and do appropriate course readings in Spanish
Notes: 1 meeting (2 hours, 50 minutes).

(Spring) Seminar in Spanish Studies: Global Quixote: Reading Cultural Imperialism and Resistance in Comparative Context
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): The specific content of this advanced-level seminar will depend on the instructor. Materials to be studied will vary in terms of medium and genre, and the critical focus will tend to be interdisciplinary. Papers will be based on research and analysis. Since the topic varies each time the course is offered, a student may receive credit more than once.
In this seminar, students will read excerpts of Miguel de Cervantes' Don Quixote (1605, 1615) and will study how current social movements employ this classic text. As a global Hispanic icon, the character of Don Quixote represents idealism and self-sacrifice, but also madness and violence. Beginning with Romantic-era literary reappropriations of Don Quixote, including Mary Shelley's Frankenstein (1818) and Robert Louis Stevenson's Dr. Jekyll and Mr. Hyde (1886), we will examine Cervantes' masterpiece in the context of contemporary political struggles in Spain, Mexico, Brazil, and in the United States.

STAT-140-01 - Statistics - 2008-2009
(Fall) Introduction to the Ideas and Applications of Statistics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course provides an overview of statistical methods, their conceptual underpinnings, and their use in various settings taken from current news, as well as from the physical, biological, and social sciences. Topics will include exploring distributions and relationships, planning for data production, sampling distributions, basic ideas of inference (confidence intervals and hypothesis tests), inference for distributions, and inference for relationships, including chi-square methods for two-way tables and regression.
Prerequisites: 2 years of high school algebra
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)
Instructors: R. Horowitz

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
First-year seminar (Writing-intensive)
How do we know if a new drug is effective? Does nutrition education reduce the incidence of diabetes? What is an epidemic? Why should doctors understand statistics? This seminar examines the use of statistics in medicine and epidemiology. Topics may include the design of experiments; data collection through surveys; modeling disease transmission; large scale health studies; and critical analysis of the use of statistics in research literature.
Prerequisites: fy or permission of instructor
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes)

(Fall) Elementary Data Analysis and Experimental Design
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
A fundamental fact of science is that repeated measurements exhibit variability. The course presents ways to design experiments that will reveal systematic patterns while "controlling" the effects of variability and methods for the statistical analysis of data from well-designed experiments. Topics include completely randomized, randomized complete block, Latin Square and factorial designs, and their analysis of variance. The course emphasizes applications, with examples drawn principally from biology, psychology, and medicine.
Prerequisites: Any 100-level mathematics or statistics course or permission of instructor.
Notes: 2 meetings (75 minutes)

(Spring) Linear Statistical Models - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Mathematical concepts from linear algebra and n-dimensional Euclidean geometry, together with statistical concepts of estimation and hypothesis testing, are developed and used to construct a unifying theory for two classes of applied methods: analysis of variance and regression analysis. The theory is developed in three stages: least squares and orthogonal projections; moment assumptions and the Gauss-Markov theorem; and the normal distribution and F-tests.
Prerequisites: Mathematics 211
Notes: 2 meetings (1 hour and 45 minutes); offered alternate years, next offered spring 2010.

(Fall) Probability - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
(Same as Mathematics 342f)
This course develops the ideas of probability simultaneously from experimental and theoretical perspectives. The laboratory provides a range of experiences that enhance and sharpen the theoretical approach and, moreover, allows us to observe regularities in complex phenomena and to conjecture theorems. Topics include: introductory experiments; axiomatic probability; random variables, expectation, and variance; discrete distributions; continuous distributions; stochastic processes; functions of random variables; estimation and hypothesis testing.
Prerequisites: Mathematics 203
Notes: 2 meetings (75 minutes), 1 lab (50 minutes); offered alternate years at Mount Holyoke and Smith Colleges; offered at Mount Holyoke in fall 2009.
Instructors: The department

(Spring) Mathematical Statistics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course is an introduction to the mathematical theory of statistics and to the application of that theory to the real world. Topics include probability, random variables, special distributions, introduction to estimation of parameters, and hypothesis testing.
Prerequisites: Mathematics 202 and 342 recommended
Notes: 2 meetings (90 minutes); offered every spring semester alternately at Mount Holyoke and Smith Colleges; offered at Mount Holyoke in spring 2010.

THEAT-120-01 - Theatre Arts - 2008-2009
(Spring) Topics in Design: Costume Construction
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course will explore the evolution of costume construction, using both historical and modern methods. Commercial patterning, flat patterning, and draping methods will be covered. Students will learn skills for the construction, care, identification, and treatment of fabric and the use and maintenance of tools used in the costume shop. Through these methods we will interpret costume renderings by prominent designers.
Prerequisites: Preference to first-years and sophomores
Notes: 2 meetings (2 hours); lab; $40 lab fee; additional purchase of construction supplies and materials is the responsibility of the student.
Instructors: P. Spees
Expected enrollment: 12

THEAT-122-01 - Theatre Arts - 2008-2009
(Fall) Design I
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
An introduction to the art and work of the set and costume designer in the performing arts. Students will learn how a designer approaches a script, how their work impacts a production, and what means are used in the execution of this process. They will learn how to develop their own visual imaginations and how to create visual concepts through discussions, renderings, and models. No previous experience in theatre, performance, or the visual arts is required.
Notes: 1 meeting (3 hours) and lab; $30. lab fee. Additional purchase of design supplies and materials is the responsibility of the student.
Instructors: V. James
Expected enrollment: 20
THEAT-126-01 - Theatre Arts - 2008-2009
(Spring) Lighting Design I
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
An introduction to the art and practice of lighting design for the theatre. This course will cover the basics about light, lighting equipment and how to develop a design. Students will learn how to draft a light plot, focus lights, and build light cues.
Notes: 2 meetings (2 hours) and lab; purchase of design supplies, materials, and theatre tickets is the responsibility of the student
Instructors: L. Dubin
Expected enrollment: 12

THEAT-128-01 - Theatre Arts - 2008-2009
(Fall) Sound Design I
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
What is sound design? This course attempts to answer that question, exploring how to look at a text and launch the creative process, and how to take the ideas based on that creative process and turn them into sounds to be used in a show. This is all done through a series of introductory lab projects and then a complete design for a short play, all while learning three new pieces of software. This is a highly interactive class, where student participation is key: students will be expected to take part in each project, as well as creating their own work.
Notes: 1 meetings (3 hours)
Instructors: R. Kaplowitz

THEAT-150-01 - Theatre Arts - 2008-2009
(Fall) What Is Performance?
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive)
What's the difference between acting and being, and how does the idea of "performance" structure this difference? How do we "perform" our own identities, and how do we interpret the performances of others? This seminar offers a basic introduction to performance studies, an exciting new discipline through which everyday life, ritual behaviors, and artistic practices are studied. Perspectives from the arts, humanities, and social sciences will be explored using both textual and performative approaches. This is a speaking-, reading-, and writing-intensive class that includes innovative individual and group exercises.
Prerequisites: fy or permission of instructor
Notes: 2 meetings (2 hours)
Instructors: R. Babb
Expected enrollment: 14

THEAT-166-01 - Theatre Arts - 2008-2009
(Fall) Introduction to the Music of Africa - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Music-166)
This course concentrates on indigenous musical traditions from different parts of Africa. Cross-cultural features as well as regional varieties are examined. A major objective of the course is to facilitate an understanding of the cultural contexts within which African musical traditions derive their meaning and significance. Relying on live performances and recordings, the course examines the conceptual and behavioral aspects of music, the contexts and functions of performances, musical instruments and vocal styles, the training and status of musicians, and the stylistic features of the music. The course culminates in a performance of an African opera.
Instructors: O. Omojola
Expected enrollment: 25

THEAT-180-01 - Theatre Arts - 2008-2009
(Fall) Introduction to Technical Theatre - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course will examine the materials and techniques used in building and operating theatrical scenery. It will include prop building, rigging, and mechanical drafting for the theatre. Students will learn the skills to work in the scene shop interpreting scenic designs for department productions.

THEAT-205-01 - Theatre Arts - 2008-2009
(Spring) Acting II - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A continuation of techniques developed in Performance I with a greater commitment to the culture of collaboration. Concentration is on scene work with "classical" realist playwrights, Chekhov, Ibsen, and Williams. Scene study continues with contemporary masters Churchill, Mamet, and Parks. Actor training will involve the embodiment of physical behavior, the visceral use of language, and more intermediate composition work with Viewpoints to
develop and refine character. Practical tools explored in class are intended to offer the student greater vocal, physical, and imaginative freedom and clarity, as well as formidable text analysis skills.

Prerequisites: Theatre Arts 105 or permission of instructor

Notes: 2 meetings (2 hours); lab; $10 lab fee.

Instructors: R. Babb

Expected enrollment: 14

(Spring) Topics in Performance: Advanced Performance Workshop
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

In this course we will engage (perform/direct) scenes from plays written by contemporary American women playwrights (i.e., Sybil Kempson, Erin Courtney, Karinne Keithly) while comparing them to scenes from early experimental American women playwrights (Gertrude Stein, Susan Glaspell). This is an advanced performance class that will rely heavily on dramaturgy as a point of access into texts that often defy the basic rules of drama and acting. There will be some theoretical and historical reading assignments, short individual research projects, and monthly scene presentations.

Prerequisites: 105 and permission of instructor

Notes: 2 meetings (2 hours)

Instructors: B. OHarra

Expected enrollment: 14

(Fall) Seminar: Shakespeare, the Theatre, and the Book - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking-intensive; English 312)

In his own time, Shakespeare’s writings had life both onstage and in print. This seminar invites students to locate the works we study in relation to the early modern theatre and to the history of the book, especially the development of a reading audience for popular art. Readings include such works as *Romeo and Juliet*, the sonnets, and *Troilus and Cressida* and *King Lear*. We will also explore current critical debates about gender, sexuality, and literary genre. Substantial opportunity will be provided for independent work reflecting each student’s own interests.

AFRAM-100-01 - African American and African Studies - 2009-2010
(Spring) American Dreams, American Dilemmas: Race, Democracy, and Human Capability in the Twenty-first Century - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
First-year seminar (Writing-intensive)
In the twentieth century, American dreams of full citizenship for the descendants of enslaved Americans were always tempered by dilemmas of racial conflict. The struggle for racial, gender, and economic justice has achieved much during the last 60 years. What challenges remain in education, housing, employment, and consumer markets? What resources and policies are available to enhance well-being and agency for all citizens? This course surveys the strivings of people of African descent in the United States. The quest for racial justice and equality of opportunity is unfinished. The course reviews the accomplishments and work outstanding as our society moves from access to achievement.
Prerequisites: fy only

(Fall) Introduction to African American and African Studies: Identity, Community, and Progress - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course will introduce students to topics and methodologies within the vast field of African studies. This course will attempt to disrupt the history-based, U.S.-centric model by presenting alternate texts and approaches to the study of the global black experience. We must necessarily begin by questioning the idea, definition, and practice of blackness: what is it? How/did a unified black identity emerge from disparate people, practices, and experiences? After investigating the formation of the African diaspora, we will consider texts from the Americas, Europe, and the continent, assessing each for its historical, aesthetic, political, and cultural value.

(Spring) Black Women Writers: Feminist Visions from the African Diaspora - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement (Writing-intensive; Same as Gender Studies 204)
This course will explore the influence of feminist politics on the writing of women throughout the African Diaspora. By exploring the different cultural, political, and historical contexts in which these writers work, we will attempt to define the continuities and conflicts that exist within the vast field of black women's writing. Why, when, and how did a black feminist consciousness emerge? How did racial tensions within the predominantly white feminist movement lead to the development of a separate black "womanist"/Third World agenda? How does feminist literature of the African Diaspora challenge negative stereotypes and misrepresentations of black women's realities?
Prerequisites: 101 Intro to African American Studies, or permission of instructor

(Fall) African American Culture and Society
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement (Community-based learning course; Speaking-intensive)
Comprehensive survey of the cultural economy of race, class, and gender and the American Dream. Examines institutional developments in the era of racial/ethnic and gender equality through inclusion, 1945-1980. Explores legacies of recent social progress and challenges of durable social inequalities. Theorizes the nexus of poverty, opportunity, and mobility in the early twenty-first century. Brings together Mount Holyoke students and women in the final stages of their sentences in Hampden County, who collaborate as peers in a semesterlong exploration combining critical analysis and creative nonfiction writing. The semester will culminate in a reading and graduation ceremony for its students.

(Spring) Luminous Darkness: African American Social Thought - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Examines the causes of and proposed solutions to "the Negro problem" in post-Civil War American public policy. Focuses on the life, work, and legacies of DuBois. Drawing on domestic and diasporic fictional and nonfictional depictions of black life in the "DuBoisian century" the course considers different responses to his 1903 question, "How does it feel to be a problem?" Examining theories, arguments, movements and policies targeting blacks and their environment allows us to criticize black modernity, assess the changing role of black intellectuals in society, evaluate "race theory" and consider dominant and marginal attempts to analyze and overcome the "color line" in America.

(Fall) Gender, Terror, and Trauma in African American Culture - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
This course will explore representations of violence in African American culture, with special consideration given to literary depictions of rape and lynching. After examining the historical function of violence within the United States, students will perform a comparative analysis of texts authored by black women and men. We will also explore cultural, social, and political movements (abolition, civil rights, black power, black feminism, hip-hop) that have emerged in response to the violent policing of black bodies. How has violence been used to terrorize blacks? What role has violence played in the African American struggle for liberation and equality?

(Fall) Black Feminism: Theory and Praxis: Black Feminism: Theory and Praxis - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Writing-intensive)
This course explores foundational texts of major authors along with lesser-known contributors to the black feminist movement, from the nineteenth century to the present. It also examines the various ways in which black feminist theory has been expressed in and applied to the arts and political activism, analyzing black feminist cultural criticism as it applies to music, film, fine arts, performance, and literature. Conflicts and continuities between black and white feminists, and the role of profeminist men within the movement will be considered as well.
Prerequisites: 8 credits in department or permission of instructor

(Spring) Sex, Love, and Gender in Contemporary African American Film - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Writing-intensive; Film Studies 320-01)
This course will explore the representation in film of intimate relationships among African Americans. Confronting an ongoing history of racist, sexist, and homophobic images, films produced by and featuring blacks can offer alternate interpretations of love, romance, and sexuality. Coupled with literature and theoretical readings by feminists and black cultural critics, students will consider the function of—and challenges to—intimacy in interpersonal relationships among African Americans. Directors under consideration include Spike Lee, Kasi Lemmons, Marlon Riggs, and Sanaa Hamri.

AMST-201-01 - American Studies - 2009-2010
(Spring) Introduction to the Study of American Culture: Metaphors, Borders, Migrations - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This course introduces students to American Studies' interdisciplinary methods of inquiry and emerging themes and debates by focusing on spatial metaphors of "America" that have mediated popular and scholarly interpretations of U.S. culture and politics since the nineteenth century.
Drawing on a diverse archive of speeches, political documents, photography, film, music, and literature, we will examine the interplay of race, gender, and sexual meanings embedded in historical constructions of the westward frontier, the virgin wilderness, America's gateway, the border, the north and the south, and the midwestern heartland. Throughout the course, we will consider the role of multiple migrations and border crossings in an evolving cultural mapping of America.
Instructors: I. Day
Expected enrollment: 20

AMST-290-01 - American Studies - 2009-2010
(Fall) Topics in American Studies: Nineteenth-Century American Women Writers
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(English 270(01))
In this cross-cultural examination of nineteenth-century American women writers, we will compare a number of works of fiction, prose, poetry, and autobiography. We will discuss how writers created sophisticated and insightful critiques of American culture and imagined or re-presented new American identities and histories. We will also consider tensions between "sentimental" idealism and political pragmatism, restrictive domesticity and dangerous autonomy, and passionless femininity and expressed sexuality. Authors may include Alcott, Child, Far, Fuller, Harper, Hopkins, Ruiz de Burton Wilson, and Winnemucca.
Prerequisites: Prereq. soph, second-year fy with permission of the instructor; 4 credits; enrollment limited to 25; 2 meetings (75 minutes); meets English department 1700-1900 requirement
Instructors: L. Brown
Expected enrollment: 25

AMST-290-02 - American Studies - 2009-2010
(Fall) Topics in American Studies: American Drama, 1787 to 1994
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Theatre Arts 234, English 234)
Various topics in theatre studies including particular theatrical periods and genres. Topics may include melodrama, postcolonial theatre, early twentieth-century avant-garde movement, feminist theatre, etc. These courses include historical and theoretical approaches and could involve interdisciplinary collaboration.
Prerequisites: See Theatre Arts 234f-01
Instructors: E. Rundle
AMST-290-03 - American Studies - 2009-2010
(Fall) Topics in American Studies: Winners and Losers: Taxation, Social Justice, and Economic Choices
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive; Complex Organizations 220-01)
The maze of laws that make up the U.S. tax system shape and define what our nation is and will be; they also create winners and losers. Who benefits from special relief provisions such as for housing, health care, education, retirement savings, charitable giving, and child care? What are the economic consequences? How are families taxed? Women? The poor? Capital gains? Should we have an estate tax, reform the income tax, or adopt a consumption tax? How can we save Social Security? All these issues and more are addressed, including a review of federal tax history from the Constitution to the present.
Prerequisites: History 171, Politics 104, Economics 103 or 104, or permission of instructor.
Instructors: J. Fox
Expected enrollment: 20

AMST-290-04 - American Studies - 2009-2010
(Fall) Topics in American Studies: Reading and Writing in the World
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive; English 267, Environmental Studies 267)
An introduction to reading and writing about nature, this seminar will attempt an exchange across distinct approaches to observing and describing the world around us. Do lenses of culture, discipline, and gender determine how we see and experience nature, environment, and place? Course work will include reading such authors as N. Scott Momaday, Henry David Thoreau, bell hooks, Leslie Marmon Silko, Mary Oliver, and Annie Dillard; field trips; and writing assignments--weekly field notes and journals, analytical papers, and personal essays.
Prerequisites: permission of instructor

(Fall) Senior Seminar: Bootleggers, Glamour Girls, and Hobos: American Culture between the Wars
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(History 381)
This seminar explores a number of themes between 1914 and 1945 that capture the tensions, contradictions, and transformation of U.S. culture between World War I and World War II. Weekly topics include manliness and race, revolution in morals and manners, Harlem in the 1920s, the culture of consumption, the barrios of Los Angeles, New Deal politics, Depression-era culture, the growth of sexual subcultures, health and athletics, and the politics of war. The seminar is designed to help students with the tasks of researching and writing a 20-page paper, including how to select a topic, strategies for research, and feedback on drafts.
Prerequisites: permission of instructor, written application prior to academic advising period

(Spring) Senior Seminar: Slavery and the Literary Imagination
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(English 350-01)
In this course we will study American works that focus on enslavement in America and the ways in which historical fact and literary conventions inform representations of enslaved and self-emancipated people, as well as enslavers, abolitionists, and free people of color. In what ways do race, class, region, and history influence portrayals of slavery? How do conventions of the slave narrative and sentimental novel affect the representation of slavery and freedom? Authors may include Octavia Butler, Charles Chesnutt, Frederick Douglass, William Lloyd Garrison, Lawrence Hill, and Harriet Beecher Stowe.
Prerequisites: Jr, sr, 8 credits in department beyond 101, including at least one of the following: English 240, 241, 250, or permission of instructor; 1 meeting (3 hours)
Instructors: L. Brown
Expected enrollment: 15

(Fall) Senior Seminar: Reading the New York Times: Journalism, Power, History
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Same as History 301)
This course will examine the political and cultural power of the New York Times in the American past and present. Students will analyze the Times today through careful, daily readings. They will also study its evolution as an institution, as well as its coverage of and involvement in several of the critical historical events of this century. By focusing on the Times as the most influential "agenda setter" in American journalism, we will also address the larger issues of objectivity, bias, and influence in the mass media.
Prerequisites: permission of instructor, 8 credits in history, written application prior to academic advising period (http://www.mtholyoke.edu/acad/history/300-level_application.html) required
Instructors: D. Czitrom
Expected enrollment: 15

(Spring) Senior Seminar: Queer Kinship in Asian North American Literature, Film, and Video
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(English 334, Film Studies 370, Gender Studies 333)
This course examines alternative kinship formations in Asian North American cultural production. It will focus on the gender and sexual management of racial bodies since the nineteenth century—from the U.S. Page Law of 1875 that restricted Chinese women on the basis of their presumed sexual immorality to various forms of "racial castration" that mediate Asian masculinities. We will consider how alternative kinship arrangements and queer cultural projects expose and/or upset the narrative assumptions embedded in heteronormative scripts of nationalism.
Prerequisites: jr, sr, 8 credits in department beyond English 101, or permission of instructor
Notes: meets English department seminar requirement
Instructors: I. Day

(Fall) Senior Seminar: Literature of the Jazz Age
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(English 368f)
This course will examine how a number of American writers responded to the many cultural impulses associated with the term Jazz Age. We will discuss various forms of American modernism in fiction and poetry, and some of the critical responses to them. We will also discover the relationship of the writing to jazz music and to the literature of the "lost generation." Authors may include William Faulkner, Ernest Hemingway, F. Scott Fitzgerald, Edmund Wilson, Anita Loos, Claude McKay and John Dos Passos.
Prerequisites: jr, sr, or permission of instructor
Instructors: G. Pemberton
Expected enrollment: 15

(Spring) Senior Seminar: The Architecture of Frank Lloyd Wright
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Art History 350-01)
This seminar will explore Frank Lloyd Wright's 60-year career in architecture. We will pay particular attention to ways in which he handled form, space, and structure to frame human activity and to create a modern American style. We will also explore the social implications of Wright's approach to domestic design and community planning.
Prerequisites: Jr, sr; 8 credits in art history, architectural studies, or American studies, or permission of instructor
Instructors: M. Davis
Expected enrollment: 15

AMST-301-04 - American Studies - 2009-2010
(Fall) Senior Seminar: Race, Gender, and Empire: Cultural Histories of the United States and the World
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(History 301 (04); Gender Studies 333)
Recent cultural histories of imperialism—European as well as U.S.—have illuminated the workings of race and gender at the heart of imperial encounters. This course will examine the United States' relationship to imperialism through the lens of such cultural histories. How did encounters between Native Americans and European colonizers, as lived and as remembered, call into play racial and gender identities? How have the legacies of
slavery been entwined with U.S. imperial ambitions? How did racialized constructions of gender and sexuality shape the "American Century?" And what can we learn from transnational approaches to "the intimacies of empire?"

Prerequisites: 8 credits in history or gender studies; online application required; see http://www.mtholyoke.edu/acad/womst/application.html

(Spring) Senior Seminar: Studies in American Literature: Cather, Fitzgerald, Faulkner
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(English 345s-02)
This seminar will focus on works of fiction by three major twentieth-century American writers, with special attention to novels published between the world wars. The course will examine ongoing critical debates regarding each writer, including such concerns as the status of the American South and West, conflicts across racial, ethnic, and gender lines, and American responses to the rise of modernist practices in literature and the visual arts.
Prerequisites: jr, sr, 8 credits in department including English 200 or permission of instructor
Notes: meets American Studies seminar requirement
Instructors: C. Benfey
Expected enrollment: 15

AMST-301-06 - American Studies - 2009-2010
(Spring) Senior Seminar: Gender and War
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Gender Studies 333, English 372f-01)
This seminar will focus on depictions of war in the context of gender. When asked how we might prevent war, Virginia Woolf suggested that we must invent new language and methods rather than follow the path of the traditional "procession of educated men." What language emerges in works about the effects of war? Texts will include essays and films as well as selected works by writers such as Alcott, Whitman, Crane, Twain, Hemingway, Woolf, Silko, Morrison, and O'Brien.
Prerequisites: jr or sr; 8 credits beyond the 100 level in English or Gender Studies or permission of instructor
Notes: meets English department seminar requirement
Instructors: L. Glasser
Expected enrollment: 15

(Spring) Senior Seminar: The Shakers
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Religion 332)
This course will examine the historical and cultural creation of the Shaker society. The religious vision of an alternative society whose birth and development paralleled that of the new American nation; by contrast and by imitation, the separate Shaker route thus offers an intriguing critique of American society and its values, and an unusual laboratory for examining a religious community based on a dual godhead.
Prerequisites: jr, sr, 8 credits in department, Religion 221 or permission of instructor
Instructors: G. Wergland

(Fall) Senior Seminar: Reimagining Los Angeles: Multiethnic Fictions of Tomorrowland - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(English 387)
In Ridley Scott's 1982 science fiction film, Blade Runner, Los Angeles is a beleaguered metropolis overrun by immigrant "hordeles" and menacing replicants, presenting a dystopic forecast of multiculturalism. By surveying major genres in relation to the racialized and gendered contexts of migration, labor, and urban redevelopment, this course focuses on alternative constructions of Los Angeles in African American, Asian American, and Chicana/o short stories, novels, and film. Works will include Southland, Tropic of Orange, Twilight: Los Angeles 1992, Their Dogs Came with Them, Devil in a Blue Dress, We Should Never Meet, and Kindred.
Prerequisites: jr, sr, or permission of instructor
Notes: meets English department seminar requirement

(Spring) Senior Seminar: Landscape and Narrative
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive; Environmental Studies 333-01)
Different stories or narratives—whether myth, literature, maps, or scientific theory—have been created about every region or environment on Earth as human attempts to describe and understand our connections with that place. How do braided strands of human history and natural history contribute to stories we tell of the land, and to stories we tell of ourselves in the land and of relational identity? In this reading and writing seminar we will reflect on how lifeways, homeplace, and identity of an individual or a community are linked with environment or the land. We will also create written and visual narratives of our own and explore creative environmental writing in reflection and action.

Prerequisites: jr., sr., permission of instructor
Instructors: L. Savoy

(Spring) Senior Seminar: American Women's History - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(History 38, Gender Studies 333)
In this research seminar we will be looking at American women's history through a range of women's writings, including memoirs, letters, and diaries as well as oral histories, first person accounts, and literature from the 1890s to the present. Attention will be paid to the role of personal narrative in the writing of history and the place of history in personal writing. Students will do an oral history of a friend or family member, write a biographical essay on a woman in the past, and produce a 25-page research paper on a topic of their choice. Trips to local archives will help students who are unfamiliar with historical research gain confidence.

(Fall) Shopping and Swapping: Cultures of Consumption and Exchange
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking- and writing-intensive)
We shop for our food, for our clothes, for our colleges. We purchase cars, manicures, and vacations. It seems that there is little that cannot be bought or sold. But we also give and receive gifts, exchange favors, "go dutch" in restaurants, and invite friends for potlucks. This course examines exchange systems cross-culturally, in order to understand their cultural significance and social consequences. It explores how our own commodity exchange system, which appears to be no more than an efficient means of distributing goods and services, in fact contains intriguing symbolic dimensions similar to the gift exchange systems of Native North America, Melanesia, and Africa.

(Fall) Special Topics in Anthropology: The Inca and Their Ancestors
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course explores the archaeology and history of the Inca Empire and earlier prehistoric cultures in the Andean region of South America. Readings and lectures will explore how artifacts such as pottery, stone tools, and food remains plus regional and site-level data are used to understand major political, economic, and social processes in the past. Particular attention will be paid to the development of early states on the Peruvian coast, the role of ceremonial centers in the highlands, and continuities in the political and social structures between the Inca and their ancestors.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking- and writing-intensive)
In this class we will examine the African Diaspora as a space where African descendent communities forge diasporic consciousness, negotiate conditions of racial oppression and form black selves and politics. We will explore the ways people, ideas and cultural products circulate throughout African Diaspora and engender varied cultural and political imaginaries in different locations. Our readings will be organized around key issues such as tourism and popular culture and contact zones such as hip hop music and barbershops. Throughout the semester, students will undertake a series of structured writing assignments designed to help engage with and reflect on the themes of the course.

(Fall) Special Topics in Anthropology: All in the Family: Rethinking Kinship and Social Relations in Anthropology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
The scholarly effort to understand the variety of human relatedness lay at the core of anthropology as an academic discipline. This course combines such foundational studies with recent approaches to the study of kinship in anthropology. What is it to be related at a moment characterized by pervasive forms of disconnection? Topics include descent, inheritance, ancestry, marriage, house-based societies, kinship and exchange, gendered labor, memory, reproductive technologies, and the practice of relatedness. Drawing upon cross-cultural research, we will work toward a deeper understanding of how people come to regard, create, sever, and maintain significant ties with others.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Gender Studies 250)
This course will address the predicaments of women who must negotiate local contexts shaped by transnational markets, changing patterns of agriculture and agro-forestry, and struggles over indigenous land rights. How have arguments about democracy shaped the struggles women take up locally, nationally, and transnationally in opposition to corporate power, national policies, and supranational agencies such as the World Trade Organization?

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Gender Studies 221-01)
Do women as a group, in Gilligan's words, speak "in a different voice"? This course examines the history of feminist theory through an investigation of "voice." Does a focus on voice privilege Western European feminist traditions? How have debates over who may speak for marginalized women facilitated feminist interdisciplinary dialogue on topics such as violence against women, class oppression, and racism? We will explore these questions in literature, film, and scholarship in anthropology, psychology, and sociolinguistics.

(Spring) Special Topics in Anthropology: Food and Bathing Culture in Japan
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
In Japan, the seemingly mundane, quotidian practices of eating and bathing reveal highly meaningful cultural dimensions. Eating and bathing practices constitute techniques of the body and of the self. Food nourishes, and bathing cleanses, the physiological body. Distinct eating and bathing practices reveal underlying cultural understandings of purity and pollution, health and sanitation, and the very way that the body is imagined and inhabited. Eating and bathing also provide opportunities for commensality, in which the boundaries of selves and larger social groupings are constituted and maintained. This two-credit course will explore these issues in Japan from June 1st to the 14th 2010.

(Fall) Language in Culture and Society
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Every society is held together by systems of interpersonal and institutional communication. This course examines the nature of communication codes, including those based on language (speaking and writing) and those based on visual images (art, advertising, television). To understand communication in its social and historical dimensions, we study the psychological and cultural impact of media revolutions and then look at ways communication systems manipulate individual consciousness. Illustrative examples are drawn from Western and non-Western societies.

(Fall) Visualizing Culture
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
In this course we go behind the scenes and behind the screens of anthropological films, television, museum exhibitions, and publications such as National Geographic Magazine, to explore the social contexts of their production, distribution, and interpretation. We consider how popular images of cultural "others" reveal the lives and times that produce them, and how, as sites of cultural exchange and political debate, such images shape and are shaped by relations of power. Further, we consider the diversity of local responses to images of cultural identity and begin to explore the complexities of "picturing cultures" from different subject positions across the global mediascape.

(Fall) Special Topics in Anthropology: Risk
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
People in all societies face uncertainty. Yet we have taken fear of the unknown and calculations of risk to a new level. Dangers appear to confront us at every turn -- in the form of tainted food, global warming, epidemics, market collapses, and accidents at work and on roads. Terrorist attacks in New York and Tokyo, and crime in Sao Paolo, have led to the increased control of public spaces in these cities. Public spaces have been the source of both excitement and anxiety, but cultures of risk have emphasized their dangers. This course will explore some of the implications of cultures of risk.

(Spring) Special Topics in Anthropology: What all can "about" be about? Explorations in Cultural Semantics
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking- and writing-intensive)
Where does meaning come from, how does it work? Do different forms of expression (verbal, visual, auditory, or tactile) involve different ways of referring, of claiming what a message is about? Is "making sense" the same across cultural and historical divides? Where do I locate the differences, how can I describe them? This class offers an introduction to key semantic theories. We will compare the contributions of the "internal" (psycho-linguistic) and "external" (social-cultural) approaches to the study of meaning against examples from very different historical (Ancient, Medieval, or Modern) and cultural (European, Aboriginal-Australian, and Native-American) settings.
Prerequisites: so, jr, sr. Anthr-230, 12 credits in department or permission of instructor. Introductory course in linguistic anthropology or equivalent is required.

(Fall) Special Topics in Anthropology: Gender, Power, and Social Movements
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Gender Studies 333-03)
This course explores the gendered dynamics of social movements in both the global North and South. After analyzing the first and second waves of U.S. women's movements, we will examine groups outside the U.S.—including those that are "all-women" and mixed. In particular, we will look critically at the imposition of Western models of women's liberation onto movements in the global South. We will also examine the "triple burden" that occurs as women engage in domestic-subsistence, wage-earning, and activist work. Drawing from feminist theory, social movement theory, anthropology, and political ecology, we will examine the challenges and possibilities women face in social movements today.

ANTHR-316-02 - Anthropology - 2009-2010
(Spring) Special Topics in Anthropology: The Anthropology of Madagascar: Ritual, Power, Place
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement (Speaking- and writing-intensive)
Calling Madagascar a "forgotten world" in remarking on its unique flora and fauna, foreign writers have characterized the island predominantly through its natural history. This course places longstanding debates on biodiversity and foreign claims to the island's land in the context of research in anthropology that examines issues of ritual, power, and place through the diverse practices of Malagasy actors. For instance, how have Malagasy used relations with "the ancestors" in responding to incursions on the island and its peoples? Key debates in Malagasy ethnography will serve as a foundation for thinking through broader issues in the anthropology of religion and post-colonialism.
Prerequisites: 8 credits in department or permission of instructor
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: B. Halvorson
Expected enrollment: 20

ANTHR-316-03 - Anthropology - 2009-2010
(Spring) Advanced Seminar: Gender, Migration, and the Ends of the State
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement (GNDST 333-06)
This course examines contemporary global population movements through the lens of gender studies and anthropology. We will consider forms of subject-making—such as citizenship—through labor, kinship, and sexuality in North Africa, Southern Europe, South Asia and the United States. We will be especially attentive to symbols of group identity linked to race, ethnicity, nation, and language. Students will engage critically with theories of transnational migration, globalization, governmentality, neoliberalism, and imperialism.
Prerequisites: 8 credits of gender studies and/or anthropology or permission of instructor; application at http://www.mtholyoke.edu/acad/womst/application.html
Instructors: C. Croegaert
Expected enrollment: 16

(Spring) Memory, History, and Forgetting
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement (Speaking- and writing-intensive)
In this seminar we question the distinction between myth and history and consider the relationship of historical consciousness to memory, forgetting, and other types of temporal awareness. We then examine the relationships among literacy, art, nationalism, and the invention of tradition and test the limits of ethnography. Finally, we look at the ways in which relics, museums, and tourism have all helped make history—as fact, experience, or commodity—possible.
Prerequisites: 8 credits in department
Instructors: A. Lass
Expected enrollment: 20

## Architectural Studies

**ARCH-101-01** - Architectural Studies - 2009-2010

(January) Architectural Design Studio: Shelter

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
The design process ranges from the pragmatic to the fantastical. In this intensive architectural design studio, students will think critically about the nature of shelter; the experience of habitation; the notion of a building as clothing, as they develop a concept for a bus stop shelter on the Mount Holyoke campus. Students will be encouraged to draw upon research, personal experience, and areas of interest to define their ideas and ultimately, their proposed forms. Assigned exercises will use architectural modes of drawing and model-making to develop a design for the bus stop shelter. Site considerations, basic building tectonics and materials will be addressed through readings and discussion and explored through the process of design.
Prerequisites: Experience in a studio art or architectural class recommended but not required.
Notes: Studio fee: $60 No class Monday, January 18th in observance of Martin Luther King, Jr. holiday, 3 hour class final day, Thursday, January 21st, final design critique
Instructors: H. Fantini
Expected enrollment: 12

**ARCH-205-01** - Architectural Studies - 2009-2010

(Fall) Topics in Architecture: Sculpting Space: Introduction to Architectural Design

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement.
This studio course will be a design investigation of a particular theme in or approach to architecture and the built environment. Students will develop and apply traditional and contemporary architectural skills (sketches, plans, elevations, models, computer diagramming, and various modes of digital representation) to interdisciplinary and socially pertinent design problems. Creative and indexical study and analysis will be used to generate and foster a broad range of concepts and language to solve architectural issues involving site, construction, inhabitation, function, form, and space. Our goal is to apply creative techniques in art and sculpture to the creation of meaningful space.
Prerequisites: One semester of design or drawing is recommended.
Notes: Requires lab fee (amount to be determined).
Instructors: T. Long
Expected enrollment: 12

**ARCH-205-01** - Architectural Studies - 2009-2010

(Spring) Topics in Architecture: Introduction to Architectural Design

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement.
This introductory studio architecture course is a rigorous series of design investigations into architecture and the built environment. Students will develop and apply traditional and contemporary architectural skills (drawings, models) to interdisciplinary and significant design problems. Creative and indexical study and analysis will be used to generate and foster a broad range of concepts and language to solve architectural issues involving site, construction, inhabitation, function, form, and space.
Prerequisites: One semester of Drawing I, design or sculpture is recommended.
Notes: Studio Fee $60.
Instructors: S. Brown
Expected enrollment: 12

**ARCH-280-01** - Architectural Studies - 2009-2010
(Spring) Topics in Architectural Studies: Old is New Again? Directions in Sustainable Practice
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Considering the first role of architecture is shelter, what can we learn from pre-Modern buildings, looking through a "sustainability" lens? This course will examine leading contemporary writings and projects of sustainable design. We will apply this "green" awareness to a reexamination of historic architecture - with attention to architecture's environmental, economic, cultural, and artistic contexts - and then speculate on lessons that might be adopted for current practice.
Prerequisites: so,jr, sr. 8 credits in Architecture, Art History, Art Studio, or Environmental St.; or permission of instructor. (Upper-level students in those areas or Economics or American Studies encouraged.)
Notes: Studio Fee $60. Studio art experience not necessary.
Instructors: G. Schneider

ARTH-100-01 - Art History - 2009-2010
(Fall) Image and Environment: Western Art: 1400-2000
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
An introduction to painting, sculpture, and architecture in Europe and America from the Renaissance to the present. Classes are organized around five focused topics: Renaissance Florence; the artist in the seventeenth century; art, revolution and nationhood; nineteenth-century realism; and abstraction and empathy. Lectures will be complemented by class discussion, short films, and assignments in the art museum.
Instructors: P. Staiti
Expected enrollment: 50

ARTH-101-01 - Art History - 2009-2010
(Spring) Image and Environment: Architecture: The Face of Human Culture
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A survey of architecture as a functional and expressive medium from the ancient world to the present. Accommodating domestic life, religious ritual, political, commercial, and leisure activities, architecture both shapes and reflects the natural environment, technology, social values and visions. While the history of Western architecture constitutes the primary focus, the course will include buildings from around the world.
Instructors: M. Davis
Expected enrollment: 50

ARTH-100-02 - Art History - 2009-2010
(Fall) Image and Environment: Introduction to Art History - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This survey course introduces students to the pleasures of art history as a field of inquiry. In case studies beginning with the Renaissance and extending to the Modern era, from Europe and the Americas, we will explore art's complicated and shifting relation to history -- to its social, cultural, political, and intellectual worlds. Lectures and class discussion will be augmented by visits to the art museum.
Instructors: A. Lee
Expected enrollment: 25

ARTH-105-01 - Art History - 2009-2010
(Fall) Arts of Asia
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Asian Studies 107f)
This multicultural course introduces students to the visual arts of Asia from the earliest times to the present. In a writing- and speaking-intensive environment, students will develop skills in visual analysis and art historical interpretation. Illustrated class lectures, group discussions, museum visits, and a variety of writing exercises will allow students to explore architecture, sculpture, painting, and other artifacts in relation to the history and culture of such diverse countries as India, China, Cambodia, Korea, and Japan.
Instructors: A. Sinha
Expected enrollment: 50

ARTH-110-01 - Art History - 2009-2010
(Fall) Introductory Seminar in Art History: The Artist in History
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar
A study of artistic identity in diverse time periods and regions of Europe, Asia, and North America. How have artists defined themselves, and how can we understand their roles in the societies in which they worked? Our investigation will include the study of myths and legends about the artist and the origins of art making, self-portraits and artworks that take on the subject of artistic creation, writings by artists and others, and historical analyses by recent scholars. We will encounter the artist as magician, entrepreneurial artisan, a channel to the divine, theoretician, ambassador, social critic, and revolutionary. Themes include art vs. craft, gender, technology, and collaboration.
Prerequisites: fy or permission of the instructor
Instructors: C. Andrews
Expected enrollment: 18

ARTH-202-01 - Art History - 2009-2010
(Spring) Talking Pictures: An Introduction to Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Film Studies 202)
Some of the best feature-length films of the past century have commanded our attention and imagination because of their compelling artistry and the imaginative ways they tell stories visually and verbally. This course closely studies narrative films from around the world, from the silent era to the present, and in the process it introduces students to the basic elements of film form, style, and narration. Some of the films to be considered are: Broken Blossoms, Battleship Potemkin, Citizen Kane, Contempt, The Bicycle Thief, Ugetsu, Rear Window, Woman in the Dunes, The Marriage of Maria Braun, Days of Heaven, and Moulin Rouge.
Notes: 2 meetings (75 minutes) and 1 screening (2 hours)
Instructors: P. Staiti
Expected enrollment: 50

ARTH-211-01 - Art History - 2009-2010
(Fall) Gods and Mortals: Myth in Ancient Art and Literature - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Classics 211)
Many ancient images tell completely different versions of myth from those portrayed in Greek and Roman literary sources. By juxtaposing distinctive modes of communication in the ancient world, students will analyze the rhetorical uses of myth, both then and now. Students will also examine the range of possibilities for translating and interpreting text and image, which will alert them to the vitality of myth as a language of its own, transcending historical parameters.
Instructors: B. Bergmann
Expected enrollment: 30

ARTH-215-01 - Art History - 2009-2010
(Fall) The Hellenistic World: From Alexander to Cleopatra - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Hellenistic art has often been regarded as a chaotic, decadent phase between the golden ages of classical Greece and imperial Rome. Yet the period in the Mediterranean from the death of Alexander the Great in 323 BCE to the Roman conquest of Egypt in 31 BCE saw the creation of some of the greatest masterpieces of ancient art, the development of formal art criticism, and the mass production of art for private enjoyment. The course addresses the new themes and purposes of art in a cosmopolitan culture that, in many respects, was not unlike our own.
Prerequisites: soph, jr, sr, or permission of instructor
Instructors: B. Bergmann
Expected enrollment: 20

ARTH-216-01 - Art History - 2009-2010
(Spring) Empire: The Art and Archeology of the Roman Provinces - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
At its height, the Roman Empire spanned a vast area, from modern Scotland to Libya and Iraq. Within that territory lived peoples of multiple races, languages, and religions. This course explores the art and architecture created in this global culture from its beginning in 30 BCE to the dedication of the first Christian capital, Constantinople, in 330 CE. Subjects include propaganda, arena spectacles, the home, mystery religions, and the catacombs.
Prerequisites: soph, jr, sr, or permission of instructor
Instructors: B. Bergmann
Expected enrollment: 40

(Fall) Age of the Cathedrals: The Art of Gothic Europe, 1100-1500 - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A historical survey of the architecture, monumental sculpture, and painting of France, England, Germany, and Italy. The course concentrates on the cathedral as a total work of art, on the meaning of its imagery, and on the role of art in contemporary society.
Prerequisites: soph, jr, sr, or permission of instructor
Instructors: M. Davis
Expected enrollment: 30

ARTH-222-01 - Art History - 2009-2010
(Spring) Age of the Cathedrals
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Arts of the court, monastery, and city in Europe from the fall of the Roman Empire (fourth-fifth century) to the Hundred Years War (fourteenth-fifteenth century). We will study a selection of monuments and their furnishings, including sculpture, reliquaries, stained glass, tapestries, altarpieces, joyaux, and illuminated manuscripts. Our goal will be to differentiate between the diverse forms of artistic production within this long time period and to understand the function of these works for a medieval audience.
Prerequisites: soph, jr, sr, or permission of instructor
Instructors: C. Andrews
Expected enrollment: 40

ARTH-230-01 - Art History - 2009-2010
(Spring) Italian Renaissance Art - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This survey explores the development of painting, sculpture, and architecture in fifteenth- and sixteenth-century Italy with emphasis on Florence, Rome, and Venice as discrete cultural contexts for the work of Botticelli, Leonardo, Raphael, Michelangelo, and Titian.
Prerequisites: soph, jr, sr, or with permission of instructor
Instructors: The department
Expected enrollment: 50

ARTH-231-01 - Art History - 2009-2010
(Fall) Northern Renaissance Art
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course will survey artistic production in Northern Europe in the fifteenth and sixteenth centuries, with an emphasis on the media of panel painting, manuscript illumination, and printmaking. Artists to be considered include Jan van Eyck, Rogier van der Weyden, Jean Fouquet, Hieronymous Bosch, and Albrecht Durer. We will examine dazzling examples of artistic virtuosity, the imaginative interpretation of popular and esoteric texts, the introduction of new subject matter, and technical innovations such as the invention of printing. We will also trace the transformation of the status of the artist and the changing conditions of patronage.
Prerequisites: soph, jr, sr, or permission of instructor
Instructors: C. Andrews
Expected enrollment: 25

ARTH-235-01 - Art History - 2009-2010
(Spring) Baroque and Rococo Art in Northern Europe - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This survey of seventeenth- and early eighteenth-century art in Holland, Flanders, and France emphasizes the way in which widely divergent religious practices and governmental institutions affected the making of art in those countries. Rembrandt, Hals, Vermeer, Rubens, Van Dyck, and Poussin are among the artists discussed.
Prerequisites: soph, jr, sr, or permission of instructor
Instructors: The department
Expected enrollment: 40

(Fall) Nineteenth-Century European Art: Neoclassicism to Impressionism - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course traces major developments in European art during the periods traditionally designated by the terms neoclassicism, romanticism, realism, and impressionism. Focusing primarily on French art, but branching out to consider the art of England and Spain, it explores the key artistic themes of the century: the engagement with history, the rise of nationhood, the experience of the urban, the Marxist proposal, the grappling with modernity, the dealing in individual temperaments. Among the major figures to be studied are Constable, Courbet, David, Delacroix, Goya, Ingres, Manet, Monet, and Renoir.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This survey course traces the rise and development of photography in the United States and, to a lesser extent, Mexico and the countries in Western Europe. It charts the wide range of work with the camera, including commercial, so-called "vernacular," and fine art projects, and considers pictures from photography's very beginnings in the mid-nineteenth century to today's practices. Among the major figures to be discussed are the early landscape photographers O'Sullivan and Watkins, the avant-garde photographers Stieglitz and Genthe, the Depression-era photographers Evans and Lange, and the so-called New Documentarians Arbus and Frank.

**(Fall) Building the Modern Environment: Architecture 1890-1990**
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
An exploration of major movements and personalities in architecture from the late nineteenth century to the present. Emphasizing the United States against the background of European developments, the course considers the search by architects, including Frank Lloyd Wright, Le Corbusier, and Frank Gehry, for a language of form and space that captures the contemporary spirit as it elevates society to a higher plane of existence. Discussion focuses on issues of technology and utopia, the skyscraper, and the collision of tradition, modernity, and postmodernism in architecture since 1945.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course traces the different paths of painting, sculpture, and photography since World War II. Initially, most of these paths traced a relationship with the "crisis of modernism," but increasingly, they have taken on a different vitality, drawing energy from a wide variety of postmodern and postcolonial subjects and debates: identity politics, transnationalism, diaspora. Can something that can be identified as an avant-garde practice exist in such a context? What kinds of questions are appropriate to ask about works that stridently attempt to suspend the very category of art?

(Spring) Issues in Art History: Egyptian Art and Egyptomania

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Why do we need the past, and how do we engage with it? In ancient Egypt, the past had power, and patrons, sculptors, and builders drew from earlier generations for inspiration. In the modern West, ancient Egypt holds a unique fascination. Recurring waves of artists and architects have taken up Egyptian motifs for their own sensibilities. The course examines ancient monuments and visual motifs in their original context as well as their appropriation in subsequent centuries, including our own.

(Fall) Issues in Art History: The City of Rome from Romulus to Constantine

(Classics 230)
A detailed survey of the archaeology of the city of Rome from its origin in the early Iron Age to the beginning of the fourth century CE. The principal monuments and architectural development of the ancient city will be discussed against a broader cultural and historical background, with an emphasis on the powerful families and individuals responsible for the shaping of the urban landscape, and the specific social and political circumstances that gave the monuments meaning.

(Spring) Topics in Art History: Writing the Renaissance

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): This seminar will investigate the idea of the Renaissance through the study of written accounts and selected artworks from Giotto to Michelangelo and van Eyck to Düer. What was at stake for scholars who first conceptualized the Renaissance (including Vasari, Warburg, and Panofsky)? How have recent scholars (such as Kris and Kurz, Damisch, and Koerner) revisited this key time period for art history as a discipline? Topics include biography, myth, and genius; the division of North and South; the invention and uses of perspective; and the function of art. In addition to shared readings and discussions, students will pursue research projects on one artist and/or a selected group of works.

Prerequisites: 8 credits in art history, or permission of instructor

Instructors: C. Andrews

(Fall) Great Cities: Paris-Paradise: The Medieval City and Its Transformation

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

In 1323, Jean of Jandun wrote that Paris "seems to have received from the Most-High the role of the earthly paradise." Using medieval eyewitness accounts and descriptions, surviving monuments, and graphic records, this seminar will explore the transformation of Paris from a small twelfth-century town into Europe's most important metropolis by 1300. We will then consider the metamorphosis of medieval Paris into a modern capital in the nineteenth century paying particular attention to representations of the city by painters, writers, and, most recently, filmmakers.

(Spring) Seminar in Medieval Art: Illuminated Manuscripts of the Later Middle Ages - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

The decorated book was one of the most important forms of art making in the Middle Ages. This course presents an integrative approach to the study of these objects, taking into consideration their structure, text, pictorial and decorative programs, and bindings. We will investigate the patronage, production, use, and afterlife of a range of illuminated manuscripts in the later Middle Ages, including the continuous traditions of monastic and courtly book production, as well as the new development of urban manuscript industries by lay artisans.

Prerequisites: jr, sr, 8 credits in art history or medieval studies, or permission of instructor

Instructors: C. Andrews

(Fall) Seminar in Baroque Art: Gianlorenzo Bernini: Practices, Works, Ideas

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course examines the painting, sculpture, and architecture produced by the seventeenth century's most influential multimedia artist. It puts Bernini's innovations in the context of the political, religious, and artistic debates of his day, closely examining the Roman society that Bernini dominated during the reigns of three different popes, as well as the France of Louis XIV where Bernini briefly lived and worked. Topics include: workshop practices and preparatory works; ephemeral creations (festive and theatrical); antiquity and modern invention; the aesthetic of marvel; the myth of the artist; and the legacy of Bernini's "bel composto."

(Spring) Seminar in Twentieth-Century Art: Shudders! Photography Goes Public

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This seminar will explore the explosion of photography in 1930s America. The decade’s photography is often epitomized by the heartrending images of the Great Depression, of social concern, of the traumas experienced by the poor and displaced. But in fact the period also witnessed photography's extraordinary vitality and new visibility, in the colorful pages of Life magazine and the tabloids, on the walls of MOMA, in experimental photo books, at Photo League exhibitions, and much more. Among the major figures to be studied are photographers as diverse as Walker Evans, Weegee, and Aaron Siskind.

**(Fall) Seminar in Asian Art: "Through 'Indian' Eyes: Photography in India"**
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Explores the way photography seized hold of the imagination in India. Nineteenth-century documentary photographs of Indian ruins memorialized the reach of the British Empire when used for dioramas, panoramas, and magic lantern shows on the streets of London. By the twentieth century, manipulated photographs and mechanically reproduced "photos" of Indian gods complicated photography's claim to truth. Students will debate scholarly views and develop research projects to examine photography's imaginative uses in India.
Prerequisites: jr, sr, or permission of instructor; 8 credits in art history, or film studies, or permission of instructor

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Film Studies 370-01)
How are we to respond to Indian popular film, which is notorious for its distracting song and dance numbers, meandering story line, and visually overblown spectacles? This seminar will develop historical and theoretical approaches to Indian films as what scholar Lalitha Gopalan calls a "constellation of interruptions." Students will examine feature films in class, write critical papers on scholarly essays, and pursue independent research projects on various aspects of Indian film.
Prerequisites: jr, sr, 8 credits in art history, or film studies, or permission of instructor.

(Spring) Asian Religions: Sacred Hindu Narratives - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Taught in English; Religion 325)
Preamble (for topics courses): This course provides the opportunity for intensive study in Asian religious traditions. One of the traditions listed here is considered each time the course is offered. The student may therefore receive credit more than once. I. The Islamic Tradition II. History of Chinese Thought III. Japanese Religious Traditions IV. Hinduism
Telling, enacting, and listening to stories are essential modes of religious activity in the Hindu tradition. We will study the major types of sacred narrative in Hinduism, including creation myths, epic tales, stories of the gods, women's stories, and the lives of exemplary figures such as the saint-devotees of Shiva and Krishna. The tales will be examined from the perspectives of narrative structure and meaning in relation to forms of expression (e.g., the icon of the dancing Shiva, the Ramayana epic theater), and contexts (e.g., women's rites and the festival of the great Goddess).

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.
A research seminar on Japan's transformation from a chaotic set of warring states (mid-sixteenth century) into a highly urbanized, literate, cultured but nonetheless feudal state capable of leaping into the modern world (late nineteenth century). Topics will include economic evolution; the development of tea ceremony, fiction, poetry, and theatre; political and social change, including class/status relations; evolution of gender roles; and the rise of the three great cities (Edo, Kyoto, Osaka). After a core of common readings and research exercises, students will design and undertake individual projects, using primary and secondary sources, and complete a substantial essay.
Prerequisites: permission of instructor; 8 credits in history; written application prior to academic advising period (http://www.mtholyoke.edu/acad/history/300-level_application.html) is required
Instructors: J. Lipman
Expected enrollment: 15

Asian History: China's Tumultuous Twentieth Century

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.

A research seminar on the socioeconomic transformation of China from the advent of nineteenth-century imperialism to the Cultural Revolution. Topics include reform programs of the late Qing, the chaos and experimentation of the Republican period, and the centralizing totalitarianism of the People's Republic. Requirements include reviews of primary and secondary literature, definition and presentation of a research topic, and a final essay based on intensive research.

Prerequisites: permission of instructor; 8 credits in history; written application prior to academic advising period (http://www.mtholyoke.edu/acad/history/300-level_application.html) is required

Instructors: J. Lipman

(Fall) Love, Gender-Crossing, and Women's Supremacy: A Reading of The Story of the Stone

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Speaking- and writing-intensive; Taught in English)

A seminar on the eighteenth-century Chinese masterpiece The Story of the Stone and selected literary criticism in response to this work. Discussions will focus on love, gender-crossing, and women's supremacy and the paradoxical treatments of these themes in the novel. We will explore multiple aspects of these themes, including the sociopolitical, philosophical, and literary milieus of eighteenth-century China. We will also examine this novel in its relation to Chinese literary tradition in general and the generic conventions of premodern Chinese vernacular fiction in particular.

Prerequisites: Permission of instructor

Instructors: Y. Wang

(Spring) Love and the Erotic in Indian Poetry - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Speaking-intensive; Taught in English; Gender Studies 333(09))

Seminar on the major themes, genres, and aesthetic conventions of love and the erotic in classical and medieval Indian poetry (in translation from Sanskrit, Tamil, Hindi, and other languages), in relation to theoretical texts, visual, performance genres (miniature paintings and dance). Study of the literary grammar of courtly love (aesthetic mood [rasa], landscape, the situations of love, the typologies of lovers), the transformation of classical conventions in Hindu bhakti and Sufi Muslim mystical poems, the Radha-Krishna myth, and love in folk genres. Focus on women as subjects and personae, and on the articulation of issues of gender, power, relationality, voice, and agency.

**(Spring) Astrophysics I: Stars and Galaxies - **Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
A calculus-based introduction to the properties, structure, formation and evolution of stars and galaxies. The laws of gravity, thermal physics, and atomic physics provide a basis for understanding observed properties of stars, interstellar gas, and dust. We apply these concepts to develop an understanding of stellar atmospheres, interiors, and evolution, the interstellar medium, and the Milky Way and other galaxies.

**ASTR-330-01** - Astronomy - 2009-2010
**(Fall) Seminar: Topics in Astrophysics: Moon
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): In-class discussions will be used to formulate a set of problems, each designed to illuminate a significant aspect of the topic at hand. The problems will be difficult and broad in scope: their solutions, worked out individually and in class discussions, will constitute the real work of the course. Students will gain experience in both oral and written presentation. Topics vary from year to year.
This course will survey the past, present, and future of lunar exploration and science. We will focus on the evolution of the Moon as a paradigm for terrestrial planets, with specific units on interiors, heat flow, thermal evolution, magnetism, volcanism, volatiles, impacts, crustal composition and mineralogy, regoliths, and spectroscopy of its surface. This is a discussion-based, interactive seminar with students and faculty reading current papers from the literature.
Prerequisites: any intermediate-level astronomy or geology course; AST 223 recommended
Instructors: D. Dyar
Expected enrollment: 12

Students will gain experience in both oral and written presentation. Topics vary from year to year.
Exploration of several unresolved questions about the Red Planet, such as 1) Where was the water on Mars and where did it go? How well will future missions answer this question? 2) How has the martian atmosphere evolved over time? 3) What rock types are present on the martian surface based on meteorite studies vs. direct observation? 4) How can geomorphic features of Mars be interpreted, and what do they tell us about the evolution of the planet? and 5) Was there life on Mars at any time? Is there life on Mars at present, and if so, where? An interactive seminar with students and faculty reading current papers from the literature as well as daily reports from current mission Web sites.
Prerequisites: any intermediate-level astronomy or geology course; AST 223 recommended
Instructors: D. Dyar
Expected enrollment: 12

This course will cover the relationship of asteroids and meteorites. Topics that will be discussed include how asteroids and meteorites are classified, spectroscopic measurements of asteroids, and how meteorites are transferred from asteroids to the Earth. No prior knowledge of asteroids or meteorites will be assumed.

Prerequisites: any 200 level astronomy or geology course

BIOL-145-01 - Biological Sciences - 2009-2010
(Fall) Introductory Biology: Nature Harmoniously Confus'd
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
First-year seminar
Most organisms are notably unlike ourselves—a tapestry of bacteria, protozoans, algae, and, off by themselves, the plants, fungi, and other animals. We will survey the whole range of organisms, especially those in the ponds and forests of our campus. Labs will start in the field, offering many opportunities for wet or muddy work. The class is addressed to students intrigued by natural history; it might be useful for students interested in further study of the environment.

Prerequisites: fy

Expected enrollment: 24

BIOL-145-01 - Biological Sciences - 2009-2010
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

First-year seminar

This course covers some fundamental biological concepts with the ultimate aim of understanding how and why animals behave the way they do. We study the principles of evolution by natural selection, how neurons and muscles work at the cellular level, how hormones influence development and behavior, and how individual animals fit into their larger populations and communities. We will bring these principles together to understand how behavior allows animals to find food, avoid predators, and attract mates. Field and laboratory exercises will include quantitative analysis, observation, and experimentation.

Prerequisites: fy

BIOL-145-02 - Biological Sciences - 2009-2010
(Fall) Introductory Biology: Diversity of Life

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

We will survey the great diversity of life on earth from the archaebacteria that live in hot sulfur springs to giant sequoia trees to singing birds. Labs will explore biological diversity via collecting trips around campus as well as laboratory experiments and will introduce students to data collection, manipulation, and analysis.

Prerequisites: fy or permission of instructor

BIOL-145-03 - Biological Sciences - 2009-2010
(Fall) Introductory Biology: A Green World

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

This course examines the plant life in the woods and fields around us, the exotic plants in our greenhouses, and the plants we depend on for food. We will study plants living in surprising circumstances, settling into winter, escaping from gardens, reclaiming farmland, cooperating with fungi and insects, and fighting for their lives. We will find that plants challenge some conventional, animal-based assumptions about what matters to living things. In labs, students will seek to answer their questions about how plants grow in nature, by studying plant structure and function, ecology, and evolution.

BIOL-145-04 - Biological Sciences - 2009-2010
(Fall) Introductory Biology: Physiological Ecology

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
As our climate changes on global scales, we need to explore how such changes will affect living things. This course will explore how physiological functions (such as metabolism, photosynthesis, and temperature regulation) drive the behavior (such as habitat selection and foraging) and ecology (such as competition and predator/prey interactions) of plants and animals in the context of their environment. Through laboratory sessions, research projects, and other oral and written assignments, students will gain experience with experimental design, data analysis and interpretation, and presentation of scientific results.

(Fall) Introductory Biology: Organismal Biology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course encompasses a broad range of concepts central to our understanding of how organisms function and evolve. We will investigate important biological processes, such as photosynthesis and metabolism, and of systems, such as the cardiovascular and immune systems. We will also take a holistic view of biology and use our newly acquired knowledge to explore such diverse topics as: the evolution of infectious diseases, the consequences of development and design on the evolution of organisms, and how the physiology and behavior of animals might affect their responses to global climate change.

(Spring) Introductory Biology: Biology in the Age of the Human Genome Project - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
First-year seminar (Writing-intensive)
The Human Genome Project is leading to great advances in our understanding of the human body and in our ability to manipulate our own genetic information. We will focus on the science behind the Human Genome Project, and the ways in which it will change our lives. This course will also serve as a general introductory biology course for biology majors as well as nonmajors. We will read articles and books, and make use of the World Wide Web.
Instructors: C. Woodard

Expected enrollment: 16

BIOL-146-01 - Biological Sciences - 2009-2010
(Fall) Postbaccalaureate Introductory Biology
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course is designed for students beginning the Postbaccalaureate Studies Program in preparation for pursuing graduate-level study in the health professions. Topics include basic principles of biodiversity and taxonomy, genetics, basic biochemical principles, cell structure and function, and organ systems. Laboratory exercises complement lecture material and are intended to help students develop strong skills in microscopy, familiarity with using a variety of lab equipment, experimental design and data collection and analysis, and scientific writing.
Prerequisites: Postbaccalaureate students only

BIOL-160-01 - Biological Sciences - 2009-2010
(Fall) Integrated Introduction to Biology and Chemistry
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This 8-credit course serves as a gateway to both the biology and chemistry core curricula. The course introduces and develops fundamental concepts in chemistry while also exploring the diverse range of strategies adopted by living systems to survive in different environments. This course prepares students for further study in chemistry (Chemistry 201) and/or biology (Biology 200). Students must register for both Biology 160 and Chemistry 160 as well as a single lab section (listed under Chemistry 160). Recommended for students interested in completing pre-health requirements or advanced study in biochemistry or neuroscience.
Notes: Students must enroll in Biology 160 and Chemistry 160 for a total of 8 credits; 3 lectures (50 minutes), and 1 lab (4 hours) per week.
Instructors: D. Pope, D. Cotter
Expected enrollment: 48

BIOL-200-01 - Biological Sciences - 2009-2010
(Spring) Introductory Biology II: How Organisms Develop
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

Mount Holyoke College Course Information Archive 2000-2016
An overview of cells to tissues to organisms. Cellular components, the role of the nucleus, cell reproduction, and meiosis will be examined as part of our study of gamete production, fertilization, embryology, and development in an invertebrate (sea urchin), a vertebrate (chick), a fern, and a flowering plant. The basic molecular biology of DNA, RNA, and protein synthesis will be presented and examined in the context of building a fly embryo and a flower.

Prerequisites: Biological Sciences 145, 146, or 160

BIOL-206-01 - Biological Sciences - 2009-2010
(Spring) Local Flora
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Offers plant identification and natural history, emphasizing trees, native and introduced, and wildflowers. On- and off-campus field trips.
Prerequisites: 4 credits in department or permission of instructor
Notes: 1 meeting (3 hours), with field trips
Instructors: A. Frary
Expected enrollment: 15

BIOL-210-01 - Biological Sciences - 2009-2010
(Fall) Genetics and Molecular Biology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
A comprehensive study of the fundamental principles of classical and molecular genetics. Major topics include transmission genetics, gene linkage and mapping, molecular approaches to genetic analysis, genetic engineering, gene therapy, developmental genetics, quantitative inheritance.
Prerequisites: Biological Sciences 200
Notes: Chemistry 101 must be taken prior to or as a corequisite to this course.
Instructors: J. Knight, C. Woodard
Section Instructors: 01 LAB J Knight | 02 LAB J Knight | 03 LAB J Knight | 04 LAB J Knight | 05 LAB J Knight |

BIOL-220-01 - Biological Sciences - 2009-2010
(Spring) Cell Biology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course undertakes an integrated study of the processes and structures that define life at the cellular level. We will consider the molecular and supramolecular organization of membranes, cytoskeleton, and organelles in the context of the physical and chemical principles governing their assembly, and their participation in phenomena such as the capture and transformation of energy, catalysis, transport, motility, signal transduction, and maintenance of cytoplasmic organization. The laboratory portion of this course illustrates and analyzes these phenomena through selected optical and biochemical approaches.
Prerequisites: Biological Sciences 200, Chemistry 201 (can be taken concurrently)
Instructors: S. Stranford, L. Jarvinen
Section Instructors: 01 LAB The department | 02 LAB The department | 03 LAB The department | 04 LAB The department |
Expected enrollment: 72

BIOL-223-01 - Biological Sciences - 2009-2010
(Fall) Ecology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course will cover the fundamental factors controlling the distribution and abundance of organisms, including interactions with the abiotic environment, fitness and natural selection, population growth and dynamics, species interactions, community dynamics, and diversity. We will address variation across space and time. The course will combine observational, experimental, and mathematical approaches to some of the applications of ecological theory, including conservation, disease dynamics, and biological control.
Prerequisites: An MHC Biology class or Environmental Studies 200 and a minimum of one semester of high school or college calculus or statistics
Notes: Biology 223 and/or Biology 226 must be taken for the Biology major.
Instructors: M. Hoopes
Section Instructors: 01 LAB M Hoopes | 02 LAB M Hoopes | 03 LAB M Hoopes | 04 LAB M Hoopes |
Expected enrollment: 44

BIOL-225-01 - Biological Sciences - 2009-2010
(January) The Structure of Memory
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Neuroscientists and psychologists have made great strides in the understanding of human memory in the past few years. It is now possible to get a fairly good basic understanding of how different kinds of memory systems work. Through daily class meetings, assignments, games, and exercises, this
course will provide information about the several different memory systems that reside in your brain. You may not end up with a better memory, but you will at least understand why you forget.

Notes: Monday - Thursday (90 minutes)
Instructors: C. Smith
Expected enrollment: 40

BIOL-226-01 - Biological Sciences - 2009-2010
(Spring) Evolution
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
The mechanisms of evolutionary change within populations and between species; patterns of change in space, time and form; and the origin of adaptations. These approaches make sense of the diversity of life; then we turn to the evolution of developmental pathways, as a way of approaching the unity of life.
Prerequisites: Biology 210 or 223
Instructors: S. Rachootin
Section Instructors: 01 LAB S Rachootin | 02 LAB S Rachootin | 03 LAB S Rachootin | 04 LAB S Rachootin |
Expected enrollment: 48

BIOL-295-01 - Biological Sciences - 2009-2010
(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph, permission of instructor
Notes: Note: Any student conducting an independent laboratory research project for course credit in a department, program, or laboratory covered by the College's chemical hygiene plan must participate in a safety training session before beginning research. Course credit will not be granted to students who do not receive safety training. See department for requirements.
Instructors: The department

BIOL-295-01 - Biological Sciences - 2009-2010
(Spring) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph, permission of instructor
Notes: Note: Any student conducting an independent laboratory research project for course credit in a department, program, or laboratory covered by the College's chemical hygiene plan must participate in a safety training session before beginning research. BIOL-301-01 - Biological Sciences - 2009-2010
(Spring) Animal Cloning, Stem Cells and Regenerative Medicine: Past, Present, and Future
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Speaking-intensive)
This course will look at the current state of mammalian cloning and the debates about human stem cell research, reading from primary literature. We will study adult, embryonic, and induced pluripotent stem cells. We will discuss the legal, ethical, and moral implications of using these cells in medical therapies, and each member of the class will participate in a staged debate on these issues for an introductory biology class. Pending funding, we may travel to Washington, D.C.
Prerequisites: per instructor only; email rfink
Instructors: R. Fink
Expected enrollment: 10

BIOL-302-01 - Biological Sciences - 2009-2010
(Fall) Molecular Evolution
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course examines the dynamics of evolutionary change at the molecular level, the effects of various molecular mechanisms on the structure and function of genes and genomes, and the methodology involved in dealing with molecular data from an evolutionary perspective. Lab work will be devoted to learning ways to analyze DNA sequence data and to create and evaluate trees that use molecular data.
Prerequisites: Biological Sciences 210 and 226
Instructors: A. Frary
Section Instructors: 01 LAB A Frary |
Expected enrollment: 12

BIOL-305-01 - Biological Sciences - 2009-2010
(Fall) Cellular and Molecular Aspects of Development
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Speaking-intensive)
Examines the roles of cellular movement and cellular interaction in the development of multicellular organisms. Topics include cell recognition and adhesion during morphogenesis, the importance of extracellular matrices, and current theories of embryonic pattern formation. Self-designed laboratories include techniques such as microsurgery and time-lapse video microscopy using a wide variety of embryos and cell types. Pending funding, we will attend a conference on sea urchin development at the Marine Biological Laboratory in Woods Hole, Massachusetts.
Prerequisites: Biological Sciences 200, 210, and 220, or permission of instructor
Instructors: R. Fink
Section Instructors: 01 LAB R Fink | 02 LAB R Fink |
Expected enrollment: 14

BIOL-308-01 - Biological Sciences - 2009-2010
(Fall) Darwin
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Writing-intensive; History 361s(02))
This course looks at the scientific content and intellectual context of Darwin's theory of evolution - his facts, metaphors, hypotheses, and philosophical assumptions. Readings from Darwin and his sources, and examination of the organisms he studied. A background in eighteenth- and nineteenth-century history or whole organism biology is recommended.
Prerequisites: Biological Sciences 226 or 4 credits in history
Instructors: S. Rachootin
Expected enrollment: 20

BIOL-310-01 - Biological Sciences - 2009-2010
(Fall) Invertebrate Zoology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course looks at the evolutionary relations of the profoundly different groups of animals in light of their structure, development, and fossil history. Emphasizes exceptional organisms that prove - and disprove - biological rules. Themes include coloniality, asexual reproduction, metamorphosis, and making skeletons.
Prerequisites: Biological Sciences 226
Instructors: S. Rachootin
Section Instructors: 01 LAB S Rachootin |
Expected enrollment: 12

BIOL-311-01 - Biological Sciences - 2009-2010
(Fall) Protein Biochemistry and Cellular Metabolism
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Biochemistry 311f; Chemistry 311f)
Prerequisites: Biological Sciences 210, Chemistry 302
Instructors: L. Hsu
Section Instructors: 01 LAB L Hsu | 02 LAB L Hsu | 03 LAB L Hsu |
Expected enrollment: 40

BIOL-314-01 - Biological Sciences - 2009-2010
(Spring) Nucleic Acids Biochemistry and Molecular Biology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Biochemistry 314s, Chemistry 314s)
This course is an in-depth examination of DNA and RNA structures and how these structures support their respective functions during replication, transcription, and translation of the genetic material. Emphasis is on the detailed mechanisms associated with each step of gene expression. Discussions incorporate many recent advances brought about by recombinant DNA technology.
Prerequisites: Biological Sciences 210, Chemistry 302, Biochemistry 311, or permission of instructor
Notes: Please sign up for this course as Biochemistry 314
Instructors: K. Mix
Section Instructors: 01 LAB The department | 02 LAB The department |
Expected enrollment: 40

BIOL-315-01 - Biological Sciences - 2009-2010
(Spring) Behavioral Ecology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Writing-intensive)
In this course, students learn to view and understand animal behavior within an evolutionary context. The mechanistic side of behavior is investigated and students explore how behavioral traits originate and evolve over time. Students will integrate their knowledge of how organisms work with an appreciation of why they work the way they do. At the end of the course, students will understand basic concepts in behavioral biology and know many of the experiments that have facilitated our understanding of this field. They will be able to construct hypotheses and design experiments that address behavioral phenomena. The laboratory portion of this course is based on individual projects.

Prerequisites: 8 credits of biology at the 200 level with 223 or 226 strongly recommended
Instructors: R. Brodie
Section Instructors: 01 LAB R Brodie | 02 LAB R Brodie |
Expected enrollment: 24

BIOL-316-01 - Biological Sciences - 2009-2010
(Fall) Scanning Electron Microscopy
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Geology 316f)
Includes theory and operation of the scanning electron microscope and preparation of biological and geological materials for observation. The versatile use of the microscope will be emphasized and will include low magnification, high resolution, and back scattered (reflected) electron modes of operation as well as operation at different pressures. Energy dispersive X-ray microanalysis will be introduced.
Prerequisites: 4 credits of biological sciences or geology course at the 200 level.
Instructors: M. Rice
Section Instructors: 01 LAB M Rice |
Expected enrollment: 10

BIOL-319-01 - Biological Sciences - 2009-2010
(Fall) Immunology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course will cover the cells, organs, and biochemical signals that constitute the immune system, as well as immune mechanisms for the identification and removal of foreign pathogens. Additional topics may include: autoimmunity, allergy, vaccination, transplantation, immune deficiency, and pathogen evasion strategies. Special emphasis will be placed on the human immune response, with the addition of clinical case studies and independent laboratory projects to reinforce these ideas.
Prerequisites: Biological Sciences 210 and 220
Instructors: S. Stranford, S. Bakkour
Section Instructors: 01 LAB S Stranford | 02 LAB S Stranford |
Expected enrollment: 28

BIOL-320-01 - Biological Sciences - 2009-2010
(Fall) Introduction to Transmission Electron Microscopy
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Basic principles of transmission electron microscopy (TEM) and potential uses in biological studies. Each student selects a project and learns the fundamentals of specimen preparation, operation of the TEM, and image acquisition. Assessment and interpretation of the resulting electron micrographs culminate in an individual portfolio. Students wishing to extend their experience in other courses, including Biological Sciences 295 and 395, may enroll in this course concurrently.
Prerequisites: Biological Sciences 220
Instructors: S. Lancelle, M. Rice
Section Instructors: 01 LAB S. Lancelle, M. Rice |
Expected enrollment: 8

BIOL-321-01 - Biological Sciences - 2009-2010
(Fall) Conference Course: The Neurobiology of Art and Music
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Selected topics for areas emphasized in the department according to needs of particular students. Study in small groups or be individual.
Art and music are a part of all human cultures. Is there something about the human brain that drives us to paint and sing? We will examine how the brain simultaneously processes different aspects of a visual object, such as shape, color, and depth, and ask how this processing may affect the way we draw and paint. We will ask whether musically or culturally determined and whether or not different parts of the brain process different aspects of music such as pitch, melody, harmony, rhythm, and the emotional content of a musical piece.
Prerequisites: seniors with at least 8 credits at the 200 level in biology, neuroscience and behavior, studio art, art history, or music
Instructors: S. Barry
Expected enrollment: 10

BIOL-321-01 - Biological Sciences - 2009-2010
(Spring) Conference Course: Principles of Animal Communication
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This seminar course will focus on current research in animal communication through readings and discussion of primary literature. Topics covered will include: honesty and deception in animal signals; the diverse sensory modalities used in animal signals, including those beyond the range of human capabilities, such as infrasound, ultrasound, ultraviolet and electrical signals; the physiological bases of signal production and perception; and environmental selection pressures on signals, including those caused by human impacts.

Prerequisites: Biological Sciences 315 or Psychology 251 or permission of instructor.

Instructors: D. Pope

Expected enrollment: 20

BIOL-321-02 - Biological Sciences - 2009-2010
(Spring) Conference Course: Acquired Immune Deficiency Syndrome Seminar
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

(Peaking-intensive)
Preamble (for topics courses): Selected topics for areas emphasized in the department according to needs of particular students. Study in small groups or be individual.

What is our current understanding of HIV-induced AIDS? What factors favor disease progression or resistance? Are there new therapies or vaccines in the pipeline? In this course, the primary literature will be used as a foundation for discussing the global picture on AIDS and current research. As a group we will discuss the science behind this immune deficiency causing virus, therapies, research priorities and new vaccine strategies. We will also touch on the social, economic and political situations that influence rates of HIV infection and disease progression. Students will be expected to work in small groups to present background material and original research.

Prerequisites: BIOL-319 and permission of instructor

Notes: one biweekly meeting, 2 hours

Instructors: S. Stranford

Expected enrollment: 12

BIOL-321-03 - Biological Sciences - 2009-2010
(Spring) Conference Course: Marine Conservation Biology
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

(Peaking- and writing-intensive)
Preamble (for topics courses): Selected topics for areas emphasized in the department according to needs of particular students. Study in small groups or be individual.

This seminar course is based entirely on published research related to issues in marine conservation biology. It will introduce students to the latest research by leading scientists in ocean science and is highly relevant to current pressing concerns about global warming and the environment. The focus on primary literature and student-led discussions will help students taking this course improve their abilities to read, analyze and discuss primary literature. Those progressing onto graduate school in the next year or two will feel more confident in delving into the literature surrounding their research interests and discussing published findings and current ideas with colleagues.

Prerequisites: Biological Sciences 223 or 226

Instructors: R. Brodie

Expected enrollment: 12

BIOL-321-06 - Biological Sciences - 2009-2010
(Fall) Conference Course: Extreme Life - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

Preamble (for topics courses): Selected topics for areas emphasized in the department according to needs of particular students. Study in small groups or be individual.

This course will focus on biological systems that push the limits of structural and physiological possibility. For example, midges flap their wings at up to 1000 Hz; bar-headed geese migrate over Mount Everest; deep-sea fish withstand pressures near 300 atmospheres; certain frogs can allow their body temperatures to drop below 0 degrees C. We will explore the diverse mechanisms that underlie how organisms reach extreme levels of performance and survive in extreme environments through readings and discussions.

Prerequisites: jr, sr or permission of instructor

Instructors: G. Gillis

Expected enrollment: 12

BIOL-321-08 - Biological Sciences - 2009-2010
(Spring) Conference Course: Invasion Biology: Brave New Species in a Brave New World - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

(Peaking-intensive)
Preamble (for topics courses): Selected topics for areas emphasized in the department according to needs of particular students. Study in small groups or be individual.
How do species move from one continent to another, and what happens when they get to the new environment? The invasion process has been part of species interactions since organisms first evolved, but humans have altered species invasions so that we are creating newly homogeneous sets of species across continents. What are the consequences of species invasions? What makes some species more successful invaders and some sites more invaded? We will explore the mechanisms behind successful invasions, examine how species adapt to their new environments, and explore ways to assess and manage the impacts of these new colonists through primary literature readings and discussions.

Prerequisites: Biological Sciences 223 and 4 other credits above Biol-200
Instructors: M. Hoopes
Expected enrollment: 10

BIOL-321-10 | Biological Sciences - 2009-2010 | (Spring) Conference Course: Emerging Infectious Diseases - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking-intensive)
Preamble (for topics courses): Selected topics for areas emphasized in the department according to needs of particular students. Study in small groups or be individual.
What is the current state of infectious disease in the world? What are the important factors that favor the emmergence or reemergence of specific infectious agents? In this course the primary literature will be used as a foundation for discussing global emerging and re-emerging infectious diseases. As a group we will discuss the science behind these diseases and their therapies as well as some of the social aspects relevant to the present day spread of infectious disease. Students will be expected to work in collaborative groups to present background material and original research findings relevant to these pathogens and the diseases they cause.
Prerequisites: Biological Sciences 319, or permission of instructor
Instructors: S. Stranford
Expected enrollment: 12

BIOL-322-01 | Biological Sciences - 2009-2010 | (Spring) Comparative Biomechanics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Physics 222)
The main objective of this course is to explore organismal structure and function via an examination of the basic physical principles that guide how living things are constructed and how organisms interact with their environment. We will use the combined approaches of the biologist and engineer to study the impact of size on biological systems, address the implications of solid and fluid mechanics for animal design, survey different modes of animal locomotion, and learn how biologists working in diverse areas (e.g., ecology, development, evolution, and physiology) gain insight through biomechanical analyses.
Prerequisites: any two courses above Biology 200 or permission of instructor.
Instructors: G. Gillis
Section Instructors: 01 LAB G Gillis | 02 LAB G Gillis |
Expected enrollment: 24

BIOL-323-01 | Biological Sciences - 2009-2010 | (Fall) Plant Growth and Development - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is a study of the higher plant, its structure, organization, and development. Examines both endogenous and environmental factors influencing plant growth and reproduction. Topics include anatomy, hormones and their mode of action, tropisms, photomorphogenesis, and flowering.
Prerequisites: Biology 150, 200, 210 or permission of instructor
Instructors: A. Frary
Section Instructors: 01 LAB A Frary |
Expected enrollment: 24

BIOL-325-01 | Biological Sciences - 2009-2010 | (Fall) Plant Diversity and Evolution - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course explores the tremendous diversity of the plant kingdom, emphasizing the local flora. Evolutionary relationships are discussed on the basis of comparisons of reproductive biology, morphology, anatomy, cell structure, and molecular biology.
Prerequisites: two of Biological Sciences 200, 210, 223 or 226, or permission of instructor
Notes: offered alternate years
Instructors: A. Frary
Section Instructors: 01 LAB A Frary |
Expected enrollment: 14

BIOL-327-01 | Biological Sciences - 2009-2010 | (Spring) Microbiology
CREDITS/PE UNITS: 4; REQUIREMENTS MET: MEETS SCIENCE AND MATH II-B: NATURAL AND PHYSICAL SCIENCES WITH LAB REQUIREMENT

**BIOL-328-01 - Biological Sciences - 2009-2010**

**(Spring) Regulatory and Integrative Human Physiology**

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

We will investigate the fundamental processes by which human body systems function, and how they can be modified to enable the individual to live in a changing environment. We will pay particular attention to how different body systems are integrated with one another, and to the cellular and molecular mechanisms which make this functional integration possible.

Prerequisites: Biological Sciences 220 or Biochemistry 311

Instructors: J. Knight

Section Instructors: 01 LAB J Knight | 02 LAB J Knight |

Expected enrollment: 28

**BIOL-329-01 - Biological Sciences - 2009-2010**

**(Fall) Stem Cell Biology**

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

With the birth of Dolly the sheep, stem cells have become the focus of media attention. This course will cover the biology behind the development, differentiation, and self-renewal of stem cells. We will address the clinical use of embryonic and adult stem cells for research and therapeutic modalities and discuss the ethical and controversial aspects of such therapies. The laboratory component of this course will include a semester-long project that focuses on various cellular, molecular, and microscopic techniques required for stem cell research and data reporting.

Prerequisites: Biological Sciences 200 and 220

Instructors: L. Jarvinen

Section Instructors: 01 LAB L Jarvinen |

Expected enrollment: 12

**BIOL-331-01 - Biological Sciences - 2009-2010**

**(Spring) Theory and Application of Conservation Biology**

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

This course focuses on advanced ecological theory applied to conservation. Class will combine lectures and discussions of primary scientific literature. Field trips will supplement our exploration of the concepts of rarity, coexistence, and population viability. A community-based learning aspect is possible for the final project in this class.

Prerequisites: Biology 223 or permission of instructor

Instructors: M. Hoopes

Expected enrollment: 24

**BIOL-332-01 - Biological Sciences - 2009-2010**

**(Fall) Neurobiology**

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

We will study the electrical and chemical signals underlying the generation of the nerve impulse and synaptic transmission. We will then explore neural circuits underlying learning and memory, movement, and sensory perception.

Prerequisites: Biological Sciences 200, 220 and 4 credits in chemistry or physics

Notes: preference given to seniors

BIOL-334-01 - Biological Sciences - 2009-2010
(Fall) Chemical Communication in Vertebrates
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking-intensive)
How is information about physiological states coded in chemical information passed between animals? How is this information passed between organs in the body? In this course we will read and discuss the primary literature in biology to look in depth at the nature of chemical communication in vertebrates. We will study hormones, pheromones, and neurotransmitters, the neuroendocrine mechanisms which mediate their functions in the body, and the social and physical contexts in which these signalling mechanisms operate.
Prerequisites: Biological Sciences 220, 223 or 226
Instructors: S. Bacon
Expected enrollment: 15

BIOL-335-01 - Biological Sciences - 2009-2010
(Spring) Mammalian Anatomy
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course will examine the fundamental structural organization of the mammalian body. The lecture portion of the class will focus largely on humans, and students will gain practical insight into other mammalian systems in the laboratory.
Prerequisites: any two courses above Biological Sciences 200
Notes: course open to 12 juniors and 12 seniors
Instructors: G. Gillis
Section Instructors: 01 LAB G Gillis | 02 LAB G Gillis
Expected enrollment: 24

(Spring) Eukaryotic Molecular Genetics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
In this course we will examine the role of molecular genetic analysis in the study of phenomena such as human disease (e.g., breast cancer), animal development, and gene regulation. We will also study genetic engineering of plants and animals. There will be group discussions of original research articles and review articles.
Prerequisites: Biological Sciences 200 and 210
Instructors: C. Woodard
Section Instructors: 01 LAB C Woodard | 02 LAB C Woodard
Expected enrollment: 24

(Spring) Biogeochemistry of Northern Ecosystems
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking- and writing-intensive; Environmental Studies 344s)
Global climate models and recent evidence show that ecosystems in the northern latitudes are extremely sensitive to climate change. This interdisciplinary science course examines boreal, subarctic, and arctic ecosystems through the study of nutrient cycling, plant ecology, hydrology, soil processes, and biosphere-atmosphere interactions. Topics include fundamentals of biogeochemical elements such as carbon and nitrogen at scales from the microscopic to global, sensitivity, feedbacks to climate change, and disturbance processes such as fire and permafrost degradation.
Prerequisites: At least two semesters of biology, chemistry, or environmental science, and permission of the instructor
Instructors: B. Hooker
Expected enrollment: 15

CHEM-150-01 - Chemistry - 2009-2010
(Spring) How Hot? Understanding Global Climate Change
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
First-year seminar
Global climate change ("global warming") is one of the greatest problems facing human society today. Despite overwhelming scientific evidence, the highly charged political and social environment surrounding the issue has seriously obscured this problem. We will examine the science behind climate change, studying the greenhouse effect, the larger climate system, and the changing carbon cycle. We will also discuss the role of uncertainty in science and how misinterpretation has led to both confusion and gross distortion of scientific knowledge. Finally, we will explore proposed solutions to mitigate and/or adapt to climate change.

CHEM-201-01 - Chemistry - 2009-2010
(Fall) General Chemistry II
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course provides background in basic principles of physical, analytical, and inorganic chemistry essential to the study of all chemical phenomena. Topics include elementary principles of molecular electronic structure, quantitative treatment of chemical equilibrium with applications to solubility, acid-base, and electron transfer reactions, and introduction to chemical kinetics and thermodynamics. Laboratory emphasizes on analytical skills and illustrates basic concepts in chemical equilibrium, thermodynamics, and kinetics.
Prerequisites: Chemistry 101 and Mathematics 101, first year only, and permission of instructor (weichem@mtholyoke.edu)
Instructors: W. Chen

CHEM-202-01 - Chemistry - 2009-2010
(Fall) Organic Chemistry I
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Introduces organic chemistry, emphasizing the principles governing broad classes of reactions. Topics include stereochemistry, nucleophilic substitution and elimination reactions, the chemistry of alkanes, alkenes, alkynes, alcohols, and ethers, and an introduction to infrared and nuclear magnetic resonance spectroscopy. Laboratory work includes synthesis, practice in the techniques of distillation, crystallization, chromatography, molecular modeling, and identifying unknown organic compounds by chemical and spectroscopic means.
Prerequisites: Chemistry 201 with grade of C or better, or permission of instructor
Instructors: S. Browne

CHEM-202-02 - Chemistry - 2009-2010

CHEM-302-01 - Chemistry - 2009-2010
(Spring) Organic Chemistry II
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
A continuation of Chemistry 202 that addresses the chemistry of aromatic compounds, the carbonyl group, and a number of other functional groups. Examples drawn from compounds of biological interest. The laboratory includes organic synthesis and the identification of unknown compounds by chemical and spectroscopic means.
Prerequisites: Chemistry 202 with grade of C or better

CHEM-306-01 - Chemistry - 2009-2010
(Spring) Methods of Measurement
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
We will discuss analytical techniques which are currently applied in chemical, environmental, and medical science. These techniques include: chromatography including GC and LC spectroscopy (UV-Vis, FT-IR, AA, fluorometry, and NMR), surface science and mass spectrometry. Students will increase their repertoire of laboratory skills while learning to integrate concepts from different subdisciplines of chemistry into a unified experimental approach to problem solving.

CHEM-315-01 - Chemistry - 2009-2010
(Spring) Experimental Methods - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Uses extended research-style projects to introduce advanced techniques in physical measurement (e.g., high-resolution spectroscopy, calorimetry, electrochemistry), separation and analysis (e.g., gas- and liquid-phase chromatography, mass spectrometry), and chemical synthesis (e.g., catalytic and enantioselective methods, biomolecules, polymers). Students will increase their repertoire of laboratory skills while learning to integrate concepts from different subdisciplines of chemistry into a unified experimental approach to problem solving.
Prerequisites: Chemistry 302, 2 lectures (75 minutes), 1 discussion (50 minutes), 1 lab (4 hours)
Instructors: G. Roman
Section Instructors: 01 LAB G Roman | 02 LAB G Roman |
Expected enrollment: 20

CHEM-317-01 - Chemistry - 2009-2010
(Spring) Principles of Polymer Chemistry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
An introduction to the study of molecules of high molecular weights with emphasis on synthetic rather than naturally occurring polymers. Topics include polymerization, structures, molecular weight determination, molecular weight distribution, chain configurations, rubber elasticity, and thermodynamics and statistical mechanics of polymer solutions.
Prerequisites: Chemistry 302
Notes: offered once every three years
Instructors: W. Chen

CHEM-325-01 - Chemistry - 2009-2010
(Spring) Atomic and Molecular Structure
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is an introduction to experimental and theoretical approaches to the determination of the structure of atoms, molecules, and chemical bonds. Classroom work provides background in the theory of atomic and molecular structure and an introduction to quantum mechanics and spectroscopy.
Prerequisites: Chemistry 201, Chemistry 202, Mathematics 202, Physics 216 with grade of C or better
Instructors: W. Chen
Section Instructors: 01 LAB M Gomez | 02 LAB M Gomez |
Expected enrollment: 36

CHEM-334-01 - Chemistry - 2009-2010
(Spring) Advanced Inorganic Chemistry
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The implications of molecular symmetry as expressed in the language of group theory are explored in some depth. Group theory provides the context for a discussion of the structural and spectroscopic properties of inorganic compounds, particularly those of the transition metals.
Prerequisites: CHEM-302 and either: Chem-325 in the past or taken concurrently with this course.
Notes: offered every other year
Instructors: D. Cotter
Expected enrollment: 6

CHEM-336-01 - Chemistry - 2009-2010
(Spring) Organic Synthesis - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course emphasizes recent developments in synthetic organic chemistry and deals with general synthetic methods and specific examples of natural product synthesis. It covers such topics as new methods of oxidation and reduction, stereospecific olefin formation, ring-forming reactions, and methods of carbon-carbon bond formation. The application of these reactions to the synthesis of naturally occurring compounds is examined. A general strategy for the synthesis of complex molecules is also presented.
Prerequisites: Chemistry 302
Notes: offered every other year
Instructors: D. Hamilton  
Expected enrollment: 35

*(Fall)* Physical Organic Chemistry - *Not offered this year/term*  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
An introduction to the concepts and methods of physical organic chemistry. Examination of reaction mechanisms and the experimental results that support these mechanisms. Topics include structure and reactivity, reaction kinetics, mechanism determinations, and Woodward-Hoffman Rules.  
Prerequisites: Chemistry 302, 308  
Notes: offered every other year  
Instructors: S. Browne  
Expected enrollment: 35

**CHEM-339-01 - Chemistry - 2009-2010**  
*(Fall)* The Organic Chemistry of Biological Pathways  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
This course explores the underlying organic chemistry of biological pathways and thereby seeks to build a framework for understanding biological transformations from the perspective of mechanistic organic chemistry. Beginning with common biological mechanisms, and drawing parallels with their sophomore organic chemistry counterparts, a broad overview will be constructed of the pathways by which the key classes of biological molecules—lipids, carbohydrates, amino acids, nucleotides—are manufactured, modified, and consumed. Several specific biosyntheses will also be dissected from a mechanistic perspective. These case studies will include antibiotics, an alkaloid, and heme.  
Prerequisites: Chemistry 302  
Instructors: D. Hamilton  
Expected enrollment: 20

**CHEM-343-01 - Chemistry - 2009-2010**  
*(Spring)* Chemistry of DNA - *Not offered this year/term*  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
(Speaking-intensive)  
This advanced-level seminar will focus on the molecular properties of DNA. Using as sources a graduate-level text and readings from the primary literature, the class will discuss a variety of current topics in the research community, including the binding of proteins and small molecules to DNA, the covalent modification of DNA by mutagenic agents, and the dynamic nature of DNA across timescales. Critical analysis of experimental design and conclusions from data will be encouraged. Students will be evaluated based on participation in discussions, oral presentations, and an original research proposal.  
Prerequisites: Chemistry 302 and one additional 300-level chemistry course  
Instructors: M. Nunez  
Expected enrollment: 12

*(Fall)* Physical Biochemistry - *Not offered this year/term*  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
This course introduces the fields of biophysical chemistry and molecular biophysics, where biological systems are probed and described by physical techniques and models. Topics will include the physical properties of biological molecules (proteins, nucleic acids, carbohydrates, and lipid membranes); applications of spectroscopy to biological systems, both in vitro and in vivo; the mechanisms of light harvesting and energy conversion; and technological developments inspired by biological systems. Lecture sessions (two per week) will be complemented by a weekly discussion of papers from the contemporary literature.  
Prerequisites: Chemistry 302 required; Chemistry 212, Biochemistry 311 or Biology 220 recommended, or permission of instructor  
Instructors: The department

CHEM-399-01 - Chemistry - 2009-2010
(Fall) Comprehensive Seminar
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
A seminar series consisting of meetings on alternate weeks to discuss articles from the current chemical literature. The readings will prepare students for attendance at lectures on the chosen topics in the remaining weeks. The lectures are given primarily by visiting speakers, but they may include department faculty. Students will serve as discussion leaders, and each student will write a paper on a presentation of her choice.

Classics

CLASS-128-01 - Classics - 2009-2010
(Fall) Ancient Rome
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(History 128)
A survey of the political, social, and cultural history of Rome from the Republic to the Empire, down to the early fourth century with the rise of Constantine. We shall strive to recreate the entire experience of the peoples of the Rome and those that came in contact with it as it rose to become the dominant power in the Mediterranean: their history, war, trade and technology, religion, republican government and imperial administration, slavery, economies, and the Roman family. Special emphasis will be given to the growth of Rome and its empire. Sources include Polybius, Sallust, Livy, Suetonius, Tacitus, Seneca, Plutarch, and others.
Instructors: G. Sumi
Expected enrollment: 60

CLASS-211-01 - Classics - 2009-2010
(Spring) Gods and Mortals: Ancient Greek and Roman Myth
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
We will accompany Odysseus on his return from Troy, retrieve the Golden Fleece with Jason, and race with Ovid through his witty—and often troubling—retelling of Greek myths from a Roman perspective. This course examines how Greek and Roman authors and artists from very different periods used myth to explore questions about life, art, and politics. Works include: Homer, *Odyssey*, Apollonius of Rhodes, *Argonautica*, Ovid, *Metamorphoses* and *Heroides*; Greek tragedy, and ancient images representing myths.

Notes: Optional screenings of films related to ancient myth.

Instructors: P. Debnar

**CLASS-215-01** - Classics - 2009-2010

(Fall) Ancient and Medieval Political Thought

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement (Politics 211)

Through the works of such thinkers as Aeschylus, Thucydides, Plato, Aristotle, Augustine, Aquinas, Seneca, and Pizan, this course explores the broad themes of ancient and medieval political thought. We will pay particular attention to the ways these writers characterized the relationship between the individual and community; the roles knowledge, reason, emotion, and rhetoric play in political life; the link between gender and citizenship; and the various forms political community can take.

(Spring) Sport and Spectacle in the Ancient World

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement (History 305)

Sport and spectacle were essential components of civic, religious, and social life in ancient Greece and Rome. This research seminar analyzes these related concepts by engaging in a close examination of the ancient primary evidence and secondary source material and then continuing with a discussion of the relevance of sport and spectacle in a modern context. Topics include the agonistic culture of ancient Greece, panhellenism, religion and sport, violent entertainment and social values, sporting venues, the politics and sociology of spectatorship, and the social status of athletes and entertainers.

COLL-115-01  - College Courses - 2009-2010  
(Spring) Global Challenges: Migration  
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.  
Preamble (for topics courses): Team-taught by faculty from several departments. The course counts as departmental credit in politics, sociology, anthropology, critical social thought, and German studies.  
The movement of people across territorial borders and within states today is unprecedented in its scope and magnitude. Drawing from a range of disciplinary and comparative perspectives, this course will explore historical patterns of global migration and its contemporary forms. We will focus in particular on the topics of migration and security, the political economy of migration, and its cultural representation in literature, photography, and film. We will conclude by looking at the political and economic forces shaping immigration laws and policies in the U.S. and Western Europe.  
Notes: Monday evenings, February 1 through March 8: 1 common weekly meeting plus small group discussion section with one of the instructors.  
Note: the course ends with a campus-wide international conference on the same topic.

(Fall) Gods and Monsters: Science and Scientists in the Modern World  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
First-year seminar  
Since the emergence of recognizable scientific communities in early modern Europe, Western culture has been increasingly marked by scientific activities and products. Science and technology have evoked a broad range of intellectual and emotional responses from scientists and the public alike: hope, expectation, fear, dread. We will examine the history of modern science from the seventeenth century to the present, paying special attention to literary and popular responses to this new and powerful social force. Texts will include works by historians and other scholars of science, writings of significant scientists from various periods, and a selection of novels, stories, and films.  
Prerequisites: fy or permission of instructor  
Instructors: D. Cotter  
Expected enrollment: 16

(Fall) Western Civilization: An Introduction through Great Books - *Not offered this year/term  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
First-year seminar (Writing-intensive)  
Beginning with works emerging from Athens and Jerusalem and proceeding to the modern world, this year-long course will explore the prominent ideas of Western civilization. The course material will be centered on the Great Books from across disciplinary boundaries and will include authors such as Shakespeare, Plato, Dante, Einstein, Augustine, Darwin, Homer, Locke, Goethe, Eliot, and the writers of the Old and New Testaments. Students are expected to register for Interdepartmental 146 in the spring semester.  
Prerequisites: fy or permission of instructor

**COLL-210-01 - College Courses - 2009-2010**
(Spring) Ready for the World: Preparing Your Internship and Research Project
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This course is designed for students embarking on summer internships and research projects. It focuses on the connections students will make in the world beyond Mount Holyoke College. The course will examine the work of organizations, take account of the particular social situations in which students find themselves, analyze social dynamics in interpersonal and professional interactions, explore interviewing techniques for research and other modes of communication, and learn about organizational priorities and ethical guidelines. Students are expected to keep a journal of their readings and activities and participate fully in each session.
Prerequisites: so,jr. For best consideration, students will need to provide documentation of internship/research application by February 9 to the Nexus coordinator.
Notes: Class will meet: March 23 (7-9pm); March 30 (7-9pm); April 10 (9am-12pm); April 13 (7-9pm); April 20 (7-9pm) and April 24 (9am-12pm).
This class satisfies the methods requirements of all Nexus minors. Those thinking of doing an internship/research project in summer 2010 should register for this course.
Expected enrollment: 70

**COLL-250-01 - College Courses - 2009-2010**
(Fall) War: What Is It Good For?
Credits/PE Units: 8; Requirements met: Meets Humanities I-A requirement
A multidisciplinary examination of the various ways humans have understood, represented, experienced, and justified war over time and across cultures. The course considers the representation of war through art, literature, and music. It analyzes possible causes of war, including innate human drives, gender differences, socialization, and economic and resource competition. In addition, it examines justifications for war from a range of ethical perspectives. Contributing faculty include: O. Frau, K. Khory, K. Remmler, R. Schwantz, and J. Western.
Prerequisites: sophomores only
Notes: This 8-credit course fulfills both the Humanities I-A and Social Sciences III-A distribution requirements; the statement above only mentions one, but it really will meet both.

(Spring) Financial Accounting
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The course, while using traditional accounting techniques and methodology, will focus on the needs of external users of financial information. The emphasis is on learning how to read, interpret, and analyze financial information as a tool to guide investment decisions. Concepts rather than procedures are stressed and class time will be largely devoted to problem solutions and case discussions. A basic knowledge of arithmetic (+,-,*,/) and a familiarity with a spreadsheet program is suggested. See <a href="http://www.mtholyoke.edu/courses/cljohnso">http://www.mtholyoke.edu/courses/cljohnso</a>.
Prerequisites: so, jr, sr
Notes: This course does not count towards the Economics mjr, nor as an introductory course for Economics prerequisites.

(Fall) **Individuals and Organizations**

*Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement*

(Psychology 212f)

This course focuses on individual and small-group behavior in the organizational setting. The basic objective is to increase knowledge and understanding of human behavior in organizations - especially each individual’s own behavior. Three types of knowledge are stressed: (1) intellectual information regarding human behavior in an organizational context; (2) understanding of oneself as a person and as a manager; and (3) behavioral skills in dealing with people.

(Fall) **Winners and Losers: Taxation, Social Justice, and Economic Choices**

*Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement*

(Speaking-intensive; Politics 225)

The maze of laws that make up the U.S. tax system shape and define what our nation is and will be; they also create winners and losers. Who benefits from special relief provisions such as for housing, health care, education, retirement savings, charitable giving, and child care? What are the economic consequences? How are families taxed? Women? The poor? Capital gains? Should we have an estate tax, reform the income tax, or adopt a consumption tax? How can we save Social Security? All these issues and more are addressed, including a review of federal tax history from the Constitution to the present.

(Fall) **Ethical Issues in Complex Organizations - *Not offered this year/term**

*Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement*

(Philosophy 232s)

There is much talk recently of the need for increased attention to "ethics" in organizational life. This course examines the basis for this concern and the underlying beliefs and structures that give rise to ethical issues, with the goal of helping students to clarify their own positions. Topics addressed will include profit, governance, consumption, distribution and the social contract. Readings will draw on philosophy, religion, economics, history, literature, management theory and current events

(Speaking-intensive)

An interdisciplinary approach to the nature, operations, and directions of complex organizations. Investigates the position of women and men in organizations, with a consideration of the nature and styles of leadership and of the value of a liberal arts degree in organizational interaction, and with an exploration of issues affecting organizations (ethics, competition, legal rights, authority, socialization). Required for the minor in complex organizations.

(Fall) An Introduction to Computer Science - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
An introduction to basic computer science concepts and issues with a focus on HTML and JavaScript programming. Additional topics will be chosen from: origins of computers, computer architecture, assemblers and compilers, digital logic, the Internet, and artificial intelligence. Laboratory assignments will offer some experience with programming and the use of application software.

(Fall) Problem Solving and Object Oriented Programming
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Computers are used every day for an enormous variety of tasks, from playing games and chatting with friends to transferring billions of dollars, delivering radiation treatments, and controlling the electrical grid. Computer programs are an essential ingredient in allowing for this great diversity of applications. In this course, you will learn to create programs, not just use programs that others have written. You will develop animations using Alice, a tool specifically designed for learning programming by creating animations, and graphical applications using Java, a very popular modern programming language. We assume no prior study of computer science. Programming intensive.

COMSC-211-01 - Computer Science - 2009-2010
(Fall) Data Structures
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Using Java. Solving problems with computers is accomplished by writing programs that operate on data to produce a desired result. The way data is organized and presented to the program can significantly affect its efficiency and simplicity and can sometimes determine whether or not a program can be written to solve the problem at all. This course presents ways of organizing data into "data structures" and analyzes how structuring the data can improve program performance. This course is programming intensive.

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Building large software systems introduces new challenges to software development. Appropriate design decisions early in the development of large software can make a major difference in developing software that is correct and maintainable. In this course, students will learn techniques and tools to help them address these problems and develop larger software projects, improving their skills in designing, writing, debugging, and testing software. Topics include design patterns, UML, designing for maintainability, software architecture, and designing concurrent and fault tolerant systems. Programming intensive.

Are there any limits to what computers can do? Does the answer to this question depend on whether you use a PC or a Mac? Is C more powerful than PASCAL? This seminar explores these questions by investigating several models of computation, illustrating the power and limitations of each of these models, and relating them to computational problems and applications. Topics include finite state automata, pushdown automata, grammars, Turing machines, the Universal Turing Machine, and computability.
Prerequisites: Computer Science 101,102 and Mathematics 232

**COMSC-312-01 - Computer Science - 2009-2010**
**(Spring) Algorithms**
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
How does Mapquest find the best route between two locations? How do computers help to decode the human genome? At the heart of these and other complex computer applications are nontrivial algorithms. While algorithms must be specialized to an application, there are some standard ways of approaching algorithmic problems that tend to be useful in many applications. Among other topics, we will explore graph algorithms, greedy algorithms, divide-and-conquer, dynamic programming, and network flow. We will learn to recognize when to apply each of these strategies as well as to evaluate the expected runtime costs of the algorithms we design.

(Spring) Software Practicum - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Tired of writing programs that nobody ever uses? Then, this is the course for you. Software enables enterprises to carry out previously tedious or impossible tasks, but many organizations lack the resources to develop needed software. You will apply your programming skills to develop and deliver software to meet the requirements of a client from the community. You will learn critical communication skills required to work with a client, work as a team with classmates, and experience the software lifecycle from requirements elicitation through delivery. You will synthesize many topics learned in courses as well as new technologies required to complete the project. Programming Intensive.
Prerequisites: Computer Science 215

COMSC-322-01 - Computer Science - 2009-2010
(Spring) Operating Systems
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
An introduction to the issues involved in orchestrating the use of computer resources. Topics include operating system evolution, file-handling systems, memory management, virtual memory, resource scheduling, multiprogramming, deadlocks, concurrent processes, protection, and design principles. Course emphasis: understanding the effects of operating system design on computer system performance. This course is programming intensive.
Prerequisites: Computer Science 221

Expected enrollment: 20

COMSC-324-01 - Computer Science - 2009-2010
(Fall) Computer Architecture
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
The goal of this class is to provide the student with a working knowledge of how computers operate and the general principles that affect their performance. New developments in hardware render current technologies obsolete within one to three years. Rather than focusing on specific technology, we cover the fundamentals that allow your understanding of technology to grow with future developments. You will also gain a better appreciation of the cost/performance trade-offs encountered in designing a computer system.
Prerequisites: Computer Science 211 and 221
Instructors: L. Ballesteros
Expected enrollment: 20

(Spring) Computer Graphics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
The creation of pictorial images using a computer. Topics include drawing of two- and three-dimensional scenes using OpenGL and other graphical environments; transformations of objects (translations, scalings, rotations, shearings) using homogeneous coordinates; creating perspective in three-dimensional drawing; algorithms for enhancing realism and visual effect; and the mathematical underpinnings of graphic design. Students will complete a number of graphics projects based on readings and class discussion. This course is programming intensive.
Prerequisites: Computer Science 101, 211 (may be taken concurrently), and at least one of Mathematics 203, Mathematics 211, Mathematics 232, or permission of instructor

(Spring) Topics: Computational Geometry in Video Games - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Computational geometry in video games. Developing video games is an exciting and challenging domain, involving many areas of computer science, such as graphics, artificial intelligence and robotics. In this course, we focus on the geometric problems that arise in video game programming. Due to the expensive computations often demanded by current video game technology, efficient algorithms are required that not only satisfy speed requirements, but result in realistic user experiences. Topics will include standard problems from computational geometry, such as triangulation of 2D and 3D objects, point detection and visibility.

Prerequisites: Computer Science 211 Data Structures, Math 232 Discrete - Recommended: CS 312 Algorithms, Math 211 Linear Algebra

(Spring) Experiments in Critical Social Thought

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

First-year seminar

This course will examine the relationship among the lives of thinkers who broke with their own worlds, the new visions of reality they created, and the historical context that provoked and in turn was provoked by their ideas. Readings will include short theoretical and fictional works, memoirs and biographies, historical narratives, and secondary critical commentaries.

Expected enrollment: 16

CST-248-01 - Critical Social Thought - 2009-2010

(Spring) Science, Revolution, and Modernity

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Introduces critical analysis of science and technology by tracing the historiography of the Scientific Revolution. The significance of this extended intellectual episode has been assessed in radically different ways throughout the intervening centuries. As such, it provides a fertile ground on which to pose and answer important questions about science and its role in society. What does it mean to regard science as ‘revolutionary’? How are scientific developments shaped by, and how do they shape, the social, economic, and political worlds in which they are embedded? How is our contemporary understanding of science and technology influenced by the stories we tell about the past?

Prerequisites: so, jr, sr
Instructors: D. Cotter
Expected enrollment: 18

CST-250-01 - Critical Social Thought - 2009-2010
(Fall) Introduction to Nineteenth-Century Critical Social Thought
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(German Studies 231)
An introduction to some of the great critical voices of the nineteenth century. We will explore the ideas of such mutinous thinkers as Karl Marx, Friedrich Nietzsche, Sigmund Freud, Fyodor Dostoyevsky, W.E.B. Du Bois and Franz Kafka focusing on the style as well as the substance of their works and the circumstances that provoked them to write and/or that their writings helped provoke. The course will highlight the tension between appearance and reality, the dialectic of domination and subordination, and the place of reason and irrationality in social life.
Notes: Students with previous study of German may opt for German 232. Students with no previous study of German are encouraged to take German 101 or 103 to complement this course.
Instructors: K. Remmler
Expected enrollment: 25

CST-252-01 - Critical Social Thought - 2009-2010
(Fall) Literature and Politics: Politics as Performance
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking-intensive)
This seminar explores the interdependence between theater and politics. Special attention paid to techniques of performance on political stages throughout history. Students read plays by Sophocles, Shakespeare, Calderon, and Brecht in order to analyze their rhetorical and dramaturgical structures. In the second half of the course, students develop and learn how to use performative skills in order to engage in multiple forms of dialogue around contemporary political controversies.
Prerequisites: soph, jr, sr. CST 248, 249, or 250 recommended but NOT required, or permission of instructor
Instructors: H. Teschke
Expected enrollment: 25

CST-253-01 - Critical Social Thought - 2009-2010
(Fall) Critical Race Theory - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(African American and African Studies 208)
This course examines the discursive relationship between race and law in contemporary U.S. society. Readings examine the ways in which racial bodies are constituted in the cultural and political economy of American society. The main objective is to explore the rules and social practices that govern the relationship of race to gender, nationality, sexuality, and class in U.S. courts and other cultural institutions. Thinkers covered include W.E.B. DuBois, Kimberle Crenshaw, Derrick Bell, and Richard Delgado, among others.
Prerequisites: soph, jr, sr. CST 248, 249, or 250 recommended but NOT required, or permission of instructor
Instructors: L. Wilson
Expected enrollment: 25

CST-254-01 - Critical Social Thought - 2009-2010
(Spring) Postcolonial Theory: Postcolonialism/Poststructuralism
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(English 254)
This course will bring together theorists from different traditions--postcolonial studies and European philosophy--who share a common project: (1) to identify the conceptual limits of modern or "Western" thought, and (2) to practice thinking beyond those limits. Their thought-experiments include imagining history beyond progress, politics beyond the state-system, and being beyond the self. We may read Cesaire, Said, Galeano, Spivak, and Mbembe, and Foucault, Derrida, Badiou, Rancière, and Agamben. We will try to pay as close attention to the texts in front of us as they do to their own subjects, in order to analyze the form of their thought and so to reflect critically on our own.
Prerequisites: soph, jr, sr. CST 248, 249, or 250 recommended but NOT required, or permission of instructor
Instructors: S. Ahmed
Expected enrollment: 25

CST-255-01 - Critical Social Thought - 2009-2010
(Fall) Human Agency and Historical Transformation: Pivotal Moments in the Development of Capitalism
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Topics offered under this rubric will be designed to illuminate the interplay between continuity and change, stability and disorder, tradition and expiration in thought and practice, through investigation and analysis of moments or periods when historical actors made critical choices, witting or unwitting, that fundamentally shaped choices possible for later generations.

This seminar examines evidence and theories on the origins, development, and dynamics of capitalism and the modern state. We shall focus on the transition to (agrarian) capitalism in early modern England, the industrialization of production in nineteenth-century Europe and the United States, and the political and economic crisis of the 1930s depression. As we ask how fundamental changes in human communities come about, we shall consider the relative contributions of individual agency and social determination to the creation of a world so many now regard as either natural or inevitable.

(Fall) Seminar in Critical Social Thought
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking- and writing-intensive)
A seminar for CST juniors and seniors in which both participating faculty and students present their independent research, respond critically to one another's work, and lead discussions on relevant secondary readings. Every student will be expected to produce a substantial essay on a question in the broad field of social thought by the end of the semester. Students will be encouraged to cultivate agility in speaking, arguing, and writing.
Prerequisites: Critical Social Thought sr; other jr & sr with permission of instructor
Notes: seniors who intend to write a thesis must take 4 credits of Critical Social Thought 395 in the fall, in addition to this course
Instructors: J. Cocks

Curricular Support Courses

CUSP-100-01 - Curricular Support Courses - 2009-2010
(Spring) Engaging the Pioneer Valley: Community-Based Learning (CBL) Theory and Practice
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Community-based learning course)
This course will equip students to enter communities effectively and responsibly as learners, researchers, volunteers, interns, and citizens. Successful community-based learning depends on familiarity with history, politics, policies, and practices in campus-community partnership. Students will study
and interact with the region's organizations, issues, and people to refine their interests, hone their skills, identify and prepare to meet critical needs and opportunities via community-based learning. Panel sessions will complement readings, discussions, and assignments engaging issues and practice in campus-community partnership and nonprofit organizations.

Notes: Note: For students entering the College in Fall 2008 or later, there is a 12-credit limit on curricular support and non-liberal arts courses that may be counted towards the 128 credits required for graduation. (Students who entered before Fall 2008 have a limit of one non-liberal arts course, and no limit on Curricular Support courses.)

Instructors: A. Bloomgarden

Expected enrollment: 40

CUSP-102-01 - Curricular Support Courses - 2009-2010
(Fall) Community-Based Learning: Networks, Reflection, and Meaning

Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.

(Community-based learning course)

Students can dramatically deepen learning and impact in community-based study, volunteerism, internships, research, and paid work when they build campus and community networks, and reflect on challenges and successes. This course is designed to facilitate learning and impact for students in CBL courses, CBL fellowships and mentor positions, C.A.U.S.E. volunteer placements, off-campus work-study, and independent study. Monthly discussions will enable networking, problem solving, and information sharing, informed by key civic engagement readings. Students will connect with each other, tie together academic and personal learning, and gain greater understanding of themselves and communities.

Notes: Meets one time per month, second Wednesday of month, 8:35-10:50 am. Note: For students entering the College in Fall 2008 or later, there is a 12-credit limit on curricular support and non-liberal arts courses that may be counted towards the 128 credits required for graduation. (Students who entered before Fall 2008 have a limit of one non-liberal arts course, and no limit on Curricular Support courses.)

CUSP-103-01 - Curricular Support Courses - 2009-2010
(Spring) Integrating Learning, Service and Social Action

Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.

(Community-based learning course)

Community-Based Learning happens at the intersection of three activities: learning, service and social change. Integrating those experiences and purposes requires intentional, facilitated reflection, especially for students to build meaningful connections between CBL and sustained social action. This course is designed to facilitate such integration for students in CBL fellow and mentor positions, and for students in other community-based projects. Readings focus on campus-community dynamics, on student-led community-based social action, and on collaboration for social change. Learning activities include in-class reflection exercises and on-line dialogue using ELLA forums.

Prerequisites: permission of the instructor

Notes: Monthly, second Wednesday (except final meeting), 8:35-10:50 am2/10, 3/10, 4/14, 5/5

(Fall) Public Speaking and Civic Discourse: Theory and Practice

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Speaking-intensive)

What are the elements of an effective public speech? Who are considered notable speakers? What rhetorical strategies do people use to support and/or influence one another? This course explores theories of civic discourse and the role of language in public life. We will investigate how ethnicity, gender, class, sexuality, nationality, and social status are bound to cultural patterns and to verbal and nonverbal codes. We will develop skills in applying the principles of effective public speaking in structured speaking situations. A number of public speeches will be analyzed to enable students to evaluate critically the effects of culture on communication and communication on culture.

Notes: Note: For students entering the College in Fall 2008 or later, there is a 12-credit limit on curricular support and non-liberal arts courses that may be counted towards the 128 credits required for graduation. (Students who entered before Fall 2008 have a limit of one non-liberal arts course, and no limit on Curricular Support courses.)

(January) Women, Speak Up!: Using Your Voice for Social Change
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
(Speaking- and writing-intensive)
How can we speak out in the face of injustices in ways that will effect real change? How do we overcome our fear of speaking up? How do we use rhetoric ethically and productively to compel people to listen? This course will consider how people claim agency and use language effectively in order to resist oppression. Through the lens of theory and with hands-on practice, we will challenge what we tell ourselves in the privacy of our own thoughts, strategize about how to communicate productively one-on-one with people who hold different views, explore possibilities for improving how we engage in inter-group dialogue or classroom discussions, and learn how to give a powerful public address.

(January) Weighing, Arguing and Advocating: A Case Study in Justice Gone Wrong
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
How well are institutions like the justice system, the press and the political process equipped to handle claims of false convictions? We will explore this question by examining the case of an inmate who has claimed for 25 years that he was wrongfully convicted of a rape. We will examine the case's particulars and consider questions that arise in efforts to evaluate truth claims; the role of journalists as a check on state power; how the legal system handles post-conviction challenges; and strengths and pitfalls of forensic evidence, especially DNA. Through discussion, readings, guest speakers, documentary film and several writing assignments, we will explore the issues this case embodies.

Notes: Eight 2-hour meetings that includes one film screening followed by a discussion. Optional field trip to state prison featured in wrongful conviction case.

(Spring) Dance in the Twentieth Century: American Dance
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
From the light-transforming dances of La Loie and the barefoot dances of Isadora to the graceful cakewalking of Ada Overton and George Walker;
from the zealous modernists to the irreverent postmodernists; from ballroom, boogie, and shim-sham-shimmy to jazz, tap, bebop, and hip-hop: this
survey of twentieth century American dance looks at all the steps, styles, and genres, the classical and cultural traditions that shaped American
vernacular dance forms. Viewing cultural history through the lens of movement and performance, we explore the particular social and cultural
traditions that shaped American dance performance and trace our own roots as dance artists within this century's continuum.

(Fall) Whiteness: The Other Side of Racism - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
First-year seminar (Writing-intensive)
What is whiteness—an identity, an ideology, a racialized social system? How is it related to racism? This course will examine the historical, social, psychological, and legal frameworks of whiteness, how whiteness is enacted in everyday practice, and how it influences the lives of whites and people of color. Some of the concepts we will explore include privilege, dominance, the "new" racism, color-blindness, cultural capital, racial identity, racial stratification, power, and antiracism.
Prerequisites: fy
Instructors: S. Lawrence

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)
Is Mount Holyoke a school or a business? Is the institution one sees today what Mary Lyon had in mind in 1837? This course will look at the development of U.S. higher education from upstart colonial colleges into a multi-billion dollar industry. We will look closely at the tension between education mission and market forces, and how the interaction between academe and society has played out from the founding of the republic through women's rights, the world wars, and 60s counterculture. We will touch on a range of contemporary topics such as access and affirmative action, standardized testing, athletics, and e-learning. Mount Holyoke will serve as a recurring case study.

(Spring) Researching the Enterprise of Education: Researching Race and Racism in Education - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Preamble (for topics courses): Provides an overview on the nature and practice of educational research. Students critique published research, explore ethical considerations, and examine the uses of educational research. Students also propose and conduct a small-scale research project of their own. Particular methodological approaches are stressed in different iterations of this course. Qualitative approaches such as participant-observation, grounded theory, ethnography, teacher research, case study and interview studies are central in some courses; in others the quantitative analysis of data on education will be emphasized.
The central elements of this course include reading qualitative research, writing qualitative research, and conducting qualitative research. These three acts of inquiry explore how race matters in education and provide a deeper understanding of the racial realities of everyday life in schools. Readings and discussions highlight the paradigms, methodological approaches, and uses of qualitative research. Class demonstrations and activities focus on developing research skills. The independently designed research study provides further exploration of the complexities involved in researching racial matters.
Prerequisites: two courses (one with substantial race-related content) from Anthropology, African American St., Asian St., CST, English, Gender St., Psych. & Education, or Sociology, and permission of instructor.

ENGL-101-01 - English - 2009-2010
(Fall) Seminar in Reading, Writing, and Reasoning: Into Africa
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
First-year seminar (Writing-intensive)
Preamble (for topics courses): Though sections of English 101 differ in specific content, all develop the skills of careful reading and effective writing essential to the liberal arts and sciences. Students will write frequently and have an opportunity to revise their work. By active participation in class discussion, students will develop their speaking skills and learn to ask critical questions, formulate answers, and frame persuasive arguments. Students
who do not take the course in the fall should consider enrolling in the spring. Like other first-year seminars, English 101 is intended primarily for students at the start of their college career.

An introduction to some topics in African studies, reading and writing about such contemporary authors as Ama Ata Aidoo, Tsitsi Dangarembga, Bessie Head, Ayi Kwei Armah, Nuruddin Farah. Studying both fiction and essays, the course focuses on recent political situations (Ghana, Congo, South Africa), on images of women, and on representations of Africa in news media and in cinema, both from Africa and the West.

Prerequisites: Only first-year students may preregister for this course. Sophomores, juniors, and seniors may inquire if there is space available during the first two weeks of class.

(Spring) Seminar in Reading, Writing, and Reasoning: Lives on the Boundaries: Borderland Identities in American Literature
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
First-year seminar (Speaking- and writing-intensive)

Preamble (for topics courses): Though sections of English 101 differ in specific content, all develop the skills of careful reading and effective writing essential to the liberal arts and sciences. Students will write frequently and have an opportunity to revise their work. By active participation in class discussion, students will develop their speaking skills and learn to ask critical questions, formulate answers, and frame persuasive arguments. Students who do not take the course in the fall should consider enrolling in the spring. Like other first-year seminars, English 101 is intended primarily for students at the start of their college career.

Who decides which categories are available for defining one's sense of self? How do categories themselves complicate our ability to make sense of who we are and our place in the world? How do stark binaries such as "Black/White," "Man/Woman," or "American/Foreigner" prove problematic for those who find themselves somewhere in between, or indeed outside of, these imagined worlds? In this course we will consider how authors in the United States have used fiction writing and memoir to answer questions about mixed, marginalized, or unacknowledged identities; in doing so, we will explore how language itself paradoxically creates and challenges available labels.

Prerequisites: Only first-year students may preregister for this course. Sophomores, juniors, and seniors may inquire if there is space available during the first two weeks of class.

Instructors: L. Greenfield

Students who do not take the course in the fall should consider enrolling in the spring. Like other first-year seminars, English 101 is intended primarily for students at the start of their college career.

We will discuss recent fiction about South Asia (Amitav Gosh), the Middle East (Elias Khoury and Assia Djebar), South Africa (J. M. Coetzee), and Latin America (Eduardo Galeano). Though their works are diverse in form and in content, these authors nonetheless have a common understanding of the contemporary relationship of literature to politics. They experiment with fiction, attempting to develop forms of consciousness that resist the propaganda of states. We will explore the imaginary "states" these authors create in literature, a politics perhaps of the future.

Like other first-year seminars, English 101 is intended primarily for students at the start of their college career.

Mary Wollstonecraft once wrote that the key for women to enlarge their minds was to err and "frequently go astray." This course will explore how many writers plot their stories and poems around all types of mistakes, errors, or missteps both intentional and accidental. We will discuss what kinds of knowledge about the self and the world the fall into error might offer, how we know when we've made mistakes, and what kind of change or redemption is possible in the wake of these discoveries. Readings will be drawn from Milton, Rousseau, Wordsworth, Coleridge, Wollstonecraft, Austen, Christina Rossetti, and Wharton, as well as a few contemporary writers.

Truth is what the non-fiction writer seeks and what the film-maker who adapts that work desires. Or is it? And who gets us closer to the truth? Is it the book, with all its depth and detail and wonderful layering? Or is it the film that applies sound, action and color to take you to a foreign land, or just around the corner to a place you've never been? Students in this class will examine exceptional works of non-fiction that have been adapted for the screen. Written assignments will encourage you to get out into the world - then bring it back in clear, crisp prose.

This course examines the various ways the multicultural family in contemporary American, British, European, and South African culture is imagined by writers and filmmakers. Issues to be explored include: generational conflict, the struggle to "break away," and the claims of memory and nostalgia. Above all, the course seeks to explore the range of cultural forms in which these themes find expression.

Prerequisites: Only first-year students may preregister for this course. Sophomores, juniors, and seniors may inquire if there is space available during the first two weeks of class.

This course will look at how the question "Who am I?" has formed works of literature. We will investigate how identity is formed or not formed by forces such as society, circumstance, and family. Some of the concepts we will examine include body image, race, gender, class, personal voice, perception, and ancestry. Course material will be drawn from essays, poetry, fiction, drama, and film, including Maxine Hong Kingston's The Woman Warrior, Toni Morrison's The Bluest Eye, Shakespeare's As You Like It, and poems by Emily Dickinson, Walt Whitman, and Adrienne Rich.

Prerequisites: Only first-year students may preregister for this course. Sophomores, juniors, and seniors may inquire if there is space available during the first two weeks of class.

Instructors: D. Weber

We will examine contemporary American writers who employ a variety of genres to create autobiography. Through close readings of auto-fiction, poetry, the lyric essay, memoir, and journals, we shall interrogate how African American, Asian American, and queer aesthetics intersect and address this difficult question: What is an American story of the self? Writers include Wayne Koestenbaum, Gary Fisher, Toi Derricotte, June Jordan, Claudia Rankine, Andy Warhol, Justin Chin, D.A. Powell, and Meena Alexander. Students will write and revise several short creative and critical pieces, each piece becoming part of a cohesive final project.

Prerequisites: Only first-year students may preregister for this course. Sophomores, juniors, and seniors may inquire if there is space available during the first two weeks of class.

We will examine the "New Woman" as a category of social theory, political action, and literary representation at the turning of the twentieth century. Our readings will situate female characters within events taking place during this period—debates over suffrage, citizenship, immigration, segregation, urbanization, and nativism. We will examine a range of texts written by women that present multiple and, at times, conflicting images. As we encounter women from various class, cultural, racial, and ethnic backgrounds, we will ask just what this New Woman symbolized and for whom. Were the concerns of women at the turning of the century all that new, or simply understood in new ways?

First-year seminar (Writing-intensive)

Preamble (for topics courses): Though sections of English 101 differ in specific content, all develop the skills of careful reading and effective writing essential to the liberal arts and sciences. Students will write frequently and have an opportunity to revise their work. By active participation in class discussion, students will develop their speaking skills and learn to ask critical questions, formulate answers, and frame persuasive arguments. Students who do not take the course in the fall should consider enrolling in the spring. Like other first-year seminars, English 101 is intended primarily for students at the start of their college career.

This course examines the complex interplay of race, gender, and sexuality in African American, Asian American, Chicana/o-Latina/o and Native American literature. Through close readings of short stories and novels, we will explore themes of unequal citizenship and the contradictory premises of the American dream. Authors may include Toni Morrison, Thomas Glave, Sherman Alexie, Sandra Cisneros, Junot Díaz, Faye Myenne Ng, Andrew Pham, and Don Lee.

Prerequisites: Only first-year students may preregister for this course. Sophomores, juniors, and seniors may inquire if there is space available during the first two weeks of class.

Instructors: I. Day

Expected enrollment: 16

ENGL-101-08 - English - 2009-2010
(Fall) Seminar in Reading, Writing, and Reasoning: Some Cultural Representations of Women
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

First-year seminar (Writing-intensive)

Preamble (for topics courses): Though sections of English 101 differ in specific content, all develop the skills of careful reading and effective writing essential to the liberal arts and sciences. Students will write frequently and have an opportunity to revise their work. By active participation in class discussion, students will develop their speaking skills and learn to ask critical questions, formulate answers, and frame persuasive arguments. Students who do not take the course in the fall should consider enrolling in the spring. Like other first-year seminars, English 101 is intended primarily for students at the start of their college career.

We begin with a reading of Woolf's A Room of One's Own and a consideration of Mount Holyoke as such a "room" as an introduction to thinking about some of the ways in which women have been traditionally represented (or not represented) in Western culture. After working with a variety of short fictions by men as well as women, we will focus on one particularly notable literary representation of women, Edith Wharton's House of Mirth (both the novel and the recent film). Through John Berger's Ways of Seeing we will extend our discussion to the tradition of oil painting, contemporary advertising, and the media. Writing intensive; brief weekly exercises; research paper.

Prerequisites: Only first-year students may preregister for this course. Sophomores, juniors, and seniors may inquire if there is space available during the first two weeks of class.

Like other first-year seminars, English 101 is intended primarily for students at the start of their college career.

This course will be an introduction to the study of poetry with a focus on the lyric. We will read poems, poetry criticism, and poetic theories, including work by John Donne, William Wordsworth, Elizabeth Bishop, Denise Riley, William Empson, Yuri Lotman, Eve Sedgwick, Fredric Jameson, and Susan Stewart. We will be particularly concerned with poetic structure and with the ways in which a poem's formal and stylistic features can both hide and reveal historical pressures.
Prerequisites: Only first-year students may preregister for this course. Sophomores, juniors, and seniors may inquire if there is space available during the first two weeks of class.

Like other first-year seminars, English 101 is intended primarily for students at the start of their college career.
This course will look at how the question "Who am I?" has formed works of literature. We will investigate how identity is formed or not formed by forces such as society, circumstance, and family. Some of the concepts we will examine include body image, race, gender, class, personal voice, perception, and ancestry. Course material will be drawn from essays, poetry, fiction, drama, and film, including Maxine Hong Kingston's The Woman Warrior, Toni Morrison's The Bluest Eye, Shakespeare's As You Like It, and poems by Emily Dickinson, Walt Whitman, and Adrienne Rich.
Prerequisites: Only first-year students may preregister for this course. Sophomores, juniors, and seniors may inquire if there is space available during the first two weeks of class.

This writing-intensive seminar focuses on literary visits to alternative worlds in order to explore the use of forbidden, exotic, unfamiliar, or uncanny locales in expressions of heroic identity. By studying the tropes of death, disappearance, metamorphosis, and rebirth, we'll also consider the relevance of the mythographical as a device used by poets, novelists, and filmmakers throughout time. Among our readings will be works by Virgil, Chrétien de Troyes, Edmund Spenser, Daniel Defoe, Thomas Pynchon, J. M. Coetzee, and the film Blade Runner.
Prerequisites: Only first-year students may preregister for this course. Sophomores, juniors, and seniors may inquire if there is space available during the first two weeks of class.

This course explores the symbolism, evolution, and politics of "home." The sites that we consider will range from an individual's place of birth to locations associated with cultural or racial origins, spiritual consciousness, or symbolic rebirth. How do people honor, romanticize, forget, or destroy these locations and their connections to them? Fiction, films, essays, autobiographies, and poetry will shape our considerations of how tradition, domesticity, community, exile, and return affect an individual's sense of "home."
Prerequisites: Only first-year students may preregister for this course. Sophomores, juniors, and seniors may inquire if there is space available during the first two weeks of class.

In this course we will examine representations of immigration in a variety of literary and cultural forms. By reading novels, short stories, a play, poems and films produced within different eras and contexts, this course will examine questions of identity, cultural conflict and adaptation, memory and nostalgia, and generational conflicts. We will also consider the ways that historical and cultural specificity shape and complicate these categories of inquiry. Writers will include Divakaruni, Roth, Danticat, Shakespeare, Li-Young Lee and Duras.

Prerequisites: Only first-year students may preregister for this course. Sophomores, juniors, and seniors may inquire if there is space available during the first two weeks of class.

The finest journalists are professors to the people. They educate citizens so as to facilitate reasoned, fact-based dialogue on subjects as diverse as politics, poverty, war, science, and the arts. We will look at journalism's role in the culture as well as some of its failings and foibles. Students will try their hand at writing about an event, a person and an issue using the reporter's skills of interviewing, research, and thoughtful analysis to produce snapshots of the world inside and outside the College gates. Curiosity leads. Mastery follows.

(Writing-intensive)
This workshop will introduce students to the short story form as practiced by contemporary and canonical writers. Students will learn to read fiction actively, as writers developing their craft. We will focus on understanding the elements of fiction with an eye toward eventual mastery. Exercises will focus on exploring the sensual (that is, physical) world of characters and on developing what John Gardner called "the fiction dream." Students will write and submit two stories and one revision.
Prerequisites: soph, or permission of instructor
Instructors: A. Gaige
Expected enrollment: 12

ENGL-213-01 - English - 2009-2010
(Fall) The Literature of the Later Middle Ages - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)
This course will look at a variety of works and genres written in the fourteenth and fifteenth centuries. We'll briefly begin with themes from a few
thirteenth-century works, but our attention will be directed principally toward the Gawain-poet, Chaucer, Langland, Gower, Margery Kempe, Lydgate,
and the shorter poems of Henryson and Dunbar. No prior knowledge of Middle English is required.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: meets English department pre-1700 requirement
Instructors: W. Yu
Expected enrollment: 25

(Spring) The Literature of the Later Middle Ages
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive)
This course will examine a variety of English works and genres written in the thirteenth through fifteenth centuries. Our attention will be directed
principally at the Gawain-poet, Chaucer, Langland, Gower, Margery Kempe, and Lydgate. Most of our readings are in Middle English. Course
requirements include a formal presentation, midterm, and final papers.
Prerequisites: soph, jr, sr, English 200
Notes: meets English department pre-1700 requirement
Instructors: W. Yu
Expected enrollment: 20

ENGL-214-01 - English - 2009-2010
(Fall) Topics in Medieval Studies: The Alliterative Traditions in Later Medieval Verse - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)
This course introduces and defines a medieval "alliterative tradition" by investigating the rise of medieval vernacular poetry, the partnership of form
and content, and the materiality of language. Principally, we'll ask how alliterative practices in fourteenth-century English works manifest poetic
thought; and to do so, we'll historicize these works in terms of their religious, political, and philosophical implications. Readings will include Anglo-
Saxon poems in translation, Sir Gawain and the Green Knight, Piers Plowman, and the Alliterative Morte Arthure. Middle English works will be read in the
original language, but no prior knowledge of Middle English is required.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: meets English department pre-1700 requirement
Instructors: W. Yu
Expected enrollment: 25

ENGL-214-01 - English - 2009-2010
(Spring) Topics in Medieval Studies: Exploring Medieval Texts and Contexts - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(History 232s-01, Medieval Studies 200s-01)
This full-year course allies students of late medieval history and literature with its two instructors in exploration of texts and contexts that constituted
the society and culture of England, 1350-1530. The first semester emphasizes discovery of published evidence from the era; the second challenges
participants to integrate textual analysis and historical interpretation. Major texts include works by Chaucer, Gower, and Malory, read within an array of
less familiar medieval sources. Major topics include languages and book culture of late medieval England; violence and chivalry; the worlds of manors
and guilds; polity, gender, and governance; and late medieval science.
Prerequisites: soph, jr, sr, or permission of instructor; 2 credits per semester
Instructors: C. Collette, H. Garrett-Goodyear
Expected enrollment: 25

ENGL-215-01 - English - 2009-2010
(Fall) Early Chaucer - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive)
We will discuss Chaucer's explorations of love, human will, and various conceptions of closure (in literary terms, the efficacy of complaint, the work of
poetic endings, and the poet's accomplishments). These topics will be studied in light of Chaucer's ranging literary influences, especially his assimilation
and renovation of classical poetry, French and Italian vernacular verse, romance, saints' lives, allegory, and beast fables. All readings are in Middle
English, consisting of a selection of Chaucer's short poems and his major works prior to The Canterbury Tales.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: meets English department pre-1700 requirement
Instructors: W. Yu
ENGL-220-01 - English - 2009-2010
(Fall) Introduction to British Literary and Cultural Studies since 1660: Culture and Society: 1798-1900 - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This course offers a broad study of selected figures in modern literary and intellectual history and helps prepare students for more advanced classes in British and/or postcolonial studies. We will use these figures to probe the dynamic relationship between imaginative practice and social change, which may involve global as well as national contexts. This course will introduce students to writing sustained pieces of critical analysis, challenging them to explore the theoretical relationship between literary form and historical transformation in the modern period.
This course will examine a number of major literary texts from the *Lyrical Ballads* of Wordsworth and Coleridge through Conrad's *Heart of Darkness*. The focus will be on major poets and novelists of the period, but we will also consider some nonfiction prose writers as well. The course will be particularly concerned with the literary response to social change such as the migration from the country to the city, the rise of industry, the situation of women, and the legacy of imperialism.
Prerequisites: soph, jr, sr
Notes: meets English department 1700-1900 requirement
Instructors: W. Quillian
Expected enrollment: 20

ENGL-231-01 - English - 2009-2010
(Fall) British Romanticism: Revolution and Reaction
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This class will examine the ways Romantic-era writers figured revolution and the reaction against it, in the wake of the French Revolution's spectacular but failed promises of liberty, fraternity, and equality for all. We will pay special attention to how British writers envisioned their own versions of freedom and equality, extending them to women, slaves, and the poor. Likewise we will explore how this project for social change was necessarily related to revolutions in language and aesthetics. Authors may include Burke, Wordsworth, Coleridge, Smith, Barbauld, Blake, Austen, Keats, Percy and Mary Shelley, Byron, and Hemans.
Prerequisites: soph, or permission of instructor
Instructors: K. Singer

ENGL-232-01 - English - 2009-2010
(Spring) Global Diversity/European Modernity - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Critical Social Thought 249s-01)
For two centuries, academic disciplines have been based on the premise that early modern Europe laid the foundations of 'modernity'--scientific method, markets, mobility, democracy, and global exchange, or, in a word, 'progress'--and then brought it to the rest of the world. But what were those other worlds, both in Europe and outside, that modernity superseded? What trace have they left--how can we know them--after they have been destroyed? Juxtaposing Enlightenment literature and post-Enlightenment theory concerned with historical difference, this class aims to rethink what actually constitutes the peculiar modernity that came to shape our lives.
Prerequisites: soph, jr, sr, or permission of instructor

ENGL-233-01 - English - 2009-2010
(Fall) Introduction to Queer Theory - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course introduces students to the social and political contexts mediating nonnormative gender and sexual expression since the nineteenth century. In our examination of queer epistemological genealogies and methodologies, we will also consider the value of queer theory as a subjectless analysis as opposed to a queer of color critique that calls into question the sedimentation of a white, male, North American queer identity with global pretensions.
Prerequisites: soph, or permission of instructor
Instructors: I. Day

ENGL-234-01 - English - 2009-2010
(Fall) American Drama, 1787 to 1994
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Theatre Arts 234, American Studies 290-02)
This course offers a broad survey of American drama in the context of performance traditions such as minstrelsy, melodrama, realism, the Broadway musical, and the avant-garde. We read works that challenge and expand concepts of national identity and their connection to discourses of race, class, ethnicity, and gender. How do the characters and landscapes of these plays reflect historical events and theatrical inventions? What do they tell us
about what it means to be an "American," and how have our answers changed over time? Playwrights will include Tyler, Baker, Aiken, Brown, Boucicault, O'Neill, Stein, Hurston, Wilder, Williams, Miller, Shepard, Kennedy, Wilson, Kushner, and Parks.

Instructors: E. Rundle
Expected enrollment: 25

**ENGL-235-01** - English - 2009-2010
(Spring) Modern British Poetry

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This introduction to modern British poetry pays special attention to the emergence, consolidation, and dismantling of modernist poetry and poetics. It will link this literary history with, amongst other things, the loss of faith, the two world wars, and the relationship between monumental aesthetics, utopian poetics, and totalitarian politics. Writers will include Hardy, Yeats, Eliot, H.D., and Auden.

Prerequisites: soph, or English 200

Instructors: N. Alderman
Expected enrollment: 25

**ENGL-236-01** - English - 2009-2010
(Fall) The English Novel from Defoe to Austen - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course will focus on well-known English novels of the eighteenth and early nineteenth centuries while introducing some of the different theoretical arguments regarding the emergence and history of what is called the modern novel. Novelists may include Defoe, Richardson, Sterne, Burney, Radcliffe, and Austen, with supplementary readings in theory and criticism.

Prerequisites: soph, jr, sr, 4 credits in department beyond English 101, or permission of instructor

Notes: meets English department 1700-1900 requirement

Instructors: J. Pyke
Expected enrollment: 25

**ENGL-240-01** - English - 2009-2010
(Fall) American Literature I

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

A survey of American literature from the literature of exploration through the major authors of the mid-nineteenth century, with special attention to the formation of an American literary tradition, along with the political, social, and religious context that helped shape the imaginative response of American writers to their culture.

Prerequisites: soph, or permission of instructor

Notes: meets English department 1700-1900 requirement

**ENGL-241-01** - English - 2009-2010
(Spring) American Literature II - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

A continuation of English 240, which explores the diversity of writers and literary forms that arose in U.S. society in the period from the Civil War to World War I. Authors may include Alcott, Chopin, Crane, Dreiser, Dunbar, Dunbar-Nelson, DuBois, Sui-Sin Far, Gilman, Harper, James, Jewett, Stein, Twain, Wharton, and Whitman. Will address the development of realism and naturalism, and the beginnings of modernism, and explore literary redefinitions of race, gender, sexuality, and class as shaped by social and economic pressures during this era.

Prerequisites: soph, or permission of instructor

Notes: meets English department 1700-1900 requirement

Instructors: E. Young

**ENGL-243-01** - English - 2009-2010
(Fall) American Gothic - *Not offered this year/term

 Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
 (Film Studies 220f-01)

An examination of the gothic—a world of fear, haunting, claustrophobia, paranoia, and monstrosity—in American literature and culture, with an emphasis upon issues of race and gender. Topics include: the gothic; gothic sexuality; Southern, Northern, and national gothic; freakishness and grotesquerie; and visual gothic. Focus on fiction, with some film and photography. Authors and artists may include Alcott, Arbus, Browning, Crafts, Crane, Dunbar, Dunn, Faulkner, Gilman, Hawthorne, McCullers, Morrison, O'Connor, Oates, Parks, Poe, and Romero.

Prerequisites: soph, jr, sr, English 240 or 241 recommended

ENGL-250-01 - English - 2009-2010
(Fall) African American Literature
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
This course offers an introduction to the literary works of African Americans from the late-eighteenth century to the present, with an emphasis on poetry and fiction. Beginning with slave narratives and early poetry, we will consider issues of genre, literary traditions, and historical context while gaining experience in reading and analyzing literary texts. We will examine how authors consciously went about creating a literary tradition that mirrored, challenged and created a dialogue with the American canon.
Prerequisites: soph, second-semester fy with permission of instructor
Instructors: G. Pemberton
Expected enrollment: 25

ENGL-252-01 - English - 2009-2010
(Spring) Harlem Renaissance - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
The course will study the literature, politics, and art of the Harlem Renaissance—roughly a period from 1915 to 1940. The New Negro Movement brought together writers, artists, philosophers, musicians, and everyday people from many parts of the United States and the Caribbean to New York City's Harlem. Their efforts to create a distinct African American art resulted in a flowering of art from several different perspectives. The era has most frequently been thought of as a 1920s-only phenomenon, and many have suggested that it was less a "renaissance" than a first flowering of a collective artistic spirit. We will energetically take on the debate.
Prerequisites: soph, or permission of instructor

Expected enrollment: 25

ENGL-253-01 - English - 2009-2010
(Spring) African Literature
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
An introduction to African literature in English since 1960. Fiction, drama, autobiography, essays by such writers as Ama Ata Aidoo, Ayi Kwei Armah, Chinua Achebe, Buchi Emecheta, Ngugi wa Thiong'o, Chimamanda Adichie, Zakes Mda, Sindiwe Magona, and Zoe Wicomb. Particular attention to themes of exile and imprisonment, political struggle before and after independence, the convergence of oral cultures and European languages, and the emergence of postcolonial and feminist discourses in contemporary Africa.
Prerequisite: soph, or permission of instructor
Instructors: J. Lemly
Expected enrollment: 25

ENGL-254-01 - English - 2009-2010
(Spring) Postcolonialism/Poststructuralism
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Critical Social Thought 254)
This course will bring together theorists from different traditions—postcolonial studies and European philosophy—who share a common project: (1) to identify the conceptual limits of modern or "Western" thought, and (2) to practice thinking beyond those limits. Their thought-experiments include imagining history beyond progress, politics beyond the state-system, and being beyond the self. We may read Cesaire, Said, Galeano, Spivak, and Mmerebe, and Foucault, Derrida, Balibar, Rancière, and Agamben. We will try to pay as close attention to the texts in front of us as they do to their own subjects, in order to analyze the form of their thought and so to reflect critically on our own.
Prerequisites: soph, jr, sr, or permission of instructor
Instructors: S. Ahmed
Expected enrollment: 25

ENGL-255-01 - English - 2009-2010
(Spring) Hughes, Hurston, Wideman, Morrison
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
Langston Hughes and Zora Neale Hurston were major figures in the Harlem Renaissance and beyond. Toni Morrison and John Wideman continue to produce major fiction in the modern era. We will examine these major African American writers and their work, paying particular attention to issues of gender, family, community, sexuality, and the literary politics affecting African American writers.
Prerequisites: so, jr, sr and second-semester fy with permission of instructor

(Fall) Reading and Writing in the World
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive; American Studies 290, Environmental Studies 267)

"Most people are on the world, not in it." –John Muir. An introduction to reading and writing about nature, this seminar will attempt an exchange across distinct approaches to observing and describing the world around us. Do lenses of culture, discipline, and gender determine how we see and experience nature, environment, and place? Course work will include reading such authors as N. Scott Momaday, Henry David Thoreau, bell hooks, Leslie Marmon Silko, Mary Oliver, and Annie Dillard; field trips; and writing assignments—weekly field notes and journals, analytical papers, and personal essays.

(Fall) Nineteenth-Century American Women Writers
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(American Studies 290, Gender Studies 204)

In this cross-cultural examination of nineteenth-century American women writers, we will compare a number of works of fiction, prose, poetry, and autobiography. We will discuss how writers created sophisticated and insightful critiques of American culture and imagined or re-presented new American identities and histories. We will also consider tensions between "sentimental" idealism and political pragmatism, restrictive domesticity and dangerous autonomy, and passionless femininity and expressed sexuality. Authors may include Alcott, Child, Far, Fuller, Harper, Hopkins, Ruiz de Burton Wilson, and Winnemucca.

Prerequisites: soph, second-year fy with permission of instructor

(Fall) Women Writers: Twentieth-Century American Women Writers: Protest and Pleasure - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Gender Studies 204)

In this course we will examine the work of American women writers with an emphasis on the themes of protest and pleasure. Material will range from the overtly political to the intensely personal, will often merge the two, and will date from the late-nineteenth century to today. Despite our long-standing reputation for being "emotional," both outrage and ecstasy have oft been considered taboo for women. Yet women have been motivated by each to pick up the pen and have proved influential as writers on these themes. Authors will range from Emma Goldman, Ida B. Wells, and Kate Chopin to Audre Lorde, Adrienne Rich, and Dorothy Allison.

Prerequisites: soph, jr, sr; English 240, 241, or 270 recommended

ENGL-274-01 - English - 2009-2010
(Fall) Introduction to Asian American Literature
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

This course surveys Asian American literature (Chinese, Japanese, Korean, Filipino, Vietnamese, South Asian) since the late nineteenth century, including fiction, memoir, drama, and poetry. Throughout the course we will evaluate major developments and debates in the field, including feminist critiques of cultural nationalism; the gender politics of genre; and domestic, transnational, and queer critical frameworks. Readings of primary texts will be supplemented by historical and critical source materials. Authors may include Edith Eaton, Louis Chu, John Okada, Theresa Hak Kyung Cha, David Henry Hwang, Jessica Hagedorn, Chang-rae Lee, Jhumpa Lahiri, and Andrew Pham.

ENGL-280-01 - English - 2009-2010
(Fall) Literary Criticism and Theory
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course is designed to offer students a broad historical overview of literary theory as well as exposure to contemporary debates about "theory" and literary representation. The course is both an exercise in practical criticism and a survey of the Western critical tradition from Plato to Derrida. Beginning with the question of why Plato wished to ban poets from his ideal Republic, the course will go on to consider such topics as the Classic vs. Romantic theories of the imagination, the "invention" of psychology and the necessary difficulty of much modern literature, the relation of gender and ethnicity to literary expression, and the uncertainties of literary interpretation.

(Spring) Modern British Urban Novel - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

As London and the British novel enter the new millennium, both are sites of competing histories, traditions, and agendas. This course will map the city's progress from the center of an empire to a node in the global world's economy, and chart the twentieth-century novel's movement from realism to postmodernism and beyond. Beginning by contrasting the realist London of Conan Doyle's Sherlock Holmes with Virginia Woolf's modernist version in Mrs. Dalloway, we will go on to trace the development of the post-1945 British novel.

ENGL-286-01 - English - 2009-2010
(Fall) Sexuality and Women's Writing - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

An examination of how U.S. women writers in the twentieth century represented lesbian, queer, and homoerotic possibilities in prose. Topics to include: literary strategies for encoding sexuality; thematic interdependencies between sexuality and race; historical contexts such as the "inversion" model of homosexuality and the Stonewall rebellion; theoretical issues such as the "heterosexual matrix," the "epistemology of the closet," and tensions between lesbian and queer models of sexuality. Authors studied may include Allison, Brown, Cather, Gomez, Larsen, McCullers, Moraga, Nestle, Pratt, Stein, and Woolson; theorists may include Butler, Lorde, Rich, and Sedgwick.

ENGL-301-01 - English - 2009-2010
(Fall) Studies in Journalism: Digital and Multimedia Journalism
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

The fast-changing landscape of new information technologies, from the Internet to iPods, is redefining the nature and practice of journalism today. We will explore the multimedia platforms available to journalists and learn how to tell stories across these platforms. We will examine the political, sociological, legal, and ethical issues raised by these media technologies and study the impact of the Web on the traditional watchdog role of the press. Students will be asked to write a blog and stories about an event and person. They will also be asked to create a podcast and/or a slide show to be posted online. Rough drafts, rewrites and individual meetings with the professor are required.

Prerequisites: jr, sr, English 202

(Spring) Studies in Journalism: Health and Science Writing
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Community-based learning course; Writing-intensive)
Good medical and science journalism has never been more important in understanding our world and how to fix it. This course is an introduction to the skills needed to cover medical and science news and communicate science to the general public. It will focus on how to report and write daily news stories and longer features. We will also explore controversies in science and ethical issues raised by media coverage of science and medicine. Students will be asked to write a news story, a profile, an issues story and an opinion piece on an important issue in science. Rough drafts, rewrites, and individual meetings with the professor are required.
Prerequisites: jr, sr, equivalent writing course or permission of instructor

ENGL-301-02 - English - 2009-2010
(Fall) Studies in Journalism: Mastering the Narrative
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)
This class is designed to immerse students in some of the most powerful nonfiction being published today. Here we will read extensively to explore the art of telling factual stories with drama, accuracy, imagination, and skill by examining works on topics ranging from business to science to history and politics. Outside the classroom students will be expected to apply these skills to their own writing through a series of assignments culminating in the production of one magazine-length work. Throughout, we will focus on challenges of structure, "voice," and sustaining a narrative. Our goal will be to produce work distinguished by simple, accurate, and compelling prose.

(Spring) Verse Writing II
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)
In this workshop students will generate new poems, working in both free verse and traditional forms. Emphasis will be given to honing elements of craft, to developing one’s "voice," and to the all-important process of revision. Readings will include books by contemporary poets, with workshops devoted to critiquing student work and discussing the poems of established writers.
Prerequisites: jr, sr, 8 credits in department beyond English 101, including 204, or permission of instructor
Notes: meets English department seminar requirement
ENGL-305-01 - English - 2009-2010
(Spring) Writing Literature for Children - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive)
A workshop focusing on writing for children at different age levels. Students will work on a variety of projects in fiction and nonfiction, and experiment with different styles, forms, and approaches. Weekly writing and editing assignments and selected readings of children's literature are required. The course includes guest lectures (which are open to the campus) and field trips.
Prerequisites: jr, sr, 8 credits in department beyond English 101 including either 201 or 204, 265, and permission of instructor. Creative writing sample must be submitted to instructor during advising week.
Notes: meets English department seminar requirement
Instructors: C. Demas

ENGL-306-01 - English - 2009-2010
(Fall) Advanced Poetry Workshop: Exercises in Process and Capture
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Speaking- and writing-intensive)
This course asks students to create poems, focusing on poetic process, rather than poem as product. How to capture the unpredictable? How to put together language, and then to strip it apart? How to remain open and flexible to what comes? In foregrounding these questions, the poets Claudia Rankine, Charles Bernstein, and Eileen Myles understand making poetry as a living process discovered in the realm of conceptual possibility. We will share, discuss, and critique student poems, engaging with one another and with texts by contemporary poets, constructing poems through several experimental exercises that consider the body, obsessions, dream knowledge, visual art, and collaboration.
Prerequisites: jr, sr, 8 credits in department beyond English 101, including English 201 or English 204, or permission of instructor
Instructors: R. Wilson
Expected enrollment: 12

ENGL-308-01 - English - 2009-2010
(Spring) Contemporary Women's Short Fiction
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)
In this course we will read and discuss stories written by living masters of the form. We will not speculate about the meaning of the work or the author's intent, rather we will read as writers, noting and comparing each author's decisions about voice, diction, syntax, image, metaphor, and tone which, within the narrow boundaries of this challenging and compressed form, bring a world into being. Authors will include Margaret Atwood, Alice Munro, Doris Lessing, Sabina Murray, and Jhumpa Lahiri.
Prerequisites: jr, sr, 8 credits in department beyond English 101, or permission of instructor
Notes: meets English department seminar requirement
Instructors: V. Martin
Expected enrollment: 12

ENGL-309-01 - English - 2009-2010
(Spring) Crafting the Novel
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive)
This writing- and speaking-intensive course is designed for students seriously engaged in writing fiction who want to study the craft of novel writing. Weekly writing assignments, discussions, and readings will lead up to each student's submission of the beginning of a novel. Extensive readings are required, as well as extensive critiques of peer work.
Prerequisites: jr, sr, 8 credits in department beyond English 101, including either 201 or 203, and permission of instructor
Notes: meets English department seminar requirement
Instructors: A. Gaige
Expected enrollment: 12

ENGL-310-01 - English - 2009-2010
(Fall) Old English
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Medieval Studies 300)
A study of the language and literature of Anglo-Saxon England (ca. 450-1066 AD) in a series of graduated grammar lessons and readings of Old English poetry and prose. These will include selections from the Bible, the Venerable Bede, the Anglo-Saxon Chronicle, "The Wanderer," "The Dream of the Rood," "The Wife's Lament," and the Exeter Book riddles. We will also learn the 31-character Old English futhorc as it was preserved in "The Rune
Poem” and used to inscribe verses on the Franks Casket and the Ruthwell Cross. Requirements: daily written and oral review of grammar, oral reading and translation in class, and a final translation project.
Notes: meets English department pre-1700 requirement
Instructors: C. Davis
Expected enrollment: 15

ENGL-311-01 - English - 2009-2010
(Spring) Chaucer: The Canterbury Tales
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive)
A seminar exploring the ways The Canterbury Tales reflects the different faces of Chaucer’s poetic career: the classicist, the modern poet, and the philosopher. Thinking not only about Chaucer’s literary development, we’ll also consider his work vis-à-vis the larger climate of late-medieval poetic practice. Readings will be in Middle English, comprised of a selection from the Tales and other primary works by figures such as Virgil, Augustine, Boethius, Macrobius, Dante, Boccaccio, Ockham, and Petrarch. Course requirements include a formal presentation, mid-term paper, and final research paper.
Prerequisites: jr, sr, English 200 and English 213, or permission of instructor
Notes: meets English department pre-1700 requirement; meets English department seminar requirement
Instructors: W. Yu
Expected enrollment: 15

ENGL-311-02 - English - 2009-2010
(Spring) Chaucer: Troilus and Criseyde: Loving Criseyde, Losing Criseyde - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Gender Studies 333s-04)
This course will read Chaucer’s great love story Troilus and Criseyde, an exploration of love, compulsion, and betrayal, within the multiple intellectual contexts that framed the narrative for a late medieval audience: close attention to issues of free will, women’s agency, the story of Troy in medieval literature, love as obsession, chivalry and war, construction of medieval authorship. We will also explore Chaucer’s poetic achievement in this poem long recognized as his master work.
Prerequisites: soph, jr, sr, 8 credits in English or medieval studies
Notes: meets English department pre-1700 requirement
Instructors: C. Collette
Expected enrollment: 20

ENGL-312-01 - English - 2009-2010
(Fall) Shakespeare: The "Problem Plays"
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Theatre Arts 350-01)
This course explores plays in Shakespeare’s canon that seem to defy conventional classifications. How do we make sense of “comedies” that end in violence or oppression? How does our system of classifying plays oversimplify Shakespeare’s experiments with genre? We will take a new look at what makes Shakespeare’s plays innovative, and develop an in-depth understanding of their dramatic forms. Readings include some of Shakespeare’s most well-known plays, such as The Merchant of Venice, Measure for Measure, All’s Well That Ends Well, as well as some of his least known, such as The Two Noble Kinsmen. We will also read one or two non-Shakespearean plays for context and comparison.
Prerequisites: jr, sr, 8 credits in department beyond English 101, including English 211 or permission of instructor
Notes: meets English department pre-1700 requirement; meets English department seminar requirement
Instructors: J. Degenhardt
Expected enrollment: 15

ENGL-312-02 - English - 2009-2010
(Fall) Shakespeare: Shakespeare, the Theatre, and the Book - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
In his own time, Shakespeare's writings had life both onstage and in print. This seminar invites students to locate the works we study in relation to the early modern theater and to the history of the book, especially the development of a reading audience for popular art. Readings include such works as *Romeo and Juliet*, the sonnets, *Troilus and Cressida*, and *King Lear*. We will also explore current critical debates about gender, sexuality, and literary genre. Substantial opportunity will be provided for independent work reflecting each student's own interests.

Prerequisites: 8 credits in department beyond English 101 or permission of instructor; English 210 or 211 recommended

Notes: meets English department pre-1700 requirement; meets English department seminar requirement

Instructors: P. Berek

*(Fall)* Topics in Late Medieval Literature: The Matter of Britain: Arthur and the Grail

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking- and writing-intensive; Medieval Studies 300)

This course focuses on the various forms the story of the grail takes in legends of King Arthur from the twelfth to the twentieth centuries in the literature of England, France, and Europe. While centered in medieval English versions of the Arthurian myth, the course considers the political and cultural forces that helped shape the grail legend after the fall of Jerusalem in 1187, over the course of the later Middle Ages, and into the nineteenth century. Reading from Malory, Tennyson, and contemporary fiction as well as chronicles and romances. We will conclude with current interest in the Holy Grail in popular culture.

Prerequisites: jr, sr, Medieval Studies 101, or 8 credits in English or Medieval Studies or permission of instructor

Notes: meets English department pre-1700 requirement; meets English department seminar requirement

Instructors: C. Collette

*(Spring)* Topics in Late Medieval Literature: Texts and Contexts: Reading the Medieval World, 1350-1530 - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking- and writing-intensive; History 351s-01, Medieval Studies 300s-01)

This course explores cultural and social transformations (especially in England) on the eve of "modernity." Class discussions will ordinarily focus on selections from major English writers of the period (Chaucer, Gower, and Malory, for example), and on the relationship between their writings and other kinds of evidence about the world in which they wrote. In consultation with instructors and colleagues, students will also be expected individually to locate, analyze, and interpret a collection of primary sources such as court records, chronicles, and correspondence from a culture of their choosing in order to write a final essay on one dimension of the late medieval world.

Prerequisites: jr, sr, background in medieval history or literature; written application prior to academic advising period

*(Fall)* Studies in Renaissance Literature: Renaissance Theater and the Early Modern Book

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
The commercial theater of Shakespeare and his contemporaries evolved as a popular art as the emerging market for printed books began to create a popular literature. Theaters, acting companies, plays, and theatrical audiences helped shape one another, as the book trade shaped and was shaped by reading publics. Case studies in plays by such writers as Christopher Marlowe, Thomas Dekker, Ben Jonson, Thomas Middleton, Elizabeth Cary, and John Webster; sustained attention to acting companies, performance practices such as cross-dressing, gender roles, and sexuality. Substantial opportunity for independent work reflecting each student's interests.

ENGL-320-01 - English - 2009-2010

(Spring) Jane Austen: Fiction and Film

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Film Studies 380)

A study of Austen's six novels through the lenses of Regency culture and of twentieth-century filmmakers. How do these modest volumes reflect and speak to England at the end of world war, on the troubled verge of Pax Britannica? What do the recent films say to and about Anglo-American culture at the millennium? What visions of women's lives, romance, and English society are constructed through the prose and the cinema?

Prerequisites: jr, sr, 8 credits in English/Film studies beyond 101; prior work in eighteenth- to nineteenth-century literature, history, or film recommended; students should have read at least two Austen novels

Notes: 1 meeting (3 hours) plus screenings; meets English department 1700-1900 requirement; meets English department seminar requirement

(Spring) Studies in Nineteenth-Century British Literature: Victorian Sympathy

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking- and writing-intensive)

In the Victorian novel Middlemarch, one character explains, "To have in general but little feeling seems to be the only security against feeling too much on any one occasion." This course will examine Victorian ideas of feeling and sympathy in prose, novels, poetry, and art. These representations will frame a discussion of Victorian concerns with social and individual responsibility, class identity, and gender, and will also be considered in the historical context of eighteenth and early twentieth-century epistemology, aesthetics, and literary forms. Writers will include: Meredith, G. Eliot, Forster, Wollstonecraft, Mill, Ruskin, Carlyle, Tennyson, E.B. Browning, Rossetti, Hopkins.

Prerequisites: jr, sr, or permission of instructor

Notes: meets English department 1700-1900 requirement; meets English department seminar requirement

ENGL-323-01 - English - 2009-2010

(Fall) Gender and Class in the Victorian Novel

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Gender Studies 333)

This course will investigate how representations of gender and class serve as a structuring principle in the development of the genre of the Victorian novel in Britain. We will devote significant attention to the construction of Victorian femininity and masculinity in relation to class identity, marriage as a sexual contract, and the gendering of labor, all the while keeping our eye on form and the sometimes mysterious narrator-as-consciousness that guides us through these concerns. Novelists will include Dickens, Eliot, Gaskell, C. Bronte, and Hardy. Supplementary readings in literary criticism and theory.

Prerequisites: jr, sr, 8 credits in department including English 220, 230, 236, or permission of instructor

Notes: meets English department 1700-1900 requirement

(Fall) Victorian Literature and Visual Culture - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course will examine literary texts that represent new forms of visuality in nineteenth-century Britain as well as examples of visual culture that provide a framework for reading Victorian culture in innovative ways. We will study nineteenth-century photography—portraiture, prison photography, imperial photographs, and private and popular erotic images—as well as novels and autobiographical writing that engage with new photographic technology and its transformation of the ways in which Victorians understood identity, politics, aesthetics, and representation. The course will take a similar approach to painting, literary illustration, political cartoons and caricature, and advertising.
Prerequisites: English 220 or English 323 and at least 4 credits in art history or film studies, or permission of instructor
Notes: meets English department 1700-1900 requirement; meets English department seminar requirement

(Spring) Romantic Epistemologies
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
In this seminar, we will examine Romantic poetry's unique contemplation of the problems of perception, cognition, and epistemology. We will investigate how male and female writers explored various theories of knowledge through their play with the figures of the idiot or savage, drug culture, and new technologies surrounding the Gothic genre and the virtual imagination. Authors including Wordsworth, Robinson, Coleridge, DeQuincey, and Keats will be read alongside philosophers such as Edmund Burke, Immanuel Kant, scientists John Galt and J. G. Spurzheim, and accounts of precinematic entertainment such as the magic lantern and the phantasmagoria.

ENGL-334-01 - English - 2009-2010
(Spring) Queer Kinship in Asian North American Literature and Film
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(American Studies 301, Gender Studies 333)
This course examines alternative kinship formations in Asian North American cultural production. It will focus on the gender and sexual management of racial bodies since the nineteenth century, from the U.S. Page Law of 1875 that restricted Chinese women on the basis of their presumed sexual immorality to various forms of "racial castration" that mediate Asian masculinities. We will consider how alternative kinship arrangements and queer cultural projects expose and/or upset the narrative assumptions embedded in heteronormative scripts of national belonging.
Prerequisites: jr, sr, 8 credits in department beyond English 101, or permission of instructor. Preference will be given to students who have taken English 274, Introduction to Asian American literature
Notes: meets English department seminar requirement

ENGL-336-01 - English - 2009-2010
@Spring) The Curious Middle Ages - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive; Medieval Studies 300s-02)
Medieval curiosity, both a spiritual danger and a vehicle of knowledge, expresses a conflict that helps us mark change in the period’s intellectual traditions. We'll consider curiosity’s enabling of developments in historiography, cosmology, cartography, optics, and architecture to help us explore various literary genres. Through allegory, travel and religious narrative, romance, fabliau, and dream vision, we'll inquire into the intellectual functions that literature performs, asking how literary curiosity may have been both an approach toward and opponent of scientific truth. Middle English works will be read in Middle English; however, no prior knowledge of Middle English is necessary.
Prerequisites: jr, sr, or permission of instructor
Notes: meets English department seminar requirement
Instructors: W. Yu

ENGL-340-01 - English - 2009-2010
(Fall) Theories of the Lyric - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course will focus on how to read lyric poetry and to think about reading lyric poetry. We will be particularly interested in considering Adorno’s post-1945 argument that this seemingly most individual and unsocial literary practice is in fact the most collective and social of forms. The three poets we will use as case studies are Geoffrey Hill, Sylvia Plath, and Seamus Heaney.
Prerequisites: jr, sr, or permission of instructor; meets English department seminar requirement
Instructors: N. Alderman

(Fall) Modern Urban British Novel
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
As London and the British novel enter the new millennium, both are sites of competing histories, traditions, and agendas. This course will map the city's progress from the center of an empire to a node in the global world's economy, and chart the twentieth-century novel's movement from realism to postmodernism and beyond. Beginning by contrasting the realist London of Conan Doyle's Sherlock Holmes with Virginia Woolf's modernist version in Mrs. Dalloway, we will go on to trace the development of the post-1945 British novel.
Prerequisites: jr, sr, or permission of instructor
Notes: meets English department seminar requirement

(Spring) Studies in African American Literature: Slavery and the Literary Imagination
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Speaking- and writing-intensive; American Studies 301)
In this course we will study American works that focus on enslavement in America and the ways in which historical fact and literary conventions inform representations of enslaved and self-emancipated people, as well as enslavers, abolitionists, and free people of color. In what ways do race, class, region, and history influence portrayals of slavery? How do conventions of the slave narrative and sentimental novel affect the representation of slavery and freedom? Authors may include Octavia Butler, Charles Chesnutt, Frederick Douglass, William Lloyd Garrison, Lawrence Hill, and Harriet Beecher Stowe.
Prerequisites: jr, sr, 8 credits in department beyond 101, including at least one of the following: English 240, 241, 250, or permission of instructor
Notes: meets English department 1700-1900 requirement; meets English department seminar requirement
Instructors: L. Brown
Expected enrollment: 15

ENGL-353-01 - English - 2009-2010
(Fall) Readings in Literary Biography - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Biography is both a literary genre and a mode of literary scholarship. This course will explore some varieties of the biographical impulse in both fiction and non-fiction. We will begin with eighteenth-century British models: Samuel Johnson's *Lives of the English Poets* and James Boswell's *Life of Johnson*. Then we will turn to ideas of biography and literary portraiture in the work of Henry James and Gertrude Stein. We will explore the shift associated with the advent of Freud and the Bloomsbury innovations of Lytton Strachey and Virginia Woolf, and close with attention to recent experiments in biography by writers such as Janet Malcolm, Rachel Cohen, and Richard Holmes.
Prerequisites: jr, sr, 8 credits in department beyond English 101, or permission of instructor
Notes: meets English department seminar requirement
Instructors: C. Benfey
Expected enrollment: 15

ENGL-360-01 - English - 2009-2010
(Spring) Readings in Contemporary Fiction - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A study of post-World War II traditional and experimental fictions. The reading list will be regularly revised but will be selected from the work of novelists such as John Fowles, Graham Swift, Joan Didion, John Berger, Nadine Gordimer, Peter Carey, Salman Rushdie, Arundhati Roy, David Mitchell, and Margaret Atwood.
Prerequisites: jr, sr, 8 credits in department beyond English 101, including English 200 or English 280, or permission of instructor; previous courses in the novel highly recommended
Instructors: W. Quillian
Expected enrollment: 20
ENGL-364-01 - English - 2009-2010
(Fall) Cultural Studies: Theories and Practices - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
In this course we will read some of the central texts emerging from the field of cultural studies. In their research projects, students will have the opportunity to put into practice both ethnographic and semiotic approaches to cultural phenomena. Assigned readings will include work by Raymond Williams, Constance Penley on Star Trek fanzines, Kathy Acker on bodybuilding, Anna Deavere Smith, Roland Barthes, and Stuart Hall. Can we "read" the world like a text? Why should we? What changes when we open up our field of inquiry in this way?
Prerequisites: jr, sr, 8 credits in department beyond English 101
Notes: meets English department seminar requirement
Instructors: S. Davis

ENGL-368-01 - English - 2009-2010
(Fall) Literature of the Jazz Age
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(American Studies 301)
This course will examine how a number of American writers responded to the many cultural impulses associated with the term Jazz Age. We will discuss various forms of American modernism in fiction and poetry, and some of the critical responses to them. We will also discover the relationship of the writing to jazz music and to the literature of the "lost generation." Authors may include William Faulkner, Ernest Hemingway, F. Scott Fitzgerald, Edmund Wilson, Anita Loos, Claude McKay and John Dos Passos.
Prerequisites: jr, sr, or permission of instructor
Notes: meets English department seminar requirement
Instructors: G. Pemberton
Expected enrollment: 15

ENGL-369-01 - English - 2009-2010
(Spring) American Fiction: Lost and Found
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course will examine a number of great literary works that are read infrequently, or not at all these days, by authors whose other work is known and by those whose names are not familiar to us. We will study these texts with an eye to their quality and significance, the literary, political and social contexts of their publications, and their relationships to other literature. Authors will include Herman Melville, Harold Frederic, Mark Twain, Henry Roth, Flannery O'Connor, Nelson Algren.
Prerequisites: jr, sr, English 241, or other course in nineteenth- or twentieth- century American Literature
Instructors: G. Pemberton
Expected enrollment: 15

ENGL-372-01 - English - 2009-2010
(Spring) Gender and War
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Gender Studies 333)
This seminar will focus on depictions of war in the context of gender. When asked how we might prevent war, Virginia Woolf suggested that we must invent new language and methods rather than follow the path of the traditional "procession of educated men." What language emerges in works about the effects of war? Texts will include essays and films as well as selected works by writers such as Alcott, Whitman, Crane, Twain, Hemingway, Woolf, Silko, Morrison, and O'Brien.
Prerequisites: jr or sr; 8 credits beyond the 100 level in English or Gender Studies or permission of instructor
Notes: meets English department seminar requirement
Instructors: L. Glasser
Expected enrollment: 15

ENGL-374-01 - English - 2009-2010
(Spring) Hitchcock and After - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Gender Studies 333s-02, Film Studies 380s-01)
This course will examine the films of Alfred Hitchcock and the afterlife of Hitchcock in contemporary U.S. culture. We will interpret Hitchcock films in a variety of theoretical frames, including feminist and queer theories, and in historical contexts including the Cold War. We will also devote substantial attention to the legacy of Hitchcock in remakes, imitations, and parodies. Hitchcock films may include Spellbound, Strangers on a Train, Rear Window, Vertigo, North by Northwest, Psycho, The Man Who Knew Too Much, and The Birds; additional works by Brooks, Craven, De Palma, and Sherman. Readings in film and cultural theory; screenings at least weekly.
Prerequisites: jr, sr, at least 4 credits in film studies, and at least 4 credits in English beyond 101, or permission of instructor
Notes: 1 meeting (3 hours); plus weekly screening; meets English Department seminar requirement
Instructors: E. Young
Expected enrollment: 18
ENGL-375-01 - English - 2009-2010
(Spring) Black Texts, Black Experiments: Contemporary African American Poetics
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
In this seminar, we will look to contemporary African American works that deploy the "experimental" under the signs of poetry, fiction, art, and journal. We will explore the cross-genre (e.g., poem/picture, theory/play, memoir/film) as we address issues of race, gender, and sexuality in a number of current works. Authors and artists include Claudia Rankine, Tisa Bryant, Dawn Lundy Martin, Renee Gladman, John Keene, Christopher Stackhouse, Samuel Delaney, Kara Walker, Laylah Ali, and Wanda Coleman. Students will be asked to dissect several experimental texts through close reading, analysis, and discussion, building upon their findings in a number of critical and creative writing projects.
Prerequisites: jr, sr, or permission of instructor
Notes: meets English department seminar requirement
Instructors: R. Wilson
Expected enrollment: 15

ENGL-381-01 - English - 2009-2010
(Spring) Asian American Literature in a Transnational Age - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
This seminar examines the distinct critical genealogies within Asian Canadian and Asian American literary and cultural studies over the last three decades, probing their evolving objectives and their intellectual futures. Throughout the course, we will examine the major shifts and intersections in these fields, focusing in particular on: androcentric cultural nationalism; feminist and queer interventions; historical materialist, psychoanalytic, postcolonial, and deconstructive theoretical approaches; and domestic and transnational critical formations.
Prerequisites: jr, sr, 8 credits in department beyond English 101, or permission of instructor
Notes: meets English department seminar requirement
Instructors: I. Day
Expected enrollment: 15

ENGL-382-01 - English - 2009-2010
(Fall) Topics in Postcolonial Studies: Literature and Statelessness
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
For Hegel, literature and the state go hand-in-hand: the state's need to record is what first calls writing forth. Now in a global order of states only fitfully accountable to their residents, social protest takes place in the name of undocumented immigrants, in France called the sans papiers: those "without papers," whose supposedly universal human rights no state anywhere on the globe acknowledges and who may increasingly serve as figures for us all. This course studies fiction and philosophy that are sans papiers, opposed in their very form to official inscription--a refugee writing that dwells in the condition of statelessness and hence aims to be truly postcolonial.
Prerequisites: jr, sr, or permission of instructor

Instructors: S. Ahmed
Expected enrollment: 15

ENGL-385-01 - English - 2009-2010
(Spring) Feminist Theory and Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive; Film Studies 390, Gender Studies 333)
Preamble (for topics courses): You must apply for admission to this course by completing the <a href=https://snuprl.com/courserequestform>application</a>.
This seminar investigates contemporary feminist theory--including but not limited to feminist film theory--in relation to film. We will examine the influential formulations of the cinematic "male gaze" and woman's film, recent theorizations of race and sexuality in cinema, gender complexities in classic and contemporary Hollywood film, and new trends in film-making by women. Requirements include extensive readings, weekly essays, and film screenings.
Prerequisites: jr, sr, 8 credits in English and/or Gender Studies beyond the 100 level, and permission of instructor; Film Studies 201 and/or other background in film strongly recommended.
Notes: 1 meeting (3 hours) plus evening screening; meets English department seminar requirement; meets Gender Studies department feminist theory requirement
Instructors: E. Young
Expected enrollment: 15

ENGL-386-01 - English - 2009-2010
(Spring) George Eliot, Virginia Woolf, and Doris Lessing - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This seminar will focus on major works of fiction by each of these three writers and will be particularly concerned with their response to the social and cultural worlds around them. Considering each as a major voice for the concerns of women of her time, the course will examine their critical and theoretical prose as well as their fiction.
ENGL-387-01 - English - 2009-2010
(Fall) Re-imagining Los Angeles: Multiethnic Fictions of Tomorrowland - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(American Studies 301F-01)
In Ridley Scott's 1982 science fiction film, *Blade Runner*, Los Angeles is a beleaguered metropolis overrun by immigrant "borders" and menacing replicants, presenting a dystopic forecast of multiculturalism. By surveying major genres in relation to the racialized and gendered contexts of migration, labor, and urban redevelopment, this course focuses on alternative constructions of Los Angeles in African American, Asian American, and Chicana/o short stories, novels, and film. Works will include *Southland*, *Tropic of Orange*, *Twilight Los Angeles 1992*, *Their Dogs Came with Them*, *Devil in a Blue Dress*, *We Should Never Meet*, and *Kindred*.
Prerequisites: jr, sr, or permission of instructor
Notes: meets English department seminar requirement
Instructors: W. Quillian

ENGL-388-01 - English - 2009-2010
(Fall) The City in American Fiction - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
The rise of city life in the United States in the nineteenth century gave rise to a literature of the city. This was sometimes a utopian vision, as in John Winthrop's charge to new arrived Puritans to "build a city upon a hill." Writers created visions of the city as welcoming, benign or sometimes malignant--with the city often functioning as a character itself within a narrative. We will examine the rich history of the city in American literature from the nineteenth century to the present.
Prerequisites: jr, sr, or permission of instructor
Notes: meets English department seminar requirement
Instructors: G. Pemberton
Expected enrollment: 15

ENGL-389-01 - English - 2009-2010
(Spring) American Memoir - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course examines the ways that authors have written autobiographically from the seventeenth century to the present. For the Puritans, writing a journal was a means of gauging their faith, noting their failures, examining in detail their everyday lives. For enslaved African Americans, the memoir became a site of protest against slavery and injustice as well as an example of hope for the disheartened. The memoir has flourished throughout American literary history, especially in the last 20 years. We will examine the memoir, asking questions about form, content, and why the genre has flourished.
Prerequisites: jr, sr, or permission of instructor
Notes: meets English department seminar requirement
Instructors: G. Pemberton
Expected enrollment: 15

ENGL-391-01 - English - 2009-2010
(Spring) The Idea of World Literature
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
The idea of a world literature speaks to our deepest cosmopolitan desires, to inhabit a space no longer fragmented by political divisions. Its roots reach back to eighteenth-century Britain, when non-European works began to enter European studies. The idea of a world literature originated, then, at the same time that European states consolidated their world rule. Studying eighteenth-century figures (e.g., Dryden Pope, Voltaire, Goethe), translations from Indian and Arabic sources (e.g., *The Thousand and One Nights*), and subsequent theory (Auerbach, Said, Moretti, Damrosch, Casanova), we will consider how comparative literary study reads the different worlds hidden within our apparently-one world.

Environmental Studies

ENVST-100-01 - Environmental Studies - 2009-2010
(Spring) Introduction to Environmental Studies
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course uses lectures, films, discussions, and field trips to introduce students to the complexity of selected environmental problems. In addition to fostering understanding of their origins, the course focuses on potential solutions using basic ecological, economic, political, and cultural concepts.
Instructors: S. McCandless, L. Savoy
Expected enrollment: 60

ENVST-200-01 - Environmental Studies - 2009-2010
(Fall) Environmental Science
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Most of our society's environmental problems are complex and interdisciplinary in nature. Environmental science is a course designed to teach integrative thinking, the "scientific method," and problem solving. Lectures will be drawn from a variety of scientific fields including ecology, hydrology, chemistry, geology, and biology with an emphasis on ecosystems and biogeochemical cycles. The course will use case studies of regional environmental problems, practical hands-on problem solving, and landscape analysis. Training in field and laboratory techniques is an integral part of the course. Priority given to environmental studies majors.
Prerequisites: One 100-level lab science; one course in statistics is recommended.
Instructors: B. Hooker
Expected enrollment: 24

ENVST-204-01 - Environmental Studies - 2009-2010
(Spring) Human Dimensions of Environmental Change - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Using case studies from Africa, Asia, North and South America, and Europe, this course examines the interactions between human institutions (such as political and economic structures, science and technology, class and gender systems, and cultures) and the environmental/earth systems that provide their contexts and have been impacted by them. The course will provide a forum to analyze the environmental consequences of a variety of land-use systems, resource use, and development projects and explore possible alternative strategies of human-environment relations that could create a balance between human needs and environmental constraints.
Instructors: G. Kebbede
Expected enrollment: 30

ENVST-210-01 - Environmental Studies - 2009-2010
(Fall) Political Ecology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course examines factors that help shape human-environment interactions across scales from the personal to the global. It probes the influence of institutions on changing environments by examining how people organize to gain access and control over resources. Case studies from the global south and north critically examine the role of gender, race, class, and power in these struggles, and highlight the on-the-ground consequences of competing ideas of conservation, development, and the commons, by profiling the contentious work that determines who can persist in place in a globalizing world.
Instructors: S. McCandless
Expected enrollment: 30

ENVST-240-01 - Environmental Studies - 2009-2010
(Fall) The Value of Nature
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Through this seminar, students develop an in-depth knowledge of and articulate vocabulary for the significant and diverse ways that humans value the natural world – utilitarian, scientific, aesthetic, naturalistic, symbolic, ethical, and spiritual. We use these different typologies of human environmental values as frameworks for readings and discussion, extending our examination to historical and cultural variations in values, competing perspectives of the natural world, and other value concepts, including intrinsic and transformative value. We examine the concept of biophilia and probe the role values play in the concern over losses of biological diversity and its implications.

Prerequisites: Environmental Studies 100
Instructors: T. Farnham
Expected enrollment: 15

**ENVST-241-01 - Environmental Studies - 2009-2010**

(Spring) Environmental Issues

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

In this course, we will explore the different facets of numerous environmental policy issues and review the substantive aspects, legal themes, and regulatory structure of the major federal environmental laws. The laws covered in this course include the National Environmental Policy Act, the Clean Air Act, the Clean Water Act, the Endangered Species Act, and others. The course objectives are for the student to learn the basic regulatory characteristics of the major laws and to become well-versed in the current environmental issues which we focus upon throughout the semester, such as global climate change, ocean degradation, energy resources, and biodiversity loss.

Prerequisites: Environmental Studies 100
Instructors: T. Farnham
Expected enrollment: 15

(Fall) Reading and Writing in the World

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement (Writing-intensive; English 267, American Studies 290-04)

An introduction to reading and writing about nature, this seminar will attempt an exchange across distinct approaches to observing and describing the world around us. Do lenses of culture, discipline, and gender determine how we see and experience nature, environment, and place? Course work will include reading such authors as N. Scott Momaday, Henry David Thoreau, bell hooks, Leslie Marmon Silko, Mary Oliver, and Annie Dillard; field trips; and writing assignments–weekly field notes and journals, analytical papers, and personal essays.

Prerequisites: permission of instructor
Instructors: L. Savoy, J. Lemly
Expected enrollment: 20

(Spring) Perspectives on American Environmental History - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement (Speaking- and writing-intensive)

Explores the history of human-environment interactions in North America from precolonial times to the present from different cultural perspectives. How have such human activities as migration, colonization, and resource use depended on or modified the natural world? How have different cultural perceptions of and attitudes toward environment shifted through time and helped to reshape American landscapes? Case studies include ecological histories of Native America and Euro-America, slavery and land use, wilderness and conservation, and environmental racism and social justice. Our approach entails historical review of scientific studies, literature, visual records, and oral tradition.

Prerequisites: permission of instructor
Notes: 1 meeting (3 hours) and optional fourth hour
Instructors: L. Savoy
Expected enrollment: 15
ENVST-321-01 - Environmental Studies - 2009-2010
(Fall) Conference Courses in Environmental Studies: Landscape, Livelihood, and Migration
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This seminar examines the interplay between human livelihood and regional landscapes, with a focus on how migration and remittances reshape place, worldwide. We will consider how struggles over identity, the meaning of landscapes, and the role of property relations and other institutions affect ecosystems and communities in place.
Prerequisites: permission of instructor
Instructors: S. McCandless
Expected enrollment: 15

ENVST-321-01 - Environmental Studies - 2009-2010
(Spring) Conference Courses in Environmental Studies: Sustainable Agriculture and Agroecosystems
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This interdisciplinary science course examines agricultural ecosystems through the study of nutrient cycling, soil processes, hydrology, and plant ecology. The course focuses on reading the primary scientific literature regarding issues of nutrient management, environmental impacts of agricultural practices on adjacent ecosystems, and contributions of agricultural systems to global climate change. Conventional, low-input, and organic agricultural practices are analyzed from the standpoint of environmental impacts. Field trips explore the application of agronomic practices in organic and low-input production systems, with an emphasis on local approaches to sustainable agriculture.
Prerequisites: at least 8 credits of biology, chemistry, or environmental science, or permission of instructor
Instructors: B. Hooker
Expected enrollment: 15

ENVST-321-02 - Environmental Studies - 2009-2010
(Spring) Conference Courses in Environmental Studies: Environmental Racism, Environmental Justice
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This seminar addresses the tools, strategies, and lenses on environment developed by environmental justice scholarship and activism. These include an analysis of how race, class, gender, and human bodies intersect the distribution of environmental "goods" and "bads." We will also consider the relationship of environmental justice to other environmental movements.
Prerequisites: permission of instructor
Instructors: S. McCandless
Expected enrollment: 15

(Spring) Photography and Landscape: Earth As Visual Text - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Our understanding of the world around us is deeply influenced by the visual images created in response to human experience of nature. This course explores photography as a way of seeing and interpreting landscape and environment through time. Projects allow students to examine visual elements of landscape, develop photographic techniques, and create photo-narratives of their own. Using readings, observations, and photographs we consider how cultural and environmental issues and insights are communicated through photographic media. Basic understanding of photography and access to a camera are required.
Prerequisites: Art (Studio) 200 or permission of instructor
Instructors: L. Savoy
Expected enrollment: 15

ENVST-333-01 - Environmental Studies - 2009-2010
(Spring) Landscape and Narrative
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive)
Different stories or narratives--whether myth, literature, maps, or scientific theory--have been created about every region or environment on Earth as human attempts to describe and understand our connections with that place. How do braided strands of human history and natural history contribute to stories we tell of the land, and to stories we tell of ourselves in the land and of relational identity? In this reading and writing seminar we will reflect on how lifeways, homeplace, and identity of an individual or a community are linked with environment or the land. We will also create written and visual narratives of our own and explore creative environmental writing in reflection and action.
Prerequisites: jr., sr., permission of instructor
Instructors: L. Savoy
Expected enrollment: 15

ENVST-344-01 - Environmental Studies - 2009-2010
(Spring) Biogeochemistry of Northern Ecosystems
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking- and writing-intensive)
Global climate models and recent evidence show that ecosystems in the northern latitudes are extremely sensitive to climate change. This interdisciplinary science course examines boreal, subarctic, and arctic ecosystems through the study of nutrient cycling, plant ecology, hydrology, soil processes, and biosphere-atmosphere interactions. Topics include fundamentals of biogeochemical cycling of major elements such as carbon and nitrogen at scales from the microscopic to global, sensitivity and feedbacks to climate change, and disturbance processes such as fire and permafrost degradation.

Prerequisites: at least 8 credits of 200-level lab science and permission of the instructor. Global Biogeochemistry (Chem 232) recommended.

**(Fall) Senior Seminar in Environmental Studies**
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Community-based learning course)
This is the capstone course of the environmental studies major. The course explores linkages among the diversity of disciplines that contribute to the environmental studies major, illustrates how these disciplines that contribute to the environmental studies major are used in environmental decision making, enables students to inform one another's roles as environmentalists, and provides students with opportunities to develop individual and cooperative projects.
Prerequisites: major
Instructors: L. Savoy

**(Spring) European Studies Seminar: Global Europe?: Immigration and Representations of Im/migrants in**
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Speaking- and writing-intensive; Taught in English; German Studies 315)
The course focuses on key issues facing contemporary Europe as it attempts to integrate large im/migrant populations: such legal issues as the development of asylum, immigration, citizenship, and antidiscrimination/lute laws and such cultural issues as the meanings of integration vs. assimilation; multicultural vs. pluralistic societies; the roles of Christianity, Judaism, and Islam in the construction of European societies and cultural identities; perceptions of (Post-)Colonialism and the interceptions of gender, race, class, and nationality; and the (dis)integrative role of language. Focus on the emergence of European Union rules vs. representative national policies in Germany, France, and Great Britain.
Prerequisites: jr, sr; at least one course at the 200 or 300 level relevant to European studies or permission of instructor
Notes: NOTE: majors/minors in the department should simultaneously enroll in both European Studies 316 and German Studies 232 (01) to receive major/minor credit. Language requirement met only if seminar is taken in conjunction with 2-cr. Tutorial, GRMST-232 (01)

(Fall) The New Face/s of Germany: Contemporary German Society in Film and Text
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
First-year seminar (Writing-intensive; Taught in English; German Studies 100-01)
Germany today, 20 years past the fall of the Berlin Wall: cities where much of the population was not born in Germany; 160,000 Turks and fourth-generation Germans of African descent living in Berlin; public schools offering Islamic religious instruction; more Russian Jews emigrating to Germany than to Israel; immigrants of German citizenship who do not know German; East Germans longing for the return of the Wall. Recent German film has represented these diverse faces of Germany, often through comedy. Focus on close analysis of several films, their sociohistorical, economic, and cultural contexts. Films include: Lives of Others, Journey of Hope, Ali-Fear Eats the Soul, All for Sugar.
Notes: See GRMST-100-01

Expected enrollment: 16

**FLMST-201-01** - Film Studies - 2009-2010
(Fall) Introduction to Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course teaches the basic concepts and critical skills involved in interpreting film. Through lecture, reading, discussion, and screening of films both in and outside of class, the student will become a more informed and sophisticated observer of the cinema. During the first half of the semester, the class will study form and style in narrative film as well as in nonnarrative practices such as avant-garde and documentary filmmaking. For the remainder of the course, the class will examine some of the major critical approaches in the field.
Notes: 2 meetings (75 minutes), 1 screening (2 1/2 hours)

(Spring) Talking Pictures: An Introduction to Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Art History 202)
Some of the best feature-length films of the past century have commanded our attention because of their compelling artistry and the imaginative ways they tell stories visually and verbally. This course closely studies narrative films from around the world, from the silent era to the present, and in the process it introduces students to the basic elements of film form, style, and narration. Some of the films to be considered are: Broken Blossoms, Battleship Potemkin, Citizen Kane, Contempt, The Bicycle Thief, Ugetsu, Rear Window, Woman in the Dunes, The Marriage of Maria Braun, Days of Heaven, and Moulin Rouge.
Notes: 2 meetings, (1 75 minute and 1 2-hour screening)

(Fall) Production Seminar in the Moving Image: View from Elsewhere: Beginning Video Production
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This media production course will investigate experiences and representations around immigration and exile. In an effort to look at this subject from inside and out, we will look at historical and contemporary examples of work both about and by exiles and immigrants. A departure also involves complex ideas of home. How is home represented by those who have left it? Is the idea of home idealized or demonized, or both? How is the new
landscape translated or assimilated? How does technology change our sense of place and connection? In this course we seek to unpack complex experiences of displacement through production work in digital video, screenings, and readings.

Prerequisites: Course registration by instructor permission only. Application available through FS website.

Notes: 1 meeting (3 hours), 1 screening (2 hours); a lab fee may be charged

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Music 220)

For all who stay to the end of the credits, purchase soundtracks, and argue over who should have won the Oscar for Best Score, along with anyone else interested in the undervalued importance of music to the general effect of a motion picture, this course will explore and discuss the myriad ways in which these two media interact. The course will focus on classic scores by Herrmann, Morricone, and Williams, as well as the uses of existing music in films of Bergman and Kubrick.

(Spring) Special Topics in Film Studies: Costume Design in Film

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Theatre Arts 220)

This course looks at the work of Hollywood and international film costume designers. We will talk about costume design as a series of deliberate choices -- choices about style, about character, about context -- by which the costume designer interprets the director's vision of the world of the film using the vocabulary of clothing. We will follow a costume history timeline, using select films as examples, and look at period research and how it has been interpreted and realized for the screen.

(Spring) History of World Cinema
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course offers an historical survey of the cinema as a developing art form and a means of communication. We will consider the national, economic, and social conditions of an international medium that has existed for over a century. The national and thematic focus of the course shifts through the semester. For example, we will focus on U.S. film in studying the earliest developments in film technology and narrative, Soviet and French films to study the formal and social experimentation of the 1920s, and films made in Cuba and Brazil to elucidate political filmmaking in the 1960s. The course provides a background for understanding film history and pursuing further studies in the field.

(Fall) Film Genre: Film Genre and Gender - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to a specific film genre. Some examples of genres that might be studied are: the science fiction, horror, melodrama, musical, Western, detective, or gangster film.
This course examines the development of Hollywood film genres largely in the post-studio era, particularly the musical, the melodrama, the horror film, and the science fiction film. We will consider the evolution of these four genres in relation to changes in the film industry and in American society, especially in relation to gender.
Prerequisites: Film Studies 201 or 202 or permission of instructor

(Spring) Film Genre: The Musical Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to a specific film genre. Some examples of genres that might be studied are: the science fiction, horror, melodrama, musical, Western, detective, or gangster film.
This course explores the American musical film from its first appearance in the early 1930s in the films of Busby Berkeley to its recent revival in films such as Baz Luhrmann’s *Moulin Rouge*. The course also examines musical films from other national cinemas that either comment self-reflexively on the genre and its American context and/or expand common definitions of the genre.
Prerequisites: Film Studies 201 or 202 or by permission of instructor
Notes: 2 meetings (75 minutes) and 1 screening (2 hours, 30 minutes)

(Spring) Film Genre: Race, Ethnicity, and the Hollywood Musical - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This course offers a critical, historical, and theoretical approach to a specific film genre. Some examples of genres that might be studied are: the science fiction, horror, melodrama, musical, Western, detective, or gangster film. The musical film has been the most criticized of Hollywood genres for its "escapism" and all-pervasive "whiteness." Yet it was also one of the few genres to feature and promote performers from different racial and ethnic groups such as Al Jolson, Lena Horne, and Carmen Miranda. We will examine the ways in which this prototypical Hollywood product ignored and reflected the dynamics of race and ethnicity in American society.
Prerequisites: Film Studies 201 or 202 or permission of instructor

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Component course; Latin American Studies 287 and History 2876)
From the time of the conquest, the Amazon has been imagined as an exotic and savage terrain: mysterious, dangerous, and cascading in untouched natural resources. This course examines the Amazon as a historical narrative in popular culture and political struggles. We will read explorers' narratives, examine representations of the Amazon and its people in film and literature, discuss labor and the rubber industry, and analyze the environmental movement and other recent social movements.

(Fall) Film Authorship: Films of Margarethe von Trotta - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive; German Studies 223)
Award-winning contemporary filmmaker Margarethe von Trotta has created controversy both as a woman in a "male" domain and through her women protagonists. We study unconventional women who challenge their worlds and themselves, trying to forge a place in society and relationships which break through traditional patterns. The course also introduces basic film vocabulary and explores such cultural topics as lifestyle changes (in the comedy Mit fünfzig küsst Männer besser), German terrorism and the tabloid press (The Lost Honor of Katharina Blum), love in divided Germany (The Promise), a women's boycott which saved their Jewish husbands (Rosenstrasse), and the "secret" police (Die andere Frau).

(Spring) Production Seminar: Advanced Documentary Production

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): An advanced course in the theory and practice of film/video production as an art form. Topics for the seminar will vary from year to year.

This course will take concepts introduced in the fall introductory video production class to the next level. We will delve deeper into the study of documentary history and theory, while also working on documentary projects. Students will work in pairs or small groups to produce one project over the course of the semester, from developing a proposal through the stages of pre-production, production, and post-production.

Prerequisites: This is a production course. Course registration by instructor permission only. Application available through FS Web site.

Notes: 1 meeting (3 hours), 1 screening (2 hours); a lab fee may be charged.

(Fall) Seminar in Film Studies: Sex, Love, and Gender in Contemporary African American Film - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(Writing-intensive; African American and African Studies 340-01)

Preamble (for topics courses): This topics course provides advanced instruction in an aspect of film history, theory, or criticism. Students are expected to bring substantial background in the study of film to this course; enrollment may be limited.

This course will explore the representation in film of intimate relationships among African Americans. Confronting an ongoing history of racist, sexist, and homophobic images, films produced by and featuring blacks can offer alternate interpretations of love, romance, and sexuality. Coupled with literature and theoretical readings by feminists and black cultural critics, students will consider the function of—and challenges to—intimacy in interpersonal relationships among African Americans. Directors under consideration include Spike Lee, Kasi Lemmons, Marlon Riggs, and Sanaa Hamri.

Prerequisites: AFRAM 101 plus 8 credits in African American and African Studies

Notes: 1 meeting (2 hours) plus screening prior to class (TBA)

Instructors: Z. Elliott

Expected enrollment: 15

(Fall) Seminar in Film Studies: Playing the Past: History on Stage and Film - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Theatre Arts350f (01))

Preamble (for topics courses): This topics course provides advanced instruction in an aspect of film history, theory, or criticism. Students are expected to bring substantial background in the study of film to this course; enrollment may be limited.

Theatre and film have a vast potential to portray, assert, question, and alienate ideas of history. Through close analyses of play texts, films and, when possible, live theatre performances, we'll examine the overt and implied views of history in dramatizations of historical events. The course will feature the work of artists ranging from Friedrich Schiller, Shakespeare, and Brecht to Martin Scorcese, Caryl Churchill, and Anna Deavere Smith, among others.

Prerequisites: See Theatre Arts 350f (01)

Instructors: W. Weckwerth

Expected enrollment: 12

(Fall) Topics in Experimental Film: Home Movies

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Writing-intensive)

Preamble (for topics courses): Examines some aspect of the history and aesthetics of cinema made outside of the narrative practice of the classical Hollywood model. Some areas of focus include: surrealism and the cinema, American avant-garde cinema, or women's experimental cinema.
This course examines that strain of the American Avant-Garde that finds its raw material in the domestic and quotidian world of everyday life, which it shapes through various, often highly complex editing practices. The theoretical work for the course is centered on the notion of duration; some of the filmmakers to be considered include: Stan Brakhage, Marie Menken, Marjorie Kellie and Peggy Ahwesh.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Art History 360 (Core))

How are we to respond to Indian popular film, which is notorious for its distracting song and dance numbers, meandering story line, and visually overblown spectacles? This seminar will develop historical and theoretical approaches to Indian films as what scholar Lalitha Gopalan calls a "constellation of interruptions." Students will examine feature films in class, write critical papers on scholarly essays, and pursue independent research projects on various aspects of Indian film.

Prerequisites: jr, sr, 8 credits in art history or film studies, or permission of instructor

(Fall) Topics in National/Transnational Cinemas: Love and Death or Sex and Crime: The Representation of East Germany in Film after the Fall of the Berlin Wall

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking- and writing-intensive; German Studies 315)

Taught in German. On the occasion of the twentieth anniversary of the fall of the Berlin Wall in 1989, we will discuss the most important films about East Germany produced after 1990. Films such as Goodbye Lenin, Stilles Land, Das Leben der Anderen, Halbe Treppe, and others form the basis of discussion and analysis of political, economic, and cultural discourses in unified Germany, 1990-2008. We compare these films with classics of East German film, such as Spur der Steine, Der Dritte, Die Legende von Paul & Paula, and Solo Sunny. In addition to writing assignments based on film analysis and criticism, we also practice the basics of scriptwriting and film directing.

Prerequisites: advanced German knowledge or permission of instructor

Notes: 1 meeting (3 hours) plus weekly screenings

Instructors: H. Teschke

(Spring) Topics in National/Transnational Cinemas: Queer Kinship in Asian North American Literature, and Film

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

(American Studies 301, English 334s (01). Component)

This course examines alternative kinship formations in Asian North American cultural production. It will focus on the gender and sexual management of racial bodies since the nineteenth century--from the U.S. Page Law of 1875 that restricted Chinese women on the basis of their presumed sexual immorality to various forms of "racial castration" that mediate Asian masculinities. We will consider how alternative kinship arrangements and queer cultural projects expose and/or upset the narrative assumptions embedded in heteronormative scripts of nationalism.

(Fall) Topics in National/Transnational Cinemas: The French New Wave: Its Origins and Its Influence
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(French 331f (02))
The New Wave was a series of films made in the 1960s by a group of pioneers, who had seen almost every film ever made and particularly admired American and Russian cinema. This creative explosion, a reaction to "cinema de Papa," won an aesthetic and political victory against an increasingly affluent, self-satisfied society, and brought about a revolution in the film industry.

(Spring) Topics in National/Transnational Cinemas: Advanced Studies in Visual Culture: Memory (of) War
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive; Spanish 340)
The Spanish Civil War (1936-1939) and the repressive, right-wing military regime of Francisco Franco (1939-1975) have shaped contemporary thought and cultural production in Spain. Cinema in particular shows a persistent concern with war and memory. The films studied in this course raise a number of philosophical and political questions to this effect. How does the devastation of war register through the medium of film? How do censorship and propaganda condition memory, and how does the past return in a postdictatorship? What and why do people choose to remember or to forget? Films to be studied include both mainstream commercial features and experimental works, and range in genre.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement  
(French 331s)  
From the very beginning, innovation, experimentation, and artistic ambitions have shaped the evolution of French cinema. For more than a century, filmmaking in France has been defined by these innovations: Georges Méliès and the invention of special effects, Buñuel's antics, Jean Renoir's involved narratives, the creative explosion of the New Wave, or today's adventurous directors. This class will focus on those movies and those directors that have transformed and expanded the art of cinema, and will include works by Cocteau, Varda, Pontecorvo, Godard, Clément, Truffaut, Carax, and many others. In French.

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive; Spanish 320s (01) Seminar on Spanish/Latin American Cinema)
This course studies the films of Pedro Almodóvar, European cinema's favorite bad boy turned acclaimed auteur. On the one hand, students learn to situate films within the context of contemporary Spanish history (the transition to democracy, the advent of globalization, etc.) in order to consider the local contours of postmodern aesthetics. On the other hand, the films provide a springboard to reflect on larger theoretical and ethical debates. For instance, what can a weeping transvestite teach us about desire? What happens when plastic surgery and organ transplants become metaphors? Under what circumstances, if any, can spectators find child prostitution cute? Taught in English.

(Spring) Topics in Film Theory: Queer Theory and Recent Queer Film in Latin America - *Not offered this year/term
In the 1990s GLBT liberation entered the public sphere as a major political force. Simultaneously, American academia produced and exported a new academic discipline: queer studies. As a consequence, the North American liberational model displaced cultural and theoretical models of sexuality of other countries. We will consider some of the key U.S. texts that have consecrated queer studies as a discipline and juxtapose them with theories and cinematic texts from Argentina, Brazil, Chile, Cuba, and Mexico in order to recuperate cultural models under erasure in the wake of the U.S. model's identity-focused and consumer-driven triumphalism.

(Fall) Period Courses: Topic: L'Héroïsme au Féminin: 1150-1750 (pre-1800)
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): The usual periodization of French literature and culture is by century. Some period courses focus on the characteristics of specific centuries. Others focus on artistic or intellectual movements: gothic, Renaissance, romantic. All period courses, whatever their conceptual framework, integrate texts and historical contexts.

A seminar exploring representations of female heroism, and anti-heroism, in various contexts from the French Middles Ages into the Enlightenment. Types of heroines to be examined, both in themselves and in relation to male heroes, include saintly martyrs, rulers and warriors, faithful and unfaithful wives, true lovers and temptresses, intellectuals and adept survivors. Readings to be selected from such significant male and female authors in diverse genres as Chrétien de Troyes, Marie de France, Christine de Pizan, Villon, Louise Labé, Ronsard, Molière, Racine, and Prévost.

Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor
Instructors: N. Margolis

(Spring) Period Courses: Topic: Molière in Context (pre-1800)
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Preamble (for topics courses): The usual periodization of French literature and culture is by century. Some period courses focus on the characteristics of specific centuries. Others focus on artistic or intellectual movements: gothic, Renaissance, romantic. All period courses, whatever their conceptual framework, integrate texts and historical contexts.
Molière's reading of human nature and society touches on universal themes and problems still relevant today: religious zealotry, parental interference in children's lives, social strata and upper class arrogance, as well as the place of women in a traditional society and the value of sincerity and genuine love. We will study Don Juan, Tartuffe, L'Ecole des femmes, le Malade imaginaire, & Bourgeois gentilhomme, L'Astrée, in the context of Versailles and the Baroque style of the period. Students will give presentations on art and architecture and report on the best historical films made on the time of Louis XIV. As a term paper, students will produce a multimedia project in iMovie.
Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor
Instructors: N. Vaget

(Spring) Seminar in Romance Languages and Literatures: Topic: Sweet Cruelty: Anti-Humanism and Gay Writing
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Language requirement or Humanities I-A requirement
(Taught in English; Romance Languages 375, Spanish 330, Italian 361, Gender Studies 333)
Preamble (for topics courses): This interdisciplinary seminar will focus on a comparative study of Romance languages or literatures. Topics will vary from semester to semester. Seminar discussions will be conducted in English, but students are expected to read works and write papers in French.
Much of twentieth-century gay writing in Latin America is characterized by an estheticist celebration of anti-humanism, which has often clashed with left-wing progressive politics in these countries. But how does a "gay style" come about? What is its genealogy? How does it identify itself, and what does such an identity mean politically and historically? In this seminar, we will study a number of writers from Argentina, Chile, Cuba, Pérù, and Uruguay, and examine their roots in French and Italian anti-humanist authors from Baudelaire, Lautréamont, and Rimbaud to Genet and Pasolini. We will also read a few key texts in queer theory.
Prerequisites: two of the following courses: French 215, 219, 225, or 230, and permission of course instructor
Notes: To receive 300-level credit in French, students must write all papers and do appropriate course readings in French.
Instructors: C. Gundermann

(Fall) Courses on Social and Political Issues and Critical Approaches: Topic: Romantics, Realists, Revolutions in the Nineteenth Century
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Preamble (for topics courses): These courses examine a definable phenomenon—an idea, a movement, an event, a mentality, a cultural structure or system, an historical problem, a critical mode—relevant to the civilization of France or of French-speaking countries. Readings from a variety of disciplines shed light on the particular aspect of thought or culture being studied.
Victims of a mal du siècle resulting from a sense of loss, lassitude, and melancholy, French Romantic poets like Victor Hugo, Lamartine, Musset, Vigny, and painters like Delacroix and Gericault, embarked on a campaign of ideological and esthetic revolt. After the Revolution of 1948, Realists and Naturalists rejected the subjectivism and imagination of their predecessors in favor of an objective description of the ordinary world of the lower class. We will read works by Flaubert, Stendhal, Zola, and Maupassant and study artists from the school of Barbizon and the Impressionists. As a term paper, students are required to create a multimedia project in iMovie.

FREN-331-01 - French - 2009-2010
(Spring) Courses on Social and Political Issues and Critical Approaches: Topic: Family Romances: Childhood in French and Francophone Fiction and Film
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Preamble (for topics courses): These courses examine a definable phenomenon—an idea, a movement, an event, a mentality, a cultural structure or system, an historical problem, a critical mode—relevant to the civilization of France or of French-speaking countries. Readings from a variety of disciplines shed light on the particular aspect of thought or culture being studied.
Study of twentieth-century narratives of childhood from French and Francophone cultures. Central questions: How has the conception of childhood varied across time and French-speaking cultures? What forms and techniques have writers and artists used to render early life experiences? With what social, psychological, and aesthetic issues have their stories engaged? What ideologies underlie and limit the Western "family romance" model of development? Authors may include: Colette; Pagnol; Beauvoir; Pérec; Sarratute; Ernaux; Chamoiseau; Pineau; Roy; Blais; Laye; Diallo; Mokeddem; Sebbar; Yaou; Nothomb; films: Diabolo Menthe; La Rue Cases-Nègres; L'enfant noir; Chocolat; and paintings.
Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor
Instructors: E. Gelfand
Expected enrollment: 16

(Fall) Courses on Social and Political Issues and Critical Approaches: Topic: The French New Wave: Its Origins and Its Influence
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Preamble (for topics courses): These courses examine a definable phenomenon—an idea, a movement, an event, a mentality, a cultural structure or system, an historical problem, a critical mode—relevant to the civilization of France or of French-speaking countries. Readings from a variety of disciplines shed light on the particular aspect of thought or culture being studied.
The New Wave was a series of films made in the 1960s by a group of pioneers, who had seen almost every film ever made and particularly admired American and Russian cinema. This creative explosion, a reaction to "cinéma de Papa," won an aesthetic and political victory against an increasingly affluent, self-satisfied society, and brought about a revolution in the film industry.
Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor
Instructors: C. Le Gouis

(Spring) Courses in Francophone Studies: Topic: Contes et légendes d’Afrique Francophone
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Language requirement or Humanities I-A requirement
Preamble (for topics courses): These courses study nonmetropolitan French-speaking cultures and literary works written in French outside Europe. Areas of focus are one or more of the following regions: Africa, the Caribbean, or Canada.
Since the advent of fiction writing in French-speaking Africa in the 1920s, the study of African literatures has been mainly limited to poems, novels, short stories, and plays written by a French-educated elite. In this course we will explore samples of African oral literatures including tales, epic songs, and legends from different African regions. Through translations by writers such as Léopold Sédar Senghor, Birago Diop (Sénégal), Djibril Tamsimir Niane (Guinée), and Bernard Dadié (Côte d’Ivoire) we will try to view African societies from "within" and gain an understanding of the genealogy of modern African literature in European languages.
Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor
Instructors: C. Le Gouis
Expected enrollment: 16

(Fall) Advanced Level Seminar: Topic: Tales of Blood and Passion: Spain in the French Literary Imagination
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Preamble (for topics courses): The seminar is intended to challenge students at the highest level. A regular rotation of topics ensures a variety of perspectives across genre and period, encompassing linguistic, literary, theoretical, and cultural issues of French and Francophone studies. Development of critical skills is stressed through classroom discussion and critique of writing projects, drawing on individual student interests and experiences as they relate to the topic of the course.
This course will examine the enduring fascination with Spain on the part of French authors from various historical periods. At once familiar and exotic, Spain frequently provided fruitful soil for vivid imaginings of a violent, eroticized, and colorful "other." Honor, nobility, violence, and wild passion are but a few of the themes associated with this imaginary Spain. Perceived as straddling the border between European and Arab cultures (Dumas famously said that "Africa [began] at the Pyrenees"), between the known and the unknown, Spain plays a unique role in the history of French literary representations of other cultures. We will also study French paintings that depict Spanish themes.
Prerequisites: 12 credits including two courses at the advanced level, or permission of department chair and instructor
Instructors: C. Rivers
Expected enrollment: 16

(Spring) Advanced Level Seminar: Topic: Les Misérables
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Preamble (for topics courses): The seminar is intended to challenge students at the highest level. A regular rotation of topics ensures a variety of perspectives across genre and period, encompassing linguistic, literary, theoretical, and cultural issues of French and Francophone studies. Development of critical skills is stressed through classroom discussion and critique of writing projects, drawing on individual student interests and experiences as they relate to the topic of the course.
Hugo's epic masterpiece, written in exile, has everything: ceaseless adventures, crimes and punishments, love, hate, obsession, heroes, villains, the battle of Waterloo, and civil war. The sympathetic everyman, Jean Valjean, condemned to hard labor for stealing bread and relentlessly pursued by the pitiless policeman Javert, encounters unforgettable characters. We will examine how Hugo situates Valjean's escapes within a framework of social injustice and good triumphing over evil, balancing his political and romantic ideas. Reading, discussion, film screenings.

(Fall) Introduction to Gender Studies: Introduction to Gender Studies in the Spanish-Speaking World: Identities and Intersections
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Speaking- and writing-intensive; Spanish 230)
This course, taught in Spanish, is an introduction to the interdisciplinary field of gender studies. It also focuses on the specific implications of this new, predominantly U.S.-based discipline for and in the Spanish speaking world. The intersections among gender, race, class, and sexuality in various contexts, past and present, will be central to our inquiry. Topics will include the politics of appearance, women’s economic status, sexual violence, racism, legacies of colonialism, the challenges of transnational feminist and queer activism, and strategies for change. We will examine the development of feminist and queer theory and its practices in various local and transnational contexts, but especially in the Spanish-speaking world.
Prerequisites: Spanish 212 or permission by instructor
Notes: taught in Spanish

(Fall) Gender and Power in the History of Mount Holyoke College
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar (Writing-intensive; History 101f)
Mary Lyon, founder in 1837 of Mount Holyoke Female Seminary, held out to her students the possibility that they might transform the world—a tall order for young women who were excluded from proper citizenship and political power. To Lyon, duty, discipline, and community would make it possible. What transformations ensued? And what can we learn from them about the complexities of gender and power? This course will introduce students to the craft of historical research through the richness of the College Archives. Special attention will be paid to the College's missionary past, its role in labor research and activism, and the place of racism and antiracism in its history.

(Spring) Methods and Practices in Feminist Scholarship
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A; Anthro, econ, geog, etc. requirement
How do scholars produce knowledge? What can we learn from differences and similarities in the research process of a novelist, a biologist, an historian, a sociologist, and a film critic? Who decides what counts as knowledge? We will examine a range of methods from the humanities, social sciences, and natural sciences, including visual analysis, archival exploration, interviewing, and ethnography, as we consider the specific advantages (and potential limitations) of diverse disciplinary approaches for feminist inquiry. We will take up numerous practical questions as well as larger methodological and ethical debates. This course provides a foundation for advanced work in the major.

(Fall) Women and Gender in the Study of Culture: Nineteenth-Century American Women Writers
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(English 270, American Studies 290)
In this cross-cultural examination of nineteenth-century American women writers, we will compare a number of works of fiction, prose, poetry, and autobiography. We will discuss how writers created sophisticated and insightful critiques of American culture and imagined or re-presented new American identities and histories. We will also consider tensions between "sentimental" idealism and political pragmatism, restrictive domesticity and dangerous autonomy, and passionless femininity and expressed sexuality. Authors may include Alcott, Child, Far, Fuller, Harper, Hopkins, Ruiz de Burton Wilson, and Winnemucca.

(Spring) Women and Gender in the Study of Culture: The Gender of War in Twentieth-Century German Culture
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
(Speaking- and writing-intensive; German 223)
As an extreme, but common experience, war creates, shapes, and contests normative constructions of masculinity, femininity, and gender relations in general. This seminar explores the concept of war, its causes, and its representation in memoirs, fiction, art, and photography within German-speaking realms with an emphasis on World War II and its aftermath. What impact does war have on gender relations within a matrix of other categories of identity, such as race, class, and sexuality? Materials include texts by Bachmann, Brecht, Celan, and other German writers and films such as Triumph of the Will and Das Boot.
Prerequisites: Previous study of German
Notes: Students enrolled in 223 are expected to enroll in the complementary two-credit tutorial (German Studies 224)

(Fall) Women and Gender in the Study of History: Sexual Revolutions in U.S. History
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(History 283)
This class will evaluate the notion of "sexual revolutions" by examining three moments in U.S. history: the late eighteenth century, the turn of the twentieth century, and the 1960s and 1970s. In each, we will look at shifts in the relationships between race, class, gender, and sexuality. Our history will include the role of experts in the fields of religion, medicine, sexology, and psychology and their efforts to define sexual deviance and promote sexual "normality." At the same time, we will study popular and subcultural sexual cultures found in brothels, bars, same sex institutions, sports, bohemian circles, and political groups and look for strategies of resistance to normative regimes.

(Spring) Women and Gender in Philosophy and Religion: Women and Buddhism
The course examines Buddhist representations of women and women's representations of Buddhism. We will study materials by and about Buddhist women from Thailand, India, China, Tibet, Japan, and the U.S. Some of the questions we will ask are: How are women portrayed in Buddhist literature? How do they portray themselves? How have Buddhist women responded to sexism in their communities? How have Buddhist women contributed to the development of new Buddhist institutions?

(Fall) Feminist Theory: Voicing Traditions, Changing Conditions
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Antropology 216)

Do women as a group, in Gilligan's words, speak "in a different voice"? This course examines the history of feminist theory through an investigation of "voice." Does a focus on voice privilege Western European feminist traditions? How have debates over who may speak for marginalized women facilitated feminist interdisciplinary dialogue on topics such as violence against women, class oppression, and racism? We will explore these questions in literature, film, and scholarship in anthropology, psychology, and sociolinguistics.

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Politics 233)

This course explores the overlapping dualities of the feminine and the masculine, the private and the public, the home and the world. We examine different forms of power over the body; the ways gender and sexual identities reinforce or challenge the established order; and the cultural determinants of "women's emancipation." We emphasize the politics of feminism, dealing with themes that include culture, democracy, and the particularly political role of theory and on theoretical attempts to grasp the complex ties and tensions between sex, gender, and power.

(Physics 211)  
This course examines explanations for the under-representation of women in science, technology, engineering, and math (STEM) with an eye to identifying how to increase the participation of women in science. The course will address questions about gender differences in cognition and ability, the role of stereotyping, as well as the "leaky pipeline" issue, that is, the rate and timing of the departure of women from scientific fields. Course readings will explore the psychology of gender, as it relates to STEM. In addition, we will read research from professional organizations such as the American Physical Society, and reports from congressional committees.

Recent cultural histories of imperialism--European as well as U.S.--have illuminated the workings of race and gender at the heart of imperial encounters. This course will examine the United States' relationship to imperialism through the lens of such cultural histories. How has the encounter between Europe and America been remembered in the United States? How has the cultural construction of "America" and its "others" called into play racial and gender identities? How have the legacies of slavery been entwined with U.S. imperial ambitions at different times? And what can we learn from transnational approaches to "the intimacies of empire?"

In the nineteenth century, Italian women were finally able to conquer a place in the realm of letters and society. Their Renaissance sisters having been nearly forgotten, women writers in the new Italian kingdom had no models to follow. This course will explore the birth and development of women's writing in nineteenth and twentieth century Italy with emphasis on autobiography, autofiction, issues of gender, sexuality and identity. We will read and discuss works by Sibilla Aleramo, Jolanda, Matilde Serao, Benedetta, Amelia Rosselli, Natalia Ginzburg, Elsa Morante. Special attention will be paid to the early twentieth century, to futurist women, and to the condition of women in Fascist Italy.

Much of twentieth-century gay writing in Latin America is characterized by an estheticist celebration of anti-humanism, which has often clashed with left-wing progressive politics in these countries. But how does a "gay style" come about? What is its genealogy? How does it identify itself, and what does such an identity mean politically and historically? In this seminar, we will study a number of writers from Argentina, Chile, Cuba, Perú, and Uruguay, and examine their roots in French and Italian anti-humanist authors from Baudelaire, Lautréamont, and Rimbaud to Genet and Pasolini. We will also read a few key texts in queer theory.

Prerequisites: Two courses in Spanish at the 200-level above 212; application at http://www.mtholyoke.edu/acad/womst/application.html

This course explores the gendered dynamics of social movements in the global North and South. After analyzing the first and second waves of U.S. women's movements, we will examine groups outside the U.S.--including those that are all-women and mixed. We will look critically at the imposition of Western models of women's liberation onto movements in the global South. We will also examine women's "triple burden" that occurs as women
engage in domestic-subistence, wage-earning, and activist work. Drawing from feminist theory, social movement theory, anthropology, and political ecology, we will examine the challenges and possibilities women face as they engage in social movements today.

This course will investigate how representations of gender and class serve as a structuring principle in the development of the genre of the Victorian novel in Britain. We will devote significant attention to the construction of Victorian femininity and masculinity in relation to class identity, marriage as a sexual contract, and the gendering of labor, all the while keeping our eye on form and the sometimes mysterious narrator-as-consciousness that guides us through these concerns. Novelists will include Dickens, Eliot, Gaskell, C. Bronte, and Hardy. Supplementary readings in literary criticism and theory.

Preamble (for topics courses): Advanced seminars address topics in gender studies within and across various disciplines, hence prerequisites vary. Written application is required for admission to all advanced seminars in the department. Please see below for specific requirements, the location of the application, and the deadline for submission. If not otherwise noted, applications for preregistration are due by the end of the academic advising period. In some but not all cases, late applications may also be reviewed at the start of the new semester.

This course examines alternative kinship formations in Asian North American cultural production. It will focus on the gender and sexual management of racial bodies since the nineteenth century, from the U.S. Page Law of 1875 that restricted Chinese women on the basis of their presumed sexual immorality to various forms of "racial castration" that mediate Asian masculinities. We will consider how alternative kinship arrangements and queer cultural projects expose and/or upset the narrative assumptions embedded in heteronormative scripts of nationalism.

A seminar on the eighteenth-century Chinese masterpiece The Story of the Stone and selected literary criticism in response to this work. Discussions will focus on love, gender-crossing, and women's supremacy and the paradoxical treatments of these themes in the novel. We will explore multiple aspects of these themes, including the sociopolitical, philosophical, and literary milieus of eighteenth-century China. We will also examine this novel in its relation to Chinese literary tradition in general and the generic conventions of premodern Chinese vernacular fiction in particular.

This course examines how Western medical knowledge, practices, and institutions define female health and normality and manage diseased and gender-variant female bodies. We will explore how medicine conceives of the female body as a medical problem or mystery and consider how race, class, and sexuality inflect medical conceptions of the female body. Topics include "female maladies," including PMS, pain disorders, and autoimmunity, medicalization of childbirth and the pregnant body, medical management of transgender and intersex bodies, medical conceptions of ideal body weight and fitness, gender norms and cosmetic surgery, women and disability, and pharmaceutical marketing toward women.

This course examines contemporary global population movements through the lens of gender studies and anthropology. We will consider forms of subject-making--such as citizenship--through labor, kinship, and sexuality in North Africa, Southern Europe, South Asia and the United States. We will be especially attentive to symbols of group identity linked to race, ethnicity, nation, and language. Students will engage critically with theories of transnational migration, globalization, governmentality, neoliberalism, and imperialism.

This seminar will focus on depictions of war in the context of gender. When asked how we might prevent war, Virginia Woolf suggested that we must invent new language and methods rather than follow the path of the traditional "procession of educated men." What language emerges in works about the effects of war? Texts will include essays and films as well as selected works by writers such as Alcott, Whitman, Crane, Twain, Hemingway, Woolf, Silko, Morrison, and O'Brien.

We will examine the relationship between gender and deviance in early modern Europe, with a particular focus on the ways European societies and criminal courts dealt with women and family. We will examine social life and norms in order to understand the nature of "normality" and "deviance" as these terms applied to women, and investigate the system of criminal law and justice in Europe generally, including problems of evidence, torture, and state-sanctioned violence. We will discuss the particular crimes associated with women, especially witchcraft, sexual misdeeds, and "reproductive" crimes such as abortion and infanticide.

(Spring) Field Placement
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Community-based learning course; Speaking-intensive)

This course presents an opportunity for students to apply gender theory to practice and synthesize their work in gender studies. Connections between the academy and the community, scholarship and social action will be emphasized. Students will arrange for a placement at a non-profit organization, business or institution that incorporates a gender focus. A weekly seminar with other students provides a structured reflection forum to analyze experience and methods.

Prerequisites: Gender Studies 101, 250, either 201 or 221

(Fall) Senior Seminar
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This year-long capstone course brings seniors together to think through relationships among empirical research, theory, activism, and practice in gender studies. Majors with diverse interests, perspectives, and expertise (and other seniors with substantial background in the field) will have the opportunity to reflect on the significance of their gender studies education in relation to their current work (including work in 333s, 390, 395), their academic studies as a whole, and their plans for the future. Course readings and discussion will be shaped by students in collaboration with the instructor. This course continues in the spring semester as Gender Studies 392.
Prerequisites: Seniors only, GNDST 101, GNDST 221, GNDST 250, GNDST 333, 20 credits in gender studies and/or related courses, written application for permission required.

(Fall) World Regional Geography
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Surveys physical and human geographic patterns, providing a comprehensive background discussion of individual regions. Analyzes each region in terms of its environmental base and resource distribution, agricultural systems and rural development, population growth and characteristics, and patterns of urbanization and industrial growth.
Instructors: G. Kebbede
Expected enrollment: 60

(Spring) Global Societies
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This introductory course in human geography examines social, economic, cultural and political spaces in a global context. In order to understand the making of our world, we examine processes like globalization, liberalism and neo-liberalism, conservatism and neo-conservatism, colonialism, neo-colonialism, politics, cultures, migrations, and wars.
Instructors: W. Ahmed
Expected enrollment: 60

GEOG-107-01 - Geography - 2009-2010
(Fall) Introduction to the Physical Environment
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
A systematic introduction to the processes operating on the surface of the earth, their spatial variation, and their contribution to the spatial patterning of life on earth. The course stresses interactions among climate, landforms, soils, and vegetation and examines human impacts on environmental systems.
Instructors: T. Millette
Expected enrollment: 60

(Spring) Cities of the Twenty-first Century - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This is an introductory geography course on World Cities and Urban Systems. We focus on processes that produce spatial differences and inter-relations within and between cities across the world. Cities of the Twenty-first Century, incorporating theoretical, critical and empirical approaches, covers a range of topics, including historical development of cities; colonial and post-colonial structures in Third World cities; urban governance; social patterns within cities; urban economies; urban planning; urban environment, and the linkages among all these.
Prerequisites: Any 100-level geography and or social science class
Instructors: W. Ahmed
Expected enrollment: 25

GEOG-204-01 - Geography - 2009-2010
(Spring) Human Dimensions of Environmental Change - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Environmental Studies 204)
Using case studies from Africa, Asia, North and South America, and Europe, this course examines the interactions between human institutions (such as political and economic structures, science and technology, class and gender systems, and cultures) and the environmental/earth systems that provide their contexts and have been impacted by them. The course will provide a forum to analyze the environmental consequences of a variety of land-use systems, resource use, and development projects and explore possible alternative strategies of human-environment relations that could create a balance between human needs and environmental constraints.
Instructors: G. Kebbede
Expected enrollment: 30

GEOG-205-01 - Geography - 2009-2010
(Fall) Mapping and Spatial Analysis
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Provides a comprehensive introduction to maps, including their design, compilation, and computer production. Introduces students to the principles of abstracting the Earth's surface into spatial databases using GIS, remote sensing, and Global Positioning Satellites.
Instructors: T. Millette
Expected enrollment: 19

GEOG-206-01 - Geography - 2009-2010
(Spring) Political Geography
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Systematically studies political phenomena and their geographic expression, at a variety of spatial scales - national, regional, and international. Major themes include nation-state formation, boundary, territory, and ethnic issues, regional blocs and spheres of influence, and conflicts over access to and use of resources.
Instructors: G. Kebbede
Expected enrollment: 50

(Fall) Global Economic Geography
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Economic activities such as consumption, trade, production, investments, and economic institutions such as markets, corporations, banks alter everyday life. With globalization these processes acquire greater intensity, producing cultural, environmental, and political effects. This course examines these changes by understanding how economic processes work, change spaces, and differentially impact developed and developing economies.
Prerequisites: one course in the social sciences
Instructors: W. Ahmed
Expected enrollment: 30

GEOG-214-01 - Geography - 2009-2010
(Fall) Geography of South Asia - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
The region is studied in terms of its physical, cultural, and political geography. Emphasis is given to the numerous ways in which the peoples of South Asia have adapted to and utilized their local environments, the reasons for varying patterns of population growth throughout the region, and the environmental impact of economic development programs.
In this course, the Middle East and North Africa are studied in terms of their physical, cultural, economic, and political geography. Emphasis is placed on the environmental conditions and ecological evolution, population and demographic characteristics, the resource base and major problems in the social, political, and economic transformation of the region.

Instructors: G. Kebbede
Expected enrollment: 50

The course provides an integrated analysis of biogeography, environmental change, and hydrology within each of the biomes found in the African continent: forest, savanna, desert, coast, wetland, mountain, and Mediterranean environments. It also discusses the impact and significance of human activity on African environments by exploring debates about soil erosion, desertification, biodiversity and depletion, and conservation and development.

Instructors: G. Kebbede
Expected enrollment: 40

In this course we will learn weather forecasting skills. This will involve examining weather observations, satellite and radar images, surface and upper-air weather charts, and predictions made by computer models. We will have an opportunity to learn atmospheric dynamics and gain an understanding of the Earth's radiation budget. Topics will include severe storms, hurricanes, and winter weather.

Prerequisites: high school earth science or any 100-level natural science course

Instructors: The department
Expected enrollment: 15

This course examines the role of urban parks in America. It explores their role as places of natural beauty, sources for improving public health, recreation opportunities, civic identity, and shared community interaction and public engagement. This class has a significant practical component with several local field trips and park design critiques.

Prerequisites: Any 200-level geography course

(Fall) Seminars - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking- and writing-intensive)

Preamble (for topics courses): These seminars present selected topics in geography that reflect contemporary problems, current geographical ideas, philosophical and methodological trends in geography, and/or the history and development of geographical thought.

Prerequisites: jr., sr, 4 credits in department and 4 credits in related social sciences at 200 level or permission of instructor

Instructors: The department

Expected enrollment: 20

GEOG-312-01 - Geography - 2009-2010
(Spring) Seminars: Resource and Conflict
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking- and writing-intensive)

This seminar is geared to unravel the political economy of resources, particularly energy, water, and agricultural resources, and in turn, understand the material basis of conflicts. Since most resources are place specific, we examine how globalization of consumption of resources has produced contestations, including wars. Material basis to explain causality of conflict, will in turn, challenge simplistic notions like 'us versus them,' 'Jihad versus McWorld' and 'clash of civilizations,' to explain contemporary conflicts. We will also examine how we are implicated in the production of resource wars on account of our life-style and consumption.

Prerequisites: jr, sr and 4 credits from the department and four 200-level related social science credits

Instructors: W. Ahmed

Expected enrollment: 20

(Fall) Third World Development
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking- and writing-intensive)

Offers an interdisciplinary perspective on social, economic, and political features of contemporary development in Africa, Asia, and Latin America, regions referred to as the Third World or the South, and provides an introduction to theoretical origins and definitions of economic growth, development, and underdevelopment. It then addresses more specific aspects of development such as trends in population growth, migration, and urbanization; agrarian change and rural development; gender relations and development; and external economic relationships. The latter part of the course draws extensively on selected case studies.

(Fall) Africa: Problems and Prospects
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking-intensive)

This course intends to offer an interdisciplinary perspective on selected contemporary development problems in Africa south of the Sahara. Central to the course will be an examination of the social, economic, and political consequences of colonialism, the physical resource base and ecological crisis, agrarian systems and rural development, gender relations and development, urbanization and industrialization, and the problems and prospects of regional cooperation and integration.

Prerequisites: jr, sr, soph with permission of instructor; 4 credits in department and 4 credits at the 200 level in geography or related social science.

Instructors: G. Kebbede

Expected enrollment: 20

GEOG-321-01 - Geography - 2009-2010
(Spring) Geographic Information Systems - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
In this course, students will apply the skills they have learned in Geography 205 to a real-world problem. Data from various sources are combined to create a spatial database from which a spatial model is derived. Synthesis and manipulation of spatial data are used to undertake analysis of land cover change for the last 20 years in Massachusetts, with emphasis in the Pioneer Valley. The end result is a study of the factors that influence changes from undeveloped to developed land.

**GEOL-100-01** - Geology - 2009-2010
(Spring) Physical Geology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
From earthquakes to landscapes, deserts to glaciers, landslides to limestone, this course introduces the surficial and internal processes of the earth. Learn to interpret the geology of your surroundings when traveling to new places and understand how geologic setting influences how people live. Lectures focus on exploring and explaining geological features and processes using concept sketches. Labs focus on mineral and rock identification, map reading, and local field trips.
Prerequisites: Preference given to first- and second-year students.

**GEOL-101-01** - Geology - 2009-2010
(Fall) Environmental Geology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Our existence on the planet is greatly affected by changing environmental conditions. Some of these changes are "natural" (e.g., floods, earthquakes), but many directly result from human mismanagement (groundwater contamination, acid rain, the greenhouse effect). Although some of these problems are of local concern, an increasing number are of global scale. In this course, students develop an appreciation for the way the Earth's environment affects our lives and the impact humans are having on the environment. In the laboratory, students learn techniques to recognize and interpret environmental hazards and develop strategies to address environmental problems.
Notes: 2 meetings (75 minutes), 1 lab (3 hours), field trips, 25 spaces allocated to first-year students

(Fall) History of Life
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Life forms have inhabited the surface of our planet for most of its history. Earth, as a result, has a unique geology that is unlike that of any other planet. In this course we will examine the interrelations between life processes and Earth's crust and atmosphere and how they work together to create the geology of the planet. Using both the rock and fossil record, we will study the origin and evolution of life, the history of continents and oceans, and the diversification of complex life forms. Laboratory and field trips will emphasize identification and analysis of sediments, rocks, and fossils.

(Spring) Oceanography
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Because more than seventy percent of our planet is covered by ocean water, the study of marine systems is crucial to our understanding of the Earth. In this course, we will examine chemical, physical, geological, and biological processes in the oceans at a variety of scales in time and space. We will explore how the Earth's oceans formed, how they provided the foundations for life, and how they continue to affect weather and climate, stabilize global chemical cycles, interact with the terrestrial environment, and give us access to resources.

(Spring) Emergence of Animals
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
First-year seminar (Writing-intensive)
The origin of animals was one of the most important events in the history of earth. In this course we will review the history of the planet, learn basic geology, and then examine the problem of the origin of animals by studying Mount Holyoke's unequalled collection of Precambrian and Cambrian fossils. The origin of animals has been called the Cambrian Explosion. We will examine what this means for our understanding of evolutionary theory.

GEOL-203-01 - Geology - 2009-2010
(Fall) Surface Processes
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
The surface of the Earth is a history book of past environmental change. Every hill and valley, every erosional feature, every deposit is the result of processes acting at the Earth's surface. In this course we study these processes (e.g., glaciers, rivers, slopes, coastlines, windblown sand, frozen ground, cave formation, soil development) to better understand how they work and to understand the resulting landforms and deposits. With this understanding we can then observe different landforms and deposits and infer past process (environments of deposition). Fieldwork and trips allow students to explore firsthand the processes that have created and modified the Earth's surface.

(Fall) Plate Tectonics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Speaking- and writing-intensive)
Plate tectonic theory explains the origins of volcanoes and earthquakes and the locations of mountain belts and oceans. This course focuses on the geometry of plate tectonics. Topics include continental drift, relative plate motion, earthquake analysis, the creation and destruction of ocean crust, marine magnetic anomalies, triple point junctions, and stereographic projection. Work includes individual research projects on active plate boundaries.

(Spring) Paleontology-Stratigraphy
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course provides an intensive study of fossils, fossil preservation, depositional environments, sediments, sedimentary rocks, and the processes of sedimentation. We will employ the principles of stratigraphic analysis and correlation to interpret ancient environments and paleoclimate, reconstruct paleogeography, and probe the characteristics of sedimentary basins. Laboratory exercises and field trips will introduce a variety of analytical techniques used to study sedimentary rocks.
Prerequisites: one course in geology at the 100 or 200 level or permission of instructor
Instructors: M. McMenamin
Section Instructors: 01 LAB M McMenamin |
Expected enrollment: 18

GEOL-227-01 - Geology - 2009-2010
(Spring) Groundwater - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
The demand for and the contamination of groundwater resources are major societal concerns. To better understand the dynamics of the groundwater system, we cover topics including the hydrologic cycle, surface and subsurface hydrology, groundwater resource evaluation, and groundwater geotechnical problems. Students prepare weekly problem sets, a term paper, and an oral presentation. Many of the homework problems involve computer applications.
Prerequisites: Any 100-level geology course
Instructors: A. Werner
Section Instructors: 01 LAB A Werner |

(Spring) Igneous and Metamorphic Petrology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Studies mineralogical and chemical compositions, classification, genesis, and mode of occurrence of igneous and metamorphic rocks. Special attention paid to the relationships between rock-forming processes and global plate tectonics. Laboratory study of representative rock suites in hand specimen and thin section, introduction to analytical techniques, including mineral optics, and one or more field trips.
Prerequisites: Geology 201 or Permission of instructor
Instructors: S. Dunn
Section Instructors: 01 LAB S Dunn |

GEOL-326-01 - Geology - 2009-2010
(Spring) Seminar: Global Change
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The Earth's climate system is dynamic. Relatively small changes have been associated with profound environmental change; therefore, understanding historic and geologic climate change is paramount to predicting future change. This course reviews the evidence of past climatic change and the prospects of a warmer world.
Prerequisites: 1 200-level geology course or permission of instructor
Instructors: A. Werner
Expected enrollment: 15
GEOL-333-01 - Geology - 2009-2010
(Fall) Structural Geology and Orogenesis
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course covers the basic techniques of field geology and structural analysis. Lectures concentrate on field techniques, stress, strain, faulting, folding, rock strength, deformation mechanisms, and multidisciplinary approaches to mountain building (orogenesis). Most labs are field trips that involve data collection. Weekly writing assignments focus on presenting original research and distinguishing between observations and interpretations. During the final weeks of the semester, oral presentations emphasize fluency in the published literature of structural geology.
Prerequisites: Geology 201 (can be taken concurrently)
Instructors: M. Markley
Section Instructors: 01 LAB M Markley |

GEOL-334-01 - Geology - 2009-2010
(Spring) History of the Earth
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course explores the interaction of the earth systems during the past four billion years of earth history. Some topics covered are: ice ages and greenhouse atmospheres, continental drift, extinctions and radiations of flora and fauna, the early evolution of earth, absolute and relative dating of rocks, and the geologic time scale. Labs teach geologic map interpretation and critical analysis of recently published research on earth history. Writing assignments focus on proposal writing and the design and testing of earth science hypotheses.
Prerequisites: Geology 201, Geology 203, or Geology 224 (can be taken concurrently)
Instructors: M. Markley
Section Instructors: 01 LAB M Markley |
Expected enrollment: 15

GEOL-341-01 - Geology - 2009-2010
(Fall) Seminars: Bedrock Geology Maps - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Seminars offer directed study and discussion of one or more selected topics in geology. Topics vary from year to year. A bedrock geologic map shows the distribution of different kinds of rocks at the surface of the earth. "A geologic map is a subtle combination of observed facts and interpretations," says Lucien Platt. "Map making is a fine art. To appreciate fully and to understand a geologic map takes thoughtful and careful analysis." Through such analysis, this course focuses on: (1) using maps to infer regional geological histories, (2) drawing cross sections, and (3) visualization in three dimensions. This course meets for the first six weeks of the semester, and it is recommended for students who plan to pursue graduate degrees in the geosciences.
Prerequisites: At least two 200- or 300-level geology courses
Instructors: M. Markley

GEOL-342-01 - Geology - 2009-2010
(Spring) Death Valley Field Course - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Seminars offer directed study and discussion of one or more selected topics in geology. Topics vary from year to year. Consult the department for information about future seminars.
This seminar will cover selected topics on the geology of Death Valley region, California. We will meet for two hours per week up until spring break, then embark on a ten-day fieldtrip to Death Valley National Park, March 12-21. A participation fee is required. Students will be responsible for researching particular topics and presenting a final report.
Prerequisites: two geology courses and permission of instructor
Notes: 1 meeting (2 hours) and ten-day fieldtrip (Thursday, March 12 to Saturday, March 21); enrollment limited.

(Fall) First-Year Seminar: The New Face/s of Germany: Contemporary German Society in Film and Text
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
First-year seminar (Writing-intensive; Taught in English)
Germany today, 20 years past the fall of the Berlin Wall: cities where much of the population was not born in Germany; 160,000 Turks and fourth-generation Germans of African descent living in Berlin; public schools offering Islamic religious instruction; more Russian Jews emigrating to Germany than to Israel; immigrants of German citizenship who do not know German; East Germans longing for the return of the Wall. Recent German film has represented these diverse faces of Germany, often through comedy. Focus on close analysis of several films, their sociohistorical, economic, and cultural contexts. Films include: Lives of Others, Journey of Hope, Ali-Fear Eats the Soul, All for Sugar.
Notes: majors/minors in the department should simultaneously enroll in both German Studies 100 and German Studies 232 (01) to receive major/minor credit.

(Spring) First-Year Seminar: The Politics of Memory in Postwar German and Japanese Cultures - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Speaking- and writing-intensive; Taught in English)
Cultural exchanges between German and Japanese peoples have taken place for over 400 years. What has triggered and sustained exchanges of cultural, social, artistic, and military traditions? How have these historical exchanges affected the remembrance of World War II, the Holocaust, the Rape of Nanjing, and Hiroshima/Nagasaki in postwar narratives of both national cultures? We focus on the process of remembering war and atrocity in memoirs, fiction, and films in order to explore the politics of memory within transnational perspectives of gender, race, and class.
Prerequisites: fy or permission of instructor
Notes: Students with previous study of German are encouraged to take German 232 with this course.

GRMST-115-01 - German Studies - 2009-2010 (Spring) Global Challenges: Migration

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English; COLL-115-01)

The movement of people across territorial borders and within states today is unprecedented in its scope and magnitude. Drawing from a range of disciplinary and comparative perspectives, this course will explore historical patterns of global migration and its contemporary forms. We will focus in particular on the topics of migration and security, the political economy of migration, and its cultural representation in literature, photography, and film. We will conclude by looking at the political and economic forces shaping immigration laws and policies in the U.S. and Western Europe.

(Spring) Creation and Production of a German Play
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
(Speaking-intensive)
Students write and stage an original one-act play in German. Students develop proficiency in the language through reading several short stories by authors such as Friedrich Dürrenmatt, Bertolt Brecht, and Doris Dörrie, as well as theoretical writings on the theater; students will then rewrite one of the short stories as a play. Students write a substantial essay describing how they applied the specific theories of the theater to their original adaptation. The play will be performed at the annual German Theatre Festival and Competition hosted each spring by Mount Holyoke College.
Prerequisites: Open to students who have completed an intermediate-level German course, or per permission of department chair.
Instructors: M. Lauer
Expected enrollment: 25

(Fall) Topics in German Studies: German Culture from 1800 to 2000: Search for Identity: Nation, Heritage, and Psyche
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
(Speaking- and writing-intensive)
Preamble (for topics courses): This course examines the cultural, political, and social developments from 1800 to the present by investigating a significant topic. The selection of materials is exemplary rather than comprehensive and is based on thematic, historical, generic, and other units.
In fall 2009, we focus on major historical events and movements that have shaped German national and political, ethnic and gender, cultural and linguistic identities from the eighteenth century to the end of the Weimar Republic. We analyze, orally and in writing, diverse forms of film and literature, music, and art, as well as diverse texts from/about science, philosophy, economics, and popular culture. Students' individual fields of interest guide interdisciplinary assignments. Readings are supplemented by audio, video, and Internet resources. National identity discussions are based on the contemporary German TV series, *Die Deutschen* and *60 x Deutschland*.
Prerequisites: Previous study of German
Notes: Students in 223 are expected to enroll in the complementary two-credit tutorial (German Studies 224). Students who demonstrate the appropriate background in German studies may receive 300-level credit, provided they complete required additional work.
Instructors: G. Davis

(Spring) Topics in German Studies: The Gender of War in Twentieth-Century German Culture
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
(Speaking- and writing-intensive; GNDST-204)
Preamble (for topics courses): This course examines the cultural, political, and social developments from 1800 to the present by investigating a significant topic. The selection of materials is exemplary rather than comprehensive and is based on thematic, historical, generic, and other units.
As an extreme, but common experience, war creates, shapes, and contests normative constructions of masculinity, femininity, and gender relations in general. This seminar explores the concept of war, its causes, and its representation in memoirs, fiction, art, and photography within German-speaking realms with an emphasis on World War II and its aftermath. What impact does war have on gender relations within a matrix of other categories of identity, such as race, class, and sexuality? Materials include texts by Bachmann, Brecht, Celan, and other German writers and films such as *Triumph of the Will* and *Das Boot*.
Prerequisites: Previous study of German
Notes: Students enrolled in 223 are expected to enroll in the complementary two-credit tutorial (German Studies 224).

(Fall) Introduction to Nineteenth-Century Critical Social Thought
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive; Taught in English; Critical Social Thought 250)

Preamble (for topics courses): An introduction to some of the great critical voices of the nineteenth century. We will explore the ideas of such mutinous thinkers as Karl Marx, Friedrich Nietzsche, Sigmund Freud, and Franz Kafka, focusing on the style as well as the substance of their works and the circumstances that provoked them to write and/or that their writings helped provoke. The course will highlight the tension between appearance and reality, the dialectic of domination and subordination, and the place of reason and irrationality in social life.

This course is taught in English and satisfies a Humanities I-A distribution requirement but not the language requirement. For credit toward the major/minor in German studies students must enroll in German 232(02)(2 credits) and read, write about, and discuss selected materials from 231 in German.

Notes: majors/minors in the department should simultaneously enroll in both German Studies 231 and German Studies 232 (02) to receive major/minor credit.

(Spring) German Tutorial: Global Europe?: Immigration and Representations of Im/migrants in Film and Text
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Speaking-intensive)

Preamble (for topics courses): Focus on developing discussion and reading skills in German, and revising and editing papers written in German for German studies courses taught in English.

Readings and discussion in German pertaining to GRMST-315 or EURST 316: The course focuses on key issues facing contemporary Europe as it attempts to integrate large im/migrant populations: such legal issues as the development of asylum, immigration, and citizenship; and such cultural issues as the meanings of integration vs. assimilation; the roles of Christianity, Judaism, and Islam in the construction of European societies and cultural identities; perceptions of (Post-)Colonialism and the intersections of gender, race, class, and nationality. Focus on the emergence of European Union rules vs. representative national policies in Germany, France, and Great Britain.
Prerequisites: Previous study of German
Notes: To receive credit for GRMST-315 or EURST316 (taught in English) toward a minimum major or minor in German Studies, students also have to complete GRMST-232 (taught in German) taken for 300-level credit and read, write about, and discuss selected materials from EURST-316 or GRMST-315 in German.

GRMST-232-02 - German Studies - 2009-2010
(Fall) German Tutorial: Introduction to Nineteenth-Century Critical Social Thought
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Focus on developing discussion and reading skills in German, and revising and editing papers written in German for German studies courses taught in English.

Reading and discussion in German pertaining to GRMST-231: Introduction to Nineteenth-Century Critical Social Thought. An introduction to some of the great critical voices of the nineteenth century. We will explore the ideas of such mutinous thinkers as Karl Marx, Friedrich Nietzsche, Sigmund Freud, and Franz Kafka, focusing on the style as well as the substance of their works and the circumstances that provoked them to write and/or that their writings helped provoke. The course will highlight the tension between appearance and reality, the dialectic of domination and subordination, and the place of reason and irrationality in social life.
Prerequisites: Open to students with previous study of German
Notes: majors/minors in the department should simultaneously enroll in both German Studies 231 and German Studies 232(02) to receive major/minor credit
Instructors: K. Remmler

(Fall) Topics in German Studies: Love and Death or Sex and Crime: The Representation of East Germany in Film after the Fall of the Berlin Wall
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
(Speaking- and writing-intensive)
On the occasion of the twentieth anniversary of the fall of the Berlin Wall in 1989, we will discuss the most important films about East Germany produced after 1990. Films such as Good-bye Lenin, Stilles Land, Das Leben der Anderen, Halbe Treppe, and others form the basis of discussion and analysis of political, economic and cultural discourses in unified Germany between 1990-2008. We compare these films with classics of East German film, such as Spur der Steine, Der Dritte, Die Legende von Paul und Paula, and Solo Sunny. In addition to writing assignments based on film analysis and criticism, we also practice the basics of scriptwriting and film directing.
Prerequisites: advanced German knowledge or by permission of instructor
Notes: This course is taught in German and includes weekly screenings tba
Instructors: H. Teschke

(Fall) Senior Seminar: German Cultures of Memory in Global Contexts - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
(Speaking- and writing-intensive)
Preamble (for topics courses): This seminar is designed to explore theoretically and practically the nature of our field of inquiry. We explore such questions as: What does German studies mean? What is interdisciplinary work? What role does literature play in culture studies? What is the relationship between language and the construction of culture? What meanings have been attributed to the terms of "culture" and "civilization?" Texts from a variety of disciplines. Students write term papers on topics related to their major field(s) of interest.
How do nations, groups, and individuals recall the past in order to situate themselves within local and global contexts of power? How do cultures of memory create multiple recollections of "the" past and to what purpose? In this seminar, we explore how German cultural memories emerge in literary texts, films, and artifacts; at memorial sites and architectural domains; and in theoretical literature pertaining to memory. Readings include works by Sigmund Freud, Maurice Halbwachs, Aleida Assmann and other cultural theorists, literary works by the late German author, W. G. Sebald, as well as case studies of public debates about the remembrance of the Holocaust and World War II.
Prerequisites: Open to students who have completed at least 8 credits in the department in upper mid-level courses or beyond, or per permission of department chair.
Notes: This course fulfills the nineteenth- or twentieth-century major requirement in German studies, depending on the topic of a student’s semester project

History
HIST-101-01 - History - 2009-2010
(Fall) Foundation: Gender and Power in the History of Mount Holyoke College
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar (Writing-intensive; Gender Studies 117-01)
Mary Lyon, founder in 1837 of Mount Holyoke Female Seminary, held out to her students the possibility that they might transform the world—a tall order for young women who were excluded from proper citizenship and political power. To Lyon, duty, discipline, and community would make it possible. What transformations ensued? And what can we learn from them about the complexities of gender and power? This course will introduce students to the craft of historical research through the richness of the College Archives. Special attention will be paid to the College’s missionary past, its role in labor research and activism, and the place of racism and antiracism in its history.

HIST-101-01 - History - 2009-2010
(Spring) Foundation: Crossing Medieval Boundaries: European, Mediterranean, and Atlantic Encounters, 1200-1700
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar (Speaking- and writing-intensive; Medieval Studies 101)
This seminar focuses on medieval boundaries: those separating Christians, Jews, and Muslims in Europe, as well as those between men and women from the thirteenth through sixteenth centuries. The course also examines new boundaries separating--and constructing--Europeans, Americans, and Africans in the transition from "medieval" to "modern." Engaging closely and critically with sources from Atlantic societies of these centuries, students will investigate and debate the making and remaking of "Western culture" in an era of state formation, imperial expansion, agrarian capitalism, and chattel slavery. Readings range from Christian-Jewish disputations to indigenous writings from the Americas.

(Spring) Europe Expanding, 1500-1750
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

"In the beginning, all the world was America." We will investigate the expansion of the European world, 1500-1750. Usually this means the exploration and conquest of peoples and places previously unknown or unfamiliar to the Europeans. We will follow the exchange of peoples, currencies and goods around the world: to South Asia and China in the East, to the Americas in the West. In these centuries Europe expanded in many and diverse ways, changing from a society that had too little of anything to one that had too much of everything. By 1750, through industry, warfare, and the exploitation of human populations, European societies were poised to dominate the world for the next two centuries.

(Fall) Asian/Pacific/American History, 1850 to the Present
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Same as American Studies 102f)
This course situates Asian/Pacific/American experiences within the context of American history, as well as that of their countries of origin. First we will look at the pre-World War II era, exploring relationships between the U.S. quest for empire in the Pacific, political-economic dislocations in Asian countries, and anti-Asian prejudice against migrants in the U.S. Next we will examine the period after World War II, especially Japanese American internment; post-1965 immigration; war in Southeast Asia; the rise of postcolonial and new nations in Asia; and contemporary issues facing the A/P/A community in the U.S. Major themes include migration, racism, gender, and colonialism.

HIST-206-01 - History - 2009-2010
(Spring) African Cities: Development Dreams and Nightmares in the Twentieth Century
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
African cities demonstrate the failure of models of development with the aim and ideal of industrialization. This course examines the empty promises of modernity through the lens of African urban history using fiction, film, and city archives. Beginning with Timbuctu and Cairo, the course explores the emergence and decline of trade entrepots, the rise of colonial cities, and the dilemmas of postcolonial economies and polities. Dar es Salaam, Nairobi, Kampala, Kinshasa, Harare, Johannesburg, Lagos, Accra, and Dakar are among the cities studied. Designed for those seeking only an introduction to development as well as those with further ambitions, it assumes no previous knowledge of Africa.

(Fall) History of Global Inequality - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Community-based learning course)
Why are some nations so much richer and more powerful than others? This course demonstrates that global inequality is not natural; it has a history.
Exploring patterns of exchange that developed among regions of the world over the past 600 years, we will ask about the role of power in the establishment of practices of production and exchange. We will explore how cross-regional productive systems benefited some participants at the expense of others. Having traced the consequences of unequal exchange over several centuries, we will ask how global trade and production would have to change for all participants to benefit equally. The course includes a community-based learning component.

(Spring) The Crusades and the Making of Medieval Europe - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Same as Medieval Studies 217s)
The medieval Crusades were a strange mixture of romantic sensibility, religious inspiration, and bloodthirsty xenophobia. How was it that Western Christendom was inspired to recover the Holy Land in 1099, coming face to face with two other great civilizations: Byzantium and Islam? What was the aftermath? Topics considered will include the exploration of violence in Eastern Europe, medieval pilgrimage to holy places and the idea of a "holy land," the structure and divisions within Islam, chivalric culture, and the idea of crusading martyrdom.

(Fall) Special Topics in Medieval History: Tudor England: The World of Henry VIII and Elizabeth I
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
At the beginning of the fifteenth century England was an island backwater on the edge of Europe. Two centuries later it was a major player on the European stage. This course, beginning with the context of medieval English life in 1399, progresses to the realization of the early modern English state at the death of Elizabeth in 1603. Principal topics for lectures and student discussion are dynasticism, religious upheaval, and the power of monarchs from Richard II to James I.

(Spring) African Popular Culture - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This class uses popular music, dance, fiction, film, street art, bus slogans, newspapers, and other sources to document African interpretations of the decades since "flag independence" in 1960. We will let African musicians, writers, filmmakers, and artists direct our investigation of the big questions of the class: Why is the gap between rich and poor in African societies increasing? What is happening to gender relations? What do African people think of their political leaders and how do they imagine political situations might improve?

HIST-255-01 - History - 2009-2010
(Spring) The Long Nineteenth Century - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
The long nineteenth century, from the French to the Bolshevik Revolution, was the period from which modern Europe emerged. New political philosophies, socio-cultural changes, rising imperialism, and increasing competition for territories, compelled Europe to develop. Rapid scientific change also contributing to widespread economic and demographic changes, which in turn drove the increased political participation of ordinary Europeans. The map of Europe was drastically altered by four major revolutionary upheavals, which we will examine as we explore how political change was interrelated to industrial, scientific, economic, and social change across Europe as the modern age was begun.

(Fall) American Women's History, From Settlement to Reconstruction - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Same as Gender Studies 206f(01))
Introduction to major themes in U.S. history through the lens of women's history. Located both near the centers of power in American society and at its margins, the history of women as a social group is one of conflict and diversity. While women do not make up a coherent group, all share the unique experience of being "women" in class, racial, and religiously specific ways. Themes include Native American and Hispanic women during European contact and settlement; the impact of the American Revolution; benevolent women and the "fallen" women they hoped to help; enslaved women and the plantation mistress; women in the multicultural west; women's involvement in the Civil War and Reconstruction.

(Fall) Topics in the Recent History of the United States: Sexual Revolutions in U.S. History
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Preamble (for topics courses): These courses are designed for students with a background in American history who wish to focus attention on developments since the late nineteenth century.

This class will evaluate the notion of "sexual revolutions" by examining three moments in U.S. history; the late eighteenth century, the turn of the twentieth century, and the 1960s and 1970s. In each, we will look at shifts in the relationships between race, class, gender, and sexuality. Our history will include the role of experts in the fields of religion, medicine, sexology, and psychology and their efforts to define sexual deviance and promote sexual "normality." At the same time, we will study popular and subcultural sexual cultures found in brothels, bars, same sex institutions, sports, bohemian circles, and political groups and look for strategies of resistance to normative regimes.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Latin American Studies 287f)
Latin America's inequalities have led to the exclusion of millions of voices from official historical documents. These voices emerge in testimonial literature, a literary genre where scholars create a written account of the "testimonies" of marginalized individuals. The factors that influence the production of testimonial literature will be explored through memory, authorship, and first world/third world relations, using I, Rigoberta Menchu: An Indian Woman in Guatemala, and the debates that arose after she won the Nobel Peace Prize. The class focuses on issues of subjectivity, identity, and discourse analysis as tools for using testimonial literature as a historical source.

(Fall) Colloquium: Race, Gender, and Empire: Cultural Histories of the United States and the World
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(History 301, American Studies 301)
Recent cultural histories of imperialism--European as well as U.S.--have illuminated the workings of race and gender at the heart of imperial encounters. This course will examine the United States' relationship to imperialism through the lens of such cultural histories. How has the encounter between Europe and America been remembered in the United States? How has the cultural construction of "America" and its "others" called into play racial and gender identities? How have the legacies of slavery been entwined with U.S. imperial ambitions at different times? And what can we learn from transnational approaches to "the intimacies of empire?"

(Spring) Colloquium: States and Sovereignty in the British Empire - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Speaking-intensive)

In its colonies, Britain had to negotiate the claims and interests of a diverse group of people, from settlers to ex-slaves and indigenous populations. The questions addressed had tremendous consequences for the forging of an international global order: Did indigenous peoples have rights comparable to those of white settlers? Did slave emancipation require a new political order? What rights were possessed by preexisting indigenous states? When were colonies "ready" for independence? In this colloquium we discuss some of the central intellectual concerns addressed by British colonial policy, namely those that concerned the rights and sovereignty of people and states in the modern era.

(Spring) Colloquium: Segregation: Origins and Legacies - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

This colloquium will explore the historical debates about the causes and timing of racial segregation, its effects on African Americans and social inequality, and its most resistant legacy in the twentieth century, residential segregation. Violence against blacks, the use of gender to bolster segregation, biracial alliances and the onset of disfranchisement, the nationalist character of segregation, and black resistance to segregation will be prominent themes. Weekly readings will include primary and secondary works, documentary films, and historical fiction.

HIST-323-01 - History - 2009-2010
(Spring) Germans, Slavs, and Jews, 1900-1950
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary research in the history of particular times and places, resulting in a substantial piece of historical writing.

This course explores relations among Germans, Slavs, and Jews in Central and Eastern Europe before, during, and after the First and Second World Wars. Emphasis lies on tracing continuities and ruptures in nationalist and racist ideologies and policies, from late imperial Germany and Austria through the interwar republics and then on to the Third Reich and the post-Nazi regimes. Topics covered include the Holocaust, Nazi treatment of Poles, and the expulsion of millions of ethnic Germans from Poland and Czechoslovakia after 1945, but also mutual accommodation, assimilation, liberal group rights, and the ambiguities of who was German or Slavic or Jewish in the first place.

(Spring) Late Antiquity: The Decline and Fall of the Roman Empire - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary research in the history of particular times and places, resulting in a substantial piece of historical writing.

In his masterpiece, The Decline and Fall of the Roman Empire, Edward Gibbon catalogued the end of the classical era, "during which the condition of the human race was most happy and prosperous." We shall reexamine the various factors and forces Gibbon blamed for decline in light of modern research: barbarian invasions, the rise of Christianity, economic decay, and social dislocation, as well as investigating new discoveries and modern interpretations of the "transformations of Late Antiquity."

(Same as Asian Studies 331)
Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.
A research seminar on Japan's imperial venture from its inception in the 1870s to its rapid expansion and calamitous defeat in the 1940s. The enormous size of the Japanese empire at its height demands that we study a wide variety of local situations, indigenous peoples, and specific adaptations of and to Japan's imperial style and organization. After initial secondary readings, each student will identify a research question then discover her own sources to answer it in a 20-page final essay.

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.
This seminar focuses on the extreme failure of accountability commonly called political corruption. How do economic conditions shape political realities, and how do political conditions shape economies? We consider precocolial forms of exchange, the social and political conflicts engendered by nineteenth-century integration into a global economy, and ask how the modernizing projects that were supposed to lead to efficient, representative governance and dynamic economic growth have instead yielded forms of rule that consume their populations. Evaluation will be based on participation, short written reflections on each reading, and a substantial research paper.

(Medieval Studies 300(01))
Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.
This survey of Western monasticism from its origins in the Egyptian desert to the mendicant orders of fourteenth-century Europe seeks to understand what motivates men and women to define perfection as abnegation of food, sex, wealth, success, and even laughter—all that we now consider valuable in life. Topics: fasting, virginity, voluntary poverty; monastic rules and reform movements (e.g., Celtic, Benedictine, Cistercian, Franciscan, etc.). Also various saints' lives, mysticism, and women's spirituality. Course includes a stay at the Abbey of Regina Laudis.
Prerequisites: permission of instructor; 8 credits in history; written application prior to academic advising period is required; History 120, 232, or courses in medieval studies

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.
This course explores cultural and social transformations (especially in England) on the eve of "modernity." Class discussions will ordinarily focus on selections from major English writers of the period (Chaucer, Gower, and Malory, for example), and on the relationship between their writings and other kinds of evidence about the world in which they wrote. In consultation with instructors and colleagues, students will also be expected individually to locate, analyze, and interpret a collection of primary sources such as court records, chronicles and correspondence from a culture of their choosing in order to write a final essay on one dimension of the late medieval world.

(Spring) Modern Europe: The Nineteenth Century: Women, Deviance, and Crime in Early Modern Europe
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Gender Studies 333-09)
Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary research in the history of particular times and places, resulting in a substantial piece of historical writing.
We will examine the relationship between gender and deviance in early modern Europe, with a particular focus on the ways European societies and criminal courts dealt with women and family. We will examine social life and norms in order to understand the nature of "normality" and "deviance" as these terms applied to women, and investigate the system of criminal law and justice in Europe generally, including problems of evidence, torture, and state-sanctioned violence. We will discuss the particular crimes associated with women, especially witchcraft, sexual misdeeds, and "reproductive" crimes such as abortion and infanticide.
