### Worksheet to Plan Your Class Schedule

The most common teaching time combinations are in color on the left. Other times may overlap with these. Draw them in as needed.

Write the full “name” of each course you want including subject, course number, and section number, for example: 

ENGL-220AD-01

Remember that a course may include a “fourth hour” (50-minute additional meeting) and/or may require you to register also for a linked corequisite lab section.

Use this space for additional notes:
