This course provides an overview of statistical methods, their conceptual underpinnings, and their use in various settings taken from current news, as well as from the physical, biological, and social sciences. Topics will include exploring distributions and relationships, planning for data production, sampling distributions, basic ideas of inference (confidence intervals and hypothesis tests), inference for distributions, and inference for relationships, including chi-square methods for two-way tables, analysis of variance, and regression.

Prerequisites: 2 years of high school algebra
Notes: 4 meetings (50 minutes)
Instructors: Ms. J. Gifford

STAT-240-01 - Statistics - 2001-2002
(Spring) Elementary Data Analysis and Experimental Design
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

A fundamental fact of science is that repeated measurements exhibit variability. The course presents ways to design experiments that will reveal systematic patterns while "controlling" the effects of variability and methods for the statistical analysis of data from well-designed experiments. Topics include completely randomized, randomized complete block, Latin Square and factorial designs, and their analysis of variance. The course emphasizes applications, with examples drawn principally from biology, psychology, and medicine.

Prerequisites: Interdepartmental 100 or any 100-level course in Mathematics or Statistics
Notes: 4 meetings (50 minutes)
Instructors: Ms. J. Gifford
STAT-295-01 - Statistics - 2001-2002
(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph, permission of department
Instructors: The department

STAT-295-01 - Statistics - 2001-2002
(Spring) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph, permission of department
Instructors: The department

STAT-334-01 - Statistics - 2001-2002
(Spring) Biostatistics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Biological Sciences 334s)

(Fall) Applied Regression Methods
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course includes methods for choosing, fitting, evaluating, and comparing statistical models; introduces statistical inference; and analyzes data sets taken from research projects in the natural, physical, and social sciences.
Prerequisites: Mathematics 211 or any Statistics course
Notes: 3 meetings (50 minutes)
Instructors: Mr. G. Cobb

STAT-341-01 - Statistics - 2001-2002
(Spring) Linear Statistical Models
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Mathematical concepts from linear algebra and n-dimensional Euclidean geometry, together with statistical concepts of estimation and hypothesis testing, are developed and used to construct a unifying theory for two classes of applied methods: analysis of variance and regression analysis. The theory is developed in three stages: least squares and orthogonal projections; moment assumptions and the Gauss-Markov theorem; and the normal distribution and F-tests.
Prerequisites: Mathematics 211, Statistics 240 and 340
Notes: 4 meetings (50 minutes); offered alternate years
Instructors: The department

STAT-342-01 - Statistics - 2001-2002
(Fall) Probability
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
(Mathematics 342f)
This course develops the ideas of probability simultaneously from experimental and theoretical perspectives. The laboratory provides a range of experiences that enhance and sharpen the theoretical approach and, moreover, allows us to observe regularities in complex phenomena and to conjecture theorems. Topics include: introductory experiments; axiomatic probability; random variables, expectation, and variance; discrete distributions; continuous distributions; stochastic processes; functions of random variables; estimation and hypothesis testing.
Prerequisites: multivariable calculus
Notes: 2 meetings (75 minutes), 1 lab (50 minutes); offered alternate years at Mount Holyoke and Smith Colleges; offered at Mount Holyoke in fall 2001
Instructors: Mr. L. Senechal

STAT-343-01 - Statistics - 2001-2002
(Spring) Mathematical Statistics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

This course is an introduction to the mathematical theory of statistics and to the application of that theory to the real world. Topics include probability, random variables, special distributions, introduction to estimation of parameters, and hypothesis testing.

Prerequisites: Mathematics 202, 203, and 342 recommended

Notes: 2 meetings (90 minutes); offered every spring semester alternately at Mount Holyoke and Smith Colleges; offered at Mount Holyoke spring 2002

Instructors: Mr. G. Cobb

STAT-344-01 - Statistics - 2001-2002
(Spring) Seminar in Statistics and Scientific Research - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

This course is a study of statistical principles and practice as applied to the analysis of a variety of research projects in the natural, physical, and social sciences. It emphasizes the factors that influence the choice of statistical methods and evaluates these methods as tools for research.

Prerequisites: Statistics 340 or permission of instructor

Notes: 3 meetings (50 minutes); offered alternate years; next offered spring 2003

Instructors: The department

STAT-395-01 - Statistics - 2001-2002

Theatre Arts

THEAT-100-01 - Theatre Arts - 2001-2002
(Fall) Introduction to Theatre
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)

A study of how theatre represents and interprets social reality. Topics include key examples of performance art throughout history and across cultures. Students will learn firsthand the work of directors, actors, and designers by studying about and taking part in current productions in the department. Close analytical readings of play texts and critical/theoretical essays will be supplemented by workshops in the various stagecrafts, by attending live and recorded performances, and by staging students' own theatrical work.

Notes: 2 meetings (2 hours) and lab/crew
Instructors: Ms. A. Smith-Howard

THEAT-105-01 - Theatre Arts - 2001-2002
(Fall) Performance I
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
An introduction to performance through a variety of improvisational exercises designed for developing basic techniques. After exploring visual, aural, tactical, and scripted performance sources, the students will rehearse and present two performance projects.
Notes: 2 meetings (2 hours) and lab/crew; $5 lab fee
Instructors: Ms. J. Devlin
Expected enrollment: 17

THEAT-105-01 - Theatre Arts - 2001-2002
(Spring) Performance I
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
An introduction to performance through a variety of improvisational exercises designed for developing basic techniques. After exploring visual, aural, tactical, and scripted performance sources, the students will rehearse and present two performance projects.
Notes: 2 meetings (2 hours) and lab/crew; $5 lab fee
Instructors: Ms. M. Lopez

THEAT-115-01 - Theatre Arts - 2001-2002
(January) The Professional Audition: Getting Cast
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
With a working professional, you will choose, prepare and present two contrasting theatre audition monologues that are right for you. Rehearsed in class, these monologues become the final project and will be presented and critiqued before professional casting directors. Student evaluations also include assuming the role of casting director in order to provide a written critique of each other's work. Additional topics to be covered include photos, resumes, interviews, cold readings, and callbacks.
Instructors: Ms. S. Daniels
Expected enrollment: 10

THEAT-120-01 - Theatre Arts - 2001-2002
(Fall) Topics in Design - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): Various topics in theatrical design, or in related design fields, including theory, practice, and history. Subjects may include opera performance and design, costume crafts, domestic interiors, and materials and techniques. The course combines historical study with studio work.
Prerequisites: Theatre Arts 100, a studio art course or permission of instructor
Notes: 2 meetings (2 hours) and lab/crew
NOTE: Purchase of design supplies and materials is the responsibility of the student.
Instructors: The department

THEAT-120-01 - Theatre Arts - 2001-2002
(Spring) Topics in Design - *Not offered this year/term
THEAT-180-01 - Theatre Arts - 2001-2002
(Fall) Introduction to Technical Theatre
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course offers a study of the construction and operation of stage scenery and evolving theories and current practices of theatre technology.
Students will work interpreting designs for department productions.
Notes: 2 meetings (75 minutes) and lab/crew
Note: Purchase of design supplies, materials, and theatre tickets is the responsibility of the student.
Instructors: Ms. S. Hayden
Expected enrollment: 12

THEAT-208-01 - Theatre Arts - 2001-2002
(January) Master Class in Acting
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Laura Yusem, one of Argentina's leading directors and teachers will offer a master class in acting during J-Term. The class will include Scene Study, Script Analysis as well as body and dream work that helps to free the unconscious. The connection of actor to character in all visceral ways is at the heart of her technique.
Notes: course offered 10:00 am to 3:00 pm for one week during J-Term.
Instructors: Ms. L. Yusem
Expected enrollment: 10

THEAT-210-01 - Theatre Arts - 2001-2002
(Fall) Performance II - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A continuation of the techniques developed in Performance I with additional work in scene study, mask characterization, and physical theatre. The student will rehearse and present two performance projects. Readings will be selected from works by Peter Brook, Tadashi Suzuki, Uta Hagen, and others.
Prerequisites: Theatre Arts 100, 105, 110 or permission of instructor
Notes: 2 meetings (2 hours) and lab/crew; $5 lab fee
Instructors: Ms. J. Devlin
Expected enrollment: 14

THEAT-220-01 - Theatre Arts - 2001-2002
(Spring) Performance II - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A continuation of the techniques developed in Performance I with additional work in scene study, mask characterization, and physical theatre. The student will rehearse and present two performance projects. Readings will be selected from works by Peter Brook, Tadashi Suzuki, Uta Hagen, and others.
Prerequisites: Theatre Arts 100, 105, 110 or permission of instructor
Notes: 2 meetings (2 hours) and lab/crew; $5 lab fee
Instructors: Ms. J. Devlin
Expected enrollment: 15

THEAT-211-01 - Theatre Arts - 2001-2002
(Fall) Topics in Performance - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This course offers a specific approach to performing. Topics include Suzuki actor training, mask characterization, physical theatre techniques, Shakespeare, and vocal training, among others.
Instructors: The department
THEAT-211-01 - Theatre Arts - 2001-2002
(Spring) Topics in Performance: Training the Actor's Voice
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This course offers a specific approach to performing. Topics include Suzuki actor training, mask characterization, physical theatre techniques, Shakespeare, and vocal training, among others. After completing a series of exercises to free the body and voice of excess tension, the student will explore exercises and projects designed to develop vocal strength, projection, flexibility, and clarity.
Prerequisites: Theatre Majors/Minors, Sr., Jr., Theatre Arts 100, 105, 110 or permission of instructor.
Notes: 2 meetings (2 hours) and lab/crew
Instructors: Ms. M. Lopez

THEAT-218-01 - Theatre Arts - 2001-2002
(Fall) Writing Radio Drama: Theatre of the Mind
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)
The interest in books-on-tape has revived an interest in audio drama. This class focuses on the skills of writing and performing for the ear with an emphasis on original storytelling. Each original play will be taped for broadcast. Class includes a visit to the Museum of Broadcasting in New York.
Prerequisites: Theatre Arts 100, one writing course and permission of instructor
Notes: 1 meeting (3 hours)
Instructors: Ms. R. Down
Expected enrollment: 14

THEAT-220-01 - Theatre Arts - 2001-2002
(Fall) Scene Design
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Students will learn how to read a text from a designer's perspective and also to develop a designer's conceptual process of thinking. An interdisciplinary approach integrating visual art, dance and body expression, textual analysis, and anthropological research.
Prerequisites: Theatre Arts 100, 120, a studio art course or permission of instructor
Notes: 2 meetings (2 hours) and lab/crew
NOTE: Purchase of design supplies and materials is the responsibility of the student.
Instructors: Mr. L. Soto
Expected enrollment: 10

THEAT-224-01 - Theatre Arts - 2001-2002
(Spring) Costume Design
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
The art and practice of designing costumes for theatre and opera. Students investigate the creative process and technical skills of design, read plays and librettos, and conceive their own designs. The course surveys the history of world clothing and of costume design for the performing arts. Students provide their own materials.
Prerequisites: Theatre Arts 100, 120, a studio art course or permission of instructor
Notes: 2 meetings (2 hours) and lab/crew
Instructors: Mr. L. Soto
Expected enrollment: 10

THEAT-226-01 - Theatre Arts - 2001-2002
(Spring) Lighting Design - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Study of light as a design medium using color, intensity, distribution, and movement. Formulation of lighting designs with plots, sections, and control charts. Practical application in theatre productions.
Prerequisites: Theatre Arts 100, 120 or permission of instructor
Notes: 2 meetings (2 hours) and lab/crew;
NOTE: Purchase of design supplies, materials, and theatre tickets is the responsibility of the student.
Instructors: Mr. J. Howard
Expected enrollment: 12

THEAT-228-01 - Theatre Arts - 2001-2002
(Fall) Topics in Design
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): Various topics in theatrical design, or in related design fields, including theory, practice, and history. Subjects may include opera performance and design, costume crafts, domestic interiors, and materials and techniques. The course combines historical study with studio work.

Instructors: The department

THEAT-228-01 - Theatre Arts - 2001-2002
(Fall) Topics in Design: Rendering Techniques for Costume Designers
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): Various topics in theatrical design, or in related design fields, including theory, practice, and history. Subjects may include opera performance and design, costume crafts, domestic interiors, and materials and techniques. The course combines historical study with studio work.
This course is based on direct observation of nude and live costumed models. Students explore how to represent different textures, surfaces, and textile patterns through the use of different media, such as water color, crayons, acrylic, etc. Research in different periods and design styles will be part of the class.
Prerequisites: Theatre Arts 100 or one studio art course and portfolio review by instructor
Notes: 2 meetings (2 hours) and lab/crew; lab fee
NOTE: Purchase of art supplies and materials is the responsibility of the student.
Instructors: Mr. L. Soto
Expected enrollment: 10

THEAT-228-01 - Theatre Arts - 2001-2002
(Spring) Topics in Design: Rendering Techniques for the Set Designer
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): Various topics in theatrical design, or in related design fields, including theory, practice, and history. Subjects may include opera performance and design, costume crafts, domestic interiors, and materials and techniques. The course combines historical study with studio work.
The representation of visual concepts for the stage using dramatic texts and theatrical imagination. Students will learn to develop their ideas on canvas, paper, etc. They will learn how to portray light, color, atmosphere, proportion and the illusion of depth. Students will research works of art and techniques drawn from different artistic visions.
Prerequisites: Theatre Arts 100 or one studio art course and a portfolio review by instructor.
Notes: 1 meeting (3 hours) and lab/crew. NOTE: Purchase of art supplies and materials is the responsibility of the student.
Instructors: Mr. L. Soto
Expected enrollment: 10

THEAT-228-02 - Theatre Arts - 2001-2002
(Spring) Topics in Design: Sound Design
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): Various topics in theatrical design, or in related design fields, including theory, practice, and history. Subjects may include opera performance and design, costume crafts, domestic interiors, and materials and techniques. The course combines historical study with studio work.
This course examines the theory, practice, and history of theatrical sound design. The course will make use of classroom projects and the current Rooke Theatre productions to develop the students' sound designs. We will use computers extensively for editing and playback. A working knowledge of Windows and the Internet is required.
Prerequisites: Theatre Arts 100 or permission of instructor.
Notes: 2 meetings (2 hours); lab/crew
Instructors: Mr. J. Howard
Expected enrollment: 10

THEAT-251-01 - Theatre Arts - 2001-2002
(Fall) History of World Theatre I: Antiquity to Early Modern Times - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A cross-cultural survey of theatre in society, from ancient rituals and classical Greece to Japanese noh and kabuki, to the European Renaissance, to the beginnings of realistic drama about 1800. A study of theatre arts and dramatic texts in various moments and movements as they reflect and transform particular societies.
Notes: 2 meetings (75 minutes)
Instructors: Ms. A. Smith-Howard

THEAT-252-01 - Theatre Arts - 2001-2002
(Fall) History of World Theatre II: 1800 to the 1920s - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A cross-cultural survey of theatre in society. Topics include melodrama, the rise of realism (Ibsen to Chekhov), surrealist and expressionist reactions (Strindberg, Reinhardt, Craig, Appia, Piscator, Pirandello), Irish developments (Wilde, Shaw, Yeats, Synge, O'Casey), Dadu, early Brecht and O'Neill, Asian theatre (India, Peking Opera; masks, puppetry, dance forms). A study of theatre arts and dramatic texts in various moments and movements as they reflect and transform particular societies.

Notes: 2 meetings (75 minutes)
Instructors: Ms. A. Smith-Howard

THEAT-253-01 - Theatre Arts - 2001-2002
(Spring) History of World Theatre III: 1920s to the Present - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A cross-cultural survey of theatre in society. Topics include Brecht's epic theatre, American and African American playwrights (Williams, Miller, Hansberry, Wilson, Shepard, Wasserstein), Theatre of the Absurd and the avant-garde, postcolonial practices worldwide (African masquerade, Latin carnival, guerilla/development theatre), and contemporary performance art. A study of theatre arts and dramatic texts in various moments and movements, as they reflect and transform particular societies.

Notes: 2 meetings (75 minutes)
Instructors: Ms. A. Smith-Howard

THEAT-281-01 - Theatre Arts - 2001-2002
(Fall) Shakespeare
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(English 211f)
A study of some of Shakespeare's plays, emphasizing both the poetic and the dramatic aspects of his art, with attention to the historical context and varieties of critical interpretations, including those of the twentieth century. Nine or ten plays.
Prerequisites: soph, second-semester fy with permission of instructor
Notes: 2 meetings (75 minutes) or 3 meetings (50 minutes)
Instructors: Mr. F. Brownlow

THEAT-281-01 - Theatre Arts - 2001-2002
(Spring) Shakespeare
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(English 211f)
A study of some of Shakespeare's plays, emphasizing both the poetic and the dramatic aspects of his art, with attention to the historical context and varieties of critical interpretations, including those of the twentieth century. Nine or ten plays.
Prerequisites: soph, second-semester fy with permission of instructor
Notes: 2 meetings (75 minutes) or 3 meetings (50 minutes)
Instructors: Mr. E. Hill

THEAT-282-01 - Theatre Arts - 2001-2002
(Fall) Theatre Practicum
Credits/PE Units: 2-4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): A laboratory course based on the creation and performance of a department production, involving dramaturgical research and rehearsal, the intersection of theory and practice. Each practicum will include various production-related responsibilities--developing scripts, designing and preparing the show, participating in the cast or crew, writing postproduction critiques. The nature of the practicum (and the amount of credit) will depend on each faculty director's particular intentions for a given production.
Prerequisites: by audition or interview only

THEAT-282-01 - Theatre Arts - 2001-2002
(Fall) Theatre Practicum:: Night of the Iguana
Credits/PE Units: 2-4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): A laboratory course based on the creation and performance of a department production, involving dramaturgical research and rehearsal, the intersection of theory and practice. Each practicum will include various production-related responsibilities--developing scripts, designing and preparing the show, participating in the cast or crew, writing postproduction critiques. The nature of the practicum (and the amount of credit) will depend on each faculty director's particular intentions for a given production.
Prerequisites: by audition or interview only.
Instructors: Ms. J. Devlin
THEAT-282-01 - Theatre Arts - 2001-2002
(Spring) Theatre Practicum: Hamlet
Credits/PE Units: 2-4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): A laboratory course based on the creation and performance of a department production, involving dramaturgical research and rehearsal, the intersection of theory and practice. Each practicum will include various production-related responsibilities—developing scripts, designing and preparing the show, participating in the cast or crew, writing postproduction critiques. The nature of the practicum (and the amount of credit) will depend on each faculty director’s particular intentions for a given production.
Rehearsal and production of Shakespeare’s *Hamlet*, to be presented April 2002.
Prerequisites: by audition or interview only
Instructors: Ms. A. Smith-Howard

THEAT-282-02 - Theatre Arts - 2001-2002
(Fall) Theatre Practicum
Credits/PE Units: 2-4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): A laboratory course based on the creation and performance of a department production, involving dramaturgical research and rehearsal, the intersection of theory and practice. Rehearsal and performance of a department production to be presented November 2001.
Prerequisites: audition or interview only
Instructors: The department

THEAT-283-01 - Theatre Arts - 2001-2002
(Fall) Management: Stage Management - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course will examine stage management techniques for academic, professional, and community theatre and explore the role of the stage manager in these various theatre environments. Each student will be required to stage manage a production. Students will also be required to see and evaluate theatrical productions in the area.
Prerequisites: 1 100-level theatre arts course or permission of instructor
Notes: 2 meetings (2 hours) and lab/crew
NOTE: Theatre tickets, supplies, and materials are the responsibility of the student.
Instructors: S. Hayden

(Spring) Theatre and Community: Playwriting through Oral History
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): (Community-based learning course) As part of Mount Holyoke’s community-based learning program, the course offers practical opportunities for students to collaborate on various theatre projects with people in various communities—in local towns, in the Five Colleges, or on campus.
A playwriting course in which works, based on interviews, will be adapted for the stage. Interviewing skills and adaptation techniques will be emphasized as students from Mount Holyoke and Pioneer Valley Performing Arts High School will conduct interviews on a subject to be decided by the class.
Prerequisites: one writing course
Notes: 1 meeting (3 hours)
Instructors: Ms. R. Down
Expected enrollment: 7

THEAT-295-01 - Theatre Arts - 2001-2002
(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: permission of instructor
Instructors: The department

THEAT-295-01 - Theatre Arts - 2001-2002
(Spring) Independent Study
THEAT-309-01 - Theatre Arts - 2001-2002
(Fall) Topics in Performance: Acting Shakespeare II
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This course offers a specific approach to performing. Topics include Suzuki actor training, mask characterization, physical theatre techniques, Shakespeare, and vocal training, among others. An advanced study of acting techniques for performing Shakespeare. Topics will include, but are not limited to: textual analysis, vocal and physical flexibility, and character development.
Prerequisites: Theatre Arts 211 (Shakespeare I) and audition
Notes: 2 meetings (2 hours) and lab/crew; lab fee
Instructors: Ms. A. Smith-Howard

THEAT-309-02 - Theatre Arts - 2001-2002
(Fall) Topics in Performance: Directing Emily Dickinson
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This course offers a specific approach to performing. Topics include Suzuki actor training, mask characterization, physical theatre techniques, Shakespeare, and vocal training, among others. This course will focus on the work of Emily Dickinson and culminate in a production.
Prerequisites: two performance courses (at least one at the 200 level) and permission of instructor
Notes: 2 meetings (2 hours) and lab/crew; lab fee
Instructors: Mr. H. Teschke

THEAT-310-01 - Theatre Arts - 2001-2002
(Spring) Directing
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
The art of directing, with equal emphasis on the director/actor relationship, text analysis and interpretative skills, and collaboration with designers and technical directors. Students direct theatre students in scenes, performance pieces, and short plays.
Prerequisites: 8 credits in department (including either Theatre Arts 105, 110, 210, or 211), and permission of instructor
Notes: 2 meetings (2 hours) and lab/crew; $5 lab fee
Instructors: Ms. A. Smith-Howard

THEAT-311-01 - Theatre Arts - 2001-2002
(Fall) Advanced Acting/Directing - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Continuing the study of acting through exercises, improvisations, and the rehearsal and presentation of scenes from dramatic literature. Actors have the opportunity to direct their own work.
Prerequisites: Theatre Arts 210, 211, 310 or permission of instructor
Notes: 2 meetings (2 hours) and lab/crew; $5 lab fee
Instructors: Ms. J. Devlin

THEAT-314-01 - Theatre Arts - 2001-2002
(Spring) Renaissance Drama - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(English 314s)
English tragedy, comedy, and tragicomedy of the Renaissance and Restoration, exclusive of Shakespeare. (Fall) Feminist Approaches to Literature: Women Writers: Nineteenth-Century American Women Writers
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(English 270f)
In this cross-cultural examination of nineteenth-century American women writers, we will compare a number of works of fiction, prose, poetry, and autobiography. We will discuss how writers created sophisticated and insightful critiques of American culture and imagined or re-presented new American identities and histories. We will also consider tensions between "sentimental" idealism and political pragmatism, restrictive domesticity and dangerous autonomy, and passionless femininity and expressed sexuality. Authors may include Alcott, Child, Far, Fuller, Harper, Hopkins, Ruiz de Burton Wilson, and Winnemucca.

(Fall) Interdisciplinary Seminar: Globalization and Fundamentalization
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Preamble (for topics courses): This course offers advanced students an opportunity to investigate with some sophistication a problem that requires careful attention to research methods, to critical literature, and to writing. Seminar topics include people, periods, or problems that have a particular bearing on religion in America.

The worsening problems of global environmental and social destruction, including the oppression of women, are frequently attributed either to economic and cultural globalization or ethno-religious fundamentalism. However, in what ways do globalization and fundamentalism reinforce each other? What theories and social movements provide more balanced alternatives to the extreme models of psychological and social development represented by both these forces? This course will seek answers to these questions in relation to case studies of ethno-religious as well as gender, race, and class struggles from both the Northern industrialized and impoverished Southern countries.

(Spring) Interdisciplinary Seminar: The Long Shadow of Ann Hutchinson
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Religion 332s)

Preamble (for topics courses): This course offers advanced students an opportunity to investigate with some sophistication a problem that requires careful attention to research methods, to critical literature, and to writing. Seminar topics include people, periods, or problems that have a particular bearing on religion in America.

When Ann Hutchinson was banished from Boston in 1638, allegedly for teaching "antinomianism," she left behind a number of unresolved practical and theological puzzles concerning the interplay between body and spirit, grace and works, religion and politics. This course will explore the Hutchinson legacy by examining the social, sexual, and institutional permutations developed by several of Ann Hutchinson's "daughters," including among others, Ann Lee, Mary Baker Eddy, and Dorothy Day, and by reading contemporary theorists who address the continuing questions of belief, practice, and ethics.

African American and African Studies

(Fall) Introduction to African American and African Studies: Identity, Community, and Progress
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
In this introduction to the African American experience in twentieth-century America, historical, cultural, economic, political, and aesthetic elements of the urban African American experience are examined. Because of the interdisciplinary nature of African American studies, we consider methodological issues as they bear on the constitution of the African American subject, the descriptive edifices of the contemporary African American community, and programs for liberation.

(Fall) Chocolate Cities and Vanilla Suburbs
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course critically explores assumptions about cities and suburbs, examining how racial and class segregation affect metropolitan development. Using African Americans as a case study we examine the impact that race, class, and gender have on their lives in the city and suburbs. We will consider how "chocolate cities and vanilla suburbs" represent blacks' and whites' different social and political statuses. Other issues examined are gentrification, leisure and public space, gated communities, and public-private partnerships in regional development.
Prerequisites: African American and African Studies 101 or per instructor
Notes: 2 meetings (75 minutes)
Instructors: L. Prisock III

(Spring) African American Culture and Society
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
A theoretical examination of the cultural economy of race. Investigations center on the ways African Americans practically develop and contest "meaning" through their own readings of and uses for cultural products. Three problematics will be emphasized: representation, subjectivity, social inequality. What is at stake in various representations of blackness? What are the material effects of those representations? What are the social inequalities produced by race, gender, class, etc. processes? How are inequalities regulated/resisted in and through culture? What are the changing historical conditions under which agents produce (are produced by) race knowledges and black cultural politics?

(Fall) Luminous Darkness: African American Social Thought - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Examines the causes of and proposed solutions to "the Negro problem" in post-Civil War American social policy. Focuses on the life, work, and legacies of DuBois. Drawing on domestic and diasporic fictional and nonfictional depictions of black life in the "DuBoisian century" the course considers different responses to his 1903 question, "How does it feel to be a problem?" Review of theories and policies targeting blacks and their environment allows us to critique black modernity (as "exceptional" and/or "damaged"), assess the changing role of black intellectuals in society, evaluate "race theory" and consider dominant and marginal attempts to analyze and overcome the "color line" in America.

AMST-201-01 - American Studies - 2002-2003
(Spring) Introduction to the Study of American Culture: Migrations, Borders, and Myths
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive)
Preamble (for topics courses): What is "America?" A country, region, continent, or a hemisphere of diverse nations in the New World? More than a geographical space, "America" has always been shaped by movement, by the migration of diverse peoples across and within its changing and contested borders. Migrations involve not only physical journeys but personal, cultural, and political transformations. Internal and external borders impede the movement of certain peoples while impelling or forcing the movement of others. This course will explore how these multiple migrations shape our collective identity. What are the cultural myths that unite Americans with such diverse experiences of migration and border crossing? We will focus on specific historical examples of migration: early colonial encounters between Native Americans and Europeans; westward expansion and the flight from slavery in the nineteenth century; immigration both from abroad and from rural areas to cities in the twentieth century. Using films, literature, political documents, and visual images, we will explore the stories we have come to tell ourselves about the meaning of America and the movements of Americans, stories that continue to resonate with us today.

(Fall) Blood Magic: A Case Study in Cultural Anthropology
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
First-year seminar (Writing-intensive)
This is an introduction to cultural anthropology using the instructor's fieldwork at a temple for a Hindu goddess in India. A major festival is held when the goddess menstruates. Focusing on the cultures of the devotees, we delve into ethnocentrism, cultural relativism, methods, gender, kinship, social structure, economics, and religion. Students will work with field data and library materials to learn to provide a context for, and make sense of, another culture.

(Spring) Latin American Society and Culture
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course covers major topics in the social anthropology of Latin America, including patterns of land tenure, the colonial legacy and its impact on production and social formation, race and ethnicity, lowland indigenous societies, peasant studies, religion, development and underdevelopment, and social movements, including revolutions. It focuses on anthropological themes and controversies of historical and contemporary relevance.
The concept of "Asian America" developed in the 1960s in conjunction with the broader civil rights movement. Since the 1960s, new migration has dramatically changed the composition of Asian America, and new theoretical perspectives challenge us to reexamine the concept itself. While a clear division between Asia and the U.S. was inherent in the original concept of Asian America, more recent theories of hybridity, diaspora and transnationalism blur such clear-cut boundaries around national, ethnic and racial formations. In this course, we will examine these empirical changes in migration and ethnic identification as well as the shifts in theoretical paradigms for understanding them.

Preamble (for topics courses): This course offers a periodic examination of culture areas not covered in other area courses, such as Amazonia, Native North America, or Central Asia. Topics vary from year to year.

Using ethnographies, we explore current anthropological research in the Himalayas on caste, class, and ethnicity (and the violence they may engender); ritual and religion; love letters and literacy; modes of production; kinship and marriage customs; and gender segregation and women's communities. Delving into the way that these forms of knowledge and representations reflect Western ideas and biases about this region, we analyze the consequent imbalances in power relations and their implications for social life.

(Fall) Issues in Anthropology: Economic Anthropology

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Speaking- and writing-intensive)

Preamble (for topics courses): This course covers significant problems in the field of anthropology, with group meetings and reports.

How are production, distribution, and consumption organized in human societies? How are these activities related to institutions such as the family, gender, religion, and government? This course introduces the major competing theoretical approaches: formalist (allocation of scarce resources to maximize specified ends); substantivist (economic institutions function in terms of culturally specific values); and Marxist (modes of production organize structures of exploitation). We will evaluate these approaches by reading case studies from specific societies.

(Spring) Issues In Anthropology: Culture and Biology - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course, team taught by a biological and a cultural anthropologist, explores the interactions among human biological processes, external physical and biotic environments, and cultural worlds of social interactions, economies, technologies, and ideologies. It critically examines theories connecting biology and culture, including sociobiology, developmental systems theory, and other dialectical biocultural perspectives to understand the interaction among genes, biological milieus, environments, and culture. Topics include the evolution of sex, love, reproductive behavior, the etiology of disease and malnutrition, "race," gender determination and variation, personhood, and life stage.

(Fall) Special Topics in Anthropology: Political and Legal Anthropology

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Community-based learning course)

Preamble (for topics courses): This course covers significant problems in the field of anthropology, with group meetings and reports.

Rules and norms regulate people's lives in all societies, yet legal institutions and processes vary widely from one society to another. Each constructs and resolves problems of debt, theft, infidelity, and injury in different ways. How does legal consciousness differ along gender, ethnic, and class lines and how has it changed over time? How are legal systems related to hierarchies of power? Through a survey of the ethnographic literature, we will explore how people in African, Central American, East Asian, and North American societies have interpreted and negotiated law. Through community-based learning, students will see how community groups engage the legal system at various levels.

(Spring) Language in Culture and Society
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Every society is held together by systems of interpersonal and institutional communication. This course examines the nature of communication codes, including those based on language (speaking and writing) and those based on visual images (art, advertising, television). To understand communication in its social and historical dimensions, we study the psychological and cultural impact of media revolutions and then look at ways communication systems manipulate individual consciousness. Illustrative examples are drawn from Western and non-Western societies.

(Fall) Visualizing Cultures
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
In this course we go behind the scenes and behind the screens of anthropological films, television, museum exhibitions, and publications such as National Geographic Magazine, to explore the social contexts of their production, distribution, and interpretation. We consider how popular images of cultural "others" reveal the lives and times that produce them, and how, as sites of cultural exchange and political debate, such images shape and are shaped by relations of power. Further, we consider the diversity of local responses to images of cultural identity and begin to explore the complexities of "picturecultures" from different subject positions across the global mediascape.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking- and writing-intensive; Women's Studies 333s (06))
Preamble (for topics courses): This course covers significant problems in the field of anthropology, with group meetings and reports.
This course examines the research, debates, and contributions of feminist anthropology. Using the work of non-Western and Western women we ask: Why might feminist thinkers need anthropological research and why might anthropologists need feminists? Analyzing debates that have influenced understandings of gender and social relations crossculturally, we explore "Third World" feminists' critiques of Western anthropology, the dilemmas of fieldwork, methodology, the production of ethnography, and the impact of anthropology on the people with whom we are involved.

(Fall) Anthropology and Sexualities - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This seminar focuses on contemporary anthropological scholarship concerned with the varieties of sexual expression in diverse cultural settings. We will read ethnographic accounts of sexual ideologies and the politics and practices of sexuality in Brazil, Japan, Native North America, India, and elsewhere. We will examine anthropological theories of sexuality with an emphasis on contemporary issues, including performance theory, "third gender" theories, sexual identity formulation, and techniques used by various societies to discipline the body.

(Spring) Anthropology of History
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking- and writing-intensive)
In this seminar we question the distinction between myth and history and consider the relationship of historical consciousness to memory, forgetting, and other types of temporal awareness. We then examine the relationships among literacy, art, nationalism, and the invention of tradition and test the limits of ethnohistory. Finally, we look at the ways in which relics, museums, and tourism have all helped make history - as fact, experience, or commodity - possible.

(Spring) Bringing It All Back Home: Anthropology of Contemporary United States and Britain - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Anthropologists are increasingly recognizing the epistemological and political difficulties of regarding non-Western peoples as "others" - as objects for social scientific consumption. Some have responded by focusing attention on their own sociocultural circumstances. This course examines both the
theoretical basis of the anthropological turn from "exotic" fieldwork and the results of the new research about the United States. Topics include youth subcultures, class, race, and suburban and inner-city lives.

*(Fall)* The Hellenistic World: From Alexander to Cleopatra  
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement  
Hellenistic art has often been regarded as a chaotic, decadent phase between the golden ages of classical Athens and imperial Rome. In fact, the period in the Mediterranean from the death of Alexander the Great in 323 B.C.E. to the Roman conquest of Egypt in 31 B.C.E. saw the creation of some of the greatest masterpieces of ancient art. The course addresses the new themes and purposes of art in a cosmopolitan culture with its competing centers (Pergamon, Rhodes, Antioch, Alexandria, and Rome); its private patrons, public museums, art historians, and critics; and its innovations in science and politics.  
Prerequisites: soph, jr, sr, or permission of the instructor

*(Spring)* Art and Spectacle in Ancient Rome - *Not offered this year/term*  
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement  
Much of Roman art and architecture was created to enhance and commemorate religious, political, and social rituals. The course explores themes of triumph, marriage, death, and sport by discussing buildings and objects within their public and private contexts of action. Beginning with Rome’s legendary origins in the eighth century B.C.E. and ending with its demise as a capital in the fourth century C.E., the course focuses on an especially creative period, the formation of the empire under Augustus.  
Prerequisites: soph, jr, sr, or permission of instructor

(Spring) Italian Renaissance Art - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This survey explores the development of painting, sculpture, and architecture in fifteenth- and sixteenth-century Italy with emphasis on Florence, Rome, and Venice as discrete cultural contexts for the work of Botticelli, Leonardo, Raphael, Michelangelo, and Titian.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: J. Varriano

ARTH-234-01 - Art History - 2002-2003
(Fall) Baroque and Rococo Art in Southern Europe
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This survey of seventeenth- and eighteenth-century art in Italy and Spain treats the major stylistic and thematic developments in painting, sculpture, and, to a lesser extent, architecture. Special emphasis is given to the vivid naturalism of Caravaggio and Velazquez, the refined classicism of the Carracci, and the impassioned manner of Bernini. Attention is also given to the different cultural contexts in which the works of art were first created and are now interpreted.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: J. Varriano

ARTH-235-01 - Art History - 2002-2003
(Spring) Baroque and Rococo Art in Northern Europe
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This survey of seventeenth- and early eighteenth-century art in Holland, Flanders, and France emphasizes the way in which widely divergent religious practices and governmental institutions affected the making of art in those countries. Rembrandt, Hals, Vermeer, Rubens, Van Dyck, and Poussin are among the artists discussed.
Prerequisites: soph, jr, sr, or permission of instructor

(Spring) Nineteenth-Century European Art: Neoclassicism to Impressionism - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course traces major developments in European painting during the periods traditionally designated by the terms neoclassicism, romanticism, realism, and impressionism. Through a chronological survey focusing primarily on French art, it explores themes such as the training and production practices of artists; the exhibition and criticism of art; the notion of modernity; artists' engagement with history, the exotic, nature, domesticity, and urban experience; the role of gender and class in the formulation of artistic subjects; and the relationship between painting and other pictorial media such as printmaking and photography.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: The department

ARTH-242-01 - Art History - 2002-2003
(Spring) History of Photography
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This survey course traces the rise and development of photography in the United States and, to a lesser extent, Mexico and the countries in Western Europe. It charts the wide range of work with the camera, including commercial, so-called "vernacular," and fine art projects, and considers pictures from photography's very beginnings in the mid-nineteenth century to today's practices. Among the major figures to be discussed are the early landscape photographers O'Sullivan and Watkins, the avant-garde photographers Stieglitz and Genthe, the Depression-era photographers Evans and Lange, and the so-called New Documentarians Arbus and Frank.
Prerequisites: soph, jr, sr, or permission of instructor
Instructors: A. Lee

(Fall) Building the Modern Environment: Architecture 1890-1990 - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
An exploration of major movements and personalities in architecture from the late nineteenth century to the present. Emphasizing the United States against the background of European developments, the course considers the search by architects, including Frank Lloyd Wright, Le Corbusier, and Frank Gehry, for a language of form and space that captures the contemporary spirit as it elevates society to a higher plane of existence. Discussion focuses on issues of technology and utopia, the skyscraper, and the collision of tradition, modernity, and postmodernism in architecture since 1945.

Prerequisites: soph, jr, sr, or permission of instructor

Notes: 3 meetings (50 minutes)

Instructors: M. Davis

**ARTH-244-01** - Art History - 2002-2003

*(Fall) Modern Art: 1885-1945*

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course examines the great ruptures in European art that today we call modernist. It relates aspects of that art to the equally great transformations in European society: revolutionary ferment, the rise and consolidation of industrial capitalism, colonization and its discontents, and world war. Among the major figures to be studied are Duchamp, Matisse, Malevich, Picasso, Seurat, and van Gogh.

Prerequisites: soph, jr, sr, or permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: A. Lee

*(Spring) Arts of Japan*

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

This course explores the special characteristics of Japanese art and architecture, from the early asymmetry of Jomon pottery and the abstraction of Haniwa figures to the later elite arts of the aristocratic, military, and merchant classes: narrative scroll painting, gold-ground screens, and the "floating world" of the color woodblock print. A historical survey of the arts of Japan, highlighting the interplay of art with religious and political issues.

Prerequisites: soph, jr, sr, or permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: A. Sinha

*(Fall) Issues in Art History: Mount Holyoke the Mountain*

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): This course is designed to broaden the traditional boundaries of a survey of a single period by concentrating on an important theme or issue that does not necessarily fit into the chronological subdivisions of art history. All aspects of the topic are studied, and the
literature and methods of other disciplines are invoked wherever relevant. Attention is paid to art history as a present-day construction and to the students' critical self-awareness.

This course focuses on the fall show at the Mount Holyoke College Art Museum, "Changing Prospects: The View from Mount Holyoke." By investigating representations of the Pioneer Valley in different media since the nineteenth century, we will address shifting attitudes toward our local environment. The story of Mount Holyoke invites discussion of the historical meanings of landscape, the politicized issues of location and identity, and the impact of technology and tourism.

Prerequisites: soph, jr, sr, or permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: B. Bergmann

ARTH-290-01 - Art History - 2002-2003
(Spring) Issues in Art History: The Total Work of Art: 1860-1940
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): This course is designed to broaden the traditional boundaries of a survey of a single period by concentrating on an important theme or issue that does not necessarily fit into the chronological subdivisions of art history. All aspects of the topic are studied, and the literature and methods of other disciplines are invoked wherever relevant. Attention is paid to art history as a present-day construction and to the students' critical self-awareness.

Throughout history many artists, architects, and designers broke down the boundaries between the arts. A single artist would design furniture, buildings, posters, dinnerware, light fixtures, and fashion - all to create an ensemble: a "total work of art." The class will explore connections between art, architecture, and design, with an emphasis on interior design and the decorative arts in the nineteenth and twentieth centuries. This course will include the Arts and Crafts Movement, Art Nouveau, Vienna Werkstatte, Maison Cubiste, Omega Workshops, De Stijl, German Werkbund, Bauhaus, l'Esprit Nouveau, Art Deco, and American Streamlined Design.

Prerequisites: soph, jr, sr, or permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: K. Koehler

(Fall) Issues in Art History: Illuminated Manuscripts: A Study of Image-to-Text Relationships
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): This course is designed to broaden the traditional boundaries of a survey of a single period by concentrating on an important theme or issue that does not necessarily fit into the chronological subdivisions of art history. All aspects of the topic are studied, and the literature and methods of other disciplines are invoked wherever relevant. Attention is paid to art history as a present-day construction and to the students' critical self-awareness.

Illumination, illustration, interpretation - these are all terms that can apply to the images in medieval and Renaissance manuscripts. While this course seeks to introduce students more generally to the history of manuscript painting from the sixth to the sixteenth centuries, primarily from western Europe, special emphasis will be placed on how these images relate(d) to the texts they adorn. Students will be required to give several brief presentations and write one lengthy paper.

Prerequisites: soph, jr, sr, or permission of instructor

Notes: 1 meeting (3 hours)

Instructors: M. McIlwain Nishimura

ARTH-300-01 - Art History - 2002-2003
(Fall) Seminar: Theory and Interpretation
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

The seminar explores the intellectual discipline of art history and closely examines the methods used for analyzing the visual arts across cultures and periods. The course is intended for upper-level students with a strong interest in art history and visual culture. Class discussions and research papers will challenge students to explore various scholarly approaches to art as well as analyze the relationship of the arts to social and cultural theories, gender discourses, and postmodern critiques of visual culture. The course is highly recommended for majors planning to pursue advanced study in art history.

Prerequisite: 8 credits in department or permission of instructor

Notes: 1 meeting (3 hours)

Instructors: A. Lee, A. Sinha

Expected enrollment: 12

_Seminar in Ancient Art: The Unearthed Cities of Vesuvius_

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Life on the Bay of Naples came to an abrupt halt in 79 when Vesuvius erupted, covering the surrounding sites and villas with lava and ash. The rediscovery of Pompeii and Herculaneum in the eighteenth century had a significant impact upon European art, extending the Grand Tour to the Bay and generating new styles in fashion and the decorative arts. The seminar examines the surviving art, architecture, and gardens created to the tastes of Roman citizens in the late republic and early empire. It considers the history of archaeological and art historical methods that shaped our knowledge of the Roman past and inspired recreations in art, theatre, and film to the present.

Prerequisites: some knowledge of ancient culture and/or European art of the eighteenth and nineteenth centuries or permission of the instructor

Notes: 1 meeting (3 hours)

Instructors: B. Bergmann

_Seminar in Twentieth-Century Art: Art of the 1960s_

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

The seminar will explore the artistic directions and trends defining the 1960s in America, spanning the rise of minimalism, pop art, color field painting, video, and performance art to the emergence of conceptual art around 1968. While at aesthetic odds and thematic cross-purposes, these movements are visually unified by a certain cool, impersonal, and detached stylistic character. By examining the work of artists as well as key critical texts, works, and films, the 1960s will be probed for its cultural and social complexity, a decade that many now view as marking the end of modernism with a radical consciousness that inspired innovative artist forms.

ARTH-360-01 - Art History - 2002-2003
(Spring) Seminar in Asian Art: Indian Films
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Asian Studies 360s (01))
The seminar will examine a selection of films in relation to India's urban culture in the twentieth century. We will screen old and new films, those belonging to the commercial industry - the Bollywood - and those made by directors who remain outside that industry. Our challenge will be to develop possible ways to understand the many facets of film culture in India. Using critical essays, class discussions, and research, we will explore the relationship of film to national politics, examine the global circulation of Indian films, analyze how films reflect the desires and fantasies of their audiences, and evaluate India's place in the history of world cinema.
Prerequisites: jr, sr, or permission of instructor; 8 credits in art (history) or film studies, including Film Studies 201 or permission of instructor
Notes: 1 meeting (3 hours), 1 screening (2 1/2 hours)
Instructors: A. Sinha

Introduction to Sanskrit, the classical language of India. Related to other Indo-European languages (including English) and the ancestor of most of the 16 major Indian languages (e.g., Hindi), Sanskrit is the medium of the literary classics, as well as of the texts of the Hindu, Buddhist, and Jain religions. The first semester course covers Sanskrit grammar. The emphasis is on sentence construction, recognition and production of grammatical forms, and translation. Attention is also given to script, chanting, and pronunciation. The goal is proficiency in reading sentences and sustained passages in Sanskrit, in preparation for reading authentic texts in the second semester.
Notes: 3 meetings (75 minutes); credit is contingent upon completion of both the first and second semesters

**(Spring)** Indian Women: Literary and Cultural Perspectives - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
What are the implications of the cultural construction of gender for Indian women's lives and self-perceptions? What is the role of literature in articulating and shaping images of female sexuality and "the feminine" in India? A variety of literary sources (classical myths, religious texts, women's songs, modern fiction, and autobiography) are studied from the perspectives of women's power and personhood in relation to institutions such as goddess worship and wife burning; family, marriage, and the women's sphere; and in the historical and political contexts of premodern and colonial society, nationalism, and modern women's movements.

(Religion 250s)
The epics Ramayana and Mahabharata are sacred texts of Hinduism and are rendered in oral, written, and dramatic forms in all the languages of India and Southeast Asia. Focusing primarily on the Ramayana, students have the opportunity to explore the epic narrative's aesthetic, religious, and cultural historical dimensions in its many manifestations, including the Sanskrit text (fifth century B.C.E.), women’s ritual songs, Tulsidas’s medieval Hindi version, the Ramila play, Kathakali dance, the television serial, and the political version of the Hindu communists in the 1990s. All readings are in English.

Notes: 2 meetings (75 minutes); next offered 2003-2004
Instructors: I. Peterson

Issues surrounding gender and sexuality occupy a complex, often contradictory place in Hindu society; they are simultaneously celebrated and suppressed. This fundamental ambiguity is at the core of this course, which concerns itself with religious perspectives on the body, gender, and sexual activity in Hinduism from the beginnings to the present, and treats subaltern points of view as well as brahmanical ideologies. Topics include: dharma, canonical texts, and sexual practice; female sexuality; Bhakti and Tantra; same-sex relations; and eroticism in the literary, visual, and performing arts.

Notes: 2 meetings (75 minutes)
Instructors: D. Soneji

In this thematic and historical introduction to a major religious tradition of India, Hinduism is explored in its various expressions, including texts (Ramayana, Bhagavad Gita), myths and gods (Krishna, the great Goddess), philosophy, rites, art, worship, and popular practice. The role of major religious figures (Shankara, Mirabai), movements, techniques (yoga), and concepts (karma) are studied in their cultural context. Illustrative material includes slides and short films.

Notes: 2 meetings (75 minutes)

(Spring) History of Astronomy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course looks at astronomy and cosmology from earliest times - Egyptian, Babylonian, Greek, Islamic; the medieval universe; Newtonian universe; mechanistic universe of the eighteenth and nineteenth centuries; gravitational theory; origin, structure, and evolution of stars and galaxies; developments in modern astronomy. Nontechnical, with emphasis on history and cosmology.
Notes: 2 meetings (75 minutes)
Instructors: The department

ASTR-220-01 - Astronomy - 2002-2003
(Spring) Topics in Astronomy: Astronomy & Public Policy
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Astronomical issues that impact our society will be explored in a seminar format. The approach for each issue will be to pose a question based on a body of scientific evidence with potential consequences for human society. The answers to these questions will be investigated both on scientific and societal grounds. Scientific issues include the potential threat of collisions between the earth and other solar system bodies and the potential existence of extraterrestrial life.
Prerequisites: one course in a physical science, permission of instructor
Notes: to be held at Smith College
Instructors: S. Hameed

ASTR-223-01 - Astronomy - 2002-2003
(Fall) Planetary Science
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Geology 2236)
An introductory course for physical science minors and majors. Topics include origin and evolution of the planets; planetary orbits, rotation, and precession; gravitational and tidal interactions; asteroids, comets, and planetary rings; meteorites; interiors and atmospheres of the Jovian and terrestrial planets; geology, tectonics, and mineralogy of the terrestrial planets and satellites; new data from Mars Pathfinder, Lunar Surveyor, and current NASA missions.

Prerequisites: any physical science course

Notes: 2 meetings (75 minutes); offered at UMass in fall 2002

Instructors: D. Dyar

ASTR-224-01 - Astronomy - 2002-2003
(Fall) Stellar Astronomy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The basic observational properties of stars will be explored in an experimental format relying on both telescopic observations and computer programming exercises. No previous computer programming experience is required.

Prerequisites: Physics 115, Mathematics 101 or equivalent

Notes: 2 meetings (2 hours, 45 minutes)

Instructors: The department

Prerequisites: Physics 115, Mathematics 101 or equivalent

Notes: 2 meetings (2 hours, 30 minutes)

Instructors: S. Edwards

ASTR-226-01 - Astronomy - 2002-2003
(Fall) Cosmology
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course looks at cosmological models and the relationship between models and observable parameters. Topics in current astronomy that bear upon cosmological problems, including background electromagnetic radiation, nucleosynthesis, dating methods, determinations of the mean density of the universe and the Hubble constant, and tests of gravitational theories. Discussion of some questions concerning the foundations of cosmology and its future as a science.

Prerequisites: Mathematics 101 and a physical science course

Notes: 2 meetings (75 minutes); offered at Amherst College in fall 2002
Instructors: G. Greenstein

**ASTR-335-01 - Astronomy - 2002-2003**
*(Fall) Modern Astrophysics*

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

How do astronomers determine the nature and extent of the universe? Following the theme of the "Cosmic Distance Ladder," we explore how our understanding of astrophysics allows us to evaluate the size of the observable universe. We begin with direct distance determinations in the solar system and nearby stars. We then move on to spectroscopic distances of stars; star counts and the structure of our galaxy; Cepheid variables and the distances of galaxies; the Hubble Law and large scale structure in the universe; quasars and the Lyman-alpha forest.

Prerequisites: Physics 115 and one prior physics or astronomy course at the 200 level or above

Notes: 2 meetings (90 minutes); offered at UMass in fall 2002

Instructors: S. Schneider

(Spring) Observational Techniques in Infrared and Optical Astronomy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
An introduction to the techniques of gathering and analyzing astronomical data, particularly in the optical and infrared. Telescope design and optics; instrumentation for imaging, photometry, and spectroscopy; astronomical detectors; computer graphics and image processing; error analysis and curve fitting; data analysis and astrophysical interpretation, emphasizing globular clusters.
Prerequisites: Astronomy 224, 225, Physics 216
Notes: 2 meetings (75 minutes), 1 evening lab (3 hours)
Instructors: The department

ASTR-338-01 - Astronomy - 2002-2003
(Spring) Techniques of Radio Astronomy
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
An introduction to radio astronomy equipment, techniques, and the nature of cosmic radio sources. Radio receiver and antenna theory; radio flux, brightness temperature, and the transfer of radio radiation in cosmic sources; effect of noise, sensitivity, bandwidth, and antenna efficiency; techniques of beam switching, interferometry, and aperture synthesis; basic types of radio astronomical sources: ionized plasmas, masers, recombination and hyperfine transitions; nonthermal sources; applications to the sun, interstellar clouds, and extragalactic objects.
Prerequisites: two semesters of physics and two semesters of calculus
Notes: 2 meetings (75 minutes) and observation sessions
Instructors: R. Snell

ASTR-351-01 - Astronomy - 2002-2003
(Fall) Astrophysics I: Stars and Stellar Evolution - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course looks at physical principles governing the properties of stars, their formation and evolution: radiation laws and the determination of stellar temperatures and luminosities; Newton's laws and the determination of stellar masses; hydrostatic equilibrium and the thermodynamics of gas and radiation; nuclear fusion and stellar energy generation; physics of degenerate matter and the evolution of stars to white dwarfs, neutron stars, or black holes; nucleosynthesis in supernova explosions; dynamics of mass transfer in binary systems; viscous accretion disks in star formation and X-ray binaries.
Prerequisites: two 300-level Physics courses
Notes: 3 meetings (80 minutes)
Instructors: The department

ASTR-352-01 - Astronomy - 2002-2003
(Spring) Astrophysics II: Galaxies
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course applies physics to the understanding of astronomical phenomena. Physical processes in the gaseous interstellar medium; photoionization in HII regions and planetary nebulae; shocks in supernova remnants and stellar jets; energy balance in molecular clouds. Dynamics of stellar systems; star clusters and the virial theorem; galaxy rotation and the presence of dark matter in the universe; spiral density waves. Quasars and active galactic nuclei: synchrotron radiation; accretion disks, supermassive black holes.
Prerequisites: two 300-level physics courses
Notes: 2 meetings (75 minutes)
Instructors: J. Lowenthal

ASTR-395-01 - Astronomy - 2002-2003
(Fall) Independent Study
Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement.
Prerequisites: jr, sr, permission of department
Instructors: The department.

Biochemistry

BIOCH-295-01 - Biochemistry - 2002-2003
(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Independent work in biochemistry can be conducted with any member of the biochemistry committee and, upon approval, also with other members of the biological sciences and chemistry departments.
Notes: Students conducting an independent lab research project for credit in a department, program, or lab covered by the College's chemical hygiene plan must participate in a safety training session before beginning research; credit will not be granted to students who do not receive safety training.
Instructors: The department.

BIOCH-311-01 - Biochemistry - 2002-2003
(Fall) Protein Biochemistry and Cellular Metabolism
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Biological Sciences 311f; Chemistry 311f)
This course is a rigorous introduction to the study of protein molecules and their role as catalysts in the cell. Topics include general principles of protein folding, protein structure-function correlation, enzyme kinetics and mechanism, carbohydrate and lipid biochemistry, and metabolic pathways (catabolic and anabolic) and their interaction and cross-regulation. Biological transformation of energy is considered in light of the principles of thermodynamics.
Prerequisites: Biological Sciences 210, Chemistry 302
Notes: 3 meetings (75 minutes), 1 lab (4 hours)
Instructors: L. Hsu

BIOCH-314-01 - Biochemistry - 2002-2003
(Spring) Nucleic Acids Biochemistry and Molecular Biology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Biological Sciences 314s; Chemistry 314s)
This course is an in-depth examination of DNA and RNA structures and how these structures support their respective functions during replication, transcription, and translation of the genetic material. Emphasis is on the detailed mechanisms associated with each step of gene expression. Discussions incorporate many recent advances brought about by recombinant DNA technology.
Prerequisites: Biological Sciences 210, Chemistry 302, Biochemistry 311, or permission of instructor
Notes: 3 meetings (75 minutes), 1 lab (4 hours)
Instructors: L. Hsu
Section Instructors: 01 LAB L Hsu | 02 LAB L Hsu |

BIOCH-330-01 - Biochemistry - 2002-2003
(Spring) Topics in Biochemistry and Molecular Biology
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course each year examines a number of important and exciting topics in biochemistry, molecular biology, and other related fields of biology. The intellectual and research development that formulated these fundamental concepts is traced through extensive readings of the primary literature. Discussions emphasize the critical evaluation of experimental techniques, data analysis, and interpretation. Substantial student participation is expected.
Prerequisites: Biochemistry 311, 314, or permission of instructor
Notes: 1 meeting (2 hours, 30 minutes)
Instructors: L. Hsu

BIOCH-395-01 - Biochemistry - 2002-2003

Biological Sciences

(Spring) Advances in Biology: Topics in Biology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
First-year seminar
Preamble (for topics courses): Biological Sciences 145 is a topical first-year seminar, serving as a general introductory biology course for entry-level majors and nonmajors. It includes a laboratory component, is considered an alternative to Biological Sciences 150, and can count as a prerequisite for Biological Sciences 200.
Instructors: J. Coleman
Section Instructors: 01 LAB Department | 02 LAB Department |
Expected enrollment: 24
Notes: This is a first-year seminar course for up to 24 students; 4 slots will be available for seniors requiring a science distribution course. Please sign up in the Biology office or via e-mail (biology@mtholyoke.edu) during the advising period.

BIOL-150-A - Biological Sciences - 2002-2003
(Fall) Introductory Biology: Form and Function: Physiology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Living on earth poses physical and chemical challenges for organisms. In this section, we will study how living organisms (mostly animals but also plants) meet the challenges of respiration, communication, sensing the world, reproduction, and the coordination of complex functions in the body.
Instructors: P. Gruber, The department

BIOL-150-B - Biological Sciences - 2002-2003
(Fall) Introductory Biology: Form and Function: Solving Life's Problems
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course will explore the diversity of living things by examining various strategies that organisms have evolved to solve life's major problems. Topics will include energy acquisition and management, reproduction, control systems, and movement. Labs will introduce students to data collection, manipulation, and analysis. Exercises address life's diversity via an exploration of the organisms found on campus and through analyses of various structure/function relationships.
Instructors: G. Gillis, The department

BIOL-200-01 - Biological Sciences - 2002-2003
(Spring) Introductory Biology II: How Organisms Develop
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
An overview of cells to tissues to organisms. Cellular components, the role of the nucleus, cell reproduction, and meiosis will be examined as part of our study of gamete production, fertilization, embryology, and development in an invertebrate (sea urchins), a vertebrate (chick), a fern, and a
flori...DNA, RNA, and protein synthesis will be presented and examined in the context of building a fly embryo and a flower.

Prerequisites: Biological Sciences 145 or 150
Notes: 4 meetings (50 minutes), 1 lab (3 hours)
Instructors: R. Fink, A. Frary

Section Instructors: 01 LAB R Fink | 02 LAB R Fink | 03 LAB R Fink | 04 LAB R Fink | 05 LAB R Fink |
BIOL-295-01 - Biological Sciences - 2002-2003
(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph, permission of instructor
Notes: Note: Any student conducting an independent laboratory research project for course credit in a department, program, or laboratory covered by the College's chemical hygiene plan must participate in a safety training session before beginning research. Course credit will not be granted to students who do not receive safety training. See department for requirements.
Instructors: The department.

Instructors: The department.

BIOL-303-01 - Biological Sciences - 2002-2003
(Spring) Microbial Genetics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Studies at the molecular level of various aspects of genetics, as expressed in bacterial and viral systems. Topics include patterns and mechanisms of replication, recombination, repair, and mutation of DNA; regulation of gene activity; gene-protein relationships; and genetic engineering.
Prerequisites: Biological Sciences 210 and 220
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: J. Knight

BIOL-305-01 - Biological Sciences - 2002-2003
(Fall) Cellular and Molecular Aspects of Development
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Speaking-intensive)
Examines the roles of cellular movement and cellular interactions in the development of multicellular organisms. Topics include cell recognition and adhesion during morphogenesis, the importance of extracellular matrices, and current theories of embryonic pattern formations. Self-designed laboratories include techniques such as microsurgery and time-lapse video microscopy using a wide variety of embryos and cell types.
Prerequisites: Biological Sciences 200, 210 with 220 strongly recommended
Notes: 3 meetings (50 minutes), 1 lab (3 hours)
Instructors: R. Fink

BIOL-308-01 - Biological Sciences - 2002-2003
(Spring) Darwin
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Writing-intensive; History 361s (01))
This course looks at the scientific content and intellectual context of Darwin's theory of evolution - his facts, metaphors, hypotheses, and philosophical assumptions. Readings from Darwin and his sources, and examination of the organisms he studied. A background in eighteenth- and nineteenth-century history or whole organism biology is recommended. This course does not satisfy a distribution requirement in biological sciences.
Prerequisites: Biological Sciences 213, History 151, 161, or 255, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: S. Rachootin

BIOL-309-01 - Biological Sciences - 2002-2003
(Spring) Vertebrate Biology
A study of vertebrates with emphasis on structural adaptations for functions such as feeding and locomotion, and on natural history. Some morphology and field identification involved in laboratory work.

Prerequisites: two of Biological Sciences 200, 210, 213

Notes: 3 meetings (50 minutes), 1 lab (3 hours)

Instructors: S. Smith

Section Instructors: 01 LAB S Smith | 02 LAB S Smith |

BIOL-310-01 - Biological Sciences - 2002-2003
(Fall) Invertebrate Zoology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course looks at the evolutionary relations of the profoundly different groups of animals in light of their structure, development, and fossil history. Emphasizes exceptional organisms that prove - and disprove - biological rules. Themes include coloniality, asexual reproduction, metamorphosis, and making skeletons.
Prerequisites: Biological Sciences 200 and 213
Notes: 3 meetings (50 minutes), 1 lab (3 hours)
Instructors: S. Rachootin

BIOL-311-01 - Biological Sciences - 2002-2003
(Fall) Protein Biochemistry and Cellular Metabolism
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Biochemistry 311f; Chemistry 311f)

BIOL-314-01 - Biological Sciences - 2002-2003
(Spring) Nucleic Acids Biochemistry and Molecular Biology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Biochemistry 314s; Chemistry 314s)

BIOL-315-01 - Biological Sciences - 2002-2003
(Fall) Ethology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course studies the biology of animal behavior, including both invertebrates and vertebrates. Topics include sense organs and communication, circadian and other rhythms, orientation and navigation, and the evolution and ecology of social systems. Laboratories involve an individual project.
Prerequisites: two of Biological Sciences 200, 210, 213, or permission of instructor
Instructors: S. Smith

BIOL-316-01 - Biological Sciences - 2002-2003
(Fall) Scanning Electron Microscopy
Credits/PE Units: 2-4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Geology 316f)
Includes theory and operation of the scanning electron microscope and preparation of biological and geological materials for observation. The versatile use of the microscope will be emphasized and will include low magnification, high resolution, and back scattered (reflected) electron modes of operation. Energy dispersive X-ray microanalysis will be introduced. Students may elect the course for 4 credits for further experience in energy dispersive microanalysis, including quantitative analysis and element mapping.
Prerequisites: permission of instructor and a 200-level biological sciences or geology course, and Geology 220 if electing 4-credit option
Notes: 1 meeting (2 hours), 1 lab (3 hours), 1 additional meeting (50 minutes) for 4-credit option; satisfies distribution requirement only if taken for 4 credits
Instructors: S. Gruber, M. Rice

BIOL-319-01 - Biological Sciences - 2002-2003
(Spring) An Introduction to Immunology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course presents the elements of immunochemistry and immunobiology. Topics include the anatomy, genetics, and biochemistry of the immune response; antibody structures and functions; the allergic response; autoimmune diseases; and the applications of immunology to research and clinical problems.

Prerequisites: Biological Sciences 210 and 220

Notes: 3 meetings (50 minutes), 1 discussion (50 minutes), 1 lab (3 hours)

Instructors: The department

Section Instructors: 01 LAB D Freier | 02 LAB D Freier |

BIOL-320-01 - Biological Sciences - 2002-2003
(Fall) Studies with the Electron Microscope

Credits/PE Units: 2-4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

Introduction to the transmission electron microscope and its potential contributions to the biological sciences, through semester-long investigations of students' choosing. Projects may range from the molecular to the cellular/organismal levels and draw upon a variety of preparation techniques.

Students wishing to extend their experience in other courses, including Biological Sciences 295 and 395, may enroll in this course concurrently. The 2-credit option will focus primarily on the laboratory component. The 4-credit option will emphasize, in addition, discussion of relevant literature.

Prerequisites: Biological Sciences 220 or permission of instructor

Instructors: S. Gruber

BIOL-321-01 - Biological Sciences - 2002-2003
(Spring) Conference Course: Biomechanics

Credits/PE Units: 2; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

Biomechanics

Prerequisites: Biological Sciences 200 and 220

Notes: sign up in the biological sciences office or via email at biology@mtholyoke.edu during the registration period and list biological sciences courses taken

(Spring) Conference Course: Animal Cloning: Past, Present, and Future

Credits/PE Units: 2; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement

(Speaking-intensive)

Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.

When Dolly the lamb was born, the world changed. Developmental biologists have been cloning organisms for decades—why the intense emotion over a sheep? This course will focus on the history of animal cloning, exploring both conceptual and technical advances over time. We will look at the current state of mammalian cloning, including the national debate about human stem cell research, reading from primary literature. While the emphasis will be on the biological phenomena involved, we will also discuss the legal, ethical, and moral implications of human cloning.

Prerequisites: Biological Sciences 200 and 220

Notes: sign up in the biological sciences office or via email at biology@mtholyoke.edu during the registration period and list biological sciences courses taken

Instructors: R. Fink

Expected enrollment: 14

BIOL-323-01 - Biological Sciences - 2002-2003  
(Fall) Physiology and Anatomy of Plants: Growth Regulation - *Not offered this year/term  
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement  
This course is a study of the higher plant, its structure and organization, including factors influencing the placement of leaves, branching, and the production of flowers. Emphasizes recent advances concerning mode of action of plant growth regulators, protoplast and tissue culture, photomorphogenesis, and molecular controls.  
Prerequisites: Biological Sciences 200 and 210, 213 or 220  
Notes: 2 meetings (75 minutes), 1 lab (3 hours)  
Instructors: A. Frary

BIOL-324-01 - Biological Sciences - 2002-2003  
(Spring) Topics in Plant Biology - *Not offered this year/term  
Credits/PE Units: 2-4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement  
This seminar course explores recent developments in major areas of botanical research. Topics change from year to year.  
Prerequisites: Biological Sciences 200 and one additional 200-level course in department  
Notes: 2-credit option: 1 meeting (2 hours); 4 credit-option: 1 meeting (2 hours) plus additional work, unarranged  
Instructors: The department

BIOL-325-01 - Biological Sciences - 2002-2003  
(Fall) Evolutionary Survey of the Plant Kingdom  
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement  
This course explores the tremendous diversity of the plant kingdom, emphasizing the local flora. Evolutionary relationships are discussed on the basis of comparisons of reproductive biology, morphology, anatomy, cell structure, and molecular biology.  
Prerequisites: two of Biological Sciences 200, 210, 213, or 220, or permission of instructor  
Notes: 2 meetings (75 minutes), 1 lab (3 hours); offered alternate years  
Instructors: A. Frary

BIOL-327-01 - Biological Sciences - 2002-2003  
(Fall) Microbiology  
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement  
This course is a general study of microorganisms and their activities, including form and structure; biochemical processes of growth, metabolism, and energy storage; distribution in nature and relationships to other organisms; cycles of matter; beneficial and detrimental effects on humans; and physical and chemical effects microorganisms make in their environment.  
Prerequisites: Biological Sciences 220 and either 210 or 213  
Notes: 2 meetings (75 minutes), 1 lab (3 hours)  
Instructors: J. Knight

BIOL-328-01 - Biological Sciences - 2002-2003  
(Spring) Regulatory and Integrative Human Physiology  
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement  
A consideration of the physiological processes involved in the control of human body functions. We will study the mechanisms for regulating individual organ systems and how these mechanisms respond to changing needs of the individual. Our examination of the physiological controls will include an analysis of the underlying cellular and molecular processes that drive the mechanisms and integrate the activities of the different systems.  
Prerequisites: Biological Sciences 200 and 220  
Notes: 2 meetings (75 minutes); 1 meeting (50 minutes), 1 lab (3 hours); lab enrollment limited to 12 students per section  
Instructors: J. Muir  
Section Instructors: 01 LAB J Muir | 02 LEC J Muir |  
Expected enrollment: 24

BIOL-331-01 - Biological Sciences - 2002-2003  
(Fall) Ecology Seminar  
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement  
(Writing-intensive)
Patterns of distribution and abundance of organisms and ecosystem structure and function are studied using experimental approaches, mathematics, and computer modeling. Readings and data from the primary scientific literature, along with results of student-run field and laboratory experiments will be used to develop and explore predictive models of ecological phenomena.

Prerequisites: Biological Sciences 213 and Statistics 240 or one course in calculus, and permission of instructor

Notes: 1 meeting (3 hours), 1 lab (3 hours)

Instructors: The department

BIOL-332-01 - Biological Sciences - 2002-2003
(Fall) Macroevolution
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course presents the science of biological form and its relation to adaptation, development, and the modes of evolutionary change. Although whole organisms are emphasized, there also are several excursions into molecular biology.
Prerequisites: Biological Sciences 213 and 210
Notes: 3 meetings (30 minutes)
Instructors: S. Rachootin

BIOL-333-01 - Biological Sciences - 2002-2003
(Fall) Neurobiology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Topics include the physiology of nerve and muscle, synaptic transmission, the human brain, the senses, and movement control.
Prerequisites: Biological Sciences 200, and 210 or 220 and 4 credits in chemistry or physics
Notes: 3 meetings (50 minutes), 1 discussion (50 minutes), 1 lab (3 hours)
Instructors: The department

BIOL-334-01 - Biological Sciences - 2002-2003
(Spring) Biostatistics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Statistics 334s)
Introduction to statistical techniques used most commonly in biological and medical sciences. Emphasis will be on hypothesis testing, regression, analysis of variance, statistical power, comparisons of confidence intervals, time-series analysis, spatial analysis, and Bayesian inference. Examples and datasets will be drawn from student independent projects.
Prerequisites: one of the following: Biological Sciences 210, 213, 331, calculus, Statistics 240, and permission of instructor
Notes: 1 meeting (3 hours); offered alternate years
Instructors: P. Houlihan

BIOL-340-01 - Biological Sciences - 2002-2003
(Spring) Eukaryotic Molecular Genetics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course will examine the role of molecular genetic analysis in the study of phenomena such as human disease (particularly breast cancer), animal development, and programmed cell death. We will also take a detailed look at the science behind the Human Genome Project. There will be group discussions of original research articles and review articles, and we will often use a case-method approach.
Prerequisites: Biological Sciences 200 and 210
Notes: 3 meetings (50 minutes), 1 lab (3 hours)
Instructors: C. Woodard
Section Instructors: 01 LAB C Woodard

BIOL-395-01 - Biological Sciences - 2002-2003
(Fall) Independent Study
Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement.
Prerequisites: jr, sr, and permission of department; submit application in biological sciences office or via the department's Web site
Notes: NOTE: See safety training restrictions in description of Biological Sciences 295
Instructors: The department

BIOL-395-01 - Biological Sciences - 2002-2003
(Spring) Independent Study
Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement.
Prerequisites: jr, sr, and permission of department; submit application in biological sciences office or via the department's Web site
Notes: NOTE: See safety training restrictions in description of Biological Sciences 295
Instructors: The department.

BIOL-397-01 - Biological Sciences - 2002-2003
(Spring) Teaching Biology: Middle and Secondary School
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Teacher Licensure: Students interested in pursuing licensure in middle and secondary schools can combine the major with a minor in education. For specific requirements, refer to "Teacher Licensure" in this catalogue and consult Ms. Lawrence in the psychology and education department. Licensure also requires a passing score on the literacy and specific subject area sections of the Massachusetts Educators Certification Test. In the case of biology, this includes cells and cell theory, characteristics or organisms, human biology, principles of heredity and the evolution of life, matter and energy in ecosystems.

Chemistry

CHEM-101-01 - Chemistry - 2002-2003
(Fall) General Chemistry I
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course provides introduction and development of fundamental concepts including stoichiometry, reactions in aqueous solutions, thermochemistry, atomic structure, chemical bonding, and acid-base reactions. The laboratory emphasizes basic skills, quantitative chemical measurements, and principles discussed in lectures.
Notes: 3 meetings (50 minutes), 1 discussion (50 minutes), 1 lab (3 hours)
Instructors: S. Decatur

CHEM-101-01 - Chemistry - 2002-2003
(Spring) General Chemistry I
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course provides introduction and development of fundamental concepts including stoichiometry, reactions in aqueous solutions, thermochemistry, atomic structure, chemical bonding, and acid-base reactions. The laboratory emphasizes basic skills, quantitative chemical measurements, and principles discussed in lectures.

CHEM-200-01 - Chemistry - 2002-2003
(Spring) Environmental Chemistry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is designed to use chemical principles to understand issues surrounding our environment. The concepts of bonding, equilibria, acidity, basic organic chemistry, and reaction mechanisms will be applied to such topics as water pollution and acid rain, fossil fuels and alternative energy sources, atmospheric chemistry including smog formation and stratospheric ozone depletion, and herbicides and pesticides in the environment. Laboratory work will concentrate on both qualitative and quantitative methods of analysis.
Notes: 2 meetings (75 minutes), 1 discussion (50 minutes), 1 biweekly lab (3 hours); offered once every three years
Instructors: The department

CHEM-201-01 - Chemistry - 2002-2003
(Fall) General Chemistry II
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course provides background in basic principles of physical, analytical, and inorganic chemistry essential to the study of all chemical phenomena. Topics include elementary principles of molecular electronic structure, quantitative treatment of chemical equilibrium with applications to solubility, acid-base, and electron transfer reactions, introduction to chemical kinetics and thermodynamics, and the chemistry of coordination compounds. Laboratory experiments will include classical analytical and kinetic techniques, preparation of inorganic compounds, and an introduction to ab initio electronic structure calculations.
Prerequisites: Chemistry 101 or permission of instructor, and Mathematics 101 (or concurrently)
Notes: 3 meetings (50 minutes), 1 discussion (50 minutes), 1 lab (3 hours)

CHEM-202-01 - Chemistry - 2002-2003
(Fall) Organic Chemistry I
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Introduces organic chemistry, emphasizing the principles governing broad classes of reactions. Topics include stereochemistry, nucleophilic substitution and elimination reactions, the chemistry of alkanes, alkenes, alkynes, alcohols, and ethers, and an introduction to infrared and nuclear magnetic resonance spectroscopy. Laboratory work includes synthesis, practice in the techniques of distillation, crystallization, chromatography, molecular modeling, and identifying unknown organic compounds by chemical and spectroscopic means.
Prerequisites: Chemistry 101, advanced placement, or permission of instructor
Notes: 2 meetings (75 minutes), 1 discussion (50 minutes)
Instructors: S. Browne

CHEM-203-01 - Chemistry - 2002-2003
(Spring) Organic Chemistry Lab I
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
This course introduces the laboratory techniques of organic chemistry, including distillation, chromatography, and NMR and FTIR spectroscopies. Students must have taken Chemistry 202 in Fall '02 to enroll in this course.
Prerequisites: Chemistry 202 in Fall '02
Notes: one 3 hour meeting per week
Instructors: D. Hamilton
Section Instructors: 01 LAB D Hamilton | 02 LAB D Hamilton | 03 LAB D Hamilton | 04 LAB D Hamilton

CHEM-210-01 - Chemistry - 2002-2003
(Spring) Biotechnology: Science, Culture, and Ethics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
The development of a molecular understanding of the basis of life, and the application of this knowledge to alter and engineer living organisms, is an ongoing scientific revolution with far-reaching social and ethical considerations. This course introduces the science of the biotechnology revolution within its historical and social context; a description of the fundamental chemistry and molecular biology underlying these technologies is integrated with exploration of their social and ethical impacts. Topics to be covered include the structure of DNA, the human genome project, genetic engineering in agriculture, and cloning.
Prerequisites: Chemistry 101, Biological Sciences 151, or Interdepartmental Courses 121-122, or permission of instructor
Notes: offered every other year
Instructors: S. Decatur

CHEM-212-01 - Chemistry - 2002-2003
(Spring) Chemistry of Biomolecules
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
An examination of the major ideas of biochemistry from the point of view of the chemical sciences rather than the life sciences. Structures of important biomolecules. The role of energetics and reaction dynamics in biochemical processes. Major metabolic pathways are considered, including those of proteins, carbohydrates, lipids, and nucleic acids.
Prerequisites: Chemistry 202
CHEM-295-01 - Chemistry - 2002-2003
(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Independent work in chemistry can be conducted with any member of the department.
Prerequisites: soph, permission of department required every semester
Notes: Note: Students conducting an independent laboratory research project for course credit in a department, program, or laboratory covered by the College's chemical hygiene plan must participate in a safety training session before beginning research. Course credit will not be granted to students who do not receive safety training
Instructors: The department

CHEM-295-01 - Chemistry - 2002-2003
(Spring) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Independent work in chemistry can be conducted with any member of the department.
Prerequisites: soph, permission of department required every semester
Notes: Note: Students conducting an independent laboratory research project for course credit in a department, program, or laboratory covered by the College's chemical hygiene plan must participate in a safety training session before beginning research. Course credit will not be granted to students who do not receive safety training
Instructors: The department

CHEM-302-01 - Chemistry - 2002-2003
(Spring) Organic Chemistry II
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
A continuation of Chemistry 202 that addresses the chemistry of aromatic compounds, the carbonyl group, and a number of other functional groups. Examples drawn from compounds of biological interest. The laboratory includes organic synthesis and the identification of unknown compounds by chemical and spectroscopic means.
Prerequisites: Chemistry 202
Notes: 2 lectures (75 minutes), 1 discussion (50 minutes), lab schedule to be announced
Instructors: The department

CHEM-303-01 - Chemistry - 2002-2003
(Spring) Organic Chemistry Lab II
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
Chemistry 303S introduces advanced techniques in experimental organic chemistry. Students begin to carry out multi-step organic syntheses and perform extensive characterization of products. Students must have taken Chemistry 302 in Spring '02 to enroll in this course.
Prerequisites: Chemistry 302 in Spring '02 or concurrent enrollment in Chemistry 302
Notes: One 4 hour meeting per week
Section Instructors: 01 LAB D Hamilton | 02 LAB D Hamilton | 03 LAB D Hamilton |

CHEM-304-01 - Chemistry - 2002-2003
(Spring) Organic Chemistry Lab I and II
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Chemistry 304 combines both organic chemistry lab courses into one integrated experience. The course is intended for students who were unable to take Chemistry 202 with lab in Fall '02 and are concurrently enrolled in Chemistry 302 in Spring '03.
Prerequisites: Chemistry 202 in Fall '02, concurrent enrollment in Chemistry 302
Notes: two 4 hour meetings per week
Section Instructors: 01 LAB D Hamilton | 02 LAB D Hamilton | 03 LAB D Hamilton | 04 LAB D Hamilton | 05 LAB D Hamilton |

CHEM-308-01 - Chemistry - 2002-2003
(Fall) Chemical Thermodynamics
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
A consideration of the contribution of thermodynamics to the understanding of the "driving forces" for physical chemical changes and the nature of the equilibrium state.

Prerequisites: Chemistry 201, Chemistry 202, Mathematics 101, Physics 103 and 204, or 115

Notes: 2 meetings (75 minutes), 1 discussion (50 minutes)

Instructors: M. Campbell

CHEM-311-01 - Chemistry - 2002-2003
(Fall) Protein Biochemistry and Cellular Metabolism
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Biochemistry 311f; Biological Sciences 311f)

CHEM-314-01 - Chemistry - 2002-2003
(Spring) Nucleic Acids Biochemistry and Molecular Biology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Biochemistry 314s; Biological Sciences 314s)

CHEM-315-01 - Chemistry - 2002-2003
(Spring) Experimental Methods I
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Uses extended research-style projects to introduce advanced techniques in physical measurement (e.g., high-resolution spectroscopy, calorimetry, electrochemistry), separation and analysis (e.g., gas- and liquid-phase chromatography, mass spectrometry), and chemical synthesis (e.g., catalytic and enantioselective methods, biomolecules, polymers). Students will increase their repertoire of laboratory skills while learning to integrate concepts from different subdisciplines of chemistry into a unified experimental approach to problem solving.
Prerequisites: Chemistry 302, 308 (prerequisite or corequisite for Chemistry 315), or permission of instructor
Instructors: The department
Section Instructors: 01 LAB S Decatur |

CHEM-316-01 - Chemistry - 2002-2003
(Spring) Experimental Methods II - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Uses extended research-style projects to introduce advanced techniques in physical measurement (e.g., high-resolution spectroscopy, calorimetry, electrochemistry), separation and analysis (e.g., gas- and liquid-phase chromatography, mass spectrometry), and chemical synthesis (e.g., catalytic and enantioselective methods, biomolecules, polymers). Students will increase their repertoire of laboratory skills while learning to integrate concepts from different subdisciplines of chemistry into a unified experimental approach to problem solving.
Prerequisites: Chemistry 302, 308 (prerequisite or corequisite for Chemistry 316), or permission of instructor
Instructors: The department

CHEM-317-01 - Chemistry - 2002-2003
(Fall) Principles of Polymer Chemistry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
An introduction to the study of molecules of high molecular weights with emphasis on synthetic rather than naturally occurring polymers. Topics include polymerization, structures, molecular weight determination, molecular weight distribution, chain configurations, rubber elasticity, and thermodynamics and statistical mechanics of polymer solutions.
Prerequisites: Chemistry 302
Notes: 2 meetings (75 minutes); 1 discussion (50 minutes); offered once every three years
Instructors: W. Chen

CHEM-325-01 - Chemistry - 2002-2003
(Spring) Atomic and Molecular Structure
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course is an introduction to experimental and theoretical approaches to the determination of the structure of atoms, molecules, and chemical bonds. Classroom work provides background in the theory of atomic and molecular structure and an introduction to quantum mechanics and spectroscopy.
Prerequisites: Chemistry 201, 202, Mathematics 202, Physics 216
Notes: 2 meetings (75 minutes), 1 discussion (50 minutes)
CHEM-331-01 - Chemistry - 2002-2003
(Spring) Organic Synthesis
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Organic Synthesis
Prerequisites: Chemistry 302
Notes: 2 meetings (75 minutes); offered every other year
Instructors: D. Hamilton

CHEM-332-01 - Chemistry - 2002-2003
(Spring) Nuclear Magnetic Resonance Spectroscopy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The application of NMR spectroscopy to the determination of the configurations and conformations of molecules is studied. The fundamental principles of NMR, the operation of CW, Fourier transform, and high-field spectrometers; magnetic resonance imaging; and the vast array of modern experimental methods are discussed. Primary emphasis is placed on the use of NMR spectroscopy to solve specific structural and dynamic problems that arise in organic and biochemical research. A course in physics is desirable but not required.
Prerequisites: Chemistry 302
Notes: 2 meetings (75 minutes), 1 discussion (50 minutes); offered once every three years
Instructors: S. Decatur

CHEM-333-01 - Chemistry - 2002-2003
(Fall) Protein Structure and Function - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course introduces the subject of how the three-dimensional molecular structures of proteins determine and modulate their function. Topics will include fundamentals of protein chemistry and structure, comparisons of various structural motifs, and a survey of a wide range of protein functions. Examples will be drawn from the current literature on enzyme mechanisms, photosynthetic systems, motor proteins, ion channels, and topics of student interest.
Prerequisites: Chemistry 302
Notes: 2 meetings (75 minutes), 1 discussion (50 minutes); offered every other year
Instructors: S. Decatur

CHEM-334-01 - Chemistry - 2002-2003
(Fall) Advanced Inorganic Chemistry
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The implications of molecular symmetry as expressed in the language of group theory are explored in some depth. Group theory provides the context for a discussion of the structural and spectroscopic properties of inorganic compounds, particularly those of the transition metals.
Prerequisites: Chemistry 302, 325
Notes: 2 meetings (75 minutes), 1 discussion (50 minutes); offered every other year
Instructors: J. Wood

CHEM-336-01 - Chemistry - 2002-2003
(Spring) Organic Synthesis - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course emphasizes recent developments in synthetic organic chemistry and deals with general synthetic methods and specific examples of natural product synthesis. It covers such topics as new methods of oxidation and reduction, stereospecific olefin formation, ring-forming reactions, and methods of carbon-carbon bond formation. The application of these reactions to the synthesis of naturally occurring compounds is examined. A general strategy for the synthesis of complex molecules is also presented.
Prerequisites: Chemistry 302
Notes: 3 meetings (50 minutes); offered every other year
Instructors: D. Hamilton

CHEM-337-01 - Chemistry - 2002-2003
(Fall) Physical Organic Chemistry - *Not offered this year/term
An introduction to the concepts and methods of physical organic chemistry. Examination of reaction mechanisms and the experimental results that support these mechanisms. Topics include structure and reactivity, reaction kinetics, mechanism determinations, and Woodward-Hoffman Rules.

Prerequisites: Chemistry 302, 308

Notes: 2 meetings (75 minutes); offered every other year

Instructors: S. Browne

CHEM-344-01 - Chemistry - 2002-2003
(Fall) Advanced Physical Chemistry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
An introduction to topics in molecular spectroscopy and group theory.
Prerequisites: Chemistry 325
Notes: 2 meetings (75 minutes); offered once every three years
Instructors: H. Leung

CHEM-345-01 - Chemistry - 2002-2003
(Spring) Physical Biochemistry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course emphasizes the wealth of information that can be gained by physical measurements on substances of biological importance, such as proteins, nucleic acids, and model compounds for these substances. Applications of X-ray diffraction, measurement of thermodynamic parameters, spectroscopic methods, and hydrodynamic measurements to biological systems. Specific topics are chosen according to the interests of each class, with special emphasis on readings from the recent literature.
Prerequisites: Chemistry 302, 325
Notes: 2 meetings (75 minutes); offered every other year
Instructors: M. Campbell

CHEM-395-01 - Chemistry - 2002-2003
(Fall) Independent Study
Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement.
Independent work in chemistry can be conducted with any member of the department.
Prerequisites: jr, sr, permission of department
Notes: Note: See safety training restrictions in description of Chemistry 295
Instructors: The department.

CHEM-399-01 - Chemistry - 2002-2003
(Fall) Comprehensive Seminar
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
A seminar series consisting of meetings on alternate weeks to discuss articles from the current chemical literature. The readings will prepare students for attendance at lectures on the chosen topics in the remaining weeks. The lectures are given primarily by visiting speakers, but they may include department faculty. Students will serve as discussion leaders, and each student will write a paper on a presentation of her choice.
Prerequisites: sr
Notes: 1 meeting (90 minutes)

Complex Organizations

COMOR-107-01 - Complex Organizations - 2002-2003
(Spring) Poverty in the United States
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement (Politics 107s)
Why do so many people live in poverty in the most affluent of nations? This course will attempt to sort myths from realities in debates over the morality and feasibility of measures that might narrow the gap between rich and poor and expand opportunities, especially for the 20 million children living in poverty. Students will explore how poverty is related to class, race, sex, family structure, and economics, and how it is affected, for better and worse, by governmental programs involving housing, education, crime, welfare, and taxation.
Notes: 2 meetings (75 minutes)
Instructors: J. Fox

COMOR-205-01 - Complex Organizations - 2002-2003
(Spring) Labor Economics: Women and the United States Economy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement (Economics 205s)

COMOR-206-01 - Complex Organizations - 2002-2003
(Fall) Economics of Health Care and Health Service Organizations - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement (Economics 206f)

COMOR-212-01 - Complex Organizations - 2002-2003
(Fall) Individuals and Organizations
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement (Psychology 212f)
This course focuses on individual and small-group behavior in the organizational setting. The basic objective is to increase knowledge and understanding of human behavior in organizations - especially each individual's own behavior. Three types of knowledge are stressed: (1) intellectual information regarding human behavior in an organizational context; (2) understanding of oneself as a person and as a manager; and (3) behavioral skills in dealing with people.
Prerequisites: soph, jr, sr
Notes: 2 meetings (75 minutes)
Instructors: D. Butterfield

COMOR-215-01 - Complex Organizations - 2002-2003
(Spring) Economics of Corporate Finance - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement. (Economics 215s)

COMOR-220-01 - Complex Organizations - 2002-2003
(Spring) Taxation and the Values of Democracy
This seminar examines federal tax history and policies, from the Constitution to the present. We focus on income, estate and gift, and Social Security taxes. Tax laws represent the most comprehensive expression of official public values. For example, our income taxes depend upon marital status, family size, whether we own or rent our home, fringe benefits at work, retirement planning, investment choices, charitable behavior, access to professional advice, and more. The laws produce winners and losers. They often operate unfairly, are needlessly complex, and unnecessarily constrain economic growth. We study how and why, and possible reforms.

Prerequisites: History 171, Politics 104, Economics 103 or 104, or permission of instructor

Instructors: J. Fox

COMOR-232-01 - Complex Organizations - 2002-2003
(Spring) Ethical Issues in Complex Organizations - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Philosophy 232s)

This course examines ethical issues that arise in organizational contexts and helps students develop techniques for resolving ethical problems. Issues treated include whistle-blowing, conflicts of interest, employee privacy, affirmative action, and corporate social responsibility. There is considerable use of case studies.

Prerequisites: soph, jr, sr
Notes: 2 meetings (75 minutes)
Instructors: The program

COMOR-266-01 - Complex Organizations - 2002-2003
(Fall) Environmental Politics in America
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Politics 266f)

COMOR-270-01 - Complex Organizations - 2002-2003
(Spring) American Foreign Policy
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(International Relations 270s; Politics 270s)

COMOR-295-01 - Complex Organizations - 2002-2003
(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph, jr, sr, and permission of program

COMOR-295-01 - Complex Organizations - 2002-2003
(Spring) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph, jr, sr, and permission of program

COMOR-299-01 - Complex Organizations - 2002-2003
(Spring) Leadership and the Liberal Arts
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)

An interdisciplinary approach to the nature, operations, and directions of complex organizations. Investigates the position of women and men in organizations, with a consideration of the nature and styles of leadership and of the value of a liberal arts degree in organizational interaction, and with an exploration of issues affecting organizations (ethics, competition, legal rights, authority, socialization). Required for the minor in complex organizations.

Notes: 2 meetings (75 minutes)

Computer Science

COMSC-100-01 - Computer Science - 2002-2003
(Fall) An Introduction to Computer Science
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
An introduction to basic computer science concepts and issues. Topics will be chosen from: origins of computers, data representation and storage, computer architecture, assemblers and compilers, operating systems, networks and the Internet, distributed systems, information retrieval, data organization, graphics, artificial intelligence, robotics, the theory of computation, and trends in Internet commerce and use. Laboratory assignments will offer some experience with programming and the use of application software.
Notes: 2 meetings (75 minutes), 1 lab (2 hours); students should NOT take this course after Computer Science 101
Instructors: The department
Section Instructors: 01 LAB The department | 02 LAB The department | 03 LAB The department |
Expected enrollment: 60

COMSC-101-01 - Computer Science - 2002-2003
(Fall) Problem Solving and Structured Programming
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Introduces the C language and the use of structured programming techniques. Emphasizes the solution of complex computational problems by their analysis into smaller subproblems that can be solved independently and then combined to form a complete solution. Introduces other topics relevant to computer science. Assumes no previous study or use of computers. This course is programming intensive.
Notes: 2 lectures (75 minutes), 1 lab (2 hours)

COMSC-211-01 - Computer Science - 2002-2003
(Fall) Data Structures
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Using C++. Solving problems with computers is accomplished by writing programs that operate on data to produce a desired result. The way data is organized and presented to the program can significantly affect its efficiency and simplicity and can sometimes determine whether or not a program can be written to solve the problem at all. This course presents ways of organizing data into "data structures" and analyzes how structuring the data can improve program performance.
This course is programming intensive.
Prerequisites: Computer Science 101
Notes: 2 meetings (75 minutes)
Instructors: The department

COMSC-311-01 - Computer Science - 2002-2003

(Fall) Theory of Computation

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Are there any limits to what computers can do? Does the answer to this question depend on whether you use a PC or a Mac? Is C more powerful than PASCAL? This seminar explores these questions by investigating several models of computation, illustrating the power and limitations of each of these models, and relating them to computational problems and applications. Topics include finite state automata, pushdown automata, grammars, Turing machines, the Universal Turing Machine, and computability.

Prerequisites: Computer Science 101 and Mathematics 232

Notes: 2 meetings (75 minutes)

Instructors: C. Fennema

**COMSC-322-01** - Computer Science - 2002-2003

*(Spring)* Operating Systems

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

An introduction to the issues involved in orchestrating the use of computer resources. Topics include operating system evolution, file-handling systems, memory management, virtual memory, resource scheduling, multiprogramming, deadlocks, concurrent processes, protection, and design principles. Course emphasis: understanding the effects of operating system design on computer system performance. *This course is programming intensive.*

Prerequisites: Computer Science 211 and 221

**COMSC-324-01** - Computer Science - 2002-2003

*(Fall)* Computer Architecture

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

The goal of this class is to provide the student with a working knowledge of how computers operate and the general principles that affect their performance. New developments in hardware render current technologies obsolete within one to three years. Rather than focusing on specific technology, we cover the fundamentals that allow your understanding of technology to grow with future developments. You will also gain a better appreciation of the cost/performance trade-offs encountered in designing a computer system.

*(Fall)* Computer Networks - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

This course is an introduction to computer networks, the mechanisms used in their construction, and the factors that affect their performance. Topics include network architecture, data transmissions, network protocols, error and connection management, internetworking, the Internet, client-server programming, examples, and applications. *This course is programming intensive.*

Prerequisites: Computer Science 211, 221, and 322

Notes: 2 meetings (75 minutes)

**COMSC-327-01** - Computer Science - 2002-2003

*(Fall)* Distributed Systems

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

In decentralized systems, users often solve large problems by spreading effort over groups of computers. Problems involving information, computation, and hardware distributed at various locations must be solved. A distributed system of computers may not share a common memory or a clock. Therefore, efforts to work together require explicit communication and synchronization mechanisms. We will look at issues of problem solving with multiple processors, distributing workload, and providing access to shared resources such as I/O and storage devices and file systems, centralized and distributed methods for control of parallel activities and for detection, and resolution of conflicts.

Prerequisites: Computer Science 211, 221, and 322 or permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: D. Strahman

Expected enrollment: 15

---

**COMSC-331-01** - Computer Science - 2002-2003

*(Spring)* Computer Graphics

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

(Mathematics 331s)

The creation of pictorial images using a computer. Topics include: drawing of two- and three-dimensional scenes using OpenGL; transformations of objects (translations, scalings, rotations, shearing) using homogeneous coordinates; creating perspective in three-dimensional drawing; algorithms for enhancing realism and visual effect; and the mathematical underpinnings of graphic design. Students will complete a number of graphics projects based on readings and class discussion. *This course is programming intensive.*

Prerequisites: Computer Science 101, 211, 221, and at least one of Mathematics 203, 211, 232 or permission of instructor

**COMSC-334-01** - Computer Science - 2002-2003
(Fall) Artificial Intelligence
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
An introduction to AI research issues and models of intelligence. Topics include AI history, philosophical and research questions, LISP, state space representation, search, heuristics, connectionism, learning, and an introduction to advanced AI fields such as Natural Language Processing and Computer Vision. Course emphasis: understanding AI model development and how it relates to the theoretical issues. This course is programming intensive.
Prerequisites: Computer Science 211, 221 and Mathematics 232
Notes: 2 meetings (75 minutes)
Instructors: C. Fennema

COMSC-335-01 - Computer Science - 2002-2003
(Spring) Introduction to Computer Vision and Robotics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
An introduction to theories that suggest how to provide a computer with the ability to "see" and how to use that ability to control the actions of a robot. The potential role that robot actions can play in making computer vision possible is also discussed. Specific topics include: the physics of vision, image processing, pattern recognition, image understanding, representations, planning, robot control, architectures, and applications. This course is programming intensive.
Prerequisites: Computer Science 334 and Mathematics 202
Notes: 2 meetings (75 minutes)
Instructors: C. Fennema
Expected enrollment: 20

(Spring) Intelligent Information Retrieval - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Introduces the basic concepts, methodologies, and research findings in information retrieval. Special topics include web searching, cross-language retrieval (query in one language, retrieve documents written in many languages), data mining (automatically identifying hidden relationships from large amounts of information), and data extraction (identifying pre-specified types of information).
Prerequisites: Computer Science 211 and 221 or permission of instructor; 2 meetings (75 minutes)
Instructors: L. Ballesteros
Expected enrollment: 20

COMSC-341-01 - Computer Science - 2002-2003
(Spring) Topics: Research Philosophy and Methodology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Intended for students planning honors projects, this course will address the issues involved in the research enterprise including problem selection, experimentation, presentation, and writing. Students will read technical papers, present and critique ideas in class, write programs that help explore ideas, write a 25-30 page paper, and complete a defendable honors proposal.
Prerequisites: jr, sr, Computer Science 311, 324, and 322, permission of instructor; a 300-level course in your area of interest is recommended
Notes: 2 meetings (75 minutes)
Instructors: C. Fennema, D. Strahman

Critical Social Thought

CST-250-01 - Critical Social Thought - 2002-2003
(Fall) Introduction to Nineteenth-Century Critical Social Thought
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Sociology 200f)
An introduction to some of the great critical voices of the nineteenth century. We will explore the ideas of such mutinous thinkers as Karl Marx, Friedrich Nietzsche, Sigmund Freud, Fyodor Dostoyevsky, and W.E.B. Du Bois, focusing on the style as well as the substance of their works and the circumstances that provoked them to write and/or that their writings helped provoke. The course will highlight the tension between appearance and reality, the dialectic of domination and subordination, and the place of reason and irrationality in social life.
Notes: 2 meetings (75 minutes)
Instructors: K. Tucker
Expected enrollment: 25

CST-251-01 - Critical Social Thought - 2002-2003
(Spring) Introduction to Twentieth-Century Critical Social Theory
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking-intensive; German Studies 231s (02))
An introduction to thinkers who broke with prevailing social theories to critically address the crises and upheavals of the twentieth century. We will examine the ideas of, for example, Frantz Fanon, Walter Benjamin, Hannah Arendt, Michel Foucault, and Edward Said. We also will probe the connections between theory and practice by relating those ideas to case studies of contemporary issues. Students of German studies may focus primarily on German thinkers. This course will be conducted in English.
Prerequisites: Critical Social Thought 250 strongly encouraged
Notes: 1 meeting (2 1/2 hours)
Instructors: K. Remmler
Expected enrollment: 25

CST-252-01 - Critical Social Thought - 2002-2003
(Spring) Introduction to 20th Century Literature and Politics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
What did it mean to think critically in the twentieth century and to express that criticism through fiction? What were the specific challenges of that turbulent and brutal century, which saw so many revolutions and wars but also immense progress in human rights and social fairness? What did rebellious novelists such as Franz Kafka, Albert Camus, Gabriel Garcia Marquez, Richard Wright, Iris Murdoch, and Umberto Eco perceive as their cause? Did they have a cause? What were their solutions to the ills of humankind?
Prerequisites: Critical Social Thought 250 strongly encouraged
Notes: 2 meetings (75 minutes)
Instructors: C. Pleshakov
Expected enrollment: 25

CST-350-01 - Critical Social Thought - 2002-2003  
(Fall) Seminar in Critical Social Thought  
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement  
A seminar for juniors and seniors in which both participating faculty and students present their independent research, respond critically to one another's work, and lead discussions on relevant secondary readings. Every student will be expected to produce a substantial essay on a question in the broad field of social thought by the end of the semester. Students will be encouraged to cultivate agility in speaking, arguing, and writing.  
Prerequisites: major or permission of instructor; students may enroll only if they have submitted their program proposals to the chair  
Notes: 1 meeting (3 hours); seniors who intend to write a thesis must take 4 credits of Critical Social Thought 395 in the fall, in addition to this course  
Instructors: H. Garrett-Goodyear  
Expected enrollment: 12

CST-360-01 - Critical Social Thought - 2002-2003  
(Fall) The Terror of Politics: Social Criticism in Contemporary European Film  
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement  
This seminar explores relations between art and politics in major European films of the postwar era. Our guiding premise will follow Jean Luc Godard's statement: "The problem is not how to make political films, but rather how to make films political." We will discuss this problem in light of economic, political, and aesthetic controversies from the beginning of the Cold War to the present. Directors considered include Jean Luc Godard, Rainer Werner Fassbinder, Volker Schloendorff, Konrad Wolf, and the Dogma Group.  
Prerequisites: Critical Social Thought 252 or permission of instructor  
Notes: 1 meeting (2 hours, 50 minutes)  
Instructors: H. Teschke  
Expected enrollment: 18

CST-395-01 - Critical Social Thought - 2002-2003

Dance  
DANCE-011-01 - Dance - 2002-2003  
(Fall) *AC TH/DA Language of Movement  
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement  
An introduction to movement as a language. In studio sessions students will explore and expand their individual movement vocabularies by working improvisationally with weight, posture, gesture, patterns, rhythm, space, and relationship of body parts. We will ask what these vocabularies might communicate about emotion, thought, physical structures, cultural/social traditions, and aesthetic preferences. In addition we will observe movement practices in everyday situations and in formal performance events and use these observations as inspiration for individual and group compositions. Selected readings and viewing of video and live performance.  
Notes: 1 class/studio meetings (2 hours) and a production workshop (2 hours); offered at Amherst College  
Instructors: W. Woodson  
Expected enrollment: 20
DANCE-054-01 - Dance - 2002-2003
(Spring) *AC TH/DA Performance and Video - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
We will explore the connections between choreography/performance and video/film. The emphasis will be experimental—to learn by doing. We will work with cinematographic and choreographic terms and languages to discover similarities and differences. Encouraging reciprocity and dialogue between choreography and video/film will be the principle spirit that animates the course. Studio practice with choreography and the camera (primarily video hi 8), class discussions, viewing of videos and films, basic editing techniques, and assigned readings.
Prerequisites: permission of instructor; previous experience in choreography, directing, or video/film useful but not required
Notes: offered at Amherst College

DANCE-104-01 - Dance - 2002-2003
(Spring) Conditioning For Dancers - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Pilates provides a safe and energetic workout for all ages and physical conditions. It is a full-body exercise that encourages muscular strength, balance, skeletal alignment, coordination, and flexibility. Groups are tailored to individual needs. Evaluation will depend on attendance, commitment, and retention of the material.
Expected enrollment: 35

DANCE-113-01 - Dance - 2002-2003
(Fall) Modern I
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
An introduction to the basic principles of dance movement: body alignment, coordination, strength and flexibility, basic forms of locomotion. No previous dance experience required.
Notes: 2 meetings (90 minutes)
Instructors: T. Freedman

DANCE-114-01 - Dance - 2002-2003
(Fall) Modern II - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Advanced beginning modern technique. The course will concentrate on aspects of strength, flexibility, and anatomical integration in order to improve technical skills. Improvisation as well as various body therapies will be included in the class format.
Notes: 2 meetings (90 minutes)
Instructors: F. Wolfzahn

DANCE-119-01 - Dance - 2002-2003
(Spring) Contact Improvisation - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Contact improvisation is a duet movement form that explores communicating through the language of touch, momentum, and weight. Classes will develop simple solo and duet skills - rolling, falling, balance, counterbalance, jumping, weight sharing, and spirals.
Notes: 2 meetings (90 minutes)
Instructors: F. Wolfzahn

DANCE-120-01 - Dance - 2002-2003
(Fall) Ballet I
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Students will be taught the basic movements and fundamentals of classical dance. The movements will be taught in a pure form, at a relaxed pace before proceeding to more complex combinations. Ballet I sets the groundwork for the musicality of the ballet lesson.
Notes: 2 meetings (90 minutes)
Instructors: R. Flachs
DANCE-121-01 - Dance - 2002-2003
(Fall) Ballet II - *Not offered this year/term
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
A continuation of the knowledge gained in Ballet I. The class will emphasize maintaining correct body placement, coordination of the arms and head while using the whole body for dance. Curriculum covered will include the small and big classical poses and an increase in the allegro portion of the class.
Notes: 2 meetings (90 minutes)

DANCE-121-01 - Dance - 2002-2003
(Spring) Ballet II
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

DANCE-130-01 - Dance - 2002-2003
(Fall) Jazz I/Hip Hop - *Not offered this year/term
Credits/PE Units: 0; Requirements met: Does not meet a distribution requirement.
Introduction to fundamentals of jazz dance technique; polyrhythms, body isolations, movement analysis, syncopation. Performance of simple dance phrases using fundamentals. Development of a hip/hop jazz dance style.
Notes: For physical education credit only
Instructors: The department

DANCE-130-01 - Dance - 2002-2003
(Spring) Jazz I/Hip Hop - *Not offered this year/term
Credits/PE Units: 0; Requirements met: Does not meet a distribution requirement.
Introduction to fundamentals of jazz dance technique; polyrhythms, body isolations, movement analysis, syncopation. Performance of simple dance phrases using fundamentals. Development of a hip/hop jazz style.
Notes: For physical education credit only
Instructors: The department

DANCE-131-01 - Dance - 2002-2003
(Spring) Jazz II
Credits/PE Units: 0; Requirements met: Does not meet a distribution requirement.
An elaboration of fundamentals of jazz dancing with an emphasis on more extensive movement vocabulary.
Notes: For physical education credit only
Instructors: The department

ECON-100-01 - Economics - 2002-2003
(Fall) Introductory Economics Topics Courses: Economics in Popular Film
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
First-year seminar
An introduction to political economy and economic analysis using a wide range of popular films as the object of analysis. For example, students will view *A Respectable Trade* and discuss the economics of slavery. The basic goal of the course is to provide theoretical tools for applying economic analysis in understanding both historical events and processes and more contemporary issues. See [http://www.mtholyoke.edu/courses/sgabriel/filmcourse.html](http://www.mtholyoke.edu/courses/sgabriel/filmcourse.html) for a more detailed description.
Notes: 2 meetings (75 minutes) and 1 film showing (3 hours); This is a first-year seminar
Instructors: S. Gabriel
Expected enrollment: 15

ECON-100-04 - Economics - 2002-2003
(Spring) Introductory Economics Topics Courses: Real World Economics: Clashing Views
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
First-year seminar (Speaking-intensive)
Is free trade a viable option for the new millennium? Was welfare reform a success? Was George Bush's tax plan good economic policy? In this course we will analyze why economists fundamentally disagree about the right answers. We will develop a simple macro model of the economy and explore how differences in assumptions about the behavior of key economic groups (government, producers, consumers, and workers) and their role in society lead to differences in economic analysis and very different answers to current economic problems. Students will develop/sharpen their analytical thinking through speaking, arguing, writing and quantitative analysis.
Notes: 2 meetings (75 minutes); This is a first-year seminar
Instructors: E. Paus
Expected enrollment: 15

ECON-209-01 - Economics - 2002-2003
(Spring) United States Economic History
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Preamble (for topics courses): This 200-level course investigates a particular topic in economics at some depth without presupposing prior knowledge of economics. Many students may find one or more of these courses useful complements to majors and minors other than economics.
Examines the historical development of the U.S. economy from the colonial period to the present from a variety of theoretical perspectives. The main questions addressed are: What are the reasons for the successes of the U.S. economy (growth, increased productivity, increased living standards, etc.)? What are the causes of the problems or failures in the U.S. economy (unemployment, inflation, inequality, poverty, etc.)? How have different groups in society (classes, races, and genders) been affected differently by these successes and failures? What has been the role of the government in the U.S. economy? To what extent have wars in U.S. history been caused by economic conflicts?
Prerequisites: not open to first-year students as their first course in economics
Notes: 2 meetings (75 minutes)

This course focuses on coming-of-age texts that feature young protagonists growing up Asian American. We will address questions of identity formation and look at how family, class, sexuality, violence, and history affect the maturation process of these Asian American protagonists. We will also question definitions of Asian American ethnic identity, the phrase "coming-of-age," and the concept of "Asian America." Works by Jen Murayama, Ng, and Ondaatje are some of a sampling of the literature we will read, analyze, deconstruct, and use to develop and refine students' writing skills.

This course will examine concepts of justice and injustice as represented in literature and film from a variety of geographical and historical contexts. How do writers and artists conceptualize ideal justice? How do they represent the limits of justice as enacted through law? How do ideas of difference, such as race, gender, and class, disturb ideas of justice that rely on the logic of equality or homogeneity? To explore these questions, we will engage with literature of various genres (poems, fiction, essays), as well as films, theatrical productions, and music. Writers will include Head, Kafka, Yeats, Lee, Chopin, Chesnutt, Forster, and Arenas.

An introduction to the multiple "stories" of contemporary fiction on experimental narratives. Beginning with Lessing's rereading of the Frankenstein myth in her short novel *The Fifth Child*, the course will proceed to examine the relationship of fiction to history as explored by such writers as Fowles, Swift, and Didion. In assessing the proposition, "Never again will a single story be told as though it is the only one," the course will consider how writers such as Ondaatje and Roy have sought to incorporate the voices of the often silenced into their fiction. To gain insight into the satiric perspective of contemporary fiction, works by Rushdie, DeLillo, and Naylor may be included.

In this course we will consider how nuns inhabit the literary and visual imagination. Our discussions will focus on how depictions of nuns in various works call attention to complex issues such as holiness, virtue, femininity, vocation, sin, and community. Our primary course material will include mysteries, autobiographies, and works of historical fiction. We will also incorporate documentaries and films about nuns, convents, and the sacred spaces that these women occupy and move beyond. Materials may include works by Kate Chopin, Veronica Black, Helen Prejean, and Marion Meade, and films such as Nuns Story and Agnes of God.

(Spring) Literature of the Black Empire - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
This course traces the development of a diasporic sensibility in African American literature and culture by examining narratives of an imagined "black" or "African empire" from the late nineteenth through the twentieth century. The trope of a "dark empire" gave black writers the opportunity to represent nationally independent black communities and yet to imagine these communities as part of a larger black cultural world. These writers helped develop a "pan-Africanist" sensibility that challenged borders between culture, or literature, and politics. Authors include Delany, Du Bois, Césaire, Condé, Hurston, and McKay.
Prerequisites: soph, second-semester fy with permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: M. Stephens

(Spring) Women Writers: Nineteenth-Century American Women Writers
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Women's Studies 203s (01))
In this cross-cultural examination of nineteenth-century American women writers, we will compare a number of works of fiction, prose, poetry, and
autobiography. We will discuss how writers created sophisticated and insightful critiques of American culture and imagined or re-presented new
American identities and histories. We will also consider tensions between "sentimental" idealism and political pragmatism, restrictive domesticity and
dangerous autonomy, and passionless femininity and expressed sexuality. Authors may include Alcott, Child, Far, Fuller, Harper, Hopkins, Ruiz de Burton Wilson, and Winnemucca.
Prerequisites: soph or permission of the instructor
Notes: 2 meetings (75 minutes); satisfies English department 1700-1900 requirement

(Fall) Literary Criticism and Theory

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Writing-intensive)

This course is designed to offer students a broad historical overview of literary theory as well as exposure to contemporary debates about "theory" and literary representation. The course is both an exercise in practical criticism and a survey of the Western critical tradition from Plato to Derrida. Beginning with the question of why Plato wished to ban poets from his ideal Republic, the course will go on to consider such topics as the Classic vs. Romantic theories of the imagination, the "invention" of psychology and the necessary difficulty of much modern literature, the relation of gender and ethnicity to literary expression, and the uncertainties of literary interpretation.

(Spring) Studies in Nineteenth-Century British Literature: Representing Immigration and Emigration
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive)
Nineteenth-century Britain was transformed both by immigration and by the emigration of British subjects. We will explore the ways that writers, working in various genres, represent immigration and emigration as pivotal processes within British society, often as the cause of or the solution for sociopolitical crisis. We will consider how experiences of immigration are narrated in poetry and prose, how Britain grappled with religious and cultural diversity, and the relationship between immigration, emigration, and colonialism. Texts include the writings of Defoe, E. Bronte, Eliot, Kingsley, Lady Wilde, Trollope, and Bouicault, as well as poetry and articles from Victorian periodicals.
Prerequisites: 8 credits in department beyond English 101, including two of the following: English 200, 210, 220, or permission of instructor
Notes: 1 meeting (3 hours); satisfies English department 1700-1900 requirement; satisfies English department seminar requirement

ENGL-322-01 - English - 2002-2003
(Spring) Nineteenth-Century Poetry and Prose II: Victorians and Their "Others": Negotiating Difference in the Victorian Novel - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course explores constructions of subjectivity in a series of novels written during the Victorian period. The nineteenth century saw the vast proliferation of capitalist, industrialist, and imperialist structures that eventually brought the English into more frequent contact with nonwhite populations. At home, working class protests, early feminism, and political radicalism began to transform social identities in the metropolis. This class examines how a sampling of novelists represented and responded to these changes. Students will do presentations on historical topics such as Chartism, "the Jewish Questions," and "the Scramble for Africa."
Prerequisites: jr, sr, 8 credits in department beyond English 200, including two of following: English 220, 230, 204, 321, or permission of instructor
Notes: 2 meetings (75 minutes); satisfies English department 1700-1900 requirement

(Fall) The English Novel in the Nineteenth Century: Gender and Class in the Victorian Novel
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive)
This course will investigate how representations of gender and class serve as a structuring principle in the development of the genre of the Victorian novel in Britain. We will devote significant attention to the construction of Victorian femininity and masculinity in relation to class identity, marriage as a sexual contract, and the gendering of labor. The texts chosen for this course also reveal how gender and class are constructed in relation to other axes of identity in the period, such as race, sexuality, and national character. Novelists will include Austen, Dickens, Eliot, C. Bronte, and Hardy. Supplementary readings in literary criticism and theory.
Prerequisites: jr, sr, in department including English 220, 230, or permission of instructor

ENGL-345-01 - English - 2002-2003
(Spring) Studies in American Literature: Willa Cather
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Needs American Studies 301s (01))
Cather's major novels and short stories, from O Pioneers! to Sapphira and the Slave Girl, will be the primary focus of the seminar, with some attention to her essays and poems. Participants in the seminar will make themselves familiar with critical controversies surrounding Cather's work, including claims about her politics, poetics, and sexual orientation. We will also examine the international valences of Cather's work, in both its themes and its reception. The main goal, however, will be to arrive at a fresh and vigorous reading of Cather's rich and complex writings.
Prerequisites: Prereq. jr, sr, 8 credits in department beyond English 101, 4 credits in American Studies, or permission of the instructor
Notes: 1 meeting (3 hours)
Instructors: C. Benfey
Expected enrollment: 15

ENGL-346-01 - English - 2002-2003
(Fall) Hawthorne and Melville: American Literary Traditions and Theories
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Readings may include Hawthorne's The Scarlet Letter, The Blithedale Romance, and a number of short stories, and Melville's Typee, Bartleby the Scrivener, Benito Cereno, and Billy Budd, among a variety of other writings. We also consider other works of eighteenth- and nineteenth-century American literature in order to understand themes and tropes that Hawthorne and Melville explored and manipulated. The course explores Hawthorne's and Melville's places in recent theories of an American national literature and examines several critical approaches to their work.
Prerequisites: 8 credits in department including English 240 or 241, or permission of instructor
Notes: 1 meeting (3 hours); satisfies the English department 1700-1900 requirement
Instructors: C. Lee
Expected enrollment: 15

ENGL-350-01 - English - 2002-2003
(Spring) Studies in African American Literature: Slavery and the Literary Imagination
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Speaking- and writing-intensive; American Studies 301s (01))
In this course we will study American works that focus on American slavery. How do authors contend with historical fact and literary conventions as they re-presents the experiences of slaves, owners, fugitives, abolitionists, and free people of color? Does a writer's race or historical context influence his or her portrayal of slavery? How do conventions of the slave narrative and sentimental novel affect the representation of slavery and freedom? Authors may include Charles Chesnutt, Frederick Douglass, Jeffrey Lent, Lorence Cary, Harriet Beecher Stowe, and Sherley Anne Williams.
Prerequisites: jr, sr, 8 credits in department beyond English 101, including at least one of the following: English 240, 241, 250, or permission of instructor
Notes: 1 meeting (3 hours); satisfies English department 1700-1900 requirement; satisfies English department seminar requirement
Instructors: L. Brown
Expected enrollment: 15
ENGL-351-01 - English - 2002-2003
(Fall) Toni Morrison - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Speaking- and writing-intensive)
This course will focus on Toni Morrison and the extensive literary criticism generated in response to her writings. As we read such works as The Bluest Eye, Sula, Beloved, and Paradise, we will discuss Morrison's evolution as a writer, the ways in which she critiques and reconstructs American communities, her authorial agendas, and her critical reception. We will consider Morrison in relation to her contemporaries and the African American and American literary traditions. Discussions will take up questions about the roles and responsibilities of the African American author, the genres of historical fiction and romance, and redefinition of black womanhood.
Prerequisites: jr, sr, 8 credits in department beyond English 101, including one of the following: English 240, 241, 250, or permission of instructor; previous course work in African American literature recommended
Notes: 1 meeting (3 hours); satisfies the English department seminar requirement
Instructors: L. Brown

ENGL-358-01 - English - 2002-2003
(Fall) Studies in Asian American Literature: Asian American Postmodern Novel
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Speaking- and writing-intensive)
This course will focus on contemporary Asian American postmodern novels. Beginning with David Harvey's The Condition of Postmodernity, we will examine just what the term "postmodernism" means and how we can apply this concept to a study of contemporary Asian American fiction. Although the concentration of this course will be on Asian American writing, we will begin the course with selections and short works by key postmodern writers - Pynchon, Delillo, Morrison - before turning to longer works by Asian American postmodern writers such as Tripmaster Monkey by Kingston, A Gesture Life by Chang-rae Lee, Father of the Four Passages by Lois Ann Yamanaka, and others.
Prerequisites: 8 credits in department, including English 200 (or appropriate courses) or permission of the instructor
Notes: 1 meeting (3 hours); satisfies the English department seminar requirement
Instructors: J. Ho

ENGL-360-01 - English - 2002-2003
(Fall) Readings in Contemporary Fiction - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A study of post-World War II traditional and experimental fictions. Because of the nature of the materials, the reading list will regularly be revised but will be selected from the work of such novelists as Joan Didion, Nadine Gordimer, Doris Lessing, Cormac McCarthy, Toni Morrison, Gloria Naylor, E. Annie Proulx, Salman Rushdie, and Graham Swift.
Prerequisites: jr, sr, 8 credits in department including English 200 or permission of instructor; enrollment may be limited
Notes: 2 meetings (75 minutes)
Instructors: W. Quillian

ENGL-361-01 - English - 2002-2003
(Spring) Post-World War II Poetry
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)
A study of poetry written in English from World War II to the present. Poets representing a variety of countries and cultural traditions will be read. A typical list may include American poets such as Bishop, Berryman, Brooks, Clampitt, Dove, Merrill, Plath, and Wilbur; poets from England, Ireland, Northern Ireland, Canada, the Caribbean, and Australia, such as Fenton, Harrison, Heaney, Hope, Ted Hughes, Muldoon, Murray, and Walcott.
Prerequisites: jr, sr, 8 credits in department beyond English 101 or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: M. Salter

ENGL-365-01 - English - 2002-2003
(Spring) In and Around Tom Stoppard
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
An intensive study of the playwright considered by many to be the greatest living dramatist in English. As Stoppard's plays often incorporate responses to other writers, we will include readings in Shakespeare, Oscar Wilde, A.E. Houseman, etc. Plays by Stoppard will include, among others, "Rosencrantz and Guildenstern Are Dead," "Travesties," "The Real Thing," "Arcadia," "The Invention of Love," and his recent trilogy, "The Coast of Utopia."
Instructors: M. Salter

ENGL-370-01 - English - 2002-2003
(Fall) The Caribbean in American Culture - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
This seminar uses the interdisciplinary methods of American studies to explore the role migrants from the English-speaking Caribbean have played in the United States. We will examine Caribbeans' images of themselves in literature and popular culture to understand the various ways they have (re)defined what it means to be "American" and "African American" in the twentieth century. A major theme will be the intersections of race, ethnicity, gender, and sexuality in Caribbean American identity. North American perceptions and constructions of the Caribbean will also be central. Readings include Lorde, Hughes, Hurston, Marshall, and Cliff.
Prerequisites: jr, sr, 8 credits in beyond English 101 or permission of instructor
Notes: 1 meeting (1 ¾ hours), plus screenings
Instructors: M. Stephens

ENGL-372-01 - English - 2002-2003
(Fall) The Literature of Exile - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Speaking-intensive)
This seminar explores shifting means of exile over the course of the twentieth century. Are exile from home and alienation from society ideal conditions, or states of dread? How has the history of European exploration and colonialism shaped the discourse of exile? What does exile look like today in a transnational age of porous national borders? Some of the themes we will consider are: questions of belonging, the relationship between internal and external exile, exile as geographic, psychological, aesthetic, and political, and identity formation and exile. Readings may include Baldwin, Camus, Conrad, Hemingway, Morrison, and Said.
Prerequisites: jr, sr, English 240, 241, or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: M. Stephens

ENGL-373-01 - English - 2002-2003
(Spring) Nature and Gender: "A Landscape of One's Own" - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Using a case-studies approach to learning about the lives of women at the turn of the century, this seminar will focus on how women told their life stories in contexts of the islands, prairies, forests, and deserts of the United States. Writers will include Thaxter, Freeman, Jewett, Stewart, Sa, Austin, and Cather; texts will include a combination of autobiographical essays and narratives, biography, fiction, and poetry.
Prerequisites: jr, sr, English 240, 241, or permission of instructor
Notes: 1 meeting (3 hours); satisfies English department 1700-1900 requirement
Instructors: L. Glasser
Expected enrollment: 18

ENGL-380-01 - English - 2002-2003
(Spring) Criticism and Theory in Practice
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
An intensive look at several works covering a range of genres and periods, and at some of the criticism written about them, especially, though not exclusively, contemporary criticism. The works will include Shakespeare's MACBETH, Keats' odes, Austen's EMMA, and Twain's ADVENTURES OF HUCKLEBERRY FINN, as well possibly as Chaucer's WIFE OF BATH'S PROLOGUE AND TALE, an important critical work like Brooks' WELL-WROUGHT URN, and some "nonliterary" works like THE DECLARATION OF INDEPENDENCE. The seminar may be conducted at least in part in tutorial groups of two or three meeting once weekly, with frequent short papers or reports and a longer paper.
Prerequisites: jr, sr, 8 credits in department beyond English 101; English 280 recommended
Notes: 1 meeting (2 hours)
Instructors: R. Johnson
Expected enrollment: 15

ENGL-381-01 - English - 2002-2003
(Spring) Film Melodrama and Horror - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course will analyze two important film genres, melodrama and horror, through the lenses of contemporary theories of gender, race, and sexuality. Topics of particular interest: feminist analyses of gender and genre, racial difference and "whiteness," normative and alternative sexualities, masculinity, identification and spectatorship, and recent revisions of these genres. Directors may include Cronenberg, Dash, DePalma, Hitchcock, Onwurah, Ray, Romero, Sirk, Vidor, and Whale.
Prerequisites: course work in Film Studies or permission of the instructor
ENGL-383-01 - English - 2002-2003
(Spring) Seminar in Narrative and Critical Theory: James Joyce, D.H. Lawrence, and Virginia Woolf
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
The seminar will focus on major texts by three of the most important novelists of the early twentieth century. Beginning with Joyce’s A Portrait of the Artist as a Young Man and Lawrence’s Sons and Lovers, we will consider these “autobiographical” narratives as responses to contemporary narrative theory, and we will go on to explore how Lawrence’s vision changes in his subsequent novels, The Rainbow and Women in Love. The next five weeks will focus on Joyce’s monumental Ulysses. The seminar will conclude with Woolf’s Mrs. Dalloway and To the Lighthouse.
Prerequisites: jr, sr, 8 credits in the department including English 200 or permission of instructor; English 280 and any upper level course in narrative (e.g., English 323, 342, 360), highly recommended
Notes: 1 meeting (3 hours); satisfies English department seminar requirement
Instructors: E. Young
Expected enrollment: 15

ENGL-385-01 - English - 2002-2003
(Spring) Feminist Theory and Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive; Women's Studies 333s (04))
This seminar investigates contemporary feminist theory - including but not limited to feminist film theory - in relation to film. We will examine the influential formulations of the cinematic "male gaze" and woman’s film, recent theorizations of race and sexuality in cinema, gender complexities in classic and contemporary Hollywood film, and new trends in filmmaking by women. Requirements include extensive readings, weekly essays, and film screenings.
Prerequisites: jr, sr, 8 credits in English and/or Women's Studies beyond English 101, and permission of instructor; Film Studies 201 and/or other background in film strongly recommended
Notes: 1 meeting (3 hours) plus evening screening; satisfies English department seminar requirement; previously offered as English 372
Instructors: E. Young

Environmental Studies

ENVST-100-01 - Environmental Studies - 2002-2003
(Spring) Introduction to Environmental Studies
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Community-based learning course)
This course introduces students to the complexity of selected environmental problems, attempts to foster an understanding of their origins, and discusses potential solutions. In addition, it introduces basic ecological principles, economic, political, and cultural concepts, and their importance to understanding and solving environmental problems.

Instructors: L. Savoy

ENVST-200-01 - Environmental Studies - 2002-2003
(Fall) Environmental Science
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Community-based learning course)
Most of our society's environmental problems are complex and interdisciplinary in nature. Environmental science is a course designed to teach integrative thinking, the "scientific method," and problem solving. Lectures will be drawn from a variety of scientific fields including ecology, hydrology, chemistry, geology, and biology with an emphasis on ecosystems and biogeochemical cycles. The course will use case studies of regional environmental problems, practical hands-on problem solving, and landscape analysis. Training in field and laboratory techniques is an integral part of the course. Priority given to environmental studies majors.
Prerequisites: Environmental Studies 100; one course in statistics is recommended
Instructors: J. Bubier
Expected enrollment: 24

ENVST-321-01 - Environmental Studies - 2002-2003
(Fall) Conference Courses in Environmental Studies: Amazon Forest Dynamics
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Selected topics in areas of environmental interest, determined by faculty expertise and student needs. Study in small groups or by individual students working with faculty.
The Amazon represents 65 percent of the earth's tropical rain forest system, yet it has been underrepresented in tropical rain forest treaties. This course will examine evolution and ecological community dynamics theory to describe the origin of this diversity "center" and how it has been sustained through geologic eons. We will explore this system's contributions to global cycles (atmospheric, hydrologic, and ecological) and how internal energy flows of these cycles relate to the world as a single ecosystem. Land alteration patterns since the Amazon's introduction to western economic systems, as well as future development and conservation scenarios, will be examined and evaluated.
Prerequisites: background in species evolution, forest ecology, and conservation biology
Notes: 1 meeting (3 hours)
Instructors: S. Bergen
ENVST-321-01 - Environmental Studies - 2002-2003
(Spring) Conference Courses in Environmental Studies: Contaminants in the Environment
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Selected topics in areas of environmental interest, determined by faculty expertise and student needs. Study in small groups or by individual students working with faculty.
This course is designed to be an introduction to the toxicology of several important environmental contaminants, including PCBs, dioxins, DDT, and mercury. We will cover, where appropriate, the history, chemistry, route(s) of exposure, and biological effects of these contaminants on both wildlife and humans. Class projects will focus on developing case histories for selected contaminants.
Prerequisites: Environmental Studies 200, a course in chemistry or biology, or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: E. Monosson
Expected enrollment: 15

ENVST-321-02 - Environmental Studies - 2002-2003
(Spring) Conference Courses in Environmental Studies: International Water Issues and Policies
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Selected topics in areas of environmental interest, determined by faculty expertise and student needs. Study in small groups or by individual students working with faculty.
Water scarcity now poses serious constraints on food security, ecological health, and regional peace and stability in many parts of the world. This course examines the history of water development, the signs and consequences of water scarcity today, and the emerging politics of water. Case studies (e.g., the Everglades, Middle East rivers) provide an opportunity to grapple with real-world problems. A key focus is the interplay between technologies, policies, institutions, and law in confronting water challenges.
Prerequisites: major, minor, or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: S. Postel
Expected enrollment: 18

ENVST-321-03 - Environmental Studies - 2002-2003
(Spring) Conference Courses in Environmental Studies: Biogeochemistry of Northern Ecosystems
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Selected topics in areas of environmental interest, determined by faculty expertise and student needs. Study in small groups or by individual students working with faculty.
Global climate models and recent evidence show that ecosystems in the northern latitudes are extremely sensitive to climate change. This interdisciplinary science course examines boreal, subarctic and arctic ecosystems through the study of nutrient cycling, plant ecology, hydrology, soil processes, and biosphere-atmosphere interactions. Topics include fundamentals of biogeochemical cycling of sensitivity, feedbacks to climate change, and disturbance processes such as fire and permafrost degradation.
Prerequisites: At least 2 semesters of biology, chemistry, or environmental science, and permission of the instructor
Notes: 1 meeting (3 hours)
Instructors: J. Bubier
Expected enrollment: 15

ENVST-325-01 - Environmental Studies - 2002-2003
(Spring) Photography and Landscape: Earth As Visual Text
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Our understanding of the world around us is deeply influenced by the visual images created in response to human experience of nature. This course explores photography as a way of seeing and interpreting landscape and environment through time. Projects allow students to examine visual elements of landscape, develop photographic techniques, and create photo-narratives of their own. Using readings, observations, and photographs we consider how cultural and environmental issues and insights are communicated through photographic media. Basic understanding of photography and access to a camera are required.
Prerequisites: Art (Studio) 200 or permission of instructor
Instructors: L. Savoy
Expected enrollment: 15

ENVST-390-01 - Environmental Studies - 2002-2003
(Fall) Senior Seminar in Environmental Studies
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This is the capstone course of the environmental studies major. The course explores linkages among the diversity of disciplines that contribute to the environmental studies major, illustrates how these disciplines that contribute to the environmental studies major are used in environmental decision
making, enables students to inform one another's roles as environmentalists, and provides students with opportunities to develop individual and
cooperative projects. See the course catalogue supplement for topics, which change from year to year.

(Fall) European Studies Seminar: Europe and the Euro
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Twelve member nations of the European Union have adopted the euro as their new currency. This historic event will be our starting point for exploring broader questions concerning cross-national standards and their implications for European diversity and integration. Will the new Europe be able to sustain and foster national/regional identities? What will become of European diversity in political and legal traditions, culture, technology, and other institutions? How do Europeans, both inside and outside of the union, view the movement toward further integration and enlargement? We will examine these issues in their historical context, combining cultural, economic, and political perspectives.
Prerequisites: at least one course at the 200 or 300 level relevant to European studies or permission of the instructor
Notes: 1 meeting (3 hours); Mr. Christiansen will be teaching in collaboration with other members of the European studies program

Film Studies

FLMST-201-01 - Film Studies - 2002-2003  
(Fall) Introduction to Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course teaches the basic concepts and critical skills involved in interpreting film. Through lecture, reading, discussion, and screening of films both in and outside of class, the student will become a more informed and sophisticated observer of the cinema. During the first half of the semester, the class will study form and style in narrative film as well as in nonnarrative practices such as avant-garde and documentary filmmaking. For the remainder of the course, the class will examine some of the major critical approaches in the field.
Notes: 2 meetings (75 minutes), 1 screening (2 1/2 hours)
Instructors: R. Blaetz

FLMST-210-01 - Film Studies - 2002-2003  
(Fall) Production Workshop on the Moving Image
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course will focus on the production and critical study of the moving image using video equipment. Included are hands-on exercises with video camcorder and editing facilities, as well as screenings and critical reading. Contact the film studies program before registration.
Notes: 1 meeting (3 hours), 1 screening (3 hours); a lab fee may be charged
Instructors: A. Steuernagel
Expected enrollment: 15

FLMST-230-01 - Film Studies - 2002-2003  
(Spring) Documentary Film - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course examines the principles, methods, and styles of nonfiction film. Beginning with the "actualités" of film history's first practitioners and ending with contemporary self-reflexive films, such as Errol Morris's *The Thin Blue Line*, the class studies films that strive to represent some aspect of the real world as opposed to the fictional worlds of narrative cinema.
Prerequisites: Film Studies 201 or permission of instructor
Notes: 2 meetings (75 minutes) plus 1 screening (2 1/2 hours)
Instructors: R. Blaetz

FLMST-250-01 - Film Studies - 2002-2003  
(Spring) History of World Cinema
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course offers an historical survey of the cinema as a developing art form and a means of communication. We will consider the national, economic, and social conditions of an international medium that has existed for over a century. The national and thematic focus of the course shifts through the semester. For example, we will focus on U.S. film in studying the earliest developments in film technology and narrative, Soviet and French films to study the formal and social experimentation of the 1920s, and films made in Cuba and Brazil to elucidate political filmmaking in the 1960s. The course provides a background for understanding film history and pursuing further studies in the field.
Prerequisites: Film Studies 201 or permission of instructor
Notes: 2 meetings (75 minutes), 1 screening (2 1/2 hours)
Instructors: R. Blaetz
FLMST-260-01 - Film Studies - 2002-2003
(Fall) Film Genre: The Science Fiction Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course explores various manifestations of the science fiction film as it has appeared from the beginning of film history. Examples include the early "magic" films of Melies and Clair, as well as the numerous examples of the genre from the 1950s, and more contemporary films such as 2001 and Videodrome. The course traces the formal and thematic history of the genre, with attention paid to the figuration of modern science, the evolution of social roles, the technological body, and postmodern representations of time and space.
Prerequisites: Film Studies 201 or permission of instructor
Notes: 2 meetings (75 minutes) and 1 screening (2 hours, 30 minutes)

FLMST-310-01 - Film Studies - 2002-2003
(Spring) Production Seminar on the Moving Image
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): An advanced course in the theory and practice of film/video production as an art form. Topics for the seminar will vary from year to year.
This course continues to explore the moving image as an art form, focusing on three specific components: structure, sound, vision. The first segment of the course will explore films whose structure makes them most memorable. The second segment will examine innovative ways in which sound is used in film. The final segment of the course will focus on films in which the visual element predominates. Emphasis will be placed on the technical/aesthetic aspects of media art production. Students will be expected to create their own video/audio work. Weekly screenings will be supplemented with readings offering a theoretical/historical context in which to think about independent cinema and video art.
Prerequisites: Film Studies 210, equivalent, or permission of instructor
Notes: 1 meeting (3 hours), 1 screening (2 1/2 hours); a lab fee may be charged
Instructors: A. Steuernagel
Expected enrollment: 15

(Fall) French Literature and Cinema
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive; Taught in English)
The classic stories of French literature are frequently the inspiration for new stories, whether in film or in new novels. Through adaptation, the stories are transformed, taking on the issues of another era and the characteristics of a new medium. In this course, we will explore adaptation, focusing on films and novels based on well-known French texts. Through a series of short papers and brief oral presentations, we will also emphasize critical analysis and the formation of a clear, well-presented, and well-supported argument. Among the works we will discuss are Laclos' Dangerous Liaisons and Dumas' The Count of Monte Cristo.
Notes: This is a first-year seminar
Instructors: S. Hull
Expected enrollment: 10

FREN-199-01  -  French - 2002-2003
(Fall) Elementary to Intermediate French
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
An integrated two-semester course in language and culture for elementary-level students with limited study of French. The first semester consists of a thorough review of beginning grammar and the development of listening and speaking skills. The second semester continues the emphasis in these areas, adding more sophisticated grammatical concepts. The course concentrates on vocabulary building, writing, and developing ease and competence in spoken French.
Prerequisites: department placement
Notes: 2 meetings (75 minutes) and 1 meeting (50 minutes), or 4 meetings (50 minutes) plus conversation lab; students must complete both French 199 and French 200 to fulfill the language requirement and to receive credit for this course

FREN-220-01 - French - 2002-2003
(Spring) Studies in French and Francophone Culture and Literature in English Translation: A Medieval Room of One's Own: Christine de Pizan and Her World
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English; Medieval Studies 200s (01))
Preamble (for topics courses): Study of works by French-speaking authors (in English translation) using a variety of approaches (thematic, sociohistorical, generic, etc.) to explore cultural contexts, ideas, important writers and works, aesthetic conventions, major figures, or political and historical events. Conducted in English. Does not count as part of the minimum requirement for the major or minor.
The patriarchal society in which Christine lived was a difficult place to find work when her husband died and she became the sole support of her children. Her world was a troubled world: the late fourteenth and early fifteenth centuries saw political, social, and economic crises in France. The course will examine how Christine made a place for herself amidst personal and political turmoil. It will provide a broad canvas of late-medieval literary and historical transformation, including the stunning appearance of Joan of Arc. Study of Christine's works, of texts by other authors, and of manuscript illumination will give a rich sense of the period.
Notes: 2 meetings (75 minutes); students may obtain 300-level credit with necessary prerequisites (two of French 215, 219, 225, or 230) and with permission of instructor, and may use it to satisfy the French department requirement for a 300-level course dealing with culture/literature prior to 1800
Instructors: M. Switten

FREN-311-01 - French - 2002-2003
(Spring) Period Courses - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): The usual periodization of French literature and culture is by century. Many period courses treat specific centuries. Others focus on artistic or intellectual movements: gothic, Renaissance, romantic. All period courses, whatever their conceptual framework, integrate texts and historical contexts.
Prerequisites: French 215 and one of 219, 225, or 230
Notes: one meeting (3 hours)

FREN-331-01 - French - 2002-2003
(Fall) Courses on Social and Political Issues and Critical Approaches: Eroticism and Courtliness: Medieval Stories of Desire (Pre-1800)
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Preamble (for topics courses): These courses examine a definable phenomenon — an idea, a movement, an event, a mentality, a cultural structure or system, an historical problem, a critical mode — relevant to the civilization of France or of French-speaking countries. Readings from a variety of disciplines shed light on the particular aspect of thought or culture being studied.
A study of how medieval stories propose simultaneously the celebration of sexuality and its containment within the social fabric. Against what constraints do individuals pursue their desires? Are masculine and feminine desires equally represented? After initial review of the Tristan legend, readings will include courtly romances placed beside bawdy and humorous tales to engage the full spectrum of emotions and relationships and to ask if those relationships differ (and if so how they differ) from relationships that pertain today.
Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: M. Switten

FREN-341-01 - French - 2002-2003
(Fall) Courses in Francophone Studies: French and Francophone Postcolonial Cinema
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Language requirement or Humanities I-A requirement
Preamble (for topics courses): These courses study nonmetropolitan French-speaking cultures and literary works written in French outside Europe. Areas of focus are one or more of the following regions: Africa, the Caribbean, or Canada.
This course will examine the role of cinema in shaping postcolonial Francophone national identities: North and Sub-Saharan Africa and the West Indies. We will also explore moviemaking in France by the second generation of immigrants. Issues to be discussed: the impact of colonization, national identity, neocolonialism, postcolonial identity, immigration, and gender as they relate to filmmaking.
Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor
Notes: 1 meeting (2 hours, 50 minutes) plus movie screenings outside of class
Instructors: L. Haughe

FREN-341-01 - French - 2002-2003
(Spring) Courses on Women and Gender: Every Secret Thing - Contemporary Women’s Autobiographical Narrative
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Preamble (for topics courses): These courses explore cultural, literary, and social issues relating to women and gender identities in France and French-speaking countries. Topics may include women’s writing, writing about women and men, the status of women, feminist criticism, and theories of sexuality and sexual difference.
This course will examine contemporary autobiographical narratives written by women, with a particular focus on authors whose works include multiple autobiographical texts of various genres: fictional, nonfictional, and semifictional. We will analyze the ways in which these authors present their life stories, especially the traumatic or secret episodes, and the ways in which their works discuss the process of that presentation and of memory itself. Themes that are common to these autobiographical texts include: relationships with family, education, sexuality, class, and love. In addition to literary texts, we will analyze in detail several autobiographical films made by women.
Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: S. Gadjo

FREN-351-01 - French - 2002-2003
(Spring) Courses in Francophone Studies: The Négritude Movement
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Language requirement or Humanities I-A requirement
Preamble (for topics courses): These courses study nonmetropolitan French-speaking cultures and literary works written in French outside Europe. Areas of focus are one or more of the following regions: Africa, the Caribbean, or Canada.
In the interwar period, 1920-1940, black students from Africa and the Caribbean met in Paris to pursue their education. Galvanized by the colonial situation at home and the political situation in France, Aimé Césaire (Martinique), Léopold S. Senghor (Senegal), and Léon Damas (French Guyana) formed the cultural movement called Négritude.
This course will survey the emergence, goals, evolution, achievements, and legacies of that movement. Discussions will be based on major texts by the founders. Their influence on the works of a new generation of African and Caribbean writers will also be examined.
Prerequisites: two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: L. Huughe

FREN-370-01 - French - 2002-2003
(Full) Seminar: Avoir Vingt Ans - Youth and Ambition
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Preamble (for topics courses): The seminar is intended to challenge students at the highest level. A regular rotation of topics ensures a variety of perspectives across genre and period, encompassing linguistic, literary, theoretical, and cultural issues of French and Francophone studies.
Development of critical skills is stressed through classroom discussion and critique of writing projects, drawing on individual student interests and experiences as they relate to the topic of the course.
This course seeks to recall all lovers, warriors, dreamers, social climbers, sports fanatics, and other "action figures" of France’s collective past, equating or contrasting their aspirations with the dreams of modern youth. Students will study the lives and visions of heroes such as Jeanne d’Arc, La Princesse de Clèves, Candide, Napoléon Bonaparte, Julien Sorel, Eugène de Rastignac, Emma Bovary, Saint Exupéry, and Frison-Roche. Using films, modern novels, newspaper articles, and drawing on their own personal experience, students will investigate and examine the sociocultural and political issues that confront contemporary French youth.
Prerequisites: two courses at the advanced level, or permission of department chair and course instructor; literacy in Web technology recommended.

(Spring) Seminar: Writing and Politics: Literature as Social Engagement
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Preamble (for topics courses): The seminar is intended to challenge students at the highest level. A regular rotation of topics ensures a variety of perspectives across genre and period, encompassing linguistic, literary, theoretical, and cultural issues of French and Francophone studies. Development of critical skills is stressed through classroom discussion and critique of writing projects, drawing on individual student interests and experiences as they relate to the topic of the course.
Study of French and Francophone writers, in their specific contexts, whose works engage with important political issues. We will begin with readings that theorize how texts can communicate, explicitly or implicitly, an ideological stance (Camus, Sartre, Kristeva, Foucault, Césaire, Glissant, Cixous), then consider imaginative works from the Middle Ages to the present whose particular literary techniques (thematic, narrative, stylistic and linguistic) connect with movements for social and cultural change. Possible texts/authors: "chanson de geste"; Christine de Pizan; DuBellay; Molière; LaFayette; Beaumarchais; Graffigny; Hugo; Zola; surrealists; Sartre; Oyono; Wittig; Kateb; Djebar; + films.
Prerequisites: two courses at the advanced level, or permission of department chair and course instructor

Geography

GEOG-102-01 - Geography - 2002-2003
(January) A Short Course in Geographic Information Systems
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This course is an intensive one-week introduction to the theory and practice of geographic information systems (GIS). The course begins each session with an introduction to the principles of map science as they apply to GIS. The remainder of the session is used to acquire basic software skills and application experience using the ESRI ArcGIS software. The course culminates with each student conducting a small independent project using GIS data and tools.
Notes: This class will run from January 6th to January 10th with 10 sessions (3.5 hours) scheduled over 5 days.
Instructors: T. Millette
Expected enrollment: 10

GEOG-105-01 - Geography - 2002-2003
(Fall) World Regional Geography
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Surveys physical and human geographic patterns, providing a comprehensive background discussion of individual regions. Analyzes each region in terms of its environmental base and resource distribution, agricultural systems and rural development, population growth and characteristics, and patterns of urbanization and industrial growth.
Notes: 3 meetings (1 hour)
Instructors: G. Kebbede

GEOG-105-01 - Geography - 2002-2003
(Spring) World Regional Geography - *Not offered this year/term
Surveys physical and human geographic patterns, providing a comprehensive background discussion of individual regions. GEOG-204-01 - Geography - 2002-2003
(Spring) Human Dimensions of Environmental Change
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Using case studies from Africa, Asia, North and South America, and Europe, this course examines the interactions between human institutions (such as political and economic structures, science and technology, class and gender systems, and cultures) and the environmental/earth systems that provide their contexts and have been impacted by them. The course will provide a forum to analyze the environmental consequences of a variety of land-use systems, resource use, and development projects and explore possible alternative strategies of human-environment relations that could create a balance between human needs and environmental constraints.
Notes: 1 meeting (3 hours)
Instructors: G. Kebbede

GEOG-205-01 - Geography - 2002-2003
(Spring) Mapping and Spatial Analysis
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Provides a comprehensive introduction to maps, including their design, compilation, and computer production. Introduces students to the principles of abstracting the Earth's surface into a map and using maps and cartographic databases as spatial analytical tools.
Notes: 1 meeting (3 hours), 1 lab (3 hours)
Instructors: T. Millette
Expected enrollment: 16

GEOG-206-01 - Geography - 2002-2003
(Spring) Political Geography
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Systematically studies political phenomena and their geographic expression, at a variety of spatial scales - national, regional, and international. Major themes include nation-state formation, boundary, territory, and ethnic issues, regional blocs and spheres of influence, and conflicts over access to and use of resources.
Instructors: G. Kebbede

GEOG-209-01 - Geography - 2002-2003
(Spring) Women and the Environment
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
People's interactions with their environments are socially constructed. In this seminar, some of the ways in which women and girls interact differently with the environment are examined. Topics include: women and nature, women in agricultural systems, women and environment/health/disease, women in earth and environmental movements, and fieldwork and researcher-informant relations.
Instructors: G. DiChiro
Expected enrollment: 20

GEOG-211-01 - Geography - 2002-2003
(Fall) Geographic Information Systems
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
In this comprehensive introduction to the theory and technology of geographic information systems (GIS), students are introduced to basic raster and vector data structures, spatial database design, attribute database processing, and the role they play in a GIS. Computer exercises are used to acquaint students with state-of-the-art GIS software and highlight fundamental GIS principles.
Prerequisites: Geography 205 or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: T. Millette
Expected enrollment: 16

GEOG-213-01 - Geography - 2002-2003
(Fall) Geography of Europe - *Not offered this year/term
The human geography of Western Europe has changed substantially since the 1960s. Enlargement of the European Union (EU) symbolizes a greater sense of European identity, but at the same time important regional differences have reemerged and strengthened. Evaluating the viability of the EU first requires understanding the physical, economic, and political geography of the member states. This course offers the opportunity to focus on the common characteristics and shared problems of the member countries to better assess the future prospects and problems of the community.

GEOG-217-01 - Geography - 2002-2003
(Fall) The African Environments - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
The course provides an integrated analysis of biogeography, environmental change, and hydrology within each of the biomes found in the African continent: forest, savanna, desert, coast, wetland, mountain, and Mediterranean environments. It also discusses the impact and significance of human activity on African environments by exploring debates about soil erosion, desertification, biodiversity and depletion, and conservation and development.

Notes: 2 meetings (75 minutes)
Instructors: G. Kebbede

GEOG-224-01 - Geography - 2002-2003
(Spring) Atmosphere and Weather - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is a detailed examination of the structure of the earth's atmosphere, radiation budget, global pressure cells, and synoptic weather characteristics. The class places heavy emphasis on basic weather forecasting techniques, which are conveyed via problem-based learning exercises created with local meteorological data sets.
Prerequisites: high school earth science or any 100-level Geography course
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: T. Millette
Expected enrollment: 12

GEOG-225-01 - Geography - 2002-2003
(Fall) Evolution of North American Landscapes - *Not offered this year/term
(Geology 225f)
The landscapes of Earth are the result of complex processes and have evolved dramatically since the planet's formation over 4.5 billion years ago. In this course we examine the geologic evolution of the North American continent and its natural features. Using narrative descriptions, scientific articles, maps, photographs, and videos, in addition to the texts, we tour North America and explore the origin and anatomy of its landscapes, including national parks and monuments. We then consider how the geologic setting or physical environment influenced human exploration and settlement of the continent.
Prerequisites: high school earth science or any 100-level Geology course or permission of instructor

GEOG-290-01 - Geography - 2002-2003
(Fall) Ethnoarchaeology and Geology of the Ancient Southwest - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Geology 290f)
The American Southwest is a geologically and culturally striking landscape that has been continuously inhabited by indigenous peoples for thousands of years. Co-taught by an earth scientist and bioarchaeologist, this interdisciplinary course examines the complex interrelationships between geological and ecological processes, and human culture and biology of the ancestral Pueblo people in the Southwest. A key feature is a group field trip (fall break) to the Southwest where we consider questions on the nature of changing landscapes, environmental constraints, and biocultural processes for both ancient and modern Pueblo people.
Prerequisites: permission of instructor
Instructors: L. Savoy, D. Martin
Expected enrollment: 15

GEOG-295-01 - Geography - 2002-2003
(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph and permission of instructor
Instructors: The department.

GEOG-295-01 - Geography - 2002-2003

GEOG-304-01 - Geography - 2002-2003
(Fall) Selected Problems in Regional Geography: Planning and the Environment
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
As development continues to put pressure on the environment, increased interest in planning at the local and regional levels of government is seen as a grassroots approach to environmental management. This seminar course examines successful and innovative approaches used by planning agencies to monitor and protect the environment. Topics include town and regional master plan development, zoning, land evaluation and site assessment studies, and solid waste and growth management issues.
Prerequisites: Geography 204
Notes: 1 meeting (3 hours)
Instructors: T. Millette
Expected enrollment: 15

GEOG-307-01 - Geography - 2002-2003
(Fall) Remote Sensing - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Geology 307f)
This course presents the fundamentals of digital analysis of aerial satellite imagery. Students are introduced to the characteristics of Earth images and learn to make qualitative and quantitative assessments of multispectrum and satellite data. Basic photo interpretation exercises are complemented with computer analysis of satellite data for land use and land cover analysis, vegetation stress analysis, and urban hydrology.
Prerequisites: Geography 205
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: T. Millette
Expected enrollment: 12

GEOG-311-01 - Geography - 2002-2003
(Fall) Seminars: Third World Development
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(African American and African Studies 311f)
Preamble (for topics courses): These seminars present selected topics in geography that reflect contemporary problems, current geographical ideas, philosophical and methodological trends in geography, and/or the history and development of geographical thought.
This course examines the economic and environmental problems confronting less-developed countries. Themes discussed in the course include theories of development and underdevelopment, the physical environment and resources, structure of agrarian systems, internal interaction and spatial structure, and external economic relationships.
Prerequisites: jr, sr, 4 credits in geography and 4 credits in related social sciences at the 200 level, or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: G. Kebbede
Expected enrollment: 20

GEOG-312-01 - Geography - 2002-2003
(Spring) Seminars: Native American Lands and Environments
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Preamble (for topics courses): These seminars present selected topics in geography that reflect contemporary problems, current geographical ideas, philosophical and methodological trends in geography, and/or the history and development of geographical thought.
This seminar examines transformations in the cultural and political geography of Native Americans over the last 500 years. It will focus on changes in the lands and natural resources under Native American control, tracing the geographical effects of Euro-American efforts to assimilate and dispossess Native Americans of their lands and resources. Emphasis is placed on the importance of law, legislation, and court decisions. Topics will include: colonialism, treaty rights, legal definitions of the reservation, water rights, environmental hazards, environmental protection, land claims, mining, and nuclear waste.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: S. Silvern
Expected enrollment: 20

GEOG-312-01 - Geography - 2002-2003
(Spring) Seminars: State of the Environment in Russia
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Preamble (for topics courses): These seminars present selected topics in geography that reflect contemporary problems, current geographical ideas, philosophical and methodological trends in geography, and/or the history and development of geographical thought.
In this course, we will study Russia's environmental conditions (relief, geology, mineral resources, climate, water, soils, flora and fauna), population and economy. The principal focus of the course will be on the current state of the environment in Russia's six geographical macro regions. Specific subjects to be examined include air, water, and soil pollution, land degradation, deforestation, and radioactive contamination. Emphasis will be placed on the origins and implications of the ecological problems in the critical environmental areas of Russia. Map work is essential and is required in this course.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: Y. Ogneva-Himmellberger
Expected enrollment: 20

(Fall) Perspectives on American Environmental History - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking- and writing-intensive; Geology 317f)
Explores the history of human-environment interactions in North America from precolonial times to the present from different cultural perspectives. How have such human activities as migration colonization and resource use depended on or modified the natural world? How have different cultural perceptions of and attitudes toward environment shifted through time and helped to reshape American landscapes? Case studies include ecological histories of Native America and Euro-America, slavery and land use, wilderness and conservation, and environmental racism and social justice. Our approach entails historical review of scientific studies, literature, visual records, and oral tradition.
Prerequisites: permission of instructor
Notes: 1 meeting (3 hours) and optional 4th hour
Instructors: L. Savoy
Expected enrollment: 15

GEOG-395-01 - Geography - 2002-2003

Geology

GEOL-100-01 - Geology - 2002-2003
(Fall) Physical Geology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
From earthquakes to landscapes, this course introduces the surficial and internal processes of the earth. Topics are plate tectonics, minerals and rocks, volcanoes, rivers, glaciers, oceans, geologic time, energy resources, and landscape evolution. Labs focus on plate tectonics, rocks and minerals, maps, and field trips.
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: M. Darby Dyar

GEOL-100-01 - Geology - 2002-2003
(Spring) Physical Geology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
From earthquakes to landscapes, this course introduces the surficial and internal processes of the earth. Topics are plate tectonics, minerals and rocks, volcanoes, rivers, glaciers, oceans, geologic time, energy resources, and landscape evolution. Classes include discussion and lecture. Labs focus on plate tectonics, rocks and minerals, maps, and field trips. Grades depend on class participation in homework/class discussion assignments, weekly lab write-ups, one oral presentation and related short paper, and two in-class exams.
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: M. Markley

GEOL-101-01 - Geology - 2002-2003
(Fall) Environmental Geology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Our existence is greatly affected by changing environmental conditions. Some of these changes are "natural" (floods, earthquakes), but many directly result from human mismanagement (groundwater contamination, acid rain, the greenhouse effect). Although some of these problems are of local concern, an increasing number are of global scale. In this course, students develop an appreciation for the way the Earth's environment affects our lives. In the laboratory, students learn techniques to recognize and interpret environmental hazards and develop strategies to address environmental problems.
Notes: 3 meetings (50 minutes), 1 lab (3 hours), field trips; 25 spaces allocated to first-year students
Instructors: A. Werner
Expected enrollment: 60

(Fall) History of Life - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course focuses on the interrelations between life processes and Earth's crust and atmosphere. Using both body fossils and trace fossils, we will study the origin and evolution of life, the history of continents and oceans, and the diversification of complex life forms. Laboratory and field trips emphasize identification and analysis of sediments, rocks, and fossils.
Notes: 3 meetings (50 minutes), 1 lab (3 hours)
Instructors: M. McMenamin

GEOL-103-01 - Geology - 2002-2003
(Fall) Exploring the Dynamic Earth - *Not offered this year/term
Earth is a dynamic and ancient planet. The study of Earth is concerned with understanding how the natural world operates as well as realizing its impact on society. In this field- and project-oriented course, we evaluate the history and composition of the planet, and earth-shaping processes such as earthquakes, volcanic eruptions, mountain building, glaciation, and erosion. Lectures and weekly field and lab projects introduce the major concepts and techniques of geology. No previous knowledge of geology is required.

Prerequisites: fy, soph, and permission of instructor

Notes: 2 meetings (75 minutes); 1 lab (3 hours)

Instructors: L. Savoy

Expected enrollment: 15

GEOL-201-01 - Geology - 2002-2003

(Spring) Rocks and Minerals

This course is designed to help students recognize common minerals and their properties and occurrences, and the principal rock types and their origins, associations, and tectonic significance. Mineral characteristics and identification are covered mainly in the context of the common rocks in which they occur. Observational skills and hand sample identification will be emphasized in lab and on several field trips.

Prerequisites: high school earth science or any 100-level geology course

Notes: 3 meetings (50 minutes), 1 lab (3 hours)

Instructors: S. Dunn

Section Instructors: 01 LAB S Dunn

GEOL-202-01 - Geology - 2002-2003

(Spring) History of Earth

This course introduces students to the new way of looking at Earth and its main subsystems (lithosphere, biosphere, hydrosphere, and atmosphere). Study of the interaction of these systems will help students to recognize major events in Earth history. Course units include the rise in atmospheric oxygen, the supercontinents Rodinia and Pangea, the origins of animals and plants, and the Cretaceous-Tertiary impact event. Weekly labs provide hands-on, quantitative exercises for students working in small groups.

Prerequisites: high school earth science or any 100-level geology course or permission of instructor

Notes: 3 meetings (50 minutes); 1 lab (3 hours)

Instructors: M. McMenamin

Section Instructors: 01 LAB M McMenamin

Expected enrollment: 60

GEOL-203-01 - Geology - 2002-2003

(Fall) Surface Processes - *Not offered this year/term

In this field- and project-based course we examine the processes operating at Earth's surface, and we consider how the resulting landforms and deposits can be used to infer environmental change. For example, we study why landslides occur, rivers meander, and coastlines erode. Fieldwork (and trips) are a vital aspect of this course, allowing students to explore firsthand the processes that have created and modified Earth's landscapes and environment.

Prerequisites: high school earth science or any 100-level geology course

Notes: 2 meetings (75 minutes), 1 lab (3 hours)

Instructors: A. Werner

GEOL-204-01 - Geology - 2002-2003

(Spring) Human Dimensions of Environmental Change

Using case studies from Africa, Asia, North and South America, and Europe, this course examines the interactions between human institutions (such as political and economic structures, science and technology, class and gender systems, and cultures) and the environmental/earth systems that provide their contexts and have been impacted by them. The course will provide a forum to analyze the environmental consequences of a variety of land-use systems, resource use, and development projects and explore possible alternative strategies of human-environment relations that could create a balance between human needs and environmental constraints.

GEOL-210-01 - Geology - 2002-2003
(Spring) Plate Tectonics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Speaking- and writing-intensive)
How fast is London moving away from New York? Plate tectonic theory gained widespread acceptance in the earth science community only 30 years ago. The theory explains the origins of volcanoes and earthquakes and the locations of mountain belts and oceans. Topics such as continental drift, earthquake analysis and prediction, the creation and destruction of the ocean floor, Pacific "Rim of Fire," and movement on the San Andreas Fault are explored. Short in-class presentations, one ten page research paper with opportunities for revision and peer review, and quantitative homework sets required.
Prerequisites: fy, soph with experience with trigonometry, elementary calculus, vectors, and high school earth science
Instructors: M. Markley
Expected enrollment: 15

GEOL-223-01 - Geology - 2002-2003
(Fall) Planetary Science
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Astronomy 223f)
A first-year introductory course for physical science minors and majors. Topics include origin and evolution of the planets; planetary orbits, rotation, and precession; gravitational and tidal interactions; asteroids, comets, and planetary rings; meteorites; interiors and atmospheres of the Jovian and terrestrial planets; geology, tectonics, and mineralogy of the terrestrial planets and satellites; new data from Mars Pathfinder, Lunar Surveyor, and current NASA missions.
Prerequisites: any physical science course
Notes: 2 meetings (75 minutes); offered at UMass in fall 2002
Instructors: D. Dyar

GEOL-225-01 - Geology - 2002-2003
(Fall) Evolution of North American Landscapes - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Geography 225f)
The landscapes of Earth are the result of complex processes and have evolved dramatically since the planet's formation over 4.5 billion years ago. In this course we examine the geologic evolution of the North American continent and its natural features. Using narrative descriptions, scientific articles, maps, photographs, and videos, in addition to the texts, we tour North America and explore the origin and anatomy of its landscapes, including national parks and monuments. We then consider how the geologic setting or physical environment influenced human exploration and settlement of the continent.
Prerequisites: high school earth science or any 100-level geology course or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: L. Savoy

GEOL-226-01 - Geology - 2002-2003
(Fall) Ocean Environments
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Because more than 70 percent of our planet is covered by ocean water, the study of marine systems is crucial to our understanding of the Earth. In this course, we will examine chemical, physical, geological, and biological dimensions of the marine environment at a variety of scales in time and space. Along the way, we will explore how the Earth's oceans formed, how they provided the foundations for life, and how they continue to control weather and climate, stabilize global chemical cycles, interact with terrestrial systems, and give us access to valuable resources. Discussions and field trips may be planned to augment other course activities and materials.
Notes: 2 meetings (75 minutes); does not normally satisfy Science and Math II-B requirement, but may be arranged with permission of instructor
Instructors: K. Moody

GEOL-227-01 - Geology - 2002-2003
(Spring) Groundwater
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
The demand for and the contamination of groundwater resources are major societal concerns. To better understand the dynamics of the groundwater system, we cover topics including the hydrologic cycle, surface and subsurface hydrology, groundwater resource evaluation, and groundwater geotechnical problems. Students prepare weekly problem sets, a term paper, and an oral presentation. Many of the homework problems involve computer applications.
Prerequisites: high school earth science or any 100-level geology course
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: A. Werner
Section Instructors: 01 LAB A Werner | Expected enrollment: 15

GEOL-240-01 - Geology - 2002-2003
(Fall) Geological Resources and the Environment
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
This course is a survey of the geology of important mineral deposits and energy resources, the factors that govern the economics of their production, and the environmental implications of their exploitation.
Notes: 3 meetings (50 minutes)
Instructors: S. Dunn

GEOL-250-01 - Geology - 2002-2003
(Spring) The Biosphere - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking- and writing-intensive)
The biosphere has a pronounced geochemical influence on the Earth; indeed, life has been called the greatest geological force. In this course, we will study the chemistry of life through geologic time and examine its influence on the formation and weathering of rocks, on the composition and temperature of the atmosphere, on the accumulation of gas hydrates and other hydrocarbon resources, and its role in the initiation of naturally occurring, water-mediated nuclear reactors. We will also take a close look at the Biosphere concept of Vladimir Vernadsky, the Gaia hypothesis, and Hyperser theory, and the ways in which these concepts inform our understanding of life's geological impact.
Instructors: M. McMenamin

(Fall) Paleontology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(CoMMunity-based learning course; Speaking- and writing-intensive)
This course takes a careful look at the fossil record, emphasizing the history and evolution of the marine biosphere; the recognition, distribution, and significance of faunas and their environments through geologic time; and the paleoecologic significance, evolutionary relationships, and biostratigraphic importance of major groups of fossil-forming organisms. Several local field trips, including one weekend excursion.
Prerequisites: Geology 202, Biological Sciences 213, or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: M. McMenamin

GEOL-322-01 - Geology - 2002-2003
(Spring) Petrology and Petrography - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Studies mineralogical and chemical compositions, classification, genesis, and mode of occurrence of volcanic, plutonic, and metamorphic rocks. Special attention paid to the relationships between rock-forming processes and global plate tectonics. Laboratory study of representative rock suites in hand specimen and thin section, introduction to analytical techniques, and one or more field trips.
Prerequisites: Geology 220 or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: S. Dunn

(Spring) Stratigraphy-Sedimentology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is an interpretive study of sediments, sedimentary rocks, and processes of sedimentation. Principles of stratigraphic analysis and correlation of sedimentary sequences are presented, as are interpretations of modern and ancient environments, paleogeography, and paleoclimate. A variety of techniques are introduced in laboratory exercises and field trips.
Prerequisites: any 100-level geology course or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
GEOL-326-01 - Geology - 2002-2003
(Spring) Seminar: Global Change - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The earth's climate system is dynamic. Relatively small changes have been associated with profound environmental change; therefore, understanding historic and geologic climate change is paramount to predicting future change. This course reviews the evidence of past climatic change, the prospects of greenhouse warming, and the environmental impact of a warmer world.
Prerequisites: high school earth science or any 100-level geology course or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: A. Werner

GEOL-333-01 - Geology - 2002-2003
(Fall) Structural Geology and Orogenesis
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course covers the basic techniques of field geology, structural analysis, and multidisciplinary approaches to mountain building (orogenesis). Lectures concentrate on field techniques, stress, strain, faulting, folding, rock rheology, the relation between rock deformation and metamorphism, isotopic systems and thermal histories of rocks, and geological activity at plate boundaries. Of nine labs, five are field trips that involve collection of original data. Short problem sets emphasize quantitative skills. During the final weeks of the semester, students research the Moine thrust fault in Scotland.
Prerequisites: any 200-level geology course or permission of the instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: M. Markley
Section Instructors: 01 LAB M Markley |

GEOL-341-01 - Geology - 2002-2003
(Fall) Seminar - *Not offered this year/term
Credits/PE Units: 2-4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Seminars offer directed study and discussion of one or more selected topics in geology. Topics vary from year to year. Consult the department for information about future seminars.
Prerequisites: completion of at least two 200-level or 300-level geology courses or permission of the instructor
Instructors: The department

GEOL-342-01 - Geology - 2002-2003
(Spring) Seminar: Great Ideas in Geology
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Seminars offer directed study and discussion of one or more selected topics in geology. Topics vary from year to year. Consult the department for information about future seminars.
The history of revolutionary ideas in earth sciences, from uniformitarianism to global plate tectonics, will be traced from their inception to their current articulation by earth scientists. Reading from the classic works of Hutton, Lyell, Vernadsky, and others will be followed up with evaluations by contemporary writers. One seminar and one research paper required.
Prerequisites: Geology 100 or 101 and 4 credits at 200 level in the department
Notes: 1 meeting (3 hours)
Instructors: M. McMenamin
Expected enrollment: 18

GEOL-395-01 - Geology - 2002-2003

German Studies

GRMST-100-01 - German Studies - 2002-2003
(Fall) First-Year Seminar: Gender-Benders
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Taught in English)
Cross-dressed soldiers and sailors, gender-bending pirates, spies, thieves, transvestite nuns, actresses in trousers’ parts, women who traveled in men’s clothing: This course traces the phenomenon of cross-dressing in history, literature, opera, and film from 1600 to the present. We will investigate the extraordinary lives of historical cross-dressers and analyze changes in the construction of gender from early to postmodernity. The material to be discussed includes texts by Shakespeare, Goethe, Balzac, Woolf, and Brecht; opera (Fidelio, Rosenkavalier); film of the Weimar Republic and contemporary German and Hollywood productions; autobiographies of cross-dressers.
Notes: 2 meetings (75 minutes); This is a first-year seminar
Instructors: E. Krimmer

GRMST-101-01 - German Studies - 2002-2003
(Fall) Elementary German
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking-intensive)
This course introduces speaking, reading, and writing German. Cultural and literary readings, video materials, and World Wide Web resources dealing with everyday situations and experiences in the German-speaking countries will be used on a regular basis. Students complete online grammar, vocabulary, and culture exercises. Audiotapes and conversation sections with native speakers supplement class work.
Notes: 4 meetings (50 minutes), 1 lab (50 minutes); no credit is awarded for German Studies 101 unless German Studies 102 is also completed
Instructors: The department
Section Instructors: 01  E Krimmer | 02  W Sutherland |

GRMST-102-01 - German Studies - 2002-2003
(Spring) Elementary German
Credits/PE Units: 4; Requirements met: Meets Language requirement; does not meet a distribution requirement
(Speaking-intensive)
Continuation of the elementary German course; practice in speaking, reading, and writing German. Cultural and literary readings, video and World Wide Web resources dealing with everyday situations and experiences in the German-speaking countries will be used on a regular basis. Students complete online grammar, vocabulary, and culture exercises. Audiotapes and conversation sections with native speakers supplement class work.
Notes: 4 meetings (50 minutes), 1 lab (50 minutes); no credit is awarded for German Studies 101 unless German Studies 102 is also completed
Section Instructors: 01 LEC W Sutherland | 02 LEC C Partsch |

GRMST-103-01 - German Studies - 2002-2003
(Spring) Intensive Elementary German
Credits/PE Units: 8; Requirements met: Meets Language requirement; does not meet a distribution requirement
(Speaking-intensive)
Two semesters in one. Practice in speaking, reading, and writing German. Cultural and literary readings, video materials, and World Wide Web resources dealing with everyday situations and experiences in the German-speaking countries will be used on a regular basis. Students complete online grammar, vocabulary, and culture exercises. Audiotapes and conversation sections with assistants from Germany supplement class work.

(Spring) Creation and Production of a German Play - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
(Speaking-intensive)
Students write and stage an original one-act play in German. Students develop proficiency in the language through reading several short stories by such authors as Friedrich Dürrenmatt, Bertolt Brecht, and Doris Dörrie, as well as theoretical writings on the theater; students will then write one of the short stories as a play. Drafts of the play will be critiqued by German students via a live videoconference. Students write a substantial essay describing how they applied the specific theories of the theater to their original adaptation. The play will be performed at the German Theatre Festival and Competition hosted each spring by Mount Holyoke College.

(Spring) Senior Seminar: Re/Visions of Self and Society: Theodor Fontane and Thomas Mann in Film and Fiction
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
(Speaking- and writing-intensive)
Preamble (for topics courses): This seminar is designed to explore the complex nature of our field of inquiry. We explore such questions as: What does German studies mean? What is interdisciplinary work? What role does literature play in culture studies? What is the relationship between language and the construction of culture? What meanings have been attributed to the terms: "culture" and "civilization?" Texts from a variety of disciplines. Students compose term papers or Web projects on topics related to their major field(s) of interest. This course is required of all senior majors and fulfills a 300-level major requirement for the nineteenth or twentieth century, dependent on work pursued for the semester project.
Thomas Mann saw in Theodor Fontane his great role model. Both authors, the Luebeck patrician and the Berlin pharmacist, explore the complex relationship between individual and society during the late 19th and early 20th centuries. We will study the authors' cultural criticism and analyze film renditions of their works, focusing on such issues as representation of class, gender, ethnicity, and the role of the artist. Short texts by Marx, Schopenhauer, Wagner, Nietzsche; also essays, letters, diary entries by Fontane and Mann. Texts by Fontane: Effi Briest and Irrungen Wirrungen; by Mann: Buddenbrooks, Tod in Venedig, and Tonio Kroeger. Films by Fassbinder, Visconti, Noeche, Wirth, et al.
Prerequisites: sr, 12 credits including one 300-level course, nonseniors by permission of the department
Notes: 2 meetings (75 minutes) or 1 meeting (2 1/2 hours)

History

(Fall) Foundation: Justice: Ideals and Practices in History
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar (Writing-intensive)
A full-year course using historical case studies (e.g., peasants' revolt of 1381, a slaves' revolt in 1831, and a labor strike in 1912) as well as off-campus fieldwork to ask what justice has meant to women and men in western cultures, when they resort to open struggle to achieve it, and how goals and practices have changed over time. Both analysis of documentary evidence in the fall and community-based learning in the spring should encourage critical reflection on historical explanation, social commitment, and political action. (See History 102s for the second semester's course description.)
Prerequisites: fy and permission of instructor
Notes: This is a first-year seminar; students who are admitted to History 101f (01) are expected to continue in History 102s
Instructors: H. Garrett-Goodyear
Expected enrollment: 20

(Spring) Foundation: Women, Politics, and Activism
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar (Writing-intensive)
This seminar examines the history of women's activism and political participation in the United States and beyond. We will consider forms of political action available to U.S. women before they gained the vote; diverse perspectives on political engagement among women of color, immigrant women, and native-born white women in the U.S.; and histories of feminist activism as a local, national, and international phenomenon. Special attention will be paid to the ways that racism and classism have shaped the political arena for women in the United States and for women affected by U.S. policies around the world.
Notes: 2 meetings (75 minutes); This is a first-year seminar
Instructors: M. Renda
Expected enrollment: 15

HIST-101-02 - History - 2002-2003
(Fall) Foundation: The Letters and Literature of the American Revolution
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar (Writing-intensive)
This seminar will focus on the public documents and private correspondence generated by the political crisis that became the American Revolution. In addition to the pamphlets of the 1760s and 1770s, the Declaration of Independence and the Federalist Papers, we will read in the personal correspondence of John and Abigail Adams, Thomas Jefferson, and Benjamin Franklin, all superb prose stylists as well as prominent revolutionaries. Four short essays, one book review, and a final paper will be required.
Notes: 2 meetings (75 minutes); This is a first-year seminar
Instructors: J. Ellis
Expected enrollment: 15

HIST-102-01 - History - 2002-2003
(Spring) Foundation: Justice: Ideals and Practices in History
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar (Community-based learning course)
In the spring semester of this yearlong course, community-based projects will challenge students to use both library research and participation in contemporary institutions and social action projects to develop arguments proposed during the fall semester and to refine analyses of changes in ideologies and institutions since the late European middle ages. Off-campus fieldwork may vary, but past projects include work with the Mass Commission Against Discrimination, the Coalition for Authentic Reform of Education, Jobs with Justice, and a local DA's Office. (See History 101f (01) for first semester's course description.)

Prerequisites: History 101f (01)

Notes: 1 meeting (2 hours) and off-campus projects; This is a first-year seminar

HIST-121-01 - History - 2002-2003
(Spring) The Middle Ages: 312 to 1300
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course offers a survey of the politics, society, and daily life of medieval people, defining the medieval vision and analyzing its components: the legacies of Rome, the barbarians, and the Church as they affected political, social, economic, and cultural spheres. Topics include the growth of kingship, technology and feudalism, monasticism, popular culture, courtly love, and the image of women.
Notes: 2 meetings (75 minutes)
Instructors: F. McGinness

HIST-122-01 - History - 2002-2003
(January) Archival Mysteries: Understanding the Use of Archival Materials
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
The course will introduce the use of archival materials as research sources. By looking at the nature of materials (ranging from scrapbooks to a personal letter from Mary Woolley to Jeannette Marks), we will consider the nature of specific archival documents. We will examine public vs. private communications and consider point of view and voice within the documents. We will also look at issues of self-representation in the light of gender and how all of these issues affect how we use and interpret primary sources. We will also examine how issues of class, race or religion can create silences in the archives. The methods and protocols of archival research will also be covered.
Notes: Six meetings (2 Hours each), Tu & Th, 9:30-11:30
Instructors: P. Carini
Expected enrollment: 12

HIST-130-01 - History - 2002-2003
(Fall) Introduction to Chinese Civilization: Traditional China
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Asian Studies 101f)
A survey of the social, political, and cultural world of premodern China. Emphasis will be placed on the evolution and contrasts of elite and popular culture and the nature of change in an agrarian state. Readings will be drawn from Confucian, Taoist, and Buddhist traditions, classical poetry and fiction, and the history of social and political movements.

(Fall) Japan Since 1600 - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Asian Studies 133f)
This course examines Japan's emergence in the nineteenth century from more than 200 years of self-imposed isolation, the process of political and economic modernization, and the attempt to find a secure and significant place in the Western-dominated world of the twentieth century. It focuses on the formation of a modern state, industrialization, Western imperialism and the rise of pan-Asianism, the Great Depression and the rise of military government in the 1930s, postwar Japan under U.S. military occupation, and problems of rapid economic growth in recent years.
Notes: 2 meetings (75 minutes)
Instructors: J. Lipman

HIST-135-01 - History - 2002-2003
(Fall) Modern Korea - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Asian Studies 135f)
An introduction to Korean history since the fourteenth century. After a brief introduction to geography and premodern cultural forms, the course will survey the evolution of the Yi dynasty (1392-1910) in the religious, intellectual, and socioeconomic realms. The second half will focus on Korea's interaction with the Euro-American powers and the rising Japanese empire (nineteenth and twentieth centuries). We will examine the devastating effects of imperialism, colonial occupation, civil war, and long-term division, which have also enabled rapid economic development since the 1960s.
Notes: 2 meetings (75 minutes)
Instructors: J. Lipman

HIST-137-01 - History - 2002-2003
(Fall) Modern India: From Mughals to Multinationals
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This course begins with the decline of the Mughal empire and traces the rise of European trading and administrative control in India, the growth of Indian nationalism, and the predicaments of postcolonial politics and power struggles. Themes include caste and religious politics, the “women question,” migration, globalization, and media.

HIST-140-01 - History - 2002-2003
(Fall) Identity and Community in Early Africa - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Speaking- and writing-intensive)
What made communities cohere and how did people understand their place in society in the African past? This class introduces African patterns and principles of social organization from limited associations such as clans or drums of affliction to the encompassing community of medieval Islam. Activities designed to give participants confidence in oral presentations begin with retelling oral narratives and culminate with a debate concerning the causes and consequences of the slave trade.
Notes: 2 meetings (75 minutes)
Instructors: H. Hanson

HIST-141-01 - History - 2002-2003
(Spring) Violence and Social Change in Modern Africa
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This course examines processes of change that have shaped modern Africa. It seeks to provide both the information and the conceptual tools necessary for an informed interpretation of African affairs presented (and not presented) by popular media. Using fiction, historical narratives, and a wide range of interdisciplinary sources, the class examines nineteenth-century interactions of Africans and Europeans and the nature of colonial conquest, economic and social change during the colonial period, and the emergence of postcolonial African societies.
Notes: 2 meetings (75 minutes)
Instructors: H. Hanson

HIST-150-01 - History - 2002-2003

(Spring) Europe and the Atlantic World, 1300-1700
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This course inquires into several dimensions of European society and culture during the transition from principalities and fiefs to early modern states, from feudalism to capitalism, from serfdom to both free and slave labor. Equally important, however, will be comparison of western Europe with other Atlantic societies of these centuries and examination of consequences for Europeans, Africans, and Americans (north and south) of encounters among them. Using both voices from the period and recent scholarship about early modern western and Atlantic societies, the course will look critically at the making and remaking of "Western" culture between the middle ages and the modern era.
Notes: 2 meetings (75 minutes)
Instructors: H. Garrett-Goodyear
Expected enrollment: 15

(Fall) History of Global Inequality  
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement  
(Community-based learning course)  
Why are some nations so much richer and more powerful than others? This course demonstrates that global inequality is not natural; it has a history. Exploring patterns of exchange that developed among regions of the world over the past 600 years, we will ask about the role of power in the establishment of practices of production and exchange. We will explore how cross-regional productive systems benefited some participants at the expense of others. Having traced the consequences of unequal exchange over several centuries, we will ask how global trade and production would have to change for all participants to benefit equally. The course includes a community-based learning component.

HIST-231-01 - History - 2002-2003  
(Fall) The Undersides of Modern Chinese History: The Labor, Peasant, and Women’s Movements  
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement  
(Asian Studies 231f)  
This course offers an interdisciplinary approach to the roles of workers, peasants, and women in the making of modern China, from the mid-nineteenth to the mid-twentieth century, including some later developments in China, Hong Kong, and Taiwan. In addition to factual knowledge, this course aims at familiarity with historical construction and research methodologies through a study of these marginalized elements in China. Readings and writing assignments will highlight the interplay of class, gender, and race in China's modern transformation.  
Notes: 2 meetings (75 minutes)  
Instructors: M. Chan

(Fall) South Asians in North America
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
Beginning with an overview of South Asia and its diaspora in the contexts of global migration and of Asian American immigration, the course explores the cultural, social, and political history of South Asians in the United States and Canada. We consider citizenship and identity, gender and family, and race and economic opportunity from the mid-nineteenth century onward while keeping in mind the global and historical precedents for these modern phenomena. Course materials include primary and secondary historical sources, literature, and film.

HIST-241-01 - History - 2002-2003
(Spring) African Popular Culture - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This class uses popular music, dance, fiction, film, street art, bus slogans, newspapers, and other sources to document African interpretations of the decades since "flag independence" in 1960. We will let African musicians, writers, filmmakers, and artists direct our investigation of the big questions of the class: Why is the gap between rich and poor in African societies increasing? What is happening to gender relations? What do African people think of their political leaders and how do they imagine political situations might improve?
Notes: 1 meeting (3 hours) plus 4th hour
Instructors: H. Hanson

HIST-253-01 - History - 2002-2003
(Spring) Late Medieval and Early Modern Europe: The Medieval Church
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Preamble (for topics courses): Designed for students who, after an introduction to European history between 1300 and 1700 or to Renaissance and Reformation Europe, wish to examine topics or aspects in greater depth.
A study of the western Church from Late Antiquity to the High Middle Ages, focusing on changing beliefs and how ideals are manifest in institutions subject to secular forces. Topics: persecution and martyrdom, the imperial church, the rise of monasticism, sacral kingship, the symbiosis of church and state, heretics and witches, sexuality and the sacred - the peculiar "Medieval Vision" of reality.
Prerequisites: soph, jr, sr; some preparation in history or religion suggested

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
Women's Studies 200s (01)

Preamble (for topics courses): This course is designed for in-depth exploration of women's experiences and their roles in various cultures and societies. Transformations in gendered divisions of labor and in women's access to resources are fundamental to understanding contemporary African societies. We explore how African women have created contexts for productivity using strategies such as marriage, pledged female friendship, and voluntary dependency. We investigate the loss of women's work of governing in the colonial period, and the consequences for women's wealth and productivity of incorporation into a global market economy. Texts include recorded life histories, autobiography, fiction, and film, and primary sources such as the testimony of participants in the Ibo Women's War of 1929.

(Fall) Colloquium: Reading the New York Times: Journalism, Power, History
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
American Studies 301f (01)

This course will examine the political and cultural power of the New York Times in the American past and present. Students will analyze the Times today through careful, daily readings. They will also study its evolution as an institution, as well as its coverage of and involvement in several of the critical historical events of this century. By focusing on the Times as the most influential "agenda setter" in American journalism, we will also address the larger issues of objectivity, bias, and influence in the mass media.

HIST-301-02 - History - 2002-2003
(Fall) Colloquium: Martyrdom as Social Protest: Resistance and Honor in Antiquity and the Middle Ages
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Not all victims of tyranny and persecution become martyrs, nor are all martyrs victims of tyranny. What social and political conditions foster the choice of martyrdom? What cultural values drive this form of self-immolation? What's worth dying for? In antiquity, the word "martyr" meant an active "witness." Today, it can mean a passive "victim." Our approach uses cross-cultural comparisons and psychoanalytic theory to help understand how martyrdom shaped the history and culture of antique Europe and Japan. Subjects: Imperial suicides, child sacrifice, political martyrs, gladiators, Samurai and kamikaze, women martyrs, soldiers, and virgins.

(Spring) Colloquium: The Other Europe
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Writing-intensive
What was Stalinism in "Eastern Europe" during the 1940s and 1950s? What forms did national rebellions against Stalinism take, and what kinds of "soft dictatorships" emerged in the 1960s and 1970s? Why and how did Communism collapse? What next? Discussion will center on Czechoslovakia, Hungary, Yugoslavia, and their successor states; course materials will include fiction, film, autobiography, and additional primary sources.

(Spring) Colloquium: Race, Gender, and Empire: Cultural Histories of the United States and the World
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(American Studies 301s (02), Women's Studies 333s (03))
Recent cultural histories of imperialism - European as well as U.S. - have illuminated the workings of race and gender at the heart of imperial encounters. This course will examine the United States' relationship to imperialism through the lens of such cultural histories. How did encounters between Native Americans and European colonizers, as lived and as remembered, call into play racial and gender identities? How have the legacies of slavery been entwined with U.S. imperial ambitions? How did racialized constructions of gender and sexuality shape the "American century?" And what can we learn from transnational approaches to "the intimacies of empire?"

(Spring) Asian History: Greater China: Development and Transformation in the Twentieth Century
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Assian Studies 331s (04))
Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.
This course examines the developmental patterns of mainland China, Taiwan, and Hong Kong in the twentieth century. Themes include nation building, ideological exploration, democratization, economic experimentation, and international realignment over time. We will study the impact of foreign imperialism on Chinese nationalism and security consciousness as well as the global dimensions of the mainland Chinese drive for affluence and national reunification, along with contrasting developments in colonial Hong Kong and Kuomintang Taiwan.

(Spring) Gender and Nationalism
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This seminar explores gender relations and nationalist struggles during the nineteenth and twentieth centuries through an examination of historical and anthropological writings. While focused primarily on South Asia, the course provides comparative perspectives from western and non-western sites in order to understand how different historical legacies produce different trajectories of feminist activism. Topics include nation building and the "women question," women's involvement in and resistance to religious extremism, and women's labor.
Prerequisites: written application and permission of instructor; Women's Studies 101 or Asian Studies 103 strongly recommended

(Fall) Topics in African History: When Worlds Collide: The Colonial Moment in Africa
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary research in the history of particular times and places, resulting in a substantial piece of historical writing.

This seminar examines case studies of Africans and Europeans struggling with each other over issues of power and authority. It seeks to replace simplistic notions of European conquest and African resistance or collaboration with more nuanced analyses of conflicts involving religion, knowledge, culture, and wealth, as well as political and military authority. Recent works of African history will provide the framework and model for individual research projects, but if a student chooses, she may focus her research on a colonial conflict outside of Africa.

(Spring) Early Modern Europe: The Nature of Things: Amerindians and Europeans in North America 1500-1800
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Speaking- and writing-intensive)

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.

Examines differences in Amerindian and European cultural attitudes and practices concerning nature, animals, human nature, and social organization during the first three centuries of contact in North America. Common readings and research projects explore differing conceptions of nature by comparing religious and ethical beliefs, hunting and agriculture practices, creation myths, gender systems, the afterlife, and the meanings associated with forest, wilderness, and cultivated land. The relationship between humans and nature will also be explored through the institutions of family and community.

(Fall) Modern Europe: The Nineteenth Century: Déjà vu? Europe in Crisis During the Seventeenth and Twentieth Centuries
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.

Does history repeat itself? We will investigate the theme of crisis in Europe during the seventeenth and the early twentieth centuries by exploring patterns of historical similarity and difference to be found, for example, in World War I, the New Woman and her critics, the rise of fascism, new paradigms in art (cubism), movements for social justice and state protected welfare, and psychological models of human nature. Readings to include Hobbes's *Leviathan*, Freud's *Civilization and Its Discontents*, Ortega Y Gusset's *The Revolt of the Masses*, Simone de Beauvoir's *Memoirs of a Dutiful Daughter*, and Erich Marie Remarque's *All Quiet on the Western Front*.

(Fall) American History: The Middle Period: Age of Emancipation
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing. This seminar examines the causes and the course of the Civil War, its social, economic, and political results during Reconstruction, and the early roots of both de jure segregation and the civil rights movement. It will examine the process of emancipation from the perspective of social history. Violent conflicts over free labor, the establishment of sharecropping, and the political and economic policies pursued by various groups - freedpeople, ex-masters, northern policymakers, wage laborers, and African American women, for example - will be covered. African American viewpoints and histories will receive particular emphasis.

HIST-399-01 - History - 2002-2003
(Fall) Senior Colloquium: Racial States
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Preamble (for topics courses): A colloquium for senior history majors and minors taught every fall by members of the department. Each year the class will work together to compare and reflect upon a variety of approaches to studying the past that Clio, the muse of history, continues to inspire.
In fall 2002, the colloquium will compare several states - in the Americas and elsewhere - that have asserted the existence of fundamental racial distinctions among residents. How did each state define race, and how did that definition change over time? What were its sociopolitical underpinnings, uses, and effects? Topics and themes include the origins of racial thinking; the racialization of state institutions (including the census and the law); and individual fates in the midst of social struggles over equality and difference.

I-100-01 - Interdepartmental Courses - 2002-2003
(Fall) Case Studies in Quantitative Reasoning
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
First-year seminar (Writing-intensive; Mathematics 100f)
This course helps students recognize, evaluate, and use forms of quantitative reasoning and argument. For fall 2002, the course will introduce basic concepts of statistics and Geographic Information Systems (a combination of computer-assisted cartography and data analysis). Using these tools, we shall explore problems involving environmental history and current aspects of social inequality. In a PC computer laboratory, students search for patterns in real data, observe and summarize relationships, formulate and test hypotheses, and study connections among hypotheses, predictions, and actual results. Laboratory reports on each case study culminate in a paper.
Prerequisites: priority given to fy, soph, FP
Notes: 2 meetings (75 minutes), 1 lab; This is a first-year seminar

(January) Rhetoric for Leadership
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
The first women in the world to deliver speeches on civic issues were American women social reformers in the nineteenth century. Determined to press for social change, they refused to honor the powerful social taboo against women speaking in public, thus demonstrating leadership through the act of oratory as well as through the cogency of their pro-reform arguments. Among the women orators to be studied will be Angelina Grimke, Lucy Stone (Mount Holyoke College alumna), and Sojourner Truth. Students will analyze their speeches and consider the role of oratory in these womens' development as leaders. Two short papers

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Writing-intensive)
This course is about the art and business of travel writing. Students will explore the Pioneer Valley on their own, keep a journal of their "travels," and learn to develop material from their notes. We will define the genre of travel writing - from guidebooks to diaries to travelogues - and try to find out what we think good travel writing is. While the course will focus on writing, there will be time to discuss practical topics, such as selling your articles, research practices, and ethical issues. Students will come away with a variety of resources for continued investigation of the field.

(Speaking- and writing-intensive; Astronomy 1425)
Beginning with the phenomena - on both sides of the eye - that give rise to visual sensation, we examine cosmic structure on all levels: from the subatomic, molecules and cells, organisms and species, and up to planets, stars, and galaxies. This structure exists in time as well as space, so that we can "see" evolution from the earliest microseconds into the present-day complexity. We pay particular attention to the mechanisms whereby life operates within the cosmic hierarchy: how it obtains energy and material, stores information, and ultimately has the capacity to look into time and space to read this story.
Notes: 1 lecture (75 minutes), 1 discussion (75 minutes) plus labs, including evenings at the observatory; students passing Interdepartmental Courses 142 and 242 will fulfill both a II-A and a II-B requirement; students passing only one semester will receive credit for one lab science

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Speaking-intensive)
The focus of the class will be improving public-speaking skills, especially under circumstances when one's position is being actively challenged. To accomplish this, students will learn three of the most popular styles of competition debate: Policy Debate, Lincoln-Douglas Debate, and Parliamentary
Debate. Each student will participate in two debates in each style of debate during the course of the semester, as well as evaluate other students' debating. These debates will be scheduled outside of regular class time at the convenience of the participants. Topics for the debates will likely concern domestic and international policy, morality, politics, and the law.

One of the main goals of intergroup dialogue is to encourage informed dialogue rather than debate between participants. Informed dialogue—a process of interactive communication and education that encourages voicing, listening, asking clarifying questions, gathering of information from different perspectives, reflection, and analysis—is a particularly effective method of dealing with conflictual issues in diverse groups. Students will be both participants in and observers of dialogue groups for the purpose of learning group facilitation and leadership skills.

(Fall) Problems of International Peace and Security - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Politics 311f)
This research-oriented seminar on critical problems of international peace and security in the 1990s is intended for students who seek to enhance both their research skills and their understanding of current world security affairs. Most recently, the course focused on problems of regional conflict in the third world and on problems arising from the flow of advanced military technologies (nuclear, chemical, and conventional) from the industrial powers of the "North" to the emerging regional powers of the developing world. The course begins with presentations on particular themes by the instructor, along with a discussion of research principles and methods.
Prerequisites: 8 credits in politics, including Politics 116 or permission of instructor
Notes: 1 meeting (2 hours)
Instructors: M. Klare

(Fall) U.S. Foreign Policy and Regional Conflict - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Politics 396f)
This course examines American diplomatic and military responses to post-cold war regional and civil violence in the Balkans, northern and sub-Saharan Africa, South Asia, and elsewhere. Two themes will be considered throughout the course: (1) What can the United States do? and (2) What should the United States do? We will examine U.S. policies concerning preventive diplomacy, international mediation, economic and military sanctions, military intervention and peacekeeping, peace implementation, and postwar reconstruction and reconciliation.
Prerequisites: Politics 116
Instructors: J. Western
Expected enrollment: 18

IR-319-01 - International Relations - 2002-2003
(Fall) The United States and the Promotion of Democracy and Human Rights
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Politics 319f)
This course examines American foreign policy concerning the promotion of democracy and human rights abroad. The course begins by examining how and why these policies are developed within the U.S. political, economic, institutional, and geostrategic context. Through the use of case studies, we will then evaluate how these policies have influenced events in Latin America, East Asia, Eastern Europe, and sub-Saharan and southern Africa.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Asian Studies 333f; Politics 337f)
Why do we moralize about war? When is war justified, if ever? What restraints should soldiers accept? This course examines these issues within the context of Western and Islamic thought. Study of the origins and evolution of both traditions is combined with consideration of important topics of current concern, such as intervention, weapons of mass destruction, and women and war.
Prerequisites: 8 credits in politics, including Politics 116 or permission of instructor
Notes: 1 meeting (2 hours)
Instructors: S. Hashmi

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Complex Organizations 365s; Politics 361s)
Do ethical considerations matter in international relations? Should they? These questions are examined from the perspective of Western writers on these specific issues: just war, intervention, human rights, weapons of mass destruction, and distributive justice. The course also considers challenges to the international system posed by the critiques and responses of non-Western states and peoples.
Prerequisites: Politics 116, 8 credits in international relations
Notes: 1 meeting (2 hours)
Instructors: S. Hashmi

ITAL-321-01 - Italian - 2002-2003
(Spring) Topics in Modern Italian Literature: Stage Culture
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): This course is a study of the major literary genres of modern Italian literature: poetry, novel, or drama. Conducted in Italian.
Ranging from the classic comedy to the contemporary farce, from the melodrama to the modern drama and the postmodern satire, this course will examine Italy's theatrical culture in both its geographical diversity and morphological variety. Pre-eighteenth century works by Machiavelli and from Commedia dell'Arte, as well as modern plays by Gozzi and Alfieri, by Pirandello (Nobel Prize, 1934), de Filippo, Fo (Nobel Prize, 1997), and one opera libretto will constitute the readings. In each of them, the very act of staging is thematized: the concept of the play within the play, and of dramatic self-reflexivity – or meta-theatre - will be central to our critical inquiry.
Prerequisites: Italian 221 or permission of instructor

JWST-104-01 - Jewish Studies - 2002-2003
(Fall) Introduction to Judaism
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Religion 104fs)
Judaism is a 3,500-year-old tradition that has developed over time as Jewish communities all over the world creatively interacted with the different cultural and historical milieus in which they lived. This course explores the ways in which Judaism has sought to transform ordinary life into sacred life. What are the ways in which Judaism conceives of God, and what is the meaning of life? What roles do study, prayer, ethics, sex, marriage, family, rituals of the life cycle, and community play in Judaism? These and other questions will be taken up through study of diverse types of religious literature and historical evidence.

(Spring) Jewish Spiritual Autobiographies - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Religion 215s)
Along with such genres as letters, ethical wills, travel accounts, and other personal communications, spiritual autobiographies and diaries often reveal what people actually thought and felt about matters important to them. These sources provide insight into religion as lived experience. This course studies autobiographical accounts of Jewish religious figures from the medieval period to the contemporary. We include narratives by both women and men, philosophers, mystics, messianic pretendees, travelers, authors of Holocaust memoirs, and other contemporary Jews. Taken together, such accounts bring to life the diversity of spiritual quests in which Jews have engaged.

(Fall) Engendering Judaism: Women and Jewish Tradition - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Speaking-intensive; Religion 222f)
This course examines the representations and roles of women in Jewish culture, from the literature of the Hebrew Bible to the contemporary period. What were the distinctive ways in which women’s religious life expressed itself by way of prayer and ritual practice? Were there women mystics and visionaries? How did women exert their influence as mothers and wives? There will be significant focus on the dramatic developments taking place among contemporary Jewish women: innovative rituals and experimental liturgies, opportunities to become rabbis, new approaches to God, theology, and social issues, the Jewish lesbian movement, women’s writing and documentary filmmaking.

(Fall) Introduction to Jewish Mysticism - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Religion 235f)
Mysticism refers to a type of religious life in which individuals seek intimate and personal, direct and intense experience of the Divine. There exists a rich and fascinating Jewish mystical tradition with hundreds of books of diverse kinds. This course examines the Kabbalah of thirteenth-century Spain, focusing upon the seminal work of this period, the Zohar; the synthesis of mysticism and messianism that occurred in the city of Safed (in the Land of Israel) in the sixteenth century; and the popular pietistic movement of Eastern Europe from the eighteenth century forward, Hasidism; and various expressions of mystical spirituality in our own time.

(Fall) The Quest for Meaning after the Holocaust - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Jewish Studies 245fs)
The destruction of European Jewry by the Nazis during the Second World War was the most devastating tragedy in all of modern Jewish history and perhaps of the twentieth century as a whole. The Holocaust poses fundamental questions for all people about what it means to be human, the nature of social community, and about religious faith and tradition. This course explores significant attempts to come to grips with these moral and philosophical questions through literature, religious thought, and film, including the work of Paul Celan, Primo Levi, Elie Wiesel, Aharon Appelfeld, Arthur Cohen, Richard Rubenstein, Jean Amery, Claude Lanzmann, Eva Fogelman, and Pierre Sauvage.

LATIN-201-01 - Latin - 2002-2003
(Fall) Intermediate Latin I
Latin 222-01 - Latin II
(Spring) Intermediate Latin II
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Includes the life and literature of the early Roman empire, as seen in selected works of authors such as Petronius, Ovid, Pliny, and others. Offers further review of grammar and syntax.
Prerequisites: Latin 201 or permission of instructor
Notes: 3 meetings (50 minutes)
Instructors: M. Landon

Latin 295-01 - Independent Study
(Fall) Latin II
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: permission of department
Instructors: The department

Latin 307-01 - Latin
(Fall) The Slender Muse
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Studies in Roman lyric, elegy, didactic poetry, the Roman novel, Roman use of myth in literature, or other authors or genres.
Prerequisites: Latin 222 or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: B. Arnold

Latin 313-01 - Latin
(Spring) The Roman Historians
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
In the minds of Romans, history and historiography were closely linked. Thus, in this course, we will examine equally form and content (i.e., how Romans wrote their history and what they tended to write about) in the works of Livy, Sallust, and/or Tacitus.
Prerequisites: Latin 222 or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: G. Sumi

Latin 350-01 - Latin
(Fall) Junior/Senior Tutorial
Credits/PE Units: 2-4; Requirements met: Meets Language requirement or Humanities I-A requirement
Studies in Roman lyric, elegy, didactic poetry, the Roman novel, Roman use of myth in literature, or other authors or genres.
Prerequisites: jr, sr with 8 credits of advanced work in Latin
Instructors: The department

LATIN-350-01 - Latin - 2002-2003
(Spring) Junior/Senior Tutorial
Credits/PE Units: 2-4; Requirements met: Meets Humanities I-A requirement
Studies in Roman lyric, elegy, didactic poetry, the Roman novel, Roman use of myth in literature, or other authors or genres.
Prerequisites: jr, sr with 8 credits of advanced work in Latin
Instructors: The department

LATIN-360-01 - Latin - 2002-2003
(Fall) Directed Reading in Original Sources
Credits/PE Units: 2-4; Requirements met: Meets Humanities I-A requirement
For students enrolled in classics courses (i.e., courses with readings in English), there is the opportunity to pursue a directed program of reading in the original sources in Latin.
Instructors: The department

LATIN-360-01 - Latin - 2002-2003
(Spring) Directed Reading in Original Sources - *Not offered this year/term
Credits/PE Units: 2-4; Requirements met: Meets Humanities I-A requirement
For students enrolled in classics courses (i.e., courses with readings in English), there is the opportunity to pursue a directed program of reading in the original sources in Latin.

Latin American Studies

LATAM-170-01 - Latin American Studies - 2002-2003
(Fall) Readings in Caribbean Literature
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
Features comparison of selected readings in the literature of the Spanish-, French-, and English-speaking Caribbean. Introduces the literary personality of the area, the transformation of the material of Caribbean social life into formally crafted and effective literary statement, and characteristic thematic and broader cultural preoccupations. Asks primary questions, such as "How does a novel - or poem - work?" and addresses similar issues related to forms of critical thinking and literary analysis. Readings and discussion in English.
Notes: 2 meetings (75 minutes)
Instructors: R. Márquez

LATAM-175-01 - Latin American Studies - 2002-2003
(Spring) Historical Emergence of the Caribbean
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
The historical development of the Caribbean from the Conquest to the mid-twentieth century. Patterns of conquest, colonization, and settlement by European nations; the rise of plantation-dominated society; the process of insular and interregional differentiation; the emergence of American imperial designs; and the rise of anticolonial, nationalist movements. Comparative reviews of the experience of Haiti, Jamaica, and Puerto Rico highlight broader regional trends and the ways the Caribbean's major language zones have responded to the challenge of their shared history.

Notes: 2 meetings (75 minutes)
Instructors: R. Márquez

LATAM-180-01 - Latin American Studies - 2002-2003
(Fall) Introduction to Latin American Cultures
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(History 180)
Examines the confrontation, assimilation, and transformation of Amerindian, African, and European cultures in Latin America from the sixteenth century to the present. Focuses on the processes in which distinctive self-images emerged in the region and how these images have been challenged and changed over time. Uses films, literature, and folk traditions to complement scholarly analyses of the emergence of a New World mentality.
Notes: 2 meetings (75 minutes)
Instructors: L. Gudmundson

LATAM-181-01 - Latin American Studies - 2002-2003
(Spring) Introduction to Latin American Economies - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(History 181)
A historical study of economic and social structures in Latin America from the Conquest to the present, focusing on various interpretations of development and dependency. Topics include colonialism and imperialism; land and labor systems; interethnic and gender relations; urbanization, industrialization; and modern political change.
Notes: 2 meetings (75 minutes)

LATAM-272-01 - Latin American Studies - 2002-2003
(Spring) Studies in Caribbean Literature: The Anglophone West Indian Novel - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
Representative readings from the fiction produced in the cultural region made up by Jamaica, Trinidad, Barbados, Guyana, Grenada, Saint Lucia, and the other former British colonies in the Caribbean. Special attention will be paid to the wider context out of which it emerges, the specific characteristics (of form, content, and expression) that define its Antillean peculiarity, and the important stages of development of a distinctly West Indian novel. Among the writers whose work will come under discussion are: Edgar Mittelholzer, Roger Mais, John Hearne, V. S. Reid, George Lamming, Samuel Selvon, V. S. Naipaul, and Caryl Phillips.
Prerequisites: soph, jr, sr in Latin American studies, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: R. Márquez

LATAM-274-01 - Latin American Studies - 2002-2003
(Spring) Puerto Rican Literature and Society: Borinquen to El Barrio - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
An examination of the rise of national society in Puerto Rico and the literary forms in which it finds expression. Emphasis is on the historical context, artistic evolution, forms, moods, settings, and characteristic concerns of that expression, including a probe of the impact on and changes in literary utterance effected by annexation to the United States. The emergence of a uniquely Puerto Rican literature within the American metropolis, its distinctive character, voice, texture, and cultural singularity will thus be an important part of our concern.
Notes: 2 meetings (75 minutes)
Instructors: R. Márquez

LATAM-276-01 - Latin American Studies - 2002-2003
(Spring) Contemporary Caribbean Societies: Cuba and the Dominican Republic: Revolution and Reaction - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
Third in the ongoing cycle of self-contained examinations of a distinctively regional and cultural subdivision of the Antillean archipelago, which includes The Haitian Condition: Dessalines to Duvalier and Beyond, and Revolution in the West Indies: Trinidad, Jamaica, Guyana, Grenada. This course's special concern will be an exploration of the unfolding patterns of historical, social, and cultural development of society in Cuba and the Dominican Republic into the immediately contemporary period.
Prerequisites: soph, jr, sr, 4 credits in Latin American studies, or permission of instructor
Notes: 2 meetings (75 minutes)
LATAM-277-01 - Latin American Studies - 2002-2003
(Spring) Caribbean Women Writers
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
Comparative examination of contemporary women's writing in the Caribbean. Emphasis will be on their engagement with issues of history, cultural articulation, race, class, gender, and nationality, including exploration of their formal procedures, individual moods, regional particularity, and general impact as writers. Rosario Ferré, Ana Lydia Vega, Julia Alvarez, Edna Brolmer, Maryse Condé, Simone Schwarz-Bart, Jean Rhys, Beryl Gilroy, and Rosa Guy are among those whose works we will review.
Prerequisites: soph, jr, sr or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: R. Márquez

LATAM-278-01 - Latin American Studies - 2002-2003
(Fall) The Fiction of History: Historical Truth and Imaginative Invention in the Latin American Novel
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
Examination of the scope, reach, and limits of the Latin American variant of the historical novel as a narrative form. The variety of ways in which it fictionally strives to recreate "certain crisis in the personal destinies of a number of human beings [which] coincide and interweave with the determining context of an historical crisis," the historical vision each writer brings to the work, will be given particular attention.
Prerequisites: soph, jr, sr or permission of the instructor
Instructors: R. Márquez

(Fall) Topics in Latin American Studies - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Preamble (for topics courses): Designed for students who have had an introduction to Latin America through Latin American Studies 180 or 181 or a course in Latin America in some other discipline (anthropology, history, literature, or politics, for example), this course studies significant problems relating to Latin America in greater depth from the perspectives of appropriate disciplines. Some topics may be cross-listed with other departments.
Prerequisites: jr, sr, 4 credits in Latin American studies
Notes: 2 meetings (75 minutes)

(Spring) Modern Mexico
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
An analysis of the modern Mexican nation-state organized around three major themes: the conflictive yet symbiotic relationship with the United States, from the war of the 1840s through the North American Free Trade initiative of today; the succession of reformist and revolutionary upheavals in 1810-1821, 1856-1867, 1910-1917, the 1930s, and again today, seeking to resolve both problems of the colonial past and new conflicts traceable to the very reforms generated by earlier political and social struggles; and the meaning of Mexican nationality from different ethnic, gender, and class perspectives. Readings include autobiographical and literary works, historical studies, and films.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: L. Gudmundson
LATAM-289-01 - Latin American Studies - 2002-2003
(Spring) Slavery in the Americas
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(History 289)
A course, organized topically rather than geographically or nationally, that offers a comparative analysis of African American slavery as a dominant social system in Brazil, the Caribbean, and the U.S. South. Topics include: why slavery?; sugar and slavery; historical demography; culture and the law; kinship and family; long-run economic development; patterns of race relations; master class and racist ideologies; resistance to slavery; and abolition and its aftermath. Readings include historical and anthropological studies, as well as a major documentary collection on slavery in Brazil.
Prerequisites: soph, jr, sr, 4 credits in Latin American studies, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: L. Gudmundson

(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Instructors: The department.

LATAM-373-01 - Latin American Studies - 2002-2003
(Spring) Studies in Comparative Caribbean Culture: Contemporary Caribbean Writers - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
A sustained, comparative study of the developing canon of at least three major contemporary writers from the Caribbean, representing the region's Spanish-, English-, and French-speaking cultural zones. Articulates the evolution, contours, and scope of each author's unique perception of the New World and, especially, the broadly defining features of what Welsh cultural historian Raymond Williams would have called their peculiarly Antillean "structure of feeling."
Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: R. Márquez

LATAM-375-01 - Latin American Studies - 2002-2003
(Spring) Paradigms of New World Thought: History, Race, Class, and Nationality - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
This sustained study of the work of at least two representative New World thinkers emphasizes the national context, distinct intellectual evolution, influence, ideological importance, and wider implications of that work. We will be especially interested in the ways their work engages the drama of history, race, and class as part of a larger notion of nation and against the backdrop of specific historical circumstances. Since the authors studied will change each time the course is offered, a student may receive credit more than once.
Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: R. Márquez

LATAM-376-01 - Latin American Studies - 2002-2003
(Fall) Foundations of the Colonial Enterprise in the Americas - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
Exploration of the historic roots of colonialism, from its antecedents in the Crusades, and the emergence of Columbus' Enterprise of the Indies to the establishment of a multinational constellation of European New World colonies more than two centuries after his fateful voyage. Emphasis is on the ways in which the world before and immediately after Columbus set in place the particular terms, character, and contradictions of modern colonialism, reshaping our conception of the world and laying the foundations for the continuing importance of a variety of dramas still central to our own time.
Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: R. Márquez
LATAM-386-01 - Latin American Studies - 2002-2003
(Spring) Central America: Reform, Reaction, Revolution - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

This seminar explores the diverse experiences of Central American nations in the twentieth century. From a common basis in an export-oriented agriculture, social and political alternatives ranging from social democracy to recurrent military rule, neofascist regimes, and revolutionary socialism have emerged in the isthmus. The course uses materials ranging from autobiography and literature to historical and anthropological studies to understand how this came to be. In addition to national cases, we consider the unique experiences of the area's indigenous and Atlantic-coast peoples within and outside the nation-state framework.
Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor
Notes: 1 meeting (2 1/2 hours)
Instructors: L. Gudmundson

LATAM-387-01 - Latin American Studies - 2002-2003
(Spring) Special Topics in Latin American Studies - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

Preamble (for topics courses): This course offers advanced students an opportunity for intensive study of a problem with careful attention to research methods and to presenting their work in oral and written form.
Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor
Notes: 1 meeting (2 1/2 hours)

LATAM-388-01 - Latin American Studies - 2002-2003
(Spring) Postmodernism and Latin America
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

For many the "discovery" of America opened the modern era. Its closing may also have been foretold in Latin America's confounding of diverse theories of modernization and development in recent times. This seminar will introduce the student to a number of both classic and more recent works on Latin America (in English) that advance along postmodernist lines, ranging from cultural contact and conflict, language, meaning, and power in the sixteenth century, to the invention of national identities in the nineteenth century, to discourses of ethnicity, class, gender, and reason in the twentieth century.
Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor
Notes: 1 meeting (2 1/2 hours)
Instructors: L. Gudmundson

(Fall) Agrarian America: Sugar, Cotton, Coffee, Wheat - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

This course explores the structure and variety of societies generated in North, Central, and South America by four widely distributed export crops. Although not bound by rigid chronology, our focus will be primarily on the period 1750-1950. Principal concerns of the course are variations by time and place in each commodity's technologies, labor systems, farm sizes, and social structure; the political dynamics associated with each type of farming; and the problematic features of capitalism in agriculture, or, how and when do peasants become farmers and farming agribusiness? Readings in English on cases drawn from throughout the Americas.
Notes: Preq. jr, sr, 8 credits in Latin American studies or related field, or permission of instructor; 1 meeting (2 1/2 hours)
Instructors: L. Gudmundson

Mathematics

MATH-100-01 - Mathematics - 2002-2003
(Fall) Case Studies in Quantitative Reasoning
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

MATH-101-01 - Mathematics - 2002-2003
(Fall) Calculus I
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course presents rates of change and their applications, integrals, the fundamental theorem, and modeling of phenomena in the natural and social sciences.
Prerequisites: 4 admission units including trigonometry or permission of department
Notes: 3 meetings (75 minutes)
Instructors: The department
Section Instructors: 01 G Cobb | 02 A Durfee | 03 H Pollatsek | 04 G Quenell |

MATH-101-01 - Mathematics - 2002-2003
(Spring) Calculus I
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Prerequisites: 4 admission units including trigonometry or permission of department
Notes: 3 meetings (75 minutes)
Instructors: The department

MATH-103-01 - Mathematics - 2002-2003
(Fall) Accelerated Calculus
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
A course for students who have taken calculus, but who wish to review what they have learned before moving on to more advanced topics. Topics include a review of the techniques and applications of the derivative, introductory methods of integration, the Fundamental Theorem of Calculus, more advanced integration techniques, differential equations, and applications of the integral to various areas, including economics and physics.
Notes: 2 meetings (1 hour, 50 minutes)
Instructors: G. Davidoff

MATH-103-01 - Mathematics - 2002-2003

MATH-110-01 - Mathematics - 2002-2003
(Spring) Explorations in Algebra - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
High school algebra is essentially the study of the laws that govern the system of numbers we use for ordinary arithmetic. This course focuses on certain of these laws and studies the systems, called "groups," governed by them. Groups have beautiful properties and describe many phenomena: crystallography, graphic art, matrix algebra, counting, nuclear physics, codes, and more. The course studies the group laws and their consequences, as well as many examples of systems satisfying these laws.
Prerequisites: 4 admission units or permission of instructor
Notes: 3 meetings (75 minutes); enrollment limited
Instructors: The department
MATH-112-01 - Mathematics - 2002-2003
(Fall) Mathematics in Historical Context
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
First-year seminar
The course begins with prehistory: Egyptian geometry and Pythagorean geometry and arithmetic; next the Alexandrian period, featuring Archimedes, Euclid, and Ptolemy, where classical geometry is brought to a culmination and the beginnings of calculus are seen. After a short consideration of Arab mathematics, we enter the Renaissance and look at its two great accomplishments: algebra and analytic geometry. Then we examine the Enlightenment and the development of calculus by Newton, Leibniz, and Euler. Finally, we enter briefly into the modern era with the discovery (invention?) of set theory toward the end of the nineteenth Century.
Notes: This is a first-year seminar
Instructors: L. Senechal

MATH-114-01 - Mathematics - 2002-2003
(Fall) Explorations in Number Theory - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Studies basic mathematical structures using as models symmetries of plane figures, the ordinary integers, and other number systems. Uses examples to uncover patterns that help reveal and explain relationships. Solving simple equations in these new settings quickly brings students into contact with some intriguing problems being studied by contemporary mathematicians.
Prerequisites: 4 admission units or permission of instructor
Notes: 3 meetings (75 minutes)
enrollment limited
Instructors: The department

MATH-120-01 - Mathematics - 2002-2003
(Fall) Explorations in Geometry: Geometry and Cosmology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
The astronomical models devised by Greeks in the period 600-300 B.C. held sway until the Renaissance, when great improvements in understanding were achieved - and yet a geocentric bias persisted among cosmologists well into the twentieth century. In this course we will endeavor to comprehend the geometric viewpoints of the distant past and the very significant evolution of understanding that occurred in the nineteenth and twentieth centuries.
Prerequisites: 4 admission units or permission of instructor
Notes: 3 meetings (75 minutes)
Instructors: J. Morrow

MATH-125-01 - Mathematics - 2002-2003
(Spring) Explorations in Fractals and Chaos - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
An introduction to fractals and chaos. Topics selected from the following: self-similar fractals, fractal dimension, iteration, the Feigenbaum diagram, Julia sets and the Mandelbrot set, strange attractors and applications.
Prerequisites: 4 admission units or permission of instructor
Notes: 3 meetings (75 minutes); enrollment limited
Instructors: The department

MATH-139-01 - Mathematics - 2002-2003
(Spring) Explorations in Cryptography: Cryptography and Mathematics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Explorations in Cryptography. Cryptography and Mathematics: Mathematical language and methods are used to describe encryption and decryption techniques as well as cryptanalysis, the breaking of codes. Topics include modular arithmetic, elementary statistics, basic number theory and group theory.
Prerequisites: 
Instructors: G. Quenell

MATH-202-01 - Mathematics - 2002-2003
(Fall) Calculus II
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics include techniques of integration, periodic functions, dynamical systems, series and approximations, and probability.
Prerequisites: Mathematics 101 or equivalent, permission of department
Notes: Note: Credit may not be given for Mathematics 200 and 202; 3 meetings (75 minutes)
Instructors: The department
Section Instructors: 01 | 02 |

MATH-202-01 - Mathematics - 2002-2003
(Spring) Calculus II
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics include techniques of integration, periodic functions, dynamical systems, series and approximations, and probability.
Prerequisites: Mathematics 101 or equivalent, permission of department
Notes: Note: Credit may not be given for Mathematics 200 and 202; 3 meetings (75 minutes)

MATH-203-01 - Mathematics - 2002-2003
(Fall) Calculus III
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics include differential and integral calculus of functions of several variables.
Prerequisites: Mathematics 103, 200, or 202 or equivalent, permission of department
Notes: 3 meetings (75 minutes)
Instructors: G. Davidoff

MATH-203-01 - Mathematics - 2002-2003
(Spring) Calculus III
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

Prerequisites: Mathematics 103, 200, or 202 or equivalent, permission of department
Notes: 3 meetings (75 minutes)
Instructors: The department

MATH-211-01 - Mathematics - 2002-2003
(Fall) Linear Algebra
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics include elements of the theory of matrices and vector spaces.
Prerequisites: any 100-level mathematics course
Instructors: M. Robinson

MATH-211-01 - Mathematics - 2002-2003
(Spring) Linear Algebra
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics include elements of the theory of matrices and vector spaces.
Prerequisites: any 100-level mathematics course
Instructors: The department

(Spring) Discrete Mathematics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Studies some aspects of discrete mathematics. Topics may include sets, functions, elementary probability, induction proofs, recurrence relations, and matrices.
Prerequisites: any 100-level mathematics or computer science course, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: The department
MATH-251-01 - Mathematics - 2002-2003
(Fall) Laboratory in Mathematical Experimentation
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
(Writing-intensive)
Offers mathematics as a laboratory science. After a short introduction to the computer, uses hand and computer computation to explore mathematical ideas. Directs laboratory projects toward discovery of properties and patterns in mathematical structures. The choice of projects varies from year to year and is drawn from algebra, analysis, discrete mathematics, geometry, and statistics.
Prerequisites: Mathematics 200 or 202 or equivalent, or permission of department
Notes: 2 meetings (2 hours)
Instructors: M. Robinson

MATH-301-01 - Mathematics - 2002-2003
(Spring) Real Analysis
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics include the real number system, convergence of sequences and series, power series, uniform convergence, compactness and connectedness, continuity, abstract treatment of differential and integral calculus, metric spaces, and point-set topology.
Prerequisites: Mathematics 251 or permission of instructor
Notes: 3 meetings (75 minutes)
Instructors: The department

MATH-302-01 - Mathematics - 2002-2003
(Fall) Complex Analysis
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics include differentiation and integration of functions of a complex variable, the Cauchy integral formula, residues, conformal mapping, and applications to physical science and engineering.
Prerequisites: Mathematics 203 or Physics 303
Notes: 2 meetings (90 minutes); offered alternate years at Mount Holyoke and Smith Colleges
Instructors: M. Peterson

MATH-311-01 - Mathematics - 2002-2003
(Fall) Abstract Algebra
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics include algebraic structures: groups, rings (including some elementary number theory), fields, and vector spaces.
Prerequisites: Mathematics 211 and another 200-level mathematics course.
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes).
Instructors: G. Quenell.

MATH-319-01 - Mathematics - 2002-2003
(Spring) Topics in Algebra - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics to be announced.
Prerequisites: Mathematics 211; Mathematics 311 helpful but not necessary.
Notes: 2 meetings (90 minutes).
Instructors: The department.

MATH-322-01 - Mathematics - 2002-2003
(Fall) Differential Geometry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics selected from the following: spherical geometry, Euclid's theory of parallels, the development of non-Euclidean geometry; plane curves, curvature, some famous plane curves (cycloids, lemniscates, cardioids, the cissoid of Diocles, the tractrix, etc.); curves in space and their curvature, knots and tubes; surfaces, various types of curvature for surfaces, the theorema egregium and the Gauss-Bonnet theorem; map projections (stereographic, central, Mercator, Lambert's cylindrical projection, azimuthal, etc.).
Prerequisites: Mathematics 203, 211 (may be taken concurrently).
Notes: 2 meetings (90 minutes).
Instructors: The department.

MATH-324-01 - Mathematics - 2002-2003

(Computer Science 331s)

MATH-333-01 - Mathematics - 2002-2003
(Spring) Differential Equations
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This is an introduction to differential equations for students in the mathematical or other sciences. Topics include first-order equations, second-order linear equations, qualitative study of dynamical systems, and first- and second-order linear partial differential equations.
Prerequisites: Mathematics 200 or 202
Notes: 4 meetings (50 minutes); offered alternate years
Instructors: The department

MATH-339-01 - Mathematics - 2002-2003
(Fall) Topics in Applied Mathematics: Advanced Topics in Mathematical Finance
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Topics to be selected from: the stochastic calculus, review of Black-Scholes, yield curves, swaps, interest rate derivatives, risk measurement and management, statistical analysis of financial data, Monte Carlo simulation.
Prerequisites: A basic course in mathematical finance (e.g. Mathematics 339, which was in the fall of 2001) or permission of the instructor
Instructors: A. Darfee

MATH-342-01 - Mathematics - 2002-2003

Medieval Studies

(Fall) Medieval Culture and Society: Seminar in Reading, Writing, and Reasoning: Crossing Medieval Boundaries
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (English 101f (08))
Preamble (for topics courses): This course offers a foundation for inquiry into medieval culture. Using readings in literature, art, music, history, politics, philosophy, and sciences to interpret the Middle Ages, a student sharpens her awareness of language and imagery as means of communicating experience and improves her skills of attentive reading and persuasive writing. The 101f-102s seminar sequence offered in 2002-2003 is designed to be a yearlong course, but students may take one semester without the other.

How did medieval people think about themselves and how did they imagine, move in, and represent the physical world? This course explores the various ways medieval culture created and crossed significant geographical, emotional, and conceptual boundaries in the areas of art, literature, religion, mathematics, and science. Texts will include medieval maps, travel literature such as Mandeville's Travels, letters of Heloise and Abelard, works of
Christine de Pizan, Malory's *Morte D'Arthur*, manuscript illuminations, and selected material from late medieval theories of love, medicine, astrology, and mathematics.

Notes: 2 meetings (75 minutes); This is a first-year seminar

Instructors: C. Collette

Expected enrollment: 17

*(Spring)* Medieval Culture and Society: Seminar in Reading, Writing, and Reasoning: Europe and the Atlantic World, 1300-1700

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(Speaking- and writing-intensive; History 150s)

Preamble (for topics courses): This course offers a foundation for inquiry into medieval culture. Using readings in literature, art, music, history, politics, philosophy, and sciences to interpret the Middle Ages, a student sharpens her awareness of language and imagery as means of communicating experience, and improves her skills of attentive reading and persuasive writing. The 101f-102s seminar sequence offered in 2002-2003 is designed to be a yearlong course, but students may take one semester without the other.

This course inquires into several dimensions of European society and culture during the transition from principalities and fiefs to early modern states, from feudalism to capitalism, from serfdom to both free and slave labor. Equally important, however, will be comparisons of western Europe with other Atlantic societies of these centuries and examination of consequences for Europeans, Africans, and Americans (north and south) of encounters among them. Using both voices from the period and recent scholarship about early modern western and Atlantic societies, the course will look critically at the making and remaking of "Western" culture between the middle ages and the modern era.

Notes: 2 meetings (75 minutes)

Instructors: H. Garrett-Goodyear

Expected enrollment: 15

**MEDST-200-01** - Medieval Studies - 2002-2003

*(Spring)* Special Topics in Medieval History: A Medieval Room of One's Own: Christine de Pizan and Her World

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Taught in English; French 220s)

The patriarchal society in which Christine lived was a difficult place to find work when her husband died and she became the sole support of her children. Hers was a troubled world: the late fourteenth and early fifteenth centuries saw political, social, and economic crises in France. The course will examine how Christine made a place for herself amidst personal and political turmoil. It will provide a broad canvas of late-medieval literary and historical transformations, including the stunning appearance of Joan of Arc. Study of Christine's works, of texts by other authors, and of manuscript illumination will give a rich sense of the period.

Notes: 2 meetings (75 minutes); students who wish to obtain 300-level credit in French and have the necessary prerequisites must have the permission of the instructor

Instructors: M. Switten

Expected enrollment: 15

**MEDST-300-01** - Medieval Studies - 2002-2003

*(Spring)* Seminar in Medieval Studies: King Arthur and Joan of Arc: From Medieval to Modern

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking- and writing-intensive; English 316s (01))

Beginning with medieval stories and documents about these two figures, this course traces the growth of the myths of King Arthur and Joan of Arc in nineteenth- and twentieth-century English literature and film. Through close reading and analysis of medieval and modern texts as well as selected films, the seminar will inquire into how different cultures and different periods have used these two medieval figures to reflect their own hopes and anxieties. Readings will include Arthurian works from the Middle Ages and nineteenth and twentieth centuries; court records; contemporary medieval literary references concerning Joan of Arc; as well as nineteenth- and twentieth-century plays and novels.

Prerequisites: jr, sr, Medieval Studies 101 or English 210, or permission of the instructor

Notes: 1 meeting (3 hours); permission of the instructor needed during the preregistration period for admission to the course; satisfies English department pre-1700 requirement; satisfies English department seminar requirement

**MUSIC-341-01** - Music - 2002-2003  
*(Spring)* Conducting II

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

This course is a continuation of Conducting I, with opportunities to lead instrumental as well as vocal ensembles. Includes baton technique, preparation of longer works, and class recital and/or independent projects.

Prerequisites: Music 242

Notes: 1 meeting (2 hours)

Instructors: M. Bartley

*(Spring)* Topics in Music History: Music Manuscripts and Music History
This seminar will study selected original manuscripts of music dating from the fifteenth to the early twentieth century, as well as contemporaneous and more modern printed editions. These sources will be examined for what they can tell us about compositional procedure, stylistic and notational conventions, and performance practices, as well as the role that they play in our reconstruction of music history. Each student will pursue an independent project on which she will focus increasingly during the course of the semester. Oral presentations will be an integral part of the seminar, with a written presentation as the final requirement.

Prerequisites: permission of instructor

Instructors: L. Litterick

**MUSIC-373-01 - Music - 2002-2003**

(Spring) Topics in Music Theory - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course explores advanced theoretical and analytical techniques. Different topics are investigated each time the course is given.

Philosophy

PHIL-101-01 - Philosophy - 2002-2003
(Fall) Introduction to Philosophy
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Speaking- and writing-intensive)
In this course we will examine such questions as: What makes one's actions right or wrong? What is the "self?" Are our wills free? What can we know with certainty? Through contemporary and historical texts, we trace philosophical approaches to these questions.
Instructors: A. Murphy

PHIL-102-01 - Philosophy - 2002-2003
(Fall) First-Year Seminar
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar (Speaking-intensive)
In this course we will examine questions such as: How is the mind related to the body? What is freedom, and what is oppression? What should I do for others? Through contemporary and historical texts, we trace philosophical approaches to these questions.
Notes: 2 meetings (75 minutes); This is a first-year seminar
Instructors: S. Mitchell
Expected enrollment: 20

PHIL-201-01 - Philosophy - 2002-2003
(Fall) Philosophical Foundations of Western Thought: The Greek Period
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Writing-intensive)
This course is an introduction to ancient Greek philosophy from the pre-Socratic period through to the Hellenistic period. Topics to be discussed include: What is the nature of reality? What kind of life should we live? What is truth, and how can we know it? We will work to understand each philosopher's responses to these questions, but we will also learn to develop our own answers. We will read not only some of the major works of ancient Greek philosophy, but also some literary and historical works of the period.
Notes: 2 meetings (75 minutes)
Instructors: J. Harold

PHIL-202-01 - Philosophy - 2002-2003
(Spring) Philosophical Foundations of Western Thought: The Modern Period
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Investigates the development of Western philosophy in the seventeenth and eighteenth centuries through the writings of Descartes, Spinoza, Leibniz, Berkeley, Hume, and Kant. Focuses on the impact of modern scientific thought on the philosophical tradition's understanding of the place of the human being in the world. Topics include the nature and extent of human knowledge, the nature of the mind, and the possibility of human freedom.

Notes: 2 meetings (75 minutes)
Instructors: S. Mitchell

PHIL-205-01 - Philosophy - 2002-2003
(Fall) Ethics
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Is morality relative to individual preferences? Would you rather be free or happy? Are friends necessary for a good life? Would you rather be a satisfied pig or a dissatisfied student? These questions illustrate some of the issues that will be raised by the ancient and modern ethical philosophers we shall explore in this course, looking at sources as varied as novels, canonical philosophic texts, and even children's stories.
Notes: 2 meetings (75 minutes)
Instructors: J. Inness

PHIL-206-01 - Philosophy - 2002-2003
(Fall) Introduction to the Philosophy of Science - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course provides students with an introduction to philosophy based upon the philosophy of science. Questions to be discussed include: What is the nature of scientific reasoning? What are scientific theories, and how are they tested? How are scientific concepts and explanations used? The social aspects of scientific inquiry will be addressed, as will some feminist criticisms of science. The idea of scientific progress will also be given extended treatment.

PHIL-210-01 - Philosophy - 2002-2003
(Fall) Logical Thought
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course cultivates sound reasoning. Students will learn to see the structure of claims and arguments and to use those structures in developing strong arguments and exposing shoddy ones. We will learn to evaluate arguments on the strength of the reasoning rather than on the force of their associations and buzzwords.
Notes: 3 meetings (50 minutes)
Instructors: L. Bowie

PHIL-225-01 - Philosophy - 2002-2003
(Spring) Symbolic Logic
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course develops a symbolic system that can be used as the basis for inference in all fields. It will provide syntax and semantics for the language of this system and investigate its adequacy. It provides the basis for all further work in logic or in the philosophical foundations of mathematics. Much of the course has a mathematical flavor, but no knowledge of mathematics is necessary.
Notes: 3 meetings (50 minutes)
Instructors: L. Bowie

PHIL-226-01 - Philosophy - 2002-2003
(Fall) Introduction to the Philosophy of Religion - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Religion 226fs)
This course begins its survey of the discipline of the philosophy of religion with the work of Augustine. We then proceed to an examination of the classical theistic arguments for knowledge of God's existence (those of Anselm, Aquinas, and Maimonides) that dominated Scholastic thought and consider the criticisms of these approaches by Enlightenment philosophers such as Kant. We trace the rise of experience as the central category of pietism and romanticism in the texts of Schleiermacher and Coleridge and in the poetry of Novalis. Finally, we focus on the pragmatic tradition in American philosophy of religion, especially in the work of William James, Josiah Royce, and Cornel West.

(Complex Organizations 232s)

PHIL-235-01 - Philosophy - 2002-2003
(Spring) Medical Ethics
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Modern medicine has raised new and difficult moral and philosophical problems. Topics discussed include: What is the distinction between health and illness? How should limited health care resources be distributed? How are medical problems related to larger social problems (e.g., sex inequality)? What are the responsibilities of medical researchers toward their research subjects? What moral reasons do we have to be concerned about the growth of technology in medicine? Are the basic institutions of medicine and medical education just?
Notes: 2 meetings (75 minutes)
Instructors: J. Harold

PHIL-240-01 - Philosophy - 2002-2003
(Spring) Environmental Ethics: Nature/Culture/Values - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
A fundamental problem we face as humans is how we should relate to the natural world. Why not turn Yosemite into a parking lot? Is nature to be controlled through applying technological expertise? Or is Thoreau correct in his suggestion that we must immerse ourselves in nature to discover who we truly are? Might the value of nature extend beyond its utility for humans? Students have the opportunity to explore these questions, challenging widespread assumptions about nature, culture, and values.
Notes: 2 meetings (75 minutes)
Instructors: J. Inness

PHIL-241-01 - Philosophy - 2002-2003
(Fall) Issues in Contemporary Moral Theory
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Do we need to develop virtues to lead a good life? Is morality founded on freedom or happiness? What does it involve for an individual to be just? What is the relationship between morality and power? This course explores questions and texts relevant to contemporary ethical philosophy. We will examine a number of contemporary texts written by philosophers interested in concepts such as virtue, freedom, justice, and power.
Prerequisites: Philosophy 205 or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: J. Inness

PHIL-242-01 - Philosophy - 2002-2003
(Fall) Social and Political Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course is a survey of influential works in the history of political thought, along with some contemporary works. Classical readings will include Plato, Machiavelli, Hobbes, Locke, Rousseau, Hume, Mill, and Marx. Modern authors will likely include Susan Okin, John Rawls, Marilyn Frye, Jean Hampton, and Allison Jagger. Our central question will be "What gives a government legitimate authority over its citizens?" 
Notes: 2 meetings (75 minutes)

PHIL-243-01 - Philosophy - 2002-2003
(Fall) Ethics, Political Theory, and Public Debate
Care about racism, social injustice, and education reform? Enjoy thinking and arguing about ethical issues? Here's the course for you. This community-based learning course meets once a week at Mount Holyoke, and students travel to a Springfield public high school seven times during the term to work after school with teachers and students. In class you'll learn about: moral and political theory, debate, racism, and teaching across difference. Then, you'll go and use this knowledge to prepare your students for a series of debates. This is a demanding and rewarding class for students who want to learn and to make a difference.

Prerequisites: permission of instructor

Notes: this course does not count toward a philosophy major; students who take this course may not concurrently or subsequently enroll in Philosophy 205

Instructors: E. Barnes

PHIL-244-01 - Philosophy - 2002-2003
(Spring) Philosophy and Literature
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(The course examines philosophical themes in literature and also looks at philosophical questions about literature. Can literature give us knowledge about the world? How do we determine the meaning of a work of literature? Are the author's intentions relevant to interpretation? Can works of literature lead us morally astray? How are gender, race, and class relevant to reading literature? What is the difference between philosophy and literature — can a work of literature also be a work of philosophy?)

Instructors: J. Harold

PHIL-248-01 - Philosophy - 2002-2003
(Spring) Philosophical Issues in Race and Racism
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(The course examines philosophical issues in race and racism. Topics to be discussed include: Is "race" real, subjective, or produced by society? How is race relevant to our identities? How does the popular media represent "race"? Does science construct "race"? What is the connection between "race," gender, and class? Class readings from philosophy and a variety of interdisciplinary texts, including film and literature.

Notes: 2 meetings (75 minutes)
Instructors: A. Murphy

PHIL-249-01 - Philosophy - 2002-2003
(Fall) Women and Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Do we all dress in drag? Should women strive to be less emotional? Is sexuality socially constructed? Is popular culture harmful to women? This course focuses on philosophy that explores women's understanding of reality. By studying the work of various twentieth-century feminist philosophers as well as films and stories, we shall explore a number of crucial philosophic concerns including truth, the self, and morality. Our aim is to become philosophers ourselves, thinking deeply about issues of fundamental importance to our lives.

Notes: 2 meetings (75 minutes)
Expected enrollment: 25

PHIL-250-01 - Philosophy - 2002-2003
(Fall) Topics in Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Notes: 2 meetings (75 minutes)

PHIL-253-01 - Philosophy - 2002-2003
(Fall) Introduction to Asian Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(The course introduces students to the traditional systems of thought in Asia, concentrating on Hinduism in India; Taoism in China; and Buddhism in China, India, and Japan, with occasional reference to other systems. Secondary and primary texts are read, along with some literature inspired by these philosophies. Cross-cultural explorations - and considerations of gender, caste, and elitism - are encouraged.

PHIL-255-01 - Philosophy - 2002-2003
(Fall) Existentialism
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Is life absurd? Do human beings really want to be free? Or do we prefer to sacrifice our freedom for comfort and amusement? Is God dead? Is it possible to live without religious belief? These are among the central questions about human life raised by existential thinkers. We will discuss these issues, and many others, through careful reading of philosophic and literary texts by such important existentialists as Franz Kafka, Martin Heidegger, Jean-Paul Sartre, Albert Camus, Simone de Beauvoir, Franz Fanon, and Samuel Beckett.

Notes: 2 meetings (75 minutes)

PHIL-257-01 - Philosophy - 2002-2003
(Fall) Topics in Contemporary Continental Philosophy: Ideology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course will explore and trace the development of the concept of ideology in the works of continental philosophers beginning with Marx. We will examine how "ideology" has been conceived and how the concept of ideology has functioned in different theoretical and social contexts. The course leads up to a consideration of claims in contemporary cultural theory that some notions of ideology must be abandoned. Readings may include works by Karl Marx, George Lukacs, Antonio Gramsci, Karl Mannheim, Louis Althusser, Theodor Adorno, Slavoj Zizek, and Seyla Benhabib.

PHIL-263-01 - Philosophy - 2002-2003
(Fall) Philosophy of Biology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Biology gives rise to many interesting philosophical questions. For example: How could there be evidence for evolution when we can't predict new species? How could adaptations be intended for some purpose? Are individuals selected by natural selection or could groups be selected too? How does evolution add light on human behavior, if at all? In this course we will consider these issues. Designed to be accessible to those with backgrounds in either philosophy or biology.

PHIL-264-01 - Philosophy - 2002-2003
(Fall) Philosophy of Mind
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
An introduction to the mind/body problem and the way that it shapes our view of ourselves, this course emphasizes work in cognitive science, an interdisciplinary approach that draws together artificial intelligence, neurobiology, linguistics, philosophy, and cognitive psychology. Readings are from these areas and from classical philosophical sources.
Notes: 2 meetings (75 minutes)
Instructors: L. Bowie

PHIL-265-01 - Philosophy - 2002-2003
(Fall) Introduction to Chinese Philosophy
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Asian Studies 265f, Religion 265f)

PHIL-270-01 - Philosophy - 2002-2003
(Fall) Epistemology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Issues in epistemology (the theory of knowledge) are fundamental to nearly all fields of study. This course uses both historical and contemporary texts to consider traditional questions in the theory of knowledge. Included are the following questions: Can I have knowledge of anything outside of my mind, for example, physical objects or other minds? Can we answer the skeptic's challenge that we are not justified in any of our beliefs? What is knowledge, and how does it differ from belief? Does our knowledge have a foundation or is it unavoidably circular? Is all knowledge derived from experience or is some innate?
Prerequisites: 4 credits in department or permission of instructor
Notes: 2 meetings (75 minutes)

PHIL-271-01 - Philosophy - 2002-2003
(Spring) Philosophy of Language - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
In the twentieth century, problems in the philosophy of language have become central to nearly all philosophical concerns. This course addresses key questions: What is truth? What is it for a sentence to have a meaning? Does language determine the way we think? Readings are drawn from Frege, Russell, Wittgenstein, Wiorf, Quine, Chomsky, Frye, and others.
Prerequisites: 4 credits in department or permission of instructor
Notes: 2 meetings (75 minutes)
PHIL-273-01 - Philosophy 2002-2003
(Spring) Philosophy of Art - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Community-based learning course; Speaking-intensive)
Could a pile of bricks be art? Does life imitate art or does art imitate life? How can we know the real meaning of a work of art? Can art be a bad moral influence? Is "activist art" art? This class draws on a variety of media, including visual art, literature, film, dance, and music, to examine these questions. The class will also study the creation of a local "public art" statue in honor of onetime resident Sojourner Truth.
Notes: 2 meetings (75 minutes)

PHIL-275-01 - Philosophy 2002-2003
(Fall) Philosophy and Film - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
An exploration of philosophical issues encountered in the study of film. Are films art or entertainment? Do films have "authors"? Can popular films be socially critical? These are examples of the topics to be discussed in this course as we investigate the nature of film and its relation to philosophy. Readings will be drawn from a variety of sources: philosophy, film and cultural theory, film criticism. There will be weekly film screenings.
Prerequisites: 4 credits in department or in film studies, or permission of instructor
Notes: 2 meetings (75 minutes), 1 screening (3 hours)

PHIL-280-01 - Philosophy 2002-2003
(Fall) Philosophy for Children - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Community-based learning course; Speaking-intensive)
When you act bravely, can you be scared? How do you know that you are not dreaming now? If everyone kept telling you that you weren't a person, would you believe them? These are examples of questions raised by children's books, such as *Frog and Toad Together* and *The Bear that Wasn't*. This seminar will discuss whether young children can be taught to philosophize and what the importance of doing so would be. Participants will be required to take part in a community-based learning project of teaching philosophy to elementary school children at the Jackson Street Elementary School in Northampton.
Prerequisites: 4 credits in department or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: The department
Expected enrollment: 15

PHIL-290-01 - Philosophy 2002-2003
(Spring) Meaning, Time, and Beauty: Philosophy in Dialogue
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Speaking- and writing-intensive)
Does life have meaning? Is time real? Must art be beautiful? Philosophers have had radically different solutions to these fundamental questions. The aim of this course is for students to develop their own answers to each of these questions through discussion and dialogue. Emphasis on developing oral and written skills. This course is recommended for all sophomores thinking of majoring or minoring in philosophy and is required for the major.
Prerequisites: soph, jr, 4 credits in department
Notes: 2 meetings (75 minutes)
Instructors: S. Mitchell

PHIL-295-01 - Philosophy 2002-2003
(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.

PHIL-310-01 - Philosophy - 2002-2003
(Fall) Twentieth-Century Analytic Philosophy
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
An introduction to the history, themes, and methods of analytic philosophy, the dominant movement in twentieth-century English-speaking philosophy. Analytic philosophy uses logic and a careful analysis of language to solve philosophical problems. We will study most of the major figures of this movement, including Frege, Russell, Carnap, Quine, and Kripke. Topics addressed will include the logic of numerical identity, reference and existence, Quine’s criticisms of logical positivism, and the meaning of necessity.
Prerequisites: 8 credits in department
Notes: 1 meeting (2 hours)
Instructors: S. Mitchell

PHIL-312-01 - Philosophy - 2002-2003
(Fall) Topics in Metaphysics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
An examination of one of a cluster of topics: What is real? Are humans free? Do numbers exist? Are there immaterial souls? Specific topics vary from year to year.
Prerequisites: 8 credits in department
Notes: 1 meeting (2 hours)

PHIL-315-01 - Philosophy - 2002-2003
(Spring) Topics in Ancient Greek Philosophy: Ancient Greeks on Perplexity - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Speaking-intensive)
When the ancient Greek thinker Socrates reflected on the world around him, he found it to be a very puzzling place. What is death? What is the soul? What is the best life to live? Western philosophy came into existence to respond to these perplexities. Just how does philosophy do this? Who and what is a philosopher? Should philosophy resolve our perplexity or leave us perplexed? This class explores these questions with readings from Plato, Aristotle, and the Hellenistic philosophers.
Prerequisites: 8 credits in department or permission of instructor
Notes: 1 meeting (3 hours)

PHIL-321-01 - Philosophy - 2002-2003
(Fall) Seminar in Philosophy of Language - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This seminar attempts to investigate carefully the broad relationship between language and the world by focusing on issues of realism and idealism: Does language merely attach labels to things (and kinds of things) that exist independently of our thought? Or do we contribute to the construction of the world by developing a conceptual scheme for describing or representing it? The seminar will focus on the work of two pivotal figures in the philosophy of language: Wittgenstein and Chomsky.
Prerequisites: 8 credits in department
Notes: 1 meeting (2 hours)

PHIL-327-01 - Philosophy - 2002-2003
(Spring) Advanced Logic
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Mathematics 327s)
This course presents a careful development of predicate calculus, formal elementary number theory, and elementary recursion theory, culminating in a proof of Gödel's incompleteness results. It includes some discussion of the philosophical significance of these results for the foundations of mathematics.
Prerequisites: Philosophy 225, 4 credits in department or in mathematics and permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: L. Bowie

PHIL-334-01 - Philosophy - 2002-2003
(Spring) Topics in Ethics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Preamble (for topics courses): This course studies issues of current concern in contemporary moral theory, moral psychology, and foundations of ethics.

Prerequisites: 8 credits in department or permission of instructor

Notes: 1 meeting (2 hours)

PHIL-347-01 - Philosophy - 2002-2003
(Spring) Developments in Feminist Philosophy: Rethinking the World - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
What makes a body sexy? Is heterosexuality natural? What is "sex?" Feminist philosophy is in the midst of a revolutionary transformation. Rather than remaining content with the task of indicating the shortcomings of the philosophical canon, feminist philosophers are constructing their own distinctively feminist version of philosophy. In this course, we shall explore what contemporary feminist philosophers have written about the nature of sex and sexuality.

Prerequisites: 8 credits in department or permission of instructor

Notes: 1 meeting (2 hours)

PHIL-347-02 - Philosophy - 2002-2003
(Fall) Topics in Philosophy: Gender, Race, and Science
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Women's Studies 333f (02))
This course examines different approaches to understanding the nature of scientific practices. Of central interest will be the diverse accounts offered by feminist studies of science. We will pay particular attention to notions of evidence, methods, cultural and material constraints, and the heterogeneous nature of laboratory and theoretical practices. We will consider ways in which gender, race, and sexuality are constructed by science and how these factors influence both scientific practices and our conceptions of science. We will also examine the feminist commitment to taking account of the multifaceted dynamics between science and society without forfeiting the notion of objectivity.

Prerequisites: 8 credits in women's studies or 8 credits in science courses or permission of instructor

Notes: 1 meeting (3 hours)
Instructors: K. Barad
Expected enrollment: 15

PHIL-350-01 - Philosophy - 2002-2003
(Spring) Topics in Philosophy: Complexities of the Self
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
How are we to understand the nature of the self, in all its complexity? How can we form coherent conceptions of ourselves amidst ambivalence and other forms of inner conflict? What do unbidden thoughts and desires, unconscious impulses, slips of the tongue, and free associations say about the self? What makes a desire one's own and what makes a desire "alien" or external? In this course, we will examine these and other questions, drawing on readings from philosophy, psychology, and psychoanalysis.

Prerequisites: 8 credits in philosophy or permission of instructor

Notes: 1 meeting (2 hours)
Instructors: J. Rosner
Expected enrollment: 15

PHIL-350-02 - Philosophy - 2002-2003
(Spring) Topics in Philosophy: Science and the Body - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course will examine scientific discourses on the body as well as feminist, queer, and antiracist approaches, interventions, and responses. Drawing on the literatures from cultural studies of science, technology, and medicine, gay and lesbian and queer studies, the history of science and medicine, anthropology, biology and feminist theory, we will consider such topics as scientific constructions of raced-sexed-gendered bodies (homo)sexualities, mainstream and counter-discourses concerning intersexuality, transgendered and cyborg bodies, and scientific constructions of disease and disabilities.

Prerequisites: 8 credits in women's studies beyond Women's Studies 101 or permission of instructor; open to jr, sr science majors with permission of instructor

Instructors: K. Barad
Expected enrollment: 15

PHIL-350-03 - Philosophy - 2002-2003
(Spring) Topics in Philosophy: Feminist and Queer Theory
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Women's Studies 333s (05))
Questions of power, agency, structure, materiality, bodies, subjectivities, and discursive practices have been central to both feminist and queer theories. In this course, we will focus on these issues, exploring in particular the tensions among poststructuralist, Marxist, and materialist approaches. In analyzing contemporary theories of gender and sexuality, we will pay particular attention to issues of race, class, ethnicity, nationality, and globalization.
Key problematics include: the nature and operation of power, the relationship between materiality and discourse, and the relationship between theory and practice.

PHIL-352-01 - Philosophy - 2002-2003
(Spring) Nineteenth-Century Continental Philosophy - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

During the nineteenth century, a distinctive mode of philosophizing arose, now known as Continental Philosophy, that placed the issue of human alienation squarely on the philosophic agenda. We will investigate how this topic achieved such importance through careful reading, analysis, and comparison of works by Hegel, Kierkegaard, Feuerbach, Marx, and Nietzsche. We will explore how these philosophers understood the potentials of human life as well as how they saw society limiting them.

PHIL-373-01 - Philosophy - 2002-2003
(Fall) Philosophy of Art

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Preamble (for topics courses): This class examines philosophical issues arising concerning the interpretation, creation, and experience of art. Topics vary from year to year.

The topic of this course will be emotional responses to narrative works of art. Some of the questions we will consider include: Are the emotional responses we experience when reading or viewing fiction genuine emotions, or are they better thought of as quasi-emotions? Do we appreciate fiction through mental simulation? What is the aesthetic and moral significance of emotional responses of fiction? What effect do differences of race and gender have on one’s ability or propensity to engage emotionally with fiction?

(Fall) Advanced Dressage
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
For advanced riders to improve understanding of straightness, rhythm, obedience, and suppleness. The goal is to improve application of the aids through a balanced and effective seat.
Prerequisites: Physical Education 352 or permission of instructor
Notes: 2 meetings (50 minutes); fee course
Section Instructors: 01 LEC

PE-453-01 - Physical Education and Athletics - 2002-2003
(Fall) Advanced Boarder Flat and Jumping
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Develops the art of communicating with the horse for improved harmony through effective use of legs, seat, and hands in dressage and when jumping.
Must have use of your own horse.
Prerequisites: must be at Physical Education 451 level and able to jump 3'-3'6" course of fences
Notes: 2 meetings (50 minutes); fee course
Instructors: C. Law

Physics

PHYS-102-01 - Physics - 2002-2003
(Spring) Galileo
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
First-year seminar
The life and work of Galileo will be explored both historically and scientifically, including much from his own writings. Classical background, contemporary controversies, and repercussions down to the present time will be included at time permits. Laboratory exercises will follow Galileo's own investigations, including such topics as vibrating strings, buoyancy, optics, astronomy, clocks, scaling laws in biology, motion, and the principle of relativity.
Notes: 2 meetings (75 minutes), 1 lab (3 hours); This is a first-year seminar
Instructors: M. Peterson
Section Instructors: 01 LAB | Expected enrollment: 12

**PHYS-103-01** - Physics - 2002-2003
*(Fall) Foundations of Physics*
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Surveys some of the theories and methodologies of physics (including Newton’s laws), particularly those involved with motion and waves. Develops the concepts of energy and momentum and their related conservation laws. Emphasizes the interplay between intuition, experiment, and analysis in the understanding of a physical theory.
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes), 1 lab (3 hours)
Instructors: S. Tewari
Section Instructors: 01 LAB The department | 02 LAB The department |

**PHYS-115-01** - Physics - 2002-2003
*(Fall) Force, Motion, and Energy*
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Studies the mechanics of material objects. Topics include Newton's laws, projectile motion, momentum, kinetic and potential energy, gravitation, conservation laws, and oscillations.
Prerequisites: Mathematics 101 or 103 (recommended) or concurrent enrollment
Notes: 4 meetings (50 minutes), 1 lab (3 hours)
Instructors: C. Sutton
Section Instructors: 01 LAB | 02 LAB | 03 LAB |

PHYS-231-01 - Physics - 2002-2003
(Spring) Techniques of Experimental Physics - *Not offered this year/term
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
Provides training in the techniques employed in the construction of scientific equipment.
Prerequisites: soph, jr, major in department
Notes: 1 meeting (3 hours) for 8 weeks; not offered in spring 2003 due to science construction
Instructors: The department

PHYS-295-01 - Physics - 2002-2003

PHYS-300-01 - Physics - 2002-2003
(Fall) Five College Advanced Laboratory
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Each of the Five Colleges offers a set of advanced experimental modules in one or more of the areas of optics, atomic physics, particle physics, statistical physics, and condensed-matter physics. Students may choose experiments from among those available at any of the Five Colleges. Credit is based on the number of modules completed, up to a maximum of 4 credits per semester and 8 credits total. The number of meetings depends on the module; modules are completed within one month.
Prerequisites: Physics 301 or 308 and permission of instructor
Notes: no MHC modules offered in 2002-2003
Instructors: C. Sutton

PHYS-301-01 - Physics - 2002-2003
(Fall) Waves and Particles
A comprehensive treatment of wave phenomena, particularly light, leading to an introductory study of quantum mechanics. Topics include wave propagation, polarization, interference and interferometry, diffraction, X-ray and electron diffraction, the wave nature of particles, the uncertainty principle, and Schrödinger's equation in one dimension.

Prerequisites: Physics 216, 303, or concurrent enrollment

Notes: 3 meetings (50 minutes), 1 lab (3 hours)

Instructors: C. Sutton

Section Instructors: 01 LAB | 01 LAB C Sutton | 02 LAB C Sutton |

PHYS-302-01 - Physics - 2002-2003
(Spring) Quantum Mechanical Phenomena

The application of quantum mechanics to selected systems. The hydrogen atom and multi-electron atoms are studied in depth, with emphasis on angular momentum, electron spin, and the Pauli exclusion principle. Principles developed are then applied to other systems, such as molecules, Bose and Fermi gases, condensed matter, nuclei and elementary particles, chosen according to the interests of the class and the instructor.

Prerequisites: Physics 301

Notes: 3 meetings (50 minutes), 1 lab (3 hours)

Instructors: C. Sutton

Section Instructors: 01 LAB C Sutton | 02 LAB C Sutton |

PHYS-303-01 - Physics - 2002-2003
(Fall) Introduction to Mathematical Methods for Scientists

Topics include infinite series, complex numbers, partial differentiation, multiple integration, selected topics in linear algebra and vector analysis, ordinary differential equations, and Fourier series.

Prerequisites: Physics 216 or concurrent enrollment

Notes: 4 meetings (50 minutes)

Instructors: S. Tewari

PHYS-308-01 - Physics - 2002-2003
(Fall) Electronics - *Not offered this year/term

This course is a study of electrical circuits and components with emphasis on the underlying physical principles; solid-state active devices with applications to simple systems such as linear amplifiers; feedback-controlled instrumentation; and analog and digital computing devices.

Prerequisites: Physics 216

Notes: 3 meetings (50 minutes), 1 lab (3 hours); offered spring 2003 ONLY due to science construction

PHYS-315-01 - Physics - 2002-2003
(Spring) Analytical Mechanics

This course is a more detailed study of the techniques developed in Physics 115 and 216, leading to an examination of the Lagrangian and Hamiltonian formulations of mechanics.
Prerequisites: Physics 303  
Notes: 4 meetings (50 minutes)  
Instructors: The department

**PHYS-324-01** - Physics - 2002-2003  
**(Spring) Methods of Applied Mathematics**  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
(Mathematics 324s)  
This course is an introduction to theories and techniques important to applied mathematics, such as special functions, calculus of variations, theory of functions of a complex variable, the algebra of vector spaces, solution of partial differential equations, Green's functions, integral transform methods, and probability and statistics. Topics selected according to class interests.  
Prerequisites: Physics 216, 303  
Notes: 2 meetings (75 minutes)  
Instructors: The department

**PHYS-325-01** - Physics - 2002-2003  
**(Fall) Electromagnetic Theory**  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
This course presents the development of mathematical descriptions of electric and magnetic fields; study of interactions of fields with matter in static and dynamic situations; mathematical description of waves; and development of Maxwell's equations with a few applications to the reflection and refraction of light and microwave cavities.  
Prerequisites: Physics 301, 315, or 324  
Notes: 4 meetings (50 minutes)  
Instructors: B. Weinberger

**PHYS-326-01** - Physics - 2002-2003  
**(Fall) Statistical Physics and Condensed Matter**  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
Topics include: the development of the general problem of many-particle systems and the laws of thermodynamics from fundamental quantum and probability concepts; applications to ideal gases, paramagnetism, and black-body radiation; and an introduction to the physics of the solid state, including crystal structure, free electron and band theory of metals, lattice vibrations, and specific heats of solids.  
Prerequisites: Physics 301  
Notes: 3 meetings (50 minutes); one or both of Physics 326 and 336 will normally be offered each year, depending on the needs and interests of the students; in 2002-2003, Physics 326 will be offered fall 2002 ONLY  
Instructors: M. Peterson

Politics

POLIT-101-01 - Politics - 2002-2003
(Fall) Fundamentals of Politics: Concepts and Controversies
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Writing-intensive)
This course examines three contrasting conceptions of freedom and of what threatens or denies or enhances freedom, in light of selective controversies in American politics and society. We explore concepts related to "freedom," such as "community," "equality," and "the common good"; and we acquaint ourselves with competing political perspectives on contemporary America. We also consider some pressing issues, such as the role of government and the future of public goods; the social limits to economic growth; the character and ramifications of economic inequality; racial, ethnic, and gender discrimination; and affirmative action.
Notes: 2 meetings (75 minutes); conducted in small sections, with students submitting short essays throughout the semester
Instructors: S. Ellenburg

POLIT-104-01 - Politics - 2002-2003
(Fall) American Politics
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Offers an overview of the American political system and the theories of those who celebrate it and criticize it. Focuses on the institutions of American politics, including the Constitution, the presidency, Congress, the courts, parties and elections, interest groups, and movements seeking political change. Also includes a theoretical focus: a critical examination of the notions of liberalism, pluralism, and democracy that inform the practice of American politics.

(Complex Organizations 107s)

POLIT-109-01 - Politics - 2002-2003
(Spring) Nomads, Steppes, and Cities: Introduction to the Peoples and Cultures of Russia and Eurasia - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Russian and Eurasian Studies 131s)

POLIT-111-01 - Politics - 2002-2003
(Fall) Confessions, Novels, and Notebooks: The Self and Political Thought
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
First-year seminar (Writing-intensive)
What is the relationship between personal experience and political theory? How do political thinkers grasp and articulate the connections between self and political order? Our first-year seminar will probe the links between heart and mind in political philosophy by exploring the lives and writings of three illustrative figures who together span the history of political thought. This coming year those figures will be Saint Augustine, Jean-Jacques Rousseau, and Simone de Beauvoir.
Notes: 2 meetings; This is a first-year seminar
Instructors: J. Cocks
Expected enrollment: 20

POLIT-112-01 - Politics - 2002-2003
(Fall) Speaking and Arguing: The Rhetoric of Peace and War - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)
The art and mechanics of persuading a polity to support either war or peace through oral argument. How speeches frame issues, mobilize public opinion, and persuade individuals to support or resist decisions to go to war. Students will be expected to deliver speeches, lead discussions, and critique their own and others' presentations.
Prerequisites: limited to first-year students
Notes: 2 meetings (75 minutes)
Instructors: V. Ferraro
Expected enrollment: 15

POLIT-116-01 - Politics - 2002-2003
(Fall) World Politics
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(International Relations 116fs)
This course is a survey of contending approaches to the study of conflict and cooperation in world politics. Examines key concepts—including balance of power, imperialism, collective security, deterrence, and interdependence—with historical examples ranging from the Peloponnesian War to the post-cold war world. Analyzes the emerging world order.

POLIT-207-01 - Politics - 2002-2003
(Fall) Women and the Law
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course is an assessment, in terms of political power, of how the legal order impinges on women in American society, with an examination of the legal rights of women in a number of areas of substantive law: equal opportunity in education, employment, and credit; selected aspects of the law governing marital status, the family, and property.
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: W. Stewart

POLIT-209-01 - Politics - 2002-2003

POLIT-210-01 - Politics - 2002-2003
(Spring) Minorities and the Law - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Focuses on the interrelationship of law and the distribution of political power as they impinge on members of disadvantaged ethnic and racial minorities. Examines the legal status of Native Americans, African Americans, Chinese, Japanese, and Latino/Hispanic groups in historical perspective, together with the impact of ethnic and racial stratification on the contemporary exercise of police and the operation of jails as social institutions. Assesses the contemporary status of minority groups under the U.S. Constitution in the areas of "equal protection" and "due process," and legislation purporting to eliminate racial discrimination in housing, banking, and employment.
Prerequisites: soph, jr, sr, or fy with permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: W. Stewart

(Fall) Topics in Urban Studies - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course draws on both historical and contemporary sources to address critical issues and problems facing cities. Topics are organized around the following questions: How have cities come to take their shape and character over time? How are economic and social inequalities mapped onto the urban landscape? How are differences of race, class, and gender negotiated through urban institutions and community struggles? Assignments for the course will utilize empirical data to explore conflict and change in a local city through different historical periods. This course will be taught simultaneously at two campuses. Students will be taught alternately by faculty from both institutions.
Prerequisites: soph, jr, sr, introductory course in American history or social sciences or permission of instructor
Notes: 2 meetings (75 minutes)

(Spring) Decision Making - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Complex Organizations 367s)
On decision making, and the pathologies of decision making, in American politics. When, and to what extent, can we say that a particular policy decision is the result of rational choice, institutional processes, pluralistic pressures, or other forces? When are individual or collective decisions likely to be marred by "groupthink," selective attention, or self-deception? To what extent, if at all, may collective decisions be considered rational or moral? When are challenges to authority, or to dominant opinion, likely to make a difference?
Prerequisites: Politics 104, 245, 246, or permission of instructor, 2 meetings (75 minutes)
Instructors: C. Pyle

POLIT-371-01 - Politics - 2002-2003
(Fall) Seminar on Anarchism - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Classics of anarchos ("without a ruler") literature selected from among Proudhon, Bakunin, Kropotkin, Tolstoy, Goldman, Berkman, and others; anarchists' autobiographies; anarchists confront Marxists, in speech and on battlefields; revolutionary ideology and the justification or rejection of political violence; varieties of anarchist justice; "Seattle" and after.

Notes: 1 meeting (2 hours, 50 minutes)
Instructors: S. Ellenburg

POLIT-379-01 - Politics - 2002-2003
(Fall) Topics in European Politics: Europe and the European Union - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Writing-intensive)
A research seminar. Europeans of both west and east are intensifying their efforts to broaden and deepen European integration at the same time that there has been a startling revival of ethnic conflict and nationalist agendas. Voters in Scotland and Wales elect their own parliaments while civil wars rage in the Balkans; Central Europeans struggle to solidify democratic nation-states in a global environment where some claim the nation-state may soon be obsolete. How are these centrifugal and centripetal forces interrelated?
Prerequisites: 8 credits in politics, including Politics 106, 237, or permission of instructor
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: The department
Expected enrollment: 15

POLIT-380-01 - Politics - 2002-2003
(Fall) The Politics of Ethnic Conflict
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This seminar explores the dimensions of ethnic conflict in severely divided societies. We examine the nature of ethnic identity, the sources of group conflict, and the forms and patterns of group conflict. Case studies are selected for their contemporary importance and the different lessons that can be learned from them. A variety of approaches to address ethnic conflict is assessed. Students have the opportunity to concentrate independently on problems or cases in which they may have a special interest.
Prerequisites: jr, sr, and 8 credits in department or permission of instructor
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: K. Khory

POLIT-381-01 - Politics - 2002-2003
(Spring) South Asian Politics
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
A comparative study of the governments and politics of the region. Consideration of the history, social structure, and colonial heritage of the region establishes the context for understanding the political framework of the seven South Asian states. Each faces critical problems of nation and state building, political participation, economic development, and resource distribution. The focus will be on political and economic development within these states, regional relations, and the involvement of outside powers in regional affairs.
Prerequisites: 8 credits in department or permission of instructor
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: K. Khory
Expected enrollment: 18

POLIT-385-01 - Politics - 2002-2003
(Fall) International Security
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(International Relations 385f)
This course focuses on the recasting of global security concerns after the end of the cold war. It pays special attention to the problems of economic and ecological security; the relationship between security and democracy; ethnic, nationalist, and regional conflicts; weapons proliferation; and the role of nuclear weapons in the post-cold war world. The course concludes with an examination of specific initiatives for achieving both common and comprehensive security.
Prerequisites: jr, sr; 8 credits in Dept, 106 recommended, or permission of instructor
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: K. Khory

POLIT-388-01 - Politics - 2002-2003
(Spring) Post-Communist Transitions
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This seminar examines and analyzes the dramatic transformation of former Leninist Regimes—specifically, Russia, Eastern Europe, and China—in historical and comparative perspective. Focuses on understanding why Leninism imploded, and the challenges confronting nations making a "transition from socialism." Assesses the impact and consequences of the Leninist legacy on economic and political institutions, and state-society relations, and the definition of national identity and community.
Prerequisites: Jr, Sr; 8 credits in Dept, 106 recommended, or permission of instructor
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: C. Chen
Expected enrollment: 18

(Spring) Contemporary Political Ideas - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course explores such contested political concepts as liberalism, democracy, power, freedom, identity, alienation, civil society, and the public sphere - as those concepts have been interpreted by diverse currents of twentieth-century thought. Each year the course is taught, we will highlight a different conceptual theme.
Prerequisites: jr, sr, 8 credits in department or permission of instructor
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: J. Cocks

POLIT-392-01 - Politics - 2002-2003
(Spring) Portraits of Political Thinkers
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course explores the lives, affiliations, and ideas of one or two political thinkers who have made a special contribution to the self-understanding of our age. This semester we will study Hannah Arendt and Edward Said, two controversial figures who, from contrasting vantage points, write on anti-Semitism and orientalism, imperialism and nationalism; geographical and intellectual exile; and Zionism and Palestinian self-determination.
Prerequisites: jr, sr, 8 credits in department or permission of instructor
Notes: 1 meeting (2 hours, 50 minutes)
Expected enrollment: 18

PSYCH-100-01 - Psychology - 2002-2003
(Fall) Introduction to Psychology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
How do we make decisions, form attachments, and learn a language? Can we inherit schizophrenia? Why are we fearful of some situations and not others? What factors influence the way we form attitudes or develop prejudices? This course addresses such questions to provide an overview of current research in psychology. Students discuss contemporary issues and explore psychological phenomena in the laboratory sessions. Students should sign up for the lecture and fourth hour as well as one lab section.
Notes: 2 meetings (75 minutes) plus fourth hour, 1 lab (2 hours); this course is offered both semesters - however, the department encourages first-year students to take it in the spring when class size is smaller and students can benefit from a smaller lab group

PSYCH-104-01 - Psychology - 2002-2003

(January) The Psychology of Subjective Experience

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

This course explores techniques of introspection or mindfulness and their role in the study of psychology. We'll inquire into the nature of mind, and the use of introspection as a means to insight. We will also examine the role of subjectivity in the history of psychology, and why it is difficult to use as a method of research. Grade will be based on reflection papers due in each class, class participation, and a final paper.

Prerequisites: Psych 100 and permission of instructor

Notes: This course will not count for either the major or the minor in psychology; it counts as elective credit toward graduation only.

Instructors: S. Burggraf

Expected enrollment: 12

PSYCH-110-01 - Psychology - 2002-2003

(Fall) Introductory Seminars in Psychology: Brain/Mind

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

First-year seminar (Writing-intensive)

Preamble (for topics courses): Seminars introduce subjects and methods in psychology through intensive study of a particular topic. Enrollment is limited to permit full participation in discussion of the reading material and to focus on the process of writing and revision.

How does the study of the brain inform our understanding of human individuality and self-awareness and of how we perceive, learn, remember, and think? In answering this question, we will consider, among other topics, the organization and activity of the brain; case studies of the loss and recovery of psychological functions following traumatic brain damage or disease; memory and amnesia; autism; and the effects of stress on the immune system and the brain.

Prerequisites: fy, soph

Notes: 2 meetings (75 minutes) plus fourth hour; This is a first-year seminar

Instructors: J. Cohen

Expected enrollment: 20

(Fall) Social Psychology  
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement  
This course surveys a range of topics within social psychology. How do other people influence us? How do people perceive one another? How do attitudes develop and change? Under what conditions do people conform to, or deviate from, social norms? The fourth hour will use contemplative practices (looking inward, examining our own subjective experience) to understand course materials from a subjective perspective. This supplements the results of objective research methods that we explore in the rest of the classes each week. Juxtaposing objective and subjective methods allows us to evaluate what psychology is missing when it excludes subjective methods/introspection from its methodology.  
Prerequisites: Psychology 100 or 110  
Notes: 2 meetings (75 minutes) plus mandatory fourth hour; fourth hour will meet every week including the week before fall break  
Instructors: S. Burggraf

(Fall) *Health Psychology*
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
How does coping with breast cancer impact its course? How do psychological states impact the immune system? How does body image impact eating behavior? Why are there gender differences in treatment outcomes for heart disease? Why do people engage in unhealthy behaviors like smoking? How can we promote healthy behaviors like exercise and healthy eating? What are the psychological implications of advances such as organ transplantation? These are questions considered in health psychology. Using a combination of activities (lectures, videos, guest speakers, case studies), the course considers the theoretical/empirical/practical issues in this domain of psychology where body and mind meet.
Prerequisites: Psychology 100 or 110
Notes: 2 meetings (75 minutes)
Instructors: S. Wendt

(Fall) *Theories of Personality: Personality Theory through Autobiography*
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
How do theorists’ ideas about personality relate to their own life experiences? Autobiographical writings of major theorists (Freud, Jung, Horney, Deutsch) are read in conjunction with their classic works, with an eye toward exploring how people are similar to, and different from, one another and how childhood experiences shape adult behavior. Students who can arrange to do so are encouraged to take Psychology 329 concurrently.
Prerequisites: Psychology 100 or 110
Notes: 2 meetings (75 minutes)
Instructors: G. Hornstein

**PSYCH-230-01** - Psychology - 2002-2003
(Fall) *Developmental Psychology*
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Examines changes in cognitive, social, and emotional functioning, including theory and research that illuminate some central issues in characterizing these changes: the relative contributions of nature and nurture, the influence of the context on development, continuity versus discontinuity in development, and the concept of stage. Includes observations at the Gorse Child Study Center.

*(Fall) Psychoanalytic Psychology - *Not offered this year/term*
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This extensive examination of Freud's systematic psychology focuses on such phenomena as the effects of early experience, continuity and change in development, and similarities among and differences between individuals. Readings include selections from Sigmund Freud's earlier work and from the sweeping revisions of the 1920s. Criticisms and revisions of Freud are discussed. Throughout, ideas from contemporary psychoanalysis are compared and contrasted with those of Freud.
Prerequisites: Psychology 230, 220 recommended
Notes: 2 meetings (75 minutes)
Instructors: R. Shilkret

**PSYCH-323-01** - Psychology - 2002-2003
*(Spring) Laboratory in Personality Research: Qualitative Methods*
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This laboratory course focuses on the study of individual lives and explores interviewing as a qualitative research strategy for the understanding of human experience. The course aims to provide a forum to discuss the study of individual lives within the social sciences, to consider interviewing techniques and qualitative methods of data analysis, and to provide students the opportunity to conduct a study of their own using this methodology.
Prerequisites: Psychology 200, 201, 220, and permission of instructor. Students must meet with the instructor during advising week to get permission to enter the course.
Notes: 1 meeting (3 hours)
Instructors: S. Lawrence
Expected enrollment: 15

**(Fall) Seminar in Personality and Abnormal Psychology: Patient Narratives of Mental Illness**

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

How do odd behaviors or experiences of anguish come to be seen as "symptoms?" How do symptoms get woven together to form recognizable patterns of "mental illness?" Most importantly, how do patients recount their own experiences of suffering? We will consider general questions pertaining to the narration of illness and then analyze a number of specific accounts written by patients to see how their accounts differ from the standard case history in abnormal psychology.

Prerequisites: Psychology 220 (taken previously or concurrently)

Notes: 1 meeting (3 hours)
Instructors: G. Hornstein, L. Edwards
Expected enrollment: 20

**PSYCH-329-01 - Psychology - 2002-2003**

**(Spring) Seminar in Personality and Abnormal Psychology: Humanistic Theories**

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This seminar explores topics in humanistic psychology such as meaning, purpose, striving for self-actualization, optimal experience, and creativity. We will read selections from the history of humanistic theory, including Maslow and Rogers, and also consider existential and phenomenological theories in psychology (e.g., Frankl). Recent extensions of humanistic theory into the field of transpersonal psychology will also be considered (e.g., Wilbur), as well as the research that this field has generated. Finally, we will examine the use of subjective research methods in humanistic psychology and the taboo of subjectivity more generally in psychological research.

Prerequisite: Psychology 200, either Psychology 210 or 220, and permission of instructor. Students must meet with the instructor during advising week to get permission to enter the course.

Notes: 2 meetings (75 minutes)
Instructors: S. Burggraf

**(Fall) Lab in Developmental Psychology**

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course is a study of research methods in developmental psychology, focusing on observational, survey, and interview techniques for studying young children, adolescents, and adults. It encourages the student to think about the basic issues of developmental psychology research: the conceptualization of problems, design of research, choice of methods to be used, and ethical questions that might arise. Students complete a major research project.

Prerequisites: Psychology 200, 201, 230

**(Fall) Lab in Early Social and Personality Development**

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

In the role of a participant-observer, each student studies intensively the social and personality development of the children in one classroom at the Gorse Child Study Center. Students learn how to articulate developmental changes and individual differences by analyzing detailed observations. Topics include social cognition, peer relationships, social skills, concepts of friendship, emotional development, identity formation, self-esteem, and the social and cultural context of development.

Prerequisites: Psychology 200, 201, and 230 or permission of instructor

Notes: 1 meeting (2 hours, 50 minutes), 2 labs (3 hours each) at Gorse Child Study Center
Instructors: K. Stansbury
Expected enrollment: 15

**PSYCH-332-01 - Psychology - 2002-2003**

**(Spring) Laboratory in Psychological Assessment**

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Historical development, theoretical bases, and critical evaluation of tests used to describe adult cognitive and personality functioning. Supervised practicum in test administration, scoring, and interpretation.

Prerequisites: Psychology 200 and 201, either Psychology 230 or 320, and permission of instructor.

Notes: 2 meetings (75 minutes); students must schedule an interview with the instructor during the advising week.

Instructors: J. Bickford

Expected enrollment: 12

(*Fall) Seminar in Educational Psychology: Motivation - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Community-based learning course)

What influences our desire to learn, to participate in certain activities, or to become particular kinds of people? We will examine the topic of "motivation" using several perspectives, across age levels and in various settings. Drawing from a variety of resources, including autobiographies, research studies, and videos, we will target our own motivation through reflection and action and the motivation of others through active coaching and mentoring in a community-based setting.

Prerequisites: Psychology 233 or permission of instructor.

Notes: 2 meetings (75 minutes); requires a field component in a community-based site (2-hour block per week)

Instructors: B. Packard

Expected enrollment: 18

**PSYCH-339-01 - Psychology - 2002-2003**

(*Fall) Seminar in Developmental Psychology: First Love: Attachment Theory and Research

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

The relationship with the infant's primary caretaker, usually the mother, develops in a complex way during the first year after birth. We will study what is now known about this relationship, how we know about its importance to the infant, and the variation in types of such relationships early in life. The importance of this first love for later development, in childhood, adolescence, and adult life will be considered. Methods of research will be emphasized and students will be expected to give class presentations.

Prerequisites: jr, sr, Psychology 230 and permission of instructor; written statement to Professor Shilkret required

Notes: 2 meetings (75 minutes)

Instructors: R. Shilkret

Expected enrollment: 12

(*Spring) Seminar in Developmental Psychology: The Neurobiology of the Mother-Child Relationship

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Could smiling at your baby affect her immune system? Can an infant protect her mother from depression? Do infants with secure attachments develop stress-resistant brains? We will attempt to answer these and other questions by reading the latest research. We will review basic neuroendocrinology and then work from the following hypothesis: the extreme neurophysiological immaturity of human newborns allows early maternal care to play a role in shaping the development of the human brain.

Prerequisites: Psychology 200, 230, and permission of instructor. Students must meet with the instructor during advising week to get permission to enter the course.

Notes: 1 meeting (3 hours)

Instructors: K. Stansbury

Expected enrollment: 15

(*Fall) Laboratory in Perception and Cognition: Cognition and Literacy

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

(Community-based learning course)

Adult illiteracy in the U.S. presents an ever-growing challenge. To understand this problem, we will learn various theories of reading. However, since many models of reading are based on data gathered from children, we will also examine how the cognitive abilities of adults are different from those of children. A large component of this class concerns learning the lab techniques associated with assessing reading abilities. In addition, since this is a community-based learning course, each student will become a tutor for an adult enrolled in an area literacy program.

Prerequisites: Psychology 100, 201, 200 and permission of instructor.

Notes: 1 meeting (3 hours) plus 3 hours per week as a literacy tutor in Springfield

Instructors: K. Binder

Expected enrollment: 20

(Fall) Whiteness and the Construction of Identity
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
First-year seminar (Writing-intensive)
In this course, we will conduct a group inquiry of whiteness in contemporary U.S. culture and how it influences our individual identities. We will explore the social and historical contexts that constructed whiteness and examine how whiteness is enacted in daily life. Frameworks of racial identity development, privilege, dominance, and antiracism will reveal the power of whiteness while enabling us to imagine a whiteness that could enhance social justice.
Notes: 2 meetings (75 minutes); This is a first-year seminar
Instructors: S. Lawrence, S. Pliner

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Community-based learning course; Writing-intensive)
Offers a forum for the critical study of controversial issues confronting education. Focuses on the interplay of race, class, culture, and gender in the schools and how that interplay influences the lives of students, teachers, and the quality of the educational experience for all. Topics include racism in the educational system, gender inequities in schools, homophobia in education, the effects of poverty on educational opportunity, and education that is multicultural. Requires a field component in a school or community-based setting.
Prerequisites: Psychology 100 or 110 or permission of instructor
Notes: 2 meetings (75 minutes) and prepracticum (3 hours per week)
Instructors: S. Lawrence

EDUC-323-01 - Psychology and Education - 2002-2003
(Fall) The Process of Teaching and Learning: Developing Literacy in Early Childhood and Elementary Schools
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Through a balanced and integrated approach students will learn to develop literacy in early childhood/elementary schools. Class members will learn about emergent literacy, diagnosing language needs, integrating phonics skills in a literature-based program, the teaching of process writing, children's fiction and nonfiction literature, and the use of portfolios for assessment. Course required for spring semester practicum students. Course evaluation is based on written and oral work done individually and in groups. Requires a field placement.
Prerequisites: limited to students accepted to the practicum year program
Notes: 1 meeting (3 hours) and prepracticum (4 hours per week)
Instructors: L. Carlisle

EDUC-324-01 - Psychology and Education - 2002-2003
(Spring) Student Teaching in Early Childhood and Elementary Schools
Credits/PE Units: 14; Requirements met: Does not meet a distribution requirement.
Students participate in full-time teaching in early childhood and elementary classrooms. A weekly seminar is held in which students learn how to develop an integrated social studies unit that implements the State History/Social Studies Frameworks. During the weekly meetings, students will discuss the practicum experience and learn about effective behavioral and classroom management strategies, integrating special education students, legal obligations of the teacher, and relations between home and school. Course graded on a credit/no credit basis.
Notes: 5 days a week for 12 weeks; full-time student teaching in school site (includes Mount Holyoke College's spring break); limited to students accepted to the practicum year program
Instructors: L. Carlisle

(Fall) Observing and Assisting in Early Childhood and Elementary Settings
Credits/PE Units: 1-2; Requirements met: Does not meet a distribution requirement.
Discussions and fieldwork provide the student with an opportunity to understand the classroom as a learning community. The tutorial includes several meetings focusing on the student's participant observations and assigned readings. Fieldwork includes a minimum of 20 hours on site, individually scheduled in early childhood (pre-K-2) or elementary (1-6) settings. Assessment includes in-progress reports and a final project related to fieldwork. Course graded on a credit/no credit basis.
Prerequisites: permission of instructor
Notes: 1 credit (20 hours of fieldwork); 2 credits (40 hours or more of fieldwork)
Instructors: The department

EDUC-324-01 - Psychology and Education - 2002-2003
(January) Observing and Assisting in Early Childhood and Elementary Settings
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
When electing this course as a January Term course (Education 324j), students are expected to complete supervised fieldwork full-time every day during the January Term in a school site or other educational setting where daily supervised interaction with children is available. Fieldwork may be completed in sites near the campus or beyond the Five College area. This course is required of all students doing teacher licensure at the early childhood or elementary levels and must be taken in the junior or senior year. Graded on a credit/no credit basis.
Prerequisites: Psychology 100 or 110, and one of the following: Psychology 233, 234, 236, Education 205 or 220 and permission of instructor; 2 meetings (1 hour) and prepracticum
Notes: see the "Notices" section of the College Street Journal for specific details and the date of the first meeting

(Fall) The Process of Teaching and Learning: Developing Math/Science/Technology Instruction and Curriculum
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Students will learn about inquiry-based science and math curriculum and ways to use technology in an integrated way to teach these subjects. They will develop lessons that implement Massachusetts Curriculum Frameworks in math and science. In workshops at the Hitchcock Center for the Environment as well as in weekly classes on campus, emphasis will be on learning diverse management and instructional practices, such as the use of manipulatives, problem solving, cooperative learning, and the use of field projects. Early childhood candidates will spend time at the Gorse Child Study Center learning about resources in math/science for pre-K students.
Notes: 1 meeting (3 hours); limited to students accepted in the practicum year program
Instructors: L. Carlisle

(Fall) The Process of Teaching and Learning in Secondary and Middle Schools
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course is intended to help prepare prospective secondary and middle school teachers for effective classroom instruction. The philosophical bases and current research behind classroom practices are also examined. Specific course activities focus on teaching in multicultural ways, establishing the classroom climate, choosing instructional approaches, designing curricula, assessing and attending to the needs of learners, evaluating student performance, and providing for classroom community leadership. Requires a field placement.
Prerequisites: limited to students accepted to the practicum year program
Notes: 1 meeting (3 hours) and prepracticum (3 hours per week)
Instructors: B. Bell

EDUC-332-01 - Psychology and Education - 2002-2003
(Fall) Observing and Assisting in Secondary and Middle School Educational Programs
Credits/PE Units: 1-2; Requirements met: Does not meet a distribution requirement.
This is a fieldwork-based independent study course. During the fall and spring semesters it involves 20 to 40 hours of individually scheduled fieldwork in a secondary or middle school classroom or educational program. Students keep a reflective journal, read relevant articles and essays, meet regularly with the instructor, and write a final report. For students interested in middle school placements in language arts classrooms, a version of this course
focusing on creative reading and writing skills is offered in conjunction with the Department of English. This course is graded on a credit/no credit basis.
Prerequisites: permission of instructor
Instructors: S. Lawrence

EDUC-403-01 - Psychology and Education - 2002-2003
(Summer) Cognitive Processes in Mathematics Learning I
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course is a study of the teaching and learning of mathematics. Education 403 has three components: participants learn mathematics, reflect on their own learning, and consider the contexts in which learning occurs; analyze student thinking through viewing videotapes, reading articles that include examples of student discourse, and conducting one-on-one interviews; and, through a computer component, integrate technological tools and problem solving to teach mathematics. The course is graded on a credit/no credit basis.
EDUC-413-01 - Psychology and Education - 2002-2003
(Summer) Cognitive Processes in Mathematics Learning II
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Education 413 has three objectives: to challenge teachers to examine, develop, and extend their own theories of the learning process; to provide opportunities to explore mathematical concepts through problem solving; and to help teachers develop skills in creating classroom activities and environments that encourage exploration of ideas, student discourse, and conceptual understanding. The course is graded on a credit/no credit basis and can be taken twice for credit.
Prerequisites: Education 403, 423, 424, 425, 426, or 427.
Notes: 5 meetings per week; 8 hours per day for 10 days (approximately 80 hours); offered summer only
Instructors: V. Bastable, J. Lester

(Fall) Effective Antiracist Classroom Practices for All Students - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
How can we create multicultural, antiracist classrooms where children of all backgrounds feel affirmed and able to be successful? This graduate course is designed to explore this question through an examination of racism as it manifests itself in schools, through an examination of attributional models of performance and the implications each model has for classroom practice, and through an examination of strategies for creating a supportive community of learners within the classroom.
Notes: Offered to teachers after their school day; day and time to be arranged
Instructors: J. Rasool

(Fall) Developing Mathematical Ideas (DMI)
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Participants examine the mathematical ideas of the K-6 curriculum and explore the way children develop those ideas. Cases, both narrative and video, serve as the vehicles for the analysis of students' mathematical thinking. Participants also engage in mathematical activities that allow them to explore these ideas, read and discuss related educational research, conduct interviews with students, analyze innovative curriculum activities, and write papers reflecting on their views of teaching and learning.
Prerequisites: permission of instructor
Notes: fall and spring: 1 meeting per week (3 hours); summer: 10 days (5 hours each day); offered to teachers after their school day
Instructors: J. Lester

(Fall) Examining Algebraic Structures in the Context of Arithmetic
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This seminar will explore how students generalize about operations and number and justify claims of generality. Topics will include commutativity, identities, inverses, associativity, distributivity, odd/even numbers, and generalizations about factors. For all of these topics, we will examine children's arguments for why the generalizations hold, with close attention to their use of representations to support general claims. In addition to the work focused on children's thinking, the seminar will include mathematics activities to engage the adult learners. Participants will document each session detailing the connections between their seminar experience and work in their own classrooms.

(Fall) Introduction to the Philosophy of Religion - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Speaking- and writing-intensive; Philosophy 226f)

This course begins its survey of the discipline of the philosophy of religion with the work of Augustine. We then proceed to an examination of the classical theistic arguments for knowledge of God's existence (those of Anselm, Aquinas, and Maimonides) that dominated Scholastic thought and consider the criticisms of these approaches by Enlightenment philosophers such as Kant. We trace the rise of experience as the central category of pietism and romanticism in the texts of Schleiermacher and Coleridge and in the poetry of Novalis. Finally, we focus on the pragmatic tradition in American philosophy of religion, especially in the work of William James, Josiah Royce, and Cornel West.

**RELIG-304-01** - Religion - 2002-2003
*(Spring)* Topics in New Testament: Paul and the Earliest Christians
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Preamble (for topics courses): This seminar explores theological patterns in early Christianity as reflected in the literature of the New Testament. In any given semester, it is organized around a particular theme (e.g., eschatology, christology, ethics, soteriology) or it may be organized around a particular person or literature (such as Pauline thought, Johannine thought). Topics are announced in advance of the semester in which the course is to be given.
This course analyzes the earliest surviving Christian documents, the writings of the apostle Paul and his immediate followers. We will examine both those works that made it into the New Testament canon (e.g., Paul's letters, the Acts of the Apostles, the deutero-Pauline epistles) and those that did not (e.g., Acts of Paul, the works of Marcion). We also will focus on how a variety of modern scholarly approaches to the Pauline corpus can give us a better understanding of the beliefs and social structures of earliest Christianity.

(Spring) Seminar in American Religious History: Creation vs. Evolution
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Preamble (for topics courses): This course offers advanced students an opportunity to investigate with some sophistication a problem that requires careful attention to research methods, to critical literature, and to writing. Seminar topics include people, periods, or problems that have a particular bearing on religion in America.
A distinctive mark of Western thought in the nineteenth century was its fascination with "the origin of things." The origin of the species and the origin of the universe are two prime examples. These two concerns, in particular, had a decisive impact on how religion and science came to be understood and expressed in the twentieth century. As a consequence of the ensuing public debate, the question of "origins" presented a direct challenge to the received theory of creation, the meaning of miracles, as well as the nature of biblical inspiration.

(Jewish Studies 350f (01))
Preamble (for topics courses): A study of a particular problem of inquiry, topic, or theme, with a comparative focus.
This course will explore issues of contemporary ethics from the point of view of Jewish religious thought and tradition. Topics will include medical and genetic ethics, death and dying, family and sexual ethics, ethics of war, poverty, and the environment. The course will explore these issues in the context of theoretical approaches to questions of religion and ethics.
Prerequisites: 8 credits in religion or Jewish studies, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: L. Fine

RELIG-350-01 - Religion - 2002-2003
(Spring) Special Topics in Judaism: Hasidism
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Preamble (for topics courses): A study of a particular problem of inquiry, topic, or theme, with a comparative focus.

This course explores the history and spiritual approach of Eastern European Hasidism, the popular, mystical/pietistic "revival" movement which emerged in southeastern Poland in the eighteenth century. The course will focus on such themes as the mystical immanence of the divine, contemplative prayer, the role of ecstatic song and dance, and the place of charismatic religious leadership, the Hasidic rebbe. We also will consider the nature of contemporary Hasidism.

Prerequisites: 8 credits in religion or Jewish studies, or permission of instructor

Notes: 1 meeting (2 1/2 hours)

(Fall) What It Feels Like For a (Russian) Girl
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive; Taught in English)
To pose the question a bit differently than in Madonna's song, what challenges face contemporary Russian women - young, old, urban, provincial - and how do these women cope with the stresses of everyday personal and professional life? In an attempt to arrive at an answer, we will look at interviews, short women's fiction, Russian feminist essays, and two films, Little Vera (1988) and Adam's Rib (1992). Writers include Baranskaya, Voznesenskaya, Kozhevakova, Katerli, Mamonova, Tolstaya, and Sadur.

(Spring) Loving to Death: Anna Karenina
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive)
Writing intensive. Leo Tolstoy's Anna Karenina is an action-packed drama about love and passion, personal freedom and societal expectations, and the costs of living. We will read the text slowly, with attention to the ambiguities that defeat a clear or simple interpretation of the novel's message. Then we will look at films of Anna Karenina and assess their interpretations of the novel.

(Fall) The Romanovs: Triumph and Tragedy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
We will study defining periods in Russian and world history with an emphasis on the powerful Russian monarchs who shaped them: in particular, Peter the Great, Catherine the Great, Alexander II, and Nicholas II. Russia's tsarist system raises important questions about the nature of the monarchy. The Russian case shows how monarchies can change and develop, and why, ultimately, many of them failed. Why did the Romanovs fail when their relatives, the House of Windsor, did not? Could Russia have survived as a constitutional monarchy? What is the role of a royal dynasty in defining nationhood?

(Fall) Small Gems of Russian Literature
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Writing-intensive)
Not all great works of Russian literature can double as paperweights. In this course, we'll study the gems of short Russian fiction. Nineteenth-century readings will include Pushkin's *Bronze Horseman*, Gogol's *Overcoat*, and Chekov's play *Three Sisters*. From the twentieth century we'll read Mayakovsky's play *The Bedbug*, Olesha's *Envy*, and short stories by repressed Soviet-era writer Xarms. Assignments will include response writings, formal essays, and in-class writing.

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Russian film has earned a central place in the history of world cinema. In this course, we will study the connections between important Russian films and the literary works of art that have inspired them. We will focus on the choices directors have made in translating original texts to the screen. Films include Gogol's *Overcoat* (Dir. Batalov), Tolstoy's *Kreutzer Sonata* (Schweitzer), Pushkin's *Queen of Spades* (Protazanov), and Xarms's *The Old Woman*.

(Fall) Great Books: The Literature of Nineteenth-Century Russia - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive)
In no other culture has literature occupied the central role it enjoyed in nineteenth-century Russia. Political, social, and historical constraints propelled Russian writers into the roles of witness, prophet, and sage. Yet, far from being limited to the vast, dark "Big Question" novels of legend, Russian literature offers much humor, lyricism, and fantasy. We will focus on the Russian novel as a reaction to western European forms of narrative and consider the recurring pattern of the strong heroine and the weak hero. Authors will include: Pushkin, Gogol, Turgenev, Tolstoy, Dostoevsky, and Chekhov.

(Spring) Manuscripts Don't Burn: The Literature of Twentieth-Century Russia
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
Despite the manifold disasters visited upon Russia during the twentieth century, its writers retained their artistic integrity, human voice, and moral authority. They produced a literature of extraordinary power, depth, and lyrical beauty that stands as witness both to an age and the sheer tenacity of artistic creativity. We will place this literature in the context of its time in order to ask a larger question: Can one retain one's humanity in the face of chaos, violence, terror, and dislocation? Works to be read include: Olesha's Envy, Bulgakov's Master and Margarita, Zamyatin's W's, Platonov's Foundation Pit, and Chukovsky's Sofia Petrovna.

RES-213-01 - Russian and Eurasian Studies - 2002-2003
(Fall) Tolstoy's War and Peace
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive)
Focuses on Tolstoy's War and Peace. To explain the fundamental conflict in Tolstoy's art, Sir Isaiah Berlin advanced the now famous formula that Tolstoy was a fox (pluralist) struggling to be a hedgehog (monist). Indeed, throughout his life and in his art, Tolstoy sought to shape experience into a single and all-embracing philosophical principle, but he was never able to suppress his extravagant intuition that existence, being contradictory, fragmentary, and ultimately incoherent, defeated attempts at codification. We will read War and Peace in an attempt to understand how that irresolvable conflict fuels Tolstoy's intellectual pursuits and informs his theories on art.

(Spring) Evenings on a Funny Farm near Dikanka: The Creation of Nikolai Gogol - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Gogol was a strange creature, but genius is always strange. -- Vladimir Nabokov. Nikolai Gogol is one of Russia's greatest and most enigmatic writers. Revered by Dostoevsky, he created an idiosyncratic literary universe that has lost none of its original power with the passage of time. This course will trace the development of Gogol's genius from his early Ukrainian stories, through his tales of Saint Petersburg, to his comic masterpiece, Dead Souls. Special attention to Gogol's deployment of the comic, the fantastic, and the grotesque to confront the reality of tsarist Russia.

(Fall) Russia: From Communism to Capitalism
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Russia was transformed by communist revolution into a global superpower that challenged the dominant ideologies of liberalism and nationalism. It became a powerful alternative to capitalism. In 1991, this imperial state collapsed and underwent an economic, political, and cultural revolution. What explains the Soviet Union's success for 70 years and its demise in 1991? What sort of country is Russia as it enters the twenty-first century? Is it a democracy? How has Russia's transformation affected ordinary people and Russia's relationship to the West?

(Fall) The Foreign Policy of the Soviet Union and Its Successor States - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Since its creation at the beginning of the twentieth century, the Soviet Union dominated the minds of Western foreign policymakers. None of the West's policies in the Middle East, the Third World, Europe, or China after World War II can be understood without the study of Soviet foreign policy. We will examine the development of Soviet foreign policy since 1917 and, following the collapse of the USSR in 1991, the role played by Russia and the former Soviet republics in the far more complex and multipolar "New World Order." What should U.S. policy be toward the emerging new states of the Baltics, Central Asia, and Caucasus?

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Following the collapse of the USSR and the Gulf War, Central Asia and the Caucasus became new centers of geopolitical rivalry. The new states are a source of energy (oil and gas) for Western powers and a vital transit corridor between Eastern Europe and China. While a new "Great Game" is being fought between Western, Far Eastern, and Middle Eastern powers for control over energy pipelines, the region is threatened by environmental catastrophe and water shortages. Is the new oil industry a source of prosperity or an instrument for further exploitation, corruption, and instability? How important are the new states to the West's strategic energy interests?

(Spring) Terrorism: Russia as Its Cradle
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Russia was the first nation in the world to face political terrorism. In Russia, the era of terrorism lasted from the 1860s, when the People's Will group launched the hunt on the tsar Alexander II, until 1918, when the Socialist Revolutionary Party attempted to assassinate Lenin. A case study of terrorism in Russia will help us to answer a number of questions highly relevant today. What are the causes of terrorism? What are its goals and methods? What can governments do to cope with it? What is the impact of terrorism on society?

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

The Bolshevik Revolution of 1917 marked the coming of totalitarianism to Russia. Led first by Lenin and then by Stalin, the country went through the most brutal civil war, purges, World War II, and the first stages of cold war. This period also saw immense social change and sweeping economic transformation. What were the causes of totalitarianism in Russia? How did the regime function? What were the major landmarks of Russian history in the period 1917-1953?

(Fall) The New Democracies
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

With the collapse of the USSR we were told that history was dead and liberal democracy triumphant. There was a "third wave" of democratic change. How accurate have these optimistic characterizations turned out to be? After an introduction to theories of liberal democracy and to the new discipline of "transitology" we will look at how states and leaders have applied such liberal-democratic ideas in Eastern Europe and the former USSR (with comparative examples from Africa and South America), and with what success.

(Fall) Utopia and Anti-Utopia
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

The twentieth century has been largely shaped by several nations' ambitions to build utopian societies. Russia and China have attempted to realize the vast promises of communism while Nazi Germany aimed to construct a perfect racist world. Beyond political struggle, wars, and revolutions, recent extraordinary achievements in technology have contributed to the utopian mindset. Are political utopias dead in the new millennium? How do cyberspace and the global village contribute to utopian thinking? What will be the role of utopia in the twenty-first century?

(Spring) Nationalism - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Nationalism is one of the greatest challenges to multiethnic states. They have had to create new strategies to deal with the demands of ethnic minorities. Taking the four states of Spain, Canada, Russia, and the former Yugoslavia as examples, we will focus on nationalist movements within these states and the central governments' responses. What has been the effect of the Communist legacy? Are there alternatives to federalism as a way of managing national claims?

What socioeconomic policies have governments used to control ethnic tensions? What role can international organizations play in finding solutions to ethnic conflict?
Revolutions have a rich and bloody history on the European continent. In the twentieth century, there were frequent revolutionary upheavals, particularly in Russia and Eastern Europe. We will study two revolutionary periods: Russia in 1917 and the USSR in 1991. These revolutionary events present great contrasts, yet at the same time clarify the nature of revolutions and why they occur. Do they bring the expected fundamental and accelerated change people hope for? Our focus will be on the contrasts and parallels between Russia's early twentieth-century socialist revolution and late twentieth-century capitalist revolution. What was (and is) their impact on European history and thought?

(Fall) **Small Gems of Russian Literature**

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

(Writing-intensive)

Not all great works of Russian literature can double as paperweights. In this course, we'll study the gems of short Russian fiction. Nineteenth-century readings will include Pushkin's *Bronze Horseman*, Gogol's *Overcoat*, and Chekov's play *Three Sisters*. From the twentieth century we'll read Mayakovsky's play *The Bedbug*, Olesha's *Envy*, and short stories by repressed Soviet-era writer Xarms. Assignments will include response writings, formal essays, and in-class writing.

Notes: This course meets for the first half of the semester only; 2 meetings (75 minutes)
Instructors: S. Scotto
Expected enrollment: 15

(Spring) **From Page to Screen: Russian Literature on Film**

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

Russian film has earned a central place in the history of world cinema. In this course, we will study the connections between important Russian films and the literary works of art that have inspired them. We will focus on the choices directors have made in translating original texts to the screen. Films include Gogol's *Overcoat* (Dir. Batalov), Tolstoy's *Kreutzer Sonata* (Schweitzer), Pushkin's *Queen of Spades* (Protazanov), and Xarms's *The Old Woman*.

(Fall) **Great Books: The Literature of Nineteenth-Century Russia - *Not offered this year/term**

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Speaking- and writing-intensive)

In no other culture has literature occupied the central role it enjoyed in nineteenth-century Russia. Political, social, and historical constraints propelled Russian writers into the roles of witness, prophet, and sage. Yet, far from being limited to the vast, dark "Big Question" novels of legend, Russian literature offers much humor, lyricism, and fantasy. We will focus on the Russian novel as a reaction to western European forms of narrative and consider the recurring pattern of the strong heroine and the weak hero. Authors will include: Pushkin, Gogol, Turgenev, Tolstoy, Dostoevsky, and Chekov.

(Spring) **Manuscripts Don't Burn: The Literature of Twentieth-Century Russia**

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

(Taught in English)

Despite the manifold disasters visited upon Russia during the twentieth century, its writers retained their artistic integrity, human voice, and moral authority. They produced a literature of extraordinary power, depth, and lyrical beauty that stands as witness both to an age and the sheer tenacity of artistic creativity. We will place this literature in the context of its time in order to ask a larger question: Can one retain one's humanity in the face of chaos, violence, terror, and dislocation? Works to be read include: Olyesha's *Envy*, Bulgakov's *Master and Margarita*, Zamyatin's *If*, Platonov's *Foundation Pit*, and Chukovskaya's *Sofia Petrovna*.

(Fall) Tolstoy's *War and Peace*
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive)
Focuses on Tolstoy's *War and Peace*. To explain the fundamental conflict in Tolstoy's art, Sir Isaiah Berlin advanced the now famous formula that Tolstoy was a fox (pluralist) struggling to be a hedgehog (monist). Indeed, throughout his life and in his art, Tolstoy sought to shape experience into a single and all-embracing philosophical principle, but he was never able to suppress his extravagant intuition that existence, being contradictory, fragmentary, and ultimately incoherent, defeated attempts at codification. We will read *War and Peace* in an attempt to understand how that irresolvable conflict fuels Tolstoy's intellectual pursuits and informs his theories on art.

(Spring) Evenings on a Funny Farm near Dikanka: The Creation of Nikolai Gogol - *Not offered this year/term*
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

_Gogol was a strange creature, but genius is always strange._ -- Vladimir Nabokov. Nikolai Gogol is one of Russia's greatest and most enigmatic writers. Revered by Dostoevsky, he created an idiosyncratic literary universe that has lost none of its original power with the passage of time. This course will trace the development of Gogol's genius from his early Ukrainian stories, through his tales of Saint Petersburg, to his comic masterpiece, Dead Souls. Special attention to Gogol's deployment of the comic, the fantastic, and the grotesque to confront the reality of tsarist Russia.

(Fall) Russia: From Communism to Capitalism
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Politics 209f)
Russia was transformed by communist revolution into a global superpower that challenged the dominant ideologies of liberalism and nationalism. It became a powerful alternative to capitalism. In 1991, this imperial state collapsed and underwent an economic, political, and cultural revolution. What explains the Soviet Union's success for 70 years and its demise in 1991? What sort of country is Russia as it enters the twenty-first century? Is it a democracy? How has Russia's transformation affected ordinary people and Russia's relationship to the West?

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Politics 264f)
Since its creation at the beginning of the twentieth century, the Soviet Union dominated the minds of Western foreign policymakers. None of the West's policies in the Middle East, the Third World, Europe, or China after World War II can be understood without the study of Soviet foreign policy. We will examine the development of Soviet foreign policy since 1917 and, following the collapse of the USSR in 1991, the role played by Russia and Russia and the former Soviet republics in the far more complex and multipolar "New World Order." What should U.S. policy be toward the emerging new states of the Baltics, Central Asia, and Caucasia?

(Spring) Oil and Water Don't Mix: Geopolitics, Energy, and the Environment
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Politics 242s)
Following the collapse of the USSR and the Gulf War, Central Asia and the Caucasus became new centers of geopolitical rivalry. The new states are a source of energy (oil and gas) for Western powers and a vital transit corridor between Eastern Europe and China. While a new "Great Game" is being fought between Western, Far Eastern, and Middle Eastern powers for control over energy pipelines, the region is threatened by environmental catastrophe and water shortages. Is the new oil industry a source of prosperity or an instrument for further exploitation, corruption, and instability? How important are the new states to the West's strategic energy interests?

(Spring) Terrorism: Russia as Its Cradle
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Politics 243s)
Russia was the first nation in the world to face political terrorism. In Russia, the era of terrorism lasted from the 1860s, when the People's Will group launched the hunt on the tsar Alexander II, until 1918, when the Socialist Revolutionary Party attempted to assassinate Lenin. A case study of terrorism in Russia will help us to answer a number of questions highly relevant today: What are the causes of terrorism? What are its goals and methods? What can governments do to cope with it? What is the impact of terrorism on society?

(Spring) Red Star over Russia: The Totalitarian Regime of Lenin and Stalin, 1917-1953
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(History 260s)
The Bolshevik Revolution of 1917 marked the coming of totalitarianism to Russia. Led first by Lenin and then by Stalin, the country went through the most brutal civil war, purges, World War II, and the first stages of cold war. This period also saw immense social change and sweeping economic transformation. What were the causes of totalitarianism in Russia? How did the regime function? What were the major landmarks of Russian history in the period 1917-1953?

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Politics 300s)
With the collapse of the USSR we were told that history was dead and liberal democracy triumphant. There was a "third wave" of democratic change. How accurate have these optimistic characterizations turned out to be? After an introduction to theories of liberal democracy and to the new discipline of "transitology" we will look at how states and leaders have applied such liberal-democratic ideas in Eastern Europe and the former USSR (with comparative examples from Africa and South America), and with what success.

(Fall) Utopia and Anti-Utopia
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
The twentieth century has been largely shaped by several nations' ambitions to build utopian societies. Russia and China have attempted to realize the vast promises of communism while Nazi Germany aimed to construct a perfect racist world. Beyond political struggle, wars, and revolutions, recent extraordinary achievements in technology have contributed to the utopian mindset. Are political utopias dead in the new millennium? How do cyberspace and the global village contribute to utopian thinking? What will be the role of utopia in the twenty-first century?

Nationalism - Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III: Anthro, econ, geog, etc. requirement
(Politics 308s)

Preamble (for topics courses): Courses in this section satisfy the distribution requirement in social sciences.
Nationalism is one of the greatest challenges to multiethnic states. They have had to create new strategies to deal with the demands of ethnic minorities. Taking the four states of Spain, Canada, Russia, and the former Yugoslavia as examples, we will focus on nationalist movements within these states and the central governments’ responses. What has been the effect of the Communist legacy? Are there alternatives to federalism as a way of managing national claims?
What socioeconomic policies have governments used to control ethnic tensions? What role can international organizations play in finding solutions to ethnic conflict?

(Spring) Revolutions
Credits/PE Units: 4; Requirements met: Meets Social Sciences III: Anthro, econ, geog, etc. requirement
(Politics 350s)
Revolutions have a rich and bloody history on the European continent. In the twentieth century, there were frequent revolutionary upheavals, particularly in Russia and Eastern Europe. We will study two revolutionary periods: Russia in 1917 and the USSR in 1991. These revolutionary events present great contrasts, yet at the same time clarify the nature of revolutions and why they occur. Do they bring the expected fundamental and accelerated change people hope for? Our focus will be on the contrasts and parallels between Russia’s early twentieth-century socialist revolution and late twentieth-century capitalist revolution. What was (and is) their impact on European history and thought?

(Fall) Development of Social Thought
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Anthropology 223f)
This course examines the origins and development of sociological theory in the nineteenth century. Focusing on the three most important representatives of the classical tradition in sociology - Karl Marx, Max Weber, and Emile Durkheim - we consider in detail the ideas of each, compare their perspectives on emerging industrial society, and assess their contemporary significance.
Prerequisites: Sociology 123 or Anthropology 105, soph, jr, sr
Notes: 2 meetings (75 minutes)
Instructors: K. Tucker

SOCI-224-01 - Sociology - 2002-2003
(Spring) Practicing Sociology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Community-based learning course)
This course in archival and field research methods uses a sociological lens to magnify issues in research design for nonquantitative data. In this community-based learning experience, students will use resources from their own "community" to describe and contextualize some central theoretical issues in sociology, such as: What is a community? How is a community different from a statistical population, an organization, or an institution? How are communities represented, measured, and studied? There will be hands-on experience with primary documents from the Mount Holyoke Archives, as well as interview material that students will collect, transcribe, and analyze themselves.
Prerequisites: 8 credits in sociology

SOCI-225-01 - Sociology - 2002-2003
(Spring) Survey Research and Data Analysis - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Introducing the logic and methods of social research, this course is concerned with a review of social science methodology; questions of measurement, design, and general research strategies; and specific discussion of sample survey techniques and the logic and practice of data manipulation and statistical analysis.
Prerequisites: soph, jr, sr and 4 credits at 100 level in sociology
SOCI-227-01 - Sociology - 2002-2003
(Spring) Social Inequality - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course is a critical survey of theoretical and empirical research on social inequality, stratification, and mobility. The central focus is class, race, and gender inequalities as they have changed during the post-World War II period in the United States (although we will look briefly at stratification regimes in other cultures and time periods). The concepts and methods of social stratification have wide application in sociology, economics, public policy, and administration contexts. As the course progresses, we will explore some of these applications as we wrestle with several policy issues currently confronting U.S. society.
Prerequisites: 4 credits at 100 level in sociology

SOCI-234-01 - Sociology - 2002-2003
(Spring) Social Problems
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This is a course on the social construction of social problems. It devotes almost exclusive attention to how a "problem" becomes a social problem; examining how atypical cases become regarded as typical; how definitions are expanded to inflate statistics; and how claim makers and advocacy groups manipulate the media to market social problems and solutions to the public.
Prerequisites: 4 credits at 100 level in sociology
Notes: 2 meetings (75 minutes)
Instructors: R. Moran
Expected enrollment: 30

(Fall) U.S. Latino/a Literature
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Taught in English)
After centuries of invisibility and marginalization, Latino culture and literature exploded on the American scene in the 60s. Chicanos, Cubans, Nuyoricans, and lately Dominicans and Central Americans have all contributed to create a diversified body of literature characterized by its bilingualism, biculturalism, and hybridity. This course will center on how U.S. Latino/a literature bears witness to identity formation, self-representation, and celebration of Latino culture and its people. It will explore a series of critical issues that define "latinidad" in the U.S.
Prerequisites: soph, jr, sr or fy with permission of department

(Spring) Colonial and Nineteenth-Century Latin American Literature: Mapping the Latin American Metropolis
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
Preamble (for topics courses): This course will concentrate on the colonial period and/or the nineteenth century. The study of the colonial era will focus on different aspects of the encounter between European and indigenous civilizations and the formation of a literary discourse (i.e., chronicles and the novel). The nineteenth-century component will explore the process of nation building through literature, the development of literary genres, and the emergence of women's voices. Since the topic varies each time the course is offered, a student may receive credit more than once.
This course explores, through literature and film, the development of the city in Latin America. From the colonial cities of La Habana, Mexico D.F., and Lima, to the nineteenth-century metropolises of Buenos Aires and Rio de Janeiro, all the way to the contemporary latinization of Los Angeles and New York, we will analyze the ways in which power is expressed and contested through the monopolization of space and how the political and cultural negotiations of a nation are written upon the city.

Prerequisites: Spanish 235, 237, 244 or 246 or permission of instructor

Notes: 1 meeting (2 hours, 50 minutes)

Instructors: N. Gerassi-Navarro

SPAN-332-01  Spanish - 2002-2003
(Fall) Spanish Literature: Medieval, Renaissance, and Golden Age: Conflict on Stage: Negotiating Power in Early Modern Spanish Comedia
Preamble (for topics courses): How does Latin America think about itself? The purpose of this course is to introduce students to different ways in which Latin Americans have approached the problems of self-definition and cultural identity. Readings will explore how various authors have modernismo; the cultural history of the time; forms of cultural and ideological criticism; the importance of performance. By the end of the semester, we will have a dramatic reading of one of the plays.

Prerequisites: Spanish 244 or 246, or permission of instructor

Notes: 1 meeting (2 hours, 50 minutes)

Instructors: N. Romero-Díaz

SPAN-341-01 - Spanish - 2002-2003
(Spring) Contemporary Latin American Literature: Women Writers in Twentieth-Century Latin America

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

Preamble (for topics courses): This course will concentrate on the various literary genres and cultural movements that have shaped Latin America from modernismo to the present. Topics will focus on different genres and the expression of diverse ideologies through literature. Since the topic varies each time the course is offered, a student may receive credit more than once.

The goal of this course is to explore the relationship of twentieth-century Latin American women writers to various forms of authority. We will begin by examining the ways in which women at the beginning of the century contested and/or appropriated dominant textual modes and themes in order to claim the authority to write within a literary tradition dominated by men. We will go on to explore how women's writing across the century questioned other forms of authority and hierarchies that regulate the access to power in society, including the family, the state, class structure, race, and sexuality. Readings may include texts by Parra, Stormi, Castellanos, Peri Rossi, and Valenzuela.

Prerequisites: Spanish 235, 237, 244 or 246 or permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: K. Pesola

SPAN-351-01 - Spanish - 2002-2003
(Fall) Latin American Thought: Latin America Appropriates Theory

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

Preamble (for topics courses): How does Latin America think about itself? The purpose of this course is to introduce students to different ways in which Latin Americans have approached the problems of self-definition and cultural identity. Readings will explore how various authors have addressed such complex issues as colonialism, mestizaje, literacy, regionalism, and feminism, among others. Since the topic varies each time the course is offered, a student may receive credit more than once. This course may be applied towards the Spanish major if written work is done in Spanish.

This course will focus on the ways in which Latin American culture has redefined, questioned and/or endorsed different literary theories of the twentieth century. Topics addressed include structuralism, deconstruction, feminism, and cultural criticism.

Prerequisites: Spanish 235, 237, 244 or 246 or permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: N. Gerassi-Navarro

SPAN-362-01 - Spanish - 2002-2003
(Fall) Seminar in Spanish Literature: The Edges of the Abyss: Sexuality, Violence, and Identity in Post-Franco Fiction (Prose and Films)

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): This course will concentrate on a specific writer, movement, genre, theme, or literary phenomenon. Students will do close textual readings, prepare reports, research extensively, and write substantial papers. The seminar will challenge students to demonstrate an understanding of literary analysis, critical skills, and theoretical approaches at an advanced level. Since the topic varies each time the course is offered, a student may receive credit more than once.

This course will explore the literary and cultural movement of the transition and post-Franco period in Spain as well as the social problems they address. Specifically, it will deal with the difficulty of defining one's identity in a new era in which values are being redefined and socio-political struggles are not longer as clear. The course will focus on the problems of youth culture and of identity formation during this period. We will discuss issues such as: la movida, postmodernism, Generación X, drugs, alcohol, pornography, (homo)sexuality, xenophobia, etc. Authors may include: Pedro
Almodóvar, Almudena Grandes, Rosa Montero, Pedro Maestre and Luis Antonio de Villena.

Prerequisites: Spanish 244 and/or a 300-level Spanish course or permission of instructor

Notes: 1 meetings (2 hours, 50 minutes)

Instructors: J. Gonzalez-Ruiz

(Spring) Introduction to the Ideas and Applications of Statistics

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

This course provides an overview of statistical methods, their conceptual underpinnings, and their use in various settings taken from current news, as well as from the physical, biological, and social sciences. Topics will include exploring distributions and relationships, planning for data production, sampling distributions, basic ideas of inference (confidence intervals and hypothesis tests), inference for distributions, and inference for relationships, including chi-square methods for two-way tables, analysis of variance, and regression.

Prerequisites: 2 years of high school algebra

Notes: 4 meetings (50 minutes)

Instructors: The department

**STAT-240-01** - Statistics - 2002-2003

(Fall) Elementary Data Analysis and Experimental Design

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

A fundamental fact of science is that repeated measurements exhibit variability. The course presents ways to design experiments that will reveal systematic patterns while "controlling" the effects of variability and methods for the statistical analysis of data from well-designed experiments. Topics include completely randomized, randomized complete block, Latin Square and factorial designs, and their analysis of variance. The course emphasizes applications, with examples drawn principally from biology, psychology, and medicine.

Prerequisites: Interdepartmental 100 or any 100-level course in mathematics or statistics

Notes: 3 meetings (75 minutes)

Instructors: G. Cobb

(Biological Sciences 334e)

(Fall) Applied Regression Methods
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course includes methods for choosing, fitting, evaluating, and comparing statistical models; introduces statistical inference; and analyzes data sets taken from research projects in the natural, physical, and social sciences.
Prerequisites: Mathematics 211 or any statistics course
Notes: 3 meetings (50 minutes)
Instructors: G. Cobb

STAT-341-01 - Statistics - 2002-2003
(Spring) Linear Statistical Models - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Mathematical concepts from linear algebra and n-dimensional Euclidean geometry, together with statistical concepts of estimation and hypothesis testing, are developed and used to construct a unifying theory for two classes of applied methods: analysis of variance and regression analysis. The theory is developed in three stages: least squares and orthogonal projections; moment assumptions and the Gauss-Markov theorem; and the normal distribution and F-tests.
Prerequisites: Mathematics 211, Statistics 240 and 340
Notes: 4 meetings (50 minutes); offered alternate years
Instructors: The department

(Fall) Probability
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
(Mathematics 342f)
This course develops the ideas of probability simultaneously from experimental and theoretical perspectives. The laboratory provides a range of experiences that enhance and sharpen the theoretical approach and, moreover, allows us to observe regularities in complex phenomena and to conjecture theorems. Topics include: introductory experiments; axiomatic probability; random variables, expectation, and variance; discrete distributions; continuous distributions; stochastic processes; functions of random variables; estimation and hypothesis testing.
Prerequisites: multivariable calculus
Notes: 2 meetings (75 minutes), 1 lab (50 minutes); offered alternate years at Mount Holyoke and Smith Colleges; offered at Smith College in fall 2002
Instructors: The department

STAT-343-01 - Statistics - 2002-2003
(Spring) Mathematical Statistics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course is an introduction to the mathematical theory of statistics and to the application of that theory to the real world. Topics include probability, random variables, special distributions, introduction to estimation of parameters, and hypothesis testing.
Prerequisites: Mathematics 202, 203, and 342 recommended
Notes: 2 meetings (90 minutes); offered every spring semester alternately at Mount Holyoke and Smith Colleges; offered at Smith College in spring 2003
Instructors: The department

STAT-344-01 - Statistics - 2002-2003
(Spring) Seminar in Statistics and Scientific Research: Discrete Markov Chain Monte Carlo Methods
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
The topic for spring 2003 will be discrete Markov chain Monte Carlo methods, including random walks on graphs, finite Markov chains, and their convergence properties. Applications will include community ecology and elementary Bayesian inference.
Prerequisites: Math 211 or permission of instructor
Notes: 2 meetings (90 minutes); offered alternate years
Instructors: G. Cobb

Theatre Arts

THEAT-100-01 - Theatre Arts - 2002-2003
(Fall) Introduction to Theatre
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)
A study of how theatre represents and interprets social reality. Topics include key examples of performance art throughout history and across cultures. Students will learn firsthand the work of directors, actors, and designers by studying about and taking part in current productions in the department. Close analytical readings of play texts and critical/theoretical essays will be supplemented by workshops in the various stagecrafts, by attending live and recorded performances, and by staging students' own theatrical work.
Notes: 2 meetings (2 hours) and lab
Instructors: A. Smith-Howard

THEAT-122-01 - Theatre Arts - 2002-2003
(Fall) Introduction to Set and Costume Design
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
An introduction to the art and work of the set and costume designer in the performing arts. Students will learn how a designer approaches a script, how their work impacts a production, and what means are used in the execution of this process. They will learn how to develop their own visual imaginations and how to create visual concepts through discussions, renderings, and models. No previous experience in theatre, performance, or the visual arts is required.

Notes: 2 meetings (2 hours) and lab; purchase of design supplies and materials is the responsibility of the student

Instructors: L. Soto

THEAT-125-01 - Theatre Arts - 2002-2003
(January) PROFESSIONAL AUDITIONS
Credits/PE Units: 2; Requirements met: Meets Humanities I-A requirement
With a working professional, you will choose, prepare and present two contrasting theatre audition monologues that are right for you. Rehearsed in class, these monologues become the final project and will be presented and critiqued before professional casting directors. Student evaluations also include assuming the role of casting director in order to provide a written critique of each other's work. Additional topics to be covered include photos, resumes, interviews, cold readings, and callbacks.

Notes: TUTH 10-12:30
Instructors: S. Daniels

(Fall) Introduction to Women's Studies
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Speaking-intensive)
This course introduces the social and historical construction of women and gender from cross-cultural and interdisciplinary perspectives. We will consider the intersections of gender, race, and class oppression and how these intersections structure sexuality, reproduction, and sexual violence. We will explore how gendered bodies are produced by colonial and neocolonial discourses. We will examine the development of feminist theory and its practices in local and international contexts.
Prerequisites: fy, soph
Notes: 2 meetings (75 minutes)
Instructors: M. Renda

WOMST-101-01 - Women's Studies - 2002-2003
(Spring) Introduction to Women's Studies
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course offers an overview of women's position in society and culture by examining women's lives from a variety of experiential and theoretical perspectives. The first section examines works by women that illuminate both the shared and the diverse social, psychological, political and economic realities of their experience; the second section introduces analyses of sexism and oppression, with a focus on different frameworks for making and evaluating feminist arguments. The course concludes with visionary feminist views of women recreating their lives.
Prerequisites: fy, soph

WOMST-200-01 - Women's Studies - 2002-2003
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(History 296s (01))
Transformations in gendered divisions of labor and in women's access to resources are fundamental to understanding contemporary African societies. We explore how African women have created contexts for productivity using strategies such as marriage, pledged female friendship, and voluntary dependency. We investigate the loss of women's work of governing in the colonial period, and the consequences for women's wealth and productivity of incorporation into a global market economy. Texts include recorded life histories, autobiography, fiction, and film, and primary sources such as the testimony of participants in the Ibo Women's War of 1929.
Notes: 2 meetings (75 minutes)

(Spring) Feminist Approaches to Literature: Asian American Women's Writing
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(English 273s)
This course explores the politics of race and gender through writings by women of Asian descent in North America. We will examine texts from national and diasporic formations - U.S., Canada, South America, South Asian, Southeast Asian, East Asian, Pacific Islander. Themes include conceptions of home, memory, race and sexuality, gender and nationalism, strategies of resistance, legacies of colonialism, war, and immigrant displacement. We will supplement readings of literary texts with critical readings in feminist, U.S. women of color, postcolonial, and Asian American literary and cultural theories.

(Spring) Feminist Theory: Invitation to Feminist Theory
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Politics 233s)
Preamble (for topics courses): Feminist theory offers analytical frameworks from understanding the operations of gender in culture and society. This course highlights interrelationships among gender, race, class, sexuality, and other forms of identity and difference from a theoretical perspective.
On theoretical attempts to grasp the complex ties and tensions between sex, gender, and power. This course explores the overlapping dualities of the feminine and the masculine, the private and the public, the home and the world. We examine different forms of power over the body; the ways gender and sexual identities reinforce or challenge the established order; and the cultural determinants of "women's emancipation."

(Fall) Interdisciplinary Seminar: Emily Dickinson in Her Times
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Community-based learning course)
This course will examine the writing of Emily Dickinson, both her poetry and her letters. We will consider the cultural, historical, and familial environment in which she wrote, with special attention paid to Dickinson's place as a woman artist in the nineteenth century. Students will be asked to complete a community-based learning project in which some aspect of Dickinson's life and work is interpreted for the general public and incorporated into an ongoing display at the Dickinson Homestead. The class will meet at the Dickinson Homestead in Amherst.
Prerequisites: jr, sr, 8 credits in women's studies beyong 101, or permission of instructor

WOMST-333-02 - Women's Studies - 2002-2003
(Fall) Interdisciplinary Seminar: Gender, Race, and Science
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course examines different approaches to understanding the nature of scientific practices. Of central interest will be the diverse accounts offered by feminist studies of science. We will pay particular attention to notions of evidence, methods, cultural and material constraints and the heterogeneous nature of laboratory and theoretical practices. We will consider the ways in which gender, race, and sexuality are constructed by science and how these factors influence both scientific practices and our conceptions of science. We will also examine the feminist commitment to taking account of the multifaceted dynamics between science and society without forfeiting the notion of objectivity.

Prerequisites: 8 credits in women's studies or 8 credits in science courses or permission of instructor

*(Religion 323f (01))*

Mary Daly, Elisabeth Schussler Fiorenza, Phyllis Trible, and Naomi Goldenberg, among others, have argued that traditional Jewish and Christian theological systems have overlooked the needs, concerns, histories, and contributions of women. Their challenges range from the historical modification of a presumably unbiased religious system to the outright rejection of a so-called patriarchal establishment. Whatever their approach, feminist theologies offer diverse and incisive tools for understanding how a theological system operates, how transitory cultural assumptions become embedded in ongoing doctrines, and how apparently minor adjustments can have significant ripple effects.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

*(American Studies 301s (02), History 301s (03))*

Recent cultural histories of imperialism - European as well as U.S. - have illuminated the workings of race and gender at the heart of imperial encounters. This course will examine the United States' relationship to imperialism through the lens of such cultural histories. How did encounters between Native Americans and European colonizers, as lived and as remembered, call into play racial and gender identities? How have the legacies of slavery been entwined with U.S. imperial ambitions? How did racialized constructions of gender and sexuality shape the "American century?" And what can we learn from transnational approaches to "the intimacies of empire?"

*(Spring)* Interdisciplinary Seminar: Feminist Theory and Film

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

*(Speaking- and writing-intensive; English 385s)*
This seminar investigates contemporary feminist theory - including but not limited to feminist film theory - in relation to film. We will examine the influential formulations of the cinematic "male gaze" and woman's film, recent theorizations of race and sexuality in cinema, gender complexities in classic and contemporary Hollywood film, and new trends in filmmaking by women. Requirements include extensive readings, weekly essays, and film screenings.

Prerequisites: jr, sr, 8 credits in English and/or women's studies beyond English 101 and permission of instructor; Film Studies 201 and/or other background in film strongly recommended

Notes: 1 meeting (3 hours) plus evening screening; satisfies English department seminar requirement; previously offered as English 372

(Spring) Interdisciplinary Seminar: Feminist and Queer Theory
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Philosophy 350s (03))

Questions of power, agency, structure, materiality, bodies, subjectivities, and discursive practices have been central to both feminist and queer theories. We will focus on these issues, exploring the tension between poststructuralist, Marxist, and materialist approaches. In analyzing contemporary theories of gender and sexuality, we will pay particular attention to issues of race, class, ethnicity, nationality, and globalization. Key problematics include the nature and operation of power, the relationship between materiality and discourse, and the relationship between between theory and practice.

(Fall) Internship or Field Project
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Community-based learning course; Speaking-intensive)

This course, required for the major, presents an opportunity for students to apply feminist theory and to synthesize their work in women's studies. The connections between the academy and the community, and between scholarship and social action, are emphasized. Students either design their own field project or arrange for a placement at an agency, institution, or place of work that deals with the concerns of women. A weekly seminar with other students engaged in 390 work provides a structured setting in which to analyze these experiences and share works-in-progress. Frequent writing assignments are required.

African American and African Studies

(Fall) Introduction to African American and African Studies: Identity, Community, and Progress
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
In this introduction to the African American experience in twentieth-century America, historical, cultural, economic, political, and aesthetic elements of the urban African American experience are examined. Because of the interdisciplinary nature of African American studies, we consider methodological issues as they bear on the constitution of the African American subject, the descriptive edifices of the contemporary African American community, and programs for liberation.

(Spring) Luminous Darkness: African American Social Thought
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Examines the causes of and proposed solutions to "the Negro problem" in post-Civil War American social policy. Focuses on the life, work, and legacies of DuBois. Drawing on domestic and diasporic fictional and nonfictional depictions of black life in the "DuBoisian century" the course considers different responses to his 1903 question, "How does it feel to be a problem?" Review of theories and policies targeting blacks and their environment allows us to critique black modernity (as "exceptional" and/or "damaged"), assess the changing role of black intellectuals in society, evaluate "race theory" and consider dominant and marginal attempts to analyze and overcome the "color line" in America.

American Studies

AMST-201-01 - American Studies - 2003-2004
(Spring) Introduction to the Study of American Culture: Migrations, Borders, and Myths
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive)
Preamble (for topics courses): What is "America?" A country, region, continent, or a hemisphere of diverse nations in the New World? More than a geographical space, "America" has always been shaped by movement, by the migration of diverse peoples across and within its changing and contested borders. Migrations involve not only physical journeys but personal, cultural, and political transformations. Internal and external borders impede the movement of certain peoples while compelling or forcing the movement of others. This course will explore how these multiple migrations shape our collective identity. What are the cultural myths that unite Americans with such diverse experiences of migration and border crossing?
We will focus on specific historical examples of migration: early colonial encounters between Native Americans and Europeans; westward expansion and the flight from slavery in the nineteenth century; immigration both from abroad and from rural areas to cities in the twentieth century. Using films, literature, political documents, and visual images, we will explore the stories we have come to tell ourselves about the meaning of America and the movements of Americans, stories that continue to resonate with us today.
Notes: This course introduces students to a variety of approaches and perspectives by including classes by professors from different fields in the interdisciplinary American studies program. 2 meetings (75 minutes)

(Fall) Senior Seminar: Women's Camera Work
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Art History 342 (01))
In case studies, this seminar explores the directions women pushed photography in the twentieth century. How did women view and manage the proposals of early modernist photography? How did they interpret the social documentary? Was there a relationship between their access to the once-elitist profession of journalism and the kinds of pictures they were said to take? In addressing these and other questions, this seminar meditates on the art historical tools we use to answer them and is therefore also a seminar about theory and methods. Among key photographers to be studied are Lange, Modotti, and especially Arbus, who will be the subject of a major exhibition at our museum in the fall.

AMST-301-01 - American Studies - 2003-2004
(Spring) Identity and the Rise of Commodity Culture
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(English 377s)
In this course we will explore literature that deals with the rise of commodity culture and its impact on American ideas about selfhood and gender. Reading memoirs and novels from the 1880s through the 1920s, we will ask what sorts of "modern Americans" were imagined and constructed by national advertisers? Historical readings about the emergence and influence of the advertising industry will round out our investigation.

AMST-301-02 - American Studies - 2003-2004
(Fall) Senior Seminar: Environmental Justice, Literature and Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This seminar examines the importance of environmental justice activism and the racial, gendered, nationalistic, and class-based aspects of environmental policies and struggles to resist their harmful impacts. Readings include a selection of literature and film, critical texts, and interdisciplinary works that engage with ecofeminism, social ecology, ecofeminism and mainstream environmentalism. We explore the American context, examining histories, policies, and connections between activism and theory, as well as the relationship between literary studies, media influence and environmental epistemologies.

AMST-301-02 - American Studies - 2003-2004
(Spring) Senior Seminar: Literature and the Emotions in U.S. Culture and Context
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Is there a critical apparatus for understanding emotions in formations of identity? How is feeling important to conceptualizations of race, class, gender, and sexuality? This seminar examines feeling as a lens through which to read the expression and emergence of social identity. We articulate a theory of emotion by reading philosophical, psychological, and historical materialist accounts of feelings as shame, anger, and empathy. Reading narratives that focus on gender, sexuality, race, and class, we attend to how shame, anger, empathy, and other affects shape experience and critique structures of exploitation and oppression. Texts include works of Baldwin, Lorde, Nava, and Yamanaka.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
First-year seminar (Writing-intensive)
This is an introduction to cultural anthropology using the instructor's fieldwork at a temple for a Hindu Goddess in India. A major festival is held when the Goddess menstruates. Focusing on the cultures of the devotees, we delve into ethnocentrism, cultural relativity, methods, gender, kinship, social structure, economics, and religion. Students will work with field data and library materials to learn to provide a context for, and make sense of, another culture.

(Spring) Exploring Asian Americas - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
The concept of “Asian America” developed in the 1960s in conjunction with the broader civil rights movement. Since the 1960s, new migration has dramatically changed the composition of Asian America, and new theoretical perspectives challenge us to reexamine the concept itself. While a clear division between Asia and the U.S. was inherent in the original concept of Asian America, more recent theories of hybridity, diaspora, and transnationalism blur such clear-cut boundaries around national, ethnic, and racial formations. In this course, we will examine these empirical changes in migration and ethnic identification as well as the shifts in theoretical paradigms for understanding them.

(Spring) Anthropology of Modern Japan
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Asian Studies 204)
Intense economic relations and cultural exchange between Japan and the U.S. have not dispelled the image of Japanese society and culture as mysterious and fundamentally different from our own. In this course, we will read key texts in Japanese studies, some of which attempt to bridge this gap by presenting Japanese people as individuals with understandable motivations for their behavior, others of which attempt at a more general level to explicate underlying social structures, psychology, religion, and aesthetics. We will then turn to several more recent anthropological studies of different aspects of Japanese society.

(Fall) Economic Anthropology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking- and writing-intensive)
How are production, distribution, and consumption organized in human societies? How are these activities related to institutions such as the family, gender, religion, and government? This course introduces the major competing theoretical approaches: formalist (allocation of scarce resources to maximize specified ends); substantivist (economic institutions function in terms of culturally specific values); and Marxist (modes of production organize structures of exploitation). We will evaluate these approaches by reading case studies from specific societies.

(Spring) The Anthropology of International Development - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This course explores international economic development from an anthropological perspective. We examine theories used to explain development and underdevelopment, including modernization, globalization, and dependency theories as well as poststructural critiques of development discourse. Using case studies from Latin America, Africa, and elsewhere, we will examine intellectual and applied anthropological contributions to development issues and problems.
Prerequisites: Anthropology 105

(Spring) Language in Culture and Society - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Every society is held together by systems of interpersonal and institutional communication. This course examines the nature of communication codes, including those based on language (speaking and writing) and those based on visual images (art, advertising, television). To understand communication in its social and historical dimensions, we study the psychological and cultural impact of media revolutions and then look at ways communication systems manipulate individual consciousness. Illustrative examples are drawn from Western and non-Western societies.
Prerequisites: Anthropology 105
Notes: 1 meeting (3 hours)
Instructors: A. Lass

(Fall) Spirituality: Anthropological Perspectives
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
An anthropological inquiry into spiritual values and practices in selected societies, this course examines the ways in which worldviews influence social behavior and are themselves influenced by historical circumstances. Topics include the analysis of moral and ethical beliefs expressed in symbolic forms such as art, architecture, and ritual, as well as relations of power expressed in witchcraft and sorcery beliefs, and in sacred narratives and pilgrimages.

(January) Cultures of the Goddess in South Asia
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This course explores the culture of devotion to the divine feminine in South Asia. Using a variety of ethnographic sources, we look at human relations with the Goddess in her diverse guises including fierce and peaceful aspects, HIV and Smallpox Goddesses, androgynous Goddesses, and incarnate living Goddesses. Currently, Goddesses are worshipped in a variety of places: from temples to texts, from snake cults to sacrifices, from villages to cities, from television to comic books to the internet. We examine how South Asians relate to the Goddess and how worship provides a framework for making meaning, organizing the cosmos, and both reinforcing and undermining the social order.

(Fall) Medical Anthropology
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Biocultural aspects of disease and healing are examined through case studies of nonindustrialized societies, including the relationship between malaria and sickle cell anemia in West Africa and ritual cannibalism and a degenerative nervous-system disorder (kuru) in highland New Guinea. This course surveys the cultural construction of suffering and healing, the medicalization of human social problems, and inequities in the distribution of disease and therapy.

(Spring) Anthropology of Reproduction - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement (Women's Studies 333s (02))
This course covers major issues in the anthropology of reproduction, including the relationship between production and reproduction, the gendered division of labor, the state and reproductive policy, embodied metaphors of procreation and parenthood, fertility control and abortion, crosscultural reproductive ethics, and the social implications of new reproductive technologies. We examine the social construction of reproduction in a variety of cultural contexts.

(Fall) Visualizing Cultures - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
In this course we go behind the scenes and behind the screens of anthropological films, television, museum exhibitions, and publications such as National Geographic Magazine, to explore the social contexts of their production, distribution, and interpretation. We consider how popular images of cultural "others" reveal the lives and times that produce them, and how, as sites of cultural exchange and political debate, such images shape and are shaped by relations of power. Further, we consider the diversity of local responses to images of cultural identity and begin to explore the complexities of "picturing cultures" from different subject positions across the global mediascape.

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement (Speaking- and writing-intensive)
Preamble (for topics courses): This course covers significant problems in the field of anthropology, with group meetings and reports.
From the invention of the printing press to the Internet, the production and reproduction of information is mediated both by technology and by society, which introduces this technology and is, in turn, influenced by it. We will explore the scholarly debates that have emerged in the social studies of knowledge, science, and technology as we explore the role played by print literacy in the history of science, in the formation of identity, and in the development of the postmodern imagination.

(Fall) Special Topics in Anthropology: Globalization and Transnationalism
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement (Speaking-intensive)
Preamble (for topics courses): This course covers significant problems in the field of anthropology, with group meetings and reports.
A shift in economic, political, and cultural processes is pushing anthropology to extend the scope of its research beyond the local community and situate it within the world system. In this course, we will consider both the empirical changes in the world system as well as the paradigm shift in anthropological theory. We will search for elements in early anthropological theory on diffusion, exchange, and culture areas that foreshadowed some of the recent theory on globalization and
transnationalism, and in so doing, determine more precisely what is new about new theory. We will explore issues related to migration, culture contact, creolization, indigenization, and more.

(Spring) Special Topics in Anthropology: Kinship, Marriage, and the Family
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Preamble (for topics courses): This course covers significant problems in the field of anthropology, with group meetings and reports.
Kinship, marriage, and the family are cultural contexts (and constructs) within which the drama of human life takes shape. To make sense of these complexities, we begin with early anthropological studies and then move to present debates about the power of patrilines, the matrilineal puzzle, double descent, monogamy, polygyny, and polyandry. Grounded in dialogue with feminist scholarship and using cross-cultural ethnographic methods, we examine variations in families, kin systems, and marriage patterns as well as the force of these institutions on individuals. Topics include: marital power, strategies of resistance within families, love, families as they change, and the families we choose.

(Fall) Anthropology and Sexualities - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This seminar focuses on contemporary anthropological scholarship concerned with the varieties of sexual expression in diverse cultural settings. We will read ethnographic accounts of sexual ideologies and the politics and practices of sexuality in Brazil, Japan, Native North America, India, and elsewhere. We will examine anthropological theories of sexuality with an emphasis on contemporary issues, including performance theory, "third gender" theories, sexual identity formulation, and techniques used by various societies to discipline the body.
Prerequisites: sr or jr major in anthropology or women's studies plus 8 credits in department
Notes: 1 meeting (3 hours)
Instructors: L. Morgan

(Spring) Anthropology of History - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking- and writing-intensive)
In this seminar we question the distinction between myth and history and consider the relationship of historical consciousness to memory, forgetting, and other types of temporal awareness. We then examine the relationships among literacy, art, nationalism, and the invention of tradition and the limits of ethnohistory. Finally, we look at the ways in which relics, museums, and tourism have all helped make history - as fact, experience, or commodity - possible.

(Spring) Bringing It All Back Home: Anthropology of Contemporary United States and Britain - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Anthropologists are increasingly recognizing the epistemological and political difficulties of regarding non-Western peoples as "others" - as objects for social scientific consumption. Some have responded by focusing attention on their own sociocultural circumstances. This course examines both the theoretical basis of the anthropological turn from "exotic" fieldwork and the results of the new research about the United States. Topics include youth subcultures, class, race, and suburban and inner-city lives.

(Fall) Introductory Seminar in Art History: Art and Cultural Politics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Speaking-intensive)
The seminar explores the roles that art has played in politics from antiquity to the present, paying special attention to war booty and the ongoing struggles over cultural property. We will consider the current debate about public and private ownership of ancient and foreign art, and the ways it assumes status as a bearer of cultural values. The purposeful destruction and effacement of monuments will be a focus. The class will also join other seminars in the Weissman Centers Pontigny program.
Prerequisites: fy or permission of instructor
Notes: 2 meetings (75 minutes); limited enrollment.
Instructors: B. Bergmann

ARTH-110-01 - Art History - 2003-2004
(Fall) Introductory Seminar in Art History: Art, Architecture, and Exile
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar
This course studies the emigration of European artists and architects to the United States in the 1930s and 1940s as a result of persecution from Nazi Germany. We will examine the material effects of exile in the work of Salvador Dali, Marcel Duchamp, Walter Gropius, Mies van der Rohe, Marcel Breuer, Louise Bourgeois, and others, and consider the effects of their work on American art and architecture to the present.
Prerequisites: fy or permission of instructor
Notes: 2 meetings (75 minutes); enrollment limited; Members of this course will participate in joint sessions related to the Pontigny series sponsored by the Weissman Center for Leadership.
Instructors: K. Koehler

ARTH-110-01 - Art History - 2003-2004
(Spring) Introductory Seminar in Art History: Art across the Border
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Speaking-intensive)
This seminar explores the remarkable artistic dialogue between Mexicans and Americans in the early twentieth century. The exchange of ideas and movement across the border brought about some of the most provocative, challenging, and beloved paintings and photographs in the history of modern art. Among the major figures to be studied are Kahlo, Modotti, Orozco, Rivera, and Weston.
Prerequisites: fy or permission of instructor
Notes: 2 meetings (75 minutes); enrollment limited
Instructors: A. Lee

ARTH-110-02 - Art History - 2003-2004
(Spring) Introductory Seminar in Art History: The Persistence of Classicism
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement (Speaking-intensive)
The classical style is the most enduring idiom in the history of Western art. The seminar will examine the ancient origins of classicism as well as its later manifestations during the medieval, Renaissance, and modern periods. Architecture, sculpture, painting, and popular media will be included. Special attention will be paid to the cultural motives that prompted the survival or revival of these forms throughout the ages.
Prerequisites: fy or permission of instructor
Notes: 2 meetings (75 minutes); enrollment limited
Instructors: J. Varriano

ARTH-206-01 - Art History - 2003-2004
(January) Architecture in the Public Realm
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Architecture exists at several scales. Sometimes an architect is faced with designing very small structures, which they can treat like individual objects in space, the aesthetics and organization of which may be designed through an interpretation of the client’s wishes and needs. But as a designer is presented with projects of larger and larger size, more issues of context and the wishes and needs of a greater and more diverse constituency come into play. Architecture leaves the realm of the more purely individualized and intimate and enters the decidedly extroverted public realm (although even in the public realm one could argue for a need for private and intimate places).
Notes: Meetings will be held M,W,F from 1 - 4 PM.
Instructors: K. Makker
Expected enrollment: 12

ARTH-211-01 - Art History - 2003-2004
(Spring) Gods and Mortals: Myth in Ancient Art and Literature
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement (Classics 211)
Many ancient images tell completely different versions of myth from those portrayed in Greek and Roman literary sources. By juxtaposing distinctive modes of communication in the ancient world, students will analyze the rhetorical uses of myth, both then and now. Students will also examine the range of possibilities for translating and interpreting text and image, which will alert them to the vitality of myth as a language of its own, transcending historical parameters.
Notes: 2 meetings (75 minutes)
Instructors: B. Bergmann, P. Debnar

(Fall) The Hellenistic World: From Alexander to Cleopatra - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Hellenistic art has often been regarded as a chaotic, decadent phase between the golden ages of classical Athens and imperial Rome. In fact, the period in the Mediterranean from the death of Alexander the Great in 323 B.C.E. to the Roman conquest of Egypt in 31 B.C.E. saw the creation of some of the greatest masterpieces of ancient art. The course addresses the new themes and purposes of art in a cosmopolitan culture with its competing centers (Pergamon, Rhodes, Antioch, Alexandria, and Rome); its private patrons, public museums, art historians, and critics; and its innovations in science and politics.
Prerequisites: soph, jr, sr, or permission of the instructor
Notes: 2 meetings (75 minutes)
Instructors: B. Bergmann

ARTH-216-01 - Art History - 2003-2004
(Spring) Art and Spectacle in Ancient Rome - *Not offered this year/term
Much of Roman art and architecture was created to enhance and commemorate religious, political, and social rituals. The course explores themes of triumph, marriage, death, and sport by discussing buildings and objects within their public and private contexts of action. Beginning with Rome's legendary origins in the eighth century B.C.E. and ending with its demise as a capital in the fourth century C.E., the course focuses on an especially creative period, the formation of the empire under Augustus.

Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: B. Bergmann

ARTH-222-01 - Art History - 2003-2004
(Spring) Age of the Cathedrals: The Art of Gothic Europe, 1100-1500
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A historical survey of the architecture, monumental sculpture, and painting of France, England, Germany, and Italy. The course concentrates on the cathedral as a total work of art, on the meaning of its imagery, and on the role of art in contemporary society.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: M. Davis

ARTH-230-01 - Art History - 2003-2004
(Fall) Italian Renaissance Art
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This survey explores the development of painting, sculpture, and architecture in fifteenth- and sixteenth-century Italy with emphasis on Florence, Rome, and Venice as discrete cultural contexts for the work of Botticelli, Leonardo, Raphael, Michelangelo, and Titian.
Prerequisites: soph, jr, sr, or with permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: J. Varriano

ARTH-234-01 - Art History - 2003-2004
(Spring) Baroque and Rococo Art in Southern Europe
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This survey of seventeenth- and eighteenth-century art in Italy and Spain treats the major stylistic and thematic developments in painting, sculpture, and, to a lesser extent, architecture. Special emphasis is given to the vivid naturalism of Caravaggio and Velazquez, the refined classicism of the Carracci, and the impassioned manner of Bernini. Attention is also given to the different cultural contexts in which the works of art were first created and are now interpreted.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: J. Varriano

ARTH-235-01 - Art History - 2003-2004
(Spring) Baroque and Rococo Art in Northern Europe - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This survey of seventeenth- and early eighteenth-century art in Holland, Flanders, and France emphasizes the way in which widely divergent religious practices and governmental institutions affected the making of art in those countries. Rembrandt, Hals, Vermeer, Rubens, Van Dyck, and Poussin are among the artists discussed.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: J. Varriano

ARTH-241-01 - Art History - 2003-2004
(Fall) Nineteenth-Century European Art: Neoclassicism to Impressionism
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course traces major developments in European art during the periods traditionally designated by the terms neoclassicism, romanticism, realism, and impressionism. Focusing primarily on French art, but branching out to consider the art of England and Spain, it explores the key artistic themes of the century: the engagement with history, the rise of nationhood, the experience of the urban, the Marxist proposal, the grappling with modernity, the dealing in individual temperaments. Among the major figures to be studied are Constable, Courbet, David, Delacroix, Goya, Ingres, Manet, Monet, and Renoir.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: A. Lee

**ARTH-242-01 - Art History - 2003-2004**
**Spring** History of Photography - *Not offered this year/term*
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This survey course traces the rise and development of photography in the United States and, to a lesser extent, Mexico and the countries in Western Europe. It charts the wide range of work with the camera, including commercial, so-called "vernacular," and fine art projects, and considers pictures from photography's very beginnings in the mid-nineteenth century to today's practices. Among the major figures to be discussed are the early landscape photographers O'Sullivan and Watkins, the avant-garde photographers Steiglitz and Genthe, the Depression-era photographers Evans and Lange, and the so-called New Documentarians Arbus and Frank.
Prerequisites: soph, jr, sr, or permission of instructor
Instructors: A. Lee

**ARTH-243-01 - Art History - 2003-2004**
**Fall** Building the Modern Environment: Architecture 1890-1990
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
An exploration of major movements and personalities in architecture from the late nineteenth century to the present. Emphasizing the United States against the background of European developments, the course considers the search by architects, including Frank Lloyd Wright, Le Corbusier, and Frank Gehry, for a language of form and space that captures the contemporary spirit as it elevates society to a higher plane of existence. Discussion focuses on issues of technology and utopia, the skyscraper, and the collision of tradition, modernity, and postmodernism in architecture since 1945.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 3 meetings (50 minutes)
Instructors: M. Davis

**ARTH-244-01 - Art History - 2003-2004**
**Fall** Modern Art: 1885-1945 - *Not offered this year/term*
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course examines the great ruptures in European art that today we call modernist. It relates aspects of that art to the equally great transformations in European society: revolutionary ferment, the rise and consolidation of industrial capitalism, colonization and its discontents, and world war. Among the major figures to be studied are Duchamp, Matisse, Malevich, Picasso, Seurat, and van Gogh.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: A. Lee

**ARTH-245-01 - Art History - 2003-2004**
**Spring** Contemporary Art
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course traces the different paths of painting, sculpture, and photography in the United States and, less so, Western Europe since World War II. Initially, most of these paths traced a relationship with the "crisis of modernism," but increasingly, they have taken on a different vitality, drawing energy from a wide variety of postmodern and postcolonial subjects and debates: identity politics, transnationalism, diaspora. Can something that can be identified as an avant-garde practice exist in such a context? What kinds of questions are appropriate to ask about works that stridently attempt to suspend the very category of art?
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: A. Lee

**ARTH-250-01 - Art History - 2003-2004**
**Fall** American Painting
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This survey of eighteenth-, nineteenth-, and early twentieth-century art emphasizes the work of individual artists and the cultural environments in which art was produced and viewed. Topics include the colonial portrait, landscape painting, images of American life, impressionism, expatriatism,
modernism, and the machine age. Copley, Cole, Church, Eakins, Homer, Whistler, Sargent, Cassatt, O'Keeffe, and Hopper are some of the artists to be discussed.

Prerequisites: soph, jr, sr, or permission of instructor

*(Spring)* American Architecture and Design - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This course surveys architecture from the Colonial period to the late twentieth century. It introduces students to period styles and building types (domestic, religious, government, corporate, retail, museum, collegiate, etc.) and it also investigates ways of looking at and thinking about American architecture as material expression of social, political, and cultural ideas. Toward that end, we will touch on a number of interrelated design issues in furniture, silver, textiles and costume, as well as landscape architecture and urban and suburban development.

Prerequisites: soph, jr, sr, or permission of instructor

**ARTH-290-01** - Art History - 2003-2004

*(Fall)* Issues in Art History: Coffee, Tea and Chocolate: Culture and Design

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): This course is designed to broaden the traditional boundaries of a survey of a single period by concentrating on an important theme or issue that does not necessarily fit into the chronological subdivisions of art history. All aspects of the topic are studied, and the literature and methods of other disciplines are invoked wherever relevant. Attention is paid to art history as a present-day construction and to the students' critical self-awareness.
An exploration of how objects, images, and spaces have shaped the cultural meanings of three substances with complex histories. Focusing on Europe and America between the 18th and 20th centuries, and drawing upon an interdisciplinary range of textual sources, we will examine paintings and tableware, advertising and packaging, sites such as the coffeehouse, and social practices such as tea parties. We will also consider the interpretive challenges posed by modes of representation traditionally marginalized in art-historical studies, such as decorative art and graphic design. Special attention will be given to works in the collections of the Mount Holyoke College Art Museum.

Prerequisites: soph, jr, sr, or permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: M. Hellman

(Spring) Issues in Art History: Talking Pictures
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): This course is designed to broaden the traditional boundaries of a survey of a single period by concentrating on an important theme or issue that does not necessarily fit into the chronological subdivisions of art history. All aspects of the topic are studied, and the literature and methods of other disciplines are invoked wherever relevant. Attention is paid to art history as a present-day construction and to the students' critical self-awareness.

An introduction to film as a visual art. The best films of the past century have commanded our attention and imagination in part because of their artistry and the way they tell stories visually. This course closely examines a selection of those films from around the world that can be considered serious art. Among them are Broken Blossoms, Battleship Potemkin, Citizen Kane, La Môme, The Bicycle Thief, Days of Heaven, Ugetsu, Woman in the Dunes, The Marriage of Maria Braun, and Rear Window.

Prerequisites: soph, jr, sr, or permission of instructor

(Spring) Issues in Art History: Architecture and the Built Environment
Credits/PE Units: 2; Requirements met: Meets Humanities I-A requirement

Preamble (for topics courses): This course is designed to broaden the traditional boundaries of a survey of a single period by concentrating on an important theme or issue that does not necessarily fit into the chronological subdivisions of art history. All aspects of the topic are studied, and the literature and methods of other disciplines are invoked wherever relevant. Attention is paid to art history as a present-day construction and to the students' critical self-awareness.

Just as architecture reflects the confluence of cultural, environmental, political, social, and economic forces, the critical study and practice of architecture must become a multi-disciplinary arena of learning. This experimental seminar will explore current issues in the art, history, and science of architecture and the built environment through reading, writing, and design. Discussions will include visiting scholars and critics as we consider the dynamic possibilities for architectural studies in a liberal arts context.

Notes: 1 meeting (3 hours) every other Friday beginning on Friday, January 30, 2004.

Instructors: K. Koehler, M. Davis

ARTH-300-01 - Art History - 2003-2004
(Fall) Seminar: Theory and Interpretation - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

The seminar explores the intellectual discipline of art history and closely examines the methods used for analyzing the visual arts across
cultures and periods. The course is intended for upper-level students with a strong interest in art history and visual culture. Class discussions and research papers will challenge students to explore various scholarly approaches to art as well as analyze the relationship of the arts to social and cultural theories, gender discourses, and postmodern critiques of visual culture.

Prerequisites: 8 credits in department or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: The department
Expected enrollment: 12

ARTH-301-01 - Art History - 2003-2004
(Fall) Topics in Art History: Exhibiting the Female Athlete
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Students enrolled in this class will participate in all aspects of organizing an exhibition scheduled to be on view at the Mount Holyoke College Art Museum in the spring of 2004. Focusing on images of the sporting woman in American culture, the exhibition will present a rich array of visual materials including prints, photographs, and paintings that document the social history of women's participation in exercise and sport, from the mid-nineteenth century to the present. Clothing for sport and physical education, a rich site for examining sexual and cultural identity, will also be included in the installation.
Prerequisites: jr, sr, 8 credits in department, or permission of instructor
Notes: 2 meetings (75 min); Limited enrollment
Instructors: M. Doezema

ARTH-301-02 - Art History - 2003-2004
(Fall) Topics in Art History: The Stroke of Genius: Drawings of the Old Masters
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This seminar will examine the role of drawing in Renaissance and Baroque art. Working as much as possible with drawings in our own museum, we will consider the issues of technique, function, expressive effect, and audience as essential elements of a medium that was central to studio practice in northern and southern Europe during the fifteenth to eighteenth centuries.
Prerequisites: 8 credits in art history including 230 or 234 or 235, or permission of instructor
Notes: 1 meeting (3 hours); limited enrollment
Instructors: J. Varriano

ARTH-310-01 - Art History - 2003-2004
(Spring) Seminar in Ancient Art: The Unearthed Cities of Vesuvian
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Life on the Bay of Naples came to an abrupt halt in 79 when Vesuvius erupted, covering the surrounding sites and villas with lava and ash. The rediscovery of Pompeii and Herculaneum in the eighteenth century had a significant impact upon European art, extending the Grand Tour to the Bay and generating new styles in fashion and the decorative arts. The seminar examines the surviving art, architecture, and gardens created to the tastes of Roman citizens in the late republic and early empire. It considers the history of archaeological and art historical methods that shaped our knowledge of the Roman past and inspired recreations in art, theatre, and film to the present.
Prerequisites: some knowledge of ancient culture and/or European art of the eighteenth and nineteenth centuries or permission of the instructor
Notes: 1 meeting (3 hours); Limited enrollment
Instructors: B. Bergmann

ARTH-332-01 - Art History - 2003-2004

(Fall) Images of Landscape: Sprawl Nation: Route 9 to Rome - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): The seminar treats landscapes as cultural products, primarily involving art history, but also literature and social history, with close study of the landscapes via photographs and topographical accounts.
Notes: 1 meeting (3 hours)
Instructors: The department

**ARTH-342-01** - Art History - 2003-2004
(Fall) Seminar in Twentieth-Century Art: Women's Camera Work
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
In case studies, this seminar explores the directions women pushed photography in the twentieth century. How did women view and manage the proposals of early modernist photography? How did they interpret the social documentary? Was there a relationship between their access to the once-elitist profession of journalism and the kinds of pictures they were said to take? In addition to addressing these and other questions, this seminar meditates on the art historical tools we use to answer them, and is therefore a seminar about theory and methods. Among key photographers studied are Lange, Modotti, and especially Arbus, who will be the subject of a major exhibition at our museum in the fall.
Prerequisites: jr, sr, 8 credits in department, a written application (available in the art department office) and permission of the instructor
Notes: 1 meeting (3 hours); Limited enrollment
Instructors: A. Lee

**ARTH-350-01** - Art History - 2003-2004
(Spring) Seminar in American Art: The Gilded Age
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course examines American art, architecture, and culture from the Gilded Age, that began with the Centennial Exposition (1876) and ended with the Chicago World's Fair (1893), to the beginning of the Progressive Era and the Armory Show (1913). Classes will be thematic and might be described in method as a cultural history of American art. Paintings and architecture will be linked up with ideas, trends, movements, events, persons, and novels of the period.
Prerequisites: jr, sr, 8 credits in art history or film studies, or permission of instructor
Notes: 1 meeting (3 hours), Enrollment limited.
Instructors: P. Staiti

**ARTH-350-01** - Art History - 2003-2004
(Spring) Seminar in American Art: The Hollywood Film - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
American feature-length, dramatic films from the silent era to the present. There will be readings on and extensive class discussions of ten commercial films, including Sunset Boulevard, It's a Wonderful Life, Vertigo, Touch of Evil, Blade Runner, Do the Right Thing, and Unforgiven.
Prerequisites: jr, sr, 8 credits in art history or film studies, or permission of instructor
Notes: 1 meeting (3 hours), 1 screening (2 hours); Enrollment limited.
Instructors: P. Staiti

(Fall) Seminar in Asian Art: Visual Cultures of South Asia
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Asian Studies 360F (01))
The seminar is designed as a series of case studies for understanding the social life of visual images in South Asia. Our central problem will be to develop an analytical vocabulary to describe making, seeing, disfiguring, and reproducing visual and material things as modes of history. Student-led discussions and research papers will explore topics ranging from the making and breaking of stone monuments in ancient (and modern) periods to the magical realism of such modern media as photography, mass-produced calendar prints, and commercial cinema.
Prerequisites: jr, sr, or permission of instructor; 8 credits in art history, Asian studies, or film studies, or permission of instructor
Notes: 1 meeting (3 hours), occasional screenings
Instructors: A. Sinha
Expected enrollment: 15

**ARTH-360-01** - Art History - 2003-2004
(Spring) Seminar in Asian Art: Indian Films
The seminar will examine a selection of films in relation to India's urban culture in the twentieth century. We will screen old and new films, those belonging to the commercial industry - the Bollywood - and those made by directors who remain outside that industry. Our challenge will be to develop possible ways to understand the many facets of film culture in India. Using critical essays, class discussions, and research, we will explore the relationship of film to national politics, examine the global circulation of Indian films, analyze how films reflect the desires and fantasies of their audiences, and evaluate India's place in the history of world cinema.

Prerequisites: jr, sr, or permission of instructor; 8 credits in art (history) or film studies, including Film Studies 201 or permission of instructor

Notes: 1 meeting (3 hours), 1 screening (2 1/2 hours)

Instructors: A. Sinha

Expected enrollment: 15

ARTH-395-01 - Art History - 2003-2004

(Fall) Independent Study

Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement.

(Writing-intensive)

A student may undertake independent study in any of the following fields: American, Asian, European, Classical, Near Eastern, or Islamic art. She must have a minimum B+ average in art history courses, must receive permission from her project adviser, and consult guidelines available in the art department office. A student undertaking a two-semester independent study project (Art History 395) should be aware that only 4 credits will be applied to her major requirements. Thus, in addition to two 395 courses, she must enroll in two 300-level seminars.

Prerequisites: jr, sr, and permission of department

Introduction to Sanskrit, the classical language of India. Related to other Indo-European languages (including English) and the ancestor of most of the 16 major Indian languages (e.g., Hindi), Sanskrit is the medium of the literary classics, as well as of the texts of the Hindu, Buddhist, and Jain religions. The first-semester course covers Sanskrit grammar. The emphasis is on sentence construction, recognition and production of grammatical forms, and translation. Attention is also given to script, chanting, and pronunciation. The goal is proficiency in reading sentences and sustained passages in Sanskrit, in preparation for reading authentic texts in the second semester.
Notes: 3 meetings (75 minutes); credit is contingent upon completion of both the first and second semesters.

Credits/PE Units: 4; Requirements met: Meets Language requirement; does not meet a distribution requirement
This course helps students attain higher level of proficiency in modern Japanese through the extended use of the language in practical contexts. The class will be conducted mostly in Japanese.
Prerequisites: Asian 223s or equivalent
Notes: 3 meetings (50 minutes)
Instructors: The department
Expected enrollment: 15

ASIAN-326-01 - Asian Studies - 2003-2004
(Spring) Third-Year Japanese II
Credits/PE Units: 4; Requirements met: Meets Language requirement; does not meet a distribution requirement
This course helps students attain higher level of proficiency in modern Japanese through the extended use of the language in practical contexts. The class will be conducted mostly in Japanese.
Prerequisites: Asian 324f or equivalent
Notes: 3 meetings (50 minutes)
Instructors: The department
Expected enrollment: 15

ASIAN-331-02 - Asian Studies - 2003-2004
(Spring) Asian History: The Japanese Empire, 1868-1945
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(History 331)
Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.
Prerequisites: written application and permission of instructor
Notes: 1 meeting (3 hours)
Instructors: J. Lipman
Expected enrollment: 15

ASIAN-331-04 - Asian Studies - 2003-2004
(Spring) Asian History: Greater China: Development and Transformation in the Twentieth Century - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(History 331s (03))
Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.

(Fall) Just War and Jihad: Comparative Ethics of War and Peace - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(International Relations 333f; Politics 337f)

ASIAN-341-01 - Asian Studies - 2003-2004
(Fall) Political Islam - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(International Relations 341f; Politics 341f)

ASIAN-360-01 - Asian Studies - 2003-2004
(Fall) Seminar in Asian Art: Indian Films
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Art History 360s (01))

ASIAN-373-01 - Asian Studies - 2003-2004
(Spring) Colonialism and Culture in British India - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This course examines the relationship between British representations of and responses to Indian culture and the consolidation of British colonial hegemony in India (eighteenth through twentieth centuries). Exploration of cultural dimensions of colonial discourse through selected case studies of an interdisciplinary nature, focusing on British attitudes toward Indian women and religion, Indian literature and art, and social institutions such as caste and suttee. Visual and verbal texts from British fiction, scholarly essays, textbooks, and official documents. Critical readings, including James Mill's *History of India*, Orientalist translations, and Rudyard Kipling's short stories.
Notes: 2 meetings (75 minutes)
Instructors: I. Peterson

(Fall) Independent Study
Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement
Instructors: The department.

(Spring) Independent Study
Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement

Astronomy

(Fall) Concepts of Astronomy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Students explore the contents, temporal and spatial scale, and history of the universe.
The laboratory is devoted to observations: constellation study; solar, lunar, and planetary phenomena; and visual and photographic observations with small telescopes.
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes), and 1 lab (3 hours); next offered 2004-2005; students are encouraged to take Interdepartmental 142 and 242 in its place
Instructors: The department
Section Instructors: 01 LAB | 02 LAB | 03 LAB | 04 LAB | 05 LAB |

ASTR-137-01 - Astronomy - 2003-2004  
(Fall) The Sky  
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.  
A lab/tutorial introduction to observing and understanding the extraterrestrial sky. Daily and annual motions of the sun, moon, planets and stars; celestial coordinate systems; apparent brightnesses and colors of the stars; time; calendars. Observations at the Williston Observatory with the unaided eye, visually with the eight-inch telescope, and by electronic camera with computer-controlled telescopes.  
Notes: 1 meeting (90 minutes); additional lab by arrangement. Primary work of the course will be done in observing sessions arranged on an ad hoc basis  
Instructors: T. Dennis, R. Zissell

ASTR-142-01 - Astronomy - 2003-2004  
(Fall) Light, the Universe, and Everything  
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement  
(Interdepartmental Courses 142f)

(Spring) History of Astronomy - *Not offered this year/term  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
This course looks at astronomy and cosmology from earliest times - Egyptian, Babylonian, Greek, Islamic; the medieval universe; Newtonian universe; mechanistic universe of the eighteenth and nineteenth centuries; gravitational theory; origin, structure, and evolution of stars and galaxies; developments in modern astronomy. Nontechnical, with emphasis on history and cosmology.  
Notes: 2 meetings (75 minutes)  
Instructors: The department

ASTR-220-01 - Astronomy - 2003-2004  
(Spring) Topics in Astronomy: Astronomy and Public Policy  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
Astronomical issues that impact our society will be explored in a seminar format. The approach for each issue will be to pose a question based on a body of scientific evidence with potential consequences for human society. The answers to these questions will be investigated both on scientific and societal grounds. Scientific issues include the potential threat of collisions between the earth and other solar system bodies and the potential existence of extraterrestrial life.  
Prerequisites: one course in a physical science, permission of instructor  
Notes: offered at Smith College  
Instructors: S. Hameed

ASTR-223-01 - Astronomy - 2003-2004  
(Fall) Planetary Science  
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement  
(Geology 223f)  
An introductory course for physical science minors and majors. Topics include origin and evolution of the planets; planetary orbits, rotation, and precession; gravitational and tidal interactions; asteroids, comets, and planetary rings; meteorites; interiors and atmospheres of the Jovian and terrestrial planets; geology, tectonics, and mineralogy of the terrestrial planets and satellites; new data from Mars Pathfinder, Lunar Surveyor, and current NASA missions.  
Prerequisites: any physical science course  
Notes: 2 meetings (75 minutes); offered at UMass fall 2003
ASTR-223-01 - Astronomy - 2003-2004
(Spring) Planetary Science - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Geology 223fs)
An introductory course for physical science minors and majors. Prerequisites: any physical science course
Notes: 2 meetings (75 minutes)
Instructors: The department

ASTR-224-01 - Astronomy - 2003-2004
(Fall) Stellar Astronomy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The basic observational properties of stars will be explored in an experimental format relying on both telescopic observations and computer programming exercises. No previous computer programming experience is required.
Prerequisites: Physics 115, Mathematics 101 or equivalent
Notes: 2 meetings (2 hours, 45 minutes)
Instructors: The department

ASTR-224-01 - Astronomy - 2003-2004
(Spring) Stellar Astronomy
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The basic observational properties of stars will be explored in an experimental format relying on both telescopic observations and computer programming exercises. No previous computer programming experience is required.
Prerequisites: Physics 115, Mathematics 101 or equivalent
Notes: 2 meetings (2 hours, 45 minutes)/Classes will be held at Smith
Instructors: S. Edwards

ASTR-225-01 - Astronomy - 2003-2004
(Spring) Galactic and Extragalactic Astronomy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The basic observational properties of galaxies are explored in an experimental format relying on both telescopic observations and computer programming exercises. No previous computer experience is required.
Prerequisites: Physics 115, Mathematics 101 or equivalent
Notes: 2 meetings (2 hours, 30 minutes)
Instructors: S. Edwards

ASTR-226-01 - Astronomy - 2003-2004
(Fall) Cosmology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course looks at cosmological models and the relationship between models and observable parameters. Topics in current astronomy that bear upon cosmological problems, including background electromagnetic radiation, nucleosynthesis, dating methods, determinations of the mean density of the universe and the Hubble constant, and tests of gravitational theories. Discussion of some questions concerning the foundations of cosmology and its future as a science.
Prerequisites: Mathematics 101 and a physical science course
Notes: 2 meetings (75 minutes)
Instructors: The department

ASTR-226-01 - Astronomy - 2003-2004
(Spring) Cosmology
(Spring) The Sky II
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Continuation of 137, concentrating on electronic imaging of celestial objects. Activities will include electronic photography with the Williston Observatory telescopes, and processing and interpretation of the resulting images. Subjects will include planets, variable stars, star clusters, nebulae, and galaxies.
Prerequisites: Astronomy 137
Notes: 1 meeting (90 minutes); additional lab by arrangement. Most work of the course will be done in evening lab and observing sessions arranged on an ad hoc basis.
Meeting time for Spring 2004: M. 7-8:30 pm at Williston Observatory, lab to be arranged.
Instructors: T. Dennis, R. Zissell

ASTR-242-01 - Astronomy - 2003-2004
(Spring) Light, the Universe, and Everything - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement (Interdepartmental Courses 242s)

ASTR-243-01 - Astronomy - 2003-2004
(Fall) Stars: Time and Transformation in the Universe
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement (Writing-intensive)
Gravity, falling, and orbits; gravitational and kinetic energy; orbital mechanics in star clusters and space craft; gravitational collapse and the Kelvin timescale; black holes; nuclear and atomic binding energy; chemical abundances in the universe; nuclear burning in stars and its timescale; history of the chemical elements; life histories of stars; stars as distance indicators; cosmological distance scale; expansion of the universe; cosmological timescale; narrative history of the universe
Prerequisites: I 142 or 4 admission units in math and permission of instructor
Notes: 2 meetings (75 minutes), 1 evening lab (2 hours)
Instructors: T. Dennis

ASTR-295-01 - Astronomy - 2003-2004
(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph
Instructors: The department.

ASTR-295-01 - Astronomy - 2003-2004

Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph
Instructors: The department.

ASTR-335-01 - Astronomy - 2003-2004
(Fall) Modern Astrophysics
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

How do astronomers determine the nature and extent of the universe? Following the theme of the "Cosmic Distance Ladder," we explore how our understanding of astrophysics allows us to evaluate the size of the observable universe. We begin with direct distance determinations in the solar system and nearby stars. We then move on to spectroscopic distances of stars; star counts and the structure of our galaxy; Cepheid variables and the distances of galaxies; the Hubble Law and large-scale structure in the universe; quasars and the Lyman-alpha forest.

Prerequisites: Physics 115 and one prior physics or astronomy course at the 200 level or above

Notes: 2 meetings (90 minutes); offered at UMass in fall 2003, MW 2:30 - 3:45

Instructors: G. Wilson

**ASTR-335-01** - Astronomy - 2003-2004

**ASTR-337-01** - Astronomy - 2003-2004

(Spring) Observational Techniques in Infrared and Optical Astronomy

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

An introduction to the techniques of gathering and analyzing astronomical data, particularly in the optical and infrared. Telescope design and optics; instrumentation for imaging, photometry, and spectroscopy; astronomical detectors; computer graphics and image processing; error analysis and curve fitting; data analysis and astrophysical interpretation, emphasizing globular clusters.

Prerequisites: Astronomy 224, 225, Physics 216

Notes: 2 meetings (75 minutes), 1 evening lab (3 hours) Classes will be held at UMass

Instructors: R. Finn

**ASTR-338-01** - Astronomy - 2003-2004

(Spring) Techniques of Radio Astronomy - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

An introduction to radio astronomy equipment, techniques, and the nature of cosmic radio sources. Radio receiver and antenna theory; radio flux, brightness temperature, and the transfer of radio radiation in cosmic sources; effect of noise, sensitivity, bandwidth, and antenna efficiency; techniques of beam switching, interferometry, and aperture synthesis; basic types of radio astronomical sources: ionized plasmas, masers, recombination and hyperfine transitions; nonthermal sources; applications to the sun, interstellar clouds, and extragalactic objects.

Prerequisites: two semesters of physics and two semesters of calculus

Notes: 2 meetings (75 minutes) and observation sessions

Instructors: The department

**ASTR-351-01** - Astronomy - 2003-2004

(Fall) Astrophysics I: Stars and Stellar Evolution - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

This course looks at physical principles governing the properties of stars, their formation and evolution: radiation laws and the determination of stellar temperatures and luminosities; Newton's laws and the determination of stellar masses; hydrostatic equilibrium and the thermodynamics of gas and radiation; nuclear fusion and stellar energy generation; physics of degenerate matter and the evolution of stars to white dwarfs, neutron stars, or black holes; nucleosynthesis in supernova explosions; dynamics of mass transfer in binary systems; viscous accretion disks in star formation and X-ray binaries.

Prerequisites: two 300-level Physics courses

Notes: 3 meetings (80 minutes)

Instructors: The department

**ASTR-352-01** - Astronomy - 2003-2004

(Spring) Astrophysics II: Galaxies

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course applies physics to the understanding of astronomical phenomena. Physical processes in the gaseous interstellar medium; photoionization in HII regions and planetary nebulae; shocks in supernova remnants and stellar jets; energy balance in molecular clouds. Dynamics of stellar systems; star clusters and the virial theorem; galaxy rotation and the presence of dark matter in the universe; spiral density waves. Quasars and active galactic nuclei: synchrotron radiation; accretion disks, supermassive black holes.

Prerequisites: two 300-level physics courses
Notes: 2 meetings (75 minutes), Classes will be held at UMass.
Instructors: J. Lowenthal

ASTR-395-01 - Astronomy - 2003-2004

Biochemistry

(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Independent work in biochemistry can be conducted with any member of the biochemistry committee and, upon approval, also with other members of the biological sciences and chemistry departments.
Notes: Students conducting an independent lab research project for credit in a department, program, or lab covered by the College's chemical hygiene plan must participate in a safety training session before beginning research; credit will not be granted to students who do not receive safety training
Instructors: The department.

BIOCH-311-01 - Biochemistry - 2003-2004
(Fall) Protein Biochemistry and Cellular Metabolism
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
[Biological Sciences 311f; Chemistry 311f]
This course is a rigorous introduction to the study of protein molecules and their role as catalysts in the cell. Topics include general principles of protein folding, protein structure-function correlation, enzyme kinetics and mechanism, carbohydrate and lipid biochemistry, and metabolic pathways (catabolic and anabolic) and their interaction and cross-regulation. Biological transformation of energy is considered in light of the principles of thermodynamics.
Prerequisites: Biological Sciences 210 (can be taken concurrently), Chemistry 302
Notes: 3 meetings (75 minutes), 1 lab (4 hours)
Instructors: L. Hsu

(Spring) Nucleic Acids Biochemistry and Molecular Biology
This course is an in-depth examination of DNA and RNA structures and how these structures support their respective functions during replication, transcription, and translation of the genetic material. Emphasis is on the detailed mechanisms associated with each step of gene expression. Discussions incorporate many recent advances brought about by recombinant DNA technology.

Prerequisites: Biological Sciences 210, Chemistry 302, Biochemistry 311, or permission of instructor

Notes: 3 meetings (75 minutes), 1 lab (4 hours)

Instructors: L. Hsu

Section Instructors: 01 LAB L Hsu | 02 LAB L Hsu |

(Spring) Topics in Biochemistry and Molecular Biology
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

This course each year examines a number of important and exciting topics in biochemistry, molecular biology, and other related fields of biology. The intellectual and research development that formulated these fundamental concepts is traced through extensive readings of the primary literature. Discussions emphasize the critical evaluation of experimental techniques, data analysis, and interpretation. Substantial student participation in the form of oral presentation is expected.

Prerequisites: Biochemistry 311, 314, or permission of instructor

Notes: 1 meeting (2 hours, 30 minutes)

Instructors: L. Hsu

(Fall) Independent Study
Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement.

Independent work in biochemistry can be conducted with any member of the biochemistry committee and, upon approval, also with other members of the biological sciences and chemistry departments.

Notes: See safety training restrictions in the course description for Biochemistry 295

Instructors: The department.

Biological Sciences

BIOL-107-01 - Biological Sciences - 2003-2004
(January) Structure of Memory
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

By lectures, readings, and discussion we will investigate how the brain organizes and processes memory storage and retrieval. Emphasis is on whole brain mental functions, rather than cellular and biochemical mechanisms. Starting with the primitive “motor memory” involved in learning to walk or to chip an arrowhead from a stone, we shall move to the specific memories associated with smell, vision, sound and other sensory modalities, and then explore the specifically human memory faculties that require a linguistic coding of information.

Instructors: C. Smith

(Spring) Advances in Biology: Patterns and Principles of Life
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement

First-year seminar (Speaking- and writing-intensive)

Preamble (for topics courses): Biological Sciences 145 is a topical first-year seminar, serving as a general introductory biology course for entry-level majors and nonmajors. It includes a laboratory component, is considered an alternative to Biological Sciences 150, and can count as a prerequisite for Biological Sciences 200.

Mount Holyoke College Course Information Archive 2000-2016
This course offers an introduction to the central concepts and patterns underlying much of modern biology, including the basic principles of cell biology, genetics, evolution, and energetics. We will examine several "model organisms," such as E. coli, baker's yeast, Arabidopsis, maize, the roundworm, and the mouse to see how and why experimental results in these systems can have such general importance and broad applicability.

Instructors: J. Knight
Section Instructors: 01 LAB K Knight
Expected enrollment: 16

BIOL-150-A - Biological Sciences - 2003-2004
(Fall) Introductory Biology: Form and Function: Physiology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
By exploring some of the basic structural and functional systems found in plants and animals, this course will examine assorted strategies that organisms have evolved to solve life's "major problems." Topics will include energy acquisition, reproduction, water balance, control systems, and movement. Labs will introduce students to data collection, manipulation, and analysis.
Notes: A liberal arts introduction to biology, open to any student; required for potential majors in biology, biochemistry, and neuroscience and behavior

Instructors: G. Gillis, A. Hitchcock

BIOL-150-B - Biological Sciences - 2003-2004
(Fall) Introductory Biology: Form and Function: How Organisms Function
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Living on earth poses physical and chemical challenges for plants and animals. In this section, we will study how living organisms sense the world, communicate, reproduce, defend against disease, and meet the challenges of coordinating these processes. Labs will introduce students to data collection, manipulation, and analysis.
Notes: A liberal arts introduction to biology, open to any student; required for potential majors in biology, biochemistry, and neuroscience and behavior

Instructors: S. Barry, S. Stranford

BIOL-200-01 - Biological Sciences - 2003-2004
(Spring) Introductory Biology II: How Organisms Develop
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
An overview of cells to tissues to organisms. Cellular components, the role of the nucleus, cell reproduction, and meiosis will be examined as part of our study of gamete production, fertilization, embryology, and development in an invertebrate (sea urchin), a vertebrate (chick), a fern, and a flowering plant. The basic molecular biology of DNA, RNA, and protein synthesis will be presented and examined in the context of building a fly embryo and a flower.
Prerequisites: Biological Sciences 145 or 150
Notes: 4 meetings (50 minutes), 1 lab (3 hours)
Instructors: R. Fink, A. Frary

BIOL-206-01 - Biological Sciences - 2003-2004
(Spring) Local Flora
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Offers plant identification and natural history, emphasizing trees, native and introduced, and wildflowers. On- and off-campus field trips.
Prerequisites: 4 credits in department
Notes: 1 meeting (3 hours), with field trips; sign up in biological sciences department office or via email at biology@mtholyoke.edu during the registration period
BIOL-208-01 - Biological Sciences - 2003-2004
(Spring) Ornithology
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Introduces the study of birds, especially the local avian fauna, emphasizing fieldwork.
Prerequisites: 4 credits in department
Notes: 1 meeting (50 minutes), 1 lab (2 hours), with field trips
Instructors: S. Smith

BIOL-210-01 - Biological Sciences - 2003-2004
(Fall) Genetics and Molecular Biology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
A comprehensive study of the fundamental principles of classical and molecular genetics. Major topics include transmission genetics, gene linkage and mapping, molecular approaches to genetic analysis, genetic engineering, gene therapy, developmental genetics, quantitative inheritance.
Prerequisites: Biological Sciences 150 and 200, Chemistry 101
Notes: 4 meetings (50 minutes), 1 lab (3 hours)
Instructors: J. Knight, C. Woodard

Section Instructors: 01 LAB  | 02 LAB  | 03 LAB  | 04 LAB  |

BIOL-213-01 - Biological Sciences - 2003-2004
(Spring) Ecology and Evolution
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course looks at the complexity of the living world - the ecological interactions and mechanisms of evolutionary change within a population, and between species, in the context of the physical world that organisms have helped to shape; the nature of biological diversity and the origin of adaptations.
Prerequisites: Biological Sciences 150, 200, and 210 or Environmental Studies 200
Notes: 4 meetings (50 minutes), 1 lab (3 hours)
Instructors: C. Picone, S. Rachootin
Section Instructors: 01 LAB  | 02 LAB  | 03 LAB  | 04 LAB  |

BIOL-220-01 - Biological Sciences - 2003-2004
(Spring) Cell Biology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Undertakes an integrated study of the processes and structures that define life at the cellular level. Considers the molecular and supramolecular organization of membranes, cytoskeleton, and organelles in the context of the physical and chemical principles governing their assembly, and their participation in phenomena such as the capture and transformation of energy, catalysis, transport, motility, signal transduction, and maintenance of cytoplasmic organization. The laboratory illustrates and analyzes these phenomena through selected optical and biochemical approaches.
Prerequisites: Biological Sciences 150 and 200, Chemistry 201 or 202
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes), 1 lab (3 hours)
Instructors: F. DeToma, A. Hitchcock

(Spring) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph, permission of instructor
Notes: Any student conducting an independent laboratory research project for course credit in a department, program, or laboratory covered by the College's chemical hygiene plan must participate in a safety training session before beginning research. Course credit will not be granted to students who do not receive safety training. See department for requirements.
Instructors: The department.

**BIOL-303-01** - Biological Sciences - 2003-2004
(Spring) Microbial Genetics - *Not offered this year/term*
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Studies at the molecular level of various aspects of genetics, as expressed in bacterial and viral systems. Topics include patterns and mechanisms of replication, recombination, repair, and mutation of DNA; regulation of gene activity; gene-protein relationships; and genetic engineering.
Prerequisites: Biological Sciences 210 and 220
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: J. Knight

**BIOL-305-01** - Biological Sciences - 2003-2004
(Fall) Cellular and Molecular Aspects of Development
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Speaking-intensive)
Examines the roles of cellular movement and cellular interactions in the development of multicellular organisms. Topics include cell recognition and adhesion during morphogenesis, the importance of extracellular matrices, and current theories of embryonic pattern formations. Self-designed laboratories include techniques such as microsurgery and time-lapse video microscopy using a wide variety of embryos and cell types.
Prerequisites: Biological Sciences 200, 210 with 220 strongly recommended
Notes: 3 meetings (50 minutes), 1 lab (3 hours)
Instructors: R. Fink

**BIOL-308-01** - Biological Sciences - 2003-2004
(Spring) Darwin
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Writing-intensive; History 361s (01))
This course looks at the scientific content and intellectual context of Darwin's theory of evolution - his facts, metaphors, hypotheses, and philosophical assumptions. Readings from Darwin and his sources, and examination of the organisms he studied. A background in eighteenth- and nineteenth-century history or whole organism biology is recommended. This course does not satisfy a distribution requirement in biological sciences.
Prerequisites: Biological Sciences 213, History 151 or 256, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: S. Rachootin

**BIOL-309-01** - Biological Sciences - 2003-2004
(Spring) Vertebrate Biology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
A study of vertebrates with emphasis on structural adaptations for functions such as feeding and locomotion, and on natural history. Some morphology and field identification involved in laboratory work.
Prerequisites: two of Biological Sciences 200, 210, 213
Notes: 3 meetings (50 minutes), 1 lab (3 hours)
Instructors: S. Smith
Section Instructors: 01 LAB S Smith |

**BIOL-310-01** - Biological Sciences - 2003-2004
(Fall) Invertebrate Zoology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course looks at the evolutionary relations of the profoundly different groups of animals in light of their structure, development, and fossil history. Emphasizes exceptional organisms that prove - and disprove - biological rules. Themes include coloniality, asexual reproduction, metamorphosis, and making skeletons.
Prerequisites: Biological Sciences 200 and 213
BIOL-311-01 - Biological Sciences - 2003-2004
(Fall) Protein Biochemistry and Cellular Metabolism
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Biochemistry 311f; Chemistry 311f)

BIOL-314-01 - Biological Sciences - 2003-2004
(Spring) Nucleic Acids Biochemistry and Molecular Biology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Biochemistry 314s; Chemistry 314s)

BIOL-315-01 - Biological Sciences - 2003-2004
(Fall) Ethology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course studies the biology of animal behavior, including both invertebrates and vertebrates. Topics include sense organs and communication, circadian and other rhythms, orientation and navigation, and the evolution and ecology of social systems. Laboratories involve an individual project.
Prerequisites: Two of Biological Sciences 200, 210, 213, or permission of instructor
Notes: 2 75-min. meeting, 1 lab (3 hrs.)
Instructors: S. Smith

BIOL-316-01 - Biological Sciences - 2003-2004
(Fall) Scanning Electron Microscopy
Credits/PE Units: 2-4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Geology 316f)
Includes theory and operation of the scanning electron microscope and preparation of biological and geological materials for observation. The versatile use of the microscope will be emphasized and will include low magnification, high resolution, and back scattered (reflected) electron modes of operation. Energy dispersive X-ray microanalysis will be introduced. Students may elect the course for 4 credits for further experience in energy dispersive microanalysis, including quantitative analysis and element mapping.
Prerequisites: permission of instructor and a 200-level biological sciences or geology course, and Geology 220 if electing 4-credit option
Notes: 1 meeting (2 hours), 1 lab (3 hours), 1 additional meeting (50 minutes) for 4-credit option; satisfies distribution requirement only if taken for 4 credits
Instructors: S. Gruber, M. Rice

BIOL-319-01 - Biological Sciences - 2003-2004
(Spring) An Introduction to Immunology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course presents the elements of immunochemistry and immunobiology. Topics include the anatomy, genetics, and biochemistry of the immune response; antibody structures and functions; the allergic response; autoimmune diseases; and the applications of immunology to research and clinical problems.
Prerequisites: Biological Sciences 210 and 220
Notes: 3 meetings (50 minutes), 1 discussion (50 minutes), 1 lab (3 hours)
Instructors: S. Stranford
Section Instructors: 01 LAB S Stranford | 02 LAB S Stranford |

BIOL-320-01 - Biological Sciences - 2003-2004
(Fall) Studies with the Electron Microscope - *Not offered this year/term
Credits/PE Units: 2-4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Introduction to the transmission electron microscope and its potential contributions to the biological sciences, through semester-long investigations of students' choosing. Projects may range from the molecular to the cellular/organismal levels and draw upon a variety of preparation techniques.
Students wishing to extend their experience in other courses, including Biological Sciences 295 and 395, may enroll in this course concurrently. The 2-credit option will focus primarily on the laboratory component. The 4-credit option will emphasize, in addition, discussion of relevant literature.
Prerequisites: Biological Sciences 220 or permission of instructor
BIOL-321-01 - Biological Sciences - 2003-2004
(Spring) Conference Course: Animal Cloning: Past, Present, and Future
Credits/PE Units: 2; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Speaking-intensive)
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.
When Dolly the lamb was born, the world changed. Developmental biologists have been cloning organisms for decades--why the intense emotion over a sheep? This course will focus on the history of animal cloning, exploring both conceptual and technical advances over time. We will look at the current state of mammalian cloning, including the national debate about human stem cell research, reading from primary literature. While the emphasis will be on the biological phenomena involved, we will also discuss the legal, ethical, and moral implications of human cloning.
Prerequisite: Biological Sciences 200 and 220
Notes: sign up in the biological sciences office or via email at biology@mtholyoke.edu during the registration period and list biological sciences courses taken
Instructors: R. Fink
Expected enrollment: 14

BIOL-321-02 - Biological Sciences - 2003-2004
(Fall) Conference Course: Chemical Communication in Vertebrates
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Speaking-intensive)
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.
How is information about physiological states coded in chemical information passed between animals? How is this information passed between organs in the body? In this course we'll read and discuss the primary literature in biology to look in depth at the nature of chemical communication in vertebrates. We will study hormones, pheromones and neurotransmitters, the neuroendocrine mechanisms that mediate their functions in the body, and the social and physical contexts in which these signalling mechanisms operate.
Prerequisite: Biological Sciences 213 and 220
Notes: sign up in the biological sciences office or via email at biology@mtholyoke.edu during the registration period and list biological sciences courses taken
Instructors: S. Bacon
Expected enrollment: 14

BIOL-321-03 - Biological Sciences - 2003-2004
(Spring) Conference Course: Host-pathogen interactions during viral infection
Credits/PE Units: 2; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Speaking-intensive)
Preamble (for topics courses): Selected topics from areas emphasized in the department according to needs of particular students. Study in small groups or by individuals.
How does our immune system fight off viral infections? And, how do these resident viruses respond to this attack by evading the immune response? In this course we will read and discuss primary literature related to host-virus interactions, mainly focusing on retroviral infections from both the host's and the pathogen's perspective. Included among the topics we will discuss are: basic virus structures, viral systems for entering host cells, innate immune mechanisms of virus elimination, critical adaptive immune responses to infection and some immune evasion tactics employed by viruses.
Prerequisite: Biological Sciences 220 and 319, or permission of the instructor
Notes: sign up in the biological sciences office or via email at biology@mtholyoke.edu during the registration period and list biological sciences courses taken
Instructors: S. Stranford
Expected enrollment: 12

BIOL-322-01 - Biological Sciences - 2003-2004
(Spring) Comparative Biomechanics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
The main objective of this course is to explore organismal structure and function via an examination of the basic physical principles that guide how living things are constructed and how organisms interact with their environment. We will use the combined approaches of the biologist and engineer to study the impact of size on biological systems, address the implications of solid and fluid mechanics for animal design, survey different modes of animal locomotion, and learn how biologists working in diverse areas (e.g., ecology, development, evolution, and physiology) gain insight through biomechanical analyses.
Prerequisites: Two of 210, 213, or 220; or permission of instructor
Notes: 2 meetings per week (75 min.), 1 lab (3 hrs.)
Instructors: G. Gillis
BIOL-323-01 - Biological Sciences - 2003-2004
(Fall) Physiology and Anatomy of Plants: Growth Regulation - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is a study of the higher plant, its structure, organization, and development. Examines both endogenous and environmental factors influencing plant growth and reproduction. Topics include anatomy, hormones and their mode of action, tropisms, photomorphogenesis, and flowering.
Prerequisites: Biological Sciences 210, 213 and/or 220
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: A. Frary

BIOL-324-01 - Biological Sciences - 2003-2004
(Spring) Topics in Plant Biology - *Not offered this year/term
Credits/PE Units: 2-4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
This seminar course explores recent developments in major areas of botanical research. Topics change from year to year.
Prerequisites: Biological Sciences 200 and one additional 200-level course in department
Notes: 2-credit option: 1 meeting (2 hours); 4 credit-option: 1 meeting (2 hours) plus additional work, unarranged
Instructors: The department

BIOL-325-01 - Biological Sciences - 2003-2004
(Fall) Evolutionary Survey of the Plant Kingdom - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course explores the tremendous diversity of the plant kingdom, emphasizing the local flora. Evolutionary relationships are discussed on the basis of comparisons of reproductive biology, morphology, anatomy, cell structure, and molecular biology.
Prerequisites: two of Biological Sciences 210, 213, or 213, or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours); offered alternate years
Instructors: A. Frary

BIOL-327-01 - Biological Sciences - 2003-2004
(Fall) Microbiology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is a general study of microorganisms and their activities, including form and structure; biochemical processes of growth, metabolism, and energy storage; distribution in nature and relationships to other organisms; cycles of matter; beneficial and detrimental effects on humans; and physical and chemical effects microorganisms make in their environment.
Prerequisites: Biological Sciences 220 and either 210 or 213
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: J. Knight

BIOL-328-01 - Biological Sciences - 2003-2004
(Fall) Regulatory and Integrative Human Physiology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
A consideration of the physiological processes involved in the control of human body functions. We will study the mechanisms for regulating individual organ systems and how these mechanisms respond to changing needs of the individual. Our examination of the physiological controls will include an analysis of the underlying cellular and molecular processes that drive the mechanisms and integrate the activities of the different systems.
Prerequisites: Biological Sciences 200 and 220
Notes: 2 meetings (75 minutes); 1 meeting (50 minutes), 1 lab (3 hours); lab enrollment limited to 12 students per section
Instructors: S. Bacon
Section Instructors: 01 LAB S Bacon | 02 LAB S Bacon |
Expected enrollment: 24

BIOL-331-01 - Biological Sciences - 2003-2004
(Fall) Advanced Ecology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Patterns of distribution and abundance of organisms and ecosystem structure and function are studied using experimental approaches, mathematics, and computer modeling. Readings and data from the primary scientific literature, along with results of student-run field and laboratory experiments will be used to develop and explore predictive models of ecological phenomena.

Prerequisites: Biological Sciences 213 and Statistics 240 or one course in calculus, and permission of instructor
Notes: 4 credits; 3 meetings (45 minutes); 1 lab (3 hr)
Instructors: The department

**BIOL-332-01** - Biological Sciences - 2003-2004
**(Fall) Macroevoolution - *Not offered this year/term**
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course presents the science of biological form and its relation to adaptation, development, and the modes of evolutionary change. Whole organisms are emphasized in the first part of the course; the evolution of developmental pathways from a molecular perspective is emphasized in the second part.
Prerequisites: Biological Sciences 213 and 210
Notes: 2 meetings (75 minutes); 1 lab (3 hours)
Instructors: S. Rachootin

**BIOL-333-01** - Biological Sciences - 2003-2004
**(Fall) Neurobiology**
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Topics include the physiology of nerve and muscle, synaptic transmission, the human brain, the senses, and movement control.
Prerequisites: Biological Sciences 200, and 210 or 220 and 4 credits in chemistry or physics
Notes: 3 meetings (50 minutes), 1 discussion (50 minutes), 1 lab (3 hours)
Instructors: The department

**BIOL-333-01** - Biological Sciences - 2003-2004
**(Spring) Neurobiology**
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Topics include the physiology of nerve and muscle, synaptic transmission, the human brain, the senses, and movement control.
Prerequisites: Biological Sciences 200, and 210 or 220 and 4 credits in chemistry or physics
Notes: 3 meetings (50 minutes), 1 discussion (50 minutes), 1 lab (3 hours)
Instructors: S. Barry
Section Instructors: 01 LAB S Barry | 02 LAB S Barry |

**BIOL-334-01** - Biological Sciences - 2003-2004
**(Spring) Biostatistics - *Not offered this year/term**
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Sociology 334a)
Introduction to statistical techniques used most commonly in biological and medical sciences. Emphasis will be on hypothesis testing, regression, analysis of variance, statistical power, comparisons of confidence intervals, time-series analysis, spatial analysis, and Bayesian inference. Examples and datasets will be drawn from student independent projects.
Prerequisites: one of the following: Biological Sciences 210, 213, 331, calculus, Statistics 240, and permission of instructor
Notes: 1 meeting (3 hours); offered alternate years

**BIOL-335-01** - Biological Sciences - 2003-2004
**(Spring) Mammalian Anatomy**
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course will examine the fundamental structural organization of the mammalian body. The lecture portion of the class will focus largely on humans, and students will gain practical insight into other mammalian systems in the laboratory.
Prerequisites: Biol. 213
Notes: 3 meetings per week (50 min.); 1 lab (3 hrs.)
Instructors: G. Gillis
Expected enrollment: 24

**BIOL-340-01** - Biological Sciences - 2003-2004
(Spring) Eukaryotic Molecular Genetics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course will examine the role of molecular genetic analysis in the study of phenomena such as human disease (particularly breast cancer), animal development, and programmed cell death. We will also take a detailed look at the science behind the Human Genome Project. There will be group discussions of original research articles and review articles, and we will often use a case-method approach.
Prerequisites: Biological Sciences 200 and 210
Notes: 3 meetings (50 minutes), 1 lab (3 hours)
Instructors: C. Woodard
Section Instructors: 01 LAB C Woodard |

BIOL-395-01 - Biological Sciences - 2003-2004
(Fall) Independent Study
Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement.
Prerequisites: jr, sr, and permission of department; submit application in biological sciences office or via the department's Web site
Notes: NOTE: See safety training restrictions in description of Biological Sciences 295
Instructors: The department.

BIOL-395-01 - Biological Sciences - 2003-2004
(Spring) Independent Study
Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement.
Prerequisites: jr, sr, and permission of department; submit application in biological sciences office or via the department's Web site
Notes: NOTE: See safety training restrictions in description of Biological Sciences 295
Instructors: The department.

BIOL-397-01 - Biological Sciences - 2003-2004
(Spring) Teaching Biology: Middle and Secondary School
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Teacher Licensure: Students interested in pursuing licensure in middle and secondary schools can combine the major with a minor in education. For specific requirements, refer to "Teacher Licensure" in this catalogue and consult Ms. Lawrence in the psychology and education department. Licensure also requires a passing score on the literacy and specific subject area sections of the Massachusetts Educators Certification Test. In the case of biology, this includes cells and cell theory, characteristics or organisms, human biology, principles of heredity and the evolution of life, matter and energy in ecosystems.

Chemistry

CHEM-100-01 - Chemistry - 2003-2004
(Fall) Problem Solving in General Chemistry
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is designed to introduce chemistry to students who have had difficulty with quantitative problem solving. The syllabus will follow closely that of Chemistry 101, and students will participate in the 101 laboratory. Chemistry 100 differs from 101 not in content, but in format: through a small enrollment and five weekly course meetings rather than three, the course emphasizes intensive, faculty-supervised group work and the development of quantitative problem-solving skills. Chemistry 100 serves equally with 101 as an introduction to the department's core sequence. Students should also enroll in a lab section of Chemistry 101.
Notes: 5 meetings (50 minutes), 1 lab (3 hours)
Instructors: D. Cotter
Expected enrollment: 30

CHEM-101-01 - Chemistry - 2003-2004
(Fall) General Chemistry I
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course provides introduction and development of fundamental concepts including stoichiometry, reactions in aqueous solutions, thermochemistry, atomic structure, chemical bonding, and acid-base reactions. The laboratory emphasizes basic skills, quantitative chemical measurements, and principles discussed in lectures.
Notes: 3 meetings (50 minutes), 1 discussion (50 minutes), 1 lab (3 hours)
Instructors: S. Decatur, W. Chen
CHEM-101-01 - Chemistry - 2003-2004
(Spring) General Chemistry I
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course provides introduction and development of fundamental concepts including stoichiometry, reactions in aqueous solutions, thermochemistry, atomic structure, chemical bonding, and acid-base reactions. The laboratory emphasizes basic skills, quantitative chemical measurements, and principles discussed in lectures.
Notes: Spring enrollment limited; students planning further study in chemistry or biology should enroll in the fall section.
3 meetings (50 minutes), 1 discussion (50 minutes), 1 lab (3 hours)
Instructors: The department

CHEM-200-01 - Chemistry - 2003-2004
(Spring) Environmental Chemistry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is designed to use chemical principles to understand issues surrounding our environment. The concepts of bonding, equilibria, acidity, basic organic chemistry, and reaction mechanisms will be applied to such topics as water pollution and acid rain, fossil fuels and alternative energy sources, atmospheric chemistry including smog formation and stratospheric ozone depletion, and herbicides and pesticides in the environment.
Laboratory work will concentrate on both qualitative and quantitative methods of analysis.
Notes: 2 meetings (75 minutes), 1 discussion (50 minutes), 1 biweekly lab (3 hours); offered once every three years
Instructors: The department

CHEM-201-01 - Chemistry - 2003-2004
(Spring) General Chemistry II
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course provides background in basic principles of physical, analytical, and inorganic chemistry essential to the study of all chemical phenomena. Topics include elementary principles of molecular electronic structure, quantitative treatment of chemical equilibria with applications to solubility, acid-base, and electron transfer reactions, introduction to chemical kinetics and thermodynamics, and the chemistry of coordination compounds. Laboratory experiments will include classical analytical and kinetic techniques, preparation of inorganic compounds, and an introduction to ab initio electronic structure calculations.
Prerequisites: Chemistry 100 or 101 or permission of instructor
Notes: 3 meetings (50 minutes), 1 discussion (50 minutes), 1 lab (3 hours)
Instructors: D. Cotter
Section Instructors: 01 LAB The department | 02 LAB The department | 03 LAB The department | 04 LAB The department | 05 LAB The department

CHEM-202-01 - Chemistry - 2003-2004
(Fall) Organic Chemistry I
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Introduces organic chemistry, emphasizing the principles governing broad classes of reactions. Topics include stereochemistry, nucleophilic substitution and elimination reactions, the chemistry of alkanes, alkenes, alkynes, alcohols, and ethers, and an introduction to infrared and nuclear magnetic resonance spectroscopy. Laboratory work includes synthesis, practice in the techniques of distillation, crystallization, chromatography, molecular modeling, and identifying unknown organic compounds by chemical and spectroscopic means.
Prerequisites: Chemistry 101, advanced placement, or permission of instructor
Notes: 2 meetings (75 minutes), 1 discussion (50 minutes), 1 lab (3 hours)
Instructors: D. Hamilton

CHEM-210-01 - Chemistry - 2003-2004
(Spring) Biotechnology: Science, Culture, and Ethics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
The development of a molecular understanding of the basis of life, and the application of this knowledge to alter and engineer living organisms, is an ongoing scientific revolution with far-reaching social and ethical considerations. This course introduces the science of the biotechnology revolution within its historical and social context; a description of the fundamental chemistry and molecular biology underlying these technologies is integrated with exploration of their social and ethical impacts. Topics to be covered include the structure of DNA, the human genome project, genetic engineering in agriculture, and cloning.
Prerequisites: Chemistry 101, Biological Sciences 151, or Interdepartmental Courses 121-122, or permission of instructor
Notes: offered every other year
Instructors: S. Decatur
CHEM-212-01 - Chemistry - 2003-2004
(Spring) Chemistry of Biomolecules
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
An examination of the major ideas of biochemistry from the point of view of the chemical sciences rather than the life sciences. Structures of important biomolecules. The role of energetics and reaction dynamics in biochemical processes. Major metabolic pathways are considered, including those of proteins, carbohydrates, lipids, and nucleic acids.
Prerequisites: Chemistry 202
Notes: two 75 minute meetings, one four hour
Instructors: M. Campbell

CHEM-220-01 - Chemistry - 2003-2004
(Fall) Simulating Chemistry, Biochemistry, and Materials Science: An Introduction to Scientific Computing
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
From the very early days of computers, they have been used in atomic simulations. Today, there are many algorithms for simulating chemical events. Simulations allow us to gain insight into possible causes of physical phenomena. This course introduces some of the methods used to simulate chemistry, biochemistry, and materials science. Potential energy surfaces, Monte Carlo methods, and molecular dynamics are introduced and applied to projects in chemistry, biochemistry, and materials science.
Prerequisites: Mathematics 202 (or equivalent), or permission of the instructor
Instructors: M. Gomez
Expected enrollment: 15

CHEM-295-01 - Chemistry - 2003-2004
(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Independent work in chemistry can be conducted with any member of the department.
Prerequisites: soph, permission of department required every semester
Notes: Note: Students conducting an independent laboratory research project for course credit in a department, program, or laboratory covered by the College's chemical hygiene plan must participate in a safety training session before beginning research. Course credit will not be granted to students who do not receive safety training
Instructors: The department

CHEM-295-01 - Chemistry - 2003-2004
(Spring) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Independent work in chemistry can be conducted with any member of the department.
Prerequisites: soph, permission of department required every semester
Notes: Note: Students conducting an independent laboratory research project for course credit in a department, program, or laboratory covered by the College's chemical hygiene plan must participate in a safety training session before beginning research. Course credit will not be granted to students who do not receive safety training
Instructors: The department

CHEM-302-01 - Chemistry - 2003-2004
(Spring) Organic Chemistry II
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
A continuation of Chemistry 202 that addresses the chemistry of aromatic compounds, the carbonyl group, and a number of other functional groups. Examples drawn from compounds of biological interest. The laboratory includes organic synthesis and the identification of unknown compounds by chemical and spectroscopic means.
Prerequisites: Chemistry 202
Notes: 2 lectures (75 minutes), 1 discussion (50 minutes), 1 lab (4 hours)
Instructors: M. Nunez

CHEM-308-01 - Chemistry - 2003-2004
(Fall) Chemical Thermodynamics
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
A consideration of the contribution of thermodynamics to the understanding of the "driving forces" for physical chemical changes and the nature of the equilibrium state.
CHEM-311-01 - Chemistry - 2003-2004
(Fall) Protein Biochemistry and Cellular Metabolism
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Biochemistry 311f; Biological Sciences 311f)

CHEM-314-01 - Chemistry - 2003-2004
(Spring) Nucleic Acids Biochemistry and Molecular Biology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Biochemistry 314s; Biological Sciences 314s)

CHEM-315-01 - Chemistry - 2003-2004
(Spring) Experimental Methods
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Uses extended research-style projects to introduce advanced techniques in physical measurement (e.g., high-resolution spectroscopy, calorimetry, electrochemistry), separation and analysis (e.g., gas- and liquid-phase chromatography, mass spectrometry), and chemical synthesis (e.g., catalytic and enantioselective methods, biomolecules, polymers). Students will increase their repertoire of laboratory skills while learning to integrate concepts from different subdisciplines of chemistry into a unified experimental approach to problem solving.
Prerequisites: Chemistry 302, 2 lectures (75 minutes), 1 discussion (50 minutes), 1 lab (4 hours)
Instructors: S. Decatur

CHEM-317-01 - Chemistry - 2003-2004
(Spring) Principles of Polymer Chemistry
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
An introduction to the study of molecules of high molecular weights with emphasis on synthetic rather than naturally occurring polymers. Topics include polymerization, structures, molecular weight determination, molecular weight distribution, chain configurations, rubber elasticity, and thermodynamics and statistical mechanics of polymer solutions.
Prerequisites: Chemistry 302
Notes: 2 meetings (75 minutes); 1 discussion (50 minutes); offered once every three years
Instructors: W. Chen

CHEM-325-01 - Chemistry - 2003-2004
(Spring) Atomic and Molecular Structure
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course is an introduction to experimental and theoretical approaches to the determination of the structure of atoms, molecules, and chemical bonds. Classroom work provides background in the theory of atomic and molecular structure and an introduction to quantum mechanics and spectroscopy.
Prerequisites: Chemistry 201, 202, Mathematics 202, Physics 216
Notes: 2 meetings (75 minutes), 1 discussion (50 minutes), 1 lab (4 hours)
Instructors: M. Gomez

CHEM-332-01 - Chemistry - 2003-2004
(Spring) Nuclear Magnetic Resonance Spectroscopy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The application of NMR spectroscopy to the determination of the configurations and conformations of molecules is studied. The fundamental principles of NMR, the operation of CW, Fourier transform, and high-field spectrometers; magnetic resonance imaging; and the vast array of modern experimental methods are discussed. Primary emphasis is placed on the use of NMR spectroscopy to solve specific structural and dynamic problems that arise in organic and biochemical research. A course in physics is desirable but not required.
Prerequisites: Chemistry 302
Notes: 2 meetings (75 minutes), 1 discussion (50 minutes); offered once every three years
Instructors: S. Decatur
CHEM-333-01 - Chemistry - 2003-2004
(Fall) Protein Structure and Function
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course introduces the subject of how the three-dimensional molecular structures of proteins determine and modulate their function. Topics will include fundamentals of protein chemistry and structure, comparisons of various structural motifs, and a survey of a wide range of protein functions. Examples will be drawn from the current literature on enzyme mechanisms, photosynthetic systems, motor proteins, ion channels, and topics of student interest.
Prerequisites: Chemistry 302
Notes: 2 meetings (75 minutes), 1 discussion (50 minutes); offered every other year
Instructors: M. Nunez

CHEM-334-01 - Chemistry - 2003-2004
(Fall) Advanced Inorganic Chemistry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The implications of molecular symmetry as expressed in the language of group theory are explored in some depth. Group theory provides the context for a discussion of the structural and spectroscopic properties of inorganic compounds, particularly those of the transition metals.
Prerequisites: Chemistry 302, 325
Notes: 2 meetings (75 minutes), 1 discussion (50 minutes); offered every other year
Instructors: D. Cotter

CHEM-336-01 - Chemistry - 2003-2004
(Spring) Organic Synthesis - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course emphasizes recent developments in synthetic organic chemistry and deals with general synthetic methods and specific examples of natural product synthesis. It covers such topics as new methods of oxidation and reduction, stereospecific olefin formation, ring-forming reactions, and methods of carbon-carbon bond formation. The application of these reactions to the synthesis of naturally occurring compounds is examined. A general strategy for the synthesis of complex molecules is also presented.
Prerequisites: Chemistry 302
Notes: 3 meetings (50 minutes); offered every other year
Instructors: D. Hamilton

CHEM-337-01 - Chemistry - 2003-2004
(Fall) Physical Organic Chemistry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
An introduction to the concepts and methods of physical organic chemistry. Examination of reaction mechanisms and the experimental results that support these mechanisms. Topics include structure and reactivity, reaction kinetics, mechanism determinations, and Woodward-Hoffman Rules.
Prerequisites: Chemistry 302, 308
Notes: 2 meetings (75 minutes); offered every other year
Instructors: S. Browne

CHEM-344-01 - Chemistry - 2003-2004
(Fall) Advanced Physical Chemistry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
An introduction to topics in molecular spectroscopy and group theory.
Prerequisites: Chemistry 325
Notes: 2 meetings (75 minutes); offered once every three years
Instructors: The department

CHEM-345-01 - Chemistry - 2003-2004
(Fall) Physical Biochemistry
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course emphasizes the wealth of information that can be gained by physical measurements on substances of biological importance, such as proteins, nucleic acids, and model compounds for these substances. Applications of X-ray diffraction, measurement of thermodynamic parameters,
spectroscopic methods, and hydrodynamic measurements to biological systems. Specific topics are chosen according to the interests of each class, with
special emphasis on readings from the recent literature.
Prerequisites: Chemistry 302, 325
Notes: 2 meetings (75 minutes); offered every other year
Instructors: M. Campbell

CHEM-395-01 - Chemistry - 2003-2004
(Fall) Independent Study
Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement.
Independent work in chemistry can be conducted with any member of the department.
Prerequisites: jr, sr, permission of department
Notes: Note: See safety training restrictions in description of Chemistry 295
Instructors: The department.

CHEM-395-01 - Chemistry - 2003-2004
(Spring) Independent Study
Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement.
Independent work in chemistry can be conducted with any member of the department.
Prerequisites: jr, sr, permission of department
Notes: Note: See safety training restrictions in description of Chemistry 295
Instructors: The department.

CHEM-399-01 - Chemistry - 2003-2004
(Fall) Comprehensive Seminar
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
A seminar series consisting of meetings on alternate weeks to discuss articles from the current chemical literature. The readings will prepare students
for attendance at lectures on the chosen topics in the remaining weeks. The lectures are given primarily by visiting speakers, but they may include
department faculty. Students will serve as discussion leaders, and each student will write a paper on a presentation of her choice.
Prerequisites: sr
Notes: 1 meeting (90 minutes)
Instructors: S. Decatur

Classics

CLASS-106-01 - Classics - 2003-2004
(Fall) Homer's Iliad: A Big Fat Ancient Greek War?
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive)
What could a 3,000-year-old poem about the Trojan War have to do with college students in the twenty-first century? To begin with, the Iliad is about
love as well as hate; friends and family as well as enemies; peace as well as violence. It offers stories about success and failure; inspiration and despair.
Like Achilles's shield, the Iliad reflects the world. Moreover, it has inspired countless writers and artists. As we study the poem and its place in ancient
Greek society, we will also examine later works (by Auden, Cavafy, H.D., Weil, Ingres, de Chirico) and ask how the original poem "translates" to the
modern world (as part of the Weissman Center's Pontigny symposium).
Notes: For students interested in ancient Greece, mythology, poetry, or history; 2 meetings (75 minutes); (some) Monday evenings 7-9
CLASS-110-01 - Classics - 2003-2004
(January) Sappho's Muse
Instructors: P. Debnar
Expected enrollment: 17
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Writing-intensive)
This course will examine the fragments of Sappho's Lyric poetry and her influence both on ancient Roman love poets, such as Catullus and Ovid, and on modern literature. Particular attention will be given to the way such personal poetry defied social and literary conventions and addressed issues much larger than the term "love poetry" commonly calls to mind. Besides the poetry of Sappho, Catullus, Ovid and their modern imitators, readings will include an historical novel by Peter Green, *The Laughter of Aphrodite*, and Tom Stoppard's play, *The Invention of Love*. All texts are in English. A final paper is required.
Notes: 3 meetings (2 hours) M,W,F 10-12
Instructors: B. Arnold
Expected enrollment: 18

CLASS-208-01 - Classics - 2003-2004
(Fall) Ancient Greek Sanctuaries
Instructors: B. Arnold
Expected enrollment: 18
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A detailed examination of the history, art, and archaeology of several major Greek cult centers, including the Sanctuary of Zeus at Olympia, the Sanctuary of Apollo at Delphi, and the Sanctuary of Asklepios at Epidaurus, together with a briefer consideration of a number of other sacred sites around the Greek world. The approach is primarily archaeological, with special attention to the surviving monuments and the results of excavation, but topics to be discussed also include ancient Greek religious practice, panhellenic festivals and athletic competitions, and the role played by Greek sanctuaries in the international political rivalries of the ancient Mediterranean world.
Notes: 2 meetings (75 minutes)
Instructors: M. Landon

CLASS-211-01 - Classics - 2003-2004
(Spring) Gods and Mortals: Myth in Ancient Art and Literature
Instructors: B. Bergmann, P. Debnar
Notes: 2 meetings (75 minutes); replaces Classics 102 and satisfies ancient studies major requirement
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Art History 211)
Many ancient images tell completely different versions of myth from those portrayed in Greek and Roman literary sources. By juxtaposing distinctive modes of communication in the ancient world, students will analyze the rhetorical uses of myth, both then and now. Students will also examine the range of possibilities for translating and interpreting text and image, which will alert them to the vitality of myth as a language of its own, transcending historical parameters.
Notes: 2 meetings (75 minutes) plus 1 screening
Instructors: B. Bergmann, P. Debnar

CLASS-212-01 - Classics - 2003-2004
(Fall) Greek Tragedy and Film
Instructors: B. Arnold
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course examines the evolution of tragedy in classical Athens from choral performance to sophisticated drama through the contributions of the three most important tragedians: Aeschylus, Sophocles, and Euripides. Attention is given both to the political context in which the plays were performed and to the dramatic effects employed by the playwrights that made the stage an influential medium of powerful artistry. Students will also study the influence of ancient tragedy on film by examining dramatic strategies modern directors employ and the allusions to Greek tragedy found in some innovative films by Roman Polanski, Woody Allen, Jules Dassin, Michael Cacoyannis, and others.
Notes: 2 meetings (75 minutes) plus 1 screening
Instructors: B. Arnold

(Spring) From Hoplites to Legions: Warfare in the Ancient World
Instructors: G. Sumi
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course examines the evolution of warfare in classical Athens from choral performance to sophisticated drama through the contributions of the three most important tragedians: Aeschylus, Sophocles, and Euripides. Complex Organizations

COMOR-201-01 - Complex Organizations - 2003-2004
(Spring) Poverty in the United States
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(PO 201s)
Why do so many people live in poverty in the most affluent of nations? This course will attempt to sort myths from realities in debates over the morality and feasibility of measures that might narrow the gap between rich and poor and expand opportunities, especially for the 20 million children living in poverty. Students will explore how poverty is related to class, race, sex, family structure, and economics, and how it is affected, for better or worse, by governmental programs involving housing, education, crime, welfare, and taxation.
Notes: preference will be given to up to five students who have taken Complex Organizations 220 (PO 225) 2 meetings (75 minutes)
Instructors: J. Fox
Expected enrollment: 15

COMOR-205-01 - Complex Organizations - 2003-2004
(Spring) Labor Economics: Women and the United States Economy
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(EC 205s)

COMOR-206-01 - Complex Organizations - 2003-2004
(Fall) Economics of Health Care and Health Service Organizations
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(EC 206f)

COMOR-212-01 - Complex Organizations - 2003-2004
(Fall) Individuals and Organizations
This course focuses on individual and small-group behavior in the organizational setting. The basic objective is to increase knowledge and understanding of human behavior in organizations—especially each individual’s own behavior. Three types of knowledge are stressed: (1) intellectual information regarding human behavior in an organizational context; (2) understanding of oneself as a person and as a manager; and (3) behavioral skills in dealing with people.

Prerequisites: soph, jr, sr
Notes: 2 meetings (75 minutes)
Instructors: D. Butterfield

COMOR-215-01 - Complex Organizations - 2003-2004
(Fall) Economics of Corporate Finance
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Economics 215s)

COMOR-220-01 - Complex Organizations - 2003-2004
(Spring) Winners and Losers: Taxation, Social Justice, and Economic Choices
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive; Politics 225s)
This course examines ethical issues that arise in organizational contexts and helps students develop techniques for resolving ethical problems. Issues treated include whistle-blowing, conflicts of interest, employee privacy, affirmative action, and corporate social responsibility. There is considerable use of case studies.
Prerequisites: soph, jr, sr
Notes: 2 meetings (75 minutes)
Instructors: The program

COMOR-266-01 - Complex Organizations - 2003-2004
(Fall) Environmental Politics in America
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Politics 266f)

COMOR-270-01 - Complex Organizations - 2003-2004

COMOR-299-01 - Complex Organizations - 2003-2004
(Spring) Leadership and the Liberal Arts
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)
An interdisciplinary approach to the nature, operations, and directions of complex organizations. Investigates the position of women and men in organizations, with a consideration of the nature and styles of leadership and of the value of a liberal arts degree in organizational interaction, and with an exploration of issues affecting organizations (ethics, competition, legal rights, authority, socialization). Required for the minor in complex organizations.
Notes: 2 meetings (75 minutes)
Instructors: F. McGinness

Computer Science

COMSC-100-01 - Computer Science - 2003-2004
(Fall) An Introduction to Computer Science
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
An introduction to basic computer science concepts and issues. Topics will be chosen from: origins of computers, data representation and storage, computer architecture, assemblers and compilers, operating systems, networks and the Internet, distributed systems, information retrieval, data organization, graphics, artificial intelligence, robotics, the theory of computation, and trends in Internet commerce and use. Laboratory assignments will offer some experience with programming and the use of application software.
Notes: 2 meetings (75 minutes), 1 lab (2 hours); students should NOT take this course after Computer Science 101
Instructors: The department
Section Instructors: 01 LAB The department | 02 LAB The department | 03 LAB The department |
Expected enrollment: 60

(Fall) Problem Solving and Structured Programming
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Introduces the C language and the use of structured programming techniques. Emphasizes the solution of complex computational problems by their analysis into smaller subproblems that can be solved independently and then combined to form a complete solution. Introduces other topics relevant to computer science. Assumes no previous study or use of computers. This course is programming intensive.
Notes: 2 lectures (75 minutes), 1 lab (2 hours)

COMSC-211-01 - Computer Science - 2003-2004
(Fall) Data Structures
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Using C++. Solving problems with computers is accomplished by writing programs that operate on data to produce a desired result. The way data is organized and presented to the program can significantly affect its efficiency and simplicity and can sometimes determine whether or not a program can be written to solve the problem at all. This course presents ways of organizing data into "data structures" and analyzes how structuring the data can improve program performance.

This course is programming intensive.
Prerequisites: Computer Science 101

Instructors: The department
Expected enrollment: 20

COMSC-221-01 - Computer Science - 2003-2004
(Fall) Computer Systems and Assembly Language
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course looks at the inner workings of a computer and computer systems. It is an introduction to computer architecture, software engineering, and the fundamentals of operating systems. Specific topics include assembly language programming, memory and I/O issues, and the techniques of software design, implementation, and testing as a group. This course is programming intensive.
Prerequisites: Computer Science 101; Computer Science 211 recommended
Notes: 2 meetings (75 minutes)
Instructors: The department
Section Instructors: 01 LAB The department | 02 LAB The department |
Expected enrollment: 20

COMSC-311-01 - Computer Science - 2003-2004
(Fall) Theory of Computation
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Are there any limits to what computers can do? Does the answer to this question depend on whether you use a PC or a Mac? Is C more powerful than PASCAL? This seminar explores these questions by investigating several models of computation, illustrating the power and limitations of each of these models, and relating them to computational problems and applications. Topics include finite state automata, pushdown automata, grammars, Turing machines, the Universal Turing Machine, and computability.
Prerequisites: Computer Science 101 and Mathematics 232
Notes: 2 meetings (75 minutes)
Instructors: The department
Expected enrollment: 20

COMSC-322-01 - Computer Science - 2003-2004
(Spring) Operating Systems
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
An introduction to the issues involved in orchestrating the use of computer resources. Topics include operating system evolution, file-handling systems, memory management, virtual memory, resource scheduling, multiprogramming, deadlocks, concurrent processes, protection, and design principles. Course emphasis: understanding the effects of operating system design on computer system performance. This course is programming intensive.
Prerequisites: Computer Science 211 and 221
Notes: 2 meetings (75 minutes)
Instructors: D. Strahman
Expected enrollment: 20

COMSC-324-01 - Computer Science - 2003-2004
(Fall) Computer Architecture
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
The goal of this class is to provide the student with a working knowledge of how computers operate and the general principles that affect their performance. New developments in hardware render current technologies obsolete within one to three years. Rather than focusing on specific technology, we cover the fundamentals that allow your understanding of technology to grow with future developments. You will also gain a better appreciation of the cost/performance trade-offs encountered in designing a computer system.
Prerequisites: Computer Science 211 and 221
Notes: 2 meetings (75 minutes)
Instructors: L. Ballesteros
Expected enrollment: 20

COMSC-325-01 - Computer Science - 2003-2004
(Fall) Computer Networks
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course is an introduction to computer networks, the mechanisms used in their construction, and the factors that affect their performance. Topics include network architecture, data communications, network protocols, error and connection management, internetworking, the Internet, client-server programming, examples, and applications. This course is programming intensive.
Prerequisites: Computer Science 211, 221, and 322
Notes: 2 meetings (75 minutes)
Instructors: The department
Expected enrollment: 20

COMSC-327-01 - Computer Science - 2003-2004
(Fall) Distributed Systems - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
In decentralized systems, users often solve large problems by spreading effort over groups of computers. Problems involving information, computation, and hardware distributed at various locations must be solved. A distributed system of computers may not share a common memory or a clock. Therefore, efforts to work together require explicit communication and synchronization mechanisms. We will look at issues of problem solving...
with multiple processors, distributing workload, and providing access to shared resources such as I/O and storage devices and file systems, centralized and distributed methods for control of parallel activities and for detection, and resolution of conflicts.

Prerequisites: Computer Science 211, 221, and 322 or permission of instructor

Notes: 2 meetings (75 minutes)

(Spring) Computer Graphics - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement (Mathematics 331s)

The creation of pictorial images using a computer. Topics include: drawing of two- and three-dimensional scenes using OpenGL; transformations of objects (translations, scalings, rotations, shearing) using homogeneous coordinates; creating perspective in three-dimensional drawing; algorithms for enhancing realism and visual effect; and the mathematical underpinnings of graphic design. Students will complete a number of graphics projects based on readings and class discussion. This course is programming intensive.

Prerequisites: Computer Science 101, 211, 221, and at least one of Mathematics 203, 211, 232 or permission of instructor

Notes: 2 meetings (75 minutes)

Instructors: R. Weaver

Expected enrollment: 20

**COMSC-334-01** - Computer Science - 2003-2004

(Fall) Artificial Intelligence

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

An introduction to AI research issues and models of intelligence. Topics include AI history, philosophical and research questions, LISP, state space representation, search, heuristics, connectionism, learning, and an introduction to advanced AI fields such as Natural Language Processing and Computer Vision. Course emphasis: understanding AI model development and how it relates to the theoretical issues. This course is programming intensive.

Prerequisites: Computer Science 211, 221 and Mathematics 232

**COMSC-335-01** - Computer Science - 2003-2004

(Spring) Introduction to Computer Vision and Robotics - *Not offered this year/term

Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement

An introduction to theories that suggest how to provide a computer with the ability to "see" and how to use that ability to control the actions of a robot. The potential role that robot actions can play in making computer vision possible is also discussed. Specific topics include: the physics of vision, image processing, pattern recognition, image understanding, representations, planning, robot control, architectures, and applications. This course is programming intensive.

Prerequisites: Computer Science 334 and Mathematics 202

Notes: 2 meetings (75 minutes)

Instructors: C. Fennema

COMSC-341-N - Computer Science - 2003-2004
(Spring) Topics: Networked Systems and Applications
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
The goal of this course is to investigate the challenges and tradeoffs associated with building network-based applications. We will investigate the design and implementation of applications which employ a variety of architectural models including the web, peer-to-peer, and pervasive computing. Specific applications may include search engines, file sharing, and environmental sensing. Students will be expected to use some of the latest technology to implement many of the principles discussed. This course is programming intensive.
Prerequisites: Computer Science 211 and 221 or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: S. Rollins
Expected enrollment: 20

COMSC-341-R - Computer Science - 2003-2004
(Spring) Topics: Research Philosophy and Methodology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Intended for students planning honors projects, this course will address the issues involved in the research enterprise including problem selection, experimentation, presentation, and writing. Students will read technical papers, present and critique ideas in class, write programs that help explore ideas, write a 25-30 page paper, and complete a defendable honors proposal.
Prerequisites: jr, sr, Computer Science 311, 324, and 322, permission of instructor; a 300-level course in your area of interest is recommended
Notes: 2 meetings (75 minutes)
Instructors: C. Fennema, D. Strahman

Critical Social Thought

CST-250-01 - Critical Social Thought - 2003-2004
(Fall) Introduction to Nineteenth-Century Critical Social Thought
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
An introduction to some of the great critical voices of the nineteenth century. We will explore the ideas of such mutinous thinkers as Karl Marx, Friedrich Nietzsche, Sigmund Freud, Fyodor Dostoyevsky, and W.E.B. Du Bois, focusing on the style as well as the substance of their works and the circumstances that provoked them to write and/or that their writings helped provoke. The course will highlight the tension between appearance and reality, the dialectic of domination and subordination, and the place of reason and irrationality in social life.
Notes: 2 meetings (75 minutes)
Instructors: J. Cocks
CST-251-01 - Critical Social Thought - 2003-2004
(Spring) Introduction to Twentieth-Century Critical Social Theory - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking-intensive; German Studies 231s (02))
An introduction to thinkers who broke with prevailing social theories to critically address the crises and upheavals of the twentieth century. We will examine the ideas of, for example, Frantz Fanon, Walter Benjamin, Hannah Arendt, Michel Foucault, and Edward Said. We also will probe the connections between theory and practice by relating those ideas to case studies of contemporary issues. Students of German studies may focus primarily on German thinkers. This course will be conducted in English.
Prerequisites: Critical Social Thought 250 strongly encouraged
Notes: 1 meeting (2 1/2 hours)
Instructors: K. Remmler
Expected enrollment: 25

CST-252-01 - Critical Social Thought - 2003-2004
(Spring) Introduction to Twentieth-Century Literature and Politics
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
What did it mean to think critically in the twentieth century and to express that criticism through fiction? What were the specific challenges of that turbulent and brutal century, which saw so many revolutions and wars but also immense progress in human rights and social fairness? What did rebellious novelists such as Franz Kafka, Albert Camus, Gabriel Garcia Marquez, Richard Wright, Iris Murdoch, and Umberto Eco perceive as their cause? Did they have a cause? What were their solutions to the ills of humankind?
Prerequisites: Critical Social Thought 250 strongly encouraged
Notes: 2 meetings (75 minutes)
Instructors: C. Pleshakov
Expected enrollment: 25

DANCE-011-01 - Dance - 2003-2004
(Fall) *AC TH/DA Language of Movement - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
An introduction to movement as a language. In studio sessions students will explore and expand their individual movement vocabularies by working improvisationally with weight, posture, gesture, patterns, rhythm, space, and relationship of body parts. We will ask what these vocabularies might communicate about emotion, thought, physical structures, cultural/social traditions, and aesthetic preferences. In addition we will observe movement practices in everyday situations and in formal performance events and use these observations as inspiration for individual and group compositions. Selected readings and viewing of video and live performance.
Notes: 1 class/studio meetings (2 hours) and a production workshop (2 hours); offered at Amherst College
Instructors: W. Woodson
Expected enrollment: 20

DANCE-054-01 - Dance - 2003-2004
(Spring) *AC TH/DA Performance and Video - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
We will explore the connections between choreography/performance and video/film. The emphasis will be experimental--to learn by doing. We will work with cinematographic and choreographic terms and languages to discover similarities and differences. Encouraging reciprocity and dialogue between choreography and video/film will be the principle spirit that animates the course. Studio practice with choreography and the camera (primarily video hi 8), class discussions, viewing of videos and films, basic editing techniques, and assigned readings.
Prerequisites: permission of instructor; previous experience in choreography, directing, or video/film useful but not required

DANCE-104-01 - Dance - 2003-2004

(Spring) Financial Accounting

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

Preamble (for topics courses): The Department of Economics does not offer a business major. However, we do offer an accounting course that will be of interest to students interested in business. The accounting course does not serve as an introduction to economics or as a part of the major.

The course, while using traditional accounting techniques and methodology, will focus on the needs of external users of financial information. The emphasis is on learning how to read, interpret, and analyze financial information as a tool to guide investment decisions. Concepts rather than procedures are stressed and class time will be largely devoted to problem solutions and case discussions.

A basic knowledge of arithmetic (+,-,*,/) and a familiarity with a spreadsheet program is suggested. See [http://www.mtholyoke.edu/courses/cljohnso](http://www.mtholyoke.edu/courses/cljohnso).

Prerequisites: not recommended for first-year students

Notes: 2 meetings (75 minutes)

Instructors: C. Johnson

(January) Reading the Contemporary chinese Economy as a Post-structuralist Novel

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

This course provides students with an introduction to the contemporary Chinese economy by exploring institutions as subjects in an unfolding novel. Economic, political, cultural and environmental processes are understood as forms of interaction of the subjects. Institutions qua subjects are also understood as always subject to death. Thus, one of the sources of interaction between institutions qua subjects is over the survival of institutions and the demise of others. Among the institutions explored are the danwei system, the houkou system, various state agencies, bureaus and governments.

The course will make use of texts, web-based readings, films, and live dramatic presentations.

**(Fall) Seminars in Reading, Writing, and Reasoning: Into Africa**

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

First-year seminar (Writing-intensive)

Preamble (for topics courses): Though sections of English 101 differ in specific content, all develop the skills of careful reading and effective writing essential to the liberal arts and sciences. Students will write frequently and have an opportunity to revise their work. By active participation in class discussion, students will develop their speaking skills and learn to ask critical questions, formulate answers, and frame persuasive arguments. Students who do not take the course in the fall should consider enrolling in the spring. Like other first-year seminars, English 101 is intended primarily for students at the start of their college career.

An introduction to some topics in African studies, reading and writing about such contemporary authors as Ama Ata Aidoo, Tsitsi Dangarembga, Bessie Head, Awi Kwei Armah, Nuruddin Farah. Studying both fiction and essays, the course focuses on recent political situations (Ghana, Congo, South Africa), on images of women, and on representations of Africa in news media and in cinema, both from Africa and the West. This seminar will be taught in coordination with History 140 "Identity and Community in Early Africa."

Notes: 2 meetings (75 minutes); Only first-year students may preregister for this course. Sophomore, juniors and seniors may inquire if there is space available during the first two weeks of class.

This course is an invitation to reflect on the assumptions on which education is founded and sustained, as well as on the habits of thought and action it encourages. What are the aims of formal education in this country? What kinds of changes do you expect it to bring about in your own life? What roles do class, race, ethnicity, generation, gender, and other identity markers play in educational structures and outcomes? The texts that will help us explore these questions include a packet of essays, Patricia Williams' *Alchemy of Race and Rights*, Virginia Woolf's *A Room of One's Own*, Paulo Freire's *Pedagogy of the Oppressed*, and Mary Shelley's *Frankenstein*.

This course focuses on representations of metamorphosis in literature and art. A favorite literary topic in classical antiquity, metamorphosis was moralized by medieval Christian writers and later reconceived in light of modern theories of psychology and evolution. What is the relationship between identity and change? Why has the notion of the self’s fluidity—its inclination to cross the permeable borders of bestiality, sexuality, and spirituality—proven such an enduring fascination and anxiety? Readings may include Ovid, Apuleius, Marie de France, Petrarch, Shakespeare, Darwin, Kafka, and Calvino.

We begin with a reading of Woolf's *A Room of One's Own* and a consideration of Mount Holyoke as such a "room" as an introduction to thinking about some of the ways in which women have been traditionally represented (or not represented) in Western culture. After working with a variety of short fictions by men as well as women, we will focus on one particularly notable literary representation of women, Edith Wharton's *House of Mirth* (both the novel and the recent film). Through John Berger's *Ways of Seeing* we will extend our discussion to the tradition of oil painting, contemporary advertising, and the media. Writing intensive; brief weekly exercises; research paper.

This course explores the symbolism, evolution, and politics of "home." The sites that we consider will range from an individual's place of birth to locations associated with cultural or racial origins, spiritual consciousness, or symbolic rebirth. How do people honor, romanticize, forget, or destroy these locations and their connections to them? We will consider how tradition, domesticity, community expectations, exile, and return affect an individual's sense of "home." Course materials will include fiction and nonfiction, poems, plays, films, and feature works by such writers as Charles Chesnutt, Kate Chopin, Edna St. Vincent Millay, and Randall Kenan.

Students who do not take the course in the fall should consider enrolling in the spring. Like other first-year seminars, English 101 is intended primarily for students at the start of their college career.
During World War II, the Mount Holyoke campus became the center of European intellectual life. Students will research the Pontigny colloquia, held during the summers of 1942-1944 at Porter Hall, when some towering figures in the arts, sciences, and humanities met for intense conversations with their American peers about the future of civilization in the face of Nazism and Fascism. Each student will research one of the participants (including Claude Levi-Strauss, Hannah Arendt, Marc Chagall, Wallace Stevens, and Marianne Moore). Students will attend the Weissman Center symposium on Pontigny at Mount Holyoke, November 6-8, 2003.
Notes: 2 meetings (75 minutes); Only first-year students may preregister for this course. Sophomore, juniors and seniors may inquire if there is space available during the first two weeks of class.

ENGL-246-01 - English - 2003-2004
(Spring) Modern Irish Literature

Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement

This survey course will introduce students to literature of modern Ireland beginning with Swift and ending with writers of the Irish literary revival and Irish modernists. The syllabus will also focus on Irish women writers and their literary interventions concerning colonial history, nationalism, and Unionism. We will pay particular attention to representations of ideas of Irishness through the categories of religion, race, gender, and culture. The course encourages students to think about how the genres, styles, and forms of Irish writing are determined by the experience of colonial trauma and the imperative to imagine national identity.

Prerequisites: soph or permission of instructor

(Spring) Women Writers: Nineteenth-Century American Women Writers - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Women's Studies 203s (01))
In this cross-cultural examination of nineteenth-century American women writers, we will compare a number of works of fiction, prose, poetry, and autobiography. We will discuss how writers created sophisticated and insightful critiques of American culture and imagined or re-presented new American identities and histories. We will also consider tensions between "sentimental" idealism and political pragmatism, restrictive domesticity and dangerous autonomy, and passionless femininity and expressed sexuality. Authors may include Alcott, Child, Far, Fuller, Harper, Hopkins, Ruiz de Burton Wilson, and Winnemucca.
Prerequisites: soph or permission of the instructor
Notes: 2 meetings (75 minutes); satisfies English department 1700-1900 requirement

(Spring) Women Writers: Twentieth-Century American Women Writers
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Women's Studies 203s (02))
This course examines the work of a variety of twentieth-century women writers located in the United States, focusing on the genre of prose fiction and the themes of gender, race, and sexuality. Particular attention will be paid to developments in African American women's writing, to Southern writers, and lesbian literary representation. Writers may include Gwendolyn Brooks, Willa Cather, Kate Chopin, Zora Neale Hurston, Nella Larsen, Carson McCullers, Flannery O'Connor, Gertrude Stein, Alice Walker, Edith Wharton, and Hisaye Yamamoto.
Prerequisites: soph, jr, sr, English 240, 241, or 270 recommended
Notes: 2 meetings (75 minutes); enrollment may be limited
Instructors: E. Young
ENGL-280-01 - English - 2003-2004
(Spring) Literary Criticism and Theory
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)
This course is designed to offer students a broad historical overview of literary theory as well as exposure to contemporary debates about "theory" and literary representation. The course is both an exercise in practical criticism and a survey of the Western critical tradition from Plato to Derrida. Beginning with the question of why Plato wished to ban poets from his ideal Republic, the course will go on to consider such topics as the Classic vs. Romantic theories of the imagination, the "invention" of psychology and the necessary difficulty of much modern literature, the relation of gender and ethnicity to literary expression, and the uncertainties of literary interpretation.
Prerequisites: English 200 or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: W. Quillian
Expected enrollment: 20

ENGL-282-01 - English - 2003-2004
(Spring) Reading and Writing About Poetry - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)
An introduction to reading poetry, focusing on its formal varieties and on developing a vocabulary for discussing them. What distinguishes rhythm from meter, or tone from voice? And how does the poet - or the student - write prose about poetry? All periods of poetry, but an emphasis on such twentieth-century poet-critics as Eliot, Auden, Jarrell, and Wilbur. Recommended as a background for other courses in the department that feature poetry.
Prerequisites: 8 credits in department
Notes: 2 meetings (75 minutes)
Instructors: M. Salter

ENGL-283-01 - English - 2003-2004
(Spring) Light Verse, Comic Verse - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This is "light verse" in a broad sense; parodies, nonsense verse, children's verse, song lyrics. Students will be introduced to a broad range of poetic forms and the vocabulary of versification. Older readings to include Shakespeare, Pope's "Rape of the Lock," Byron's Don Juan, Lewis Carroll, Edward Lear. Twentieth-century readings to include: Eliot's "Old Possum's Book of Practical Cats," Auden's "Letter to Lord Byron," Robert Frost, Ogden Nash, Elizabeth Bishop. Song lyrics will extend from Campion and Dowland to W.S. Gilbert and some lyricists from Broadway and Tin Pan Alley: Cole Porter, Ira Gershwin, Stephen Sondheim.

ENGL-316-01 - English - 2003-2004
(Spring) Topics in Late Medieval Literature: Imagining Other Worlds: The Medieval Dream-Vision
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive; Medieval Studies 300s)
This course explores the rich body of literature on dreams and dreaming in the Middle Ages, focusing on the evocative dream-vision genre. Materials will include Chaucer's powerful early poetry (pre-Canterbury Tales), lesser-known anonymous dream-visions, and the masterpieces of two of Chaucer's contemporaries, Langland and the Pearl-poet, as well as popular medieval theories of physiology, psychology, and dream taxonomy. In characterizing this peculiar community of erotic daydreamers, narcoleptic sinners, and chosen visionaries, we will consider whether medieval dream-poetry reveals the stirrings of "modern" ideas of subjectivity, personal experience, and psychology.
Prerequisites: jr, sr, Medieval Studies 101 or English 210, or permission of instructor
Notes: 1 meeting (3 hours); satisfies English department pre-1700 requirement; satisfies English department seminar requirement
Instructors: J. Fumo
Expected enrollment: 15

(Spring) Studies in Renaissance Literature: Elizabethan Theatre and Hollywood Movies: Popular Art, Genre, and Topical Meanings - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
How does genre respond to, or shape, audience expectation, and what links are there among generic forms, the business of theatre or movies, and social or political issues? This seminar will study the theatre of Shakespeare and his contemporaries and Hollywood films from the 1930s through the 1960s. Genres may include (in the Elizabethan theatre) history, revenge, tragedy, comedy, and tragicomedies; (in the movies) screwball comedy, horror films, "women's pictures," science fiction, and westerns. The course will include substantial readings in critical theory.
Prerequisites: 8 credits in department beyond English 101 or permission of the instructor
Notes: 1 meeting (3 hours); satisfies English department pre-1700 requirement; satisfies English department seminar requirement
Instructors: P. Berek
Expected enrollment: 15

ENGL-318-01 - English - 2003-2004

(Spring) History of the English Language - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course is a study of the development of the language from its origins to the present day, with illustration of this development through readings in English prose and verse, public and private letters, and contemporary assessments of the language from different periods. Readings, ranging from the Old English period to the present, chosen from writers such as King Alfred, Chaucer, Sidney, Swift, Johnson, Austen, Forster.
Prerequisites: English 210 or permission of the instructor
Notes: 1 meeting (3 hours); satisfies English department pre-1700 requirement
Instructors: E. Hill
Expected enrollment: 20

ENGL-320-01 - English - 2003-2004
(Fall) The Eighteenth Century: Jane Austen: Readings in Fiction and Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
A study of Austen's six novels through the lenses of Regency culture and of twentieth-century filmmakers. How do these modest volumes reflect and speak to England at the end of world war, on the troubled verge of Pax Britannica? What do the recent films say to and about Anglo-American culture at the millennium? What visions of women's lives, romance, and English society are constructed through the prose and the cinema?
Prerequisites: jr, sr, 8 credits in English/film studies beyond 101; prior work in eighteenth- to nineteenth-century literature, history, or film recommended; students should have read at least two Austen novels
Notes: 1 meeting (3 hours)
Instructors: J. Lemly

ENGL-321-01 - English - 2003-2004
(Spring) Studies in Nineteenth-Century British Literature: Gender and Colonialism in Victorian Culture
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Speaking- and writing-intensive; Women's Studies 333s (02))
This course will examine the ways in which British colonialism is represented in and shaped by Victorian literature and popular culture. We will investigate the politics of gender and colonialism in nineteenth-century cultural production, suggesting that British imperialist discourse cannot be understood unless we use gender as a primary category of analysis. Alongside writings by Carlyle, C. Bronte, Haggard, Eliot, Forster, political cartoons, scientific writing, and advertisements, we will read feminist postcolonial theory by Spivak, Sharpe, McClintock, and others.
Prerequisites: 8 credits in department beyond English 101, including two of the following: English 200, 210, 220, or permission of instructor
Notes: 1 meeting (3 hours); satisfies English department 1700-1900 requirement; satisfies English department seminar requirement
Instructors: A. Martin
Expected enrollment: 18

ENGL-322-01 - English - 2003-2004
(Fall) The English Novel in the Nineteenth Century: Gender and Class in the Victorian Novel
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course will investigate how representations of gender and class serve as a structuring principle in the development of the genre of the Victorian novel in Britain. We will devote significant attention to the construction of Victorian femininity and masculinity in relation to class identity, marriage as a sexual contract, and the gendering of labor. The texts chosen for this course also reveal how gender and class are constructed in relation to other axes of identity in the period, such as race, sexuality, and national character. Novelists will include Dickens, Eliot, Gaskell, C. Bronte, and Hardy.
Supplementary readings in literary criticism and theory.
Prerequisites: jr, sr, in department including English 220, 230, or permission of instructor
Notes: 2 meetings (75 minutes); satisfies English department 1700-1900 requirement
Instructors: A. Martin

ENGL-324-01 - English - 2003-2004
(Fall) Seminar in British Literature: East of Eden: Milton and the Romantics
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Beginning with Milton's Paradise Lost, the course will concentrate on some of the nineteenth-century Romantic writers who in various ways remember, revive, often radically revise, Milton's work and vision: Blake, Wordsworth, Coleridge, Byron, Mary Shelley, Keats.
Prerequisites: jr, sr, 8 credits in department beyond 200, preferably including 313, or permission of instructor
Notes: 2 meetings (75 minutes)
ENGL-327-01 - English - 2003-2004
(Fall) Witchcraft in American Literature
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Colonial American witchcraft, especially Salem 1692, has animated the American literary imagination for well over three centuries. This course looks at the ways in which American writers have responded to the history of witchcraft. Why do writers find witchcraft themes so compelling? What metaphors of culture, gender, and the imagination does witchcraft provide? In this course we read several primary and secondary materials about colonial witchcraft and explore writers such as Winthrop, Mather, Franklin, Hawthorne, Dickinson, Forbes, Miller, and Updike, among others. Films screened include *Three Sovereigns for Sarah*, *The Witches of Eastwick*, and *The Crucible*.
Prerequisites: 8 credits in department including English 240 or 241, or permission of instructor
Notes: 1 meeting (3 hours); satisfies the English department seminar requirement
Instructors: C. Lee

ENGL-328-01 - English - 2003-2004
(Spring) Transnationalism in Asian American Literature and Cultural Criticism
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Drawing on contemporary concerns and debates about transnationalism in Asian American cultural criticism, this course examines prose narratives by Asian American writers that feature the experience of crossing national borders and living in the global economy of North America. We will analyze postcolonial, postmodernist, diasporic, and globalized views of transnational movement. We will also take into account sociohistorical factors in displacement; gender, nation-state, and subjecthood; multiple migrations; and construction of home. Texts may include the writings of Chang-rae Lee, Ruth Ozeki, Han Ong, David Mura, Andrew X. Pham, Bharati Mukerjee, Cynthia Kadohata, and Jessica Hagedorn.
Prerequisites: jr, sr, 8 credits in department or permission of instructor
Notes: 1 meeting (3 hours)

ENGL-341-01 - English - 2003-2004
(Fall) American Literature III
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course explores the range and variety of American literary expression from the 1920s through the early 1940s. Topics include the role of regionalism, the emergence of a "modernist" aesthetic, ethnicity and modernism, debates within African American literary culture. Authors include Ernest Hemingway, F. Scott Fitzgerald, William Faulkner, Zora Neale Hurston, Richard Wright, Henry Roth, and Pietro Di Donato.
Prerequisites: 8 credits in English beyond 101 or per instructor
Notes: 2 meetings (75 minutes)
Instructors: D. Weber

ENGL-342-01 - English - 2003-2004
(Spring) The American Novel - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course explores the way narrative forms both deploy and challenge social discourses of race and gender to create contested visions of American national identity. Readings may include nineteenth- and twentieth-century novels by Chopin, Faulkner, Harper, Hurston, James, Melville, Morrison, Stowe, and Twain and works of theory and criticism.
Prerequisites: jr, sr, 8 credits in department beyond English 101, including English 240, 241, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: E. Young

ENGL-350-01 - English - 2003-2004
(Spring) Studies in African American Literature: Slavery and the Literary Imagination - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Speaking- and writing-intensive; American Studies 301s)
In this course we will study American works that focus on American slavery. How do authors contend with historical fact and literary conventions as they re-present the experiences of slaves, owners, fugitives, abolitionists, and free people of color? Does a writer's race or historical context influence his or her portrayal of slavery? How do conventions of the slave narrative and sentimental novel affect the representation of slavery and freedom? Authors may include Charles Chesnutt, Frederick Douglass, Jeffrey Lent, Lorenz Cary, Harriet Beecher Stowe, and Sherley Anne Williams.
Prerequisites: jr, sr, 8 credits in department beyond English 101, including at least one of the following: English 240, 241, 250, or permission of instructor
Notes: 1 meeting (3 hours); satisfies English department 1700-1900 requirement; satisfies English department seminar requirement

Expected enrollment: 15
ENGL-351-01 - English - 2003-2004
(Fall) Toni Morrison - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Speaking- and writing-intensive)
This course will focus on Toni Morrison and the extensive literary criticism generated in response to her writings. As we read such works as *The Bluest Eye*, *Sula*, *Beloved*, and *Paradise*, we will discuss Morrison’s evolution as a writer, the ways in which she critiques and reconstructs American communities, her authorial agendas, and her critical reception. We will consider Morrison in relation to her contemporaries and the African American and American literary traditions. Discussions will take up questions about the roles and responsibilities of the African American author, the genres of historical fiction and romance, and redefinition of black womanhood.
Prerequisites: jr, sr, 8 credits in department beyond English 101, including one of the following: English 240, 241, 250, or permission of instructor; previous course work in African American literature recommended
Notes: 1 meeting (3 hours); satisfies the English department seminar requirement
Instructors: L. Brown

(Spring) Human Rights in Literature
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
In this course we will study how human rights are conceived and contested within narratives about justice, dignity, truth, and power. Texts will include human rights conventions, theoretical essays, and novels. Reading authors such as Morrison, Feinberg, Allison, Arenas, and Ondaatje, we will analyze the legal discourse of human rights as trauma, endurance, memory, and aspiration. We will focus on emerging directions in human rights work, including the response to economic globalization, the rights of indigenous peoples, women's rights, and international recognition of the rights of lesbian, gay, bisexual, and transgender people.
Prerequisites: jr, sr, 8 credits in department or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: G. Mullins

ENGL-370-01 - English - 2003-2004
(Fall) The Caribbean in American Culture - Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
This seminar uses the interdisciplinary methods of American studies to explore the role migrants from the English-speaking Caribbean have played in the United States. We will examine Caribbeans' images of themselves in literature and popular culture to understand the various ways they have (re)defined what it means to be "American" and "African American" in the twentieth century. A major theme will be the intersections of race, ethnicity, gender, and sexuality in Caribbean American identity. North American perceptions and constructions of the Caribbean will also be central. Readings include Lorde, Hughes, Hurston, Marshall, and Clifford.
Prerequisites: jr, sr, 8 credits in department beyond English 101 or permission of instructor
Notes: 1 meeting (2 hours), plus screenings
Instructors: M. Stephens

ENGL-372-01 - English - 2003-2004
(Fall) The Literature of Exile
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
(Speaking-intensive)
This seminar explores shifting means of exile over the course of the twentieth century. Are exile from home and alienation from society ideal conditions, or states of dread? How has the history of European exploration and colonialism shaped the discourse of exile? What does exile look like today in a transnational age of porous national borders? Some of the themes we will consider are: questions of belonging, the relationship between internal and external exile, exile as geographic, psychological, aesthetic, and political, and identity formation and exile.
Prerequisites: jr, sr, 8 credits in department beyond English 101 and/or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: M. Stephens

ENGL-373-01 - English - 2003-2004
(Fall) Nature and Gender: "A Landscape of One's Own"
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This seminar will focus on how women writers in the nineteenth and early twentieth century told their life stories in the context of the islands, prairies, forests, and deserts of the United States. Readings will include works by such writers as Thaxter, Freeman, Jewett, Stewart, Zitkala-Sa, Austin, Cather, and Hurston; genre will include autobiographical essays, narratives, biography, fiction, and poetry. Some visual works (paintings, photographs, film) may also be added to the list of texts.
Prerequisites: jr, sr, English 240, 241, or permission of instructor
Notes: 1 meeting (3 hours); satisfies English department 1700-1900 requirement
Instructors: L. Glasser

ENGL-377-01 - English - 2003-2004
(Spring) Identity and the Rise of Commodity Culture
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(American Studies 301)
In this course we will explore literature that deals with the rise of commodity culture and its impact on American ideas about selfhood and gender. We will look at memoirs and novels from the 1880s through the 1920s to see what sorts of "Modern Americans" were under construction -- and contestation. Historical readings about the emergence of the ad industry will round out our investigation.
ENGL-381-01 - English - 2003-2004
(Spring) Film, Melodrama, and Horror - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(See Smith College English 396f)
This course will analyze two important film genres, melodrama and horror, through the lenses of contemporary theories of gender, race, and sexuality. Topics of particular interest: feminist analyses of gender and genre, racial difference and "whiteness," normative and alternative sexualities, masculinity, identification and spectatorship, and recent revisions of these genres. Directors may include Cronenberg, Dash, DePalma, Hitchcock, Ormuzahl, Ray, Romero, Sark, Vidor, and Whale.
Prerequisites: course work in film studies or permission of the instructor
Notes: 1 meeting (3 hours) and screenings; enrollment may be limited
Instructors: E. Young

ENGL-383-01 - English - 2003-2004
(Fall) Seminar in Narrative and Critical Theory: James Joyce, D. H. Lawrence, and Virginia Woolf
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Beginning with Joyce's A Portrait of the Artist as a Young Man and Lawrence's Sons and Lovers, we will read these "autobiographical" narratives against the background of their time and each author's own critical pronouncements. We will go on to consider how Lawrence's vision changes in his subsequent novels, The Rainbow and Women in Love. The next four weeks will focus on Joyce's monumental Ulysses and the seminar will conclude with Woolf's Mrs. Dalloway and To the Lighthouse. In addition to working with the critical writings of the authors themselves, students will be asked to do secondary reading in some recent critical theory.
Prerequisites: jr, sr, 8 credits in the department including English 200 or permission of instructor; English 280 highly recommended
Notes: 1 meeting (5 hours); satisfies English department seminar requirement
Instructors: W. Quillian
Expected enrollment: 15

(Fall) Environmental Science
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Community-based learning course)
Most of our society's environmental problems are complex and interdisciplinary in nature. Environmental science is a course designed to teach integrative thinking, the "scientific method," and problem solving. Lectures will be drawn from a variety of scientific fields including ecology, hydrology, chemistry, geology, and biology with an emphasis on ecosystems and biogeochemical cycles. The course will use case studies of regional environmental problems, practical hands-on problem solving, and landscape analysis. Training in field and laboratory techniques is an integral part of the course. Priority given to environmental studies majors.
Prerequisites: Environmental Studies 100; one course in statistics is recommended
Instructors: J. Bubier
Expected enrollment: 24

ENVST-321-01 - Environmental Studies - 2003-2004
(Spring) Conference Courses in Environmental Studies: Contaminants and the Environment
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Precedent (for topics courses): Selected topics in areas of environmental interest, determined by faculty expertise and student needs. Study in small groups or by individual students working with faculty.
This course offers an introduction to toxicology, the study of the health effects caused by environmental contamination through community-directed learning. The class will learn the fundamentals of toxicology or how environmental contaminants affect both human and wildlife populations, and then apply this knowledge while working for a community currently experiencing exposure to environmental contamination. The community class project brings in many additional aspects of environmental contamination such as federal regulation and community activism and is central to this course.
Prerequisites: Environmental Studies 200, a course in chemistry or biology, or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: E. Monosson

(Spring) Photography and Landscape: Earth As Visual Text - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Our understanding of the world around us is deeply influenced by the visual images created in response to human experience of nature. This course explores photography as a way of seeing and interpreting landscape and environment through time. Projects allow students to examine visual elements of landscape, develop photographic techniques, and create photo-narratives of their own. Using readings, observations, and photographs we consider how cultural and environmental issues and insights are communicated through photographic media. Basic understanding of photography and access to a camera are required.
Prerequisites: Art (Studio) 200 or permission of instructor
Instructors: L. Savoy
Expected enrollment: 15

(Spring) Biogeochemistry of Northern Ecosystems
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking- and writing-intensive)
Global climate models and recent evidence show that ecosystems in the northern latitudes are extremely sensitive to climate change. This interdisciplinary science course examines boreal, subarctic and arctic ecosystems through the study of nutrient cycling, plant ecology, hydrology, soil processes, and biosphere-atmosphere interactions. Topics include fundamentals of biogeochemical elements such as carbon and nitrogen at scales from the microscopic to global, sensitivity, feedbacks to climate change, and disturbance processes such as fire and permafrost degradation.
Prerequisites: At least 2 semesters of biology, chemistry, or environmental science, and permission of the instructor
Notes: 1 meeting (3 hours)
Instructors: J. Bubier

(Spring) Senior Seminar in Environmental Studies
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Community-based learning course)
This is the capstone course of the environmental studies major. The course explores linkages among the diversity of disciplines that contribute to the environmental studies major, illustrates how these disciplines that contribute to the environmental studies major are used in environmental decision making, enables students to inform one another's roles as environmentalists, and provides students with opportunities to develop individual and cooperative projects. See the course catalogue supplement for topics, which change from year to year.

EURST-316-02 - European Studies - 2003-2004
(Spring) European Studies Seminar: Europe and the Euro
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Twelve member nations of the European Union have adopted the euro as their new currency. This historic event will be our starting point for exploring broader questions concerning cross-national standards and their implications for European diversity and integration. Will the new Europe be able to sustain and foster national/regional identities? What will become of European diversity in political and legal traditions, culture, technology, and other institutions? How do Europeans, both inside and outside of the union, view the movement toward further integration and enlargement? We will examine these issues in their historical context, combining cultural, economic, and political perspectives.
Prerequisites: at least one course at the 200 or 300 level relevant to European studies or permission of the instructor
Notes: 1 meeting (3 hours); Mr. Christiansen will be teaching in collaboration with other members of the European studies program

Film Studies

FLMST-201-01 - Film Studies - 2003-2004
(Fall) Introduction to Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course teaches the basic concepts and critical skills involved in interpreting film. Through lecture, reading, discussion, and screening of films both in and outside of class, the student will become a more informed and sophisticated observer of the cinema. During the first half of the semester, the class will study form and style in narrative film as well as in nonnarrative practices such as avant-garde and documentary filmmaking. For the remainder of the course, the class will examine some of the major critical approaches in the field.
Notes: 2 meetings (75 minutes), 1 screening (2 1/2 hours)
Instructors: R. Blaetz

FLMST-210-01 - Film Studies - 2003-2004
(Fall) Production Seminar on the Moving Image
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course offers an introductory exploration into the moving image as an art form outside of the conventions of the film and television industries. This class will cover technical and aesthetic aspects of video production and will also offer a theoretical and historical context in which to think about independent cinema and video art.
Notes: 1 meeting (3 hours), 1 screening (3 hours); a lab fee may be charged
Instructors: A. Steuernagel
Expected enrollment: 15

FLMST-230-01 - Film Studies - 2003-2004
(Fall) Documentary Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course examines the principles, methods, and styles of nonfiction film. Beginning with the "actualités" of film history's first practitioners and ending with contemporary self-reflexive films, such as Errol Morris's The Thin Blue Line, the class studies films that strive to represent some aspect of the real world as opposed to the fictional worlds of narrative cinema.
Prerequisites: Film Studies 201 or permission of instructor
Notes: 2 meetings (75 minutes) plus 1 screening (2 1/2 hours)
Instructors: R. Blaetz

FLMST-250-01 - Film Studies - 2003-2004
(Spring) History of World Cinema
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
This course offers an historical survey of the cinema as a developing art form and a means of communication. We will consider the national, economic, and social conditions of an international medium that has existed for over a century. The national and thematic focus of the course shifts through the semester. For example, we will focus on U.S. film in studying the earliest developments in film technology and narrative, Soviet and French films to study the formal and social experimentation of the 1920s, and films made in Cuba and Brazil to elucidate political filmmaking in the 1960s. The course provides a background for understanding film history and pursuing further studies in the field.
Prerequisites: Film Studies 201 or permission of instructor
Notes: 2 meetings (75 minutes), 1 screening (2 1/2 hours)

FLMST-310-01 - Film Studies - 2003-2004
(Spring) Production Seminar on the Moving Image
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
Preamble (for topics courses): An advanced course in the theory and practice of film/video production as an art form. Topics for the seminar will vary from year to year.
This course continues to explore the moving image as an art form, focusing on three specific components: structure, sound, vision. The first segment of the course will explore films whose structure makes them most memorable. The second segment will examine innovative ways in which sound is used in film. The final segment of the course will focus on films in which the visual element predominates. Emphasis will be placed on the technical/aesthetic aspects of media art production. Students will be expected to create their own video/audio work. Weekly screenings will be supplemented with readings offering a theoretical/historical context in which to think about independent cinema and video art.
Prerequisites: Film Studies 210, equivalent, or permission of instructor
Notes: 1 meeting (3 hours), 1 screening (2 1/2 hours); a lab fee may be charged

(Spring) Intermediate Level Courses in Culture and Literature: Introduction to Contemporary Culture and Media of France and the French-Speaking World
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
(Speaking-intensive)
Preamble (for topics courses): The primary purpose of this course is to familiarize students with contemporary issues in French culture as they are represented in French-speaking media of today.

Topic: This course will introduce students to contemporary culture in France and the French-speaking world, largely through the study of recent (post-1990) best-selling novels and popular films. We may also examine examples of other cultural media: popular music, contemporary theater, art exhibits, and television shows. In addition to French or French-language "products," we may also discuss the reception of selected American works in France. Book, film, theater, art, and music reviews, accessed via the Web, will provide a context for our discussion. This will be a discussion-based class; students will be asked to do formal oral presentations and to participate actively in class.

(Spring) Courses on Social and Political Issues and Critical Approaches: The Image of America in Contemporary France
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): These courses explore cultural, literary, and social issues relating to women and gender identities in France and French-speaking countries. Readings may include a variety of disciplines: historical, sociological, and cultural. The seminars will examine a definable phenomenon—such as “America” as a foil in debates over issues from the French Revolution to cultural pluralism. We will study the nineteenth-century origins of France’s interpretation of “America” that led to the creation of a French “image of America” in the early twentieth century and analyze relevant nineteenth- and twentieth-century French texts. We will concentrate on three recent controversies in which use of the American referent has been particularly salient in France: race, gender, and sexuality.

Prerequisites: Two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor

Instructors: L. Huughe

Expected enrollment: 16

FREN-351-01 - French - 2003-2004
(Spring) Courses on Women and Gender: Mothers and Daughters
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): These courses explore cultural, literary, and social issues relating to women and gender identities in France and French-speaking countries. Topics may include women’s writing, women and men, the status of women, feminist theories, and theories of sexuality and sexual difference.

Study of this crucial and problematic relationship as presented in selected novels and films by French-speaking women. We will analyze the mother-daughter bond as literary theme, social institution, psychological dynamic, and metaphor for female creativity. Preliminary readings will examine conceptions of motherhood and the family across time and diverse francophone societies. Principal texts will be grouped cross-culturally by theme so that affinities and differences among them can emerge. Authors may include: La Fayette, Charrière, Sand, Colette, Cardinal, Beauvoir, Ernaux, Darrieussecq, Roy, Hébert, Chen, Schwarz-Bart, Pineau, Beyala, Bouraoui; and films.

Prerequisites: Two of the following courses: French 215, 219, 225, or 230, or permission of department chair and course instructor

Notes: 1 meeting (2 hours, 50 minutes)

Instructors: E. Gelfand

Expected enrollment: 16

FREN-370-01 - French - 2003-2004
(Fall) Advanced Level Seminar:: Les Misérables
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): The seminar is intended to challenge students at the highest level. A regular rotation of topics ensures a variety of perspectives across genre and period, encompassing linguistic, literary, theoretical, and cultural issues of French and Francophone studies.

Development of critical skills is stressed through classroom discussion and critique of writing projects, drawing on individual student interests and experiences as they relate to the topic of the course.

Hugo’s epic masterpiece, written in exile, has everything: ceaseless adventures, crimes and punishments, love, hate, obsession, heroes, villains, the battle of Waterloo, and civil war. The sympathetic everyman, Jean Valjean, condemned to hard labor for stealing bread and relentlessly pursued by the
pitiless policeman Javert, encounters unforgettable characters. We will examine how Hugo situates Valjean’s escapes within a framework of social injustice and good triumphing over evil, balancing his political and romantic ideas. Reading, discussion, film screenings.

Prerequisites: two courses at the advanced level, or permission of department chair and course instructor

Notes: 1 meeting (2 hours, and 50 minutes)

Instructors: C. LeGouis

Expected enrollment: 16

(Spring) Advanced Level Seminar: Workshop in Literary Translation
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement

Preamble (for topics courses): The seminar is intended to challenge students at the highest level. A regular rotation of topics ensures a variety of perspectives across genre and period, encompassing linguistic, literary, theoretical, and cultural issues of French and Francophone studies. Development of critical skills is stressed through classroom discussion and critique of writing projects, drawing on individual student interests and experiences as they relate to the topic of the course.

This course is designed to give students practical, hands-on experience in the translation, from French to English, of a literary work. We will begin the semester with readings in translation theory before moving on to the selection (by students) of a literary text. Students will work collaboratively in teams on a collective translation; teams will meet on a weekly basis with the professor for a detailed review of the work in progress. At the end of the semester, each team will submit the definitive version of their translation as well as a paper reflecting on the particular linguistic challenges encountered and their resolution thereof.

Prerequisites: two courses at the advanced level, or permission of department chair and course instructor

Geography

GEOG-102-01 - Geography - 2003-2004
(January) A Short Course in Geographic Information Systems
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

This course is an intensive one-week introduction to the theory and practice of geographic information systems (GIS). The course begins each session with an introduction to the principles of map science as they apply to GIS. The remainder of the session is used to acquire basic software skills and application experience using the ESRI ArcGIS software. The course culminates with each student conducting a small independent project using GIS data and tools.

Notes: This class will run from January 5th to January 9th with 10 sessions (3 hours) scheduled over 5 days.

Instructors: T. Millette

Expected enrollment: 10

GEOG-105-01 - Geography - 2003-2004
(Fall) World Regional Geography
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

Surveys physical and human geographic patterns, providing a comprehensive background discussion of individual regions. Analyzes each region in terms of its environmental base and resource distribution, agricultural systems and rural development, population growth and characteristics, and patterns of urbanization and industrial growth.

Notes: 2 meetings (One hour, fifteen minutes)

Instructors: G. Kebbede

(Spring) Human Dimensions of Environmental Change
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Geology 204s)
Using case studies from Africa, Asia, North and South America, and Europe, this course examines the interactions between human institutions (such as political and economic structures, science and technology, class and gender systems, and cultures) and the environmental/earth systems that provide their contexts and have been impacted by them. The course will provide a forum to analyze the environmental consequences of a variety of land-use systems, resource use, and development projects and explore possible alternative strategies of human-environment relations that could create a balance between human needs and environmental constraints.
Notes: 1 meeting (3 hours)
Instructors: G. Kebbede

GEOG-205-01 - Geography - 2003-2004
(Spring) Mapping and Spatial Analysis
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Provides a comprehensive introduction to maps, including their design, compilation, and computer production. Introduces students to the principles of abstracting the Earth's surface into a map and using maps and cartographic databases as spatial analytical tools.
Notes: 2 meetings (75-min)
Instructors: Y. Ogneva-Hummelberger
Expected enrollment: 16

GEOG-206-01 - Geography - 2003-2004
(Spring) Political Geography - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Systematically studies political phenomena and their geographic expression, at a variety of spatial scales - national, regional, and international. Major themes include nation-state formation, boundary, territory, and ethnic issues, regional blocs and spheres of influence, and conflicts over access to and use of resources.
Instructors: G. Kebbede

GEOG-209-01 - Geography - 2003-2004
(Spring) Women and the Environment
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Women's Studies 270)
People's interactions with their environments are socially constructed. In this seminar, some of the ways in which women and girls interact differently with the environment are examined. Topics include: women and nature, women in agricultural systems, women and environment/health/disease, women in earth and environmental movements, and fieldwork and researcher-informant relations.
Notes: 2 meetings (75 minutes)
Instructors: G. DiChiro
Expected enrollment: 20

GEOG-211-01 - Geography - 2003-2004
(Fall) Geographic Information Systems - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
In this comprehensive introduction to the theory and technology of geographic information systems (GIS), students are introduced to basic raster and vector data structures, spatial database design, attribute database processing, and the role they play in a GIS. Computer exercises are used to acquaint students with state-of-the-art GIS software and highlight fundamental GIS principles.
Prerequisites: Geography 205 or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: T. Millette
Expected enrollment: 16

GEOG-213-01 - Geography - 2003-2004
(Fall) Geography of Europe - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The human geography of western Europe has changed substantially since the 1960s. Enlargement of the European Union (EU) symbolizes a greater sense of European identity, but at the same time important regional differences have remerged and strengthened. Evaluating the viability of the EU first requires understanding the physical, economic, and political geography of the member states. This course offers the opportunity to focus on the common characteristics and shared problems of the member countries to better assess the future prospects and problems of the community.

(Fall) Geography of South Asia: India, Pakistan, Bangladesh, and Sri Lanka - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The region is studied in terms of its physical, cultural, and political geography. Emphasis is given to the numerous ways in which the peoples of South Asia have adapted to and utilized their local environments, the reasons for varying patterns of population growth throughout the region, and the environmental impact of economic development programs.

(Spring) Geography of the Middle East and North Africa
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
In this course, the Middle East and North Africa are studied in terms of their physical, cultural, economic, and political geography. Emphasis is placed on the environmental conditions and ecological evolution, population and demographic characteristics, the resource base and development strategies and dilemmas, the origins and implications of boundary disputes and territorial claims, and national, subregional, and regional integration processes and problems.
Instructors: G. Kebbede

GEOG-217-01 - Geography - 2003-2004
(Fall) The African Environments - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
The course provides an integrated analysis of biogeography, environmental change, and hydrology within each of the biomes found in the African continent: forest, savanna, desert, coast, wetland, mountain, and Mediterranean environments. It also discusses the impact and significance of human activity on African environments by exploring debates about soil erosion, desertification, biodiversity and depletion, and conservation and development.
Notes: 2 meetings (75 minutes)
Instructors: G. Kebbede

GEOG-224-01 - Geography - 2003-2004
(Spring) Atmosphere and Weather - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is a detailed examination of the structure of the earth's atmosphere, radiation budget, global pressure cells, and synoptic weather characteristics. The class places heavy emphasis on basic weather forecasting techniques, which are conveyed via problem-based learning exercises created with local meteorological data sets.
Prerequisites: high school earth science or any 100-level geography course
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: T. Millette
Expected enrollment: 12

GEOG-225-01 - Geography - 2003-2004
(Fall) Evolution of North American Landscapes - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Geology 225f)
The landscapes of Earth are the result of complex processes and have evolved dramatically since the planet's formation over 4.5 billion years ago. In this course we examine the geologic evolution of the North American continent and its natural features. Using narrative descriptions, scientific articles, maps, photographs, and videos, in addition to the texts, we tour North America and explore the origin and anatomy of its landscapes, including
national parks and monuments. We then consider how the geologic setting or physical environment influenced human exploration and settlement of the continent.

Prerequisites: high school earth science or any 100-level geology course or permission of instructor

Notes: 2 meetings (75 minutes), 1 lab (3 hours)

Instructors: L. Savoy

GEOG-227-01 - Geography - 2003-2004
(Spring) Indigenous Peoples of North America
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Anthropology 227)
This course is a survey of indigenous peoples of North America, including their aboriginal practices, economies, societies, arts and beliefs. It will dispel stereotypes of Native Americans by introducing students to a multitude of indigenous peoples on the continent. Through critical readings, writings, discussions, films, speakers, lectures, and one field trip, students will gain a wider awareness of changing legal and political landscapes affecting the Native American community from pre-colonial times to the present. Nations and tribes studied include representatives from major culture areas, e.g., Northeast Woodlands, Plains, Southwest, California, Northeast, Southeast and the Arctic.

Notes: 2 meetings (75 min); fourth hour TBA

(Fall) Ethnoarchaeology and Geology of the Ancient Southwest - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

(Anthropology 290f)
The American Southwest is a geologically and culturally striking landscape that has been continuously inhabited by indigenous peoples for thousands of years. Cotaught by an earth scientist and bioarchaeologist, this interdisciplinary course examines the complex interrelationships between geological and ecological processes, and human culture and biology of the ancestral Pueblo people in the Southwest. A key feature is a group field trip (fall break) to the Southwest where we consider questions on the nature of changing landscapes, environmental constraints, and biocultural processes for both ancient and modern Pueblo people.

GEOG-304-01 - Geography - 2003-2004
(Fall) Selected Problems in Regional Geography: Planning and the Environment - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

As development continues to put pressure on the environment, increased interest in planning at the local and regional levels of government is seen as a grassroots approach to environmental management. This seminar course examines successful and innovative approaches used by planning agencies to monitor and protect the environment. Topics include town and regional master plan development, zoning, land evaluation and site assessment studies, and solid waste and growth management issues.

Prerequisites: Geography 204

Notes: 1 meeting (3 hours)

Instructors: T. Millette

Expected enrollment: 15

(Fall) Remote Sensing
This course presents the fundamentals of digital analysis of aerial satellite imagery. Students are introduced to the characteristics of Earth images and learn to make qualitative and quantitative assessments of multispectrum and satellite data. Basic photo interpretation exercises are complemented with computer analysis of satellite data for land use and land cover analysis, vegetation stress analysis, and urban hydrology.

**Prerequisites:** Geography 205

**Notes:** 2 meetings (75 minutes), 1 lab (3 hours)

**Instructors:** Y. Ogneva-Hummelberger

**Expected enrollment:** 12

**GEOG-311-01 - Geography - 2003-2004**

**(Fall) Seminars: Landscapes of Environmental Justice**

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

**Preamble (for topics courses):** These seminars present selected topics in geography that reflect contemporary problems, current geographical ideas, philosophical and methodological trends in geography, and/or the history and development of geographical thought.

This course examines the historical, theoretical, and political roots of the field of environmental justice. Activists and scholars of environmental justice link widespread concerns with hazardous pollution and environmental degradation with what are typically considered more “social” issues, such as civil rights, land rights, race and class politics, and economic concerns. Using interdisciplinary approaches from geography, anthropology, history, sociology, and political economy, we will examine some of the ways that people confront and struggle over issues in their actions to protect and improve the environment.

**Prerequisites:** jr, sr, 4 credits in geography and 4 credits in related social sciences at the 200 level, or permission of instructor

**Notes:** 1 meeting (3 hours)

**Instructors:** G. DiChiro

**Expected enrollment:** 15

**GEOG-312-01 - Geography - 2003-2004**

**(Spring) Seminars: Urban Ecology**

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

**Preamble (for topics courses):** These seminars present selected topics in geography that reflect contemporary problems, current geographical ideas, philosophical and methodological trends in geography, and/or the history and development of geographical thought.

The course examines a variety of urban landscapes through an ecological lens. We will explore the social, economic, and environmental factors that influence the development of cities in the US (such as New York, Boston, Los Angeles). The course looks at issues of settlement patterns, urban water management, urban waste management, urban agriculture, urban forestry and wildlife management, urban air pollution and environmental health, urban planning and zoning processes affecting transportation. We will consider recent concerns with “urban sprawl,” brownfields redevelopment, and the movements supporting sustainable/green cities and environmental justice.

**Prerequisites:** soph, jr, sr, or permission of instructor

**Instructors:** G. DiChiro

**Expected enrollment:** 20

**(Fall) Perspectives on American Environmental History - *Not offered this year/term**

Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

**(Speaking- and writing-intensive; Geology 317f)**

Explores the history of human-environment interactions in North America from precolonial times to the present from different cultural perspectives. How have such human activities as migration colonization and resource use depended on or modified the natural world? How have different cultural perceptions of and attitudes toward environment shifted through time and helped to reshape American landscapes? Case studies include ecological histories of Native America and Euro-America, slavery and land use, wilderness and conservation, and environmental racism and social justice. Our approach entails historical review of scientific studies, literature, visual records, and oral tradition.

**Prerequisites:** permission of instructor

**Notes:** 1 meeting (3 hours) and optional 4th hour

**Instructors:** L. Savoy

**(Fall) Africa: Problems and Prospects**

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.

**(Speaking- and writing-intensive)**

The course studies major spatial patterns and socioeconomic changes in contemporary Africa. Important themes include: population growth and resource accessibility, agricultural systems, urbanization, migration, internal and external trade, inter-country economic cooperation and integration, and environmental quality.

**Prerequisites:** jr, sr, soph with permission of instructor; 4 credits in Department and 4 credits at the 200 level in Geography or related social science.

(Fall) Physical Geology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
From earthquakes to landscapes, this course introduces the surficial and internal processes of the earth. Topics are plate tectonics, minerals and rocks, volcanoes, rivers, glaciers, oceans, geologic time, energy resources, and landscape evolution. Labs focus on plate tectonics, rocks and minerals, maps, and field trips.

GEOL-101-01 - Geology - 2003-2004
(Fall) Environmental Geology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Our existence is greatly affected by changing environmental conditions. Some of these changes are "natural" (floods, earthquakes), but many directly result from human mismanagement (groundwater contamination, acid rain, the greenhouse effect). Although some of these problems are of local concern, an increasing number are of global scale. In this course, students develop an appreciation for the way the Earth's environment affects our lives. In the laboratory, students learn techniques to recognize and interpret environmental hazards and develop strategies to address environmental problems.
Notes: 3 meetings (50 minutes), 1 lab (3 hours), field trips; 25 spaces allocated to first-year students
Instructors: A. Werner

(Fall) History of Life - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course focuses on the interrelations between life processes and Earth's crust and atmosphere. Using both body fossils and trace fossils, we will study the origin and evolution of life, the history of continents and oceans, and the diversification of complex life forms. Laboratory and field trips emphasize identification and analysis of sediments, rocks, and fossils.

(Fall) Exploring the Dynamic Earth - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Earth is a dynamic and ancient planet. The study of Earth is concerned with understanding how the natural world operates as well as realizing its impact on society. In this field- and project-oriented course, we evaluate the history and composition of the planet, and earth-shaping processes such as earthquakes, volcanic eruptions, mountain building, glaciation, and erosion. Lectures and weekly field and lab projects introduce the major concepts and techniques of geology. No previous knowledge of geology is required.

(Fall) Planet Earth
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
Our rocky planet Earth has much in common with other terrestrial bodies in our solar system. This introductory lecture course examines the origin, evolution, and geologic processes of Earth, and relates them to parallel phenomena on the Moon, Venus, Mars, and other rocky satellites. Topics include geologic time, minerals and rocks, volcanoes, sediments, rivers, glaciers, earthquakes, plate tectonics, and atmospheres. Weekly problem sets and two in-class exams.

Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
First-year seminar
This course will introduce students to recent advances in, and current debates on, the study of convergent evolution in the history of life. It is for students interested in the earth sciences and the history of life and how these subjects relate to all other areas of knowledge. The class will focus on helping students to read, write, discuss, and think clearly. Students will receive a broad survey of a wide variety of disciplines. This course is particularly well suited for first-year students.

(January) Snowball Earth
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Geological evidence for the worst glaciation on record suggests to some researchers that the Earth's surface froze solid about 700 million years ago. The evidence for this Snowball Earth or White Earth event has generated considerable controversy because global climate change computer models appear incapable of generating such an extreme climate. In this lab course, we will use petrographic and other tools to examine the evidence supporting the Snowball Earth scenario, and will assess the implications of this event for our understanding of the development of life on this planet.

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course is designed to help students recognize common minerals and their properties and occurrences, and the principal rock types and their origins, associations, and tectonic significance. Mineral characteristics and identification are covered mainly in the context of the common rocks in which they occur. Observational skills and hand sample identification will be emphasized in lab and on several field trips.

Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Speaking- and writing-intensive)
This course explores major events in earth history, the interaction of earth systems (lithosphere, biosphere, hydrosphere, and atmosphere), and the design and testing of earth science theories. Four course units are: Causes of Ice Ages (the Quaternary Period), Continental drift and the sedimentary rock record (the Tertiary Period), Causes of Extinctions and Radiations (the Mesozoic and Paleozoic Eras), and Evolution of Earth (the Proterozoic and Archean Eons). Final grades depend on class participation, debates, weekly labs, and two final projects (essays and a poster).
Prerequisites: high school earth science or any 100-level geology course or permission of instructor
Notes: 2 meetings (75 minutes); 1 lab (3 hours)
Instructors: M. Markley
Section Instructors: 01 LAB M Markley

GEOL-203-01 - Geology - 2003-2004
(Fall) Surface Processes
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
In this field- and project-based course we examine the processes operating at Earth's surface, and we consider how the resulting landforms and deposits can be used to infer environmental change. For example, we study why landslides occur, rivers meander, and coastlines erode. Fieldwork (and trips) are a vital aspect of this course, allowing students to explore firsthand the processes that have created and modified Earth's landscapes and environment.
Prerequisites: high school earth science or any 100-level geology course
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: A. Werner

GEOL-204-01 - Geology - 2003-2004
(Spring) Human Dimensions of Environmental Change
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Geography 204s)
Using case studies from Africa, Asia, North and South America, and Europe, this course examines the interactions between human institutions (such as political and economic structures, science and technology, class and gender systems, and cultures) and the environmental/earth systems that provide their contexts and have been impacted by them. The course will provide a forum to analyze the environmental consequences of a variety of land-use systems, resource use, and development projects and explore possible alternative strategies of human-environment relations that could create a balance between human needs and environmental constraints.
Notes: 1 meeting (3 hours)
Instructors: G. Kebbede

GEOL-210-01 - Geology - 2003-2004
(Spring) Plate Tectonics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Speaking- and writing-intensive)
How fast is London moving away from New York? Plate tectonic theory gained widespread acceptance in the earth science community only 30 years ago. The theory explains the origins of volcanoes and earthquakes and the locations of mountain belts and oceans. Topics such as continental drift, earthquake analysis and prediction, the creation and destruction of the ocean floor, Pacific "Rim of Fire," and movement on the San Andreas Fault are explored. Short in-class presentations, one ten-page research paper with opportunities for revision and peer review, and quantitative homework sets required.
Prerequisites: fy, soph with experience with trigonometry, elementary calculus, vectors, and high school earth science
Instructors: M. Markley
Expected enrollment: 15

GEOL-223-01 - Geology - 2003-2004
(Fall) Planetary Science
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Astronomy 223f)
A first-year introductory course for physical science minors and majors. Topics include origin and evolution of the planets; planetary orbits, rotation, and precession; gravitational and tidal interactions; asteroids, comets, and planetary rings; meteorites; interiors and atmospheres of the Jovian and terrestrial planets; geology, tectonics, and mineralogy of the terrestrial planets and satellites; new data from Mars Pathfinder, Lunar Surveyor, and current NASA missions.
Prerequisites: any physical science course
Notes: 2 meetings (75 minutes); offered at UMass in fall 2003
Instructors: D. Dyar

GEOL-223-01 - Geology - 2003-2004
(Spring) Planetary Science - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Astronomy 223f)

GEOL-225-01 - Geology - 2003-2004
(Fall) Evolution of North American Landscapes - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Geography 225f)
The landscapes of Earth are the result of complex processes and have evolved dramatically since the planet's formation over 4.5 billion years ago. In this course we examine the geologic evolution of the North American continent and its natural features. Using narrative descriptions, scientific articles, maps, photographs, and videos, in addition to the texts, we tour North America and explore the origin and anatomy of its landscapes, including national parks and monuments. We then consider how the geologic setting or physical environment influenced human exploration and settlement of the continent.
Prerequisites: high school earth science or any 100-level geology course or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: L. Savoy

GEOL-226-01 - Geology - 2003-2004
(Fall) Ocean Environments - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Because more than 70 percent of our planet is covered by ocean water, the study of marine systems is crucial to our understanding of the Earth. In this course, we will examine chemical, physical, geological, and biological dimensions of the marine environment at a variety of scales in time and space. Along the way, we will explore how the Earth's oceans formed, how they provided the foundations for life, and how they continue to control weather and climate, stabilize global chemical cycles, interact with terrestrial systems, and give us access to valuable resources. Discussions and field trips may be planned to augment other course activities and materials.
Notes: 2 meetings (75 minutes); does not normally satisfy Science and Math II-B requirement, but may be arranged with permission of instructor
Instructors: K. Moody

GEOL-227-01 - Geology - 2003-2004
(Spring) Groundwater - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
The demand for and the contamination of groundwater resources are major societal concerns. To better understand the dynamics of the groundwater system, we cover topics including the hydrologic cycle, surface and subsurface hydrology, groundwater resource evaluation, and groundwater geotechnical problems. Students prepare weekly problem sets, a term paper, and an oral presentation. Many of the homework problems involve computer applications.
Prerequisites: high school earth science or any 100-level geology course
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: A. Werner
Expected enrollment: 15

**GEOL-240-01** - Geology - 2003-2004
**Geological Resources and the Environment** - *Not offered this year/term*
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
This course is a survey of the geology of important mineral deposits and energy resources, the factors that govern the economics of their production, and the environmental implications of their exploitation.
Notes: 3 meetings (50 minutes)
Instructors: S. Dunn

**GEOL-250-01** - Geology - 2003-2004
**The Biosphere** - *Not offered this year/term*
(Credit/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Speaking- and writing-intensive)
The biosphere has a pronounced geochemical influence on the Earth; indeed, life has been called the greatest geological force. In this course, we will study the chemistry of life through geologic time and examine its influence on the formation and weathering of rocks, on the composition and temperature of the atmosphere, on the accumulation of gas hydrates and other hydrocarbon resources, and its role in the initiation of naturally occurring, water-mediated nuclear reactors. We will also take a close look at the Biosphere concept of Vladimir Vernadsky, the Gaia hypothesis, and Hypersea theory, and the ways in which these concepts inform our understanding of life's geological impact.
Instructors: M. McMenamin

**GEOL-290-01** - Geology - 2003-2004
**Ethnoarchaeology and Geology of the Ancient Southwest** - *Not offered this year/term*
(Geography 290f)
The American Southwest is a geologically and culturally striking landscape that has been continuously inhabited by indigenous peoples for thousands of years. Cotaught by an earth scientist and bioarchaeologist, this interdisciplinary course examines the complex interrelationships between geological and ecological processes, and human culture and biology of the ancestral Pueblo people in the Southwest. A key feature is a group field trip (over fall break) to the Southwest, where we consider questions on the nature of changing landscapes, environmental constraints, and biocultural processes for both ancient and modern Pueblo people.
Prerequisites: permission of instructor
Instructors: L. Savoy, D. Martin
Expected enrollment: 15

**GEOL-295-01** - Geology - 2003-2004
**Independent Study**
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Prerequisites: soph and permission of instructor

**GEOL-307-01** - Geology - 2003-2004
**Remote Sensing**
(Credit/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course presents the fundamentals of digital analysis of aerial satellite imagery. Students are introduced to the characteristics of Earth images and learn to make qualitative and quantitative assessments of multispectrum and satellite data. Basic photo interpretation exercises are complemented with computer analysis of satellite data for land use and land cover analysis, vegetation stress analysis, and urban hydrology.
Prerequisites: Geography 205
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: Y. Ogneva-Hummelberger
Expected enrollment: 12

GEOL-316-01 - Geology - 2003-2004
(Fall) Scanning Electron Microscopy
Credits/PE Units: 2-4; Requirements met: Meets Humanities I-B requirement
(Biological Sciences 316f)
Notes: satisfies distribution requirement only if taken for 4 credits

GEOL-317-01 - Geology - 2003-2004
(Fall) Perspectives on American Environmental History - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Geography 317f)

GEOL-321-01 - Geology - 2003-2004
(Fall) Paleontology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Community-based learning course; Speaking- and writing-intensive)
This course takes a careful look at the fossil record, emphasizing the history and evolution of the marine biosphere; the recognition, distribution, and significance of faunas and their environments through geologic time; and the paleoecologic significance, evolutionary relationships, and biostratigraphic importance of major groups of fossil-forming organisms. Several local field trips, including one weekend excursion.
Prerequisites: Geology 202, Biological Sciences 213, or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: M. McMenamin

GEOL-322-01 - Geology - 2003-2004
(Fall) Igneous and Metamorphic Petrology
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Studies mineralogical and chemical compositions, classification, genesis, and mode of occurrence of volcanic, plutonic, and metamorphic rocks. Special attention paid to the relationships between rock-forming processes and global plate tectonics. Laboratory study of representative rock suites in hand specimen and thin section, introduction to analytical techniques, and one or more field trips.
Prerequisites: Geology 220 or permission of instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: S. Dunn
Section Instructors: 01 LAB S Dunn

GEOL-323-01 - Geology - 2003-2004
(Spring) Stratigraphy-Sedimentology Without Lab
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
(Speaking- and writing-intensive)
This course is an interpretive study of sediments, sedimentary rocks, and processes of sedimentation. Principles of stratigraphic analysis and correlation of sedimentary sequences are presented, as are interpretations of modern and ancient environments, paleogeography, and paleoclimate. A variety of techniques are employed in this course to permit analysis of stratigraphic sequences and their depositional continuity.
Prerequisites: Geol 230 or permission of instructor
Notes: 3 meetings (50 mins.)
Same as Geol 324 (Strat-Sed) but without the lab.
Instructors: M. McMenamin

GEOL-324-01 - Geology - 2003-2004
(Spring) Stratigraphy-Sedimentology
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
This course is an interpretive study of sediments, sedimentary rocks, and processes of sedimentation. Principles of stratigraphic
analysis and correlation of sedimentary sequences are presented, as are interpretations of modern and ancient environments, paleogeography, and paleoclimate. A variety of techniques are introduced in laboratory exercises and fieldtrips.

GEOL-326-01 - Geology - 2003-2004
(Spring) Seminar: Global Change
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
The earth's climate system is dynamic. Relatively small changes have been associated with profound environmental change; therefore, understanding historic and geologic climate change is paramount to predicting future change. This course reviews the evidence of past climatic change, the prospects of greenhouse warming, and the environmental impact of a warmer world.
Prerequisites: high school earth science or any 100-level geology course or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: A. Werner

GEOL-333-01 - Geology - 2003-2004
(Fall) Structural Geology and Orogenesis - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
This course covers the basic techniques of field geology, structural analysis, and multidisciplinary approaches to mountain building (orogenesis). Lectures concentrate on field techniques, stress, strain, faulting, folding, rock rheology, the relation between rock deformation and metamorphism, isotopic systems and thermal histories of rocks, and geological activity at plate boundaries. Of nine labs, five are field trips that involve collection of original data. Short problem sets emphasize quantitative skills. During the final weeks of the semester, students research the Moine thrust fault in Scotland.
Prerequisites: any 200-level geology course or permission of the instructor
Notes: 2 meetings (75 minutes), 1 lab (3 hours)
Instructors: M. Markley

GEOL-341-01 - Geology - 2003-2004
(Fall) Seminar: Appalachian Geology
Credits/PE Units: 2-4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Seminars offer directed study and discussion of one or more selected topics in geology. Topics vary from year to year. Consult the department for information about future seminars.
This course is a seminar-in-the-field. Through field trips and student research projects, we will explore: the assembly and breakup of the supercontinent Pangaea; the igneous, structural, and metamorphic history of the Northern Appalachian Mountains; the Mesozoic history of faulting, basin growth, and volcanism in the Connecticut Valley; the Ice Age and regional glacial landforms and deposits; and the changing course of the Connecticut River. Evaluation is based on short papers, oral presentations, and participation in the three-day-long New England Intercollegiate Geological Conference.
Prerequisites: completion of at least two 200-level or 300-level geology courses or permission of the instructor
Instructors: M. Markley

GEOL-342-01 - Geology - 2003-2004
(Spring) Seminar: Origin of Animals
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Preamble (for topics courses): Seminars offer directed study and discussion of one or more selected topics in geology. Topics vary from year to year. Consult the department for information about future seminars.
Animals appear rather suddenly in the fossil record, and this seminar examines their origin and early diversification. Discussion topics include the Ediacarans, the Precambrian-Cambrian boundary problem, controversies over the nature of Cambrian phyla, the ecological and environmental constraints on the radiation of major animal taxa. One paper and one presentation required.
Prerequisites: Geology 100 or 101 and 4 credits at 200 level in the department
Notes: 1 meeting (3 hours)
Instructors: M. McMenamin
Expected enrollment: 18

GRMST-100-01 - German Studies - 2003-2004
(Fall) "Shoot the Women First": Re/Viewing Terrorism and Resistance through Images and Films
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive; Taught in English)
Art can be a powerful instrument of resistance against terrorism. To test this hypothesis, we will “read” films, multimedia, and texts, focusing on the stories of individuals involved in acts of terrorism or resistance. We will “meet” 92-year-old Berlin artist Wolfgang Szepansky, who first used his art as a means of survival in a concentration camp. In the film, *The Nasty Girl*, a young woman struggles to unearth the ugly past of her proper townspeople. Other films, from the 1970s to 2002, focus on the urban guerilla terrorists of the RAF and their links to Palestinian fighters and the Secret Police in East Germany: *The Last Honor of Katharina Blum*, *The Legend of Rita Vogt*.
Notes: Members of this course will participate in joint sessions related to the Pontigny symposium sponsored by the Weissman Center for Leadership. Students are encouraged to participate in a January Term class in Berlin, Germany. 2 meetings (75 minutes)
Instructors: G. Davis
Expected enrollment: 20

(Fall) Memories of War and Exile: The Second World War in Photographs, Memoirs, and Fiction
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar (Writing-intensive; Taught in English)
We will explore the documentation of war through images and text with emphasis on the Second World War. How do civilians, soldiers, resistors, survivors, victims, and émigrés directly affected by war remember the experience of war? What is the impact of war on emigrants forced into exile? How is war remembered by nations, institutions, and social groups in Western culture through myth, imagination, and fiction? This course focuses on the memory of the war experience in Germany and France with special emphasis on the impact upon European refugees at Mount Holyoke College. Readings include essays on the role of memory in shaping culture, archival material, and literary accounts of war.
Notes: Members of this course will participate in joint sessions related to the Pontigny symposium sponsored by the Weissman Center for Leadership. Students are encouraged to participate in a January Term class in Berlin, Germany.

GRMST-203-01 - German Studies - 2003-2004
(Fall) Tutorial in German Grammar and Vocabulary I
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Intensive study of German grammatical structure and usage, designed to address individual needs. Focus on increasing proficiency in German grammar, improving writing and reading comprehension skills, and developing learning strategies. Only open to students concurrently enrolled in German Studies 201.
Prerequisites: German Studies 102 or 103 or permission of department

(Fall) Die Grenzen meiner Sprache sind die Grenzen meiner Welt: Reading and Speaking German I
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
(Speaking-intensive)
Students engage in intensive practice in reading and speaking German, using texts selected according to each student's individual interest and academic focus. Students will develop reading strategies and improve their ability to converse colloquially and formally in German. We will utilize the Internet for newspaper, journal, and other sources discussing current political, economic, social, cultural, and historical issues in the German-speaking world. Participation in such speaking activities as presentations, role-playing and simulations, partner work, and small or whole group discussions. German assistants will provide opportunities for interaction with peers during course sessions.
Prerequisites: German Studies 201 or permission of department

(Spring) Creation and Production of a German Play
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
(Speaking-intensive)
Discussion of short stories by authors such as Bertolt Brecht, Doris Dörrie, Benjamin Lebert, Kerstin Hensel and Judith Hermann, and theoretical writings on the theater. Students select a story to adapt as an original one-act play in German. Drafts of the play will be critiqued by students in Germany during two scheduled videoconferences. Students write a substantial essay on a topic determined in consultation with the instructor. The play will be performed at the German Theatre Festival and Competition hosted each spring by. Students can elect the course for 300-level credit by doing additional work. Website: http://www.mtholyoke.edu/courses/dvanhand/2004germ211/
Prerequisites: German Studies 201 or permission of department

(Spring) Studies in German Language and Composition - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
(Speaking- and writing-intensive)
Written and oral expression are strengthened through essays, class discussion, and work with more advanced grammatical structures. Frequent use of Internet resources dealing with current political, social, economic, and cultural issues in German-speaking countries. One unit will focus on Wirtschaftsdeutsch; and students will learn how to write cover letters and résumés for internships and jobs. Students will participate in a Web-Diskussionsforum with students at a German university, prepare an oral report, and write a final paper or design a Web page as a final project.
Meetings with a native German assistant for additional cultural insight and contextual conversational practice.

(Fall) Pasts and Presences in German Culture
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
(Speaking- and writing-intensive)
Major forms of literary texts from the eighteenth century to the present are analyzed, orally and in writing, within their social, political, and cultural contexts and from multiple critical perspectives. We study diverse voices of male and female authors from German-speaking countries, including immigrant writers, on themes important to their and our times: the power and mystery of nature; science and ethics; freedom and social oppression; art and reality; aesthetics and the Holocaust; gender, nation, and identity. Music, films, art, historical and philosophical documents complement literary readings. Students are encouraged to contribute according to their individual interests.
Prerequisites: German Studies 201, 3 or 4 admission units, or permission of department
Notes: 2 meetings (75 minutes)
German 220 (01) is required in conjunction with 221 unless an exemption is granted by the Department.

Major forms of literary texts from the eighteenth century to the present are analyzed, orally and in writing, within their social, political, and cultural contexts and from multiple critical perspectives. We study diverse voices of male and female authors from German-speaking countries, including immigrant writers, on themes important to their and our times: the power and mystery of nature; science and ethics; freedom and social oppression; art and reality; aesthetics and the Holocaust; gender, nation, and identity. Music, films, art, historical and philosophical documents complement literary readings. Students are encouraged to contribute according to their individual interests.

(Spring) Special Topics in German Studies: Young German Writers: Search for Identity
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Preamble (for topics courses): Special Topics in German Studies:
Introduces cultural, social, economic, and political developments in the German-speaking countries from the Middle Ages to the present. Topics include German regional culture and language; art, architecture, and music; women, gender, and family relations; the experience of work and leisure time; contemporary East-West relations; and film studies. Labs help students express themselves in culturally and situationally appropriate ways and develop contextual reading comprehension skills. Requires oral reports, short papers, and exams.

We will study two of the most exciting and controversial periods in German history; The Weimar Republic (1918-1933) and the present-day Federal, or Berlin, Republic. Both eras are characterized by contrasts; liberated New Women vs. traditional gender models; new morality, youth movements, and protest vs. (new) conservatism; influence of the U.S. on popular culture vs. focus on national(ist) identity; Weimar film vs. New German Cinema; Nazi vs. Neo-Nazi threat; economic wealth vs. high unemployment. Moreover, contemporary Germany also faces East-West issues: does the Mauer im Kopf still influence literature, music, art, and politics today, or is it finally falling down?

(Spring) Senior Seminar: Der Schatten eines Traumes": Gender and Society in 19th Century German
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
(Speaking- and writing-intensive)
Preamble (for topics courses): This seminar is designed to explore the complex nature of our field of inquiry. We explore such questions as: What does German studies mean? What is interdisciplinary work? What role does literature play in culture studies? What is the relationship between language and the construction of culture? What meanings have been attributed to the terms: "culture" and "civilization"? Texts from a variety of disciplines. Students compose term papers or Web projects on topics related to their major field(s) of interest. This course is required of all senior majors and fulfills a 300-level major requirement for the nineteenth or twentieth century, dependent on work pursued for the semester project.
Why and how do a twentieth-century German author and director represent the terror of the French Revolution? What kind of political and psychological terror/ism led to the mysterious case of Kaspar Hauser depicted by jurists, educators, psychologists, and artists since 1828? How do writers and filmmakers reflect upon various forms of terror/ism from Nazism to RAF, PKK, and Islamist extremism, and the state's reactions to them? How do they define "terror/ism," and which strategies of resistance are depicted in their works? Authors and filmmakers include: Weiss/Zadek, Brecht, Feuerback, Böll, von Trotta, Schlöndorff, Herzog, Schnitzler.
Prerequisites: Sr, 12 credits including one 300-level course, nonseniors by permission of the department
Notes: 2 meetings (75 minutes) or 1 meeting (2 1/2 hours), This course fulfills an eighteenth-, nineteenth-, or twentieth-century 300-level requirement for the major, depending on the topic of a student's semester project.

History

(Fall) Foundation: The Revolutionary Tradition in France and Europe, from Robespierre to Lenin
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar (Speaking- and writing-intensive)
The French Revolution of 1789-1799 shook the foundations of Europe in its day and continued to shape the history of Europe and the world thereafter. This course studies the Revolution and its varied legacies of popular sovereignty, democratic republicanism, and modern citizenship as well as the countervailing forces of reaction and conservatism. Topics will include the modern conception of revolution, shifting conceptions of citizenship, critiques of inequality, ideologies of inclusion and exclusion in nationalism, liberalism, and socialism, and the revolutionary tradition in Victor Hugo’s *Les Misérables*.
Notes: 2 meetings (75 minutes)
Instructors: R. Schwartz
Expected enrollment: 15

(Fall) Foundation: Heroes and Heroines
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar (Writing-intensive)
The great become godlike, but how are they transformed? Deeds of valor are one way, but violence is not the only road to the sacred. The courage of self-sacrifice and the vision of the philosopher are also ennobling. What social facts determine definitions of heroism? Are male and female heroism essentially the same or fundamentally different? Students investigate the core connections among free will, honor, and the divine to discern how ordinary people become extraordinary. Readings include *The Iliad*, the *Odyssey*, *Iphigenia*, *Antigone*, *The Apology*, the lives of saints and martyrs, *Beowulf*, *Roland*, and *Lancelot*.
Notes: 2 meetings (75 minutes)
Instructors: F. McGinness
Expected enrollment: 20

(Fall) Colonial Communities, Creole Lives: Interracial Sex, Miscegenation, and National Desire
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar
This course examines sites of sexual intimacy between colonizers and colonized in the Americas, South Asia, and Africa from the seventeenth century onward. By examining communities that were produced out of interracial sex, the readings address how racial, familial, and national affiliations were created in response to sexual transgressions. The course examines how social, racial, and political differences were represented and constructed in the first moments of cultural contact between Europe and the rest of the world. Themes include perceptions of the marvelous, the exotic and the erotic, and colonial policies to maintain gender and racial boundaries.
Notes: 2 meetings (75 minutes)
Instructors: D. Ghosh
Expected enrollment: 15

(Spring) Foundation: Justice: Ideals and Practices in History - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar (Community-based learning course)
In the spring semester of this yearlong course, community-based projects will challenge students to use both library research and participation in contemporary institutions and social action projects to develop arguments proposed during the fall semester and to refine analyses of changes in ideologies and institutions since the late European Middle Ages. Off-campus fieldwork may vary, but past projects include work with the Mass Commission against Discrimination, the Coalition for Authentic Reform of Education, Jobs with Justice, and a local DA's office. (See History 101f for first semester's course description.)
Prerequisites: History 101f
Notes: 1 meeting (2 hours) and off-campus projects; This is a first-year seminar
Instructors: H. Garrett-Goodyear

(Fall) Ancient Greece and Rome - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
A survey of the political, social, and cultural history of Greece from the Bronze Age to Alexander, and Rome from the Tarquins to Constantine. We shall strive to recreate the entire experience of these peoples; their art, philosophy, and religion; their democratic and imperialist politics; the social dynamics of their clans and families; technology and trade. Special emphasis on the city-state and its meaning in Western history. Sources include Homer, Thucydides, Plato, Livy, Tacitus, various plays, trials, and laws.
Notes: 2 meetings (75 minutes)
Instructors: F. McGinness

HIST-121-01 - History - 2003-2004
(Spring) The Middle Ages: 312 to 1300
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course offers a survey of the politics, society, and daily life of medieval people, defining the medieval vision and analyzing its components: the legacies of Rome, the barbarians, and the Church as they affected political, social, economic, and cultural spheres. Topics include the growth of kingship, technology and feudalism, monasticism, popular culture, courtly love, and the image of women.
Notes: 2 meetings (75 minutes)
Instructors: F. McGinness

HIST-124-01 - History - 2003-2004
(Spring) History of Modern South Asia, 1700 to the Present
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course seeks to give a broad overview of the history of the South Asian subcontinent from the end of the Mughal empire to the present. As one of the largest and longest occupied postcolonial regions, the Indian subcontinent has been witness to more than two centuries of colonialism. Prominent themes: the emergence of religious and regional identities, ethnic violence, social reform and the "woman question," deindustrialization, and nationalism. We will consider how the history of this region has been written, by whom, and why. Using primary and secondary sources, this course addresses these questions and raises more about whether there is such a thing as one history of South Asia.
Notes: 2 meetings (75 minutes)
Instructors: D. Ghosh

(Fall) Native American History to 1783
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This course examines the histories of Native Americans from pre-contact times to the end of the American Revolution. Utilizing primary and secondary sources, we will look at native cultures prior to contact, and the effects that European colonization, trade, warfare, religion, and pathogens
had on native peoples and their communities. We will also consider the various strategies (diplomatic, military, and spiritual) that native peoples employed in their efforts to cope with the newcomers from Europe and to maintain their way of life.

Notes: 2 meetings (75 Minutes)
Instructors: R. Carpenter

(Spring) Native American History, 1783 to the Present
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This course examines the Native American experience within the United States from the end of the American Revolution to the present. Topics will include resistance to American expansion, removal, the losing of the West, assimilations, revitalization movements, and Native American activism. Finally, we will consider the (mis)perceptions and (mis)portrayals of native peoples that are still found in American popular culture.

(Fall) Japan Since 1600 - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Asian Studies 133)
This course examines Japan's emergence in the nineteenth century from more than 200 years of self-imposed isolation, the process of political and economic modernization, and the attempt to find a secure and significant place in the Western-dominated world of the twentieth century. It focuses on the formation of a modern state, industrialization, Western imperialism and the rise of pan-Asianism, the Great Depression and the rise of military government in the 1930s, postwar Japan under U.S. military occupation, and problems of rapid economic growth in recent years.

(Spring) Modern Korea
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Asian Studies 135)
An introduction to Korean history since the fourteenth century. After a brief introduction to geography and premodern cultural forms, the course will survey the evolution of the Yi dynasty (1392-1910) in the religious, intellectual, and socioeconomic realms. The second half will focus on Korea's interaction with the Euro-American powers and the rising Japanese empire (nineteenth and twentieth centuries). We will examine the devastating effects of imperialism, colonial occupation, civil war, and long-term division, which have also enabled rapid economic development since the 1960s.

(Fall) Identity and Community in Early Africa
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
First-year seminar (Speaking- and writing-intensive)
What made communities cohere and how did people understand their place in society in the African past? This class introduces African patterns and principles of social organization from limited associations such as clans or drums of affliction to the encompassing community of medieval Islam. Activities designed to give participants confidence in oral presentations begin with retelling oral narratives and culminate with a debate concerning the causes and consequences of the slave trade. This seminar will be taught in coordination with English 101, Into Africa.

(Spring) Violence and Social Change in Modern Africa
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This course examines processes of change that have shaped modern Africa. It seeks to provide both the information and the conceptual tools necessary for an informed interpretation of African affairs presented (and not presented) by popular media. Using fiction, historical narratives, and a wide range of interdisciplinary sources, the class examines nineteenth-century interactions of Africans and Europeans and the nature of colonial conquest, economic and social change during the colonial period, and the emergence of postcolonial African societies.

(Fall) Europe and the Atlantic World, 1300-1700 - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Speaking- and writing-intensive; Medieval Studies 102s (01))
This course inquires into several dimensions of European society and culture during the transition from principalities and fiefs to early modern states, from feudalism to capitalism, from serfdom to both free and slave labor. Equally important, however, will be comparison of western Europe with other Atlantic societies of these centuries and examination of consequences for Europeans, Africans, and Americans (north and south) of encounters among them. Using both voices from the period and recent scholarship about early modern Western and Atlantic societies, the course will look critically at the making and remaking of “Western” culture between the Middle Ages and the modern era.

HIST-161-01 - History - 2003-2004
(Fall) History of Britain and the British Empire, 1707 to the Present
This course charts the making of modern Britain both as a nation and as an empire. The course brings British metropolitan interests into the same field as British colonialism and examines how political and social change in Great Britain shaped imperial activities and vice versa. How did the Industrial Revolution affect the expansion of the British empire? How did objectionable activities in the colonies, such as slavery and famine, give rise to humanitarian and feminist discourses? How did a small nation manage to rule over a quarter of the world's population? We will examine the history of Britain as it struggled with what it meant to be "colonial" and "modern" at the same time.

**(Fall) History of Global Inequality**
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Community-based learning course)
Why are some nations so much richer and more powerful than others? This course demonstrates that global inequality is not natural; it has a history. Exploring patterns of exchange that developed among regions of the world over the past 600 years, we will ask about the role of power in the establishment of practices of production and exchange. We will explore how cross-regional productive systems benefited some participants at the expense of others. Having traced the consequences of unequal exchange over several centuries, we will ask how global trade and production would have to change for all participants to benefit equally. The course includes a community-based learning component.

**(Spring) African Popular Culture**
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This class uses popular music, dance, fiction, film, street art, bus slogans, newspapers, and other sources to document African interpretations of the decades since "flag independence" in 1960. We will let African musicians, writers, filmmakers, and artists direct our investigation of the big questions of the class: Why is the gap between rich and poor in African societies increasing? What is happening to gender relations? What do African people think of their political leaders and how do they imagine political situations might improve?
Notes: 1 meeting (3 hours) plus 4th hour
Instructors: H. Hanson

**(Spring) Magicians, Witches, and Demons**
Both white and black magic were practiced throughout Europe for centuries before the high Middle Ages saw an important shift in the definition of witchcraft. Instead of magicians being seen as healers with herbal lore, in the late medieval period the Church defined them as witches whose power came directly from the devil. We will explore how, from being a necessary if frightening aspect of life in a magical world, witchcraft became a heresy based on Satanic pacts and rituals, and how the persecution of witches culminated in a violent witchcraze at the same time that many Enlightenment philosophers were advocating rationality as the human ideal.

(Fall) Topics in the Recent History of Europe: From Habsburg to Hitler: Bohemian Politics, 1848-1945
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course explores the complex, often comic, and ultimately tragic history of Bohemia, a territory located today in the Czech Republic, but previously a part of the Habsburg Monarchy, then of Czechoslovakia, and then of Hitler's Third Reich. Students will complement historical studies with autobiographical material and contemporary fiction, beginning with the Revolution of 1848, progressing through the achievements and worrisome trends of Emperor Francis Joseph's 68-year reign, and concluding with the world wars. Emphasis on the interplay among Czechs, Germans, Jews, and other pivotal players: the House of Habsburg and its supporters, and the political elites of neighboring countries.

(Fall) German History in the Modern World
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course pushes beyond cliches and simplistic images about Germans, into the world-shaping and humanity-stretching German past. Beginning with the Napoleonic Wars and the emergence of German nationalism, students will follow developments up to the present--using primary sources that range from sublime to depraved and that concern politics, literature, music, and more. Themes include the roots of Nazism and of German democracy and the responsibility of individuals for social outcomes.

(Fall) U.S. Women's History since 1890 - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Women's Studies 200)
This course examines the history of women and the cultural construction of gender in the United States since the end of the last century. How have class, race, and ethnicity shaped the history of women's work, debates over female sexuality, women's work for social change, and representations of women in cultural and political contexts? In what ways has gender contributed to racial consciousness and class formation in the United States? Using primary and secondary material, we will examine "women's experience" in the realms of work, politics, sexuality, and reproduction.

(Spring) Topics in the Recent History of the United States: Oral History and Critical Pedagogy: Documenting the Widening Divide
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Preamble (for topics courses): These courses are designed for students with a background in American history who wish to focus attention on developments since the late nineteenth century.
In the 1930s, efforts such as the FSA Photo Project and the Workers Film and Photo League used media arts to represent the hardships and struggles brought on by the massive breakdown of our economic system. Beginning with these models of cultural activism, methods in oral history and critical pedagogy will be learned to document and represent widening political and economic disparities in our time. Topics for oral history work might include the effects of welfare cutbacks and youth visions of their futures. This course will examine how oral history may be represented in more engaged public ways and how the classroom may serve as a space for critical intervention and reflective action.

(Fall) Goddesses and Slaves, Mary and Eve: Women in the Ancient, classical and Medieval West
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Women's Studies 200 (02))
How did religious images of goddesses, saints, and women affect the lives of real women in the Greco-Roman world and medieval Europe? We explore how the ideas about what women are and which traits are "feminine" that developed in ancient Greece and classical Rome came to define women's roles in those cultures, and consider how Christianity introduced new perceptions of women. Did the Eve/Mary dichotomy of Christianity take away other possible definitions of what women could be? Did those changes benefit women or not? We will trace how religious beliefs and social organization shaped images of idealized women and affected the lives of real ones.

(Spring) The Querelle des Femmes and Feminism: Women and Politics in Early Modern and Modern Europe
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
The Querelle des Femmes was a centuries-long debate over the nature of women that began by questioning whether women were inherently good or evil before shifting the focus to whether women were capable of rational thought. As education became more important for the ruling aristocracy, the issue of educating women came to the fore. Heavily influenced by both the Querelle and the Enlightenment, early feminist movements in Europe shifted the argument away from rationality to women's ability to contribute to society. How did this intellectual dispute redefine women's political roles? We will use a variety of primary and secondary sources to answer this question.

(Fall) Colloquium: Reading the New York Times: Journalism, Power, History
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(American Studies 301F (01))
This course will examine the political and cultural power of the New York Times in the American past and present. Students will analyze the Times today through careful, daily readings. They will also study its evolution as an institution, as well as its coverage of and involvement in several of the critical historical events of this century. By focusing on the Times as the most influential "agenda setter" in American journalism, we will also address the larger issues of objectivity, bias, and influence in the mass media.

(Spring) Colloquium: Affirmative Action in International Historical Perspective
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
This course uses an international, historical, and comparative approach to gain insight into "affirmative action," or government policies that rely on racial classification and have the avowed goal of achieving a more genuine civic equality. What kinds of affirmative action have been attempted, and how have they differed--or coincided--in their political foundations, logic, mechanics, and effects? Cases examined include the Habsburg Monarchy circa 1900-1914, the early Soviet Union, and the United States since the Second World War.

(Spring) Asian History: The Japanese Empire, 1868-1945
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Assign Studies 331)
Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.

A research seminar on Japan's imperial venture from its inception in the 1870s to its rapid expansion and calamitous defeat in the 1940s. The enormous size of the Japanese empire at its height demands that we study a wide variety of local situations, indigenous peoples, and specific adaptations of and to Japan's imperial style and organization. After initial secondary readings, each student will identify a research question then discover her own sources to answer it in a 20-page final essay.

(Spring) Gender and Colonialism: Masculinities, Feminisms, and the Imperial State

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.

This course considers how gender was a central frame for regulating political and social relations in European empires and their colonies in the last 200 years. The readings bring interrelated historical themes into play: the multiple ways in which masculinity and its privileges structured the ways that European men negotiated with non-European men over questions of political authority; how women, both European and native, became a focus of social, cultural, and sexual regulation. A final theme addresses the relationship between European feminist discourses and feminist movements in colonies. Students will be asked to analyze a memoir, travel narrative, or another primary source.

(Medieval Studies 300(01))

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.

This survey of Western monasticism from its origins in the Egyptian desert to the mendicant orders of fourteenth-century Europe seeks to understand what motivates men and women to define perfection as abnegation of food, sex, wealth, success, and even laughter - all that we now consider valuable in life. Topics: fasting, virginity, voluntary poverty; monastic rules and reform movements (e.g., Celtic, Benedictine, Cistercian, Franciscan, etc.). Also various saints' lives, mysticism, and women's spirituality. Course includes a stay at the Abbey of Regia Laudis.

(Fall) Female Power in Early Modern Europe

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

(Women's Studies 333 (06))

This course will examine the sudden rise of women rulers in sixteenth-century Europe and the male reaction to it. What happened that led to both France and England being ruled by women during the upheaval of the sixteenth century, and why was the idea of female rule so threatening to men? What steps did men take to limit women's political power, and how did women evade those restrictions? We will explore how women who were excluded from official power could nevertheless play an important political role while Europe coped with the turmoil of the Reformation, the evolution into modern nation states, and the challenges of Enlightenment.

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.

The "long" nineteenth century, stretching roughly from the political ascendency of Napoleon Bonaparte to the outbreak of the First World War, was one of drama and contradictions. Europe was rocked by revolutions, and yet it attained unprecedented prosperity and secured its hold over colonial empires. New categories and loyalties arose: the nation began to supplant the dynasty, and ties between individuals were increasingly based on market
relations rather than traditional obligation. Capitalists and socialists alike declared their faith in the power of industry, science, and progress. It was in every sense the century of both Darwin and Marx.

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Biological Sciences 308s)

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.

(Fall) Early American History: North American Fur Trade
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Speaking- and writing-intensive)
This course examines the growth and impact of the Colonial fur trade on Native American peoples, their societies, and the environment of North America. Among the topics that we will investigate will be the growth of the fur trade and the consumer revolutions and conflicts that it initiated among native peoples. We will also consider the influence the trade had on European and native relations, both diplomatic and interpersonal. Readings will include ethnohistories and primary sources. The course will be writing intensive, with papers due about every two weeks. Students will also be required to give two oral presentations.
Prerequisites: Written application and permission of instructor
Notes: 1 meeting (3 hours)
Instructors: R. Carpenter

HIST-381-01 - History - 2003-2004
(Fall) Recent American History: American Labor History: The Struggle for Justice
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.
Analysis of major trends in the changing nature of work and working-class movements from 1870 through the 1980s. Topics: labor unions and social movements, the articulation of capitalism, the State as a mediator in capital/labor relations, gender and racial equity, technological change, economic shifts, and cultural developments relevant to working Americans, as well as several major theories of the labor movement, and on the works of historians who have focused on the so-called “labor question.” Underlying all content is the assumption that the relationship between employer and employees under advanced capitalism is an inherently unequal one.
Prerequisites: written application and permission of instructor
Notes: 1 meeting (3 hours)
Instructors: R. Weir
Expected enrollment: 15

HIST-381-01 - History - 2003-2004
(Spring) Recent American History: American Radicalism
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Preamble (for topics courses): Research Seminar: A 300-level class requiring students to engage in primary and secondary source research in the history of particular times and places, resulting in a substantial piece of historical writing.
This research seminar will explore a variety of Left radical traditions in the United States from the late nineteenth century through the end of the twentieth. What does it mean to be “a radical,” and how have definitions changed over time? What impact have American radicals had on electoral politics and the larger society? We will pay special attention to the connections between political and cultural radicalism, as well as to government and private campaigns aimed at suppressing radical movements. Topics: Gilded Age labor movements; Eugene Debs and American socialism; bohemian radicalism; African American radical movements; the American Communist Party; peace activism; radical feminism.
Prerequisites: written application and permission of instructor

Interdepartmental Courses

I-100-01 - Interdepartmental Courses - 2003-2004
(Fall) Course Studies in Quantitative Reasoning - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
First-year seminar (Writing-intensive; Mathematics 100f)
This course helps students recognize, evaluate, and use forms of quantitative reasoning and argument. For fall 2002, the course will introduce basic concepts of statistics and Geographic Information Systems (a combination of computer-assisted cartography and data analysis). Using these tools, we shall explore problems involving environmental history and current aspects of social inequality. In a PC computer laboratory, students search for patterns in real data, observe and summarize relationships, formulate and test hypotheses, and study connections among hypotheses, predictions, and actual results. Laboratory reports on each case study culminate in a paper.
Prerequisites: priority given to fy, soph, FP
Notes: 2 meetings (75 minutes), 1 lab; This is a first-year seminar
Instructors: P. Dobosh, R. Schwartz, E. Townsley
I-102-01 - Interdepartmental Courses - 2003-2004
(January) Women and Philanthropy
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
This course will cover the role of the endowment in non-for-profit organizations; the role of women in not-for-profits; and the general role of philanthropy in society.

(Spring) Seeing the Light
Credits/PE Units: 4; Requirements met: Meets Science and Math II-C: Natural and physical sciences without lab requirement
First-year seminar
Light literally and figuratively permeates our existence and illuminates our thinking. This course explores the physical properties of light and how our understanding of light (electromagnetic radiation) unites all branches of science. Tangential topics include the causes of color, color vision and perception, how energy and matter interact, the energy budget of the earth, our perception of the universe, and why everything is relative. Quantitative skills will be emphasized in reading and writing assignments, and remedial mathematics assistance provided in a fourth hour.
Notes: Not available to students who have taken I-142, Light, the Universe and Everything
Instructors: S. Dunn
Expected enrollment: 15

I-109-01 - Interdepartmental Courses - 2003-2004
(January) Putting the Issues back into Massachusetts Politics
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
An analysis from a pioneering woman leader in Massachusetts politics of the challenges, compromises, and leadership required to formulate public policy. Key issues to be discussed: the expansion of the state hate crimes law to include sexual orientation and disability (as majority floor leader, Senator Melconian shepherded the bill through the state senate) and the challenges of implementing state educational reform in a local and diverse urban setting.
Notes: Meetings will be held on January 7, 14, and 21 from 7-9 PM. Weissman Center course.
Instructors: L. Melconian

I-111-01 - Interdepartmental Courses - 2003-2004
(Fall) Writing Elements
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
Through intensive work on papers in progress and short new writing assignments, this course will concentrate on problematic elements of writing, and work toward mastery.
Notes: Meetings will be arranged to fit student's schedules. Meetings will be held from October 6, 2003 until November 25, 2003.
Instructors: S. Oury

Instructors: A. Balares, T. Delong, M. Graham-Davis

I-142-01 - Interdepartmental Courses - 2003-2004
(Fall) Light, the Universe, and Everything
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
(Speaking- and writing-intensive; Astronomy 142)
Beginning with the phenomena - on both sides of the eye - that give rise to visual sensation, we examine cosmic structure on all levels: from the subatomic, molecules and cells, organisms and species, and up to planets, stars, and galaxies. This structure exists in time as well as space, so that we can "see" evolution from the earliest microseconds into the present-day complexity. We pay particular attention to the mechanisms whereby life operates within the cosmic hierarchy: how it obtains energy and material, stores information, and ultimately has the capacity to look into time and space to read this story.
Notes: 1 lecture (75 minutes), 1 discussion (75 minutes) plus labs, including evenings at the observatory; students passing Interdepartmental Courses 142 and 242 will fulfill both a II-A and a II-B requirement; students passing only one semester will receive credit for one lab science
Instructors: T. Dennis, K. Dorfman, R. Zissell

(Spring) Interdepartmental Topics: Intergroup Dialogue

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

(Speaking-intensive)

One of the main goals of intergroup dialogue is to encourage informed dialogue rather than debate between participants. Informed dialogue—a process of interactive communication and education that encourages voicing, listening, asking clarifying questions, gathering of information from different perspectives, reflection, and analysis—is a particularly effective method of dealing with conflictual issues in diverse groups. Students will be both participants in and observers of dialogue groups for the purpose of learning group facilitation and leadership skills.

Instructors: S. Pliner

Expected enrollment: 16

I-229-01 - Interdepartmental Courses - 2003-2004

(January) Gods and Monsters: Science and the Horror Movie

Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.

Science and scientists evoke a broad range of cultural responses, ranging from quasi-religious scientism to abject fear and loathing. In this course, we will ask questions about how and why science elicits fear, using horror movies—which often present science as directly threatening, or use it as a metaphor for extra-scientific anxieties—as our primary texts. We will combine viewings of horror movies that address science as a locus of fear with widely ranging readings, including the great 19th century horror novels that first yoked science and horror in the popular imagination. *Warning: Not for the squeamish!*

Notes: 5 meetings per week (Monday – Friday, 10 – 4)

(Speaking- and writing-intensive)

This seminar examines a variety of case studies relating to economic statecraft, with an emphasis on American Foreign Policy. How effective are economic sanctions for foreign policy goals? How does the U.S use foreign aid for political purposes? Why does the U.S. provide development assistance - and how effective are such programs? Are free trade agreements good or bad? Is the WTO simply a tool of American Foreign policy? Or does it serve a wider purpose? How has the Bush Administration sought to use economic statecraft in the "war on terror"?

JWST-104-01 - Jewish Studies - 2003-2004
(Fall) Introduction to Judaism
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Religion 104fs)
Judaism is a 3,500-year-old tradition that has developed over time as Jewish communities all over the world creatively interacted with the different cultural and historical milieus in which they lived. This course explores the ways in which Judaism has sought to transform ordinary life into sacred life. What are the ways in which Judaism conceives of God, and what is the meaning of life? What roles do study, prayer, ethics, sex, marriage, family, rituals of the life cycle, and community play in Judaism? These and other questions will be taken up through study of diverse types of religious literature and historical evidence.

**(Fall)** Texts and Readers: Introduction to the Religious Classics of Judaism - **Not offered this year/term**  
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement  
(Religion 208fs)  
The study of a religious textual tradition that is thousands of years old is like an archaeological dig. One uncovers layer upon layer of cultural meaning. This course surveys the most important and influential layers of Jewish textual culture: Biblical narrative and law; rabbinic theology and law; medieval mysticism, philosophy, ethics, and poetry; and examples of modern Jewish thought. How does one layer build upon those prior to it? What is the role of various historical communities in the process of interpretation and innovative reading?

JWST-222-01 - Jewish Studies - 2003-2004  
**(Fall)** Engendering Judaism: Women and Jewish Tradition  
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement  
(Speaking-intensive; Religion 222f)  
This course examines the representations and roles of women in Jewish culture, from the literature of the Hebrew Bible to the contemporary period. What were the distinctive ways in which women’s religious life expressed itself by way of prayer and ritual practice? Were there women mystics and visionaries? How did women exert their influence as mothers and wives? There will be significant focus on the dramatic developments taking place among contemporary Jewish women: innovative rituals and experimental liturgies; opportunities to become rabbis; new approaches to God, theology, and social issues; the Jewish lesbian movement; women’s writing and documentary filmmaking.  
Notes: 2 meetings (75 minutes)

Introduction to Jewish Mysticism - *Not offered this year/term

Credit/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Mysticism refers to a type of religious life in which individuals seek intimate and personal, direct and intense experience of the Divine. There exists a rich and fascinating Jewish mystical tradition with hundreds of books of diverse kinds. This course examines the Kabbalah of thirteenth-century Spain, focusing upon the seminal work of this period, the Zohar; the synthesis of mysticism and messianism that occurred in the city of Safed (in the Land of Israel) in the sixteenth century; and the popular pietistic movement of Eastern Europe from the eighteenth century forward, Hasidism; and various expressions of mystical spirituality in our own time.

The Quest for Meaning after the Holocaust - *Not offered this year/term

Credit/PE Units: 4; Requirements met: Meets Humanities I-B requirement

The destruction of European Jewry by the Nazis during the Second World War was the most devastating tragedy in all of modern Jewish history and perhaps of the twentieth century as a whole. The Holocaust poses fundamental questions for all people about what it means to be human, the nature of social community, and about religious faith and tradition. This course explores significant attempts to come to grips with these moral and philosophical questions through literature, religious thought, and film, including the work of Paul Celan, Primo Levi, Elie Wiesel, Aharon Appelfeld, Arthur Cohen, Richard Rubenstein, Jean Amery, Claude Lanzmann, Eva Fogelman, and Pierre Sauvage.

LATIN-312-01 - Latin - 2003-2004
(Fall) Roma Ludens: Comedy and Satire in Ancient Rome
Credits/PE Units: 4; Requirements met: Meets Language requirement or Humanities I-A requirement
Could Romans be funny? Perhaps surprisingly in a culture where seriousness (gravitas) and sternness (severitas) were praiseworthy attributes, Romans enjoyed theatrical productions adapted from Greek comedies that could be raucous and ribald farces. They also believed that satire, poetry that poked fun at the vices and foibles of human nature, was a truly Roman genre. We will begin with a Roman comedy and then turn to selections from the satires of Horace, Martial, and Juvenal.
Prerequisites: Latin 222 or permission of instructor; 2 meetings (75 minutes)
Instructors: G. Sumi

(Spring) Puerto Rican Literature and Society: Borinquen to El Barrio - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
An examination of the rise of national society in Puerto Rico and the literary forms in which it finds expression. Emphasis is on the historical context, artistic evolution, forms, moods, settings, and characteristic concerns of that expression, including a probe of the impact on and changes in literary utterance effected by annexation to the United States. The emergence of a uniquely Puerto Rican literature within the American metropolis, its distinctive character, voice, texture, and cultural singularity will thus be an important part of our concern.

LATAM-276-01 - Latin American Studies - 2003-2004
(Spring) Contemporary Caribbean Societies: Cuba and the Dominican Republic: Revolution and Reaction - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
Third in the ongoing cycle of self-contained examinations of a distinctively regional and cultural subdivision of the Antillean archipelago, which includes The Haitian Condition: Dessalines to Duvalier and Beyond, and Revolution in the West Indies: Trinidad, Jamaica, Guyana, Grenada. This course's special concern will be an exploration of the unfolding patterns of historical, social, and cultural development of society in Cuba and the Dominican Republic into the immediately contemporary period.
Prerequisites: soph, jr, sr, 4 credits in Latin American studies, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: R. Márquez

(Spring) Caribbean Women Writers - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
Comparative examination of contemporary women's writing in the Caribbean. Emphasis will be on their engagement with issues of history, cultural articulation, race, class, gender, and nationality, including exploration of their formal procedures, individual moods, regional particularity, and general impact as writers. Rosario Ferré, Ana Lydia Vega, Julia Alvarez, Edna Brodber, Maryse Condé, Simone Schwarz-Bart, Jean Rhys, Beryl Gilroy, and Rosa Guy are among those whose works we will review.
Prerequisites: soph, jr, sr or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: R. Márquez

LATAM-278-01 - Latin American Studies - 2003-2004
(Fall) The Fiction of History: Historical Truth and Imaginative Invention in the Latin American Novel
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
Examination of the scope, reach, and limits of the Latin American variant of the historical novel as a narrative form. The variety of ways in which it fictionally strives to recreate "certain crisis in the personal destinies of a number of human beings [which] coincide and interweave with the determining context of an historical crisis," the historical vision each writer brings to the work, will be given particular attention.
Prerequisites: soph, jr, sr or permission of the instructor
Instructors: R. Márquez
(Fall) Topics in Latin American Studies - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

Preamble (for topics courses): Designed for students who have had an introduction to Latin America through Latin American Studies 180 or 181 or a course on Latin America in some other discipline (anthropology, history, literature, or politics, for example), this course studies significant problems relating to Latin America in greater depth from the perspectives of appropriate disciplines. Some topics may be cross-listed with other departments.
Prerequisites: jr, sr, 4 credits in Latin American studies
Notes: 2 meetings (75 minutes)

(Spring) Topics in Latin American Studies: Afro-Latin America: From Slavery to Invisibility
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement

Preamble (for topics courses): Designed for students who have had an introduction to Latin America through Latin American Studies 180 or 181 or a course on Latin America in some other discipline (anthropology, history, literature, or politics, for example), this course studies significant problems relating to Latin America in greater depth from the perspectives of appropriate disciplines. Some topics may be cross-listed with other departments.
Exploration of historical experiences of Afro-Latin American populations since Independence within and outside the nation state. We will question how and why one might study those whose governments define them not as peoples of African descent but as part of a mixed-race majority of Hispanic cultural heritage, who themselves may often have supported this policy, and who may have had compelling reasons to avoid official scrutiny.
Readings include turn-of-the-century racialist theorizing in Latin America; historical works using census, economic, criminal, and marriage records; analyses of race in the representation of regions and nations; as well as anthropological and autobiographical works.
Prerequisites: jr, sr, 4 credits in Latin American studies
Notes: 2 meetings (75 minutes)
Instructors: L. Gudmundson

(Fall) Modern Mexico - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

An analysis of the modern Mexican nation-state organized around three major themes: the conflictive yet symbiotic relationship with the United States, from the war of the 1840s through the North American Free Trade initiative of today; the succession of reformist and revolutionary upheavals in 1810-1821, 1856-1867, 1910-1917, the 1930s, and again today, seeking to resolve both problems of the colonial past and new conflicts traceable to the very reforms generated by earlier political and social struggles; and the meaning of Mexican nationality from different ethnic, gender, and class perspectives. Readings include autobiographical and literary works, historical studies, and films.
Prerequisites: soph, jr, sr, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: L. Gudmundson

(Spring) Slavery in the Americas - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

A course, organized topically rather than geographically or nationally, that offers a comparative analysis of African American slavery as a dominant social system in Brazil, the Caribbean, and the U.S. South. Topics include: why slavery?; sugar and slavery; historical demography; culture and the law; kinship and family; long-run economic development; patterns of race relations; master class and racist ideologies; resistance to slavery; and abolition and its aftermath. Readings include historical and anthropological studies, as well as a major documentary collection on slavery in Brazil.
Prerequisites: soph, jr, sr, 4 credits in Latin American studies, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: L. Gudmundson

LATAM-373-01 - Latin American Studies - 2003-2004
(Spring) Studies in Comparative Caribbean Culture: Contemporary Caribbean Writers - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
A sustained, comparative study of the developing canon of at least three major contemporary writers from the Caribbean, representing the region's Spanish-, English-, and French-speaking cultural zones. Articulates the evolution, contours, and scope of each author's unique perception of the New World and, especially, the broadly defining features of what Welsh cultural historian Raymond Williams would have called their peculiarly Antillean "structure of feeling."
Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: R. Márquez

(Spring) Paradigms of New World Thought: History, Race, Class, and Nationality - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
This sustained study of the work of at least two representative New World thinkers emphasizes the national context, distinct intellectual evolution, influence, ideological importance, and wider implications of that work. We will be especially interested in the ways their work engages the drama of history, race, and class as part of a larger notion of nation and against the backdrop of specific historical circumstances. Since the authors studied will change each time the course is offered, a student may receive credit more than once.
Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: R. Márquez

LATAM-376-01 - Latin American Studies - 2003-2004
(Fall) Foundations of the Colonial Enterprise in the Americas - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
Exploration of the historic roots of colonialism, from its antecedents in the Crusades, and the emergence of Columbus' Enterprise of the Indies to the establishment of a multinational constellation of European New World colonies more than two centuries after his fateful voyage. Emphasis is on the ways in which the world before and immediately after Columbus set in place the particular terms, character, and contradictions of modern colonialism, reshaping our conception of the world and laying the foundations for the continuing importance of a variety of dramas still central to our own time.
Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor
Notes: 1 meeting (5 hours)
Instructors: R. Márquez

LATAM-386-01 - Latin American Studies - 2003-2004
(Fall) Central America: Reform, Reaction, Revolution
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement (History 386f)
This seminar explores the diverse experiences of Central American nations in the twentieth century. From a common basis in an export-oriented agriculture, social and political alternatives ranging from social democracy to recurrent military rule, neofascist regimes, and revolutionary socialism have emerged in the isthmus. The course uses materials ranging from autobiography and literature to historical and anthropological studies to understand how this came to be. In addition to national cases, we consider the unique experiences of the area's indigenous and Atlantic-coast peoples within and outside the nation-state framework.
Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor
Notes: 1 meeting (2 1/2 hours)
Instructors: L. Gudmundson

(Spring) Special Topics in Latin American Studies - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement (History 387fs)
Preamble (for topics courses): This course offers advanced students an opportunity for intensive study of a problem with careful attention to research methods and to presenting their work in oral and written form.

Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor

Notes: 1 meeting (2 1/2 hours)

**Spring** Postmodernism and Latin America - *Not offered this year/term*

Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement

(History 388s)

For many the "discovery" of America opened the modern era. Its closing may also have been foretold in Latin America's confounding of diverse theories of modernization and development in recent times. This seminar will introduce the student to a number of both classic and more recent works on Latin America (in English) that advance along postmodernist lines, ranging from cultural contact and conflict, language, meaning, and power in the sixteenth century, to the invention of national identities in the nineteenth century, to discourses of ethnicity, class, gender, and reason in the twentieth century.

Prerequisites: jr, sr, 8 credits in Latin American studies or related field, or permission of instructor

Notes: 1 meeting (2 1/2 hours)

**Spring** Agrarian America: Sugar, Cotton, Coffee, Wheat

Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

This course explores the structure and variety of societies generated in North, Central, and South America by four widely distributed export crops. Although not bound by rigid chronology, our focus will be primarily on the period 1750-1950. Principal concerns of the course are variations by time and place in each commodity's technologies, labor systems, farm sizes, and social structure; the political dynamics associated with each type of farming; and the problematic features of capitalism in agriculture, or, how and when do peasants become farmers and farming agribusiness? Readings in English on cases drawn from throughout the Americas.

MATH-103-01 - Mathematics - 2003-2004
(Fall) Accelerated Calculus
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
A course for students who have taken calculus, but who wish to review what they have learned before moving on to more advanced topics. Topics include a review of the techniques and applications of the derivative, introductory methods of integration, the Fundamental Theorem of Calculus, more advanced integration techniques, differential equations, and applications of the integral to various areas, including economics and physics.

MATH-110-01 - Mathematics - 2003-2004
(Spring) Explorations in Algebra - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
High school algebra is essentially the study of the laws that govern the system of numbers we use for ordinary arithmetic. This course focuses on certain of these laws and studies the systems, called "groups," governed by them. Groups have beautiful properties and describe many phenomena: crystallography, graphic art, matrix algebra, counting, nuclear physics, codes, and more. The course studies the group laws and their consequences, as well as many examples of systems satisfying these laws.

MATH-112-01 - Mathematics - 2003-2004
(Fall) Mathematics in Historical Context - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
The course begins with prehistory: Egyptian geometry and Pythagorean geometry and arithmetic; next the Alexandrian period, featuring Archimedes, Euclid, and Ptolemy, where classical geometry is brought to a culmination and the beginnings of calculus are seen. After a short consideration of Arab mathematics, we enter the Renaissance and look at its two great accomplishments: algebra and analytic geometry. Then we examine the Enlightenment and the development of calculus by Newton, Leibniz, and Euler. Finally, we enter briefly into the modern era with the discovery (invention?) of set theory toward the end of the nineteenth century.

(Fall) Explorations in Number Theory - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
Studies basic mathematical structures using as models symmetries of plane figures, the ordinary integers, and other number systems. Using examples to uncover patterns that help reveal and explain relationships. Solving simple equations in these new settings quickly brings students into contact with some intriguing problems being studied by contemporary mathematicians.
Prerequisites: 4 admission units or permission of instructor

enrollment limited
MATH-120-01 - Mathematics - 2003-2004
(Fall) Explorations in Geometry
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
The system of geometry devised by the ancient Greeks was immutable until the nineteenth century, when it was put in a broader framework better able to accommodate the varied interests of physical science and mathematics. In this course, we study geometry as it developed historically, from the time of Pythagoras to the recent past.
Prerequisites: 4 years of high school mathematics or permission of instructor

MATH-319-01 - Mathematics - 2003-2004
(Spring) Topics: An Introduction to Algebraic Geometry
Credits/PE Units: 4; Requirements met: Meets Science and Math II-A: Math, Stat, CompSci requirement
This course is an introduction to the study of algebraic geometry. Algebraic geometry is the study of polynomials or more precisely the zero sets of polynomials. The field is a very old one but in the mid-1900's Andre Weil and Oscar Zariski worked together to set the field on a new foundation. Since then the field of algebraic geometry has become more and more important in mathematics. We will cover topics that include: projective space, homogenous coordinates, plane curves, Bezout's theorem, elliptic curves, affine and projective varieties, the Zariski topology, coordinate rings, and functions on varieties.
Prerequisites: Mathematics 211; Mathematics 311 helpful but not necessary
Notes: 3 meetings (50 minutes), 4th hours (50 minutes)

MEDST Studies

(Fall) Medieval Culture and Society: Seminar in Reading, Writing, and Reasoning: Picturing the Middle Ages
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
First-year seminar
Preamble (for topics courses): This course offers a foundation for inquiry into medieval culture. Using readings in literature, art, music, history, politics, philosophy, and sciences to interpret the Middle Ages, a student sharpens her awareness of language and imagery as means of communicating experience and improves her skills of attentive reading and persuasive writing. The 101f-102s seminar sequence is designed to be a yearlong course, but students may take one semester without the other.
How did medieval people see themselves? How do we imagine them? Seeking answers to these questions, this course will explore several aspects of medieval culture: social structures, gender issues, tensions between courtliness and eroticism, religion, politics, perceptions of the ”other,” as represented in literature, art, history, and modern films. Works will include the Song of Roland (epic), the Bayeux Tapestry (pictorial relation of the Battle of Hastings in 1066), tales of love and adventure, miracles of the Virgin Mary, illuminated manuscripts, and Gothic monuments such as the cathedral of Notre Dame in Paris. Resources will draw on CD-ROMs and the Web.
Notes: 2 meetings (75 minutes)
Instructors: M. Switten
Expected enrollment: 17

(Spring) Medieval Culture and Society: Seminar in Reading, Writing, and Reasoning: Europe and the Atlantic World, 1300-1700 - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement (Speaking- and writing-intensive; History 150s)
Preamble (for topics courses): This course offers a foundation for inquiry into medieval culture. Using readings in literature, art, music, history, politics, philosophy, and sciences to interpret the Middle Ages, a student sharpens her awareness of language and imagery as means of communicating experience and improves her skills of attentive reading and persuasive writing. The 101f-102s seminar sequence is designed to be a yearlong course, but students may take one semester without the other.
This course inquires into several dimensions of European society and culture during the transition from principalities and fiefs to early modern states, from feudalism to capitalism, from serfdom to both free and slave labor. Equally important, however, will be comparisons of western Europe with other Atlantic societies of these centuries and examination of consequences for Europeans, Africans, and Americans (north and south) of encounters among them. Using both voices from the period and recent scholarship about early modern Western and Atlantic societies, the course will look critically at the making and remaking of ”Western” culture between the Middle Ages and the modern era.

MEDST-200-01 - Medieval Studies - 2003-2004
(Spring) Special Topics in Medieval History: A Medieval Room of One's Own: Christine de Pizan and Her World - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement (Taught in English; French 220s)
The patriarchal society in which Christine lived was a difficult place to find work when her husband died and she became the sole support of her children. Her's was a troubled world: the late fourteenth and early fifteenth centuries saw political, social, and economic crises in France. The course will examine how Christine made a place for herself amidst personal and political turmoil. It will provide a broad canvas of late-medieval literary and historical transformations, including the stunning appearance of Joan of Arc. Study of Christine's works, of texts by other authors, and of manuscript illumination will give a rich sense of the period.
Notes: 2 meetings (75 minutes); students who wish to obtain 300-level credit in French and have the necessary prerequisites must have the permission of the instructor

(Spring) Travel, Trade, and Transmission: Viewing the World Music Industry
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-A requirement
The world music industry purports to sell us music of the world, but where does that world start and end? In this course, we will attempt to answer this question as we trace the origins of a giant, rapidly growing industry and consider its future. In the process, we will listen to music from around the world (and our backyard), and consult a variety of sources and media ranging from travel journals and advertisements, to journalistic writing and academic writing in ethnomusicology and anthropology. Although we focus on music, the course will also require a commitment to critical reading and discussion.
Prerequisites: Music 100 or permission of the instructor
Instructors: N. Bhattachariya
Expected enrollment: 25

(Fall) Topics in Music: Music in Times of Revolution and War
Credits/PE Units: 4; Requirements met: Meets Humanities I-A requirement
(Writing-intensive)

Preamble (for topics courses): This seminar is designed to increase familiarity with and facility in the use of primary materials for musicological and/or theoretical research, as well as in the critical evaluation of published scholarship. Engagement with a shared topic at the outset of the semester provides the context from which each student fashions an independent project. Oral presentations are integral to the course, with a major paper as the final requirement.

This seminar deals with moments in history when conditions of revolution and war had a profound impact on musical creativity and productivity. Among the events to be considered are the French Revolution and the Napoleonic Wars, the Revolution of 1848, World War I, and World War II, including Pontigny.

Prerequisites: Music 282 and 232 or permission of instructor
Notes: 1 meeting (3 hours)
Instructors: L. Litterick

(Fall) Independent Study
Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement.

Neuroscience and Behavior

NEURO-250-01 - Neuroscience and Behavior - 2003-2004
(Fall) Introduction to the Biological Bases of Behavior
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement

This course is an introduction to and survey of the biological bases of behavior, including physiological, biochemical, and neurophysiological determinants of sensation, motor control, sleep, eating and drinking, learning and memory, language, and mental disorders.

Prerequisites: Psychology 100 and 4 credits in biological sciences
Notes: 2 meetings (75 minutes)
Instructors: B. Schroeder

Philosophy

PHIL-101-01 - Philosophy - 2003-2004
(Fall) Introduction to Philosophy
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Speaking- and writing-intensive)
In this course we will examine such questions as: What makes one's actions right or wrong? What is the "self?" Are our wills free? What can we know with certainty? Through contemporary and historical texts, we trace philosophical approaches to these questions.
Instructors: The department

PHIL-101-01 - Philosophy - 2003-2004
(Spring) Introduction to Philosophy
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
In this course we will examine such questions as: What makes one's actions right or wrong? What is the "self?" Are our wills free? What can we know with certainty? Through contemporary and historical texts, we trace philosophical approaches to these questions.
Instructors: J. Rosner

PHIL-102-01 - Philosophy - 2003-2004
(Fall) Psychiatry, Pharmacology, and Philosophy
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar (Speaking-intensive)
In this course we will examine issues arising from the use of pharmaceuticals to remake the self. We will read classic texts in the history of philosophy on questions like moral responsibility and identity alongside more recent literature on the use of medical techniques to remake the self. The course will make a good first-year seminar because it introduces some sophisticated philosophical problems and readings through more familiar contemporary phenomena. By juxtaposing difficult classic texts with more accessible readings, students will develop their reading skills. Writing assignments and discussions will be closely tied to the readings.
Notes: 2 meetings (75 minutes)
Instructors: J. Harold
Expected enrollment: 20

PHIL-102-01 - Philosophy - 2003-2004
(Spring) 1st-Year Seminar
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
First-year seminar (Speaking-intensive)
Alienation - Are you alienated or not? What is the relation between power and alienation? Are you truly free? In this course, we shall explore these questions by examining not only philosophic texts, but also films and novels. Some of the philosophers we shall read include Nietzsche, Foucault, Marx, and De Beauvoir.
Notes: 2 meetings (75 minutes)
Instructors: J. Inness
Expected enrollment: 20
PHIL-201-01 - Philosophy - 2003-2004
(Fall) Philosophical Foundations of Western Thought: The Greek Period
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Writing-intensive)
This course is an introduction to ancient Greek philosophy from the pre-Socratic period through to the Hellenistic period. Topics to be discussed include: What is the nature of reality? What kind of life should we live? What is truth, and how can we know it? We will work to understand each philosopher's responses to these questions, but we will also learn to develop our own answers. We will read not only some of the major works of ancient Greek philosophy, but also some literary and historical works of the period.
Notes: 2 meetings (75 minutes)
Instructors: J. Harold

PHIL-202-01 - Philosophy - 2003-2004
(Spring) Philosophical Foundations of Western Thought: The Modern Period
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Speaking-intensive)
Investigates the development of Western philosophy in the seventeenth and eighteenth centuries through the writings of Descartes, Spinoza, Leibniz, Berkeley, Hume, and Kant. Focuses on the impact of modern scientific thought on the philosophical tradition's understanding of the place of the human being in the world. Topics include the nature and extent of human knowledge, the nature of the mind, and the possibility of human freedom.
Notes: 2 meetings (75 minutes)
Instructors: T. Wartenberg

PHIL-205-01 - Philosophy - 2003-2004
(Fall) Ethics
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Is morality relative to individual preferences? Would you rather be free or happy? Are friends necessary for a good life? Would you rather be a satisfied pig or a dissatisfied student? These questions illustrate some of the issues that will be raised by the ancient and modern ethical philosophers we shall explore in this course, looking at sources as varied as novels, canonical philosophic texts, and even children's stories.
Notes: 2 meetings (75 minutes)
Instructors: Department

PHIL-206-01 - Philosophy - 2003-2004
(Fall) Introduction to the Philosophy of Science - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course provides students with an introduction to philosophy based upon the philosophy of science. Questions to be discussed include: What is the nature of scientific reasoning? What are scientific theories, and how are they tested? How are scientific concepts and explanations used? The social aspects of scientific inquiry will be addressed, as will some feminist criticisms of science. The idea of scientific progress will also be given extended treatment.

PHIL-210-01 - Philosophy - 2003-2004
(Fall) Logical Thought
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course cultivates sound reasoning. Students will learn to see the structure of claims and arguments and to use those structures in developing strong arguments and exposing shoddy ones. We will learn to evaluate arguments on the strength of the reasoning rather than on the force of their associations and buzzwords.
Notes: 3 meetings (50 minutes)
Instructors: W. Schonbein

PHIL-225-01 - Philosophy - 2003-2004
(Spring) Symbolic Logic
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course develops a symbolic system that can be used as the basis for inference in all fields. It will provide syntax and semantics for the language of this system and investigate its adequacy. It provides the basis for all further work in logic or in the philosophical foundations of mathematics. Much of the course has a mathematical flavor, but no knowledge of mathematics is necessary.
Notes: 3 meetings (50 minutes)
Instructors: W. Schonbein
PHIL-226-01 - Philosophy - 2003-2004
(Fall) Introduction to the Philosophy of Religion
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Religion 226fs)
This course begins its survey of the discipline of the philosophy of religion with the work of Augustine. We then proceed to an examination of the classical theistic arguments for knowledge of God’s existence (those of Anselm, Aquinas, and Maimonides) that dominated Scholastic thought and consider the criticisms of these approaches by Enlightenment philosophers such as Kant. We trace the rise of experience as the central category of pietism and romanticism in the texts of Schleiermacher and Coleridge and in the poetry of Novalis. Finally, we focus on the pragmatic tradition in American philosophy of religion, especially in the work of William James, Josiah Royce, and Cornel West.
Notes: 2 meetings (75 minutes)
Instructors: J. Grayson

PHIL-232-01 - Philosophy - 2003-2004
(Spring) Ethical Issues in Complex Organizations - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Complex Organizations 232s)

PHIL-235-01 - Philosophy - 2003-2004
(Spring) Medical Ethics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Modern medicine has raised new and difficult moral and philosophical problems. Topics discussed include: What is the distinction between health and illness? How should limited health care resources be distributed? How are medical problems related to larger social problems (e.g., sex inequality)? What are the responsibilities of medical researchers toward their research subjects? What moral reasons do we have to be concerned about the growth of technology in medicine? Are the basic institutions of medicine and medical education just?
Notes: 2 meetings (75 minutes)

PHIL-240-01 - Philosophy - 2003-2004
(Spring) Environmental Ethics: Nature/Culture/Values
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
A fundamental problem we face as humans is how we should relate to the natural world. Why not turn Yosemite into a parking lot? Is nature to be controlled through applying technological expertise? Or is Thoreau correct in his suggestion that we must immerse ourselves in nature to discover who we truly are? Might the value of nature extend beyond its utility for humans? Students have the opportunity to explore these questions, challenging widespread assumptions about nature, culture, and values.
Notes: 2 meetings (75 minutes)
Instructors: J. Inness

PHIL-241-01 - Philosophy - 2003-2004
(Fall) Issues in Contemporary Moral Theory - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Do we need to develop virtues to lead a good life? Is morality founded on freedom or happiness? What does it involve for an individual to be just? What is the relationship between morality and power? This course explores questions and texts relevant to contemporary ethical philosophy. We will examine a number of contemporary texts written by philosophers interested in concepts such as virtue, freedom, justice, and power.
Prerequisites: Philosophy 205 or permission of instructor
PHIL-242-01 - Philosophy - 2003-2004
*(Fall) Social and Political Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course is a survey of influential works in the history of political thought, along with some contemporary works. Classical readings will include Plato, Machiavelli, Hobbes, Locke, Rousseau, Hume, Mill, and Marx. Modern authors will likely include Susan Okin, John Rawls, Marilyn Frye, Jean Hampton, and Allison Jagger. Our central question will be "What gives a government legitimate authority over its citizens?"
Notes: 2 meetings (75 minutes)

PHIL-243-01 - Philosophy - 2003-2004
*(Fall) Ethics, Political Theory, and Public Debate
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Speaking-intensive)
Moral and political theories are directly relevant to major modern problems. These theories take an exciting dimension when you apply them to contemporary controversies like affirmative action and hate speech codes. And things get really fun when you not only learn about these issues, but you also get to teach others how to debate about them.
This is a community-based learning course in which students meet once a week for two-and-a-half hours at MHC and travel to a Springfield public high school approximately seven times during the semester to work after school with teachers and students there.
Prerequisites: permission of instructor
Instructors: E. Barnes

PHIL-244-01 - Philosophy - 2003-2004
*(Spring) Philosophy and Literature - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
The course examines philosophical themes in literature and also looks at philosophical questions about literature. Can literature give us knowledge about the world? How do we determine the meaning of a work of literature? Are the author's intentions relevant to interpretation? Can works of literature lead us morally astray? How are gender, race, and class relevant to reading literature? What is the difference between philosophy and literature -- can a work of literature also be a work of philosophy?

PHIL-248-01 - Philosophy - 2003-2004
*(Spring) Philosophical Issues in Race and Racism - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Community-based learning course; Speaking- and writing-intensive)
This course is an introduction to discussions of "race" within philosophy and related discussions in science, the law, and the arts. Topics to be discussed include: Is "race" real, subjective, or produced by society? How is race relevant to our identities? How does the popular media represent "race?" Does science construct "race?" What is the connection between "race," gender, and class? Class readings from philosophy and a variety of interdisciplinary texts, including film and literature.
Notes: 2 meetings (75 minutes)

PHIL-249-01 - Philosophy - 2003-2004
*(Fall) Women and Philosophy
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Do we all dress in drag? Should women strive to be less emotional? Is sexuality socially constructed? Is popular culture harmful to women? This course focuses on philosophy that explores women's understanding of reality. By studying the work of various twentieth-century feminist philosophers as well as films and stories, we shall explore a number of crucial philosophic concerns including truth, the self, and morality. Our aim is to become philosophers ourselves, thinking deeply about issues of fundamental importance to our lives.
Notes: 2 meetings (75 minutes)
Instructors: J. Inness

PHIL-250-01 - Philosophy - 2003-2004
*(Fall) Topics in Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Notes: 2 meetings (75 minutes)
PHIL-250-01 - Philosophy - 2003-2004
(Spring) Topics in Philosophy: Spring 2004: Chinese Philosophy
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Humanities I-B requirement
(Asian Studies)
An introduction to Confucianism, Daoism, and other schools of thought in ancient China.
Notes: 2 meetings (75 minutes)
Instructors: M. Millner

PHIL-252-01 - Philosophy - 2003-2004
(Spring) Philosophical Foundations of Western Thought: The Nineteenth Century - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course explores the ways the nature, possibility, and extent of human freedom were conceptualized by German philosophers in the nineteenth century. Readings are drawn from the work of Hegel, Feuerbach, Marx, and Nietzsche. Specific topics include Hegel's metaphysics of spirit, Feuerbach's critique of religious and philosophical mystification, Marx's analysis of alienation, and Nietzsche's ideal of the "Over-Man."
Notes: 2 meetings
Instructors: T. Wartenberg

PHIL-253-01 - Philosophy - 2003-2004
(Fall) Introduction to Asian Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course introduces students to the traditional systems of thought in Asia, concentrating on Hinduism in India; Taoism in China; and Buddhism in China, India, and Japan, with occasional reference to other systems. Secondary and primary texts are read, along with some literature inspired by these philosophies. Cross-cultural explorations - and considerations of gender, caste, and elitism - are encouraged.

PHIL-255-01 - Philosophy - 2003-2004
(Fall) Existentialism - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
(Writing-intensive)
Is life absurd? Do human beings really want to be free? Or do we prefer to sacrifice our freedom for comfort and amusement? Is God dead? Is it possible to live without religious belief? These are among the central questions about human life raised by existential thinkers. We will discuss these issues, and many others, through careful reading of philosophic and literary texts by such important existentialists as Frantz Kafka, Martin Heidegger, Jean-Paul Sartre, Albert Camus, Simone de Beauvoir, Frantz Fanon, and Samuel Beckett.
Notes: 2 meetings (75 minutes)

PHIL-257-01 - Philosophy - 2003-2004
(Fall) Topics in Contemporary Continental Philosophy: Ideology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This course will explore and trace the development of the concept of ideology in the works of continental philosophers beginning with Marx. We will examine how "ideology" has been conceived and how the concept of ideology has functioned in different theoretical and social contexts. The course leads up to a consideration of claims in contemporary cultural theory that some notions of ideology must be abandoned. Readings may include works by Karl Marx, George Lukacs, Antonio Gramsci, Karl Mannheim, Louis Althusser, Theodor Adorno, Slavoj Zizek, and Seyla Benhabib.

PHIL-263-01 - Philosophy - 2003-2004
(Fall) Philosophy of Biology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Biology gives rise to many interesting philosophical questions. For example: How could there be evidence for evolution when we can't predict new species? How could adaptations be intended for some purpose? Are individuals selected by natural selection or could groups be selected too? How does evolution add light on human behavior, if at all? In this course we will consider these issues. Designed to be accessible to those with backgrounds in either philosophy or biology.

PHIL-264-01 - Philosophy - 2003-2004
(Fall) Philosophy of Mind - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
An introduction to the mind/body problem and the way that it shapes our view of ourselves, this course emphasizes work in cognitive science, an interdisciplinary approach that draws together artificial intelligence, neurobiology, linguistics, philosophy, and cognitive psychology. Readings are from these areas and from classical philosophical sources.

Notes: 2 meetings (75 minutes)

PHIL-270-01 - Philosophy - 2003-2004
(Fall) Epistemology - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Issues in epistemology (the theory of knowledge) are fundamental to nearly all fields of study. This course uses both historical and contemporary texts to consider traditional questions in the theory of knowledge. Included are the following questions: Can I have knowledge of anything outside of my mind, for example, physical objects or other minds? Can we answer the skeptic's challenge that we are not justified in any of our beliefs? What is knowledge, and how does it differ from belief? Does our knowledge have a foundation or is it unavoidably circular? Is all knowledge derived from experience or is some innate?
Prerequisites: 4 credits in department or permission of instructor
Notes: 2 meetings (75 minutes)

PHIL-271-01 - Philosophy - 2003-2004
(Fall) Philosophy of Language
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
In the twentieth century, problems in the philosophy of language have become central to nearly all philosophical concerns. This course addresses key questions: What is truth? What is it for a sentence to have a meaning? Does language determine the way we think? Readings are drawn from Frege, Russell, Wittgenstein, Whorf, Quine, Chomsky, Frye, and others.
Prerequisites: 4 credits in department or permission of instructor
Notes: 2 meetings (75 minutes)
Instructors: W. Schonbein

PHIL-271-01 - Philosophy - 2003-2004
(Spring) Philosophy of Language - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

PHIL-272-01 - Philosophy - 2003-2004
(Spring) Metaphysics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Metaphysics has as its topic a cluster of interconnected issues arising out of the nature of existence, truth, reality, and freedom. Questions such as the following are addressed: What makes an individual the person she or he is? Is human freedom possible in a world in which all actions are caused? How should we decide what exists? Is there a difference between essential and contingent properties of certain things? What is the nature of truth?
Prerequisites: 4 credits in department or permission of instructor
Notes: 2 meetings
Instructors: J. Rosner

PHIL-273-01 - Philosophy - 2003-2004
(Spring) Philosophy of Art
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Can a pile of bricks be art? If a critic tells you that it can be but you disagree, who is right and why? Is a beautiful sunset art? Your kid sister's latest creation? What is it that makes something a work of art? These are questions that will be explored in this course using a variety of artistic examples from a variety of different media—painting, sculpture, film, dance, music, drama, and literature—in order to understand the nature of art.
Notes: 2 meetings (75 minutes)
Instructors: T. Wartenberg

PHIL-275-01 - Philosophy - 2003-2004
An exploration of philosophical issues encountered in the study of film. Are films art or entertainment? Do films have "authors"? Can popular films be socially critical? These are examples of the topics to be discussed in this course as we investigate the nature of film and its relation to philosophy. Readings will be drawn from a variety of sources: philosophy, film and cultural theory, film criticism. There will be weekly film screenings.

Prerequisites: 4 credits in department or in film studies, or permission of instructor

Notes: 2 meetings (75 minutes), 1 screening (3 hours)
(Fall) Twentieth-Century Analytic Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
An introduction to the history, themes, and methods of analytic philosophy, the dominant movement in twentieth-century English-speaking philosophy. Analytic philosophy uses logic and a careful analysis of language to solve philosophical problems. We will study most of the major figures of this movement, including Frege, Russell, Carnap, Quine, and Kripke. Topics addressed will include the logic of numerical identity, reference and existence, Quine's criticisms of logical positivism, and the meaning of necessity.
Prerequisites: 8 credits in department
Notes: 1 meeting (2 hours)

PHIL-312-01 - Philosophy - 2003-2004
(Fall) Topics in Metaphysics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
An examination of one of a cluster of topics: What is real? Are humans free? Do numbers exist? Are there immaterial souls? Specific topics vary from year to year.
Prerequisites: 8 credits in department
Notes: 1 meeting (2 hours)

PHIL-315-01 - Philosophy - 2003-2004
(Spring) Topics in Ancient Greek Philosophy: Ancient Greeks on Perplexity - *Not offered this year/term
(Speaking-intensive)
When the ancient Greek thinker Socrates reflected on the world around him, he found it to be a very puzzling place. What is death? What is the soul? What is the best life to live? Western philosophy came into existence to respond to these perplexities. Just how does philosophy do this? Who and what is a philosopher? Should philosophy resolve our perplexity or leave us perplexed? This class explores these questions with readings from Plato, Aristotle, and the Hellenistic philosophers.
Prerequisites: 8 credits in department or permission of instructor
Notes: 1 meeting (3 hours)

PHIL-321-01 - Philosophy - 2003-2004
(Fall) Seminar in Philosophy of Language - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
This seminar attempts to investigate carefully the broad relationship between language and the world by focusing on issues of realism and idealism: Does language merely attach labels to things (and kinds of things) that exist independently of our thought? Or do we contribute to the construction of the world by developing a conceptual scheme for describing or representing it? The seminar will focus on the work of two pivotal figures in the philosophy of language: Wittgenstein and Chomsky.
Prerequisites: 8 credits in department
Notes: 1 meeting (2 hours)

PHIL-327-01 - Philosophy - 2003-2004
(Spring) Advanced Logic - *Not offered this year/term
(Mathematics 327s)
This course presents a careful development of predicate calculus, formal elementary number theory, and elementary recursion theory, culminating in a proof of Gödel's incompleteness results. It includes some discussion of the philosophical significance of these results for the foundations of mathematics.
Prerequisites: Philosophy 225, 4 credits in department or in mathematics and permission of instructor
Notes: 2 meetings (75 minutes)

PHIL-334-01 - Philosophy - 2003-2004
(Spring) Topics in Ethics: Evil, Vice and Other Moral Failings
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Preamble (for topics courses): This course studies issues of current concern in contemporary moral theory, moral psychology, and foundations of ethics.
Spring 2004: Evil, Vice, and Other Moral Failings
This course examines a variety of topics in moral philosophy concerning moral failure. We will discuss weakness of will, psychopathology, the nature of evil (including whether there is such a thing as radical evil), amorality, and particular vices (e.g., greed). The readings will be drawn from historical
figures such as Aristotle, Hobbes, Kant, and Hannah Arendt, and contemporary philosophers such as Jonathan Glover, Jeffrie Murphy, and Michael Stocker. It will be very helpful if students have had at least one prior course in moral theory.

Prerequisites: 8 credits in department or permission of instructor

Notes: 1 meeting (2 hours)

Instructors: J. Harold

PHIL-347-01 - Philosophy - 2003-2004
(Fall) Developments in Feminist Philosophy: Rethinking the World: Philosophy of Sex
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

What makes a body sexy? Is heterosexuality natural? What is "sex?" Feminist philosophy is in the midst of a revolutionary transformation. Rather than remaining content with the task of indicating the shortcomings of the philosophical canon, feminist philosophers are constructing their own distinctively feminist version of philosophy. In this course, we shall explore what contemporary feminist philosophers have written about the nature of sex and sexuality.

Prerequisites: 8 credits in department or permission of instructor

Notes: 1 meeting (2 hours)

Instructors: J. Inness

(Fall) Topics in Philosophy: Gender, Race, and Science - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
(Women's Studies 333f (02))

This course examines different approaches to understanding the nature of scientific practices. Of central interest will be the diverse accounts offered by feminist studies of science. We will pay particular attention to notions of evidence, methods, cultural and material constraints, and the heterogeneous nature of laboratory and theoretical practices. We will consider ways in which gender, race, and sexuality are constructed by science and how these factors influence both scientific practices and our conceptions of science. We will also examine the feminist commitment to taking account of the multifaceted dynamics between science and society without forfeiting the notion of objectivity.

Prerequisites: 8 credits in women's studies or 8 credits in science courses or permission of instructor

Notes: 1 meeting (3 hours)

Expected enrollment: 15

PHIL-350-02 - Philosophy - 2003-2004
(Spring) Topics in Philosophy: Minds, Brains, Worlds
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

Humans have minds, brains, and are embedded in a complex physical world. But how do our beliefs, emotions, and conscious experiences relate to our central nervous system, and to our environment? In this course we will consider several topics in the philosophy of mind and cognitive science that speak to these questions. These may include: What is consciousness? Will psychology be replaced by neuroscience? What role do emotions play in cognition? Are minds computers? Does culture influence thought? Readings are classic and contemporary sources from philosophy, psychology, neuroscience, and computer science.

Prerequisites: No prerequisites, but experience with philosophical topics is encouraged.

Notes: 1 meeting (2 hours)

Instructors: W. Schonbein

PHIL-350-02 - Philosophy - 2003-2004
(Spring) Topics in Philosophy: Science and the Body - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

This course will examine scientific discourses on the body as well as feminist, queer, and antiracist approaches, interventions, and responses. Drawing on the literatures from cultural studies of science, technology, and medicine, gay and lesbian and queer studies, the history of science and medicine,
anthropology, biology and feminist theory, we will consider such topics as scientific constructions of raced-sexed-gendered bodies, (homo)sexualities, mainstream and counter-discourses concerning intersexuality, transgendered and cyborg bodies, and scientific constructions of disease and disabilities.

Prerequisites: 8 credits in women's studies beyond Women's Studies 101 or permission of instructor

Expected enrollment: 15

PHIL-350-03 - Philosophy - 2003-2004
(Spring) Topics in Philosophy: Feminist and Queer Theory - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Women's Studies 333s (05)

Questions of power, agency, structure, materiality, bodies, subjectivities, and discursive practices have been central to both feminist and queer theories. In this course, we will focus on these issues, exploring in particular the tensions among poststructuralist, Marxist, and materialist approaches. In analyzing contemporary theories of gender and sexuality, we will pay particular attention to issues of race, class, ethnicity, nationality, and globalization. Key problematics include: the nature and operation of power, the relationship between materiality and discourse, and the relationship between theory and practice.

Prerequisites: 8 credits in women's studies beyond Women's Studies 101 or permission of instructor
Notes: 1 meeting (2 hours)
Instructors: K. Barad

Expected enrollment: 15

PHIL-351-01 - Philosophy - 2003-2004
(Spring) Systematic Study of One Philosopher: Merleau-Ponty - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

This course will consider Merleau-Ponty's writings on the philosophy of the body, and discussion will cover topics such as the relationship between embodiment and language, intersubjectivity and embodiment, freedom and corporeality, and art. We will be reading both Merleau-Ponty's early and late writings, and the course will conclude with the consideration of feminist critiques of his work.

Prerequisites: 8 credits in department
Notes: 1 meeting (1 hour, 50 minutes)

PHIL-352-01 - Philosophy - 2003-2004
(Spring) Nineteenth-Century Continental Philosophy - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement

During the nineteenth century, a distinctive mode of philosophizing arose, now known as Continental Philosophy, that placed the issue of human alienation squarely on the philosophic agenda. We will investigate how this topic achieved such importance through careful reading, analysis, and comparison of works by Hegel, Kierkegaard, Feuerbach, Marx, and Nietzsche. We will explore how these philosophers understood the potentials of human life as well as how they saw society limiting them.

Prerequisites: 8 credits in department
Notes: 1 meeting (1 hour, 45 minutes)
Instructors: The department

PHIL-373-01 - Philosophy - 2003-2004
(Fall) Philosophy of Art - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Preamble (for topics courses): This class examines philosophical issues arising concerning the interpretation, creation, and experience of art. Topics vary from year to year.

The topic of this course will be emotional responses to narrative works of art. Some of the questions we will consider include: Are the emotional responses we experience when reading or viewing fiction genuine emotions, or are they better thought of as quasi-emotions? Do we appreciate fiction through mental simulation? What is the aesthetic and moral significance of emotional responses of fiction? What effect do differences of race and gender have on one's ability or propensity to engage emotionally with fiction?

Prerequisites: 8 credits in department

PHIL-375-01 - Philosophy - 2003-2004
(Fall) Philosophy of Film
Credits/PE Units: 4; Requirements met: Meets Humanities I-B requirement
Preamble (for topics courses): Philosophers tend to see films as works of art, whereas film theorists tend to emphasize the economic, cultural, and ideological context of their production. This course will examine the differences between these two approaches to film, seeking to determine the distinctive aspects of each. Readings will be drawn from a variety of sources including contemporary philosophers of film, feminist philosophers and film theorists, and aesthetician.

Fall 2003: Screening Philosophy
This seminar will focus on the questions of whether films can philosophize and, if so, how. Films such as *The Matrix* and *Alien* will be screened and then analyzed with the assistance of philosophical texts and interpretations. Basic issues in the philosophy of film also will be addressed, such as how viewers engage with film.

Prerequisites: 8 credits in department or in film studies or permission of instructor
Notes: 1 meeting (2 hours) and screening
Instructors: T. Wartenberg

Physics

PHYS-102-01 - Physics - 2003-2004
(Spring) Galileo - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
First-year seminar
The life and work of Galileo will be explored both historically and scientifically, including much from his own writings. Classical background, contemporary controversies, and repercussions down to the present time will be included as time permits. Laboratory exercises will follow Galileo's own investigations, including such topics as vibrating strings, buoyancy, optics, astronomy, clocks, scaling laws in biology, motion, and the principle of relativity.
Notes: 2 meetings (75 minutes), 1 lab (3 hours); This is a first-year seminar
Instructors: M. Peterson
Section Instructors: 01 LAB M Peterson |
Expected enrollment: 14

PHYS-103-01 - Physics - 2003-2004
(Fall) Foundations of Physics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Surveys some of the theories and methodologies of physics (including Newton's laws), particularly those involved with motion and waves. Develops the concepts of energy and momentum and their related conservation laws. Emphasizes the interplay between intuition, experiment, and analysis in the understanding of a physical theory.
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes), 1 lab (3 hours)
Instructors: M. Enam
Section Instructors: 01 LAB The department | 02 LAB The department |

PHYS-115-01 - Physics - 2003-2004
(Fall) Force, Motion, and Energy
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Studies the mechanics of material objects. Topics include Newton's laws, projectile motion, momentum, kinetic and potential energy, gravitation, conservation laws, and oscillations.
Prerequisites: Mathematics 101 or 103 (recommended) or concurrent enrollment
Notes: 4 meetings (50 minutes), 1 lab (3 hours)
Instructors: S. Tewari
Section Instructors: 01 LAB | 02 LAB | 03 LAB |

PHYS-204-01 - Physics - 2003-2004
(Spring) Phenomena of Physics
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Applies fundamental principles to selected topics chosen for their close relationship to other fields of study. Topics chosen from thermodynamics, electromagnetism, fluid mechanics, properties of materials, wave phenomena and optics, nuclear structure, and radioactivity.
Prerequisites: Physics 103 or 115
Notes: 2 meetings (75 minutes), 1 meeting (50 minutes), 1 lab (3 hours)
Instructors: C. Sutton
Section Instructors: 01 LAB | 02 LAB |

PHYS-216-01 - Physics - 2003-2004
(Fall) Waves and Electromagnetism
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
Topics include: electromagnetism, emphasizing fields and energy; electrostatics; electric circuits; magnetism; induction; and electromagnetic radiation. Introduces both mechanical and electromagnetic wave phenomena. Additional topics chosen according to the interests of the class and instructor.
Prerequisites: Physics 115; Mathematics 202 or concurrent enrollment
Notes: 4 meetings (50 minutes), 1 lab (3 hours)
Instructors: J. Hudgings
Section Instructors: 01 LAB | 02 LAB |

PHYS-231-01 - Physics - 2003-2004
(Spring) Techniques of Experimental Physics - *Not offered this year/term
Credits/PE Units: 1; Requirements met: Does not meet a distribution requirement.
Provides training in the techniques employed in the construction of scientific equipment.
Prerequisites: soph, jr, major in department
Notes: 1 meeting (3 hours) for 8 weeks
Instructors: The department

PHYS-295-01 - Physics - 2003-2004
(Fall) Independent Study
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.

PHYS-300-01 - Physics - 2003-2004
(Fall) Five College Advanced Laboratory
Credits/PE Units: 1-4; Requirements met: Does not meet a distribution requirement.
Each of the Five Colleges offers a set of advanced experimental modules in one or more of the areas of optics, atomic physics, nuclear physics, particle physics, statistical physics, and condensed-matter physics. Students may choose experiments from among those available at any of the Five Colleges. Credit is based on the number of modules completed, up to a maximum of 4 credits per semester and 8 credits total. The number of meetings depends on the module; modules are completed within one month.
Prerequisites: Physics 301 or 308 and permission of instructor
Notes: no MHC modules offered fall 2003
Instructors: C. Sutton

PHYS-301-01 - Physics - 2003-2004
(Fall) Waves and Particles
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement
A comprehensive treatment of wave phenomena, particularly light, leading to an introductory study of quantum mechanics. Topics include wave propagation, polarization, interference and interferometry, diffraction, X-ray and electron diffraction, the wave nature of particles, the uncertainty principle, and Schroedinger's equation in one dimension.
Prerequisites: Physics 216, 303, or concurrent enrollment
Notes: 3 meetings (50 minutes), 1 lab (3 hours)
Instructors: C. Sutton
PHYS-302-01 - Physics - 2003-2004  
(Spring) Quantum Mechanical Phenomena  
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement  
The application of quantum mechanics to selected systems. The hydrogen atom and multi-electron atoms are studied in depth, with emphasis on angular momentum, electron spin, and the Pauli exclusion principle. Principles developed are then applied to other systems, such as molecules, Bose and Fermi gases, condensed matter, nuclei and elementary particles, chosen according to the interests of the class and the instructor.  
Prerequisites: Physics 301  
Notes: 3 meetings (50 minutes), 1 lab (3 hours)  
Instructors: C. Sutton  
Section Instructors: 01 LAB C Sutton | 02 LAB C Sutton |  

PHYS-303-01 - Physics - 2003-2004  
(Fall) Introduction to Mathematical Methods for Scientists  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
Topics include infinite series, complex numbers, partial differentiation, multiple integration, selected topics in linear algebra and vector analysis, ordinary differential equations, and Fourier series.  
Prerequisites: Physics 216 or concurrent enrollment  
Notes: 4 meetings (50 minutes)  
Instructors: J. Hudgings  

PHYS-308-01 - Physics - 2003-2004  
(Fall) Electronics  
Credits/PE Units: 4; Requirements met: Meets Science and Math II-B: Natural and physical sciences with lab requirement  
This course is a study of electrical circuits and components with emphasis on the underlying physical principles; solid-state active devices with applications to simple systems such as linear amplifiers; feedback-controlled instrumentation; and analog and digital computing devices.  
Prerequisites: Physics 216  
Notes: 3 meetings (50 minutes), 1 lab (3 hours)  
Instructors: C. Sutton  
Section Instructors: 01 LAB H Nicholson | 02 LAB H Nicholson |  

PHYS-315-01 - Physics - 2003-2004  
(Spring) Analytical Mechanics  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
This course is a more detailed study of the techniques developed in Physics 115 and 216, leading to an examination of the Lagrangian and Hamiltonian formulations of mechanics.  
Prerequisites: Physics 303  
Notes: 4 meetings (50 minutes)  
Instructors: M. Peterson  

PHYS-324-01 - Physics - 2003-2004  
(Spring) Methods of Applied Mathematics - *Not offered this year/term  
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.  
(Mathematics 324s)  
This course is an introduction to theories and techniques important to applied mathematics, such as special functions, calculus of variations, theory of functions of a complex variable, the algebra of vector spaces, solution of partial differential equations, Green's functions, integral transform methods, and probability and statistics. Topics selected according to class interests.  
Prerequisites: Physics 216, 303  
Notes: 2 meetings (75 minutes)  
Instructors: The department  

PHYS-325-01 - Physics - 2003-2004
(Fall) Electromagnetic Theory
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course presents the development of mathematical descriptions of electric and magnetic fields; study of interactions of fields with matter in static and dynamic situations; mathematical description of waves; and development of Maxwell's equations with a few applications to the reflection and refraction of light and microwave cavities.
Prerequisites: Physics 301, 315, or 324
Notes: 4 meetings (50 minutes)
Instructors: M. Peterson

PHYS-326-01 - Physics - 2003-2004
(Fall) Statistical Physics and Condensed Matter
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Topics include: the development of the general problem of many-particle systems and the laws of thermodynamics from fundamental quantum and probability concepts; applications to ideal gases, paramagnetism, and black-body radiation; and an introduction to the physics of the solid state, including crystal structure, free electron and band theory of metals, lattice vibrations, and specific heats of solids.
Prerequisites: Physics 301
Notes: 3 meetings (50 minutes); one or both of Physics 326 and 336 will normally be offered each year, depending on the needs and interests of the students
Instructors: S. Tewari

PHYS-329-01 - Physics - 2003-2004
(Fall) Advanced Physics - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
Topics chosen according to the interests of the students and the instructor.
Prerequisites: Physics 302
Notes: 3 meetings (50 minutes)

PHYS-329-01 - Physics - 2003-2004

Prerequisites: Physics 302
Notes: 3 meetings (50 minutes)
Instructors: The department

PHYS-336-01 - Physics - 2003-2004
(Spring) Quantum Mechanics
Credits/PE Units: 4; Requirements met: Does not meet a distribution requirement.
This course is an introduction to formal quantum theory: the wave function and its interpretation, observables and linear operators, matrix mechanics and the uncertainty principle; solutions of one-dimensional problems; solutions of three-dimensional problems and angular momentum; physics and perturbative methods.
Prerequisites: Physics 302, 324 or 325
Notes: 3 meetings (50 minutes); one or both of Physics 326 and 336 will normally be offered each year, depending on the needs and interests of the students.
Instructors: J. Hudgings

PHYS-340-01 - Physics - 2003-2004
(January) Modern Optoelectronics
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
This advanced, two credit course will combine intensive hands-on laboratory experience with reading primary literature in the area of optoelectronics and semiconductor device physics. In the laboratory, students will work in teams to design and implement experiments to explore a scientific question developed by the students in consultation with the instructor. Results of these experiments will be presented in a mini-symposium at the end of the course. Laboratory work will be complemented by twice weekly "Journal Club" style meetings, in which on a rotating basis students present papers on their topic from the primary literature.
Notes: MTWThF 1-5:30 P.M.
Instructors: J. Hudgings
PHYS-395-01 - Physics - 2003-2004
(Fall) Independent Study
Credits/PE Units: 1-8; Requirements met: Does not meet a distribution requirement.
Prerequisites: jr, sr, permission of department
Instructors: The department.

Politics

POLIT-101-01 - Politics - 2003-2004
(Fall) Fundamentals of Politics: Concepts and Controversies
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
( Writing-intensive)
This course examines three contrasting conceptions of freedom and of what threatens or denies or enhances freedom, in light of selective controversies in American politics and society. We explore concepts related to "freedom," such as "community," "equality," and "the common good"; and we acquaint ourselves with competing political perspectives on contemporary America. We also consider some pressing issues, such as the role of government and the future of public goods; the social limits to economic growth; the character and ramifications of economic inequality; racial, ethnic, and gender discrimination; and affirmative action.
Notes: 2 meetings (75 minutes); conducted in small sections, with students submitting short essays throughout the semester
Instructors: S. Ellenburg

POLIT-104-01 - Politics - 2003-2004
(Fall) American Politics
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
Offers an overview of the American political system and the theories of those who celebrate it and criticize it. Focuses on the institutions of American politics, including the Constitution, the presidency, Congress, the courts, parties and elections, interest groups, and movements seeking political change. Also includes a theoretical focus: a critical examination of the notions of liberalism, pluralism, and democracy that inform the practice of American politics.

(Russian and Eurasian Studies 131s)

POLIT-111-01 - Politics - 2003-2004
(Fall) Confessions, Novels, and Notebooks: The Self and Political Thought - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
First-year seminar (Writing-intensive)
What is the relationship between personal experience and political theory? How do political thinkers grasp and articulate the connections between self and political order? Our first-year seminar will probe the links between heart and mind in political philosophy by exploring the lives and writings of three illustrative figures who together span the history of political thought. This coming year those figures will be Saint Augustine, Jean Jacques Rousseau, and Simone de Beauvoir.
Notes: 2 meetings; This is a first-year seminar
Instructors: J. Cocks
Expected enrollment: 20

POLIT-112-01 - Politics - 2003-2004
(Fall) Speaking and Arguing: The Rhetoric of Peace and War - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Speaking-intensive)
The art and mechanics of persuading a polity to support either war or peace through oral argument. How speeches frame issues, mobilize public opinion, and persuade individuals to support or resist decisions to go to war. Students will be expected to deliver speeches, lead discussions, and critique their own and others' presentations.
Prerequisites: limited to first-year students
Notes: 2 meetings (75 minutes)
Instructors: V. Ferraro
Expected enrollment: 15

(Fall) Globalization and Its Discontents
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog. etc. requirement
First-year seminar (Writing-intensive)
What is the world coming to? Is globalization expanding global trade, new information technology, an emerging global culture, and spreading democratization, as its supporters claim? Or is it a new form of first-world imperialism deepening inequality, undermining genuine democratic politics, and escalating the environmental crisis?
Intensive writing and discussion.

POLIT-362-01 - Politics - 2003-2004
(Fall) The American Regime: Philosophical Foundations of the American Political Experience
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Complex Organizations 365s)
The American Regime is organized around a number of questions that haunt the American political tradition. We will examine the American experience as a response to the profound political, social, economic and religious changes that took place between the 17th and 19th centuries. We will explore these anxieties by focusing on the everyday practices embodied in those roles (husband and wife, parent and child, subject of God) that are normally thought to be outside of political control. The readings will draw from classic texts of American political thought, American case law, and the emergent social movements of race, labor, and gender that have posed challenges to the American tradition.
Prerequisites: jr, sr and 8 credits in department or permission of instructor
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: J. Mink

POLIT-367-01 - Politics - 2003-2004
(Spring) Decision Making - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Complex Organizations 367s)
On decision making, and the pathologies of decision making, in American politics. When, and to what extent, can we say that a particular policy decision is the result of rational choice, institutional processes, pluralistic pressures, or other forces? When are individual or collective decisions likely to be marred by "groupthink," selective attention, or self-deception? To what extent, if at all, may collective decisions be considered rational or moral? When are challenges to authority, or to dominant opinion, likely to make a difference?
Prerequisites: Politics 104, 245, 246, or permission of instructor, 2 meetings (75 minutes)
Instructors: C. Pyle

(Fall) Topics in European Politics: Europe and the European Union - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(Writing-intensive)
A research seminar. Europeans of both west and east are intensifying their efforts to broaden and deepen European integration at the same time that there has been a startling revival of ethnic conflict and nationalist agendas. Voters in Scotland and Wales elect their own parliaments while civil wars rage in the Balkans; Central Europeans struggle to solidify democratic nation-states in a global environment where some claim the nation-state may soon be obsolete. How are these centrifugal and centripetal forces interrelated?
Prerequisites: 8 credits in politics, including Politics 106, 237, or permission of instructor
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: P. Gill
Expected enrollment: 15

(Spring) The Politics of Ethnic Conflict - *Not offered this year/term
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This seminar explores the dimensions of ethnic conflict in severely divided societies. We examine the nature of ethnic identity, the sources of group conflict, and the forms and patterns of group conflict. Case studies are selected for their contemporary importance and the different lessons that can be learned from them. A variety of approaches to address ethnic conflict is assessed. Students have the opportunity to concentrate independently on problems or cases in which they may have a special interest.
Prerequisites: jr, sr, and 8 credits in department or permission of instructor
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: K. Khory

(Spring) South Asian Politics
Credits/PE Units: 4; Requirements met: Meets multicultural requirement; meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
A comparative study of the governments and politics of the region. Consideration of the history, social structure, and colonial heritage of the region establishes the context for understanding the political framework of the seven South Asian states. Each faces critical problems of nation and state building, political participation, economic development, and resource distribution. The focus will be on political and economic development within these states, regional relations, and the involvement of outside powers in regional affairs.
Prerequisites: 8 credits in department or permission of instructor
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: K. Khory
Expected enrollment: 18

(Fall) International Security
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
(International Relations 385f)
This course focuses on the recasting of global security concerns after the end of the cold war. It pays special attention to the problems of economic and ecological security; the relationship between security and democracy; ethnic, nationalist, and regional conflicts; weapons proliferation; and the role of nuclear weapons in the post-cold war world. The course concludes with an examination of specific initiatives for achieving both common and comprehensive security.
Prerequisites: jr, sr, 8 credits in department including Politics 116
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: K. Khory

**POLIT-388-01** - Politics - 2003-2004
(Spring) Post-Communist Transitions
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
This seminar examines and analyzes the dramatic transformation of former Leninist regimes—specifically, Russia, Eastern Europe, and China—in historical and comparative perspective. Focuses on understanding why Leninism imploded, and the challenges confronting nations making a "transition from socialism." Assesses the impact and consequences of the Leninist legacy on economic and political institutions, and state-society relations, and the definition of national identity and community.
Prerequisites: jr, sr, 8 credits in department, 106 recommended, or permission of instructor
Notes: 1 meeting (2 hours, 50 minutes)
Instructors: C. Chen

(Fall) The Rwanda Genocide in Comparative Perspective
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
The 1994 genocide in Rwanda caused untold human suffering, left more than half a million dead, and reverberated throughout the Central African region. This course explores parallels and contrasts between Rwanda and other cases of genocide and mass murder in the twentieth century. Topics include the nature, causes, and consequences of genocide in Rwanda, regional dynamics, the failure of the international community to intervene, and efforts to promote justice in the aftermath of conflict. Consideration of theories of genocide, and comparisons with other cases such as the Armenian genocide, the Holocaust, the destruction of the Herero, and war in Liberia and Sierra Leone.

**PSYCH-100-01** - Psychology - 2003-2004
(Fall) Introduction to Psychology
Credits/PE Units: 4; Requirements met: Meets Social Sciences III-A: Anthro, econ, geog, etc. requirement
How do we make decisions, form attachments, and learn a language? Can we inherit schizophrenia? Why are we fearful of some situations and not others? What factors influence the way we form attitudes or develop prejudices? This course addresses such questions to provide an overview of current research in psychology. Students discuss contemporary issues and explore psychological phenomena in the laboratory sessions. Students should sign up for the lecture and fourth hour as well as one lab section.
Notes: 2 meetings (75 minutes) plus fourth hour, 1 lab (2 hours); this course is offered both semesters - however, the department encourages first-year students to take it in the spring when class size is smaller and students can benefit from a smaller lab group
Instructors: F. Deutsch, K. Hollis

PSYCH-106-01 - Psychology - 2003-2004
(January) Contemplative Psychology
Credits/PE Units: 2; Requirements met: Does not meet a distribution requirement.
J-term is perfect for turning attention inward to the rich inner life to which contemplative methods afford access. Contemplative psychology is the study of deep sustained systematic introspection, looking inward at experience and articulating what one finds. All of the major religions offer methods of contemplation. This course will examine the writings of psychologists of religion (e.g., James, Batson) who study contemplative practice as well as the writings of contemplative practitioners themselves (e.g., Buddhist and Christian mystics.) In addition to class meetings, each student is required to practice a contemplative method of her choosing twice per day.
Prerequisites: Permission of instructor required.
Notes: 11 meetings (2.5 hours each). Jan 9: 10-11:30, Jan 12-21:9:30-12, Jan 22: 9:30-12 & 5:30-9 PM. Students must write a statement describing their experience with contemplative practice.
Instructors: S. Burggraf
Expected enrollment: 12
